

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 1

Approved at Mtg. #3
September 5, 2023

Tuesday, April 25, 2023, 4:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Haltinner, Justwan, Kenneth, Kenyon, Kirchmeier, Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals

Absent: Gauthier, Lawrence (excused), Rode, Strickland, Walsh

Call to Order: Vice Provost Kelly-Riley called the meeting to order at 4:30 pm.

Per FSH 1580 IV, the purpose of this meeting is to nominate candidates for the offices of chair and vice chair of the 2023-24 Faculty Senate. No other official business is conducted at this meeting.

Only senators who are faculty are eligible to run for faculty senate leadership positions.

For each office, nominations were collected by secret ballot. Fifteen responses were received out of 19 senators eligible to nominate. The nominees declared whether they accepted or declined the nomination. Nominees for the position of chair and/or vice chair who are absent will be asked whether they accept the nomination. For the chair seat: one nominee was absent and will be asked whether they accept the nomination; one nominee will consider it. All others declined. For the position of vice chair: one senator accepted the nomination and three accepted tentatively.

Elections will be held by secret ballot at the second meeting of the 2023-24 Senate, Tuesday May 2, 3:30 pm. Before voting begins, additional nominations may be made for each office.

Adjournment:

The meeting was adjourned at 4:50 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting # 1

Tuesday, April 25, 2023 at 4:30 pm
Zoom Only

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 2

Approved at Mtg. #3
September 5, 2023

Tuesday, May 2, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier, Haltinner, Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Reynolds, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals
Absent: Blevins (excused), Walsh

Call to Order: Provost Lawrence called the meeting to order at 3:34 pm.

Per FSH 1580 IV, the purpose of this meeting is to elect the chair and the vice chair of the 2023-24 Faculty Senate. No other official business is conducted at this meeting.

Provost Lawrence asked if there were additional nominations for either office. There were none. The candidates who accepted the nomination since the nominating meeting, April 25, 2023, will run for office.

Each candidate gave a statement about themselves and their leadership philosophy and answered questions from the senators.

Elections were held by secret ballot and in accordance with the procedures described in FSH 1580 IV-2. Provost Lawrence announced the results:

- 2023-24 Senate Chair: Jean-Marc Gauthier
- 2023-24 Senate Vice Chair: Kristin Haltinner

Adjournment:

Provost Lawrence adjourned the meeting at 4:07 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2023 – 2024 Faculty Senate – ~~Pending Approval~~
Meeting # 3

Approved at Mtg. #4
Sept. 12, 2023

Tuesday, September 5, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland
Absent: Tibbals (excused), Reynolds, Walsh

Guests/Speakers: Kristin Henrich, Cari Fealy, Karen Hume, Erin James

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2022-23 Meeting #28, April 25, 2023 were approved as distributed.
The minutes of the 2023-24 Meeting #1, April 25, 2023 were approved as distributed.
The minutes of the 2023-24 Meeting #2, May 2, 2023 were approved as distributed.

Consent Agenda:

- Sabbatical Leave Committee Recommendations
- Spring 2023 Candidates for Graduation

There were no requests to pull items out for discussion and vote. The consent agenda was approved by unanimous consent.

Chair's Report:

- Welcome to the Faculty Senate. I want to thank you in advance, Senators, for the time that you will spend here. I also want to thank many people involved with the committees and people from administration and leadership. The work done by Faculty Senate is important and I think that it has tremendous value for the University. The Faculty Senate can be sometimes very efficient and sometimes less efficient, but it has its own value. The multiplicity of senator voices is very unique, and the decisions generated by this process are diverse and enrich other leadership decisions. If some of the voices are missing, the shared governance process does not work the way it's intended to.
- These considerations are timely, as we are about to engage in a close relationship with a university where the academic culture is very different and shared governance is not practiced. Full time faculty make up 2% of the faculty, tenure and Faculty Senate do not exist. The collaboration with University of Phoenix is moving forward. As with any collaboration, there is a potential for imbalance, especially with differences in technology, efficiency, cost, and business model. Although we know that University of Idaho brings quality to this partnership, our efficiency and expedition of decision making need to be prioritized. At the Open Forum on August 14th, John Woods, chief academic officer of the University of Phoenix stated: "To operate separately except for the things that have a level of importance and prioritization." It is important that we invite Mr. Woods to a next session of Faculty Senate to better understand what are the expectations in this new situation. Timing is important if you look at the calendar. One of the deadlines is the November accreditation and the other one is at the end of the year. I think that it is important that Faculty Senate sends feedback to the accreditation body. We need

to know how and when to send our feedback to the accrediting body. There's a need to create pathways for this new partnership. The Faculty Senate should have a role to play creating academic pathways with University of Phoenix.

- In attachment #6, you will find the letter sent to all senators by 2022-23 Senate Chair and Vice Chair, Kelly Quinnett and Erin Chapman, to provide clarification about the NDA they signed in April 2023.
- Retreat Follow-up and Working Group Updates:
Senate Vice Chair Haltinner shared slides about Senate priorities compiled from the August 2023 Senate Retreat. She also showed a list of issues that should be referred to committees. The slides are attached to these minutes.

Discussion:

In reference to some of the proposed priorities for the full Senate to undertake, the Provost had some comments and suggestions: 1) Concerning budget transparency, soon there will be a website with all documents, data, communications, etc. about the budget model. 2) The Spread Pay Committee should be separate from the Benefits Committee. 3) President Green is working on multiple working groups for the University of Phoenix partnership.

Some senators asked whether Senate will be involved in the Working Groups. Provost Lawrence said that there will be calls for volunteers.

With regard to the "faculty technology choice" item, a senator wondered if there is any room for faculty choice, given the recent developments with APM 30.16. Chair Gauthier responded that the Technology Working Group will take a broader look – beyond hardware procurement.

A senator recommended to link senate priorities to faculty responsibilities as specified in FSH. This will ensure that our purview of those projects has a solid foundation in policy.

Vice Chair Haltinner moved to a list of issues to be referred to appropriate committees. For instance, the University Teaching Committees should look into limits on email set by OIT, which impact faculty who aren't using Canvas email. A senator noted that OIT can make "email groups" larger than the limits. Another senator added that Canvas is a way around the problem only if students opt in to receive email through Canvas. They will follow up on this issue.

Vice Chair Haltinner also called for a Faculty Senate Representative on the Campus Planning Advisory Committee and encouraged volunteers for the working groups that were just presented. The discussion on best strategies to focus our working groups on will continue.

Provost's Report:

- The shooting incident reported this morning through Vandal Alert is now resolved with the person being in custody.
- Enrollment: As of last Friday, the overall enrollment was up by 2.2% compared to the same day last year. This is the 10th day benchmark. After the 10th day, things can change, mostly because of dual enrollment, which goes by high schools' schedules.
 - This year, we welcomed the second largest first-year freshman class in UI history.
 - Hopefully, dual credit enrollment continues to be strong.
 - A couple of colleges have grown their enrollment.
 - It will take some time to find out how enrollment impacts the budget.

- Each week, the Provost will answer a couple of questions on the University of Phoenix acquisition. The Phoenix question page continues to be updated. No questions were submitted for the meeting today.
- Common Read: The choice for 2023-24 was “The Nature Fix: Why Nature Makes Us Happier, Healthier and More Creative,” by Florence Williams. The keynote for that is October 17 in the International Ballroom. Selecting the next common read is a year-long process. You can send suggestions for the 2024-25 Common Read to Dean Panttaja by September 30.
- COVID: There has been some increase in COVID cases lately. COVID rapid tests and K9 masks are available on campus, at the ISUB, the Pitman Center, or the REC information desk. We are working on offering COVID-19 boosters and flu vaccines.
- Childcare came up at the Senate retreat as an issue of concern. Childcare availability has decreased since the pandemic. Dean of Students Blaine Eckles is at the meeting today to address this issue and answer questions.

Dean Blaine Eckles:

The UI Children’s Center (UICC) is the only accredited one in Latah County. We are hoping to double its size, at the existing location, through a grant. We are meeting with the President tomorrow to discuss the proposal. To improve retention, we raised the salary for all childcare workers. If approved, this extension will not solve all short-term problems because it will take some time, but it’s a huge priority. President Green is aware of this need and is interested in this type of investment as long as it is financially solid. We don’t expect much push-back on this proposal. The center is currently at full capacity, with many waitlists for children of all ages. The main point is the grant, which would substantially offset some of the costs. We’ll be happy to report back with updates.

A senator inquired about childcare needs for students vs. employees. If students are prioritized, where does that leave employees? Dean Eckles replied that 62% of the parents using UICC are employees, 20% are members of the community, and 18% students. The majority of our students are between 18 and 22 years of age, and thus less likely to need childcare. Employees are not excluded. Also, when a child is in the program, we don’t pull them out to make space for someone else. Comment from the Secretary: perhaps 62% of UICC users are faculty and staff because students can’t afford the fees.

The senator also had a question about the possibility of after-school care for elementary school children. Dean Eckles responded that there is a Summer Vandals Camp for kids. He is currently exploring the possibility of creating a program available throughout the year, which could potentially address the senator’s question, and has asked the appropriate staff to come up with a white paper including a projection of needed resources. Dean Eckles is also talking with UICC about offering parents (after the extension of the center) the possibility of dropping off their children for a few hours on evenings or weekends. With the staffing problem, it will take some time.

Anything planned for the outside-of-Moscow centers? In Idaho Falls, there are mostly graduate students, many with families. The situation is challenging. Dean Eckles will discuss with his team to explore what options may be available and viable.

Chair Gauthier shared a suggestion from a constituent faculty: a larger room to accommodate their children while they work, in special situations such as when the child is sick or childcare is not available.

Committee Reports (vote):

- FSH 6580 Reproduction of Copyrighted Material – Kristin Henrich
The policy has been rewritten to remove redundant, outdated, and non-policy information. The Library maintains extensive copyright guidance on its website, where it can be updated as frequently as needed.
Moved to approve (Long, Kirchmeier).
Vote: 24/24 in favor. Motion passes.

Other Policy Business:

- FSH 2300 Student Code of Conduct – Cari Fealy, Associate Dean of Students.
This was a comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
The policy was rewritten using language more accessible and understandable for students. The Code of Conduct and disciplinary processes were combined in a single policy for ease of use. Processes related to Title IX Sexual Harassment were removed to align with the recently revised FSH 6100. We added clarifying language around academic dishonesty resolution. Language was added aligning with case law to follow best practices in student conduct policies. A section on free speech was added. The new policy has been approved by President Green on an interim basis and will go through the regular approval process. In the meantime, the office of the Dean of Students is seeking Faculty Senate feedback.

Discussion:

Vice Chair Haltinner observed, under the list of possible outcomes, some that are punitive, and others that are restorative or educational. Any opportunity to add more restorative outcomes? Cari Fealy noted that restorative outcomes fall under the informal resolution process when both parties are amenable to it. In such cases, the term “outcome” is not used because it would imply responsibility. At times when we utilize a “restorative reflections” process, it becomes a broader, educational outcome.

A senator noted that using “ChatGPT” to create a response to take-home work does not appear under the cheating and plagiarism categories. Cari recalled many conversations, including with CETL, about this item. They found out that some faculty allow it, others don’t. Thus, these behaviors are best left to the syllabus. Hence, the language in the policy includes anything that’s prohibited by the instructor, see Section E-1.

There was an inquiry about F-1. Reporting alleged violations, and the timeline for reporting. Comparing to the previous version, the senator sees a potential problem with equity in the reporting of cheating. Cari responded that, previously, under the code violation “Academic Dishonesty,” faculty were required to report all cases of academic dishonesty. The new version is a code of conduct for students, and detailed reporting protocols do not belong in it. Perhaps at some point we may consider a separate FSH policy on reporting in general and how it should be done to ensure due process.

Announcements and Communications:

- Interdisciplinary Sustainability Certificate Discussion – Karen Hume, Erin James.

Erin James provided context on the proposal and a brief history. In Fall 2021, President Green commissioned a Sustainability Working Group to suggest both academic and non-academic sustainability priorities. In August 2022, Sarah Dawson was hired as UI Director of Sustainability. In Fall 2022, the WG's White Paper was published, containing the recommendation to develop an undergraduate certificate in sustainability. In November 2022, an initial interdisciplinary committee comprised of faculty identified by deans or departments from all colleges was convened. The initial draft of the curriculum certificate was ready in January 2023 and presented to UCC in February 2023. UCC provided feedback on both the academic content and faculty jurisdiction issues. From then to the present, the WG has worked on revising the academic content *per* UCC recommendations and addressing faculty governance issues. The WG is here today to seek official empowerment from Faculty Senate to propose and maintain the certificate's academic curriculum. Pursuant FSH 4120, the relevant unit or college must submit curricular proposals to UCC. But this is a university-wide program, not suitable to be housed in a single college.

A senator congratulated the WG for their excellent revision work. They mentioned FSH 1520 Article I Section 4 Clause D in support of Faculty Senate's jurisdiction over this committee, eventually to become a standing committee. The Secretary agreed and cited FSH 1520 Article IV Section 11.

A senator expressed concern that the administration of the certificate, especially academic petitions, will result into considerable extra work for the Registrar's office.

The Faculty Secretary's understanding is that trained staff will handle the administrative part of the program, in consultation with the instructors. With components in social science, economics, and environmental science, housing the certificate in a single college doesn't seem like the best path.

Other senators expressed support for a permanent committee to be in charge of this certificate. Additional vetting comes from accreditation requirements, namely from outside the university.

Erin reiterated the very tight timeline they are on in order to meet the deadline for placing the proposal in the CIM que.

Given that only 5 minutes are left, the discussion will continue next week followed by a vote.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Chapman, Long). Meeting adjourned at 5:00 pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2022 – 2023 Faculty Senate – Pending Approval

Meeting # 28

Tuesday, April 25, 2023, 3:30 pm – 4:30 pm

Zoom only

Present: Call, Chapman (Vice Chair), Fairley, Gauthier, Haltinner, Hickman, Hunter, Justwan, Kolok, Long, Mittelstaedt, Murphy, Pfeifer, Quinnett (Chair), Raney, Reynolds, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Schwarzlaender, Silsby, Tibbals, Thorne, Walsh

Absent: Lawrence (excused), Wargo, Powell (proxy for Ahmadzadeh)

Call to Order: Chair Quinnett called the meeting to order at 3:34 pm.

Approval of Minutes (vote):

The minutes of the 2022-23 Meeting #27, April 18, 2023 were approved as distributed.

Chair’s Report:

- Chair Quinnett acknowledged the new senators and thanked those who are outgoing.
- Update on APM 30.16: On Thursday, Dakota Roberson (chair of the working group), Kelly Quinnett, Francesca Sammarruca, and Torrey Lawrence will meet with President Green. FSL will provide the senators with a written report about the outcome of the meeting.
- Chair Quinnett expressed deep gratitude to the FSL team: Erin, Francesca, and Cari.
- Many thanks to Diane Whitney, Diane Kelly-Riley, Mary Stout, and Torrey Lawrence.
- Some of the 2022-23 Senate highlights:
 - Paid Parental Leave – Thanks to Erin Chapman, who was a key person in this initiative.
 - Spread Pay – Thanks to Kristin and Deb for gathering feedback from the university community about the spread pay option. Brian Foisy, Brandi Terwilliger, and their teams are supportive of a July 2024 implementation.
 - APM 30.16 – The working group undertook a collaborative and respectful effort in response to faculty voices. Hopefully, there will be some news to report soon.
 - Non-tenure-track faculty taskforce – This wonderful group is advocating for a change in culture and, hopefully soon, in policy, to improve working conditions for our non-tenure-track colleagues.
- A warm welcome to all new senators and gratitude to those who are ending their terms.
- Thanks to the continuing senators for their time and commitment to shared governance towards building trust, promoting transparency, and improving communication across the university community.
- Chair Quinnett closed the chair’s report by sharing a poem and thoughts about the past year.

Provost’s Report – delivered by Vice Provost for Faculty Diane Kelly-Riley:

- Thanks to the 2022-23 FSL team for their compassionate leadership!
- Provost Lawrence is at the SBOE meeting, which is taking place at the Pitman Center today and tomorrow.
- The arboretum is starting to bloom!

- Engineering Expo: Friday and Saturday, April 28-29. It's a great event that brings people to campus, and an opportunity to see excellent work by our students.
- Commencement: two ceremonies in Moscow on May 13, at 9:30am and 2pm, one in Boise on the 16th and one in Idaho Falls on the 17th.
- University Excellence Awards and BBQ: May 4, 3:30pm, at the ICCU arena. Please come and celebrate our colleagues. <https://www.uidaho.edu/governance/faculty-staff/university-awards>
- Commencement: two ceremonies in Moscow at the Kibbie Dome on May 13, at 9:30am and 2pm. Graduation ceremonies in Boise will be on May 16, at 2pm, and in Idaho Falls on the 17th.
- The Vice Provost addressed a previously raised question about Dr. Rebecca Scofield and the role of the OGC in her defamation lawsuit. She referred to <https://www.uidaho.edu/governance/policy/policies/apm/01/01> , which explains that OGC cannot assist university employees with legal advice on personal matters.
- Thanks again to the 2022-23 FSL team and all who served as senators!

Discussion:

In response to a question, Vice Provost Kelly-Riley reported that the additional information about CEC that was previously requested is not yet available to the Provost. More to come.

Before proceeding to the next agenda item, Chair Quinnett warmly thanked the faculty secretary for her help and support throughout the year.

Committee Reports (vote):

- Committee on Committees
 - FSH 1620 University-Level Committees – Attach. #2
Revised to clarify definitions and procedures and to highlight that all faculty who have voting privileges and all board-appointed staff are welcome to serve on committees. All other revisions clarify the language: university-level standing committees include senate committees and “Other University-Level Standing Committees.” That’s why two separate lists appear in FSH 1640, to be addressed next.

Discussion:

A senator noted inconsistencies with capitalization. They also suggested that alternative language should be used to differentiate between “senate committees” and “other standing committees” that are not under senate purview. Discussion followed about whether or not the Committee on Committees has discretion in appointing senate members who are not faculty – staff representatives to senate are selected by their leadership, and so are student members. With regard to this issue, there seems to be some inconsistency between D-4 and D-5. After additional discussion, it was suggested to send these revisions back to the Committee on Committees to address inconsistencies and improve the language. Vice Chair Chapman agrees that this is the best course of action.

- FSH 1640 Committee Directory – Attach. #3

Directory: reorganized for clarity and consistency.
The three committees below are deleted because they are non-existing. The appropriate officials (Brian Foisy, Brandy Terwilliger, OCRI Director) were consulted about the deletion and had no concerns.

- FSH 1640.47 Fiscal Emergency Committee: deleted.
- FSH 1640.35 Disability Affairs Committee: deleted.
- FSH 1640.78 Shared Leave Committee: deleted.

The only actual deletion is:

- FSH 1640.94 Multi-Campus Communication Committee (MCCC). Remote communication has become a standard way to communicate. This committee, as presently described and charged, is obsolete. The faculty secretary chairs this committee but hasn't seen the need to call a meeting since 2020. Actually, an MCCC would be useful, but with a different scope.

Vote: 29/29 in favor. Motion passes.

Adjournment:

Chair Quinnett adjourned the meeting at 4:17pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

Attach. #2

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 1

Tuesday, April 25, 2023, 4:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Haltinner, Justwan, Kenneth, Kenyon, Kirchmeier, Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals

Absent: Gauthier, Lawrence (excused), Rode, Strickland, Walsh

Call to Order: Vice Provost Kelly-Riley called the meeting to order at 4:30 pm.

Per FSH 1580 IV, the purpose of this meeting is to nominate candidates for the offices of chair and vice chair of the 2023-24 Faculty Senate. No other official business is conducted at this meeting.

Only senators who are faculty are eligible to run for faculty senate leadership positions.

For each office, nominations were collected by secret ballot. Fifteen responses were received out of 19 senators eligible to nominate. The nominees declared whether they accepted or declined the nomination. Nominees for the position of chair and/or vice chair who are absent will be asked whether they accept the nomination. For the chair seat: one nominee was absent and will be asked whether they accept the nomination; one nominee will consider it. All others declined. For the position of vice chair: one senator accepted the nomination and three accepted tentatively.

Elections will be held by secret ballot at the second meeting of the 2023-24 Senate, Tuesday May 2, 3:30 pm. Before voting begins, additional nominations may be made for each office.

Adjournment:

The meeting was adjourned at 4:50 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 2

Tuesday, May 2, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Chapman, Gauthier, Haltinner, Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Reynolds, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals
Absent: Blevins (excused), Walsh

Call to Order: Provost Lawrence called the meeting to order at 3:34 pm.

Per FSH 1580 IV, the purpose of this meeting is to elect the chair and the vice chair of the 2023-24 Faculty Senate. No other official business is conducted at this meeting.

Provost Lawrence asked if there were additional nominations for either office. There were none. The candidates who accepted the nomination since the nominating meeting, April 25, 2023, will run for office.

Each candidate gave a statement about themselves and their leadership philosophy and answered questions from the senators.

Elections were held by secret ballot and in accordance with the procedures described in FSH 1580 IV-2. Provost Lawrence announced the results:

- 2023-24 Senate Chair: Jean-Marc Gauthier
- 2023-24 Senate Vice Chair: Kristin Haltinner

Adjournment:

Provost Lawrence adjourned the meeting at 4:07 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

MEMORANDUM

TO: Jean-Marc Gauthier, Chair, Faculty Senate
Kristin Haltinner, Vice Chair, Faculty Senate

FROM: Torrey Lawrence, Provost and Executive Vice President
Diane Kelly-Riley, Vice Provost for Faculty

DATE: June 5, 2023

SUBJECT: Items for Faculty Senate

Please see the below table with the faculty members who were approved for a sabbatical in the 2024 - 2025 Academic Year.

| NAME | COLLEGE | DEPARTMENT | SABBATICAL TERM |
|-----------------|--|-------------------------------------|------------------------|
| Somantika Datta | College of Science | Mathematics and Statistical Science | AY 2024-25 |
| Tao Xing | College of Engineering | Mechanical Engineering | Fall 2024 |
| Zachary Turpin | College of Letters, Arts and Social Sciences | English | Fall 2024 |
| Jason Johnston | College of Letters, Arts and Social Sciences | Music | Fall 2024 |
| Manoj Shrestha | College of Letters, Arts and Social Sciences | Politics and Philosophy | Fall 2024 |
| Greg Lambeth | Student Affairs | Counseling and Testing Center | Fall 2024 |
| Aleta Quinn | College of Letters, Arts and Social Sciences | Politics and Philosophy | Spring 2025 |
| Paul Rowley | College of Science | Biological Sciences | Spring 2025 |

Spring 2023 Candidates for Degree

COLLEGE OF AGRICULTURAL & LIFE SCIENCES

| | | | | |
|------------|-----------|------------------|-------------------------|--------------------------------|
| Collin | M | Aardema | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Saroj | | Adhikari | M.S. | Applied Economics |
| Jaylee | Marie | Allen | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Catherine | M | Beld | B.S.Pl.Sc. | Crop Management |
| Chelsea | Anne | Bence | B.S. | Human Dev & Family Studies |
| Heidi | Rose | Brackebusch | M.S. | Dietetics |
| Kaelie | Marie | Brown | B.S.Ag.Ed. | Agricultural Education |
| Caleb | Jay | Byington | B.S.Pl.Sc. | Crop Science |
| Drew | Emily | Carrell | B.S.Ag.Ed. | Agricultural Education |
| Mikayla | | Cavanaugh | B.S. | Child Development |
| Christy | L | Christian | Ph.D. | Plant Science |
| Meghan | N | Clancy | B.S.A.V.S. | Career & Tech Ed-Fam&Cons Sci |
| Krystal | Margaret | Conley Natividad | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Hailey | Grace | Crawford | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Melinda | Elizabeth | Cross | B.S.Ag.Ed. | Agricultural Education |
| Nolan | Donald | Cumming | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Jason | Robert | Damon | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Jeremy | Richard | Davies | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Aayush Raj | | Dhokal | M.S. | Applied Economics |
| Raquel | | Dimond | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Garrett | Richard | Dines | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Katherine | Margaret | Doumit | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Jovana | | Duarte | B.S.Erly.Chldhd.Dev.Ed. | Early Childhood Devel & Ed |
| Luke | Buchanan | Edwards | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Madelin | D. | Edwards | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Carmen | Jubilee | Eggleston | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Brooklyn | S | Epperson | M.S. | Animal Science |
| Fauwial | | Farid Khan | M.S. | Applied Economics |
| Clair | Lee | Feldmann | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Kaylee | S | Flodin | B.S.F.C.S. | Apparel, Textiles, & Design |
| Megan | Alexis | Follett | M.S. | Dietetics |
| Julia | R | Furioso | Academic Certificate | Ag Commodity Risk Mgmt |
| Cole | Mitchell | Garland | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Nathan | | Gelles | M.S. | Plant Science |
| Blazie | | Gilder | B.S. | Human Dev & Family Studies |
| Tara | L | Goertzen | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Zackary | Elijah | Goodnature | B.S. | Apparel, Textiles, & Design |
| Mackenzie | Beth | Griggs | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Sarah | Elizabeth | Hale | B.S.Pl.Sc. | Biotechnology & Plant Genomics |
| Maggie | Rose | Hammon | B.S.Ag.L.S. | Ag Science, Comm, & Leadership |
| Kiely | U | Hardy | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Kendra | Nicole | Harrison | B.S. | Child Development |
| Mikayla | L | Heimbuch | M.S. | Animal Science |
| Emily | Elizabeth | Hengehold | B.S.F.C.S. | CFCS-Child Dev Family Rel |
| Karina | | Hernandez | B.S. | Child Development |
| Harry | William | Hobbs | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Kylie | Marie | Holveck | B.S.Ag.L.S. | Ag Science, Comm, & Leadership |
| Maggie | Jo | Howard | B.S. | Human Dev & Family Studies |
| Anneliese | Nicole | Husaby | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Braydon | Jeter | Jensen | B.S.Pl.Sc. | Crop Management |
| Alejandro | | Jimenez Cortes | B.S.Pl.Sc. | Crop Science |

| | | | | |
|-----------|--------------|----------------------|----------------------|--------------------------------|
| Harleigh | Ann | Johnson | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Tiana | L | Johnson | M.S. | Dietetics |
| Adam | Richard | Kennedy | B.S.Pl.Sc. | Crop Science |
| Hannah | Lynne | Kindelspire | B.S.F.C.S. | Food and Nutrition |
| Tyler | Franklin | Lawrence | B.S.Pl.Sc. | Horticulture & Urban Agric |
| Megan | Jo | Limesand | M.S. | Dietetics |
| Torrey | Breanna | Long | B.S.F.C.S. | Apparel, Textiles, & Design |
| Charles | Kent | Lovelace | B.S.Ag.L.S. | Ag Science, Comm, & Leadership |
| Cecilia | Ann | Lucero | B.S.Pl.Sc. | Crop Management |
| Gabriela | Fernanda | Lupian | B.S.F.C.S. | CFCS-Child Dev Family Rel |
| Paul | | Macduff | B.S.S.W.S. | Agricultural Systems Mgmt |
| Angel | | Magana | B.S.F.C.S. | Apparel, Textiles, & Design |
| Gavin | Wallace | Merritt | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Katie | | Messerly | M.S. | Dietetics |
| Jayden | Keith | Mink | B.S.A.V.S. | Animal & Vet Sci-Business Opt |
| Kaitlin | Mackenzie | Mirkin | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Savannah | Reyanne | Moore | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Heather | B | Neace | M.S. | Water Resources-Sci & Mgmt Opt |
| Frank | Carew | Newman | B.S.S.W.S. | Agricultural Systems Mgmt |
| Joseph | Henry | Orrison | B.S.S.W.S. | Agricultural Systems Mgmt |
| Jennifer | Margaret | Ott | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Sophia | Rose | Oxarango | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Kiera | Mary | Packer | B.S.Ag.L.S. | Ag Science, Comm, & Leadership |
| Grace | | Park | B.S.F.C.S. | Apparel, Textiles, & Design |
| Kayla | Joy Victoria | Park | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Megan | Grace | Parnell | Academic Certificate | Ag Commodity Risk Mgmt |
| Hailey | J | Pelton | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Roberto | | Perez | B.S.Ag.L.S. | Sustainable Food Systems |
| Apryl | Lee | Peterson | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Emily | Rene | Peterson | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Cassidey | Lynn | Plum | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Derrick | | Pomi | B.S.S.W.S. | Agricultural Systems Mgmt |
| | | Quirino Souza Dayoub | | |
| Luana | | Zagato | M.S. | Plant Science |
| Sophia | Simone | Raasch | B.S.F.C.S. | Food and Nutrition |
| Rachael | Lane | Rager | M.S. | Dietetics |
| Justyne | Nichole | Rash-Collins | B.S. | Child Development |
| Hyrum | Scott | Rasmussen | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Melinda | Sue | Raymond | B.S.Ag.L.S. | Ag Science, Comm, & Leadership |
| Sarah | JoAnn | Reisenauer | B.S.Ag.Ed. | Agricultural Education |
| Danielle | Le | Reynolds | M.S. | Agricultural Education |
| Haley | Angell | Richardson | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Shasta | Raelynn | Richardson | B.S.Ag.Ed. | Agricultural Education |
| Cable | Jhett | Ricker | B.S.A.V.S. | Animal & Vet Sci-Productn Opt |
| Fisher | Liam | Ries | B.S.Pl.Sc. | Horticulture & Urban Agric |
| Daisy | Eva | Ruvalcaba | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Daniel | | Salas | B.S.A.V.S. | Animal & Vet Sci-Dairy Sci Opt |
| Morgan | Savannah | Schulz | B.S.Ag.Ed. | Agricultural Education |
| Ana | Christine | Segsworth | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Olivia | C | Shaul | B.S.A.V.S. | Animal & Vet Sci-Sc/Prevot Opt |
| Lovepreet | | Singh | M.S. | Food Science |
| Regann | Dawn | Skinner | B.S.Ag.Econ. | Ag Econ-Agribusiness Emph |
| Kayla | Raye | Slater | B.S. | Early Childhood Education |
| Jacob | Michael | Smith | B.S. | Food and Nutrition |

May 19, 2023

Dear Senators,

Considering the news out of the President's Office regarding the University of Idaho's acquisition of the University of Phoenix, Faculty Senate Leadership wants to provide clarification regarding our very limited role in this transaction: we were not part of a decision-making team, and we were made aware of negotiations regarding this acquisition only three weeks ago. At that time, we were asked to sign a Non-Disclosure Agreement (NDA) prior to being told any details.

At this meeting, President Green and Provost Lawrence asked us to brainstorm potential questions and concerns faculty might have regarding this affiliation. We produced 5 pages of questions/concerns within 24-hours of this meeting and submitted these comments to the administration. Because we had signed the NDA, we then had to wait until a public announcement was made to communicate with you about this matter.

We were told the working timeline would be tight regarding the finalization of negotiations, the announcements to the university community and the public, and the scheduling of the required Idaho State Board of Education special meeting; all to meet specific deadlines related to necessary regulatory approvals and accrediting bodies. However, we were not consulted on the timing of these announcements, falling at the end of academic year, 2022-23 contracts.

We have been fielding many questions regarding this acquisition and we want to ensure your questions and concerns get to President Green and Provost Lawrence. We wanted to take this opportunity to encourage you to utilize the survey created by the Office of the President to provide feedback and ask questions about this transaction, on the decision-making process, the opportunities and potential challenges for UI faculty, staff and students.

<https://www.uidaho.edu/president/communications/resources-information/university-of-phoenix-affiliation>

We wholly understand that the secretive nature of this acquisition process and the timing of the announcement can be perceived as problematic, particularly in the context of shared governance. We hope you will voice any questions or concerns you have regarding the process and rollout of this news to the president and provost. We have met with Provost Lawrence and have shared faculty concerns in this matter. Provost Lawrence has expressed to us the importance of faculty and staff input as we move forward. He wishes to create multiple platforms for faculty to share their views, make recommendations and brainstorm ways to contribute to a better future for all of us.

We do have confidence that in any future discussions of integration of the two Universities, faculty and staff input, through shared governance, will be prioritized. Please continue to make your voices heard as well as those of your constituents. Thank you for your service!

With Respect,
Kelly & Erin

Senate Priorities

Survey Results

Issues Senate Should Take On (>70%)

Ongoing Working Groups

- Spread Pay (Kristin)
- Contingent Faculty (Florian)

Proposed Priorities for Full Senate:

- Boundaries between AMP/FSH – Involvement in Policies Impacting Us
- Budget Transparency

Proposed New Working Groups

- Employee Retention Working Group
 - Priorities: Campus Climate Survey; Retaining Faculty; Raises; Well-Being
- Employee Benefits Committee
 - Priorities: Dependents Tuition Waiver Improvement
- University of Phoenix Working Group
- Technology Working Group
 - Employee technology choice
 - Student access (potentially?)

Issues Senate Should Refer to Committees (<50%)

Committee on Committees (Haltinner)

- Review current committees – make revisions
- Review current committee service allocation practices – improve for equity

Faculty Appeals Hearing Board (No Chair Yet)

- Function, power, and training

Admissions (Lori Baker-Eveleth)

- Equity Statement
- Admission Standards (required)

University Teaching Committee (Ling-Ling Tsao)

- Continue work on improving evaluation process (pick up from previous Senate working group)
- OIT email limits

Faculty Affairs Committee (Alistair Smith)

- Faculty off-contract work expectations

Other

- Sustainability – expand recycling (Sarah Dawson?)
 - Graduate Student – paid parental leave (GPSA?)
-

Service Needs

- Faculty Senate Representative on Campus Planning Advisory Committee
- Volunteer for working groups (previous slide) – email khaltinner@uidaho.edu

POLICY COVER SHEET

The policy was rewritten to remove outdated and non-policy information. Library maintains extensive copyright guidance on its website, where it can be updated as frequently as needed.

2. Fiscal Impact: What fiscal impact, if any, will this change have?

None.

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

FSH 6580
Reproduction of Copyrighted Material

A. Purpose

The purpose of this policy is to address proper use of copyrighted material at the University of Idaho in compliance with applicable policy and law, including federal copyright law.

B. Scope

This policy applies to all University of Idaho employees, students and affiliated individuals.

C. Policy

C-1. In general. It is the policy of the University of Idaho to comply with all U.S. copyright laws, including but not limited to Title 17 of the United States Code, the Copyright Act of 1976, and all subsequent amendments to copyright law. The University of Idaho recognizes that the exclusive rights of copyright holders are balanced by the limitations on those rights under federal copyright law. These limitations include the right to make a fair use of copyrighted materials in the course of face-to-face instruction and teaching activities, as protected under 17 U.S.C. §§ 107 (Fair Use), 108 (Reproduction by Libraries and Archives), 109 (First Sale Doctrine and Transfers), 110 (Teaching Exception) and other statutory exemptions and limitations to the exclusive rights granted to the owner of a copyright protected work.

C-2. Responsibilities. Every member of the U of I community is responsible for making their own good faith determination about the nature of their intended use of copyrighted materials in compliance with copyright law.

C-3. Guidance. The [Copyright Guide](#) maintained by the University of Idaho Libraries assists members of the U of I community in complying with federal copyright law. Members of the U of I community are expected to become familiar with and follow these guidelines.

C-4. Noncompliance. Employees, students and other university-affiliated individuals who willfully and with knowledge violate the University's copyright policy or other federal copyright laws may place themselves individually at risk of liability in the event of a claim of copyright infringement. In such cases, the University may refuse to defend or indemnify an employee named in an infringement of copyright action. Violation of this policy may also result in discipline up to and including termination.

D. Contact Information. For further assistance, contact the University of Idaho Libraries or the Office of General Counsel.

Comprehensive review? Yes No

- Policy/Procedure Statement:** Briefly explain the reason for the proposed change. Comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.

The following are the major changes to the policy:

- The policy was rewritten using language more accessible and understandable for students.
- The Code of Conduct and conduct process were combined in a single policy for ease of use.
- Removed processes related to Title IX sexual harassment to align with the recently revised FSH 6100.
- Added clarifying language around academic dishonesty resolution.
- Added language aligning with case law to follow best practices in student conduct policies.
- Added a section on free speech.

- Fiscal Impact:** What fiscal impact, if any, will this change have?

No direct impact.

- Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

CHAPTER TWO:
STUDENT AFFAIRS POLICIES

2300

STUDENT CODE OF CONDUCT & RESOLUTION PROCESS

CONTENTS:

- A. Introduction**
- B. Purpose**
- C. Scope**
- D. Definitions**
- E. Prohibited conduct**
- F. Conduct resolution process**
- G. Miscellaneous**

A. Introduction

A-1. The University of Idaho is committed to creating and maintaining a productive living-and-learning community that fosters the intellectual, personal, cultural, and ethical development of its students. Self-discipline and respect for the rights and privileges of others are essential to the educational process and to good citizenship. Student expectations include:

- Students are expected to show respect for order, civility, respect for the rights of others within and without the University as these attributes are demanded of good citizens.
- Students are expected to uphold the rights and dignity of others regardless of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or socio-economic status.
- Students are expected to uphold the integrity of the University as a community of scholars in which free speech is available to all and intellectual honesty is demanded of all.
- Students are expected to respect University policies as well as local, state, and federal law.

A-2. The University of Idaho conduct process works to balance the safety and security of the members of the University of Idaho community through personal accountability, reflection, and growth. Students have an opportunity to reflect on their choices, understand how their actions have an impact on those around them, and grow from the experience.

A-3. The University strives to provide a fair and consistent student conduct process based on university policy and best practices. By educating students to better understand how their decisions affect themselves and their community they learn

reflection, follow-up, and accountability. The Dean of Students Office collaborates with campus and community partners to provide resources and support to students.

B. Purpose

B-1. This Code contains regulations addressing reported student violations of university standards of conduct in a manner consistent with the requirements of procedural due process. In addition to the general expectations for conduct as set forth in this chapter, it contains a description of prohibited conduct.

B-2. The Dean of Students (DOS), or their designee, has primary authority and responsibility for the administration of the student conduct and resolution process. The DOS, upon finding, in its discretion, that there is a conflict of interest, or for other reasons necessary to effectuate the policy, may appoint an external person to serve in any of the roles created in this Code. The Dean of Students works with faculty, staff, hearing officers, and/or the student conduct board in the disposition of Student Code of Conduct violations. There is no standard discipline that applies to violations of the Student Code of Conduct. They range from informal resolutions to formal warnings, to community service to expulsion. In each situation, the nature and seriousness of the behavior, the motivation underlying the behavior, and precedent in similar cases are considered.

B-3. The Student Code of Conduct does not restrict speech that is otherwise protected, including speech that some may find objectionable. The interplay between freedom of speech and expectations for students is complex and we invite you to learn more about freedom of speech and the Dean of Students office student conduct processes as they relate to freedom of speech by directing inquiries to askjoe@uidaho.edu.

B-4. Findings of responsibility will be determined using a Preponderance of the Evidence Standard. The standard is satisfied if the reported conduct is deemed more likely than not to have occurred.

B-5. The University bears the burden of proving that a student engaged in misconduct by a preponderance of evidence. A “preponderance of evidence” means that quantity and quality of evidence which, when fairly considered, produces the stronger impression, and has the greater weight, and is more convincing as to its truth than the evidence in opposition – or in other words, the facts as determined by the Hearing Officer or Board indicate that it is more likely than not that the student violated this Code. Formal rules of evidence applied in courtroom proceedings do not apply to this process. Evidence that is determined to be relevant to a case, by the Facilitator or Board Chair, is admissible at a hearing. This may include direct evidence, circumstantial evidence, documentary evidence, hearsay evidence, and signed statements. This does not imply that all evidence admitted is equivalent in weight. Unduly repetitive information may be excluded.

B-6. The administration of the Student Code of Conduct and Student Conduct Process applies affirmative action and equal opportunity standards consistent with FSH 3060 and 3065. Additionally, this process is supported by nondiscrimination practices consistent with FSH 3200, 3210, and 3215.

C. Scope

C-1. Individuals subject to the Code

a. Students

1. By enrolling at the University of Idaho, students voluntarily accept responsibility for compliance with all University policies including the Code.
2. Students are responsible for their behavior from time of admittance to the University through the awarding of a degree, even though conduct may occur before classes begin or after classes end. Students are responsible for their conduct during the academic year and during periods between enrollment terms.
3. The University recognizes that students may also be employees, and their conduct may be subject to review and discipline under this Code and any applicable employment policies.

b. Reporting parties. Employees and students who are reporting student behavior that may be prohibited by the Student Code of Conduct.

c. Other. Employees and students who are otherwise involved in the conduct process.

C-2. Behavior subject to the Code

a. The Code applies to conduct that occurs on University property, within or at University-sponsored activities, off campus, online, or through other electronic means.

b. The University may address off-campus behaviors when the Dean of Students or university designee determines that the off-campus conduct affects a University interest. University interests include but are not limited to health and safety, protection of rights or property of others and promoting the University's mission.

c. Jurisdiction for the DOS to address student behavior or misconduct begins upon admission and ends at commencement. If serious misconduct was committed while a student was enrolled but is reported after graduation, the University may invoke the disciplinary process referred to in Article III and may revoke the student's degree if they are found responsible.

d. If a student withdraws from school while a conduct matter is pending, the Code remains applicable to the student's conduct prior to withdrawal.

e. The University reserves the right to proceed with the conduct process in a student's absence or to delay the process until the student seeks re-enrollment.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- f. Depending on conduct process outcomes, a hold may be placed on the student's ability to re-enroll and the student may be required to satisfy all outcome requirements prior to re-enrollment eligibility.
- g. Behavior conducted online, or through any other electronic medium, including online postings, video, photographs, blogs, web postings, chats, and social networking sites is in the public sphere and is not private and falls within the jurisdiction of this Code provided the other criteria, e.g., student status, are satisfied.
- h. If the prohibited conduct involves a student organization, the individual students are subject to this Code, and the organization is subject to FSH 2350 Student Organization Code and Resolution Process.
- i. DOS encourages all behavior to be reported in a timely manner but understands that barriers may exist to reporting prohibited behavior and that some reported behavior warrants DOS review for conduct proceedings even if the reported behavior occurred well in the past. DOS has discretion to initiate conduct proceedings for all reported behaviors, regardless of time of occurrence, based on the nature of the totality of the circumstances.

D. Definitions. The following definitions explain the terminology used in this Code. Particular code violations are listed and defined in Section E Prohibited conduct.

D-1. Academic dishonesty: Intentional participation in deceptive practice in one's academic work or the academic work of others. Examples include cheating, fraud, plagiarism, or falsification of research results and are individually addressed and more fully defined in Article II .

D-2: Academic outcome: A consequence imposed by instructors for findings of academic dishonesty. Academic outcomes include, but are not limited to, grade adjustments, failing a class, or resubmission of academic work.

D-3: Academic work: Any academic work required for completion of academic requirements in a course. Academic work includes but is not limited to assignments, quizzes, examinations, problem solving, class exercises, and/or drafts of work.

D-4: Administrator: The Dean of Students or designee will serve as the administrator. The administrator can serve as a decision-maker and is the non-voting advisor to the Student Conduct Board and each SCB hearing panel.

D-5: Advisor: The person of the student's choosing who has agreed to advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

D-7: Complainant: An individual who was subject to alleged misconduct described in the Student Code of Conduct. There may be more than one complainant for an incident. In certain circumstances, the Dean of Students or another University official may assume the role of complainant on behalf of the University.

D-8: Conduct decision: A written decision determining the resolution of the reported behavior. The decision will include a finding of responsible or not responsible and any applicable required or suggested outcomes.

D-9: Conduct record: The student conduct record maintained by the Dean of Students in connection with a reported violation or violation of the Code. The student conduct record may include complaints, notices, hearing records, conduct findings, outcomes, and other documents deemed relevant by the Dean of Students.

D-10: Consent: Knowing, voluntary, and clear permission by word or action to engage in activity with another individual(s), not limited to sexual activity. Consent can be withdrawn at any time upon notice, by word or action, to the other party.

D-11: Days: Days that the University is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

D-12: DOS: The Office of the Dean of Students, which is responsible for the administration of the Student Code of Conduct and includes the Dean of Students and their designees.

D-13: Educational setting: All academic, educational, extracurricular, athletic, and other programs of the University of Idaho, regardless of location, including online formats.

D-14: Finding: A conclusion reached as result of an inquiry, investigation, or hearing and is also referred to as a decision.

D-15: Formal resolution process: A conduct process by which notice and opportunity to be heard is provided and that often includes a student conduct process occurring before a Hearing Panel which issues a written decision following the hearing.

D-16: Hearing: A formal process maintained by the University to review and address allegations of violations that follows the process and rules outlined in this Code but is not subject to other external rules (such as federal or state evidentiary rules or procedures).

D-17: Hearing officer: A person appointed by the Administrator to serve as the person presiding over a hearing. The hearing officer investigates the alleged

behavior and administers the conduct process for informal resolutions. The Administrator may also serve as the hearing officer.

D-18: Hearing panel: A panel composed of members of the Student Conduct Board, who are selected by the Student Conduct Board chairperson for purposes of hearing a formal resolution process and issuing a written decision that may include findings.

D-19: Informal resolution process: An alternative method of resolving a matter under this Code, entered into willingly by all parties as well as by the University, that seeks to address and resolve the alleged conduct or harm without the use of the formal process outlined below.

D-20: Instructor: In cases of academic dishonesty, the instructor may be the faculty member, teaching assistant, or other employee responsible for course instruction.

D-21: Investigator: The person assigned by the University to investigate a report of a violation of the Code. The investigator may be any qualified person assigned by DOS.

D-22: Mediation: An intervention between conflicting parties to promote reconciliation, settlement, or compromise.

D-23: Misconduct: Behavior that is prohibited by the Student Code of Conduct or that violates a University directive or policy.

D-26: Office of Civil Rights & Investigations (OCRI): The Office at the University that is responsible for ensuring compliance with federal and state laws related to discrimination or harassment based on a protected class. This includes retaliation when engaging in a protected process. OCRI undertakes necessary investigations and prepares recommendations and written reports that may be reviewed by the DOS for further conduct processes related to the underlying facts investigated and the nature of the reported behaviors of students investigated by their office.

D-27: Outcome: Disciplinary or corrective action imposed by the deciding body of a student conduct process following a finding of student misconduct. The term includes, but is not limited to, educational programming, restitution, community service activities, apology letters, probation (including denial of specified University privileges), suspension, termination, or other such outcomes deemed appropriate.

D-28: Parties: The Respondent(s) and the Complainant(s).

D-29: Policy: The written regulations of the University as found in, but not limited to, the Faculty Staff Handbook, including the Student Code of Conduct, the Administrative Procedures Manual, the Residence Hall Handbook, all Housing and

Residence Life policies, and Graduate and Undergraduate Catalogs.

D-30: More likely than not standard: The standard of evidence that is used to decide responsibility of Code violation in a hearing, it means that it is more likely than not, based upon the totality of all relevant evidence and reasonable inferences from the evidence, that there is a violation of the Code.

D-31: Probation: The process or period of observing the character or abilities of a student to determine whether other corrective action should occur. An additional resolution process is not necessary to modify outcomes following a finding of misconduct where probation is imposed. The DOS has discretion to modify the terms of probation as necessary based on the information available to the DOS during a student's probation.

D-32: Respondent: The student who is alleged to have violated the Code.

D-33: Student: Includes, but is not limited to, all persons admitted to the University, either full time or part time, online or in person, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

a. **Persons** who are suspended, or those who withdraw or graduate after allegedly violating the Code of Conduct.

b. **Persons** who are eligible to enroll for classes without applying for re-admission.

c. Individuals participating in the American Language and Culture Program, Independent Study of Idaho sponsored by the University of Idaho, the University of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

D-34: The Code: The Student Code of Conduct and Conduct Resolution Process.

D-35: Student Conduct Administrator (Administrator): The University of Idaho official designated by the DOS to serve as an investigator or hearing officer. It will also include the Administrator's designee.

D-36: Student Conduct Board (SCB): The formal body that reviews student conduct matters, as set forth in this Code.

D-40: Weapon: Weapon is defined in APM 95.12.

Commented [W(1)]: Embedded link

E. Prohibited conduct. Specific behaviors of misconduct are identified and defined

below.

E-1. Academic dishonesty. Acts of academic dishonesty include but are not limited to the following:

- a. Cheating.** Cheating includes, but is not limited to, the following actions as they relate to academic work:
 - (1) Using, purchasing, providing, or possessing unauthorized materials, sources, or assistance without authorization from the instructor.
 - (2) Copying from another's academic work either for the student's own use or for the use of others.
 - (3) Sharing academic work without prior permission from instructor.
 - (4) Acquiring, without written or verbal permission, tests or other academic material belonging to the instructor or another member of the University faculty or staff.
 - (5) Completing academic work for someone else or having someone else complete academic work on your behalf.
 - (6) Representing another student in a class for attendance or participation purposes or asking another person for representation for attendance or participation purposes.
 - (7) Fabrication or falsification of data, research or academic content and the unauthorized alteration or invention of any information or citation.
 - (8) Forging, altering, reproducing, removing, destroying, or misusing any University document, record, or instrument of identification.

- b. Plagiarism.** Plagiarism includes, but is not limited to, the following:
 - (1) Using, by paraphrase or direct quotation, the published or unpublished work of another person without full and clear acknowledgment.
 - (2) The unauthorized alteration or invention of a citation.
 - (3) Buying or selling academic work for the purpose of submitting it for course completion.
 - (4) Submitting academic work, or any part of academic work, completed for one course as work for another course without the express prior approval of both instructors.

- c. Prohibited behavior.** Engaging in any behavior related to course completion prohibited by the instructor or otherwise including but not limited to unauthorized collaboration and reliance on prohibited technological assistance/artificial intelligence tools.

- d. Misrepresenting facts for academic advantage.** Examples include

but are not limited to providing false academic achievements and false medical documentation for academic extensions.

- e. Violation of University policy regarding intellectual property and research.** All data acquired through participation in University research programs is the property of the University and must be provided to the principal investigator. In addition, collaboration with the Office of Research and Economic Development for the assignment of rights, title, and interest in patentable inventions resulting from the research is also required. See FSH 3200 and 5400.

E-2. Disruption or misuse of University resources or property. This behavior includes but is not limited to the following:

- a. Theft or damage.** Attempted or actual theft of or damage to University property.
- b. Unauthorized possession.** Unauthorized possession, duplication, or use of University keys, lock combinations or other access codes or passwords that can be used to access University property or facilities.
- c. Unauthorized entry or use.** Unauthorized entry into or use of any University owned or managed building, space, outdoor area, or property. This also includes other restricted areas identified in **APM 35.35**.
- d. Violation of law or other policy.** Violation of local, state, federal or campus fire policies including but not limited to:
 - 1. Building or setting fire(s) without proper authorization as required by **APM 35.25**.
 - 2. Removing or otherwise tampering with fire equipment or fire alarm systems.
 - 3. Failure to promptly vacate a building
 - 4. Intentionally or recklessly causing a fire that damages University or personal property or causes injury.
 - 5. Causing, making, or circulating a false report or warning of fire, explosion or another emergency.

E-3. Misuse of technology resources. Theft or other abuse of University computer facilities or resources. This includes but is not limited to the following:

- a.** Unauthorized entry into, or transfer of a file.
- b.** Using another individual's identification or password.
- c.** Interfering with the normal operation of the University computing system or resources.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- d. Any violation of the University Computer Use Policy.
- e. Inappropriate or disproportionate use of an IT resource owned or controlled by the University.
- f. Using an IT resource for an illegal, threatening, or intentionally destructive purpose.
- g. Circumventing University system or network security measures.

E-4. Threat of harm or actual harm to a person's physical or mental health or safety. This behavior includes but is not limited to the following:

- a. **Behavior involving physical force or threat of physical force.**
Behavior involving physical force that hurts another person or intimidation or threat of such force directed at another person where a reasonable person would believe the threat to be serious and imminent in nature. It includes the following:
 - 1. **Fighting.** Engaging in violence, combat, or aggression.
 - 2. **Assault.** Behavior intended to cause apprehension of harmful or offensive contact that causes apprehension of physical safety of another. The act required for an assault must be overt. Although words alone are insufficient, they may create an assault when coupled with some action that indicates the ability to carry out the threat and it creates a fear of it being carried out in the person the assault behavior is directed at.
 - 3. **Battery.** Actual and intentional unwanted touching or contact with another person, even if the physical injury is slight.
 - 4. **Use of a knife, gun, or other weapon.** The use of a knife, gun, or other weapon except in reasonable self-defense in any act of violence as defined in the Code.
 - 5. **Involuntary restraint or transport.** Restraining or transporting a person against their will.
 - 6. **Other.** Any action that threatens or endangers the physical health or safety of any person.

b. Prohibited harassment

- 1. **General definition.** Prohibited harassment is hostile or threatening conduct or speech, whether verbal, written, or symbolic, that:
 - (a) Is sufficiently severe or pervasive, as viewed by a reasonable person under similar circumstances and with similar identities to the victim, and results in an objectively hostile or threatening environment that interferes with or diminishes another's ability to participate in or benefit from the services, activities, or privileges provided by the University. and

(b) Describes with personal particularity or is personally directed to one or more specific individuals.

2. Definitions used for sex- or gender-based harassment. When harassment is sex or gender based, the definitions used to determine coverage can be found in FSH 6100. Violations that meet the definitions of FSH 6100 but that do not occur within the covered Applicability of paragraph B of that policy, may be investigated and determined under this Code.

3. Exception. Speech that is protected by the First Amendment to the United States Constitution, including relevant academic speech spoken in a classroom or writing assignment, protests and statements that do not meet the narrow definition described above, is not a violation of this Code, though it may go against community norms and may be harmful or hurtful to other members of the University community or members of certain groups.

c. Threatening or intimidating behavior. Threatening or intimidating behavior includes, but is not limited to:

1. Coercion. The practice of persuading someone to do something by using force or threats.

2. Bullying. Behavior seeking to harm, intimidate, or coerce another.

3. Deliberate destruction of or damage to property. Deliberate destruction of or damage to public or private property, where a reasonable person would believe that the full or partial intention of the act is to harass an individual or a group based on protected characteristics as defined in [FSH 3200 Policy of Nondiscrimination](#).

d. Hazing. Hazing includes, but is not limited to, any action or participation in any activity that (i) causes or intends to cause physical or mental discomfort or distress, (ii) may demean any person, regardless of location, intent, or consent of perpetrators or victims or (iii) destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in, a group or organization. The express or implied consent of the victim will not be a defense. Apathy or acquiescence in the presence of hazing are not neutral acts. they are also violations of this rule.

Hazing also includes any activity that compels a student to participate in

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

any activity that is unlawful, publicly indecent, or contrary to the policies and regulations of the University, or any activity that unreasonably and materially interferes with a student's academic efforts.

E-5. Discrimination and retaliation.

- a. Discrimination.** Discrimination includes conduct that violates the Board of Regent's or the University's nondiscrimination and antidiscrimination policies contained in FSH 3200, 3210, or 3215.
- b. Retaliation.** Retaliation includes conduct that intimidates, interferes with, threatens, coerces, or otherwise discriminates against any individual because that individual opposes or reports a perceived wrongdoing, inequity, or violation of law or University policy, files a complaint alleging illegal or prohibited discrimination, participates in a grievance or response procedure, or participates in dispute resolution.

E-6. Disruption, obstruction, or interference with normal University activities. Members of the University community have the right to a campus that is free from unreasonable disruption, obstruction, or interference. Disrupting or obstructing normal University activities, including, but not limited to, all academic activities, University programming, athletic events, and administrative functions is prohibited. Examples include:

- a. Classroom disruption:** Behavior that interferes with the teaching or learning process in the classroom or educational setting and continues after an instructor's request to cease.
- b. Obstruction of the free flow of pedestrian or vehicular traffic on campus.**
- c. Conduct that is lewd, indecent or disruptive that is not otherwise constitutionally protected speech.**
- d. Falsifying, distorting, or misrepresenting information provided to the University.**
- e. Interference with the student conduct system, which includes, but is not limited to, any of the following:**
 - 1. Failure to cooperate with the University's investigation or disciplinary proceeding.** If a party in a case does not want to participate because they believe that doing so would cause them to speak or offer evidence against themselves, and they notify the DOS that this is the reason they are choosing not to participate or only to participate partially, this violation will not apply.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

2. Disrupting or interfering with the University's investigation and student conduct proceedings.
3. Making false allegations.
4. Attempting to discourage an individual's proper participation in, or use of, the student conduct process.
5. Harassment (verbal, physical, written, or electronic) or intimidation of any person participating in the University's investigation prior to, during, or after the investigation and conduct process concludes.
6. Failure to comply with the outcome(s) imposed pursuant to the disciplinary process.

f. Influencing or attempting to influence another person to commit any violation of the Code.

g. Engaging in speech, including but not limited to verbal, electronic, or written communication, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

E-7. Use and Misuse of Substances

a. **Smoking.** Smoking in violation of APM 35.28.

b. Drugs and controlled substances

1. Using, possessing, manufacturing, cultivating, selling, or distributing any state or federally controlled drug, designer/synthetic drug, or substance, including, but not limited to, cannabis, heroin, narcotics, or other controlled substances, in violation of any applicable law or University policy.
2. Possessing or using any paraphernalia used for drug consumption. Paraphernalia includes but is not limited to bongs, bowls, pipes, or any homemade smoking device.
3. Using, possessing, selling or distributing prescription or over-the-counter medications by an individual for whom it was not prescribed.
4. Inhaling or ingesting any substance (e.g., nitrous oxide, glue, paint, etc.) that is intended to alter a student's mental state without a prescription.
5. A violation may also occur when the odor of an illegal or controlled substance or drug is present when more than one individual can reasonably trace it to a specific individual.

c. Alcohol

1. Consuming, possessing, manufacturing, or distributing alcoholic beverages in violation of any applicable law or University policy (see APM 80.01 for alcohol permit requirements and APM 95.31 for alcohol policy).

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

2. For persons under 21, the use or possession of alcoholic beverages. public intoxication or excessive consumption of alcohol. disorderly or irresponsible conduct resulting from consumption of alcohol.
3. For persons over 21, the use or possession of alcohol in public areas where alcohol is not permitted. excessive consumption of alcohol resulting in disorderly or irresponsible conduct.
4. Selling, distributing, or furnishing alcohol to a person under 21 years of age.

E-8. Housing and living groups. Violations of any rules imposed by University Housing or living groups outlined in the Housing contract and Housing handbook.

E-9. Violation of University policy. Violation of published University policies, rules and regulations.

E-10. Violation of law. Any violation of federal law, state law, or local ordinance may be a violation of the Code, independent of the status of any civil or criminal litigation in court or criminal arrest and prosecution. Decisions made or outcomes imposed under this Code will not be subject to change because criminal charges arising out of the same facts were adjudicated in a civil or criminal court process. The University will cooperate as appropriate with law enforcement and other agencies in the enforcement of criminal law and in the conditions imposed by criminal courts for the rehabilitation of student violators provided that the conditions do not conflict with University policies.

E-11. Furnishing false information, refusal to identify, and refusal to comply

- a. Furnishing false information or false representations to any person working for or authorized to act as an authority on behalf of the University.
- b. Refusal to identify oneself to an institutional representative in response to a request when on any University owned or managed property.
- c. Failure to comply with directions of a University official, law enforcement, fire department, or other government official acting in performance of their duties.
 1. Identification includes giving one's name, substantiated by a current driver license or student identification card or other official documentation, or by stating truthfully whether one is a student of the University or not.
 2. An institutional representative includes any employee, faculty member, or representative of the University, and any attorney, peace officer, or campus security officer of the University acting under the authority of the University.
- d. Using false identification or another individual's identification card to procure goods, entry or services.

- e. Submission of false information or withholding requested information at the time of admission or readmission.

E-12. Firearms, explosives, and other weapons. Possessing or using firearms, explosives, other weapons, projectile or explosive devices or substances, or dangerous chemicals in violation of APM 95.12, APM 35.34, or APM 35.35.

E-13. Disruption to community

- a. Attempted, threatened, or actual theft of or damage to another's property.
- b. Unauthorized entry into or use of another's property.
- c. Excessive noise, amplified sound, or music that produces a level of noise that disrupts members of the community.

F. Conduct resolution process

F-1. Reporting alleged violations

- a. The DOS will accept reports from anyone with knowledge of potential Code violations. Reports must be made to the DOS. Reports of Title IX and related violations covered by [FSH 6100](#) will not be reviewed under this Code but will be accepted by DOS and then forwarded to the Title IX Coordinator or other appropriate office for review. Allegations against Student Organizations will be addressed as per the Student Organization Code of Conduct, FSH 2350.
- b. Reports should be in writing but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the incident takes place.

F-2. Initial review. The DOS will review all reports of Code violations. The purpose of the review is to gather relevant information concerning each allegation and determine whether further investigation is warranted. When appropriate, the DOS will transfer the notice and investigation process to the Office of Civil Rights & Investigations (OCRI). The initial review may include interviewing the involved parties and witnesses without formal notice.

F-3. Notice of allegation.

- a. Following the initial review, the hearing officer will determine whether to initiate the conduct resolution process. In order to initiate that process, the hearing officer will provide notice of reported Code violation(s) to the respondent.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. The notice informs the respondent of the reported Code violations including a short description of the basis of the reported violation.
- c. The notice may include resolution options if further investigation is not required. Resolution options are detailed in the Hearing Process section below. If further investigation is required, the notice will include details of the investigative process.
- d. The notice will include a link to or copy of this Code.
- e. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.
- f. If a respondent does not participate in the initial meeting, the hearing officer will make reasonable attempts to reach the respondent for five business days. If there is no response, the hearing officer will determine the appropriate resolution process.

F-4. Initial meeting. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.

F-5. Interim action.

- a. At any time before a final institutional decision, the Administrator, or designee, may impose restrictions on a student or separate the student from the University community pending the final institutional decision. If circumstances allow, the Administrator (or designee) should meet with the student prior to imposing the interim action.
- b. Other than issuance of no-contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when the Administrator determines that the student represents a threat of serious harm to any person. the student is facing allegations of serious criminal activity. the action is necessary to preserve the integrity of the investigation. the action is necessary to preserve University property. or the action is necessary to prevent disruption of, or interference with, the normal operations of the University.

- c. After the hearing decision, pending any response review of the decision, the Administrator may impose an outcome issued by the Hearing Panel as an interim action at the discretion of the Administrator.
- d. Interim actions may include, but are not limited to, the following:
- Suspension from the University pending a final institutional decision.
 - Issuance of a no-contact order.
 - Exclusion from University property.
 - Removal from the residence halls.
 - Removal from extracurricular activities, including participation on athletic teams.
 - Withholding the award of a degree pending the conclusion of the investigation and hearing process. or
 - Any other action deemed necessary and appropriate by the Administrator to maintain orderly and appropriate University operations.
- e. When a student is suspended from the University, or directed not to attend certain classes, alternative coursework options may be pursued, with the approval of the Administrator and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.
- f. An interim action must be issued in writing and is effective when the Administrator delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.
- g. The respondent may submit a response to the issuance of any interim action by filing a response with the Administrator. There are no formal procedures for this response, and the interim outcomes remain in effect unless removed by the Administrator.
- h. A violation of the provisions of an interim action will be considered a violation of the Code.

F-6. Informal resolution process: Decision by hearing officer

- a. During the initial meeting, the respondent may be given an opportunity to resolve the complaint informally. All parties must mutually agree to engage in the Informal Resolution Process. The Informal Resolution Process may also be used when the respondent is not participating.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. At any point in the Informal Resolution process, any party may request a Formal Resolution Process, described below. The hearing officer may refer a matter to Formal Resolution Process at any point during the Informal Resolution process.
- c. In the Informal Resolution Process, the hearing officer determines based on the preponderance of the evidence whether the respondent is responsible for a code violation and determines the outcomes. The hearing officer will first meet with the parties (if applicable), share available information, and hear their response, if any. A respondent may also accept responsibility for a Code violation at any point in the process. If the respondent accepts responsibility, the hearing officer will determine the outcomes.
- d. Informal Resolution decisions are not subject to response review.
- e. If the respondent does not participate and a decision is made through Informal Resolution, the respondent may request their case to be reopened. Requests must be made in accordance with the instructions in the outcome notice and received no later than five (5) days after that outcome notice. If the request is timely submitted, the hearing officer will offer to meet with the respondent. During that meeting the respondent can share information with the hearing officer. The hearing officer reserves the right to update the decision of responsibility and any applicable outcomes after meeting with the respondent. The hearing officer will notify the respondent within five (5) days whether the decision of responsibility or applicable outcomes have changed.

F-7. Formal resolution process: Decision by Administrator or Student Conduct Board

a. Investigation

- 1. The University will investigate the allegations. At any time during the investigation, either the complainant or the respondent may, but is not required to, provide information to the investigator for consideration. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask other Parties or other witnesses, etc. Except in the rare circumstances described in this Code, only information that is presented to the investigator may be used in a hearing.

2. The investigator will provide the interview summaries to all parties and witnesses to review and provide additional comments and clarifications. Comments must be received within five days of receiving the interview summaries. The investigator will revise the interview summaries based on relevant comments provided by the parties and witnesses.

b. Preliminary report review

1. At the conclusion of the investigation, the investigator will draft a Preliminary Report of Investigation (Preliminary Report). The preliminary report will include the steps taken during the investigation., a list of witnesses contacted. a detailed summary of any witness interviews. a detailed summary of any interviews of the respondent or complainant (if applicable). a detailed summary of any other information considered as part of the investigation. and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the respondent or the complainant.
2. The Preliminary Report will not include any conclusions, findings, or credibility analysis.
3. The parties will be provided an opportunity to review the Preliminary Report and may provide a written response to the Preliminary Report within five days of the review of the report. A party will be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.
4. After the time for submitting a written response to the Preliminary Report has passed, the investigator will review any responses received and determine whether additional investigation is needed. After addressing the responses, if any, the investigator will incorporate the responses into the final report.
5. The investigator has sole discretion of determining whether sufficient information has been obtained to end the investigation process.

c. Final Report of Investigation

1. The Final Report of Investigation (final report) will include the following:
 - Everything included in the Preliminary Report,
 - Complete copies of any timely-submitted written responses to the Preliminary Report,
 - A credibility analysis, and
 - Findings of facts.
2. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The investigator may serve as the Administrator's designee to send out the final report to parties.
3. The credibility analysis is an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be part of the finding of facts. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.
4. The findings of facts will include a description of the basis for each finding. Each finding will be based on a more likely than not standard and will include a rationale based on supporting documentation or information such as information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the respondent, complainant and/or witnesses.

d. Review by Administrator

1. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The parties may submit a written

response to the final report to the Administrator no later than five days after the final report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the final report.

2. Decisions are made either by the Student Conduct Board (SCB) after a hearing or by the Administrator after their review. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the final report is provided to the parties. The Administrator may also decide to refer matters to the SCB.

e. Decision by Administrator

1. If a matter is not referred to the SCB for a hearing, the Administrator will decide whether the respondent violated the Code. The Administrator will make the decision based on the information contained in the final report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
2. The Administrator will adopt the findings and credibility analysis contained in the final report if the Administrator finds that they are more likely than not to be accurate. Any additional or different findings issued by the Administrator must be based on a more likely than not standard.
3. If the Administrator determines that the respondent violated the Code, the Administrator will determine the appropriate outcome.
4. The Administrator's decision will be in writing and include the basis for the decision. The written decision will be simultaneously provided to the parties.
5. The Administrator's decision may be subject to a response review in accordance with this Code.
6. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms of appropriate alternative resolution. All parties must agree to participate with DOS in an alternative resolution process.

6. Hearing and Decision by Student Conduct Board

1. **Student Conduct Board in general.** The description and makeup of the SCB can be found in FSH [1640.83](#).
2. **Conflict of interest.** A member of the SCB will not serve on any Hearing Panel or Response Review Panel in any case where the member has a conflict of interest or bias for or against either party.
3. **Training required.** A member cannot serve on either a Hearing Panel or Response Review Panel until the member has completed training as required by DOS.
4. **Confidentiality.** Proceedings before the SCB, whether before a Hearing Panel or Response Review Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.
5. **Notice of Hearing.** In matters referred to the SCB, the Administrator (or designee) must send written notice of the hearing to the SCB and the parties. The notice will include the following:
 - a. the specific provision(s) of the Code the respondent is accused of violating.
 - b. a short description of the basis of the alleged violation,
 - c. the date and time for the hearing, and
 - d. the deadline for submitting written materials to the Administrator.
 - e. a link to or copy of the final report and any responses to the final report which were timely submitted to the Administrator.

6. Scheduling

The hearing will be held no fewer than five days after the notice is provided to the parties, unless extended by the Administrator. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator will have the sole discretion as to whether to reschedule the hearing. Except in cases

of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

7. Consolidation

If a report of a violation of the Code involves more than one respondent, the Hearing Panel will conduct a joint hearing with all respondents. However, the panel chair may permit the hearing pertinent to each respondent to be conducted separately. In joint hearings, separate decisions of responsibility will be made for each respondent.

8. Composition of the Hearing or Response Review Panel

- a. The chair of the SCB will appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.
- b. The chair of the SCB will appoint one of the Hearing Panel members to serve as chair of the panel. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Response Review Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Response Review Panel. A student may not serve as chair of the Hearing Panel or Response Review Panel.
- c. The Administrator (or designee) will serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations.

9. Pre-hearing procedures. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator will ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- a. Suggested questions for the panel to ask the respondent or the complainant.
- b. Written discussion or argument addressing the information contained in the final report.
- c. Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the final report only if the information was not available prior to the completion of the final report or if the

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

information was provided to the investigator prior to the completion of the investigation but the information was not included in the final report.

10. Hearing logistics

- a. The hearing will be held at the time and place listed in the notice.
- b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, members of the Hearing Panel, and others only if requested by DOS.
- c. Hearings may be held in person or using secure video conferencing software supported by the University. The University will make a single record of all hearings. Hearing Panel deliberations are not recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for response review or reversal of the Hearing Panel's decision. All parties will work with the Administrator for access to the software and a private secure space to use the software.
- d. All parties are invited to fully participate in the hearing. The administrator may grant any party the ability to attend the hearing, answer questions, and make a statement from behind a partition, from another room, or through another alternative method.
- e. The complainant, if any, may only be present during the portion of the hearing where the Hearing Panel questions the complainant, unless the Administrator determines in appropriate cases that the complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of the investigator. Neither the complainant nor the respondent is required to speak at the hearing.
- f. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator. Additional witnesses may be called by the chair after consultation with the Administrator if additional

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

witnesses are necessary for the Hearing Panel to properly resolve the case. The intention of the Code is that the final report, in most cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the final report.

- g. Only the chair of the Hearing Panel may ask questions during the hearing and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing if the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.
- h. The hearing will generally be conducted as follows:
 - i. Introductions to those present
 - ii. Summary of the hearing process
 - iii. Explanation of the charges against the respondent
 - iv. Opening statement by the complainant (if applicable) addressing the final report and the allegations that the respondent violated the Code.
 - v. Opening statement by the respondent addressing the final report and the allegations that the respondent violated the Code.
 - vi. Questions, if any, by the Hearing Panel chair for the investigator(s) or the parties.
 - vii. Final statements by the parties.
 - viii. All parties dismissed, and the recording of the hearing is stopped.
 - ix. Hearing Panel deliberation.

11. Hearing Panel decision.

- a. All Hearing Panel decisions will be made by a majority vote.
- b. In making its decision, the Hearing Panel will consider all relevant information from the following sources:
 - i. The final report, including the findings and conclusions contained in the report.
 - ii. Any written information provided by the parties as provided above.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- iii. The information received at the hearing.
- c. The Hearing Panel should adopt the findings and credibility analysis contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different finding. Any findings issued by the Hearing Panel must be based on a more likely than not standard.
- d. The Administrator will also serve as a resource to the Hearing Panel, including to help ensure that outcomes are reasonably consistent among similar cases. If the Hearing Panel determines that a respondent is responsible for a violation of this Code, the Administrator will inform the panel of any previous conduct violations or other relevant disciplinary actions involving the respondent.
- e. The Hearing Panel will not consider previous findings in any legal or campus proceeding when determining responsibility for violation of this Code. The Hearing Panel may consider such previous findings solely when determining outcomes after a finding of responsibility is made.
- f. The Hearing Panel will issue a written decision within 10 days after completing deliberations. If the Hearing Panel needs additional time to issue the written decision, the Administrator will notify the parties. The panel chair will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
- g. The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:
 - i. The investigator failed to properly investigate the allegation and the failure was substantial and impacted the decision. or
 - ii. There is new information that could substantially affect the decision and the new information could not have been discovered before the issuance of the final report.

F-8. Response to the Formal Resolution Process Decision

- a. Any party may respond to the Formal Resolution Process decision, whether it was made by the Administrator or the SCB.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. Responses are not limited to arguments that the Hearing Panel decision should be overturned or modified but can be statements in support of the findings using the factors for response established below. That is to say, the Response is an opportunity to argue in favor of, or against, the decision based on the specific listed factors.
- c. Outcomes imposed by the Hearing Panel will not go into effect until either the deadline for a response has expired and no response has been filed or until the decision is upheld after response. However, the Administrator may impose any outcome issued by the Hearing Panel as an interim action pending the response review.
- d. Any party may submit a response to the Administrator's, Hearing Officer's, or Hearing Panel's final decision. Responses must be submitted in writing to the Administrator and must set forth the grounds for the response. The response must be filed no later than five days after the decision is delivered to the parties. Responses are to be directed to the University and will not be provided to other parties in the case, if any. There is no expectation that the response be of a certain level of formality or read like a legal filing.
- e. Responses are limited to the following grounds:
 - 1. A conflict of interest by a decision maker that significantly impacted the outcome of the hearing or a procedural error in the investigation process that significantly impacted the outcome of the hearing.
 - 2. New information, unavailable during the investigation or hearing, or information that was technically available but for which no reasonable person would have sought that information in advance of the hearing, as the need for the information or its evidentiary value did not reasonably arise until during the hearing, and that would likely have substantially impacted the original finding or outcome if known.
 - 3. The outcomes imposed are substantially disproportionate to the severity of the violation, Note that the imposition of an administrative fee is not a outcome, and therefore cannot be reversed or modified.
- f. A response review will be limited to a review of the decision, the final report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and- any written materials submitted with the response. Where a response is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the

decision and whether the new information would likely have substantially impacted the original finding or outcome if known.

g. Response review procedure

1. The chair of the SCB will appoint three to five members of the SCB to serve on the Response Review Panel and will designate one member to serve as chair of the Response Review Panel. Any member who served on the Hearing Panel will not serve on the Response Review Panel on the same case. A student may not serve as chair of a Response Review Panel.
2. The Response Review Panel will issue a written decision. The decision should be issued within 15 days of receiving the response or responses. The chair of the Response Review Panel will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
3. The Response Review Panel may:
 - a. Uphold the Administrator's, Hearing Officer's, or Hearing Panel's decision.
 - b. Uphold the finding that the respondent violated the code but revise the outcome(s).
 - c. Return the matter for reconsideration. or
 - d. Return the matter for additional investigation.

e. Unless the case is returned for reconsideration or to the investigator for additional investigation, the decision of the Response Review Panel is the final institutional decision. If the decision upholds the finding that the respondent violated the Code, the outcomes imposed will go into effect immediately.

F-9. Supplemental process and standards applying to allegations of academic dishonesty

- a. Academic dishonesty allegations are processed following the Conduct Resolution Processes in this Code. Following a report to DOS of instances or concerns of academic dishonesty, DOS will investigate the incident and will determine if there is a code violation, resulting in potential outcomes intended to address acts of academic dishonesty. Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under this Code there is a finding of responsibility for academic dishonesty/misconduct.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. The following information supplements the resolution processes in cases of academic dishonesty:
- i. When the alleged academic dishonesty is discovered by the instructor, the instructor will notify the student of the allegation of academic dishonesty and will notify DOS.
 - ii. DOS receives the report and communicates with the instructor on the process of resolving the complaint.
 - iii. The instructor will have an opportunity to provide additional information regarding the allegation.
 - iv. DOS will meet with the student and may seek additional information from the instructor.
 - v. The instructor is included in the following communication with the student: the notice of allegation and decision letter.
 - vi. If the student chooses an informal process, DOS will meet with the student and provide an informal decision, consistent with policies, progressive discipline, and other previous and similar examples of academic dishonesty. The outcome of an informal process is not eligible for Response Review.
 - vii. If the student chooses a formal process, the hearing officer will conduct a formal investigation and will interview the instructor and other witnesses as part of the investigation.
 - viii. In disciplinary cases involving allegations of academic dishonesty, a majority of the Hearing Panel or Response Review Panel should be faculty members.
 - ix. The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.
 - x. The resolution decision of DOS, subject to the Response Review process outlined in this Code, is final.
 - xi. In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of “incomplete” until the process is complete.
 - xii. In situations where the instructor is no longer in their position prior to the completion of the conduct process, the instructor of record or the chair of the department may be asked to step in to finish the conduct process and the instructor may coordinate the final grade based on the totality of the academic performance.

F-10. Outcomes.

a. Outcomes may be imposed for any student determined to have violated the Code. Possible outcomes include, but are not limited to:

- **Warning:** Written notice to the student.
- **Probation:** Written reprimand accompanied by a probationary period during which the student must not violate the Code to avoid more severe disciplinary outcomes.
- **Loss of privileges:** Denial of specified privileges for a designated period of time.
- **Restitution:** Compensation for loss, damage, or injury. This may take the form of appropriate service or monetary or material replacement.
- **Educational outcomes:** Completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.
- **Deferred suspension:** The last opportunity before being suspended, which remains in place until the natural end of the academic relationship with the University.
- **Housing suspension:** Separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.
- **Housing expulsion:** Permanent separation of the student from University Housing.
- **University suspension:** Separation of the student from the University for a definite period, after which the student is eligible to return. Conditions for return may be specified.
- **University expulsion:** Permanent separation of the student from the University.
- **Revocation of admission:** Admission to the University may be revoked .
- **Revocation of degree:** A degree awarded from the University may be revoked.
- **Withholding of degree:** The University may withhold awarding a degree otherwise earned until the completion of all outcomes imposed.

b. More than one of the outcomes listed above may be imposed for any single violation.

c. A student who fails to comply with the outcome(s) imposed will have a disciplinary hold placed on their record until the student complies with all outcome(s) imposed.

d. Disciplinary outcomes other than suspension, expulsion or revocation or withholding of a degree will not be made part of the student's permanent academic record but will become part of the student's disciplinary record. Such outcomes will be expunged from the student's disciplinary record seven years

after final disposition of the case unless the University is legally required to maintain them for a further time.

G. MISCELLANEOUS

G-1. Role of an advisor. In accordance with the educational purpose of the Code, all students, including respondents and complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any response. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of the University official conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student or make a presentation on behalf of the student.

G-2. Administrative fee. Any time a student is found to have violated the Code, except in situations where the hearing officer issues only a warning, the hearing officer may charge the student an administrative fee of \$150. This is not considered an outcome and will not be a subject of a response review.

G-3. Parent notification. The University may notify parents of students under the age of 21 when a student has been found to have committed a drug- or alcohol-related violation. This is not considered an outcome and may not be a subject of a response review. The decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

G-4. Training. All members of the SCB, the Administrator, and the investigators will receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, as well as all applicable federal and state laws.

G-5. Timeframe. With the exception of deadlines for requesting a hearing before the SCB (see section F.7) or for filing a response (see section F.8), all other timeframes contained in the Code are suggested timeframes. While the timeframes should be followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for response review or reversal of any decision.

G-6. Interpretation. Any question of interpretation regarding the Code or these procedures will be referred to the Administrator or their designee for final decision.

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

G-7. Disclosure. The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of Title 18, United States Code), incest, or statutory rape, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the reporting victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim will be treated as the victim for purposes of this paragraph.

G-8. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

G-9. Review by Board of Regents: Board of Regents review of a final institutional decision to the Board of Regents is governed by Idaho State Board of Education Governing Policies and Procedures Section III.P.17.

STUDENT CODE OF CONDUCT & RESOLUTION PROCESS

CONTENTS:

- A. Introduction**
- B. Purpose**
- C. Scope**
- D. Definitions**
- E. Prohibited conduct**
- F. Conduct resolution process**
- G. Miscellaneous**

A. Introduction

A-1. The University of Idaho is committed to creating and maintaining a productive living-and-learning community that fosters the intellectual, personal, cultural, and ethical development of its students. Self-discipline and respect for the rights and privileges of others are essential to the educational process and to good citizenship. Student expectations include:

- Students are expected to show respect for order, civility, respect for the rights of others within and without the University as these attributes are demanded of good citizens.
- Students are expected to uphold the rights and dignity of others regardless of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or socio-economic status.
- Students are expected to uphold the integrity of the University as a community of scholars in which free speech is available to all and intellectual honesty is demanded of all.
- Students are expected to respect University policies as well as local, state, and federal law.

A-2. The University of Idaho conduct process works to balance the safety and security of the members of the University of Idaho community through personal accountability, reflection, and growth. Students have an opportunity to reflect on their choices, understand how their actions have an impact on those around them, and grow from the experience.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

A-3. The University strives to provide a fair and consistent student conduct process based on university policy and best practices. By educating students to better understand how their decisions affect themselves and their community they learn reflection, follow-up, and accountability. The Dean of Students Office collaborates with campus and community partners to provide resources and support to students.

B. Purpose

B-1. This Code contains regulations addressing reported student violations of university standards of conduct in a manner consistent with the requirements of procedural due process. In addition to the general expectations for conduct as set forth in this chapter, it contains a description of prohibited conduct.

B-2. The Dean of Students (DOS), or their designee, has primary authority and responsibility for the administration of the student conduct and resolution process. The DOS, upon finding, in its discretion, that there is a conflict of interest, or for other reasons necessary to effectuate the policy, may appoint an external person to serve in any of the roles created in this Code. The Dean of Students works with faculty, staff, hearing officers, and/or the student conduct board in the disposition of Student Code of Conduct violations. There is no standard discipline that applies to violations of the Student Code of Conduct. They range from informal resolutions to formal warnings, to community service to expulsion. In each situation, the nature and seriousness of the behavior, the motivation underlying the behavior, and precedent in similar cases are considered.

B-3. The Student Code of Conduct does not restrict speech that is otherwise protected, including speech that some may find objectionable. The interplay between freedom of speech and expectations for students is complex and we invite you to learn more about freedom of speech and the Dean of Students office student conduct processes as they relate to freedom of speech by directing inquiries to askjoe@uidaho.edu.

B-4. Findings of responsibility will be determined using a Preponderance of the Evidence Standard. The standard is satisfied if the reported conduct is deemed more likely than not to have occurred.

B-5. The University bears the burden of proving that a student engaged in misconduct by a preponderance of evidence. A “preponderance of evidence” means that quantity and quality of evidence which, when fairly considered, produces the stronger impression, and has the greater weight, and is more convincing as to its truth than the evidence in opposition – or in other words, the facts as determined by the Hearing Officer or Board indicate that it is more likely than not that the student violated this Code. Formal rules of evidence applied in courtroom proceedings do not apply to this process. Evidence that is determined to be relevant to a case, by the Facilitator or Board Chair, is admissible at a hearing. This may include direct

evidence, circumstantial evidence, documentary evidence, hearsay evidence, and signed statements. This does not imply that all evidence admitted is equivalent in weight. Unduly repetitive information may be excluded.

B-6. The administration of the Student Code of Conduct and Student Conduct Process applies affirmative action and equal opportunity standards consistent with FSH 3060 and 3065. Additionally, this process is supported by nondiscrimination practices consistent with FSH 3200, 3210, and 3215.

C. Scope

C-1. Individuals subject to the Code

a. Students

1. By enrolling at the University of Idaho, students voluntarily accept responsibility for compliance with all University policies including the Code.
2. Students are responsible for their behavior from time of admittance to the University through the awarding of a degree, even though conduct may occur before classes begin or after classes end. Students are responsible for their conduct during the academic year and during periods between enrollment terms.
3. The University recognizes that students may also be employees, and their conduct may be subject to review and discipline under this Code and any applicable employment policies.

b. Reporting parties. Employees and students who are reporting student behavior that may be prohibited by the Student Code of Conduct.

c. Other. Employees and students who are otherwise involved in the conduct process.

C-2. Behavior subject to the Code

a. The Code applies to conduct that occurs on University property, within or at University-sponsored activities, off campus, online, or through other electronic means.

b. The University may address off-campus behaviors when the Dean of Students or university designee determines that the off-campus conduct affects a University interest. University interests include but are not limited to health and safety, protection of rights or property of others and promoting the University's mission.

c. Jurisdiction for the DOS to address student behavior or misconduct begins upon admission and ends at commencement. If serious misconduct was committed while a student was enrolled but is reported after graduation, the University may invoke the disciplinary process referred to in Article III and may revoke the student's degree if they are found responsible.

d. If a student withdraws from school while a conduct matter is pending, the Code remains applicable to the student's conduct prior to withdrawal.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- e. The University reserves the right to proceed with the conduct process in a student's absence or to delay the process until the student seeks re-enrollment.
- f. Depending on conduct process outcomes, a hold may be placed on the student's ability to re-enroll and the student may be required to satisfy all outcome requirements prior to re-enrollment eligibility.
- g. Behavior conducted online, or through any other electronic medium, including online postings, video, photographs, blogs, web postings, chats, and social networking sites is in the public sphere and is not private and falls within the jurisdiction of this Code provided the other criteria, e.g., student status, are satisfied.
- h. If the prohibited conduct involves a student organization, the individual students are subject to this Code, and the organization is subject to FSH 2350 Student Organization Code and Resolution Process.
- i. DOS encourages all behavior to be reported in a timely manner but understands that barriers may exist to reporting prohibited behavior and that some reported behavior warrants DOS review for conduct proceedings even if the reported behavior occurred well in the past. DOS has discretion to initiate conduct proceedings for all reported behaviors, regardless of time of occurrence, based on the nature of the totality of the circumstances.

D. Definitions. The following definitions explain the terminology used in this Code. Particular code violations are listed and defined in Section E Prohibited conduct.

D-1. Academic dishonesty: Intentional participation in deceptive practice in one's academic work or the academic work of others. Examples include cheating, fraud, plagiarism, or falsification of research results and are individually addressed and more fully defined in Article II .

D-2: Academic outcome: A consequence imposed by instructors for findings of academic dishonesty. Academic outcomes include, but are not limited to, grade adjustments, failing a class, or resubmission of academic work.

D-3: Academic work: Any academic work required for completion of academic requirements in a course. Academic work includes but is not limited to assignments, quizzes, examinations, problem solving, class exercises, and/or drafts of work.

D-4: Administrator: The Dean of Students or designee will serve as the administrator. The administrator can serve as a decision-maker and is the non-voting advisor to the Student Conduct Board and each SCB hearing panel.

D-5: Advisor: The person of the student's choosing who has agreed to advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the

Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

D-7: Complainant: An individual who was subject to alleged misconduct described in the Student Code of Conduct. There may be more than one complainant for an incident. In certain circumstances, the Dean of Students or another University official may assume the role of complainant on behalf of the University.

D-8: Conduct decision: A written decision determining the resolution of the reported behavior. The decision will include a finding of responsible or not responsible and any applicable required or suggested outcomes.

D-9: Conduct record: The student conduct record maintained by the Dean of Students in connection with a reported violation or violation of the Code. The student conduct record may include complaints, notices, hearing records, conduct findings, outcomes, and other documents deemed relevant by the Dean of Students.

D-10: Consent: Knowing, voluntary, and clear permission by word or action to engage in activity with another individual(s), not limited to sexual activity. Consent can be withdrawn at any time upon notice, by word or action, to the other party.

D-11: Days: Days that the University is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

D-12: DOS: The Office of the Dean of Students, which is responsible for the administration of the Student Code of Conduct and includes the Dean of Students and their designees.

D-13: Educational setting: All academic, educational, extracurricular, athletic, and other programs of the University of Idaho, regardless of location, including online formats.

D-14: Finding: A conclusion reached as result of an inquiry, investigation, or hearing and is also referred to as a decision.

D-15: Formal resolution process: A conduct process by which notice and opportunity to be heard is provided and that often includes a student conduct process occurring before a Hearing Panel which issues a written decision following the hearing.

D-16: Hearing: A formal process maintained by the University to review and address allegations of violations that follows the process and rules outlined in this Code but is not subject to other external rules (such as federal or state evidentiary rules or procedures).

D-17: Hearing officer: A person appointed by the Administrator to serve as the person presiding over a hearing. The hearing officer investigates the alleged behavior and administers the conduct process for informal resolutions. The Administrator may also serve as the hearing officer.

D-18: Hearing panel: A panel composed of members of the Student Conduct Board, who are selected by the Student Conduct Board chairperson for purposes of hearing a formal resolution process and issuing a written decision that may include findings.

D-19: Informal resolution process: An alternative method of resolving a matter under this Code, entered into willingly by all parties as well as by the University, that seeks to address and resolve the alleged conduct or harm without the use of the formal process outlined below.

D-20: Instructor: In cases of academic dishonesty, the instructor may be the faculty member, teaching assistant, or other employee responsible for course instruction.

D-21: Investigator: The person assigned by the University to investigate a report of a violation of the Code. The investigator may be any qualified person assigned by DOS.

D-22: Mediation: An intervention between conflicting parties to promote reconciliation, settlement, or compromise.

D-23: Misconduct: Behavior that is prohibited by the Student Code of Conduct or that violates a University directive or policy.

D-26: Office of Civil Rights & Investigations (OCRI): The Office at the University that is responsible for ensuring compliance with federal and state laws related to discrimination or harassment based on a protected class. This includes retaliation when engaging in a protected process. OCRI undertakes necessary investigations and prepares recommendations and written reports that may be reviewed by the DOS for further conduct processes related to the underlying facts investigated and the nature of the reported behaviors of students investigated by their office.

D-27: Outcome: Disciplinary or corrective action imposed by the deciding body of a student conduct process following a finding of student misconduct. The term includes, but is not limited to, educational programming, restitution, community service activities, apology letters, probation (including denial of specified University privileges), suspension, termination, or other such outcomes deemed appropriate.

D-28: Parties: The Respondent(s) and the Complainant(s).

D-29: Policy: The written regulations of the University as found in, but not limited to,

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

the Faculty Staff Handbook, including the Student Code of Conduct, the Administrative Procedures Manual, the Residence Hall Handbook, all Housing and Residence Life policies, and Graduate and Undergraduate Catalogs.

D-30: More likely than not standard: The standard of evidence that is used to decide responsibility of Code violation in a hearing, it means that it is more likely than not, based upon the totality of all relevant evidence and reasonable inferences from the evidence, that there is a violation of the Code.

D-31: Probation: The process or period of observing the character or abilities of a student to determine whether other corrective action should occur. An additional resolution process is not necessary to modify outcomes following a finding of misconduct where probation is imposed. The DOS has discretion to modify the terms of probation as necessary based on the information available to the DOS during a student's probation.

D-32: Respondent: The student who is alleged to have violated the Code.

D-33: Student: Includes, but is not limited to, all persons admitted to the University, either full time or part time, online or in person, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

a. Persons who are suspended, or those who withdraw or graduate after allegedly violating the Code of Conduct.

b. Persons who are eligible to enroll for classes without applying for re-admission.

c. Individuals participating in the American Language and Culture Program, Independent Study of Idaho sponsored by the University of Idaho, the University of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

D-34: The Code: The Student Code of Conduct and Conduct Resolution Process.

D-35: Student Conduct Administrator (Administrator): The University of Idaho official designated by the DOS to serve as an investigator or hearing officer. It will also include the Administrator's designee.

D-36: Student Conduct Board (SCB): The formal body that reviews student conduct matters, as set forth in this Code.

D-40: Weapon: Weapon is defined in APM 95.12.

Commented [W(1)]: Embedded link

E. Prohibited conduct. Specific behaviors of misconduct are identified and defined below.

E-1. Academic dishonesty. Acts of academic dishonesty include but are not limited to the following:

- a. Cheating.** Cheating includes, but is not limited to, the following actions as they relate to academic work:
 - (1) Using, purchasing, providing, or possessing unauthorized materials, sources, or assistance without authorization from the instructor.
 - (2) Copying from another's academic work either for the student's own use or for the use of others.
 - (3) Sharing academic work without prior permission from instructor.
 - (4) Acquiring, without written or verbal permission, tests or other academic material belonging to the instructor or another member of the University faculty or staff.
 - (5) Completing academic work for someone else or having someone else complete academic work on your behalf.
 - (6) Representing another student in a class for attendance or participation purposes or asking another person for representation for attendance or participation purposes.
 - (7) Fabrication or falsification of data, research or academic content and the unauthorized alteration or invention of any information or citation.
 - (8) Forging, altering, reproducing, removing, destroying, or misusing any University document, record, or instrument of identification.

- b. Plagiarism.** Plagiarism includes, but is not limited to, the following:
 - (1) Using, by paraphrase or direct quotation, the published or unpublished work of another person without full and clear acknowledgment.
 - (2) The unauthorized alteration or invention of a citation.
 - (3) Buying or selling academic work for the purpose of submitting it for course completion.
 - (4) Submitting academic work, or any part of academic work, completed for one course as work for another course without the express prior approval of both instructors.

- c. Prohibited behavior.** Engaging in any behavior related to course completion prohibited by the instructor or otherwise including but not limited to unauthorized collaboration and reliance on prohibited technological assistance/artificial intelligence tools.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- d. Misrepresenting facts for academic advantage.** Examples include but are not limited to providing false academic achievements and false medical documentation for academic extensions.
- e. Violation of University policy regarding intellectual property and research.** All data acquired through participation in University research programs is the property of the University and must be provided to the principal investigator. In addition, collaboration with the Office of Research and Economic Development for the assignment of rights, title, and interest in patentable inventions resulting from the research is also required. See FSH 3200 and 5400.

E-2. Disruption or misuse of University resources or property. This behavior includes but is not limited to the following:

- a. Theft or damage.** Attempted or actual theft of or damage to University property.
- b. Unauthorized possession.** Unauthorized possession, duplication, or use of University keys, lock combinations or other access codes or passwords that can be used to access University property or facilities.
- c. Unauthorized entry or use.** Unauthorized entry into or use of any University owned or managed building, space, outdoor area, or property. This also includes other restricted areas identified in **APM 35.35**.
- d. Violation of law or other policy.** Violation of local, state, federal or campus fire policies including but not limited to:
 - 1. Building or setting fire(s) without proper authorization as required by **APM 35.25**.
 - 2. Removing or otherwise tampering with fire equipment or fire alarm systems.
 - 3. Failure to promptly vacate a building
 - 4. Intentionally or recklessly causing a fire that damages University or personal property or causes injury.
 - 5. Causing, making, or circulating a false report or warning of fire, explosion or another emergency.

E-3. Misuse of technology resources. Theft or other abuse of University computer facilities or resources. This includes but is not limited to the following:

- a.** Unauthorized entry into, or transfer of a file.
- b.** Using another individual's identification or password.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- c. Interfering with the normal operation of the University computing system or resources.
- d. Any violation of the University Computer Use Policy.
- e. Inappropriate or disproportionate use of an IT resource owned or controlled by the University.
- f. Using an IT resource for an illegal, threatening, or intentionally destructive purpose.
- g. Circumventing University system or network security measures.

E-4. Threat of harm or actual harm to a person's physical or mental health or safety. This behavior includes but is not limited to the following:

- a. **Behavior involving physical force or threat of physical force.**
Behavior involving physical force that hurts another person or intimidation or threat of such force directed at another person where a reasonable person would believe the threat to be serious and imminent in nature. It includes the following:
 - 1. **Fighting.** Engaging in violence, combat, or aggression.
 - 2. **Assault.** Behavior intended to cause apprehension of harmful or offensive contact that causes apprehension of physical safety of another. The act required for an assault must be overt. Although words alone are insufficient, they may create an assault when coupled with some action that indicates the ability to carry out the threat and it creates a fear of it being carried out in the person the assault behavior is directed at.
 - 3. **Battery.** Actual and intentional unwanted touching or contact with another person, even if the physical injury is slight.
 - 4. **Use of a knife, gun, or other weapon.** The use of a knife, gun, or other weapon except in reasonable self-defense in any act of violence as defined in the Code.
 - 5. **Involuntary restraint or transport.** Restraining or transporting a person against their will.
 - 6. **Other.** Any action that threatens or endangers the physical health or safety of any person.

b. Prohibited harassment

- 1. **General definition.** Prohibited harassment is hostile or threatening conduct or speech, whether verbal, written, or symbolic, that:
 - (a) Is sufficiently severe or pervasive, as viewed by a reasonable person under similar circumstances and with similar identities to the victim, and results in an objectively hostile or threatening environment that interferes with or diminishes

another's ability to participate in or benefit from the services, activities, or privileges provided by the University. and

(b) Describes with personal particularity or is personally directed to one or more specific individuals.

2. Definitions used for sex- or gender-based harassment. When harassment is sex or gender based, the definitions used to determine coverage can be found in FSH 6100. Violations that meet the definitions of FSH 6100 but that do not occur within the covered Applicability of paragraph B of that policy, may be investigated and determined under this Code.

3. Exception. Speech that is protected by the First Amendment to the United States Constitution, including relevant academic speech spoken in a classroom or writing assignment, protests and statements that do not meet the narrow definition described above, is not a violation of this Code, though it may go against community norms and may be harmful or hurtful to other members of the University community or members of certain groups.

c. Threatening or intimidating behavior. Threatening or intimidating behavior includes, but is not limited to:

1. Coercion. The practice of persuading someone to do something by using force or threats.

2. Bullying. Behavior seeking to harm, intimidate, or coerce another.

3. Deliberate destruction of or damage to property. Deliberate destruction of or damage to public or private property, where a reasonable person would believe that the full or partial intention of the act is to harass an individual or a group based on protected characteristics as defined in [FSH 3200 Policy of Nondiscrimination](#).

d. Hazing. Hazing includes, but is not limited to, any action or participation in any activity that (i) causes or intends to cause physical or mental discomfort or distress, (ii) may demean any person, regardless of location, intent, or consent of perpetrators or victims or (iii) destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in, a group or organization. The express or implied consent of the victim will not be a defense. Apathy or acquiescence in the presence of hazing are not neutral acts. they are also violations of this rule.

Hazing also includes any activity that compels a student to participate in any activity that is unlawful, publicly indecent, or contrary to the policies and regulations of the University, or any activity that unreasonably and materially interferes with a student's academic efforts.

E-5. Discrimination and retaliation.

- a. Discrimination.** Discrimination includes conduct that violates the Board of Regent's or the University's nondiscrimination and antidiscrimination policies contained in FSH 3200, 3210, or 3215.
- b. Retaliation.** Retaliation includes conduct that intimidates, interferes with, threatens, coerces, or otherwise discriminates against any individual because that individual opposes or reports a perceived wrongdoing, inequity, or violation of law or University policy, files a complaint alleging illegal or prohibited discrimination, participates in a grievance or response procedure, or participates in dispute resolution.

E-6. Disruption, obstruction, or interference with normal University activities. Members of the University community have the right to a campus that is free from unreasonable disruption, obstruction, or interference. Disrupting or obstructing normal University activities, including, but not limited to, all academic activities, University programming, athletic events, and administrative functions is prohibited. Examples include:

- a.** Classroom disruption: Behavior that interferes with the teaching or learning process in the classroom or educational setting and continues after an instructor's request to cease.
- b.** Obstruction of the free flow of pedestrian or vehicular traffic on campus.
- c.** Conduct that is lewd, indecent or disruptive that is not otherwise constitutionally protected speech.
- d.** Falsifying, distorting, or misrepresenting information provided to the University.
- e.** Interference with the student conduct system, which includes, but is not limited to, any of the following:
 - 1.** Failure to cooperate with the University's investigation or disciplinary proceeding. If a party in a case does not want to participate because they believe that doing so would cause them to speak or offer evidence against themselves, and they notify the

DOS that this is the reason they are choosing not to participate or only to participate partially, this violation will not apply.

2. Disrupting or interfering with the University's investigation and student conduct proceedings.
3. Making false allegations.
4. Attempting to discourage an individual's proper participation in, or use of, the student conduct process.
5. Harassment (verbal, physical, written, or electronic) or intimidation of any person participating in the University's investigation prior to, during, or after the investigation and conduct process concludes.
6. Failure to comply with the outcome(s) imposed pursuant to the disciplinary process.

f. Influencing or attempting to influence another person to commit any violation of the Code.

g. Engaging in speech, including but not limited to verbal, electronic, or written communication, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

E-7. Use and Misuse of Substances

a. **Smoking.** Smoking in violation of APM 35.28.

b. Drugs and controlled substances

1. Using, possessing, manufacturing, cultivating, selling, or distributing any state or federally controlled drug, designer/synthetic drug, or substance, including, but not limited to, cannabis, heroin, narcotics, or other controlled substances, in violation of any applicable law or University policy.
2. Possessing or using any paraphernalia used for drug consumption. Paraphernalia includes but is not limited to bongs, bowls, pipes, or any homemade smoking device.
3. Using, possessing, selling or distributing prescription or over-the-counter medications by an individual for whom it was not prescribed.
4. Inhaling or ingesting any substance (e.g., nitrous oxide, glue, paint, etc.) that is intended to alter a student's mental state without a prescription.
5. A violation may also occur when the odor of an illegal or controlled substance or drug is present when more than one individual can reasonably trace it to a specific individual.

c. **Alcohol**

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. Consuming, possessing, manufacturing, or distributing alcoholic beverages in violation of any applicable law or University policy (see APM 80.01 for alcohol permit requirements and APM 95.31 for alcohol policy).
2. For persons under 21, the use or possession of alcoholic beverages. public intoxication or excessive consumption of alcohol. disorderly or irresponsible conduct resulting from consumption of alcohol.
3. For persons over 21, the use or possession of alcohol in public areas where alcohol is not permitted. excessive consumption of alcohol resulting in disorderly or irresponsible conduct.
4. Selling, distributing, or furnishing alcohol to a person under 21 years of age.

E-8. Housing and living groups. Violations of any rules imposed by University Housing or living groups outlined in the Housing contract and Housing handbook.

E-9. Violation of University policy. Violation of published University policies, rules and regulations.

E-10. Violation of law. Any violation of federal law, state law, or local ordinance may be a violation of the Code, independent of the status of any civil or criminal litigation in court or criminal arrest and prosecution. Decisions made or outcomes imposed under this Code will not be subject to change because criminal charges arising out of the same facts were adjudicated in a civil or criminal court process. The University will cooperate as appropriate with law enforcement and other agencies in the enforcement of criminal law and in the conditions imposed by criminal courts for the rehabilitation of student violators provided that the conditions do not conflict with University policies.

E-11. Furnishing false information, refusal to identify, and refusal to comply

- a. Furnishing false information or false representations to any person working for or authorized to act as an authority on behalf of the University.
- b. Refusal to identify oneself to an institutional representative in response to a request when on any University owned or managed property.
- c. Failure to comply with directions of a University official, law enforcement, fire department, or other government official acting in performance of their duties.
 1. Identification includes giving one's name, substantiated by a current driver license or student identification card or other official documentation, or by stating truthfully whether one is a student of the University or not.
 2. An institutional representative includes any employee, faculty member, or representative of the University, and any attorney, peace officer, or campus security officer of the University acting under the authority of the University.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- d. Using false identification or another individual's identification card to procure goods, entry or services.
- e. Submission of false information or withholding requested information at the time of admission or readmission.

E-12. Firearms, explosives, and other weapons. Possessing or using firearms, explosives, other weapons, projectile or explosive devices or substances, or dangerous chemicals in violation of APM 95.12, APM 35.34, or APM 35.35.

E-13. Disruption to community

- a. Attempted, threatened, or actual theft of or damage to another's property.
- b. Unauthorized entry into or use of another's property.
- c. Excessive noise, amplified sound, or music that produces a level of noise that disrupts members of the community.

F. Conduct resolution process

F-1. Reporting alleged violations

a. The DOS will accept reports from anyone with knowledge of potential Code violations. Reports must be made to the DOS. Reports of Title IX and related violations covered by [FSH 6100](#) will not be reviewed under this Code but will be accepted by DOS and then forwarded to the Title IX Coordinator or other appropriate office for review. Allegations against Student Organizations will be addressed as per the Student Organization Code of Conduct, FSH 2350.

b. Reports should be in writing but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the incident takes place.

F-2. Initial review. The DOS will review all reports of Code violations. The purpose of the review is to gather relevant information concerning each allegation and determine whether further investigation is warranted. When appropriate, the DOS will transfer the notice and investigation process to the Office of Civil Rights & Investigations (OCRI). The initial review may include interviewing the involved parties and witnesses without formal notice.

F-3. Notice of allegation.

- a. Following the initial review, the hearing officer will determine whether to initiate the conduct resolution process. In order to initiate that

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

process, the hearing officer will provide notice of reported Code violation(s) to the respondent.

- b. The notice informs the respondent of the reported Code violations including a short description of the basis of the reported violation.
- c. The notice may include resolution options if further investigation is not required. Resolution options are detailed in the Hearing Process section below. If further investigation is required, the notice will include details of the investigative process.
- d. The notice will include a link to or copy of this Code.
- e. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.
- f. If a respondent does not participate in the initial meeting, the hearing officer will make reasonable attempts to reach the respondent for five business days. If there is no response, the hearing officer will determine the appropriate resolution process.

F-4. Initial meeting. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.

F-5. Interim action.

- a. At any time before a final institutional decision, the Administrator, or designee, may impose restrictions on a student or separate the student from the University community pending the final institutional decision. If circumstances allow, the Administrator (or designee) should meet with the student prior to imposing the interim action.
- b. Other than issuance of no-contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when the Administrator determines that the student represents a threat of serious harm to any person. the student is facing allegations of serious criminal activity. the action is necessary to preserve the integrity of the investigation. the action is necessary to preserve University property.

- or the action is necessary to prevent disruption of, or interference with, the normal operations of the University.
- c. After the hearing decision, pending any response review of the decision, the Administrator may impose an outcome issued by the Hearing Panel as an interim action at the discretion of the Administrator.
- d. Interim actions may include, but are not limited to, the following:
- Suspension from the University pending a final institutional decision.
 - Issuance of a no-contact order.
 - Exclusion from University property.
 - Removal from the residence halls.
 - Removal from extracurricular activities, including participation on athletic teams.
 - Withholding the award of a degree pending the conclusion of the investigation and hearing process. or
 - Any other action deemed necessary and appropriate by the Administrator to maintain orderly and appropriate University operations.
- e. When a student is suspended from the University, or directed not to attend certain classes, alternative coursework options may be pursued, with the approval of the Administrator and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.
- f. An interim action must be issued in writing and is effective when the Administrator delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.
- g. The respondent may submit a response to the issuance of any interim action by filing a response with the Administrator. There are no formal procedures for this response, and the interim outcomes remain in effect unless removed by the Administrator.
- h. A violation of the provisions of an interim action will be considered a violation of the Code.

F-6. Informal resolution process: Decision by hearing officer

- a. During the initial meeting, the respondent may be given an opportunity to resolve the complaint informally. All parties must mutually agree to

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- engage in the Informal Resolution Process. The Informal Resolution Process may also be used when the respondent is not participating.
- b. At any point in the Informal Resolution process, any party may request a Formal Resolution Process, described below. The hearing officer may refer a matter to Formal Resolution Process at any point during the Informal Resolution process.
 - c. In the Informal Resolution Process, the hearing officer determines based on the preponderance of the evidence whether the respondent is responsible for a code violation and determines the outcomes. The hearing officer will first meet with the parties (if applicable), share available information, and hear their response, if any. A respondent may also accept responsibility for a Code violation at any point in the process. If the respondent accepts responsibility, the hearing officer will determine the outcomes.
 - d. Informal Resolution decisions are not subject to response review.
 - e. If the respondent does not participate and a decision is made through Informal Resolution, the respondent may request their case to be reopened. Requests must be made in accordance with the instructions in the outcome notice and received no later than five (5) days after that outcome notice. If the request is timely submitted, the hearing officer will offer to meet with the respondent. During that meeting the respondent can share information with the hearing officer. The hearing officer reserves the right to update the decision of responsibility and any applicable outcomes after meeting with the respondent. The hearing officer will notify the respondent within five (5) days whether the decision of responsibility or applicable outcomes have changed.

F-7. Formal resolution process: Decision by Administrator or Student Conduct Board

a. Investigation

1. The University will investigate the allegations. At any time during the investigation, either the complainant or the respondent may, but is not required to, provide information to the investigator for consideration. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask other Parties or other witnesses, etc. Except in the rare circumstances described in this Code, only

information that is presented to the investigator may be used in a hearing.

2. The investigator will provide the interview summaries to all parties and witnesses to review and provide additional comments and clarifications. Comments must be received within five days of receiving the interview summaries. The investigator will revise the interview summaries based on relevant comments provided by the parties and witnesses.

b. Preliminary report review

1. At the conclusion of the investigation, the investigator will draft a Preliminary Report of Investigation (Preliminary Report). The preliminary report will include the steps taken during the investigation., a list of witnesses contacted. a detailed summary of any witness interviews. a detailed summary of any interviews of the respondent or complainant (if applicable). a detailed summary of any other information considered as part of the investigation. and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the respondent or the complainant.
2. The Preliminary Report will not include any conclusions, findings, or credibility analysis.
3. The parties will be provided an opportunity to review the Preliminary Report and may provide a written response to the Preliminary Report within five days of the review of the report. A party will be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.
4. After the time for submitting a written response to the Preliminary Report has passed, the investigator will review any responses received and determine whether additional investigation is needed. After addressing the responses, if any, the investigator will incorporate the responses into the final report.

5. The investigator has sole discretion of determining whether sufficient information has been obtained to end the investigation process.

c. Final Report of Investigation

1. The Final Report of Investigation (final report) will include the following:
 - Everything included in the Preliminary Report,
 - Complete copies of any timely-submitted written responses to the Preliminary Report,
 - A credibility analysis, and
 - Findings of facts.
2. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The investigator may serve as the Administrator's designee to send out the final report to parties.
3. The credibility analysis is an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be part of the finding of facts. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.
4. The findings of facts will include a description of the basis for each finding. Each finding will be based on a more likely than not standard and will include a rationale based on supporting documentation or information such as information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the respondent, complainant and/or witnesses.

d. Review by Administrator

1. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The parties may submit a written response to the final report to the Administrator no later than five days after the final report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the final report.
2. Decisions are made either by the Student Conduct Board (SCB) after a hearing or by the Administrator after their review. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the final report is provided to the parties. The Administrator may also decide to refer matters to the SCB.

e. Decision by Administrator

1. If a matter is not referred to the SCB for a hearing, the Administrator will decide whether the respondent violated the Code. The Administrator will make the decision based on the information contained in the final report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
2. The Administrator will adopt the findings and credibility analysis contained in the final report if the Administrator finds that they are more likely than not to be accurate. Any additional or different findings issued by the Administrator must be based on a more likely than not standard.
3. If the Administrator determines that the respondent violated the Code, the Administrator will determine the appropriate outcome.
4. The Administrator's decision will be in writing and include the basis for the decision. The written decision will be simultaneously provided to the parties.
5. The Administrator's decision may be subject to a response review in accordance with this Code.
6. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms

of appropriate alternative resolution. All parties must agree to participate with DOS in an alternative resolution process.

6. Hearing and Decision by Student Conduct Board

1. **Student Conduct Board in general.** The description and makeup of the SCB can be found in FSH [1640.83](#).
2. **Conflict of interest.** A member of the SCB will not serve on any Hearing Panel or Response Review Panel in any case where the member has a conflict of interest or bias for or against either party.
3. **Training required.** A member cannot serve on either a Hearing Panel or Response Review Panel until the member has completed training as required by DOS.
4. **Confidentiality.** Proceedings before the SCB, whether before a Hearing Panel or Response Review Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.
5. **Notice of Hearing.** In matters referred to the SCB, the Administrator (or designee) must send written notice of the hearing to the SCB and the parties. The notice will include the following:
 - a. the specific provision(s) of the Code the respondent is accused of violating.
 - b. a short description of the basis of the alleged violation,
 - c. the date and time for the hearing, and
 - d. the deadline for submitting written materials to the Administrator.
 - e. a link to or copy of the final report and any responses to the final report which were timely submitted to the Administrator.

6. Scheduling

The hearing will be held no fewer than five days after the notice is provided to the parties, unless extended by the Administrator. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator will have the sole discretion as to whether to reschedule the hearing. Except in cases of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

7. Consolidation

If a report of a violation of the Code involves more than one respondent, the Hearing Panel will conduct a joint hearing with all respondents. However, the panel chair may permit the hearing pertinent to each respondent to be conducted separately. In joint hearings, separate decisions of responsibility will be made for each respondent.

8. Composition of the Hearing or Response Review Panel

- a. The chair of the SCB will appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.
- b. The chair of the SCB will appoint one of the Hearing Panel members to serve as chair of the panel. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Response Review Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Response Review Panel. A student may not serve as chair of the Hearing Panel or Response Review Panel.
- c. The Administrator (or designee) will serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations.

9. Pre-hearing procedures. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator will ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- a. Suggested questions for the panel to ask the respondent or the complainant.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. Written discussion or argument addressing the information contained in the final report.
- c. Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the final report only if the information was not available prior to the completion of the final report or if the information was provided to the investigator prior to the completion of the investigation but the information was not included in the final report.

10. Hearing logistics

- a. The hearing will be held at the time and place listed in the notice.
- b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, members of the Hearing Panel, and others only if requested by DOS.
- c. Hearings may be held in person or using secure video conferencing software supported by the University. The University will make a single record of all hearings. Hearing Panel deliberations are not recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for response review or reversal of the Hearing Panel's decision. All parties will work with the Administrator for access to the software and a private secure space to use the software.
- d. All parties are invited to fully participate in the hearing. The administrator may grant any party the ability to attend the hearing, answer questions, and make a statement from behind a partition, from another room, or through another alternative method.
- e. The complainant, if any, may only be present during the portion of the hearing where the Hearing Panel questions the complainant, unless the Administrator determines in appropriate cases that the complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of

the investigator. Neither the complainant nor the respondent is required to speak at the hearing.

- f. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator. Additional witnesses may be called by the chair after consultation with the Administrator if additional witnesses are necessary for the Hearing Panel to properly resolve the case. The intention of the Code is that the final report, in most cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the final report.
- g. Only the chair of the Hearing Panel may ask questions during the hearing and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing if the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.
- h. The hearing will generally be conducted as follows:
 - i. Introductions to those present
 - ii. Summary of the hearing process
 - iii. Explanation of the charges against the respondent
 - iv. Opening statement by the complainant (if applicable) addressing the final report and the allegations that the respondent violated the Code.
 - v. Opening statement by the respondent addressing the final report and the allegations that the respondent violated the Code.
 - vi. Questions, if any, by the Hearing Panel chair for the investigator(s) or the parties.
 - vii. Final statements by the parties.
 - viii. All parties dismissed, and the recording of the hearing is stopped.
 - ix. Hearing Panel deliberation.

11. Hearing Panel decision.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- a. All Hearing Panel decisions will be made by a majority vote.
- b. In making its decision, the Hearing Panel will consider all relevant information from the following sources:
 - i. The final report, including the findings and conclusions contained in the report.
 - ii. Any written information provided by the parties as provided above.
 - iii. The information received at the hearing.
- c. The Hearing Panel should adopt the findings and credibility analysis contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different finding. Any findings issued by the Hearing Panel must be based on a more likely than not standard.
- d. The Administrator will also serve as a resource to the Hearing Panel, including to help ensure that outcomes are reasonably consistent among similar cases. If the Hearing Panel determines that a respondent is responsible for a violation of this Code, the Administrator will inform the panel of any previous conduct violations or other relevant disciplinary actions involving the respondent.
- e. The Hearing Panel will not consider previous findings in any legal or campus proceeding when determining responsibility for violation of this Code. The Hearing Panel may consider such previous findings solely when determining outcomes after a finding of responsibility is made.
- f. The Hearing Panel will issue a written decision within 10 days after completing deliberations. If the Hearing Panel needs additional time to issue the written decision, the Administrator will notify the parties. The panel chair will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
- g. The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:
 - i. The investigator failed to properly investigate the allegation and the failure was substantial and impacted the decision. or
 - ii. There is new information that could substantially affect the decision and the new information could not have been discovered before the issuance of the final report.

F-8. Response to the Formal Resolution Process Decision

- a. Any party may respond to the Formal Resolution Process decision, whether it was made by the Administrator or the SCB.
- b. Responses are not limited to arguments that the Hearing Panel decision should be overturned or modified but can be statements in support of the findings using the factors for response established below. That is to say, the Response is an opportunity to argue in favor of, or against, the decision based on the specific listed factors.
- c. Outcomes imposed by the Hearing Panel will not go into effect until either the deadline for a response has expired and no response has been filed or until the decision is upheld after response. However, the Administrator may impose any outcome issued by the Hearing Panel as an interim action pending the response review.
- d. Any party may submit a response to the Administrator's, Hearing Officer's, or Hearing Panel's final decision. Responses must be submitted in writing to the Administrator and must set forth the grounds for the response. The response must be filed no later than five days after the decision is delivered to the parties. Responses are to be directed to the University and will not be provided to other parties in the case, if any. There is no expectation that the response be of a certain level of formality or read like a legal filing.
- e. Responses are limited to the following grounds:
 1. A conflict of interest by a decision maker that significantly impacted the outcome of the hearing or a procedural error in the investigation process that significantly impacted the outcome of the hearing.
 2. New information, unavailable during the investigation or hearing, or information that was technically available but for which no reasonable person would have sought that information in advance of the hearing, as the need for the information or its evidentiary value did not reasonably arise until during the hearing, and that would likely have substantially impacted the original finding or outcome if known.
 3. The outcomes imposed are substantially disproportionate to the severity of the violation, Note that the imposition of an administrative fee is not a outcome, and therefore cannot be reversed or modified.
- f. A response review will be limited to a review of the decision, the final

report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and- any written materials submitted with the response. Where a response is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the decision and whether the new information would likely have substantially impacted the original finding or outcome if known.

g. Response review procedure

1. The chair of the SCB will appoint three to five members of the SCB to serve on the Response Review Panel and will designate one member to serve as chair of the Response Review Panel. Any member who served on the Hearing Panel will not serve on the Response Review Panel on the same case. A student may not serve as chair of a Response Review Panel.
2. The Response Review Panel will issue a written decision. The decision should be issued within 15 days of receiving the response or responses. The chair of the Response Review Panel will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
3. The Response Review Panel may:
 - a. Uphold the Administrator's, Hearing Officer's, or Hearing Panel's decision.
 - b. Uphold the finding that the respondent violated the code but revise the outcome(s).
 - c. Return the matter for reconsideration. or
 - d. Return the matter for additional investigation.

e. Unless the case is returned for reconsideration or to the investigator for additional investigation, the decision of the Response Review Panel is the final institutional decision. If the decision upholds the finding that the respondent violated the Code, the outcomes imposed will go into effect immediately.

F-9. Supplemental process and standards applying to allegations of academic dishonesty

- a. Academic dishonesty allegations are processed following the Conduct Resolution Processes in this Code. Following a report to DOS of instances or concerns of academic dishonesty, DOS will investigate the incident and will determine if there is a code violation, resulting in potential outcomes intended

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- to address acts of academic dishonesty. Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under this Code there is a finding of responsibility for academic dishonesty/misconduct.
- b. The following information supplements the resolution processes in cases of academic dishonesty:
- i. When the alleged academic dishonesty is discovered by the instructor, the instructor will notify the student of the allegation of academic dishonesty and will notify DOS.
 - ii. DOS receives the report and communicates with the instructor on the process of resolving the complaint.
 - iii. The instructor will have an opportunity to provide additional information regarding the allegation.
 - iv. DOS will meet with the student and may seek additional information from the instructor.
 - v. The instructor is included in the following communication with the student: the notice of allegation and decision letter.
 - vi. If the student chooses an informal process, DOS will meet with the student and provide an informal decision, consistent with policies, progressive discipline, and other previous and similar examples of academic dishonesty. The outcome of an informal process is not eligible for Response Review.
 - vii. If the student chooses a formal process, the hearing officer will conduct a formal investigation and will interview the instructor and other witnesses as part of the investigation.
 - viii. In disciplinary cases involving allegations of academic dishonesty, a majority of the Hearing Panel or Response Review Panel should be faculty members.
 - ix. The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.
 - x. The resolution decision of DOS, subject to the Response Review process outlined in this Code, is final.
 - xi. In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of "incomplete" until the process is complete.
 - xii. In situations where the instructor is no longer in their position prior to the completion of the conduct process, the instructor of record or the chair of the department may be asked to step in to finish the conduct

process and the instructor may coordinate the final grade based on the totality of the academic performance.

F-10. Outcomes.

a. Outcomes may be imposed for any student determined to have violated the Code. Possible outcomes include, but are not limited to:

- **Warning:** Written notice to the student.
- **Probation:** Written reprimand accompanied by a probationary period during which the student must not violate the Code to avoid more severe disciplinary outcomes.
- **Loss of privileges:** Denial of specified privileges for a designated period of time.
- **Restitution:** Compensation for loss, damage, or injury. This may take the form of appropriate service or monetary or material replacement.
- **Educational outcomes:** Completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.
- **Deferred suspension:** The last opportunity before being suspended, which remains in place until the natural end of the academic relationship with the University.
- **Housing suspension:** Separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.
- **Housing expulsion:** Permanent separation of the student from University Housing.
- **University suspension:** Separation of the student from the University for a definite period, after which the student is eligible to return. Conditions for return may be specified.
- **University expulsion:** Permanent separation of the student from the University.
- **Revocation of admission:** Admission to the University may be revoked .
- **Revocation of degree:** A degree awarded from the University may be revoked.
- **Withholding of degree:** The University may withhold awarding a degree otherwise earned until the completion of all outcomes imposed.

b. More than one of the outcomes listed above may be imposed for any single violation.

c. A student who fails to comply with the outcome(s) imposed will have a disciplinary hold placed on their record until the student complies with all outcome(s) imposed.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

d. Disciplinary outcomes other than suspension, expulsion or revocation or withholding of a degree will not be made part of the student's permanent academic record but will become part of the student's disciplinary record. Such outcomes will be expunged from the student's disciplinary record seven years after final disposition of the case unless the University is legally required to maintain them for a further time.

G. MISCELLANEOUS

G-1. Role of an advisor. In accordance with the educational purpose of the Code, all students, including respondents and complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any response. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of the University official conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student or make a presentation on behalf of the student.

G-2. Administrative fee. Any time a student is found to have violated the Code, except in situations where the hearing officer issues only a warning, the hearing officer may charge the student an administrative fee of \$150. This is not considered an outcome and will not be a subject of a response review.

G-3. Parent notification. The University may notify parents of students under the age of 21 when a student has been found to have committed a drug- or alcohol-related violation. This is not considered an outcome and may not be a subject of a response review. The decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

G-4. Training. All members of the SCB, the Administrator, and the investigators will receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, as well as all applicable federal and state laws.

G-5. Timeframe. With the exception of deadlines for requesting a hearing before the SCB (see section F.7) or for filing a response (see section F.8), all other timeframes contained in the Code are suggested timeframes. While the timeframes should be

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for response review or reversal of any decision.

G-6. Interpretation. Any question of interpretation regarding the Code or these procedures will be referred to the Administrator or their designee for final decision.

G-7. Disclosure. The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of Title 18, United States Code), incest, or statutory rape, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the reporting victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim will be treated as the victim for purposes of this paragraph.

G-8. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

G-9. Review by Board of Regents: Board of Regents review of a final institutional decision to the Board of Regents is governed by Idaho State Board of Education Governing Policies and Procedures Section III.P.17.

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Comprehensive review. Updates to align with procedure changes and new system implementation as well as federal compliance requirements.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

As soon as approved.

ER45.05 -- Early Setup and Advance Funding of Sponsored Project Budgets
December 11, 2018(rewrite)

A. General Purpose:

A-1. Early Ssetup. Principal investigators (“PIs”) are frequently informed that a sponsor has made or intends to make an award to the University, but the University has either not received the award document or has received but not fully executed (see C-2) an agreement related to the sponsored project (see B-2). In such circumstances, a PI (or unit/college) may request that the Office of Sponsored Programs (OSP) set up a grant code early in advance (“early setup”), thus allowing the PI to start work and spending on the project and reducing or eliminating the need for cost transfers at a later date.

A-2. Advance Ffunding. ~~Frequently, for~~ For an existing project, the PI may be informed that the sponsor intends to issue an amendment to add time, funding, or both, but the amendment has not yet been received and/or fully executed (see BC-2). The unit/college may request that OSP allow expenditures beyond the current allocation or end-date of the grant sponsored project account, ~~until prior to~~ until prior to an amendment is being received (“advance funding”). ~~thus~~ This eliminating-reduces or eliminates the need for cost transfers at a later date and allowing the PI to continue working on the project without interruption.

B. Scope. This policy applies to all sponsored projects. However, for the purposes of this policy, contracts and other types of non-assistance agreements are not eligible for an early setup, unless an exception is given by the authorized official of the University or his/her the official's delegated designee of the University.

CB. Definitions:

CB-1. Award Document-document or Notice-notice of Awardaward: Any of the various funding vehicles used by external sponsors to indicate that the sponsor is making a commitment to fund a proposal. These may take the form of:

- a) a grant notice or subaward, which may or may not require signature by the University;
- b) a contract, sub-contract or agreement (including a cooperative agreement), requiring execution by the University and the sponsor;

c) an award letter or email, which may or may not include a check payment in advance; or

d) a federal non-assistance contract or subcontract.

~~For the purposes of this policy, contracts and other types of non-assistance agreements are not eligible for an early setup, unless an exception is given by the authorized official of the University.~~

CB-2. Fully ~~E~~xecuted award or amendment: An agreement or amendment which has all of the required authorized signatures for both the University and the sponsor. For the sponsor, the authorized signatory is typically the granting or contracting officer; for the University, the authorized signatory is the Director of the Office of Sponsored Programs or ~~authorized~~ designee.

~~G.~~ **D. Policy**

DC-1. Early ~~Setup~~ setup. Early setups are generally established for not more than 90 days from the request date and for ~~not more than~~ 25% of the expected first year's funding amount.

a) Early set ups may not be used ~~F~~for awards where the terms and conditions indicate that the start date is the date of last signature.
~~early setups may not be used.~~

b) For direct federally ~~—~~ funded grants and cooperative agreements, the Vice President for Research and Economic Development (VPRED),⁷ or designee,⁷ may provide the funding guarantee on the early setup limited to 90 ~~—~~days from the request date and 25% of the first increment unless express permission is given for additional time or amounts.

cb) For non-direct federally funded (flow-through) grants (~~flow-through~~) or cooperative agreements (and at the discretion of the Director of OSP,⁷ or designee), the unit/college must provide the funding guarantee on the early setup.

de) For all ~~other non-federal/federal flow-through~~ sponsored program ~~contracts~~ awards, including industry sponsored contracts, OSP will perform a risk evaluation to determine whether if an early setup is

~~reasonable~~permissible. Upon OSP approval, the unit/college must provide the funding guarantee for the early setup.

ed) Situations that arise outside of these parameters will be evaluated and a determination made on a case-by-case basis by the Director of the OSP, or designee.

fe) If the project is subject to any additional compliance obligations, including but not limited to those subject to oversight by the IACUC (see APM 45.01), IBC (see APM 35.11, APM 45.20, and 45.23), IRB (FSH 5200), or Radiation Safety Committee (FSH 1640.71), or to those imposed by financial conflict of interest policies (FSH 5600 and 5650), all associated-then applicable requirements must be completed and approved via the appropriate authority before project work can begin and ~~before~~ an early setup ~~will be~~ established.

DE-2. Advance funding. Advance funding is generally authorized for not more than 90 days from the request date or project end -date and for not more than ~~twenty-five percent (25%)~~ of the expected additional funding amount. For direct federally--funded grant projects, the Vice President for Research and Economic Development will provide the advance funding guarantee, as long as the unit/college provides certification~~certification~~, using the template made available by the Office of Sponsored Programs that confirmings that the PI is compliant with all deliverables and protocols per Section ED-2.

To initiate advance funding approval, see ED-2 below.

a) By submitting an advance funding request, the unit/college is requesting that OSP allow expenditures beyond the current allocation or end-date of the grant account for federal or state awards (but not contracts), only when the agency has indicated in writing to the University that it intends to issue an amendment for the proposed addition of time, funding, or both. If an amendment is not received to continue the project, all expenditures will be transferred to the unit/college guarantee source and the project account will be closed.

b) Situations that arise outside of the parameters cited in this policy will be evaluated and a determination made on a case-by-case basis by the Director of ~~the~~ OSP or designee.

c) If the project is subject to any additional compliance obligations, such as those subject to oversight by the IACUC (see APM 45.01), IBC (see APM 35.11, APM 45.20, and 45.23), IRB (FSH 5200), Radiation

Safety Committee ([FSH 1640.71](#)), or those imposed by financial conflict of interest [policies](#) ([FSH 5600](#) and [5650](#)), and the amendment that gives rise to the advance funding request either extends, alters, or creates new compliance obligations that are then applicable, all such research compliance requirements must be met before any work with respect to such obligations may be undertaken.

d) If advance funding is not approved by the unit and OSP, the PI must cease all project-related work and spending until an amendment is received and executed.

DE. Process/Procedures.

DE-1. Early ~~Setup~~ ~~setup~~ ~~Request~~ ~~request~~. The PI (or unit/college) must submit an Early Setup Request Form to OSP for review and approval. This form is available [on the OSP website in the electronic research administration system \(VERASERA\)](#).

DE-2. Advance ~~Funding~~ ~~funding~~ ~~Request~~ ~~request~~. Written advance funding approval [confirming the following](#) is to be provided to OSP from the provost, dean, [or](#) institute director, or equivalent, or an approved designee, prior to [expenditures spending](#) in deficit or past the end-date of a continuation project, ~~confirming the following~~:

- a)** The project is in compliance with all project deliverables, including technical reports;
- b)** All project compliance protocols, if any, are up to date; and
- c)** The unit/college understands they will be responsible for incurred costs, should the amendment not be received and/or approved.

For sample unit/college certification and approval text, as well as additional details on advance funding (and how it differs from an early setup) please visit the [Sponsored Project Compliance section Departmental Grant Administrator \(DGA\) tab](#) of the OSP [Website website](#).

DE-3. Non-~~Receipt~~ ~~receipt~~ of ~~Aa~~award [or amendment](#) within **90 Days ~~days~~.** Barring extenuating circumstances and the approval of the Director of OSP or designee to do otherwise, if an official award document, notice of an award, or amendment is not received within 90 days of the early setup establishment or advance funding approval, all expenditures must be transferred by the unit/college to the previously identified guarantee source identified.

| **EF. Information.** Any questions regarding the early setup of a sponsored project or advance funding of an existing project should be addressed to the Office of Sponsored Programs Post Award Unit at 208-885-6651 or by emailing the [OSP Post Award team](#).

05.03 — Inland Marine Insurance Coverage

Last updated December 19, 2008

CONTENTS

- A. Policy
- B. Process/Procedure
- C. Contact Information
- D. Forms

A. Policy. Inland Marine coverage is for items that are valued under \$2,000, are owned by the University or are contractually obligated to be insured by the University, and may be subject to theft, or physical damage. Inland Marine coverage is not automatic coverage. Departments must report annually all items to be covered. If a new item is purchased or an addition is needed during the year, a department may request an addition to its covered items. The cost for coverage to the department is \$.035 per \$100 of the value of each item. Premiums are billed annually and are not prorated based on the length of time an item is covered. Items that have a locking mechanism to prevent theft can be covered by request at no charge to the department. In the event of a loss, the department must work with the university Department of Risk Management (Risk) to make a claim to the State of Idaho Insurance Fund. When a loss occurs, there is a \$50 deductible that the department must pay. *[ed. 12-13]*

A-1. Coverage Exclusions. Inland Marine insures against risk of physical loss or damage, except as provided by policy exclusions, which include, but are not limited to, the following:

- i) Loss or damage to student or employee personal property unless:
 - a) the loss is due to clear negligence of the University, or
 - b) in the case of employee property, the employee has been requested in writing by an authorized representative of the University to bring personal property to the workplace for employment purposes and a copy of that written request is forwarded to Risk prior to any loss;
- ii) Inventory shortage or unexplained disappearances;
- iii) Theft of University property by an employee;
- iv) Ordinary wear and tear, inherent vice, moths, termites, or vermin;
- v) Mechanical breakdown;
- vi) Nuclear reaction;
- vii) War;
- viii) Real property or buildings;
- ix) Autos;
- x) Vehicles licensed for the road; and
- xi) Consumable supplies.

B. Process/Procedure:

B-1. Annual Renewal. Departments are responsible for maintaining their Inland Marine Insurance schedule. Departments must submit an updated schedule of items to be covered to Risk once a year (usually in the spring). Risk will collect from each department an electronic schedule of items to cover. Risk will compile all data and will send the necessary information to the State of Idaho Department of Administration Division of Insurance and Internal Support Risk Management Program. The State of Idaho will bind coverage with an insurance company. Items can be added for coverage at any time during the fiscal year. For specific instructions on procedure see D below.

~~B-2. **Adding Items to Coverage during the fiscal year.** Items may be added at any time during the year. The coverage of the item will begin on the date the request is sent to the State of Idaho Risk office and, unless deleted prior, will continue until the end of the fiscal year, June 30. Inland Marine Insurance premiums for the fiscal year are not pro-rated, so regardless of when you add an item during the year you will pay for a full year's coverage of that item. For specific instructions on procedure see D below.~~

~~B-3. **Deleting Items from Coverage during the fiscal year.** Items may be deleted at any time during the year. The coverage of the item will end on the date requested. Inland Marine Insurance premiums for the fiscal year are not pro-rated. For specific instructions on procedure see D below.~~

~~B-4. **Claims.** The department can file a claim to receive funds to cover the cost of the replacement or damage of an Inland Marine insured item. For specific instructions on procedure see D below.~~

~~C. **Contact Information.** Any problems or questions concerning the requirements for increasing insurance coverage with Inland Marine Insurance or maintaining inventory schedules, please call Risk at (208) 885-7177, risk@uidaho.edu or by fax at (208) 885-9490.~~

~~D. **Forms and Examples.** To request forms for use, e-mail risk@uidaho.edu. For instructions and examples of completed forms, visit www.uidaho.edu/risk/insurance/inlandmarine and search worksheets by category.~~

Administrative Procedures Manual

- APM 05.03 Inland Marine Insurance Coverage
- APM 45.05 Early Setup and Advance Funding of Sponsored Project Budgets

Proposal for Ad-Hoc Faculty Committee on Initial Curriculum for the Undergraduate Academic Certificate in Sustainability

The committee shall be comprised of faculty representatives from each college and additional faculty as needed to provide balanced representation of expertise from each area of sustainability (ecological, social, and economic). Initial appointments to the committee shall be the faculty members who have been serving on the ad-hoc steering committee put together in April 2023 by recommendation of the deans in each college. The steering committee elected Erin James as the Chair and we propose that Prof. James serve as Chair of the ad-hoc Curriculum Committee.

The university Sustainability Director and Vice Provost for Academic Initiatives will serve as *ex officio*, non-voting committee members.

The primary tasks of the ad-hoc committee are as follows:

- Review course proposals solicited from every college for inclusion in the certificate, relative to the criteria used for the solicitation, which are based on national best practices
- Perform a final review of the proposed certificate structure and contents based on the approved courses and vote on committee-wide approval of an initial curriculum for the Sustainability Certificate
- Act as the “relevant unit” for placing the faculty-approved proposal for the new program in CIM, with the next level of approval at the Provost Office/UCC.
- Be available to answer any questions or concerns about the curriculum that may come up at UCC or Faculty Senate and to make any changes requested by UCC or Senate as the proposal moves through the approval process

Additionally, when the Sustainability Certificate is fully approved as a new program, the ad-hoc committee will propose that the Faculty Senate establish a standing committee to continue to maintain the curriculum for the certificate in a manner similar to the development of the initial curriculum. Maintenance of the curriculum by the standing committee will include annual solicitation and review of courses to be included in the certificate and review of existing courses based on syllabi and assessment materials. The standing faculty committee will also evaluate sub-waiver requests, weigh in on student petitions that may occur, and provide mentoring for students on curriculum content upon request. The standing committee will provide direction to a team of cross-trained Provost’s Office staff who will handle routine student requests related to the certificate. In the first year of its existence, the standing committee will write and approve bylaws that define eligibility for a broader group of Program Faculty who participate in the program and are eligible to vote on future curriculum changes, similar to the bylaws established for other interdisciplinary programs such as Environmental Science and Water Resources.

The standing curriculum committee will also oversee the assessment of the certificate. The assessment will be designed by the Sustainability Director, in cooperation with the Director of General Education and Assessment (DGEA) and the Associate Director of Assessment and Accreditation. The Sustainability Director will implement the assessment and report findings and recommendations to the committee, which will approve, add to, or revise the recommendations and ensure that findings are used to improve the curriculum.

GENERAL

Sustainability Certificate Courses

Steering Committee Proposal Criteria & Suggestions

The University of Idaho Faculty is invited to submit proposals for courses for the university's sustainability certificate.

General sustainability certificate courses should be focused on ecological, social, and/or economic sustainability topics.

Learning Objectives for General Sustainability Certificate Courses:

1. Students will be able to define sustainability and identify major local, national, and global sustainability challenges.
2. Students will be able to explain how natural, economic, and/or social systems create or prevent sustainability.
3. Students will be able to reflect critically on the global implications of their personal and professional actions on sustainability.

Notes on General Sustainability Certificate Courses:

- These courses should be introductory or mid-level within a discipline and may address ecological, economic, or social sustainability topics with some degree of specificity. To be included, courses must include at least 50% content pertaining to sustainability topics as defined by [this document](#).
- Courses centered on **ecological sustainability** focus on protecting and restoring the integrity of Earth's ecological systems, with special concern for biological diversity and the natural processes that sustain life.
- Courses centered on **economic sustainability** focus on long-term economic prosperity without negative impacts on the environment, society, or culture. They examine patterns of production and consumption that safeguard Earth's regenerative capacities.
- Courses centered on **social sustainability** focus on the interactions between society and nature.
- Courses may be assigned to more than one category (ecological, economic, and/or social sustainability).
- For examples of topics related to ecological, economic, or social sustainability, please [click here](#).
- Preferably, the course will have no or few prerequisites.

- GEOL 309: Ground Water Hydrology
- GEOG 313: Global Climate Change*
- GEOG 430: Climate Change Ecology
- GEOL 474: Stable Isotopes in the Environment
- REM 440: Restoration Ecology
- SOIL 448: Drinking Water and Human Health

Select one Economic Sustainability course from the following:

- AGEC 451: Applied Environment and Natural Resource Economics
- AGEC 452: Water Economics and Policy Analysis
- ARCH 463: Environmental Control Systems*
- ECON 447: International Development Economics
- ENVS 423: Planning Sustainable Places* (no syllabus yet)
- FIN 435: Sustainable Finance and Investments
- IAD 368: Materials for Health and Sustainability*^
- INDT 419: Industrial Sustainability Analysis*
- LAW XXX: Agriculture and the Environment*^
- ME436: Sustainable Energy Sources and Systems
- SOIL 444: Water Quality in the Pacific Northwest

Select one Social Sustainability course from the following:

- ENGL 316: Environmental Writing
- ENGL 322: Climate Change Fiction
- HIST 424: American Environmental History*
- IAD 151: Introduction to Interior Architecture and Design*
- IAD 443: Universal Design
- LAW 4XX: Foundations of Natural Resource Law*^
- RSTM 380: Principles of Travel and Tourism*
- SOC 340: Environmental Sociology and Globalization*
- SOC 344: Understanding Communities^
- SOC 465: Environmental Justice*
- SOC 466: Climate Change and Society*

Total Credit Hours: 12

*Course has no prerequisites

INTEGRATIVE CORE

Sustainability Certificate Courses

Steering Committee Proposal Criteria & Suggestions

The University of Idaho Faculty is invited to submit proposals for integrative core courses for the university's sustainability certificate.

Notes on Integrative Core Sustainability Certificate Courses:

- Integrative Core courses have a primary and explicit focus on sustainability. Thematic courses may qualify as integrative core if social, environmental, and economic dimensions are addressed with sufficient balance and depth to confer integrative core knowledge that is transferable to other themes or issues.
- The course should be aimed at a general population (i.e., not exclusively for majors within a specific discipline) and should address issues broadly.
- Preferably, the course will have no prerequisites.

Executive Summary

On April 11, 2023, the Faculty Senate of the University of Idaho voted (57% for, 43% against) to request that I suspend APM 30.16 and revert to previous policy until a resolution could be found with faculty input.

The memo received stated: The Senate requests that the prior version of APM 30.16 be reinstated until such time as the Office of Information Technology (OIT) can come to a mutually-satisfactory agreement with the Faculty Senate that better aligns our scholarly and creative needs with those of an aspiring Carnegie R1 institution.

I have discussed concerns with the APM 30.16 Faculty Working Group Leadership, discussed with OIT Leadership, reviewed data and evaluated policies at other institutions. I have concluded that while the execution of the policy was problematic due to supply chain and implementation inefficiencies, and the concerns raised by employees were indeed valid, the timeline and facts indicate that there was faculty input solicited, some of the recommendations of the Faculty Working Group were adopted, supply chain issues have greatly improved, processing and delivery times have improved, the policy actually helps with our R1 initiative rather than hinders it, and the current policy is similar to those at our peer and sister institutions. Therefore, I find no need to roll-back the policy at this time.

Timeline

As early as October 2021, OIT had presented to Faculty Senate that a policy was being developed that included centralized procurement. In fairness, concerns were expressed, but the policy was still under development. In November 2021, OIT notified Faculty Senate leadership in an email that a revised policy that included central procurement was under development. In June 2022 the policy draft was sent to Faculty Senate and Staff Council Leadership for review. There were no comments received and the policy was approved on July 22, 2022.

There were a number of meetings throughout 2022 and into 2023 with faculty senate representatives and the APM 30.16 Faculty Working Group. A revised policy was shared with the Faculty Senate IT Committee on March 29, 2023. No objections were noted nor were there further questions. The revised policy then went into effect.

On April 11, 2023, after debate, a motion was passed (57% for, 43% against) by Faculty Senate asking for the policy to be rolled back. On April 19, 2023, a memo formally requesting the policy be rolled back was received.

Policy effectiveness

APM 30.16 was written foremost with security and technology compliance in mind (DoD, DoE, NSF among others), with efficiency and total cost of ownership being secondary but important components. The policy is not unlike those at other R1 institutions and our sister institutions. The policy as currently constructed meets all government compliance requirements.

Review of key metrics indicates that the policy is meeting its objectives. Approximately 92% of computer orders are typical configuration or modified typical configuration. Only 8% of orders request exception to the typical configuration, and of those, only 1% (7 orders university wide) were denied and only because the specs requested could be met by the typical configuration.

The savings from going to centralized procurement of computers is approximately \$213,000 on an annual basis, monies that were used to put in the new research compliance system that enables us to certify federal agency awards.

Timeliness has also improved. In October 2022, it took 33 working days on average to fulfill an order, primarily due to supply chain issues. That is clearly an unacceptable number as it represents an average and many orders took much longer. It now takes 8 working days on average and continues to improve. There are outliers for special orders that are problematic and understandably create frustration with users. A review of 5 requests open the longest range from 97 to 147 days. Again, these are specialized situations, typically involving complex designs and the purchase of multiple items to outfit classrooms, conferences rooms or labs.

Conclusion

There is little doubt that supply chain issues and implementation inefficiencies hurt service delivery when the policy was implemented. The frustration felt by our employees was valid. Since that time, OIT has made significant progress clearing supply chain bottlenecks and doing a better job of efficiently processing and fulfilling orders. 92% of all computer orders utilize the typical configuration. The policy is compliant with federal requirements, and the savings from the centralized procurement program paid for a key research compliance system that has improved our ability to compete for grants. While there is not full agreement, OIT did solicit feedback and the policy contains elements from the APM 30.16 Faculty Working Group. Furthermore, the policy is not unlike that at other institutions. For all of these reasons, I do not see a need to roll back the policy.

I do value the leadership of our Faculty Senate and its important role in shared governance. The concerns that lead to this request were valid. I thank the Faculty Senate for working with OIT to better the original policy and to raise these employee frustrations to our attention. While this decision is not the outcome some were looking for, it has caused us to take yet another look at our operations and work to continually improve them. Behind much of our success, is the hard collaborative work on policy issues such as this. Again, I am grateful for the time and effort contributed to this policy and related processes.

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 4

Approved at Mtg. #5
September 19, 2023

Tuesday, September 12, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Sammaruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, Strickland

Absent: Miller, Reynolds, Walsh

Guests/speakers: Ken Udas

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #3, September 5, 2023, were approved as distributed.

Consent Agenda:

- Approval of University Committee Appointments
There were no requests to pull items out for discussion and vote. The consent agenda was approved by unanimous consent.

Chair's Report:

- We have several presentations today. One of them is by Torrey Lawrence about the status of higher education. The other one is by Ken Udas about digital initiatives at U of I. The goal is to share more information and details about where we are and to help us think about next steps.
- We will break down the complex landscape of the University of Phoenix transaction into several categories starting with a focus on academic issues. We plan to focus on financial elements, public relations aspects, and other topics later in the fall. Other issues are equally important, but the best approach when facing a complex and novel situation is to break it into smaller issues.
- We have invited John Woods - Provost and Chief Academic Officer for University of Phoenix - to the Senate meeting next week, September 19.
- I think it is important that all opinions are represented, so please send your academics-focused questions by Friday. We want to give John Woods the opportunity to prepare his presentation and address your questions. We will schedule more presentations as we move to other topics.

Provost's Report:

- This week, no new questions about the University of Phoenix were received.
- September is Katy Benoit Safety Awareness Month. Please make a note of the following events:
 - Wednesday, September 13, 7 – 9pm: "Take Back the Night" march.
<https://www.uidaho.edu/diversity/edu/womens-center/events/take-back-the-night>
 - Tuesday, September 19, at 7pm, in the International Ballroom: Katy Benoit Campus Safety Forum Keynote Address.

Status of Higher Education – Torrey Lawrence, Provost and Executive Vice President

Many factors are contributing to changes in Higher Education, such as: decrease in state funding; increase in cost; widely available choices between education and job preparation/training; the typical age of a student entering college is no longer between 18 and 22 years. We need to be fully aware of these changes and trends because they are impacting us.

The slides are a sub-selection from a presentation given at the ACE conference. The Provost shared data covering 50 years of Carnegie classification, starting from 1973, and 150 years of US high school (HS) graduation data. Following the 2008-09 recession, the birth rate dropped sharply. We are looking at 15 years of no growth as the number of 2030 HS graduates returns to 2015 levels.

The Provost displayed 150 years of enrollment data by gender. At the U of I, 53% of the students are female, which is within the national trends. At the U. of Phoenix, 70% are female. Private for-profit institutions make up about 5% of enrollments.

Schools are changing the way they teach, offering online, hybrid or on-campus classes, and projections indicate that online education will continue to grow. Naturally, this is driving the massive growth of online universities.

Another factor contributing to changes in Higher Ed is the increase in alternative credentials, of which a large spectrum is now available in many schools. 100M learners spend more than \$10B each year on micro and alternative credentials. U of I offers some, but they are not a major component.

Google Career Certificates: 6.3M learners have participated. Data covering 150 years of Higher Ed conferrals shows a rise in non-degree credentials. This area is a growth opportunity for us.

Discussion:

A Senator argued that, if we decided to make changes based on these data, we may miss the broader picture and take the wrong path. Provost Lawrence agreed that the facts presented above are not meant to be driving all decisions. But we need to be informed and aware of the landscape, so that we may join some of those efforts if we believe they are beneficial to us. Understanding this landscape will help us understand future opportunities better.

Vice Chair Haltinner commented on the importance to push back against anti-higher education political messages that may discourage college enrollment.

Sustainability Certificate

- Chair Gauthier gave a summary of the issue. The motion to be voted on was placed in the chat and read aloud by the Secretary: *“Move to appoint the existing interdisciplinary faculty-led committee as an ad-hoc program committee to serve as the ‘relevant unit and college’ authorized to submit curricular proposals per FSH 4120-E. This committee shall be empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum.”*

Moved to approve (Mittelstaedt, Long).

Vote: 21/23 yes; 2/23 no. Motion passes.

Task Force Proposal from Senate priorities as Emerged from the Senate Retreat

- Vice Chair Haltinner reviewed the process that was agreed upon at the retreat. At the retreat, senators brainstormed on potential priorities for the year, resulting in a list of about 80 items. Additional feedback and votes were collected by email. Based on that, the list was narrowed down to about 8 – 9 priorities, to be assigned to nine standing committees and four senate task forces. At this meeting, we’ll finalize senate task forces and their charges.
 - Employee Retention Task Force (Priorities: Campus Climate Survey; Retaining employees; Salary raises; Well-Being). Charge: to conduct a campus climate survey to

- assess employees' needs; Based on that survey, work with FSL, FAC, and FSPG to propose policy changes, with special attention to salary raises and employee welfare.
- Employee Benefits Task Force (Priority: Improvement of Dependent Tuition Waiver). Charge: Assess peer institutional practices; assess U of I specific contexts, needs, constraints; work with the Finance Office to meet needs in light of constraints. Currently, only one dependent at a time can receive the tuition waiver benefit. Staff Council is also very interested in working with Senate towards an extension of the benefit.
 - Boundary of APM/FSH Task Force (Priority: Faculty involvement in policy and procedures involving employees). Charge: work to improve current practices; work with the Provost Office and other entities on ways to include employees in future decisions that concern them.
 - University of Phoenix. Charges still to be determined.

Discussion:

Provost Lawrence noted that the results of the “Great Colleges to Work for” survey should come out very soon. It’s something to be aware of, to avoid potential overlap. Vice Chair Haltinner recalled that the idea was to ask questions that weren’t covered in the “Great Colleges to Work for” survey, and also to cover more university-specific aspects. With regard to the “salary raises” priority, the Provost noted that we have the Staff Compensation Committee (SCC). Some may remember that SCC came to Senate last year to present their proposal for CEC.

A Senator thought that the “APM/FSH Boundary” task force should have a clearly defined and pointed charge. Several Senators agreed that the scope should be broader than looking into specific policies: people are interested in whether the decision-making process about APM items is working. The broader charge should be to come up with a mechanism through which one can identify proposed APM policies that impact teaching or research and, thus, faculty in the execution of their responsibilities, and whether parts of those policies may be best housed in FSH. How are APM items modified? Is the process consistent with the Constitution of the University Faculty?

There was a general consensus that specific technology policies, such as APM 30.16, should be left to the Information Technology Committee.

- Moved to vote *yes* or *no* to the creation of each individual task force (Haltinner, Mittelsteadt).
 - Employee Retention Task Force
22/23 yes; 1/23 no. Motion passes.
 - Employee Benefits Task Force
22/23 yes; 1/23 no. Motion passes.
 - Boundary of APM/FSH Task Force
18/23 yes; 5/23 no. Motion passes.

Announcements and Communications:

- Digital Learning Initiatives at University of Idaho - Ken Udas, Vice Provost for Digital Learning
Vice Provost Udas emphasized that he is always open to questions and comments. He introduced Nicole Remi, Program Manager.

Today, he will provide an overview of digital learning initiatives (DLI) his office has worked on or is working on. Digital Learning (DL) was established about two years ago, following the recommendations from a White Paper put together by a DL working group.

Over the past couple of years, the office received several requests from various groups/units/deans interested in developing digital programs.

They do market research and gather information on, for instance, other schools who may have or are developing similar programs.

They provide support with use of technology in teaching and learning, and work on online infrastructural capacities.

For some programs, they can provide financial support in the form of seed funds. For instance, they helped fund a program in COS and one in CBE. It's a four-year commitment to provide seed funds for more systemic needs, such as faculty lines.

They provide support for individual classes, typically under the Gen Ed portfolio. They help the university comply with current state and federal regulations and stay in touch with state initiatives, such as Online Idaho. They deliver market research forecasting. They work with bodies that provide support in teaching and learning, such as CETL. Lately, they worked closely with Virtual Technology and Design (VTD), where they had the opportunity to work with Jean-Marc Gauthier. Jean-Marc and his team developed an educational support system for virtual labs.

Currently, they are working with six colleges on various ideas. Overall, they work across the university to help move things forward.

One of the larger efforts is CAPE (Continuing Adult Professional Education). They help streamline and simplify traditional processes to facilitate the engagement of non-traditional learners. They plan to provide a robust set of programs for adult learners by Spring 2024.

Discussion:

A Senator had a question about certificates. As certificates are becoming increasingly popular, should we expand them and/or introduce more of them? Also, if companies are interested in those certificates for prospective employees, what's the best way to bring together the industry and the university? Reply by Provost Lawrence: There are several different types of certificates that are allowed by the SBOE, many of which are 12-credit certificates (roughly 50% of a minor). Some institutions have introduced "stackable certificates," that can add up to a degree. This fall, CBE is offering an online BBA degree which is a combination of certificates. In this way, students have more customizable options to focus on particular areas and have the flexibility not to pursue a degree. This lets us build more flexible options using what we already have. As for the second part of the question: Some employers require traditional classes and credits (INL is an example of those). On the other side, programs like CAPE, just mentioned by Vice Provost Udas, offer training that doesn't result in academic credits or credentials, but fulfills the training requested by the company. We have a lot of options and opportunities.

- APM 30.16 update

Chair Gauthier pointed to the memo from President Green attached to the agenda.

Discussion:

Going back to the previous conversation about APM/FSH, a Senator reiterated that we should focus on a way to track processes and how well they are working. Now that some time has gone by since implementation of current APM 30.16, we should invite Dan Ewart to talk about how the policy is functioning across campus.

New Business:

Phones/Teams – Tim Murphy, College of Law

Senator Murphy reported concerns from his constituents about the phone/Teams changes. From a practical standpoint, a phone has a function. Giving out the department phone number is not a solution, because we don't have receptionists. But there are also concerns of a different nature. Being required to provide a business reason for keeping a phone is found to be inappropriate. It is a shared governance issue as well. Per FSH 1520, we should be able to have a discussion and a vote about our working conditions, including access to standard office equipment and a phone.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 5:00 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting # 4

Tuesday, September 12, 2023 at 3:30 pm
Zoom Only

- I. Call to Order
 - II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #3 September 5, 2023 **Attach. #1**
 - III. Consent Agenda (Vote)
 - Approval of University Committee Appointments **Attach. #2**
 - IV. Chair's Report
 - V. Provost's Report
 - VI. Status of High Ed Presentation – Torrey Lawrence, Provost and Executive Vice President **Attach. #3**
 - VII. Sustainability Certificate (Vote):
 - Discussion **Attach. #4**
 - VIII. Task Force Discussion (Vote): – Kristin Haltinner, Vice Chair Faculty Senate
 - Employee Retention
 - Dependents Tuition Benefit
 - University of Phoenix
 - APM/Technology Access
 - IX. Other Policy Business
 - *APM 05.02 – Property Coverage **Attach. #5**
 - *APM 90.24 – Student Health Insurance Requirement **Attach. #6**
 - *APM 45.21 – Responsible Conduct of Research Training **Attach. #7**
 - *APM 50.03 – How to Prepare Electronic personnel Action Forms (EPAFs) **Attach. #8**
 - X. Other Announcements and Communications
 - Digital Learning Initiatives at University of Idaho - Ken Udas, Vice Provost for Digital Learning
 - APM 30.16 Update
 - XI. New Business
 - Phones/Teams – Tim Murphy, College of Law
 - XII. Adjournment
- Attachments:

- **Attach. #1** Minutes of the 2023-24 Faculty Senate Meeting #3 (September 5, 2023)

- **Attach. #2** University Committee Appointments
- **Attach. #3** Status of Higher Ed Presentation
- **Attach. #4** Sustainability Certificate Presentation
- **Attach. #5** APM 05.02
- **Attach. #6** APM 90.24
- **Attach. #7** APM 45.21
- **Attach. #8** APM 50.03

*Changes to the Administrative Procedures Manual (APM): Please forward any questions or comments directly to both the policy coordinator at ui-policy@uidaho.edu and to the policy originator (listed on the cover sheet) within five working days of the senate meeting at which the APM is presented.

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 3

Tuesday, September 5, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland
Absent: Tibbals (excused), Reynolds, Walsh

Guests/Speakers: Kristin Henrich, Cari Fealy, Karen Hume, Erin James

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2022-23 Meeting #28, April 25, 2023 were approved as distributed.

The minutes of the 2023-24 Meeting #1, April 25, 2023 were approved as distributed.

The minutes of the 2023-24 Meeting #2, May 2, 2023 were approved as distributed.

Consent Agenda:

- Sabbatical Leave Committee Recommendations
- Spring 2023 Candidates for Graduation

There were no requests to pull items out for discussion and vote. The consent agenda was approved by unanimous consent.

Chair's Report:

- Welcome to the Faculty Senate. I want to thank you in advance, Senators, for the time that you will spend here. I also want to thank many people involved with the committees and people from administration and leadership. The work done by Faculty Senate is important and I think that it has tremendous value for the University. The Faculty Senate can be sometimes very efficient and sometimes less efficient, but it has its own value. The multiplicity of senator voices is very unique, and the decisions generated by this process are diverse and enrich other leadership decisions. If some of the voices are missing, the shared governance process does not work the way it's intended to.
- These considerations are timely, as we are about to engage in a close relationship with a university where the academic culture is very different and shared governance is not practiced. Full time faculty make up 2% of the faculty, tenure and Faculty Senate do not exist. The collaboration with University of Phoenix is moving forward. As with any collaboration, there is a potential for imbalance, especially with differences in technology, efficiency, cost, and business model. Although we know that University of Idaho brings quality to this partnership, our efficiency and expedition of decision making need to be prioritized. At the Open Forum on August 14th, John Woods, chief academic officer of the University of Phoenix stated: "To operate separately except for the things that have a level of importance and prioritization." It is important that we invite Mr. Woods to a next session of Faculty Senate to better understand what are the expectations in this new situation. Timing is important if you look at the calendar. One of the deadlines is the November accreditation and the other one is at the end of the year. I think that it is important that Faculty Senate sends feedback to the accreditation body. We need

to know how and when to send our feedback to the accrediting body. There's a need to create pathways for this new partnership. The Faculty Senate should have a role to play creating academic pathways with University of Phoenix.

- In attachment #6, you will find the letter sent to all senators by 2022-23 Senate Chair and Vice Chair, Kelly Quinnett and Erin Chapman, to provide clarification about the NDA they signed in April 2023.
- Retreat Follow-up and Working Group Updates:
Senate Vice Chair Haltinner shared slides about Senate priorities compiled from the August 2023 Senate Retreat. She also showed a list of issues that should be referred to committees. The slides are attached to these minutes.

Discussion:

In reference to some of the proposed priorities for the full Senate to undertake, the Provost had some comments and suggestions: 1) Concerning budget transparency, soon there will be a website with all documents, data, communications, etc. about the budget model. 2) The Spread Pay Committee should be separate from the Benefits Committee. 3) President Green is working on multiple working groups for the University of Phoenix partnership.

Some senators asked whether Senate will be involved in the Working Groups. Provost Lawrence said that there will be calls for volunteers.

With regard to the "faculty technology choice" item, a senator wondered if there is any room for faculty choice, given the recent developments with APM 30.16. Chair Gauthier responded that the Technology Working Group will take a broader look – beyond hardware procurement.

A senator recommended to link senate priorities to faculty responsibilities as specified in FSH. This will ensure that our purview of those projects has a solid foundation in policy.

Vice Chair Haltinner moved to a list of issues to be referred to appropriate committees. For instance, the University Teaching Committees should look into limits on email set by OIT, which impact faculty who aren't using Canvas email. A senator noted that OIT can make "email groups" larger than the limits. Another senator added that Canvas is a way around the problem only if students opt in to receive email through Canvas. They will follow up on this issue.

Vice Chair Haltinner also called for a Faculty Senate Representative on the Campus Planning Advisory Committee and encouraged volunteers for the working groups that were just presented. The discussion on best strategies to focus our working groups on will continue.

Provost's Report:

- The shooting incident reported this morning through Vandal Alert is now resolved with the person being in custody.
- Enrollment: As of last Friday, the overall enrollment was up by 2.2% compared to the same day last year. This is the 10th day benchmark. After the 10th day, things can change, mostly because of dual enrollment, which goes by high schools' schedules.
 - This year, we welcomed the second largest first-year freshman class in UI history.
 - Hopefully, dual credit enrollment continues to be strong.
 - A couple of colleges have grown their enrollment.
 - It will take some time to find out how enrollment impacts the budget.

- Each week, the Provost will answer a couple of questions on the University of Phoenix acquisition. The Phoenix question page continues to be updated. No questions were submitted for the meeting today.
- Common Read: The choice for 2023-24 was “The Nature Fix: Why Nature Makes Us Happier, Healthier and More Creative,” by Florence Williams. The keynote for that is October 17 in the International Ballroom. Selecting the next common read is a year-long process. You can send suggestions for the 2024-25 Common Read to Dean Panttaja by September 30.
- COVID: There has been some increase in COVID cases lately. COVID rapid tests and K9 masks are available on campus, at the ISUB, the Pitman Center, or the REC information desk. We are working on offering COVID-19 boosters and flu vaccines.
- Childcare came up at the Senate retreat as an issue of concern. Childcare availability has decreased since the pandemic. Dean of Students Blaine Eckles is at the meeting today to address this issue and answer questions.

Dean Blaine Eckles:

The UI Children’s Center (UICC) is the only accredited one in Latah County. We are hoping to double its size, at the existing location, through a grant. We are meeting with the President tomorrow to discuss the proposal. To improve retention, we raised the salary for all childcare workers. If approved, this extension will not solve all short-term problems because it will take some time, but it’s a huge priority. President Green is aware of this need and is interested in this type of investment as long as it is financially solid. We don’t expect much push-back on this proposal. The center is currently at full capacity, with many waitlists for children of all ages. The main point is the grant, which would substantially offset some of the costs. We’ll be happy to report back with updates.

A senator inquired about childcare needs for students vs. employees. If students are prioritized, where does that leave employees? Dean Eckles replied that 62% of the parents using UICC are employees, 20% are members of the community, and 18% students. The majority of our students are between 18 and 22 years of age, and thus less likely to need childcare. Employees are not excluded. Also, when a child is in the program, we don’t pull them out to make space for someone else. Comment from the Secretary: perhaps 62% of UICC users are faculty and staff because students can’t afford the fees.

The senator also had a question about the possibility of after-school care for elementary school children. Dean Eckles responded that there is a Summer Vandals Camp for kids. He is currently exploring the possibility of creating a program available throughout the year, which could potentially address the senator’s question, and has asked the appropriate staff to come up with a white paper including a projection of needed resources. Dean Eckles is also talking with UICC about offering parents (after the extension of the center) the possibility of dropping off their children for a few hours on evenings or weekends. With the staffing problem, it will take some time.

Anything planned for the outside-of-Moscow centers? In Idaho Falls, there are mostly graduate students, many with families. The situation is challenging. Dean Eckles will discuss with his team to explore what options may be available and viable.

Chair Gauthier shared a suggestion from a constituent faculty: a larger room to accommodate their children while they work, in special situations such as when the child is sick or childcare is not available.

Committee Reports (vote):

- FSH 6580 Reproduction of Copyrighted Material – Kristin Henrich
The policy has been rewritten to remove redundant, outdated, and non-policy information. The Library maintains extensive copyright guidance on its website, where it can be updated as frequently as needed.
Moved to approve (Long, Kirchmeier).
Vote: 24/24 in favor. Motion passes.

Other Policy Business:

- FSH 2300 Student Code of Conduct – Cari Fealy, Associate Dean of Students.
This was a comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
The policy was rewritten using language more accessible and understandable for students. The Code of Conduct and disciplinary processes were combined in a single policy for ease of use. Processes related to Title IX Sexual Harassment were removed to align with the recently revised FSH 6100. We added clarifying language around academic dishonesty resolution. Language was added aligning with case law to follow best practices in student conduct policies. A section on free speech was added. The new policy has been approved by President Green on an interim basis and will go through the regular approval process. In the meantime, the office of the Dean of Students is seeking Faculty Senate feedback.

Discussion:

Vice Chair Haltinner observed, under the list of possible outcomes, some that are punitive, and others that are restorative or educational. Any opportunity to add more restorative outcomes? Cari Fealy noted that restorative outcomes fall under the informal resolution process when both parties are amenable to it. In such cases, the term “outcome” is not used because it would imply responsibility. At times when we utilize a “restorative reflections” process, it becomes a broader, educational outcome.

A senator noted that using “ChatGPT” to create a response to take-home work does not appear under the cheating and plagiarism categories. Cari recalled many conversations, including with CETL, about this item. They found out that some faculty allow it, others don’t. Thus, these behaviors are best left to the syllabus. Hence, the language in the policy includes anything that’s prohibited by the instructor, see Section E-1.

There was an inquiry about F-1. Reporting alleged violations, and the timeline for reporting. Comparing to the previous version, the senator sees a potential problem with equity in the reporting of cheating. Cari responded that, previously, under the code violation “Academic Dishonesty,” faculty were required to report all cases of academic dishonesty. The new version is a code of conduct for students, and detailed reporting protocols do not belong in it. Perhaps at some point we may consider a separate FSH policy on reporting in general and how it should be done to ensure due process.

Announcements and Communications:

- Interdisciplinary Sustainability Certificate Discussion – Karen Hume, Erin James.

Erin James provided context on the proposal and a brief history. In Fall 2021, President Green commissioned a Sustainability Working Group to suggest both academic and non-academic sustainability priorities. In August 2022, Sarah Dawson was hired as UI Director of Sustainability. In Fall 2022, the WG's White Paper was published, containing the recommendation to develop an undergraduate certificate in sustainability. In November 2022, an initial interdisciplinary committee comprised of faculty identified by deans or departments from all colleges was convened. The initial draft of the curriculum certificate was ready in January 2023 and presented to UCC in February 2023. UCC provided feedback on both the academic content and faculty jurisdiction issues. From then to the present, the WG has worked on revising the academic content *per* UCC recommendations and addressing faculty governance issues. The WG is here today to seek official empowerment from Faculty Senate to propose and maintain the certificate's academic curriculum. Pursuant FSH 4120, the relevant unit or college must submit curricular proposals to UCC. But this is a university-wide program, not suitable to be housed in a single college.

A senator congratulated the WG for their excellent revision work. They mentioned FSH 1520 Article I Section 4 Clause D in support of Faculty Senate's jurisdiction over this committee, eventually to become a standing committee. The Secretary agreed and cited FSH 1520 Article IV Section 11.

A senator expressed concern that the administration of the certificate, especially academic petitions, will result into considerable extra work for the Registrar's office.

The Faculty Secretary's understanding is that trained staff will handle the administrative part of the program, in consultation with the instructors. With components in social science, economics, and environmental science, housing the certificate in a single college doesn't seem like the best path.

Other senators expressed support for a permanent committee to be in charge of this certificate. Additional vetting comes from accreditation requirements, namely from outside the university.

Erin reiterated the very tight timeline they are on in order to meet the deadline for placing the proposal in the CIM que.

Given that only 5 minutes are left, the discussion will continue next week followed by a vote.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Chapman, Long). Meeting adjourned at 5:00 pm.

Respectfully Submitted,

Francesca Sammaruca

UG Academic Certificate in Sustainability

Brief history of certificate inception and faculty committee

- Fall 2021: President Green commissions a comprehensive Sustainability Working Group to suggest sustainability priorities (both academic and non-academic)
- August 2022: UI Director of Sustainability (Sarah Dawson) hired
- Fall 2022: Working group's Sustainability White Paper is published; report contains recommendation to develop an undergraduate academic certificate in sustainability
- Nov 2022: Initial interdisciplinary committee convened by UI Director of Sustainability, comprised of faculty representatives identified by deans/depts from all colleges
- Jan 2023: Initial draft of certificate curriculum proposed
- February 2023: University Curriculum Committee provides feedback on initial proposal, both academic content and faculty governance issue regarding entities empowered to propose curriculum
- April 2023 – Sept 2023: Faculty working group (WG) reconvenes, elects chair (Erin James) and works toward revised academic content (addressing UCC feedback) and seek official Faculty Senate empowerment to propose and maintain academic curriculum

UG Academic Certificate in Sustainability

Overview of faculty-led vision

The Association for the Advancement
of Sustainability in Higher Education

Definition of Sustainability:

AASHE defines sustainability in a pluralistic and inclusive way, encompassing human and ecological health, social justice, secure livelihoods, and a better world for all generations.

- A university-wide program (UWP) involving as many colleges and faculty as are interested in participating
- Faculty-led committee to set/maintain curriculum; the limited student service admin required for a 12-credit certificate to be handled by cross-trained Provost Office staff

UG Academic Certificate in Sustainability *Curriculum Plan*

Integrative Core (3 credits)

Ecological (3 credits)

Economic (3 credits)

Social (3 credits)

UG Academic Certificate in Sustainability

More detail on course vetting process

- Certificate "bins" and guidelines for course learning outcomes also from AASHE
- Followed guidance from UCC to vet coursework for inclusion in a manner similar to UCGE
 - Solicited proposals from **all nine academic colleges**/faculty, with criteria for inclusion
 - Received * proposals from * **all nine academic colleges**
 - Proposed curriculum includes * courses from * **all nine academic colleges**
- Going forward: Repeat solicitation each year to add additional courses and review existing ones based on assessment

Faculty Governance issue raised at UCC last year – FSH 4120:

E-2. Substantive curricular changes.

- a. Each substantive curricular change proposal shall be submitted to the relevant unit and college for approval, following all notice and approval procedure contained in unit or college bylaws.
- b. Following unit and college approval, the college shall submit the proposal for review by all appropriate committees. Following such review, the college shall submit the proposal to the provost for approval. The provost shall submit approved proposals to the UCC and return disapproved proposals to the unit for further consideration.

Our request to Senate:

Appoint the faculty working group as an ad-hoc program committee to serve as "relevant unit and college" for proposing the new Certificate Program and initial curriculum as a University-Wide Program (UWP).

Comprehensive review? Yes No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

The University discontinued participating in inland marine coverage as of 07/01/2023. APM 05.03 was removed. Removing reference to inland coverage in this policy. Additionally, updating for the deductibles charged by State Risk which changed on 07/01/22 to a tiered structure and for the claims process that changed from unit paid expenses to Risk paid expenses in 2022. Removed fax number. Update the damage notification timing to State Risk requirement and dollar thresholds for reporting a loss.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

No fiscal impact other than deductible change. State Risk Management and Insurance changed the deductibles from \$2,000 to tiered \$5,000 for claims under \$50,000 and \$10,000 for claims over \$50,000.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

05.02 -- Property Coverage

July 28, 2010 (rewrite)

- A. Purpose
- B. Scope
- C. Definitions
- BD. Policy
- CE. Addition of New Location
- DF. Changes to Existing Location
- EG. Annual Renewal Property
- FH. Annual Renewal Business Interruption and Rental Income
- GI. Claims
- HK. Contact Information
- IL. Forms and Examples

A. Purpose. This policy sets forth unit responsibilities and procedures pertaining to property insurance coverage and claims.

B. Scope. This policy applies to all University of Idaho units.

A.C. Definitions.

AC-1. Boiler and Machinery covers losses arising from: an explosion of a steam boiler, steam turbine, steam piping or steam engine; mechanical breakdown or failure; or electrical injury. Boiler and Machinery coverage is reported annually using data from the property schedule.

AC-2. Building is a structure or an improvement such as a barn, pump house, research lab, classroom, or office facility, etc. Outdoor structures such as bleachers, electronic message or score boards, large signs, etc. are included in this category.

AC-3. Builders Risk is coverage designed to cover property in the course of construction. Coverage is usually written on an all-risk basis, and generally includes materials on-site but not yet installed. The estimated completed value of the project is typically used as the limit of insurance.

AC-4. Business Interruption is coverage for loss of income suffered by a business when a covered loss causes damage to its premises and results in a slowdown or suspension of its operations during the time required to repair or replace the damaged property.

AC-5. Contents is business property such as office furniture, equipment, computers, non-motorized Mobile Equipment, and other property not permanently attached to a Building. Property permanently attached to a Building such as HVAC equipment is considered part of the Building value. Outdoor structures such as bleachers, electronic message or score boards, large signs, etc. are not considered Contents.

AC-6. COPE Form is used for reporting newly acquired property. The abbreviation, COPE, stands for Construction, Occupancy, Protection, and Exposures and is an industry standard form.

AC-7. Draft is the draft property spreadsheet of the annual statement of property values that has the Contents and Mobile Equipment values supplied by Asset Accounting and all changes that Risk has received during the year.

AC-8. Extra Expense is the expenses incurred after a loss that would not have been incurred during normal operations. Examples of Extra Expense include the cost for obtaining a temporary location or setting up equipment at the temporary location.

Formatted: Font: Bold

Formatted: Indent: Left: 0.25", No bullets or numbering

Formatted: Font: Bold

Formatted: Indent: Left: 1", No bullets or numbering

AC-9. Facilities is the University of Idaho Facilities Services.

AC-10. Fine Art is coverage for items owned by another party that are on exhibit temporarily in a University facility or that the University owns and is temporarily loaning out for an exhibit. University owned art is covered in the Contents figures for a Building. Coverage for art on exhibit at the University must be requested through the Risk by providing a completed worksheet that contains specifics about the item.

AC-11. IDRMISS is the Idaho Risk Management Information System. IDRMISS is a web-based program administered and maintained by the State of Idaho.

~~**A-12. Inland Marine** is coverage for equipment and business property valued under \$2,000 that are moveable in nature (i.e., laptop, power tools, music instruments, or GPS units). Coverage must be requested through Risk by providing a completed worksheet that contains specifics about the item. See APM-05.03 for more information.~~

AC-1312. Mobile Equipment is anything motorized and not licensed for road use, such as road building machinery, ATV's, off-road motorcycles, riding lawn mowers, golf carts, tractors, etc. Mobile equipment values are actual cash values.

AC-1413. Real Property is land, including improvements. The University's property coverage does not cover land. Property coverage only covers Buildings and Contents.

AC-1514. Rental Income is coverage that pays for the loss of rental income resulting directly from loss or damage by a covered event when property is rendered wholly or partially unusable.

AC-1615. Risk is the University of Idaho's Risk Management Office.

AC-1716. State RMP is the State of Idaho Risk Management Program.

AC-1817. Stock and Supplies is property such as paper, pencils, office supplies, goods for sale, etc.

AC-1918. Tuition or Fees is coverage for the loss of income from tuition or fees should a loss occur and the University be unable to operate.

AC-2019. Unit refers to primary management units within the University, including recognized colleges, administrative centers, such as the Division of Finance and Administration, or the Research Office, and recognized University Centers located remote from the main campus, such as Idaho Falls.

~~**A-21. University** is the University of Idaho.~~

BD. Policy. The University participates in the State RMP for property coverage. Units may not make any separate arrangements for property insurance. Property coverage includes: Buildings, Contents, Mobile Equipment, Stock and Supplies, Business Interruption, Rental Income, Extra Expense, Tuition or Fees, Builders Risk, and Fine Art for which the State has an insurable interest or for which the State has assumed responsibility in writing. The property policy has a **\$25,000** deductible for covered events under \$50,000 or a \$10,000 deductible for over \$50,000. Losses arising from: an explosion of a steam boiler, steam turbine, steam piping or steam engine; mechanical breakdown or failure; or electrical injury will be adjudicated through Boiler and Machinery coverage with a \$5,000 deductible. Employees who use personally-owned equipment at work should consult with Risk. In order to participate in property coverage, the University must report through the IDRMISS. Risk inputs coverage data into the IDRMISS. Typically the State RMP requests the information and/or confirmation of data during spring for the July renewal of the property policy.

BD-1. Building, Contents, Mobile Equipment, and Stock and Supplies. Units must report this information to Risk **as changes occur**. Follow steps in section **C-E** or **D-F** as applicable. Units must **verify** property values during the renewal process **annually**. Follow steps in section **E-G**.

BD-2. Fine Art. Fine Art values are captured through the Contents figures obtained from Asset Accounting.

Fine Art not owned by the University can be covered by the State RMP if a contractual agreement obligates the University to cover the piece(s) while it is in the University's care, custody, or control. Coverage can be arranged by completing a Fine Art Insurance Request form. Return the Fine Art Insurance Request form to Risk at risk@uidaho.edu or fax to 885-9490.

BD-3. Builders Risk. Coverage is not always automatic. Project managers (Facilities/other Units as appropriate) must consult with Risk about larger construction projects. During the planning phase of these projects, involve Risk if any of the following apply:

- (i) any new "ground up" projects, **regardless of project value**;
- (ii) renovations or additions in excess of \$5,000,000; and
- (iii) renovations/additions that increase the existing Building's square footage by more than 50%. Units are responsible for completing and forwarding the Builders' Risk Application to Risk. Typically, the State RMP is able to include projects valued at less than \$15,000,000 on the property policy. The State RMP will seek alternate coverage for projects valued at more than \$15,000,000. It is important to consult with Risk during the planning phase of construction projects in order to provide enough time for the Unit to complete the application and for Risk and the State RMP to work on coverage. If Risk and the State RMP are not consulted in a timely manner, it could jeopardize the start date of the project.

BD-4. Business Interruption, Rental Income, and Extra Expense. As the situation occurs, income generating Units need to request coverage for any new location or existing operation that have changed locations by completing the Business Interruption Loss and Rental Income form and returning it to Risk at risk@uidaho.edu or faxing it to 885-9490. Units need to annually report to Risk any data on Business Interruption, Rental Income, and Extra Expense, see section F.

GE. Addition of New Location. The Unit is responsible for reporting to Risk all newly acquired real property or new leased locations by completing a COPE form. Policies regarding real property transactions, including purchase, sale, lease, easement, or exchange can be found in APM 61.62.

Return the COPE form to Risk at risk@uidaho.edu or fax to 885-9490.

DE. Changes to Existing Location.

DE-1. Additions to Existing Location. The Unit is responsible for reporting to Risk all

- (i) newly acquired Contents valued over \$25,000,
- (ii) newly purchased or changes in location for Mobile Equipment,
- (iii) changes in Stock and Supplies of more than \$500,000, and
- (iv) changes in retail locations that are temporary or have moved, by completing the Property Value Adjustment form.

Return the Property Value Adjustment form to Risk at risk@uidaho.edu or fax to 885-9490.

DE-2. Deletions to Existing Location. The Unit is responsible for reporting to Risk any

- (i) divested Real Property,
- (ii) Building demolition,
- (iii) Building move,
- (iv) lease termination,

- (v) sale or destruction of Contents valued over \$25,000,
- (vi) sale of Mobile Equipment, (vii) changes in Stock and Supplies of more than \$1,0500, and
- (viii) changes in retail locations that are temporary or have moved, by completing the Property Value Adjustment form.

Return the Property Value Adjustment form to Risk at risk@uidaho.edu or fax to 885-9490.

EG. Annual Renewal Property. Risk prepares and circulates the Draft to Units responsible for providing information regarding Buildings, Contents, Mobile Equipment, and Stock and Supplies. Changes to the values listed in the Draft need to be done by completing the Property Value Adjustment form. Units need to ensure all new Buildings and locations in which the University has operations and equipment appear on the Draft, as well as freestanding improvements such as extensive fencing, bleachers, scoreboards, astro turf, electronic signs, etc.

Multi-Unit Structures: Each Unit within a Building reports its own values separately. Risk will add the values from the different Units to obtain a final figure.

Changes to the Draft need to be done by completing the PROPERTY VALUE ADJUSTMENT FORM.

EG-1. Units receiving the Draft should do the following:

- a. Add a Building or Location. Follow steps in section **GF** if a Building or location does not appear on the Draft.
- b. Increase or Decrease Building Value. Review existing Building values that have been carried forward with an appreciation factor from the prior year. Building values should be increased if a remodel or addition increases the value.
- c. Removing a Building or Location. Report Buildings that need to be removed from the Draft because they were removed, demolished, sold, or a facilities use agreement or lease has terminated.
- d. Contents. Review for accuracy the value for Contents listed for Buildings that the Unit controls. These values have been supplied from Asset Accounting and should be reviewed for any changes.
- e. Mobile Equipment. Review for accuracy the value for Mobile Equipment listed for Buildings that the Unit controls. These values have been supplied from Asset Accounting and should be reviewed for any changes.
- f. Stock and Supplies. Review for accuracy the value of all Stock and Supply items. These values have been carried forward from the prior year and may have changed or may not have been previously listed. The value should be an estimate of an average monthly value for Stock and Supplies.
- g. Return the completed Property Value Adjustment form, or COPE form, to Risk at risk@uidaho.edu or fax to 885-9490. If the Unit has no changes to the Draft, email risk@uidaho.edu that the Unit has no changes for the Unit's area of responsibility.

FH. Annual Renewal for Business Interruption and Rental Income. Units will need to provide details for any income generating operation, listing figures per Building on the Business Interruption and Rental Income spreadsheet provided from Risk. Provided figures should include:

- (i) net profit after all expenses from production or service operation;
- (ii) rental income;
- (iii) cost of salaries and benefits of all executives, officers, deans, unit managers and heads, full-time faculty, and coaches and employees under contract that would not be discharged in the event of a loss;
- (iv) cost of bonded debts secured by real property;
- (v) cost of all non-cancellable contracts (i.e., rent, utilities, other services, etc.); and

(vi) any budgetary changes that will occur during the year. Units can participate in this coverage by completing the Business Interruption Loss and Rental Income form and returning it to Risk at risk@uidaho.edu or by faxing it to 885-9490.

GJ. Claims. A property claim would be for covered damages to University Buildings, Contents (including equipment valued over \$2,000 and owned Fine Art), Mobile Equipment, Stock and Supplies and Business Interruption. Call Risk within 24 hours to report any water event and any possible claim that could be over \$25,000. **Prompt reporting allows Risk to assist with remediation, and allows time for an independent adjuster to do a review, if necessary.** Damages that are under \$2,000 can be reported within 90 days to Risk by completing a property reporting form.

Risk will work with Facilities and/or the independent contractors to get bids for repairs to a Building. The Unit will work with Facilities and/or the independent contractors to schedule the repairs and make the area accessible. Within two weeks after the initial report of the incident, the Unit will need to supply to Risk any invoices for the replacement of Contents that were damaged or two estimates for the repair or future replacement of the Contents.

Risk will alert the State RMP that there is a possible claim by supplying them with details of the incident. The State RMP will determine if an independent adjuster is needed to review the damages.

Risk will collect costs from Facilities for

- (i) materials and/or the independent contractor's invoice for the job performed,
- (ii) the two estimates for replacement or repair, or
- (iii) the invoice for the replacement of any Contents, and any Stock and Supplies replacement cost documents from the Unit to present a final claim to State RMP for the recovery of damages. The State RMP will adjudicate the claim and make payment if the damages are from a covered event.

Units are responsible for providing the index number to Risk for transferring the deductible to the insurance reimbursement account. The payment from State RMP will reflect the applicable deductible \$2,000 deductible for a property claim. When the check is received from State RMP, Risk will deposit it into the insurance reimbursement account and will request from the Unit the budget number to which the Unit would like the funds to be cost transferred. Risk will request a cost transfer from General Accounting for the amount of reimbursement. Risk will pay invoices to contractors and, when applicable, or request a cost transfer from General Accounting to Unit for Unit-paid expenses related to Contents and Stock and Supplies reimbursements.

HJ. Contact Information. For any questions regarding the coverage for property, Business Interruption or property claims, please contact Risk at (208) 885-7177, or risk@uidaho.edu.

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Comprehensive review and rewrite to clarify language and bring policy into alignment with federal regulatory requirements.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

90.24 -- - Student Health Insurance Requirement

A. Purpose. The purpose of this policy is to ensure the health and wellness of students by setting forth requirements for student health insurance.

B. Scope. This policy applies to all students at the University of Idaho.

C. Policy

C-1. In general. At the University of Idaho, preserving our student's health and wellness is paramount. Access to health services and payments for healthcare services can hinder a student from achieving their academic goals. This policy was founded on removing as many obstacles as possible for our students to reach graduation.

C-2. Health insurance required. All domestic full-time degree-seeking undergraduate students enrolled in 12 or more credits, graduate and law students enrolled in 9 or more credits, student athletes enrolled in 1 or more credits and all international students with sponsored government health insurance as part of their educational program are required to show proof of personal health insurance before they can complete enrollment of academic classes each semester. In each semester, if proof of personal health insurance is not provided, the student will be enrolled automatically into the Student Health Insurance Program (SHIP) and will be responsible for the associated charges.

C-3. Coverage requirements for all non-SHIP policies. All personal health insurance policies for both domestic and international students must adhere to the Affordable Care Act. In order to opt out of the Student Health Insurance Program (SHIP), a student must provide proof of a health insurance policy that meets the following requirements:

- a. The plan does not have any limitations or exclusions on pre-existing conditions.
- b. The plan covers hospital stays for medical and surgical care and inpatient care for mental health conditions.
- c. The plan covers doctors' office visits for medical care and outpatient care for mental health conditions.
- d. The plan covers prescriptions written by a doctor. Prescription benefits through a third-party vendor such as CVS Caremark, etc. are acceptable.
- e. The plan provides access to a provider network within the Moscow/Pullman area. Coverage must be available for routine, diagnostic, urgent and hospital care. Coverage for only telehealth, urgent and emergency care is not acceptable.
- f. The plan covers services related to injury from participation in all types of recreational sports, including intercollegiate athletics.
- g. If the plan has a deductible, either 1) the deductible is less than \$1500 or 2) the student provides proof of financial means to meet the higher deductible amount. A funded FSA or HSA account may be used to meet this requirement.

- h. The plan covers maternity care, including prenatal care and delivery, with no pre-existing condition limitations.
- i. The plan provides coverage for diagnostic services, including laboratory tests.
- j. The plan pays 70% or more of usual, customary, reasonable charges per accident or illness, after deductible is met, for in-network providers, and 50% or more of usual, customary, reasonable charges for out-of-network providers per accident or illness.

C-4. Medical evacuation and repatriation coverage for students in J visa status.

The University provides the medical evacuation and repatriation coverage required by the Department of State for international students in J visa status.

C-5. Policies not accepted. Travel plans, county medical service plans (i.e., Medicaid) outside the state of Idaho or Washington, fixed indemnity plans, short-term plans, and supplemental or reimbursement plans are not accepted as comparable coverage.

C-6. Effective dates of coverage. All plans must meet the following requirements:

- a. The plan is effective on or before the first day of the semester with no break in coverage.
- b. The plan is effective on the first day of the calendar month following the first day of the semester.
- c. The plan is effective on or before the first day of the calendar month following an involuntary loss of previous coverage.
- d. The plan does not have a gap in coverage of more than seven days. If the plan has a gap in coverage longer than seven days, the student must provide proof of COBRA coverage.

C-7. Audit. To ensure legal compliance, information provided by students is forwarded to a third-party auditor each semester for verification. Students who are discovered to be uninsured or to have insurance that does not meet the minimum requirements will be enrolled in the Student Health Insurance Program and the charge will be placed on the student's account.

D. Procedure. For SHIP program procedure, including enrollment, appeals, and policy coverage, please see the [Student Health Insurance Program](#) website.

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.
Updated to reflect federal policy changes by NSF to require training by more individuals. Made editorial revisions to get the policy in a standard format and improve usability and readability.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have? None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it. None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

45.21 – Responsible Conduct of Research Training

A. Purpose. This policy establishes requirements for the training of individuals at the University of Idaho to conduct research with honesty and based on established professional norms and ethical principles.

B. Scope.

B-1. This policy applies to certain individuals conducting research on projects funded by the following entities:

- a. the National Institutes of Health (“NIH”),
- b. the National Science Foundation (“NSF”),
- c. the US Department of Agriculture National Institute of Food Agriculture (“NIFA”), and
- d. other entities that require training on how to conduct research with integrity.

B-2. All individuals engaged in research at the University of Idaho, regardless of the source of funding, are encouraged to complete the training described in this policy.

C. Definitions

C-1. Responsible Conduct of Research (RCR) is the practice of scientific investigation with integrity. It involves the awareness and application of established professional norms and ethical principles in the performance of all activities related to scientific research. ([National Institutes of Health, Notice Number NOT-OD-10-019](#)) [ed. 4-18]

D. Policy

D-1. General Requirements. RCR training is required for certain individuals conducting research on projects funded by NSF, NIH, and NIFA as outlined below. All individuals engaged in research at the University of Idaho are encouraged to complete RCR training.

D-2. NIH-funded project requirements. RCR training is required for trainees, fellows, participants, and scholars receiving NIH support through:

- a. A training award, career development award (individual or institutional), research education grant, or dissertation research grant.

b. Projects that require RCR training as stated in the funding opportunity announcement or grant terms.

c. The following programs: D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K99/R00, KL1, KL2, R25, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TU2, and U2R.

D-3. NSF-funded project requirements. RCR training is required for the following individuals on all NSF funded grants: undergraduate students, graduate students, and postdoctoral scholars. Beginning July 31, 2023, faculty and senior personnel on proposals submitted or due on or after that date are also required to take RCR training.

D-4. NIFA-funded project requirements. RCR training is required for the following individuals on all USDA NIFA-funded grants: program directors, faculty, undergraduate students, graduate students, postdoctoral researchers, and any staff participating in the research project. The following programs are

currently exempt from the NIFA RCR training requirement: Formula Funded programs, the 1890 Facilities Program, and the Small Business Innovation Research Program.

E. Procedure

E-1. General training procedures. RCR training may be completed either online or in person (but see section E-6 for NIH online training restrictions). The online or in-person seminars fulfill the RCR requirements for NSF- and NIFA-funded projects.

a. Online training. Online training is provided through the University's membership to the online Collaborative Institutional Training Initiative (CITI) program (<http://www.citiprogram.org>). Instructions on how to register for or access CITI through the University may be found [here](#). ORA maintains individual training records in CITI.

b. In-person seminars. In-person seminars are offered every fall and spring semester by the ORA. The schedule for the seminars is posted on the Responsible Conduct of Research [website](#) at the beginning of each semester. ORA maintains individual attendance records for the seminars.

E-2. Additional training resources. Depending on the nature of the research being conducted, additional training in RCR related topics may be required. Such additional training may include animal care and use, general biosafety, biosafety cabinet, select agent, hazardous waste management, human participants in research, radiological safety, chemical hygiene plan, general lab safety, and so forth.

a. Ethics course. In addition to the seminars, an ethics class is offered on campus that covers ethical conduct of research principles which fulfills NIH's in person training requirements. For information on current courses offered, please contact the College of Graduate Studies or the Office of Research Assurances.

b. Other sources. Undergraduate students, graduate students, and postdoctoral researchers receive mentoring from faculty in the RCR; such mentoring is an obligation of every PI at the University. Elements of RCR training are also incorporated into required and elective courses at the University. Face-to-face classes are offered on campus that cover principles of the ethical conduct of research. For information on current courses offered, please contact the College of Graduate Studies or the Office of Research Assurances.

E-3. PI responsibilities

a. Ensuring training. The PI on a project is responsible for ensuring that all required persons on the project complete RCR training. The PI is also responsible for determining the amount of additional RCR training appropriate for individuals.

b. Training documentation. The PI is responsible for keeping records of RCR training for their project. Training records shall be kept according to the grant or project record retention requirements. Training records are subject to review upon request by the funding agency.

E-4. Certification. The University shall certify on proposals submitted to NSF, or other agencies as required, that the University has an RCR training plan that aligns with the agency's requirements. Training documentation and the RCR training plan are available for review upon request by the agency.

E-5. Authority of PI to require training. A PI may require RCR training for persons working on a research project even if the funding agency does not require it. The PI should work with the individuals or leave it to their discretion to determine if the training will be completed via CITI or in-person. It is the responsibility of the PI to maintain RCR training records of the individuals on their project. The PI may contact ORA for verification of in-person or CITI trainings completed.

E-6. NIH requirements. For NIH projects that require RCR training (see section D-3), the PI must include an RCR training plan with the grant proposal. Online instruction alone is not acceptable for an NIH RCR training plan. An acceptable training plan generally involves at least eight contact hours between trainees/fellows/scholars/participants and the participating faculty. The RCR training plan will be evaluated by NIH as part of the peer review process. The PI is responsible for implementing the training plan and maintaining all documentation pertinent to the training plan.

E-7. NSF Requirements. A discussion of how PIs provide RCR training to their students and postdoctoral scholars is required for the Public Outcomes Report required by the NSF.

50.03 -- How to Prepare Electronic Personnel Action Forms (EPAFs)

Last updated ~~November 6, 2006~~

A. **General.** All personnel actions such as appointments, terminations or other changes in employment status, including labor distribution, are processed by means of the Electronic Personnel Action Form (EPAF). Departments should appoint employees by creating EPAFs as soon as employment is accepted or status change is approved. If this is not done a full three weeks before the first pay date following an appointment or change in status, the employee's initial direct deposit ~~will~~ may not be received until the second pay date.

B. **Process.** EPAFs are electronic documents which travel through approval queues and are applied directly to the Banner database.

B-1. **Deadlines.** The final deadline for EPAFs is Tuesdays at 5:00 p.m., three weeks prior to the payday. For example, the deadline is 5:00 p.m., ~~7/31/0322~~ for pay received on ~~7/31/0322~~. However, please complete as soon as employment is accepted, or status change is approved. Please refer to the payroll deadline calendar on the Human Resource website at www.uidaho.edu/human-resources/payroll/payroll-calendarshr.uidaho.edu.

B-2. **Academic Year Appointment Pay Periods.** Faculty on a ~~fifty-percent~~ 0.5 FTE or more regular academic year appointment shall have their salary paid over the academic year (19.5 pay periods), ~~twelve months (26 pay periods) as long as there is an expectation for reappointment in the subsequent year. All academic year faculty will have their pay deferred. All academic year faculty who have been grandfathered into deferred pay over the full year need to make that election each year to continue on deferred pay.~~

i) Exception. Faculty and staff on less than ~~fifty-percent~~ 0.5 FTE academic year appointment or on temporary nine-month or mid-year appointments for only one or two semesters shall be paid only over the length of their appointments when there is no expectation of reappointment.

B-3. **Appointment on Holidays.** Unless actual work is performed, appointments shall not commence on a holiday. To receive holiday pay without a work requirement, the individual must be appointed and work the work day prior to the holiday or, if terminating, work the day subsequent to the holiday, ~~if terminating. Whenever, possible, new employees should begin their employment on the first Monday of a pay period.~~

B-4. **Retroactive EPAFs.** For EPAFs that affect previous pay periods, a ~~\$50~~ special check fee may apply. If you are trying to retroactively pay a board-appointed benefits-eligible position, you will need to request a special check from the Payroll Office which will incur a fee. Please consult with Payroll on the current special check fee cost \$50. If the position is not benefits eligible, you can make the adjustment in the employee's next paycheck, costing the department nothing. If the employee cannot wait an additional pay period, departments can request a special check from the Payroll Office for a ~~\$50~~ fee. Special checks are usually processed every Monday with the exception of holidays. ~~the Tuesday following payday Friday.~~

B-5. **Process for Retroactive EPAFs.** For payroll cost transfers affecting past payrolls, the labor redistribution process must be followed. Please visit Payroll Website for instructions. complete a Payroll Cost Transfer Form [See 55.03], include documentation, and send to the Payroll Office, Campus Mail Stop 4345. [Note: If the position is paid on a grant or contract, send it to the Grants and Contracts Office, Campus Mail Stop 3020.]

C. **Procedure.** For instructions on entering an Electronic Personnel Action Form (EPAF), please refer to the Human Resources Information System (HRIS) Module Manual, distributed during the HRIS module training, or at:

<https://www.uidaho.edu/human-resources/managers/banner-epaf>~~http://www.uidaho.edu/banner/hris-~~

D. **Information.** For further information or questions regarding EPAFs, call Employment Services (208) 885-3677~~28~~.

2023 – 2024 Faculty Senate – Pending Approval**Meeting # 5**

Tuesday, September 19, 2023, 3:30 pm – 5:00 pm

Zoom only

Approved at Mtg #6
Sept 26, 2023

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Miller, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Schiele, Schwarzlaender, Shook, Tibbals.

Absent: Long (excused), Sammarruca (excused), Strickland, Walsh, Reynolds, McKenna, Mischel.

Guests: John Woods

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #4, September 12, 2023, were approved as distributed.

Chair's Report:

- Today we welcome John Woods, Chief Academic officer and Provost at University of Phoenix. The Faculty Senate is interested in digital learning and innovation at University of Phoenix and academic pathways that can be developed between the two universities. There will be questions after the presentation, and we will schedule more presentations as we move to other topics related to the University of Phoenix.
- Today, we will also discuss boundaries between APM and FSH. This is a global conversation about current and future directions. I hope we will have constructive discussions based on examples of policies where APM and FSH overlap with regard to their impact on faculty – for example, the way APM items related to technology impact education and/or research activities.

Provost's Report:

- A follow-up to a question that came up during a recent discussion with Dean Blaine Eckles about the university childcare center and its utilization – 18% by students, 62% by U of I employees, 10% by the community. Graduate students are considered students, not employees.
- U.S. News & World Report released yesterday a number of significant changes on how rankings are determined. It's good news for us: for example, this is the 4th year in a row UI is ranked No.1 among public universities in the West for Best Value. All rankings for UI can be viewed at <https://www.usnews.com/best-colleges/university-of-idaho-1626>

Announcements from Vice Provost Diane Kelly-Riley:

- We will have a monthly gathering for faculty to meet informally across colleges, exchange ideas, build social relations and share intellectual interests. The first meeting will be Thursday, September 28, 4:30pm to 6:30pm in the ICCU Arena club room. Faculty can bring a guest (must be over 21). These events will continue through the academic year until April, hosted by different colleges. An invite will be sent soon.

Announcements and Communications:

- Provost Lawrence introduced John Woods, Chief Academic Officer and Provost, University of Phoenix (UOPX). Provost Woods will give a town hall style presentation followed by Q&A. Provost Woods started with some background about UOPX and its many years of educating adult learners. UOPX has been a pioneer in online education for adults. Since 1978, the university held continuous regional accreditation from the Higher Learning Commission (HLC). UOPX was the first university to offer fully online programs at the associate degree level. Eventually, it moved away from those programs and into a model of partnership with Community Colleges. Currently, UOPX has 80,000 students, following a drop in enrollment due to the refocusing of its mission. Provost Woods described the realignment of strategic directions since 2017. They dropped degrees that did not improve job outcomes and aligned 100% of their curriculums with career-relevant skills, through programs that have above-average career projections. The UOPX assessment system was revised accordingly. They created a career exploration tool through which students can look for jobs that match their skill level. The average student at UOPX is 38 years old, works full time, and supports dependents. The university created a plan to reach out to adults with life challenges, which resulted into a higher retention rate than the one for students who do not seek an accommodation. On the average, the UOPX student has three risk factors that can negatively impact progression, retention and graduation rates. The UOPX graduation rate is higher than the national average for students with one risk factor.
In summary, UOPX is a different kind of institution, focused on serving underserved student populations. They published papers in peer-reviewed journals on the improvements they made on required UG math courses. They completed several HLC accreditations.

Question from Provost Lawrence: Shared governance is a hallmark of higher education yet institutions all operate differently. Can you comment on how UOPX faculty work together in a shared governance situation?

Provost Woods: Colleges have College Councils, made of faculty who work on curriculum matters and policies about their programs. An Academic Council, comprising faculty and administrators, approves programs and recommendations for our Board, and institution-wide policies. All courses are built with faculty experts, who are current in their fields. There are many opportunities for faculty to be informed and participate, including internal journals and monthly messages. In response to a follow-up comment from Provost Lawrence about the role of governance in the accreditation process, Provost Woods noted that there was never a problem with governance at the accreditation level.

Question from faculty read by Provost Lawrence: How does UOPX use data to improve curriculums and learning outcomes?

Provost Woods: We have program-level learning goals and university-level learning goals, all of which are measured and tracked.

Question from faculty read by Provost Lawrence: Can you comment on the letter written by three U.S. Senators to President Green asking that he reconsiders the plans to acquire UOPX?

Provost Woods: These senators represent a philosophy that would never support for-profit education. The Department of Education has placed rules for the for-profit institutions that should apply to all institutions. The letter is politically motivated and contains allegations with no evidence to support them. With the Federal Trade Commission (FTC) 2019 case, we settled to avoid a long litigation, but made no admissions of wrongdoing. Senators' letter:

<https://www.durbin.senate.gov/newsroom/press-releases/durbin-warren-blumenthal-warn-university-of-idaho-on-the-dangers-of-purchasing-predatory-for-profit-college-university-of-phoenix>

President Green's response: <https://www.uidaho.edu/-/media/UIdaho-Responsive/Files/president/Communications/phoenix-faq/uoph-senator-response.pdf>

Questions from the floor:

A senator asked about possible competition between the two universities in the online space. Provost Woods replied that competition will not be an issue. U of I and UOPX are different institutions with different student populations, focus and mission, and they are not merging. Provost Woods expects more opportunities than challenges, and more options for the students. Provost Lawrence added that this concern can be addressed in more depth in a follow-up conversation where he can show a comparison of programs.

A senator commented that, although the two universities have different student populations, math proficiency may be a common problem. This area may be an opportunity to share ideas and collaborate.

A senator inquired about the ratio of faculty to administrators at UOPX. Provost Woods replied that they have 150 full-time faculty and 2500 non-faculty employees. Many are in student service offices such as financial aid, to address the needs of 80,000 students. The senator wondered whether this model is financially sustainable. Provost Woods reiterated that many of the non-faculty employees are in student-related roles (such as financial aid and academic counseling). For 13 years in a row, they have reduced the number of staff due to declining enrollment. UOPX is financially healthy and always had a surplus. This year, they had revenue in excess of \$160M over expenses. (Comment from Provost Lawrence: there may be some confusion between definitions of staff and administrators.)

A senator inquired whether faculty are given constraints on their course content, and whether UOPX would have to follow the restrictions imposed by Idaho state law, if affiliated with the U of I. John Woods responded that, as a self-funded university, UOPX is not part of the Idaho system and, thus, will not have to follow the same rules.

To reiterate: this transaction is an affiliation, not a merger. There will be opportunities to work together and share best practices as we choose to.

Chair Gauthier thanked John Woods for his visit and for sharing very useful information.

- Open Forum: Separation between APM and FSH – Rationale and process
There was some discussion about the scope of what we are trying to do. Should we identify specific policies in APM which impact faculty but are nevertheless approved outside faculty jurisdiction? APM 70.02 and APM 50.53-A.1 were mentioned as examples, as well as the phone policy with respect to safety in laboratories. More broadly, it's a global concern about the approval process, and faculty not being involved in making decisions about their work conditions. When Francesca and Diane W. are both back, we hope to have them come and discuss the process and potentials for different ways of doing APM/FSH. At present, knowing what concerns/problems exist is helpful.

Chair Gauthier recalled the request by some faculty at the recent UFM to survey the degree of faculty approval/disapproval of the UOPX affiliation. Some senators emphasized the need for additional clarity on several topics, such as the U of I legal liability on alleged UOPX wrongdoing, if any were proved. Also, we should put our data and those from UOPX side by side and compare them in a meaningful way. Provost Lawrence will respond to these questions next week.

New Business:

Vice Chair Haltinner gave a brief update on the status of FSH 1640 committees.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 5:00 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 4

Tuesday, September 12, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, McKenna, Mischel, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, Strickland

Absent: Miller, Reynolds, Walsh

Guests/speakers: Ken Udas

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #3, September 5, 2023, were approved as distributed.

Consent Agenda:

- Approval of University Committee Appointments
There were no requests to pull items out for discussion and vote. The consent agenda was approved by unanimous consent.

Chair's Report:

- We have several presentations today. One of them is by Torrey Lawrence about the status of higher education. The other one is by Ken Udas about digital initiatives at U of I. The goal is to share more information and details about where we are and to help us think about next steps.
- We will break down the complex landscape of the University of Phoenix transaction into several categories starting with a focus on academic issues. We plan to focus on financial elements, public relations aspects, and other topics later in the fall. Other issues are equally important, but the best approach when facing a complex and novel situation is to break it into smaller issues.
- We have invited John Woods - Provost and Chief Academic Officer for University of Phoenix - to the Senate meeting next week, September 19.
- I think it is important that all opinions are represented, so please send your academics-focused questions by Friday. We want to give John Woods the opportunity to prepare his presentation and address your questions. We will schedule more presentations as we move to other topics.

Provost's Report:

- This week, no new questions about the University of Phoenix were received.
- September is Katy Benoit Safety Awareness Month. Please make a note of the following events:
 - Wednesday, September 13, 7 – 9pm: "Take Back the Night" march.
<https://www.uidaho.edu/diversity/edu/womens-center/events/take-back-the-night>
 - Tuesday, September 19, at 7pm, in the International Ballroom: Katy Benoit Campus Safety Forum Keynote Address.

Status of Higher Education – Torrey Lawrence, Provost and Executive Vice President

Many factors are contributing to changes in Higher Education, such as: decrease in state funding; increase in cost; widely available choices between education and job preparation/training; the typical age of a student entering college is no longer between 18 and 22 years. We need to be fully aware of these changes and trends because they are impacting us.

The slides are a sub-selection from a presentation given at the ACE conference. The Provost shared data covering 50 years of Carnegie classification, starting from 1973, and 150 years of US high school (HS) graduation data. Following the 2008-09 recession, the birth rate dropped sharply. We are looking at 15 years of no growth as the number of 2030 HS graduates returns to 2015 levels.

The Provost displayed 150 years of enrollment data by gender. At the U of I, 53% of the students are female, which is within the national trends. At the U. of Phoenix, 70% are female. Private for-profit institutions make up about 5% of enrollments.

Schools are changing the way they teach, offering online, hybrid or on-campus classes, and projections indicate that online education will continue to grow. Naturally, this is driving the massive growth of online universities.

Another factor contributing to changes in Higher Ed is the increase in alternative credentials, of which a large spectrum is now available in many schools. 100M learners spend more than \$10B each year on micro and alternative credentials. U of I offers some, but they are not a major component.

Google Career Certificates: 6.3M learners have participated. Data covering 150 years of Higher Ed conferrals shows a rise in non-degree credentials. This area is a growth opportunity for us.

Discussion:

A Senator argued that, if we decided to make changes based on these data, we may miss the broader picture and take the wrong path. Provost Lawrence agreed that the facts presented above are not meant to be driving all decisions. But we need to be informed and aware of the landscape, so that we may join some of those efforts if we believe they are beneficial to us. Understanding this landscape will help us understand future opportunities better.

Vice Chair Haltinner commented on the importance to push back against anti-higher education political messages that may discourage college enrollment.

Sustainability Certificate

- Chair Gauthier gave a summary of the issue. The motion to be voted on was placed in the chat and read aloud by the Secretary: *“Move to appoint the existing interdisciplinary faculty-led committee as an ad-hoc program committee to serve as the ‘relevant unit and college’ authorized to submit curricular proposals per FSH 4120-E. This committee shall be empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum.”*

Moved to approve (Mittelstaedt, Long).

Vote: 21/23 yes; 2/23 no. Motion passes.

Task Force Proposal from Senate priorities as Emerged from the Senate Retreat

- Vice Chair Haltinner reviewed the process that was agreed upon at the retreat. At the retreat, senators brainstormed on potential priorities for the year, resulting in a list of about 80 items. Additional feedback and votes were collected by email. Based on that, the list was narrowed down to about 8 – 9 priorities, to be assigned to nine standing committees and four senate task forces. At this meeting, we’ll finalize senate task forces and their charges.
 - Employee Retention Task Force (Priorities: Campus Climate Survey; Retaining employees; Salary raises; Well-Being). Charge: to conduct a campus climate survey to

- assess employees' needs; Based on that survey, work with FSL, FAC, and FSPG to propose policy changes, with special attention to salary raises and employee welfare.
- Employee Benefits Task Force (Priority: Improvement of Dependent Tuition Waiver). Charge: Assess peer institutional practices; assess U of I specific contexts, needs, constraints; work with the Finance Office to meet needs in light of constraints. Currently, only one dependent at a time can receive the tuition waiver benefit. Staff Council is also very interested in working with Senate towards an extension of the benefit.
 - Boundary of APM/FSH Task Force (Priority: Faculty involvement in policy and procedures involving employees). Charge: work to improve current practices; work with the Provost Office and other entities on ways to include employees in future decisions that concern them.
 - University of Phoenix. Charges still to be determined.

Discussion:

Provost Lawrence noted that the results of the “Great Colleges to Work for” survey should come out very soon. It’s something to be aware of, to avoid potential overlap. Vice Chair Haltinner recalled that the idea was to ask questions that weren’t covered in the “Great Colleges to Work for” survey, and also to cover more university-specific aspects. With regard to the “salary raises” priority, the Provost noted that we have the Staff Compensation Committee (SCC). Some may remember that SCC came to Senate last year to present their proposal for CEC.

A Senator thought that the “APM/FSH Boundary” task force should have a clearly defined and pointed charge. Several Senators agreed that the scope should be broader than looking into specific policies: people are interested in whether the decision-making process about APM items is working. The broader charge should be to come up with a mechanism through which one can identify proposed APM policies that impact teaching or research and, thus, faculty in the execution of their responsibilities, and whether parts of those policies may be best housed in FSH. How are APM items modified? Is the process consistent with the Constitution of the University Faculty?

There was a general consensus that specific technology policies, such as APM 30.16, should be left to the Information Technology Committee.

- Moved to vote *yes* or *no* to the creation of each individual task force (Haltinner, Mittelsteadt).
 - Employee Retention Task Force
22/23 yes; 1/23 no. Motion passes.
 - Employee Benefits Task Force
22/23 yes; 1/23 no. Motion passes.
 - Boundary of APM/FSH Task Force
18/23 yes; 5/23 no. Motion passes.

Announcements and Communications:

- Digital Learning Initiatives at University of Idaho - Ken Udas, Vice Provost for Digital Learning

Vice Provost Udas emphasized that he is always open to questions and comments. He introduced Nicole Remi, Program Manager.

Today, he will provide an overview of digital learning initiatives (DLI) his office has worked on or is working on. Digital Learning (DL) was established about two years ago, following the recommendations from a White Paper put together by a DL working group.

Over the past couple of years, the office received several requests from various groups/units/deans interested in developing digital programs.

They do market research and gather information on, for instance, other schools who may have or are developing similar programs.

They provide support with use of technology in teaching and learning, and work on online infrastructural capacities.

For some programs, they can provide financial support in the form of seed funds. For instance, they helped fund a program in COS and one in CBE. It's a four-year commitment to provide seed funds for more systemic needs, such as faculty lines.

They provide support for individual classes, typically under the Gen Ed portfolio. They help the university comply with current state and federal regulations and stay in touch with state initiatives, such as Online Idaho. They deliver market research forecasting. They work with bodies that provide support in teaching and learning, such as CETL. Lately, they worked closely with Virtual Technology and Design (VTD), where they had the opportunity to work with Jean-Marc Gauthier. Jean-Marc and his team developed an educational support system for virtual labs.

Currently, they are working with six colleges on various ideas. Overall, they work across the university to help move things forward.

One of the larger efforts is CAPE (Continuing Adult Professional Education). They help streamline and simplify traditional processes to facilitate the engagement of non-traditional learners. They plan to provide a robust set of programs for adult learners by Spring 2024.

Discussion:

A Senator had a question about certificates. As certificates are becoming increasingly popular, should we expand them and/or introduce more of them? Also, if companies are interested in those certificates for prospective employees, what's the best way to bring together the industry and the university? Reply by Provost Lawrence: There are several different types of certificates that are allowed by the SBOE, many of which are 12-credit certificates (roughly 50% of a minor). Some institutions have introduced "stackable certificates," that can add up to a degree. This fall, CBE is offering an online BBA degree which is a combination of certificates. In this way, students have more customizable options to focus on particular areas and have the flexibility not to pursue a degree. This lets us build more flexible options using what we already have. As for the second part of the question: Some employers require traditional classes and credits (INL is an example of those). On the other side, programs like CAPE, just mentioned by Vice Provost Udas, offer training that doesn't result in academic credits or credentials, but fulfills the training requested by the company. We have a lot of options and opportunities.

- APM 30.16 update

Chair Gauthier pointed to the memo from President Green attached to the agenda.

Discussion:

Going back to the previous conversation about APM/FSH, a Senator reiterated that we should focus on a way to track processes and how well they are working. Now that some time has gone by since implementation of current APM 30.16, we should invite Dan Ewart to talk about how the policy is functioning across campus.

New Business:

Phones/Teams – Tim Murphy, College of Law

Senator Murphy reported concerns from his constituents about the phone/Teams changes. From a practical standpoint, a phone has a function. Giving out the department phone number is not a solution, because we don't have receptionists. But there are also concerns of a different nature. Being required to provide a business reason for keeping a phone is found to be inappropriate. It is a shared governance issue as well. Per FSH 1520, we should be able to have a discussion and a vote about our working conditions, including access to standard office equipment and a phone.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 5:00 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 6

Approved at Mtg #7
October 3, 2023

Tuesday, September 26, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mittelstaedt, Murphy, Rode, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, Strickland, McKenna.
Absent: Mischel, Raney, Reynolds

Guests: Teresa Amos

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #5, September 19, 2023, were approved as distributed.

Chair's Report:

- Today's guest is Teresa Amos, Deputy Director, IT Planning and Initiatives. Since COVID, technology and information technology have evolved very quickly and are having more impact on our activities. For example, video conferencing and artificial intelligence (AI) have a greater impact on teaching and learning, as well as on administrative tasks. I think we'll have an interesting discussion after Teresa's presentation on our short-term and long-term goals with technology.
- Last week, we had John Woods at Senate for a very insightful discussion. As we move forward with this affiliation, we see potential and, at the same time, we learn how our respective cultures are different.

Provost's Report:

- The possible government shutdown may impact federally funded programs. Please reach out to ORED if you have questions or need assistance.
- President Green would like to see a refocusing on student success initiatives. Several of our standing committees may be suitable, so we'll form a group with members from multiple committees, and Faculty Senate presence. A call for nominations will be sent soon.
- Borah Symposium:
 - Tonight, 7:00pm at the Kenworthy Theater. Film: "Putin's Attack on Ukraine: Documenting War Crimes."
 - Wednesday, September 27, at 7pm, International Ballroom, Plenary Address – Dirk Kempthorne, former Governor of Idaho and former US Secretary of the Interior.
- We will have a monthly gathering for faculty to meet informally across colleges, exchange ideas, build social relations and share intellectual interests. The first meeting will be Thursday, September 28, 4:30pm to 6:30pm in the ICCU Arena club room.
- Monday, October 17, at 7pm: Common Read Lecture. Author Florence Williams will be present.

Proposed Changes and Additions to the Faculty and Staff Handbook:

- FSH 1565 Academic Ranks and Responsibilities and FSH 1520 Constitution of the University Faculty
The Faculty Secretary gave a brief background for this proposal. At the Faculty Senate meeting of April 4, 2023, FAC presented revisions on:
 - FSH 1565 Academic ranks and responsibilities – A-1, cap on instructors, senior instructors and lecturers; and G-1 & G-2, to align with simultaneously revised FSH 1520.
 - FSH 1520 Constitution of the University Faculty Article II Section 1, to clarify that voting rights arise from faculty rank, so that non-faculty in administrative roles do not have voting rights, and to resolve conflict with FSH 1565 regarding the terms on which visiting faculty and lecturers are granted voting rights.

Both policies passed Senate on April 4, 2023. FSH 1565 was voted down at the May 2023, UFM, and FSH 1520 was rejected by President Green due to inconsistency with G-1, G-2.

Today, Faculty Senate Leadership is proposing a new motion: to approve the whole package as presented at the 04/04/2023 with the deletion of the changes made to FSH A-1.

Discussion:

Some senators detected inconsistency between FSH 1565 G-2 and FSH 1520 II-1: in FSH 1565 G-2, two different kinds of visiting faculty are defined, but not in FSH 1520 II-1. The Secretary disagrees: “*Visiting Faculty*” is defined in FSH 1565 G-2 as visitors who have a home institution to return to, and their voting rights are clearly stated in FSH 1520 II-1. From FSH 1565 G-2, “*a visiting appointee who does not hold a professorial rank elsewhere*” belongs to a different category and “*shall be subject to the requirements for lecturers to qualify for voting rights.*” The voting rights for lecturers and, thus, for “*a visiting appointee who does not hold a professorial rank elsewhere*” are stated in FSH 1520 II-1. A senator suggested including, also in FSH 1520 II-1, the definition of “*a visiting appointee who does not hold a professorial rank elsewhere.*”

After some discussion, Senator Long proposed to amend FSH 1565 G-2 to read: “**G-2. VISITING FACULTY.** *A designation that indicates that the appointee holds a regular teaching or research position at another institution.*” Seconded by Murphy.

Vote to approve the amendment: 22/22 yes, 0/22 no. Motion to amend passes.

Motion to approve the main motion with amendment (Long, Mittelsteadt).

Vote on the amended main motion: 22/22 yes, 0/22 no. Motion passes.

Announcements and Communications:

- Teresa Amos, Deputy Director, IT Planning and Initiatives
 - APM 30 Series Policies Updates
In response to a question from Chair Gauthier, Teresa Amos replied that OIT has no near-future plans to major updates on APM.
 - APM 30.16 and Exceptions
Although the matter with the Senate request to the President to temporarily suspend APM 30.16 is closed, there are still related issues that faculty are asking about. For instance: last year, Vice President Ewart said his team needed six months to go through the transition, after which point the system will work much better. It was requested that we have an update on how things are going? This request would be for the non-average needs involving, in particular, the researchers who are unhappy with APM 30.16, are satisfaction data being collected and tabulated? As a follow-up, the Secretary added that a standard customer satisfaction survey would not address the present question. It is a fact that over 90% of U of I employees are happy with the policies and procedures in APM 30.16. However, it is important to know how the non-standard

needs of faculty are being addressed, and whether the exceptions are being handled successfully and in a timely manner.

Chair Jean-Marc wondered whether a faculty “mediator” might be helpful in the resolution of critical cases, so that the final decision is not just a unilateral one. Teresa Amos will take this idea back to her team.

A Senator expressed concern about the often-lengthy process to access IT help, with no in-person help desk. Students who need to access software for their projects spend excessive time seeking and waiting for help, often for simple questions. The senator wishes there was a way to obtain quick help for simple problems, such as setting up a laptop or accessing software. Their students spend more time trying to access software than using it. Teresa Amos will see about resources to develop a support system for these circumstances.

A senator reported long waiting after submitting a ticket. The senator opined, The OIT centralized model, introduced for the sake of cost saving, seems to impact quality of service. He also stated, It’s hard to understand the responsibility structure and to identify the right person to contact. Teresa Amos will get clarification on tickets and timelines.

- Faculty Data Privacy

Faculty are concerned that applications such as Teams and Duo on private phones give Microsoft access to private data.

Teresa Amos explained that, if one uses Microsoft products (Outlook, Teams, etc..), the data stays within the U of I system. If one deletes the application from their private phone, the data disappears from the phone and stays on the university server. However, if one uses a native email application, the data on their personal cellphone and the university data become mingled, and the person may be at risk for public record request. In summary, if one uses Microsoft applications and signs in with U of I credentials, their data stays within the U of I protected environment.

- University of Phoenix (UOPX) Discussion

Provost Lawrence will address some of the questions submitted by faculty after last week’s John Woods’ presentation.

- If it’s not a merger, what is it?

It is definitely not a merger. It’s an arrangement that leaves both institutions independent and distinct. For example, there will be no combined logo. Our Governing Board created an entity, named “43 Education.” This is a non-profit organization that will purchase the assets of UOPX. 43 Education will have its Board of Directors, to act as UOPX Board of Directors. They will be appointed by our Board of Regents. When the transaction is done, the role of the former owners ends. Affiliation is addressed after all of the above is completed. At this time, the focus is on getting through the transaction.

- Why this affiliation?

It will benefit both institutions. For UOPX, the key element is that they want to become non-profit, which is very difficult to do on their own. The profit that went to their previous owners and the taxes paid as a for-profit will now benefit both institutions and can be invested in programs, students, etc. Also, we can learn from UOPX about online education and strategies to best serve non-traditional learners.

- What's the actual revenue stream we hear about? How does the money actually change hands?
It will be part of the stipulations in the agreement. Non-profit institutions can give money to each other, like what happens with our Foundation. How revenue stream moves to U of I will be stipulated in the agreement.
- What about potential risks and liabilities?
The liabilities will belong to 43 Education. The due diligence was extensive and calculated risks that were considered when finalizing the transaction. Provost Lawrence will come back with more information.
- Is it possible that the State will allocate less money to the U of I, because of the new revenue?
We can't predict what our legislature will do. They reconsider our budgets annually.
- Why U of I and not another, more comparable, institution?
Our missions align well. As a public and land grant institution, we serve the entire population, which connects with the non-traditional population UOPX is serving. This is a key common point we can capitalize on. We see opportunities to gain from this affiliation. They also see opportunities to learn from us through this affiliation.
- What are the net steps?
They include approval from accreditors, finalizing transactional details, the 43 Education Board of Directors has to be finalized; the bonding process; the closing process; then we enter a post-closing phase.

Time is coming to an end. On behalf of Vice Chair Haltinner, Chair Gauthier reminded everyone that many faculty have expressed interest in a survey about the degree of approval of the UOPX affiliation. Vice Chair Haltinner invites everyone to think about suitable questions and, generally, the nature of the survey, to be discussed next week.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Roberson, Long). Meeting adjourned at 4:59pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 5

Tuesday, September 19, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Miller, Mittelstaedt, Murphy, Raney, Ramirez, Rinker, Roberson, Rode, Schiele, Schwarzlaender, Shook, Tibbals.

Absent: Long (excused), Sammarruca (excused), Strickland, Walsh, Reynolds, McKenna, Mischel.

Guests: John Woods

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #4, September 12, 2023, were approved as distributed.

Chair's Report:

- Today we welcome John Woods, Chief Academic officer and Provost at University of Phoenix. The Faculty Senate is interested in digital learning and innovation at University of Phoenix and academic pathways that can be developed between the two universities. There will be questions after the presentation, and we will schedule more presentations as we move to other topics related to the University of Phoenix.
- Today, we will also discuss boundaries between APM and FSH. This is a global conversation about current and future directions. I hope we will have constructive discussions based on examples of policies where APM and FSH overlap with regard to their impact on faculty – for example, the way APM items related to technology impact education and/or research activities.

Provost's Report:

- A follow-up to a question that came up during a recent discussion with Dean Blaine Eckles about the university childcare center and its utilization – 18% by students, 62% by U of I employees, 10% by the community. Graduate students are considered students, not employees.
- U.S. News & World Report released yesterday a number of significant changes on how rankings are determined. It's good news for us: for example, this is the 4th year in a row UI is ranked No.1 among public universities in the West for Best Value. All rankings for UI can be viewed at <https://www.usnews.com/best-colleges/university-of-idaho-1626>

Announcements from Vice Provost Diane Kelly-Riley:

- We will have a monthly gathering for faculty to meet informally across colleges, exchange ideas, build social relations and share intellectual interests. The first meeting will be Thursday, September 28, 4:30pm to 6:30pm in the ICCU Arena club room. Faculty can bring a guest (must be over 21). These events will continue through the academic year until April, hosted by different colleges. An invite will be sent soon.

Announcements and Communications:

- Provost Lawrence introduced John Woods, Chief Academic Officer and Provost, University of Phoenix (UOPX). Provost Woods will give a town hall style presentation followed by Q&A. Provost Woods started with some background about UOPX and its many years of educating adult learners. UOPX has been a pioneer in online education for adults. Since 1978, the university held continuous regional accreditation from the Higher Learning Commission (HLC). UOPX was the first university to offer fully online programs at the associate degree level. Eventually, it moved away from those programs and into a model of partnership with Community Colleges. Currently, UOPX has 80,000 students, following a drop in enrollment due to the refocusing of its mission. Provost Woods described the realignment of strategic directions since 2017. They dropped degrees that did not improve job outcomes and aligned 100% of their curriculums with career-relevant skills, through programs that have above-average career projections. The UOPX assessment system was revised accordingly. They created a career exploration tool through which students can look for jobs that match their skill level. The average student at UOPX is 38 years old, works full time, and supports dependents. The university created a plan to reach out to adults with life challenges, which resulted into a higher retention rate than the one for students who do not seek an accommodation. On the average, the UOPX student has three risk factors that can negatively impact progression, retention and graduation rates. The UOPX graduation rate is higher than the national average for students with one risk factor.
In summary, UOPX is a different kind of institution, focused on serving underserved student populations. They published papers in peer-reviewed journals on the improvements they made on required UG math courses. They completed several HLC accreditations.

Question from Provost Lawrence: Shared governance is a hallmark of higher education yet institutions all operate differently. Can you comment on how UOPX faculty work together in a shared governance situation?

Provost Woods: Colleges have College Councils, made of faculty who work on curriculum matters and policies about their programs. An Academic Council, comprising faculty and administrators, approves programs and recommendations for our Board, and institution-wide policies. All courses are built with faculty experts, who are current in their fields. There are many opportunities for faculty to be informed and participate, including internal journals and monthly messages. In response to a follow-up comment from Provost Lawrence about the role of governance in the accreditation process, Provost Woods noted that there was never a problem with governance at the accreditation level.

Question from faculty read by Provost Lawrence: How does UOPX use data to improve curriculums and learning outcomes?

Provost Woods: We have program-level learning goals and university-level learning goals, all of which are measured and tracked.

Question from faculty read by Provost Lawrence: Can you comment on the letter written by three U.S. Senators to President Green asking that he reconsiders the plans to acquire UOPX?

Provost Woods: These senators represent a philosophy that would never support for-profit education. The Department of Education has placed rules for the for-profit institutions that should apply to all institutions. The letter is politically motivated and contains allegations with no evidence to support them. With the Federal Trade Commission (FTC) 2019 case, we settled to avoid a long litigation, but made no admissions of wrongdoing. Senators' letter:

<https://www.durbin.senate.gov/newsroom/press-releases/durbin-warren-blumenthal-warn-university-of-idaho-on-the-dangers-of-purchasing-predatory-for-profit-college-university-of-phoenix>

President Green's response: <https://www.uidaho.edu/-/media/UIdaho-Responsive/Files/president/Communications/phoenix-faq/uoph-senator-response.pdf>

Questions from the floor:

A senator asked about possible competition between the two universities in the online space. Provost Woods replied that competition will not be an issue. U of I and UOPX are different institutions with different student populations, focus and mission, and they are not merging. Provost Woods expects more opportunities than challenges, and more options for the students. Provost Lawrence added that this concern can be addressed in more depth in a follow-up conversation where he can show a comparison of programs.

A senator commented that, although the two universities have different student populations, math proficiency may be a common problem. This area may be an opportunity to share ideas and collaborate.

A senator inquired about the ratio of faculty to administrators at UOPX. Provost Woods replied that they have 150 full-time faculty and 2500 non-faculty employees. Many are in student service offices such as financial aid, to address the needs of 80,000 students. The senator wondered whether this model is financially sustainable. Provost Woods reiterated that many of the non-faculty employees are in student-related roles (such as financial aid and academic counseling). For 13 years in a row, they have reduced the number of staff due to declining enrollment. UOPX is financially healthy and always had a surplus. This year, they had revenue in excess of \$160M over expenses. (Comment from Provost Lawrence: there may be some confusion between definitions of staff and administrators.)

A senator inquired whether faculty are given constraints on their course content, and whether UOPX would have to follow the restrictions imposed by Idaho state law, if affiliated with the U of I. John Woods responded that, as a self-funded university, UOPX is not part of the Idaho system and, thus, will not have to follow the same rules.

To reiterate: this transaction is an affiliation, not a merger. There will be opportunities to work together and share best practices as we choose to.

Chair Gauthier thanked John Woods for his visit and for sharing very useful information.

- Open Forum: Separation between APM and FSH – Rationale and process
There was some discussion about the scope of what we are trying to do. Should we identify specific policies in APM which impact faculty but are nevertheless approved outside faculty jurisdiction? APM 70.02 and APM 50.53-A.1 were mentioned as examples, as well as the phone policy with respect to safety in laboratories. More broadly, it's a global concern about the approval process, and faculty not being involved in making decisions about their work conditions. When Francesca and Diane W. are both back, we hope to have them come and discuss the process and potentials for different ways of doing APM/FSH. At present, knowing what concerns/problems exist is helpful.

Chair Gauthier recalled the request by some faculty at the recent UFM to survey the degree of faculty approval/disapproval of the UOPX affiliation. Some senators emphasized the need for additional clarity on several topics, such as the U of I legal liability on alleged UOPX wrongdoing, if any were proved. Also, we should put our data and those from UOPX side by side and compare them in a meaningful way. Provost Lawrence will respond to these questions next week.

New Business:

Vice Chair Haltinner gave a brief update on the status of FSH 1640 committees.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 5:00 pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

POLICY COVER SHEET

- A. Introduction
- B. Definitions
- C. Responsibility Areas
- D. University Faculty
- E. Emeriti
- F. Associated Faculty
- G. Temporary Faculty
- H. Non-Faculty
- I. Qualification of Non-faculty Members for Teaching UI Courses

A. INTRODUCTION.

A-1. The principal functions of a university are the preservation, advancement, synthesis, application, and transmission of knowledge. Its chief instrument for performing these functions is its faculty, and its success in doing so depends largely on the quality of its faculty. The University of Idaho, therefore, strives to recruit and retain distinguished faculty members with outstanding qualifications.

In order to carry out its functions and to serve most effectively its students and the public, the university supports the diversification of faculty roles. Such diversification ensures an optimal use of the university's faculty talents and resources.

Diversification is achieved through developing a wide range of faculty position descriptions that allow the faculty to meet the varying responsibilities placed upon the institution, both internally and externally. No more than 25 percent, or a lower limit as defined by the department or similar unit's bylaws, of the faculty positions in any department or similar unit may be held by instructors, senior instructors, and lecturers who have voting privileges under FSH 1520 II, Section 1. While the capabilities and interests of the individual faculty members are to be taken into account, it is essential that individual faculty position descriptions are consonant with carrying out the roles and mission of the university, the college, and the unit. Annual position descriptions are developed by the unit head in consultation with the unit faculty and with the incumbent or new faculty member. In each college, all position descriptions are subject to the approval of the dean and must be signed by both unit head and faculty member. If the faculty member, unit head, and dean are unable to reach agreement on the position description, the faculty member may appeal the unit head's decision to the Faculty Appeals Hearing Board [FSH [3840](#)].

As indicated in Section 3320 A-1, faculty performance evaluations that are used for yearly, third-year and periodic reviews as well as for promotion, tenure, and post-tenure decisions are to be based on faculty members' annual position descriptions (FSH 3050). Each unit will develop substantive criteria in its bylaws for promotion and review of its faculty

Faculty members shall conduct themselves in a civil and professional manner (see FSH 3160 and 3170).

B. DEFINITIONS:

B-1. Advancement: focuses on fostering relationships, building partnerships, creating awareness and generating support with alumni, donors, leaders, business partners, legislators and the community for the university's mission in academics, scholarship and outreach (see the office of University Advancement at <http://www.uidaho.edu/givetooidaho/meetourpeople/universityadvancementvpoffice.aspx>).

B-2. Cooperative education: a structured educational strategy that blends classroom studies with learning through

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

productive work experiences. It provides progressive experiences for integrating theory and practice. Co-op education (including internships and externships) is a partnership between students, educational institutions and employers, with specified responsibilities for each party.

B-3. Distance education: the process through which learning occurs when teachers, students, and support services are separated by physical distance. Technology, sometimes in tandem with face-to-face communication, is used to bridge the distance gap.

B-4. Extension Service: Extension is an outreach activity that generally involves non-formal educational programs that transfer knowledge from the university to help improve people's lives through research in areas like agriculture and food, environment and natural resources, families and youth, health and nutrition, and community and economic development.

B-5. Extramural Professional Service: refers to activities that extend service beyond the university and can include elements of service, outreach, scholarship, and/or teaching.

B-6. Interdisciplinary: "an activity that involves teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or field of research practice."¹

B-7. Professional Development: a learning process that expands the capacity of the faculty member to advance in the responsibilities as defined in his/her position description and aligns with the university's goals. Examples include but are not limited to participation in conferences, continuing professional education (including credit and noncredit courses) and other activities that enhance a faculty member's expertise and ability.

B-8. Service learning: an activity that integrates student learning with service and civic engagement to meet real community needs and achieve learning outcomes. Service-learning can be used in curricular settings (i.e. academic courses) or co-curricular settings, (e.g. ASUI's volunteer/civic engagement programs).

B-9. Technology transfer: a process through which knowledge, technical information, and products developed through various kinds of scientific, business, and engineering research are provided to potential users. Technology transfer encourages and accelerates testing and using new knowledge, information and products. The benefit of technology transfer may occur either at the community (public) or firm (private) level.

B-10. Unit Administration: includes assisting higher administration in the assignment and in the evaluation of the services of each member of the unit's faculty and staff; promoting effective leadership of personnel and management of unit resources; providing leadership in the development and implementation of unit plans; providing for open communication with faculty and staff; fostering excellence in teaching, scholarship and outreach for faculty, students, and staff in the unit; effectively representing all constituents of the unit; and continuing personal professional development in areas of leadership.

C. RESPONSIBILITY AREAS: Faculty members are expected to contribute in each of the four major responsibility areas (C-1 through C-4 below). Expectations are more specifically defined in the individual position description and are consistent with unit by-laws. Each responsibility area may include activities in advancement, extramural professional service, interdisciplinary, and/or professional development.⁷

C-1. TEACHING AND ADVISING: The university's goal is to engage students in a transformational experience of discovery, understanding and global citizenship. Faculty achieve this goal through effective instructing, advising and/or mentoring of students.⁷

a. Teaching: Effective teaching is the foundation for both the advancement and transmission of knowledge. The educational function of the university requires the appointment of faculty members devoted to effective teaching. Teaching may take many different forms and any instruction must be judged according to its central

¹ National Academy of Science

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

purposes. Active participation in the assessment of learning outcomes is expected of all faculty at the course, program, and university-wide levels. Individual colleges and units have the responsibility to determine appropriate teaching loads for faculty position descriptions. Teaching appointments must be reflected by hours and level of effort spent in teaching activity, and justified in position descriptions. Any adjustments to a teaching appointment (e.g. teaching unusually large classes, team-teaching, teaching studios or laboratories, intensive graduate or undergraduate student mentoring, technology-enhanced teaching, and others) must be documented in the position description.

Evidence of teaching effectiveness shall include student feedback on teaching, and may include course design reviews, teaching observations, self-assessment, learning outcome assessment data, teaching recognition and awards, mid-term formative feedback on instruction (FSH 2700 B-6), or other documentation of effective teaching. Additional information about evidence of teaching effectiveness can be found through the Provost's Office.

b. Advising: For the purposes of this section, advising includes mentoring and student retention activities. These activities are an important faculty responsibility and a key function of academic citizenship, and may include: (1) overseeing course selection and scheduling; (2) seeking solutions to conflicts and academic problems; (3) working with students to develop career goals and identify employment opportunities; (4) making students aware of programs and sources for identifying employment opportunities, (5) facilitating undergraduate and graduate student participation in professional activities (e.g. conferences, workshops, demonstrations, applied research); and (6) serving as a faculty advisor to student organizations or clubs. Advising also includes attendance at sessions (e.g. workshops, training courses) sponsored by the university, college, unit, or professional organizations to enhance a faculty member's capacity to advise.

Effective advising performance may be documented by: (1) the evaluation of peers or other professionals in the unit or college; (2) undergraduate or graduate student advisees' evaluations; (3) level of activity and accomplishment of the student organization advised; (4) evaluations of persons being mentored by the candidate; (5) number of undergraduate and graduate students guided to completion; and (6) receiving awards for advising, especially those involving peer evaluation.

C-2. SCHOLARSHIP AND CREATIVE ACTIVITIES: Scholarship is creative intellectual work that is communicated and validated. The creative function of a university requires the appointment of faculty members devoted to scholarship and creative activities. The university promotes an environment that increases faculty engagement in interdisciplinary scholarship. The university's Carnegie designation as "research university high" fosters an emphasis on scholarly and creative activities.

Scholarship and creative activities take diverse forms and are characterized by originality and critical thought. Both must be validated through internal and external peer review or critique and disseminated in ways having a significant impact on the university community and/or publics beyond the university. Both are ongoing obligations of all members of the faculty.

The basic role of a faculty member at the University of Idaho is to demonstrate and validate continuing sound and effective scholarship in the areas of teaching and learning, artistic creativity, discovery, integration, and outreach/application/engagement. While these areas may overlap, these distinctions are made for purposes of defining position descriptions and for developing performance standards. Units and colleges shall adopt criteria for the evaluation of scholarship and creative activities. Demonstrated excellence that is focused in only one of these scholarship and creative activity areas is acceptable if it is validated and judged to be in the best interests of the institution and the individual faculty member.

a. Scholarship in Teaching and Learning: can involve classroom action research (site-specific pedagogy), qualitative or quantitative research, case studies, experimental design and other forms of teaching and learning research. It consists of the development, careful study, and validated communication of new teaching or curricular discoveries, observations, applications and integrated knowledge and continued scholarly growth. Evidence that demonstrates this form of scholarship might include: publications and/or professional presentations of a pedagogical nature; publication of textbooks, laboratory manuals, or educational software;

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

advancing educational technology; presentation in workshops related to teaching and learning; development and dissemination of new curricula and other teaching materials to peers; and individual and/or collective efforts in securing and carrying out education grants.

The validation of scholarship in the area of teaching and learning is based in large measure on evaluation by the faculty member's peers both at the University and at other institutions of higher learning.

b. Scholarship in Artistic Creativity: involves validated communication and may be demonstrated by significant achievement in an art related to a faculty member's work, such as musical composition, artistic performance, creative writing, mass media activity, or original design.

The validation of scholarship in the area of artistic creativity is based in large part on the impact that the activity has on the discipline and/or related fields as determined by the peer review process. Many modes of dissemination are possible depending on the character of the art form or discipline. For example, a published novel or book chapter for an anthology or edited volume or similar creative work is regarded as scholarship. Each mode of dissemination has its own form of peer review that may include academic colleagues, practitioner or performance colleagues, editorial boards, and exhibition, performance, or competition juries.

c. Scholarship in Discovery: involves the generation and interpretation of new knowledge through individual or collaborative research. It may include: novel and innovative discovery; analyzing and synthesizing new and existing knowledge and/or research to develop new interpretations and new understanding; research of a basic or applied nature; individual and collaborative effort in securing and carrying out grants and research projects; membership on boards and commissions devoted to inquiry; and scholarly activities that support the mission of university research centers.

Evidence of scholarship in this area may include: publication of papers in refereed and peer reviewed journals; published books and chapters; published law reviews; citation of a faculty member's work by other professionals in the field; published reviews and commentary about a faculty member's work; invited presentations at professional meetings; seminar, symposia, and professional meeting papers and presentations; direction and contribution to originality and novelty in graduate student theses and dissertations; direction and contribution to undergraduate student research; awards, scholarships, or fellowships recognizing an achievement, body of work, or career potential based on prior work; appointment to editorial boards; and significant scholarly contributions to university research centers. The validation of scholarship in the area of discovery is based on evaluation by other professionals in the faculty member's discipline or sub-discipline.

d. Scholarship of Integration: often interdisciplinary and at the borders of converging fields, is the serious, disciplined work that seeks to synthesize, interpret, contextualize, critically review, and bring new insights into, the larger intellectual patterns of the original research. Similar to the scholarship of discovery, the scholarship of integration can also seek to investigate, consolidate, and synthesize new knowledge as it integrates the original work into a broader context. It often, but not necessarily, involves a team or teams of scholars from different backgrounds working together, and it can often be characterized by a multidisciplinary or interdisciplinary investigative approach. The consolidation of knowledge offered by the scholarship of integration has great value in advancing understanding and isolating unknowns. Beyond the differences, the scholarship of integration can include many of the activities of scholarship of discovery and thus may be rigorously demonstrated and validated in a similar manner.

e. Scholarship of Outreach/Application/Engagement: These activities apply faculty members' knowledge and expertise to issues that impact individuals, communities, businesses, government, or the environment. Examples may include economic development, environmental sustainability, stimulation of entrepreneurial activity, integration of arts and sciences into people's lives, enhancement of human well being, and resolution of societal problems. Like other forms of scholarship and creative activities, the scholarship of outreach/application/engagement involves active communication and validation. Examples of validation may include (but are not limited to): peer reviewed or refereed publications and presentations; patents, copyrights, or commercial licensing; adoption or citation of techniques as standards of practice; invited presentation at a seminar, symposium or professional meeting; and citations of the faculty member's work.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

C-3. OUTREACH and EXTENSION: Outreach activities are originated by every unit on UI's Moscow campus and from each of the University's physical locations around the state.

Outreach includes a wide variety of activities including, but not limited to, (a) extension (see 1565 B); (b) teaching, training, certification, and other dissemination of information to the general public, practitioner, and specialty audiences; (c) volunteer development and establishment/maintenance of relationships with private and public organizations; (d) unpaid extramural consultation and other professional services to individuals, organizations, and communities; and (e) undergraduate and graduate student recruiting activities. Delivery mechanisms include distance education, service learning, cooperative education, technology transfer, noncredit courses, workshops, presentations, and publications. Most of the examples provided, such as distance education, are not exclusively outreach. Instead, they lie at the intersection of outreach and teaching or research. Likewise, professional services may be associated with teaching, scholarship, or university service and leadership. A faculty member's position description specifies where his or her activities will be counted.

Evidence of effective outreach activities may include, but are not limited to, (1) documentation of the process by which needs were identified and what steps were taken to deliver carefully planned and implemented programs; (2) numbers of individuals and types of audiences affected; (3) evaluation by participants in outreach activities; (4) other measures of significance to the discipline/profession, state, nation, region and/or world; (5) quantity and quality of outreach publications and other mass-media outlets; (6) evaluation of the program's effects on participants and stakeholders; (7) awards, particularly those involving peer evaluation; (8) letters of commendation from individuals within organizations to whom service was provided; (9) service in a leadership role of a professional or scientific organization as an officer or other significant position; and (10) other evidence of professional service oriented projects/outputs.

C-4. UNIVERSITY SERVICE AND LEADERSHIP: The university seeks to create formal and informal organizational structures, policies, and processes that enable the university community to be effective, while also fostering a climate of participatory decision making and mutual respect.

a. Intramural service is an essential component of the University of Idaho mission and is the responsibility of faculty members in all units. Service by members of the faculty to the university in their special capacities as scholars should be a part of both the position description and annual performance review.

Within the university, intramural service includes participation in unit, college, and university committees, and any involvement in aspects of university governance and academic citizenship. University, college, and unit committee leadership roles are seen as more demanding than those of a committee member or just regularly attending faculty meetings. Because faculty members play an important role in the governance of the university and in the formulation of its policies, recognition should be given to faculty members who participate effectively in faculty and university governance. Intramural service can include clinical service, routine support, and application of specialized skills or interpretations, and expert consultancies. The beneficiaries of these forms of service can be colleagues and co-workers.

Effective performance in intramural service may be documented by a variety of means. Examples include: (1) letters of support from university clientele to whom your service was provided; (2) serving as a member or chairperson of university, college, or unit committees; and (3) receiving University service awards, especially those involving peer evaluation.

b. Administration:

(1) Unit Administration (see FSH 1565 B): FSH 1420 E describes the responsibilities and the selection and review procedures for unit administrators. Unit administration is not normally considered in tenure and promotion deliberations; it is accounted for insofar as expectations are proportionally adjusted in the other sections of the position description. For faculty in nonacademic units (e.g. faculty at large), administration may be considered in tenure and promotion deliberations.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

(2) Other: Effective conduct of university programs requires administrative activities that support scholarship, outreach and teaching. Program support activities are to be noted in position descriptions and performance reviews. The role of the principal or co-investigator of a university program or project may include the following administrative responsibilities: (1) budgetary and contract management; (2) compliance with University purchasing and accounting standards; (3) supervision and annual review of support personnel; (4) purchasing and inventory management of goods; (5) graduate student and program personnel recruitment, training in University procedures/policies, and annual review; (6) collaborator coordination and communication; (7) management of proper hazardous waste disposal; (8) laboratory safety management; (9) authorization and management of proper research animal care and use; (10) authorization and management of human subjects in research; (11) funding agency reporting; (12) intellectual property reporting; and (13) compliance with local, state, and federal regulation as well as University research policy.

Demonstration of effective administration may be documented by a variety of means. Examples include: (1) compliance with applicable rules, standards, policies, and regulations; (2) successful initiation, conduct and closeout of research contracts and grants as evidenced by timely reporting and budget management; (3) completion of the research contract or proposal scope-of-work; organized program operations including personnel and property management. Documentation of effective university program operation, beyond scholarship, may also include input by graduate and undergraduate students participating in the university program; and input by collaborators, cooperators, funding agency and beneficiaries of the program. Documentation of effective administration may include evaluations by faculty and staff, as well as objective measures of performance under the incumbent's leadership.

D. UNIVERSITY FACULTY (FSH 1520 Article II):

D-1. INSTRUCTOR: Instructors may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Appointment to instructor constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated below. To avoid confusion over university faculty (those who have voting rights per FSH 1520 II, Section 1) the title of Instructor shall not be used in any other university position.

a. Instructor. Appointment to this rank requires proof of advanced study in the field in which the instructor will teach, the promise of teaching effectiveness, and satisfactory recommendations. Instructors have charge of instruction in assigned classes or laboratory sections under the general supervision of the departmental administrator. When they are engaged in teaching classes with multiple sections, the objectives, content, and teaching methods of the courses will normally be established by senior members of the faculty or by departmental committees. Instructors are expected to assist in the general work of the department and to make suggestions for innovations and improvements.

b. Senior Instructor. Appointment to this rank requires qualifications that correspond to those for the rank of instructor and evidence of outstanding teaching ability. Instructors are promotable to senior instructor. Effective teaching is the primary responsibility of anyone holding this rank and this primary responsibility is weighted accordingly in the annual performance evaluation and when a senior instructor is being considered for tenure. Except in very rare instances, this rank is considered terminal (i.e., it does not lead to promotion to the professorial ranks and there is no limitation on the number of reappointments). Prospective appointees to the rank of senior instructor must be fully informed of its terminal nature.

D-2. FACULTY:

a. Assistant Professor. Appointment to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons in the final stages of completing doctoral dissertations or with outstanding talents or experience may be appointed to this rank. Evidence of potential effective teaching and potential scholarship in teaching and learning, artistic creativity, discovery, and outreach/application/engagement is a prerequisite to appointment to the rank of assistant professor. Appointees in this rank have charge of instruction in assigned classes or laboratories and independent or shared

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

responsibility in the determination of course objectives, methods of teaching, and the subject matter to be covered. Assistant professors are expected to demonstrate the ability to conduct and direct scholarly activities, and to provide intramural and extramural professional service. [1565 C]

b. Associate Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons with outstanding talents or experience may be appointed or promoted to this rank. Associate professors must have demonstrated maturity and conclusive evidence of having fulfilled the requirements and expectations of the position description. An appointee to this rank will have demonstrated effective teaching or the potential for effective teaching, the ability to conduct and direct scholarly activities in his or her special field, and provide service to the university and/or his or her profession. Evidence of this ability includes quality publications or manuscripts of publishable merit; and/or unusually productive scholarship in teaching and learning; and/or significant artistic creativity; and/or major contributions to the scholarship of outreach/application/engagement. Associate professors generally have the same responsibilities as those of assistant professors, except that they are expected to play more significant roles in initiating, conducting, and directing scholarly activities, and in providing intramural and extramural professional service. [1565 C]

c. Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. A professor should have intellectual and academic maturity, demonstrated effective teaching or the potential for effective teaching and the ability to organize, carry out, and direct significant scholarship in his or her major field. A professor will have made major scholarly contributions to his or her field as evidenced by several quality publications and/or highly productive scholarship in one or more of the areas of teaching and learning, discovery, artistic creativity, and outreach/application/ engagement. Professors have charge of courses and supervise research, and are expected to play a major role of leadership in the development of academic policy, and in providing intramural and extramural professional service. [1565 C]

D-3. RESEARCH FACULTY:

a. Assistant, Associate and Professor. Appointment to these ranks requires qualifications, except for teaching effectiveness, that correspond to their respective ranks as for faculty in D-2 above.

D-4. EXTENSION FACULTY:

a. Extension Faculty with Rank of Instructor. Appointment to this rank requires: sound educational background and experience for the specific position; satisfactory standard of scholarship; personal qualities that will contribute to success in an extension role; evidence of a potential for leadership, informal instruction, and the development of harmonious relations with others.

b. Extension Faculty with Rank of Assistant Professor. Appointment to this rank requires a master's degree along with the qualifications of extension faculty with rank of instructor and: demonstrated leadership ability in motivating people to analyze and solve their own problems and those of their communities; evidence of competence to plan and conduct an extension program; a record of effectiveness as an informal instructor and educational leader; proven ability in the field of responsibility; evidence of continued professional growth through study and participation in workshops or graduate training programs; acceptance of responsibility and participation in regional or national training conferences; membership in appropriate professional organizations, and scholarship in extension teaching or practical application of research; demonstrated ability to work in harmony with colleagues in the best interests of UI and of the people it serves.

c. Extension Faculty with Rank of Associate Professor. In addition to the qualifications required of extension faculty with rank of assistant professor, appointment or promotion to this rank requires: achievement of a higher degree of influence and leadership in the field; continued professional improvement demonstrated by keeping up to date in subject matter, extension teaching methods, and organization procedures; progress toward an advanced degree if required in the position description; demonstrated further successful leadership in advancing extension educational programs; evidence of a high degree of insight into county and state problems of citizens and communities in which they live, and the contribution that education programs can make to their solution; an acceptance of greater responsibilities; a record of extension teaching or practical

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

application of research resulting in publication or comparable productivity; a reputation among colleagues for stability, integrity, and capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Extension Faculty with Rank of Professor. In addition to the qualifications required of extension faculty with rank of associate professor, appointment or promotion to this rank requires: regional or national recognition in the special professional field or area of responsibility; a record of successful organization and direction of county, state, or national programs; an outstanding record of creative extension teaching or practical application of research resulting in significant publications or comparable scholarship; active membership and effective participation in professional committee assignments and other professional organization activities; demonstrated outstanding competence in the field of responsibility; achievement of full maturity as an effective informal teacher, wise counselor, leader of extension educational programs, and representative of the university. These activities may occur in a domestic or international context.

D-5. LIBRARIAN:

a. Librarian with Rank of Instructor. Appointment to this rank requires an advanced degree in library science from a library school accredited by the American Library Association or an equivalent terminal degree and relevant experience and: (a) evidence of potential for successful overall performance and for development as an academic librarian; (b) when required for specific positions (e.g., cataloger, assistant in a subject library), knowledge of one or more subject areas or pertinent successful experience in library work.

b. Librarian with Rank of Assistant Professor. Appointment to this rank requires the qualifications for librarian with rank of instructor and: (a) demonstrated ability, competence, and effectiveness in performing assigned supervisory-administrative, specialized public service, or technical service responsibilities; (b) demonstrated ability to establish and maintain harmonious working relationships with library colleagues and other members of the university community; (c) evidence of professional growth through study; creative activity; participation in workshops, conferences, seminars, etc.; participation in appropriate professional organizations; awareness of current developments in the profession and ability to apply them effectively in the area of responsibility; (d) service to the library, university, or community through committee work or equivalent activities.

c. Librarian with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) acceptance of greater responsibilities, and conclusive evidence of success in the performance of them, e.g., bibliographical research performed in support of research activities of others; development of research collections; the preparation of internal administrative studies and reports; interpreting, and facilitating effective use of, the collections; effectively applying bibliographic techniques for organizing library collections; effective supervision of an administrative unit; (b) evidence of further professional growth, as demonstrated by keeping up to date in subject matter, methods, and procedures and by practical application of research resulting in significant improvement of library operations or in publication; effective participation in the work of appropriate professional organizations; and/or formal study, either in library science or in pertinent subject areas; (c) evaluation by colleagues as a person of demonstrated maturity, stability, and integrity, with the capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Librarian with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) demonstrated outstanding competence in the area of responsibility; (b) achievement of an outstanding record of creative librarianship, of effective administration, or of practical application of research resulting in significant publications or comparable productivity; (c) an additional degree in library science or in a pertinent subject area or equivalent achievement; (d) regional or national recognition for contributions to the profession based on publications or active and effective participation in the activities of professional organizations; (e) evaluation by colleagues as an effective librarian who will continue to recognize that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

D-6. PSYCHOLOGIST OR LICENSED PSYCHOLOGIST:

a. Psychologist with Rank of Instructor. Appointment to this rank requires: an advanced degree in counseling, counseling psychology, clinical psychology, or closely related field earned in a professional program accredited by the appropriate accrediting association; evidence of effective skills in counseling or therapy; and evidence of pursuit of a terminal degree.

b. Psychologist or Licensed Psychologist with Rank of Assistant Professor. Appointment to this rank requires the qualifications for psychologist with rank of instructor and: a doctoral or equivalent terminal degree; evidence of effective skills in counseling or therapy; awareness of current developments in the profession; and demonstrated potential for participation in appropriate professional organizations, service to the Counseling and Testing Center, the university, and the community through teaching, committee membership, or equivalent activities, and the development and execution of research projects or the development and execution of outreach services designed to benefit UI students.

c. Licensed Psychologist with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: possession of a license as a psychologist in the state of Idaho; evidence of continued development of skills in counseling or therapy, as demonstrated by attendance at training workshops, personal study that leads to the presentation of workshops, classes, or seminars, or private study that leads to in-service training of personnel of the Counseling and Testing Center; evidence of continued professional development through service in professional organizations; evidence of effective teaching or training; completion of research that has resulted in quality publications or manuscripts of publishable merit, or the design and implementation of a continuing program in the Counseling and Testing Center that is of benefit to UI students and represents professional achievement of publishable merit; and continued service to the university and community through committee work or participation in community organizations. These activities may occur in a domestic or international context.

d. Licensed Psychologist with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: demonstration of outstanding competence in counseling or therapy; establishment of an outstanding record in research and publication or in development of continuing programs that contribute to the betterment of university students; continued professional improvement through private study, directed study, or attendance at workshops, conventions, etc.; regional or national recognition for contributions to the profession through publication, presentation of workshops, or active and effective participation in the activities of professional organizations; and recognition by colleagues as an effective psychologist who realizes that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

D-7. OFFICER-EDUCATION: Appointment of persons to the faculties of the officer education programs was established for the purpose of ensuring the academic soundness of the programs. The dual role of these faculty members as military officers and academic instructors is recognized. The university expects the nominees to have demonstrated academic and intellectual capabilities and exemplary professional achievement. Specifically, UI expects:

a. Academic Preparation. It is desirable for officer education faculty members to have at least a master's degree. In his or her most recent education, the officer should have a superior academic record as demonstrated by such measures as high grade-point average in graduate school, being in the upper half of the class in graduate school, or superior graduate-level ability as attested in letters of recommendation from graduate-school professors.

b. Specialized Preparation. The officer must have significant education, experience, or formal preparation in the subject areas in which he or she will teach.

c. Military Background and Preparation. A junior officer is expected to have had significant professional performance and experience. It is also desirable that the officer have some formal military education beyond commissioning. A senior officer should have broad experience with excellent performance. He or she is

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

expected to have attended a junior or senior military college and to have made a distinguished record there.

d. Teaching. It is desirable for officers to have had some teaching experience. It is recognized that this is not always possible for junior officers. For such an officer, there should be some evidence that he or she will become a satisfactory teacher. Heads of officer education programs are expected to be experienced instructors.

e. Nominees who will pursue graduate studies at UI for one year before becoming an instructor will be given preliminary approval. In their last semester of full-time graduate enrollment, the service should submit the required information to the Officer Education Committee for regular, final approval. For preliminary approval, the officer should, in addition to the military requirement, show promise of being successful in graduate studies. This could be demonstrated by (a) a high score on the Graduate Record Examination, if taken, (b) full enrollment status as a graduate student at UI, (c) a high overall grade-point average in college (3.00 or above on a 4-point scale), (d) a high grade-point average in a major area, or (e) a good record in the final year of college and graduate-level ability as attested by letters of recommendation from college professors.

f. Appointment:

1. The following information is submitted by the nominee's service: (1) transcripts from undergraduate and graduate academic institutions; (2) transcripts or appropriate records from military schools and staff colleges; (3) at least three letters of recommendation from appropriate sources, such as former professors, military instructors, and supervisors or commanders. These letters should be concerned with matters such as the officer's civilian academic performance, military record and leadership ability, and actual or potential performance as a teacher. (Former supervisors or commanders could give their opinion based on the officer's demonstration of leadership ability and his or her experience as a training officer.); (4) a summary of the officer's duty assignments and military and teaching positions held; (5) copies of favorable communications from the officer's file.

2. The following is provided by the program unit concerned: (1) a description of the military schools attended and courses completed by the nominee; (2) a description of the positions held by the nominee; (3) an explanation of the appropriateness of the officer's experience and training to the courses he or she will teach.

3. Copies of the requested material are distributed by the local unit to the members of the Officer Education Committee at least 72 hours before the meeting at which the committee will consider the nominee. For appointments commencing in the fall, this information should normally be made available not later than the preceding May 1.

4. In the case of a person nominated to head an officer education program, UI may require a personal interview.

5. A minimum of two weeks, after receipt of all required information, is necessary for consideration of the nominee. UI notifies the nominee's service of its decision within one month.

D-8. UNIVERSITY DISTINGUISHED PROFESSOR: Acknowledgment of outstanding academic contributions to the university is appropriate and desirable. The rank of University Distinguished Professor² is bestowed upon University of Idaho faculty in recognition of sustained excellence in teaching, scholarship³, outreach, and service. The rank will be held for the remainder of the recipient's active service at the University; if the recipient leaves the University and is eligible for emeritus status, the rank will change to University Distinguished Professor Emeritus. The rank is highly honorific and therefore will be conferred on no more than three faculty members university-wide in any given academic year. Selection of University Distinguished Professors will reflect the diversity of scholarly

² As a result of Development Fund efforts, endowment support eventually may be obtained for many University Distinguished Fellowships, in which case a donor's name may be added to the title.

³ Scholarship in this context includes scholarship of discovery, scholarship of pedagogy, scholarship of application and integration, and artistic creativity.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

fields at the University. University Distinguished Faculty will receive a stipend of at least \$5,000 per year for five years to be used to enhance salary or support professional activities (e.g., professional travel, student support, equipment, materials and supplies, etc.). Final discretion in conferring the rank of Distinguished Professor and the number of appointments in a given year resides with the President.

a. Selection Criteria: In general, University Distinguished Professors will have received national and usually international recognition. They will have brought distinction to the University through their work.

University Distinguished Professors will have achieved a superior record in the following areas: scholarly, creative, and artistic achievement; breadth and depth of teaching; and University service and service involving the application of scholarship, creative, or artistic activities to addressing the needs of one or more external publics.

University Distinguished Professorships will be conferred on members of the University of Idaho Faculty who have attained the rank of Professor and have completed a minimum of seven years of service at the University, typically at the rank of Professor.

b. Selection Process: University Distinguished Professorships will be awarded by the president upon recommendation of The University Distinguished Professorship Advisory Committee a standing committee composed of four faculty members and three deans. The committee members should reflect all dimensions of diversity in the university community. They will be appointed by the Provost to serve three-year terms on a staggered basis. Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records of teaching, research and/or outreach.

1. The Provost will request nominations from faculty, deans, directors and unit administrators annually.
2. Written nominations will be submitted to the Provost and must include:
 - a. A nominating letter with a brief summary of the candidate's achievements;
 - b. The candidate's *curriculum vitae*, including a list of any significant previous awards;
 - c. Letters of endorsement from the appropriate deans and unit administrators or director(s). The candidate may also include a maximum of three additional letters of support, as appropriate, from students, colleagues at the University of Idaho, and/or other institutions. Letters should describe the impact of the nominee on her/his field, evidence of external recognition, and the context of her/his work over the course of her/his employment.
3. The University Distinguished Professorship Advisory Committee reviews the nominations and makes recommendations to the Provost for transmittal to the President.
4. Because the rank of University Distinguished Professorship is intended to be highly honorific, it is possible that in a given year no candidates will be selected.
5. The applications of nominees who are not selected in the first year of nomination will remain active for a total of three years. Nominators will have the opportunity to update their nomination during subsequent years in which their candidate is under consideration.

D-9. CLINICAL FACULTY: Clinical faculty may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Clinical faculty is a non-tenure track position. Clinical faculty positions are appropriate for professional disciplines having strong applied and/or clinical elements or those serving university units or academic departments in a supporting capacity. Appointment to clinical-faculty status constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated in a below. Clinical faculty members may be appointed and/or promoted to the ranks of clinical assistant professor, clinical associate professor or clinical full professor.

a. Responsibilities, Privileges, and Rights. A clinical faculty member has a primary employment responsibility in a UI unit. The relationship of a clinical faculty member to UI is essentially that of a collaborator with a UI unit, program, or faculty member. The guarantees afforded by the principle of academic freedom [see [31604000](#)] are extended to members of the clinical faculty. They have the same responsibilities and privileges as university faculty (FSH 1520 II 1)

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

Clinical faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Clinical faculty members may have teaching as a primary or major responsibility; in addition, they may advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees, engage in outreach and engagement activities, and act as expert advisers to faculty members or groups.

2. The nature and extent of the services to be rendered are determined jointly by the clinical faculty member, his or her immediate supervisor, and the unit administrator(s) concerned.

b. Qualifications. Assignment to a clinical faculty position is based on demonstrated knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to those expected of faculty within the unit.

c. Conversion. Instructors and senior instructors who meet the qualifications for clinical faculty defined in D-9 b. may be considered for clinical faculty status upon the recommendation of the unit administrator and dean, subject to approval by the provost. Credit for prior equivalent experience may be granted by the provost up to a maximum of four years. Conversion of an existing tenure-track or tenure line in a unit to clinical status requires the approval of the dean and provost. A unit must demonstrate that a clinical position better advances the university's strategic goals than a tenure-track position.

E. EMERITUS STATUS. (FSH 1520 II.2)

E-1. PURPOSE. Emeritus status benefits both the university and emeriti by providing opportunities for emeriti to maintain ties with faculty members and continue service to the university and community.

E-2. ELIGIBILITY. A board-appointed, benefit-eligible member of the university faculty who holds one of the ranks described in 1565 D and who leaves the university and has a minimum of 8 years of service and attained the rule of 65 (age plus years of service is at least 65) is eligible for emeritus status.

E-3. APPOINTMENT.

1. Faculty must request consideration for emeritus status. This request may be made in the notice of resignation or in a request made directly to the provost. This request may be made along with or at any point following the submission of the letter of resignation. If a faculty member who is eligible for emeritus status under section E-2 does not request consideration for emeritus status in their resignation letter, then their college or department will send a notice to the faculty member asking if they wish to request emeritus status. The college or department will send a similar notice to any eligible faculty who receives a terminal contract due to program closure or similar circumstances.

2. In ordinary circumstances, the provost will grant emeritus status if the eligibility requirements specified in E-2 are satisfied. In exceptional circumstances, the provost may suspend the above eligibility rules and award, deny, or revoke a faculty member's emeritus status with a written notification to the faculty member stating the reasons for the decision and notifying them of the ability to appeal. A faculty member may appeal this decision to the Faculty Senate Chair, Faculty Senate Vice Chair, and Faculty Secretary, where the provost's decision must be upheld by a unanimous vote in order to be enacted. Examples of exceptional circumstances include the reasons outlined in FSH 3910 A-1.

3. A list of emeriti is maintained by the Provost's office.

4. Emeriti are responsible for updating contact information with the university.

E-4. PRIVILEGES.

a. Access. Emeriti continue to have access to research, library, and other UI facilities.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

- b. Participation.** UI encourages the voluntary continued participation of emeriti in the activities of the academic community. Emeriti may take an active role in the service and committee functions of their department, college, and the university as described in FSH 1520 II.2. Other activities are subject to approval by the provost.
- c. Title.** Emeriti may use the title “professor emeritus/emerita,” “research professor emeritus/emerita,” or “extension professor emeritus/emerita,” as applicable. A faculty member without such rank has the designation “emeritus” or “emerita,” as applicable, added to the administrative or service title held at the time of retirement.
- d. Mail.** Departmental mailboxes continue to be available to emeriti who reside locally. Emeriti who have departmental mailboxes receive full distribution of departmental notices unless otherwise requested.
- e. Office supplies.** Office supplies are available under regular departmental procedures.
- f. Postage.** Departmental postage may be used for professional mail.
- g. Parking.** Emeriti receive one non-transferable gold parking permit annually.
- h. Discount programs.** Emeriti receive any discounts available to other faculty members through various UI programs.
- i. Functions.** Emeriti are invited to the same university, college, and departmental functions as active faculty.
- j. Travel funding.** Travel funding may be used to support professional activities of emeriti in service to the university (e.g. guest lectures, research design, consultation, etc.). Emeriti may have a lower priority for travel funding than active faculty and such funding is at the discretion of the unit administrator or dean.
- k. Office/lab space.** Offices and labs for emeriti are provided on a space-available basis as determined by the unit administrator or dean, giving higher priority to active faculty and unit needs. Office and lab space allocations to emeriti may be revoked upon 60 days’ notice.
- l. Information technology services.** Emeriti who elect to maintain an active computing account will retain access to services provided by Information Technology Services (ITS) including electronic communications (e.g., email, instant messaging, etc.), technical support, and offered software.

E-5. EMPLOYMENT OPPORTUNITIES.

- a. Emeriti may hold a temporary or permanent part-time position (0.49 FTE or less) subject to regular employment procedures. It is the responsibility of emeriti to consult with HR regarding impact to benefits.
- b. Emeriti shall not serve as supervisors of other employees unless they hold a position as outlined in E-5-a herein.

F. ASSOCIATED FACULTY: Associated faculty members (see FSH 1520 II-3) have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit’s discretion. They are not eligible for sabbatical leave.

F-1. AFFILIATE FACULTY:

a. General. The affiliate faculty consists of professional personnel who serve academic departments in a supporting capacity. Appointment to affiliate-faculty status constitutes a recognition of the appointee’s scholarly contributions and professional accomplishments, confers responsibilities and privileges as stated in subsection d below, and authorizes assignment of service functions as described in subsection d-2 below. It is also a means of encouraging greater cooperation between and among academic departments and other units. An affiliate faculty member holds a non-tenure-track faculty status in an appropriate academic discipline.

b. Employment Status. An affiliate faculty member may, by virtue of his or her employment, have either one of the following relationships with UI: (1) that of a UI employee, normally an exempt employee, who is [a] a member of the faculty or staff of a unit of the university other than the one in which he or she has affiliate-faculty status, or [b] a member of the professional support staff of the same unit of the university in which he or she has affiliate-faculty status; (2) that of an employee of a governmental or private agency who is assigned by that agency to a UI unit or to one of the agency’s units or programs that is officially associated with the university.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

c. Distinction between Affiliate and Adjunct Faculties. Members of the affiliate faculty have a more direct relationship with UI than do members of the adjunct faculty [see 1565 F-2]. Members of the adjunct faculty are not UI employees. An adjunct faculty member's primary employment is with a unit or program that is not officially associated with UI. Thus, the relationship of a member of this faculty category to UI is essentially that of a collaborator with a UI unit, program, or faculty member. An affiliate faculty member, in contrast, has a primary employment responsibility in a UI unit or in a non-UI unit that is officially associated with UI. In addition, he or she has a secondary relationship to another unit in a supporting role, or has a secondary relationship to the academic program in the same unit in which he or she has a primary employment responsibility. These latter relationships are the kind that are recognized by the affiliate faculty membership.

d. Responsibilities, Privileges, and Rights. The guarantees afforded by the principle of academic freedom [see 31604000] are extended to members of the affiliate faculty. They have substantially the same responsibilities and privileges as do members of the university faculty; however, their right to vote in meetings of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. (Those who, in addition to their affiliate-faculty status, have status as members of the university faculty [e.g., psychologists in the Counseling and Testing Center and regular faculty members in other academic departments] have, of course, full rights of participation in meetings of the university faculty and of the constituent faculties to which they belong.)

Affiliate faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Affiliate faculty members, as such, do not normally have teaching as a primary or major responsibility; however, with the approval of academic departments, they may teach classes, advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees (with approval by the dean of graduate studies), or act as expert advisers to faculty members or groups.
2. The nature and extent of the services to be rendered are determined jointly by the affiliate faculty member, his or her immediate supervisor, and the departmental administrator(s) concerned.
3. Affiliate faculty qualify for the faculty-staff educational privilege [see 3740]

e. Qualifications. Assignment to an affiliate faculty position is based on demonstrating knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to what is expected of faculty within that unit.

f. Appointment.

1. Appointments to the affiliate faculty may be made at any time. They are reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointment should be continued unless the affiliate faculty member remains in UI employment or continues in his or her assignment to an entity that is officially associated with the university.
2. A recommendation for appointment to the affiliate faculty normally originates in the appropriate academic department and requires the concurrence of the nominee's immediate supervisor and the faculty of the appointing department. The appointment must be approved by the dean of the college, the president, and the regents.
3. An appointment, termination, or other change in affiliate-faculty status is made official by means of a "Personnel Action" form.

F-2. ADJUNCT FACULTY:

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

a. General. The adjunct faculty includes highly qualified persons who are not employed by UI but are closely associated with its programs. [For the distinction between the affiliate and the adjunct faculty categories, see 1565 F-1-c.]

b. Responsibilities. Members of the adjunct faculty have the same academic freedom and responsibility as do members of the university faculty; however, their right to vote in meetings of the university faculty and of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. Adjunct faculty members may be assigned to advise students on their academic or professional programs at any level; to work in cooperative research projects; to serve on committees, including graduate students' supervisory committees (with approval by the College of Graduate Studies); to act as expert advisers to faculty members or groups; and to teach courses in their branch of learning.

c. Qualifications. Adjunct faculty members must be highly qualified in their fields of specialization and should have exhibited positive interest in UI programs in the field of their appointment. Their qualifications should ordinarily be equivalent to those required of regular members of the faculty in the area and at the level of the adjunct faculty member's responsibility.

d. Adjunct faculty do not qualify for the faculty-staff educational privilege. (see 3740)

e. Appointment.

1. Appointments to the adjunct faculty may be made at any time. **b.** Appointments are for an indefinite period, but are to be reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointments should be continued unless the adjunct faculty member is actively engaged in the responsibilities for which he or she was appointed.

2. Recommendations for appointment to the adjunct faculty are normally developed at the departmental level and have the concurrence of the departmental faculty. For interdisciplinary degree programs, adjunct faculty may also be assigned responsibilities with respect to the degree programs with approval of the program faculty and of the program director. Appointments must be approved by the dean of the college, the provost, the president, and the regents.

3. Before formal appointment procedures are begun, the prospective adjunct faculty member must agree to serve under the provisions herein described. When necessary, the consent of the nominee's employer, if any, will be requested and recorded.

4. Appointment information is recorded on the regular "Personnel Action" form.

5. The appointment of adjunct faculty members to graduate students' supervisory committees requires approval by the dean of the College of Graduate Studies.

G. TEMPORARY FACULTY: Temporary faculty have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit's discretion. They are not eligible for sabbatical leave.

G-1. LECTURER. A teaching title that ~~may be used at any level, i.e., it~~ carries no specific connotation of rank among the professorial titles. This title is conferred on one who has special capabilities or a special instructional role. Lecturers are neither tenurable nor expected to progress through the professorial ranks. ~~A lecturer qualifies for faculty status with vote during any semester in which he or she (a) is on an appointment greater than half time and (b) has been on such appointment for at least four semesters. When a lecturer qualifies for faculty status they shall be reviewed at a minimum of every 5 years thereafter as determined by the unit's bylaws. The review committee defined by the unit's bylaws shall include tenure track faculty within the unit.~~

G-2. VISITING FACULTY. A designation that ~~when used with a professorial title, customarily~~ indicates that the appointee holds a regular teaching or research position at another institution. A visiting appointee who does not

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

hold a professorial rank elsewhere ~~may be designated as a lecturer~~ shall be subject to the requirements for lecturers to qualify for voting rights. ~~Appointees with visiting academic ranks (e.g., visiting associate professor, visiting professor) are considered temporary members of the university faculty. Those on full time appointment have the privilege of voting in meetings of the university faculty and of the appropriate constituent faculties.~~

G-3. ACTING. Persons who are judged competent to perform particular duties may be appointed for temporary service as acting members of the faculty. An acting appointment may also be used to establish a probationary period for an initial appointment of a person who, while being considered for a regular position on the faculty, is completing the required credentials for a permanent appointment. Persons on acting status are not voting members of the university faculty or of constituent faculties.

G-4. ASSOCIATE. A title for a nonstudent with limited credentials who is assigned to a specialized teaching, research, or outreach position. Associates are exempt staff and are not members of the university faculty or of constituent faculties.

H. NON-FACULTY: Those within this category are not members of the faculty.

H-1. POSTDOCTORAL FELLOW. Postdoctoral fellows are persons who hold the doctoral degree or its equivalent at the time of their appointment and are continuing their career preparation by engaging in research or scholarly activity. Postdoctoral fellows are special exempt employees in the category of “temporary or special” (FSH 3080 D-2 a) employees recognized by the regents. [See also 3710 B-1.b.]

H-2. GRADUATE STUDENT APPOINTEES: The general nature of the following graduate assistantships is defined as an apprenticeship experience that consists of a work obligation partnered with educational and developmental activities, all of which are integrated with the graduate degree program of the student. All graduate assistants must be individually mentored by a faculty advisor and may receive additional mentoring from other faculty and/or staff on or off campus. All graduate assistant positions (H-2. a, b, c) are limited to twenty hours per week of work. All graduate student appointees must be academically qualified and registered. [See also 3080 D-2-a.]

a. Graduate Teaching Assistant. Graduate Teaching Assistants perform duties related to the instructional efforts of the unit in which they are employed under the supervision of a member of the university faculty, associated faculty, or temporary faculty (see FSH 1565 D, F, and G). These duties, which must be associated with academic credit instruction and constitute at least 50 percent of a Graduate Teaching Assistant’s effort, may include, but not be limited to: primary teaching responsibilities; grading assignments; assisting with the delivery of instruction through technology; and providing other assistance related to instruction.

b. Graduate Research Assistant. Graduate Research Assistants develop competence in performing professional-level work in support of research, scholarship, or creative activity. These positions can only have duties within the scope of work permitted by the funding source.

c. Graduate Support Assistant. Graduate Support Assistants perform a wide range of duties and can have varying responsibilities in academic and non-academic campus departments and programs. The specific duties depend on the needs of the office or project and on the qualifications and experiences of the Graduate Support Assistant. Graduate Support Assistants may provide academic and/or non-academic instruction, and/or assist with research, or provide other support functions. The duties must be directly related to the Graduate Support Assistant’s program of study. The College of Graduate Studies shall periodically publish standards governing the permissible scope of Graduate Support Assistant appointments on its website.

I. QUALIFICATIONS OF NONFACULTY MEMBERS FOR TEACHING UI COURSES. Persons who are not members of the university faculty but are selected to teach UI courses offered for university-level credit (including continuing-education courses and those offered by correspondence study) are required to have scholarly and professional qualifications equivalent to those required of faculty members.

Version History

UI FACULTY-STAFF HANDBOOK
Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE
Section 1565: Academic Ranks and Responsibilities

Amended July 2022. Revised and clarified section C-1.a. to expand and clarify the evidence that may be used in evaluating teaching effectiveness.

Amended July 2021. Editorial changes.

Amended July 2020. The policy on emeritus status was extensively revised to provide greater clarity, ensure conformity with labor law, and add the ability to revoke emeritus status in exceptional circumstances. Section D-5 Librarian was revised to provide more flexibility in recruiting efforts.

Amended January 2020. The policy on office hours was moved from FSH 3240 to C-1.c. Changes were made to sections C-1 and C-3 to ensure that faculty efforts in the areas of teaching, advising, and outreach and extension are properly credited.

Amended July 2018. A new category for graduate support assistants was added to address needs that are not covered under the role of a typical teaching or research assistant position.

Amended July 2014. The cap on non-tenure track faculty appointments in a unit was adjusted and promotion processes clarified and revised.

Amended January 2014. The time necessary to qualify for emeritus status was redefined.

Amended July 2013. Definitions for research and teaching assistants were more clearly defined.

Amended July 2012. Edits were made to the Distinguished Professor under D-8 and to the qualifications for Emeritus status and a search waiver under E.

Amended July 2011. Voting for associated faculty was clarified and Clinical Faculty under “G. Temporary Faculty” moved to “D. University Faculty” as D-9 and was revised.

Amended July 2010. The affiliate and adjunct terms were switched to conform to national norms and the rank of Distinguished Professor was added.

Amended January 2010. Changes to the faculty position description and evaluation forms integrating faculty interdisciplinary activities into the evaluation processes were incorporated into this policy. Ranks for Associated Faculty in F were removed because the promotion process as detailed in 3560 for faculty ranks was deemed excessive for associated faculty. Those currently holding a specific rank in adjunct or affiliate will retain that privilege.

Amended July 2008. The policy was reorganized to better reflect classifications as stated in FSH 1520 Article II.

Amended July 2006. Substantial revisions were made to Section A.

Amended July 2001. Section J-1, voting rights for lecturers, was changed.

Amended July 2000. Revisions were made to C-1, D-1, and E-1.

Amended 1998. Extensive revisions were made to B (entirely new), C, D, and E.

Amended July 1998. Section A underwent additional substantial revision.

Amended July 1996. The definitions of ‘postdoctoral fellow’ (J-5), ‘graduate assistant’ (K-3) and ‘research fellow’ (K-4) were revised.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

Amended July 1994. Section A was substantially revised, so as to underline better the importance of both teaching and scholarship. The so-called “Voxman Amendment” (the addition of ‘in the classroom and laboratory’ to the list of possible venues wherein the evaluation of scholarship might take place) made its first appearance.

Amended 1987. The material in section I was added.

Adopted 1979.

POLICY COVER SHEET

Comprehensive review? Yes No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Article II, Section 1 revised to clarify that voting rights arise from faculty rank, so that non-faculty in administrative roles do not have voting rights; and to resolve conflict with FSH 1565 regarding the terms on which visiting faculty and lecturers are granted voting rights.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 1565.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

UI FACULTY-STAFF HANDBOOK

CHAPTER ONE:

HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

1520

CONSTITUTION OF THE UNIVERSITY FACULTY

OWNER

Faculty Secretary
Francesca Sammarucca
facsec@uidaho.edu

LAST REVISION: September 2022

CONTENTS:

Preamble
Article I. General Provisions
Article II. Faculty Classifications
Article III. Faculty Meetings
Article IV. Responsibilities of the University Faculty
Article V. Faculty Senate
Article VI. Rules of Order
Article VII. Amendments

PREAMBLE. The faculty of the University of Idaho, designated “university faculty,” as defined in article II, section 1, in acknowledgement of the responsibilities entrusted to it for the immediate government of the university by article IX, section 10, of the constitution of the state of Idaho, has adopted and declared this constitution to be the basic document under which to discharge its responsibilities.

ARTICLE I--GENERAL PROVISIONS.

Section 1. Regents. The regents are vested by article IX, section 10, of the constitution of the state of Idaho with all powers necessary or convenient to govern the university in all its aspects. The regents are the authority for actions of the university faculty, and policy actions taken by the university faculty are subject to review and approval by the president and by the regents.

Section 2. President. The president of the university is both a member of and the president of the university faculty and is also the president of the other faculties referred to in section 4, below, and in article II. The president is the representative of the regents, the institution’s chief executive officer, and the official leader and voice of the university.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1520: Constitution of the University Faculty

Section 3. Faculty Senate. This senate is empowered to act for the university faculty in all matters pertaining to the immediate government of the university. The senate is responsible to and reports to the university faculty and, through the president, to the regents. The university faculty, president, and regents retain the authority to review policy actions taken by the senate.

Section 4. Constituent Faculties. The university faculty is composed of various constituent faculties, including the faculties of the several colleges and other units of the university. Faculty are entitled to speak or write freely on matters pertaining to university governance, programs and policies (see Article IV below and FSH 3160).

Clause A. College Faculties. The constituent faculty of each college or similar unit, meeting regularly and in accordance with bylaws adopted by a majority vote of the members of such faculty, is authorized to establish and to effect its own educational objectives, including matters of student admission and curriculum, and to participate in the selection of its own dean, other executive officers, and faculty members, subject only to the general rules and regulations of the university faculty and the authority of the president and the regents.

Clause B. Faculties of Subdivisions. If there are schools, intracollege divisions, departments, or separate disciplines within a college or similar unit, the constituent faculty of each such subdivision participates in decisions concerning its educational objectives, including matters of student admission and curriculum, the selection of its executive officers, and its faculty appointments, subject only to the general rules and regulations of the college faculty and the university faculty and the authority of the president and the regents.

Clause C. Interim Government. The Faculty Senate will provide for the establishment of bylaws for any college or similar unit that has not adopted its own bylaws.

Clause D. Matters of Mutual Concern. The Faculty Senate has the responsibility for resolving academic matters that concern more than one college or similar unit.

ARTICLE II--FACULTY CLASSIFICATIONS.

Section 1. University Faculty. The university faculty comprises the president, provost, ~~vice presidents, deans, and all faculty in the following ranks, including those serving in administrative positions:~~ professors; associate professors; assistant professors; senior instructors; instructors (including those professors, associate professors, assistant professors, senior instructors, and instructors whose titles have distinguished, research, extension, ~~or clinical or visiting~~ designations, (e.g., “assistant research professor,” and “assistant clinical professor”)) ~~and “visiting associate professor.”), and visiting faculty on full-time appointment who have completed at least two consecutive semesters; and lecturers currently on at least half-time appointment who have served/completed at least four two semesters, whether consecutive or not, on more than half-time appointment within the preceding three years [see 1565 G-1]. See FSH 1565 for definitions of faculty ranks.~~ Those who qualify under this section have the privilege of participation with vote in meetings of the university faculty and the appropriate constituent faculties.

Section 2. Emeriti. Faculty members emeriti have the privilege of participation without vote in meetings of the university faculty and the appropriate constituent and associated faculties. Also, they may be appointed to serve with vote on UI committees. [See also 1565 E.]

Section 3. Associated Faculties.

Clause A. The adjunct faculty [see 1565 F-1] and the affiliate faculty [see 1565 F-2] are associated faculties. Other associated faculties may be established as needed with the approval of the university faculty, president, and regents.

Clause B. Members of the adjunct faculty have the privilege of participation without vote in meetings of the university faculty. Members of the affiliate faculty may participate with vote in meetings of the university faculty if they have status as university faculty in their home unit. Both adjunct and affiliate faculty members have the privilege of participating in meetings of their respective constituencies of the university faculty, and may participate with vote if the bylaws of their constituent faculty so provide; however, if authorized to vote,

UI FACULTY-STAFF HANDBOOK
Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE
Section 1520: Constitution of the University Faculty

they are not counted among the full-time-equivalent faculty members when determining the basis for the constituent faculty's representation on the Faculty Senate.

Section 4. General Faculty. "General faculty" is a collective description for the combined faculties referred to in sections 1, 2, and 3, above.

ARTICLE III--FACULTY MEETINGS. Meetings of the university faculty may be called at any time, with due notice, by the president. Procedure for meetings of the university faculty is governed by FSH 1540 Standing Rules of the University Faculty.

ARTICLE IV--RESPONSIBILITIES OF THE UNIVERSITY FACULTY. Subject to the authority of the president and the general supervision and ultimate authority of the regents, the university faculty accepts its responsibilities for the immediate government of the university, including, but not restricted to:

Section 1. Standards for Admission. The university faculty establishes minimum standards for admission to the university. Supplementary standards for admission to individual colleges or other units of the university that are recommended by the appropriate constituent faculties are subject to approval by the university faculty.

Section 2. Academic Standards. The university faculty establishes minimum academic standards to be maintained by all students in the university. Supplementary academic standards to be maintained by students in individual colleges or other units of the university that are recommended by the appropriate constituent faculties are subject to approval by the university faculty. [See I-4-D.]

Section 3. Courses, Curricula, Graduation Requirements, and Degrees. Courses of instruction, curricula, and degrees to be offered in, and the requirements for graduation from, the individual colleges or other units of the university, as recommended by the appropriate constituent faculties, are subject to approval by the university faculty. [See I-4-D.]

Section 4. Scholarships, Honors, Awards, and Financial Aid. The university faculty recommends general principles in accordance with which privileges such as scholarships, honors, awards, and financial aid are accepted and allocated. The university faculty may review the standards recommended by the individual constituent faculties for the acceptance and allocation of such privileges at the college or departmental levels.

Section 5. Conduct of Students. The faculty's responsibility for approving student disciplinary regulations and the rights guaranteed to students during disciplinary hearings and proceedings are as provided in the "Statement of Student Rights," the "Student Code of Conduct," and the "University Disciplinary Process for Alleged Violations of Student Code of Conduct." [See 2200, 2300, and 2400.]

Section 6. Student Participation. The university faculty provides an opportunity for students of the university to be heard in all matters pertaining to their welfare as students. To this end, the students are entrusted with their own student government organization and are represented on the Faculty Senate. If students so desire, they are represented on faculty committees that deal with matters affecting them.

Section 7. Selection of Officers. The university faculty assists the regents in the selection of the president and assists the president in the selection of the provost, vice presidents and other administrative officers of the university.

Section 8. Governance of Colleges and Subdivisions. The university faculty promulgates general standards to guarantee the right of faculty members to participate in the meetings of the appropriate constituent faculties and in the governance of their colleges, schools, intracollege divisions, departments, and other units of the university. [See 1540 A.]

Section 9. Faculty Welfare. The university faculty recommends general policies and procedures concerning the welfare of faculty members, including, but not limited to, appointment, reappointment, nonreappointment, academic freedom, tenure, working conditions, promotions, salaries, leaves, fringe benefits, periodic evaluations, performance reviews, reassignment, layoff, and dismissal or termination.

UI FACULTY-STAFF HANDBOOK
Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE
Section 1520: Constitution of the University Faculty

Section 10. The Budget. Members of the university faculty participate in budgetary deliberations, and it is expected that the president will seek faculty advice and counsel on budgetary priorities that could significantly affect existing units of the university. [See 1640.20, University Budget and Finance Committee.]

Section 11. Committee Structure. The university faculty, through the medium of its Faculty Senate, establishes and maintains all university-wide and interdivisional standing and special committees, subcommittees, councils, boards, and similar bodies necessary to the immediate government of the university and provides for the appointment or election of members of such bodies. This section does not apply to *ad hoc* advisory committees appointed by the president or committees made up primarily of administrators. [See 1620 and 1640]

Section 12. Organization of the University. The university faculty advises and assists the president and the regents in establishing, reorganizing, or discontinuing major academic and administrative units of the university, such as colleges, schools, intracollege divisions, departments, and similar functional organizations.

Section 13. Bylaws of the Faculty Senate. The bylaws under which the Faculty Senate discharges its responsibilities as the representative body of the university faculty are subject to review and approval by the university faculty. [See 1580.]

ARTICLE V--FACULTY SENATE.

Section 1. Function. The Faculty Senate functions as provided in this constitution and in accordance with its bylaws as approved by the university faculty. [See I-3 and 1580.]

Section 2. Structure. The senate is constituted as follows:

Clause A. Elected Members.

(1) College Faculties. The faculty of each college, except the College of Graduate Studies, elects one senator for each 50, or major fraction thereof, full-time-equivalent faculty members in the college, provided, however, that each college faculty elects at least one senator. If, because of a reduction in the membership of a college faculty, there is to be a corresponding reduction in the college's representation in the senate, the reduction does not take place until the expiration of the term of office of an elected senator from the college.

(2) University Centers. The resident faculty of the university centers in Boise, Coeur d'Alene and Idaho Falls each elects one senator from among its number. Senators elected to represent a center have a unique role on senate, which is to provide a voice and vote from the perspective of their centers. That perspective is not intended to be college or discipline specific.

(3) Faculty-at-Large. Members of the university faculty who are not affiliated with a college faculty constitute the faculty-at-large, and this constituent faculty, in accordance with procedures adopted by the faculty-at-large, elects senators to serve with vote in the senate on the same basis as provided above for college faculties.¹

¹ The constitution of the university faculty originally provided that faculty status could be conferred by presidential designation on certain administrative and service officers who did not hold academic rank. When the faculty, on May 13, 1986, amended the constitution by, among other things, deleting that provision, it explicitly granted continuing membership, for the duration of their then current incumbencies, to those officers who on that date were members by virtue of presidential designation. These officers are members of the constituency known as the faculty-at-large.

(4) Dean. The academic deans elect one of their number to serve with vote in the senate.

(5) Staff. The representative body (Staff Council) of the university staff elects two employees who do not have faculty status to serve with vote in the senate.

(6) Students. Two undergraduate students, one graduate student, and one law student serve as voting

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1520: Constitution of the University Faculty

members of the senate, and the senate provides regulations governing the qualifications, terms of office, and election of student members, and procedures for filling vacancies in the student membership. [See 1580 VI.]

Clause B. Members *Ex Officiis*. The president or the president's designated representative and the secretary of the faculty are members *ex officio* of the senate, with voice but without vote.

Section 3. Officers. Each year the senate elects a chair and a vice chair from among the elected faculty members of the senate.

Section 4. Terms of Office. Elected faculty members of the senate serve for three years. The academic dean shall serve one year, the staff representatives shall serve for staggered two year terms. The terms of office for student members are as established by the senate. [See 1580 VI.] Newly elected members take office each year on September 1 or on the official opening date of the academic year, whichever is earlier. To carry out the requirement that approximately one-third of the elected faculty members are to take office each year, the senate may shorten the initial term of office of faculty senators elected to fill new positions in the senate to conform to a balanced rotation plan. When members are elected to fill a vacancy, they take office at the first meeting after the election and serve for the unexpired term of the vacancy. A faculty member elected to the senate may serve two consecutive terms. After serving two consecutive terms the faculty senate member must wait one full year before they are again eligible for election [see also FSH 1580 III-3].

Section 5. Eligibility. Every member of the university faculty is eligible to vote for members of the senate representing his or her college or other unit. Every member of the university faculty is eligible to serve as an elected member of the Faculty Senate and to hold an elective or appointive office in the senate.

Section 6. Elections. Regular elections for senators in the senate are held before April 15 of each year in which an election is to be held. All elections for members of the senate are by secret ballot. Appropriate procedures for nominations and elections are developed and approved by a majority vote of the faculty of the college or other unit.

Section 7. Vacancies.

Clause A. If it is necessary for a member of the senate to be absent temporarily (more than a month, but less than four months), the candidate who received the next highest number of votes in the most recent election in the college or unit acts as his or her alternate in the senate with full vote. If it is necessary for a member to be absent for more than four months, but less than one year, a special election is held to fill the temporary vacancy. When the senate member returns, he or she resumes the position in the senate. If it is necessary for a member to be absent for more than one year, or if the member is unable to complete the term of office for any reason, a special election is held to fill the unexpired term. [See 1580 VI for procedures covering student vacancies.]

Clause B. The chair of the Faculty Senate must declare a position vacant if a member is absent from three consecutive meetings unless the member has informed the chair of the senate in writing that he or she intends to participate fully in the activities of the senate in the future. When a position is declared vacant, the chair must notify the constituency concerned.

Section 8. Recall. The recall of a member of the senate may be initiated by a petition bearing the signatures of at least 10 percent, or five members, whichever is greater, of the membership of the particular constituency represented. The petition must be delivered to the chair of the senate. On the receipt of a valid petition, the chair calls a meeting of the faculty of the college or other unit and appoints a chair. Charges against the member are presented in writing and the member is given adequate opportunity for his or her defense. A two-thirds majority vote by secret ballot of the members of the college or other unit present at the meeting is necessary for recall, providing the members present constitute a quorum as defined in the bylaws of the college or other unit. In the event that the vote is to recall the senator, the member may appeal the case to the senate within 10 days. If the case is appealed and the senate affirms the recall, or if the recall stands for 10 days without appeal, the members of the college or other unit elect another senator. Regular procedures are followed in replacing the recalled person, except that the chair of the senate appoints the chair of the election committee of the college or other unit. During the interval between recall and the election of a replacement, the candidate who received the next highest number of votes in the most recent election acts as the

UI FACULTY-STAFF HANDBOOK
Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE
Section 1520: Constitution of the University Faculty

alternate in the senate with full vote.

ARTICLE VI--RULES OF ORDER. The rules contained in *Robert's Rules of Order Newly Revised* govern all meetings of the university faculty, other faculties, the Faculty Senate, and faculty committees in all cases to which they are applicable and in which they are not in conflict with this constitution, regents' policies, or any bylaws or rules adopted by any of those bodies for the conduct of their respective meetings. An action taken by the university faculty, a constituent or associated faculty, the Faculty Senate, or a faculty committee that conflicts with a previous action by that body takes precedence and, in effect, amends, in part or in full, the previous action.

ARTICLE VII--AMENDMENTS. This constitution may be amended by a two-thirds affirmative vote of the members of the university faculty, as defined in article II, section 1, in attendance at a regular meeting, a quorum being present. Proposed amendments must have been published in full in the agenda at least one week before the meeting or presented in writing at a meeting previous to the one at which the vote is to be taken. Amendments to this constitution are subject to review and approval by the president and by the regents.

Version History

Amended September 2022. Clerical edit to correct cross-reference.

Amended July 2022. University faculty meeting procedure moved from Article III to FSH 1420 Standing Rules of the University Faculty. Outdated information regarding remote participation removed from Article V.

Amended July 2019. Language from FSH 1566 was moved to a footnote to Article V, Section 2, and language in Article V, Section 3 was removed to address the restructure of the Faculty Secretary position.

Amended July 2015. Faculty Senate members were allowed to serve an additional term and language was added to Article I. Section 4 that affirms academic freedom in faculty governance and university programs and policies.

Amended July 2014. Editorial changes.

Amended July 2013. The Faculty Senate's membership was increased by one member to represent the Student Bar Association.

Amended July 2012. The Faculty Senate Center Senator's role/responsibility was clarified, staff membership increased to two, and the required annual venue determination removed.

Amended July 2011. The clinical faculty rank was added and language with respect to associated faculty voting was clarified.

Amended July 2009. The Faculty Council changed its name to Faculty Senate, a more common name used in academia, off campus faculty will have voting members on Senate at Coeur d'Alene, Boise, and Idaho Falls, and off-campus faculty will now be counted in the quorum at university faculty meetings with vote through designated sites and delegates given available technology (see 1640.94 and 1540 A).

Amended July 2006. Editorial changes.

Amended July 2005. Editorial changes.

Amended July 2001. Editorial changes.

Amended July 2000. Editorial changes

Amended July 1999. Editorial changes.

Amended July 1997. Editorial changes.

Adopted 1968.

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 7
Tuesday, October 3, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mittelstaedt, Murphy, Rode, Ramirez, Rinker, Roberson, Rode, Sammaruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, McKenna.
Absent: Raney (excused), Blevins (excused), Mischel, Reynolds, Strickland.

Guests/Speakers: Traci Craig, Blaine Eckles.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #6, September 26, 2023, were approved as distributed.

Chair's Report:

- Chair Gauthier gave an overview of today's program. He anticipates a constructive discussion ending with a vote about the UOPX survey.
- We are happy to have Dean of Students Blaine Eckles participate in a conversation about employee welfare.

Provost's Report:

- The Provost introduced Chris Parker, who will replace Cari Espenschade in supporting Faculty Senate. Welcome, Chris!
- The first faculty gathering at the ICCU Arena was a success. The next one will be on Wednesday, October 25, hosted by the College of Education, Health and Human Sciences.
- All Employee Required Training is open. It must be completed by November 1, 2023.
- The government shutdown has been avoided.

Committee Reports (vote):

- UCC 136: Interdisciplinary Studies (BA or BS) – Traci Craig, Associate Dean, College of Letters, Arts and Social Sciences
The BA/BS in Interdisciplinary Studies draws from existing courses across many programs. Some of those programs are available fully or partially online and this means that students can complete this degree entirely online. The program will be available to students online and face-to-face, according to their particular study plan. The Interdisciplinary Studies program provides a unique opportunity for a student to create a curriculum that meets their needs and desired goals. Students develop their unique curriculum by combining at least two fields of study into one program to allow them to pursue their career and educational goals. The primary impetus for this change is to indicate that the Interdisciplinary Program is both an online and face-to-face program.
There were no questions or comments.
Vote: 21/21 in favor. Motion passes.

Announcements and Communications:

- University of Phoenix Discussion

Task Force Creation - Survey for Opinions Surrounding University of Phoenix (vote)
At the last UFM, faculty expressed interest in a survey about the affiliation with UOPX. The questions to address are: does Senate want to move on with the survey? If so, what are the goals? The FSL idea is to task a small group of senators with developing a constructive survey. Both Chair Gauthier and Vice Chair Haltinner agree that it is important to know what concerns people have at this time. It is a complex situation for which we have no precedent. Some Senators reported that many faculty in their colleges are interested in such a survey. Some senators thought we should collect quantitative information on the percentage of employees who are in support of the affiliation, and to know how people understand this partnership.

The discussion moved to the best way to utilize the poll results. There seems to be agreement that the survey should be a way to collect opinions as well as a conversation starter. The Secretary recommended a simple and succinct survey, to capture, in a sensitive way, the degree of employees' enthusiasm or concern. The Provost reminded all that the administration is open to suggestions on how to best engage the university community to increase understanding about the affiliation.

Some senators emphasized that the UOPX affiliation shouldn't have been made without faculty and staff involvement – this is a major source of discontent that should be communicated to the President. Perhaps, a senator argued, the best way to move forward at this point is to make sure that people have accurate information and the transaction works.

More comments were offered in favor of a survey – it would help people feel heard. The Secretary suggested that a confidential poll to find out how people feel now, and why, would be a constructive and informative way to proceed.

After some additional discussion, it was moved (Long) to approve the creation of a task force charged with working on the survey. Seconded by Kirchmeier. Motion to amend (Roberson) with the inclusion of a timeline. Amendment accepted by Long.. Motion to vote on: *To approve the creation of task force for survey of opinions surrounding University of Phoenix* with the inclusion of the friendly amendment that the task force will report to Senate in two weeks.

Vote: 19/21 yes; 2/21 no. Motion passes.

Contact Vice Chair Haltinner if you wish to be on the task force.

- Charge for the IT committee

The purpose of this discussion is to identify topics that Faculty Senate would like the university-level IT committee to look into. Items which came up during last week discussion include: the need of local IT professionals instead of global OIT professionals; satisfaction with OIT handling researchers' specialized needs. It was also brought up that Idaho Falls competes with INL for staff, which makes it difficult to attract and retain highly qualified staff. Chair Gauthier that the idea of a faculty "mediator" brought up last week (to help find a collaborative solution in some of the special cases), could be something to consider.

Other senators wondered about the cost saving from removing phones. A senator pointed to the President's memo from July 13, 2023 (communicating his decision about APM 30.16) for information on the savings from centralized procurement.

A Senator reported that some faculty are requesting reimbursement for the use of their personal phones for university business.

Vice Chair Haltinner thinks that the broader issue is decision making without faculty input.

- Improving faculty's work environment and quality of life – a broad discussion on faculty welfare. Issues of concern include:
 - Safety on campus, particularly at night; increase of guns on campus; teaching safety to students; ability to reach 911 using Teams (this question is addressed in the list of [FAQ](#) about the transition to Microsoft Teams Voice). Dean of Students Blaine Eckles noted that in September (Kathy Benoit Safety Awareness Month), many improvements with campus lighting were implemented.
 - Sensitivity towards employees with young families should be used when scheduling meetings. Childcare remains a major problem for U of I employees with young children. Blaine Eckles' team is working on those problems, but it will take time.
 - Among the many mandatory trainings, there should be active shooter training. Cameras in classrooms to record display of guns, panic buttons in the TLC classrooms, self-defense classes, were also brought up. Blaine Eckles ensured the senators that display of guns is taken very seriously, even when accidental. As for self-defense, his office was not able to secure an instructor for a class, but they are now working on self-defense seminars, to reach out to as many people as possible. Dean Eckles suggested to include in the UOPX survey a question about major safety concerns.
 - A senator recalled the efforts undertaken last year by senate to improve working conditions for non-tenure track faculty. Senate will take this up again.
- In the remaining time, Provost Lawrence will address some of the questions about UOPX which could not be addressed last week. Parking on campus will be discussed at a later meeting.
 - A question was raised earlier about U of I exposure to UOPX liability. UOPX liability does not transfer to UI as a consequence of this affiliation – we are fully insulated from that. However, we may get a better bond rate if we guarantee more. The number which we might consider is up to \$9.9M. The choice will be made during the bonding process. It is possible that we don't get a better bond rate, or that the rate at that time is not worth taking on the risk. If we do choose to take on this liability to benefit the deal, the risk is very low as it would require an extreme scenario.
 - There was a question two weeks ago about whether U of I and UOPX online programs are unique to each other. The Provost displayed a slide with U of I and UOPX online programs side by side, showing little overlap. Note: this information is not the result of a thorough study of curriculums. The Provost put it together cross referencing same or similar program names in the catalogs.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Gauthier, Chapman). Meeting adjourned at 5:01pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 6

Tuesday, September 26, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mittelstaedt, Murphy, Rode, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, Strickland, McKenna.
Absent: Mischel, Raney, Reynolds

Guests: Teresa Amos

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #5, September 19, 2023, were approved as distributed.

Chair's Report:

- Today's guest is Teresa Amos, Deputy Director, IT Planning and Initiatives. Since COVID, technology and information technology have evolved very quickly and are having more impact on our activities. For example, video conferencing and artificial intelligence (AI) have a greater impact on teaching and learning, as well as on administrative tasks. I think we'll have an interesting discussion after Teresa's presentation on our short-term and long-term goals with technology.
- Last week, we had John Woods at Senate for a very insightful discussion. As we move forward with this affiliation, we see potential and, at the same time, we learn how our respective cultures are different.

Provost's Report:

- The possible government shutdown may impact federally funded programs. Please reach out to ORED if you have questions or need assistance.
- President Green would like to see a refocusing on student success initiatives. Several of our standing committees may be suitable, so we'll form a group with members from multiple committees, and Faculty Senate presence. A call for nominations will be sent soon.
- Borah Symposium:
 - Tonight, 7:00pm at the Kenworthy Theater. Film: "Putin's Attack on Ukraine: Documenting War Crimes."
 - Wednesday, September 27, at 7pm, International Ballroom, Plenary Address – Dirk Kempthorne, former Governor of Idaho and former US Secretary of the Interior.
- We will have a monthly gathering for faculty to meet informally across colleges, exchange ideas, build social relations and share intellectual interests. The first meeting will be Thursday, September 28, 4:30pm to 6:30pm in the ICCU Arena club room.
- Monday, October 17, at 7pm: Common Read Lecture. Author Florence Williams will be present.

Proposed Changes and Additions to the Faculty and Staff Handbook:

- FSH 1565 Academic Ranks and Responsibilities and FSH 1520 Constitution of the University Faculty
The Faculty Secretary gave a brief background for this proposal. At the Faculty Senate meeting of April 4, 2023, FAC presented revisions on:
 - FSH 1565 Academic ranks and responsibilities – A-1, cap on instructors, senior instructors and lecturers; and G-1 & G-2, to align with simultaneously revised FSH 1520.
 - FSH 1520 Constitution of the University Faculty Article II Section 1, to clarify that voting rights arise from faculty rank, so that non-faculty in administrative roles do not have voting rights, and to resolve conflict with FSH 1565 regarding the terms on which visiting faculty and lecturers are granted voting rights.

Both policies passed Senate on April 4, 2023. FSH 1565 was voted down at the May 2023, UFM, and FSH 1520 was rejected by President Green due to inconsistency with G-1, G-2.

Today, Faculty Senate Leadership is proposing a new motion: to approve the whole package as presented at the 04/04/2023 with the deletion of the changes made to FSH A-1.

Discussion:

Some senators detected inconsistency between FSH 1565 G-2 and FSH 1520 II-1: in FSH 1565 G-2, two different kinds of visiting faculty are defined, but not in FSH 1520 II-1. The Secretary disagrees: “*Visiting Faculty*” is defined in FSH 1565 G-2 as visitors who have a home institution to return to, and their voting rights are clearly stated in FSH 1520 II-1. From FSH 1565 G-2, “*a visiting appointee who does not hold a professorial rank elsewhere*” belongs to a different category and “*shall be subject to the requirements for lecturers to qualify for voting rights.*” The voting rights for lecturers and, thus, for “*a visiting appointee who does not hold a professorial rank elsewhere*” are stated in FSH 1520 II-1. A senator suggested including, also in FSH 1520 II-1, the definition of “*a visiting appointee who does not hold a professorial rank elsewhere.*”

After some discussion, Senator Long proposed to amend FSH 1565 G-2 to read: “**G-2. VISITING FACULTY.** *A designation that indicates that the appointee holds a regular teaching or research position at another institution.*” Seconded by Murphy.

Vote to approve the amendment: 22/22 yes, 0/22 no. Motion to amend passes.

Motion to approve the main motion with amendment (Long, Mittelsteadt).

Vote on the amended main motion: 22/22 yes, 0/22 no. Motion passes.

Announcements and Communications:

- Teresa Amos, Deputy Director, IT Planning and Initiatives
 - APM 30 Series Policies Updates
In response to a question from Chair Gauthier, Teresa Amos replied that OIT has no near-future plans to major updates on APM.
 - APM 30.16 and Exceptions
Although the matter with the Senate request to the President to temporarily suspend APM 30.16 is closed, there are still related issues that faculty are asking about. For instance: last year, Vice President Ewart said his team needed six months to go through the transition, after which point the system will work much better. It was requested that we have an update on how things are going? This request would be for the non-average needs involving, in particular, the researchers who are unhappy with APM 30.16, are satisfaction data being collected and tabulated? As a follow-up, the Secretary added that a standard customer satisfaction survey would not address the present question. It is a fact that over 90% of U of I employees are happy with the policies and procedures in APM 30.16. However, it is important to know how the non-standard

needs of faculty are being addressed, and whether the exceptions are being handled successfully and in a timely manner.

Chair Jean-Marc wondered whether a faculty “mediator” might be helpful in the resolution of critical cases, so that the final decision is not just a unilateral one. Teresa Amos will take this idea back to her team.

A Senator expressed concern about the often-lengthy process to access IT help, with no in-person help desk. Students who need to access software for their projects spend excessive time seeking and waiting for help, often for simple questions. The senator wishes there was a way to obtain quick help for simple problems, such as setting up a laptop or accessing software. Their students spend more time trying to access software than using it. Teresa Amos will see about resources to develop a support system for these circumstances.

A senator reported long waiting after submitting a ticket. The senator opined, The OIT centralized model, introduced for the sake of cost saving, seems to impact quality of service. He also stated, It’s hard to understand the responsibility structure and to identify the right person to contact. Teresa Amos will get clarification on tickets and timelines.

- Faculty Data Privacy

Faculty are concerned that applications such as Teams and Duo on private phones give Microsoft access to private data.

Teresa Amos explained that, if one uses Microsoft products (Outlook, Teams, etc..), the data stays within the U of I system. If one deletes the application from their private phone, the data disappears from the phone and stays on the university server. However, if one uses a native email application, the data on their personal cellphone and the university data become mingled, and the person may be at risk for public record request. In summary, if one uses Microsoft applications and signs in with U of I credentials, their data stays within the U of I protected environment.

- University of Phoenix (UOPX) Discussion

Provost Lawrence will address some of the questions submitted by faculty after last week’s John Woods’ presentation.

- If it’s not a merger, what is it?

It is definitely not a merger. It’s an arrangement that leaves both institutions independent and distinct. For example, there will be no combined logo. Our Governing Board created an entity, named “43 Education.” This is a non-profit organization that will purchase the assets of UOPX. 43 Education will have its Board of Directors, to act as UOPX Board of Directors. They will be appointed by our Board of Regents. When the transaction is done, the role of the former owners ends. Affiliation is addressed after all of the above is completed. At this time, the focus is on getting through the transaction.

- Why this affiliation?

It will benefit both institutions. For UOPX, the key element is that they want to become non-profit, which is very difficult to do on their own. The profit that went to their previous owners and the taxes paid as a for-profit will now benefit both institutions and can be invested in programs, students, etc. Also, we can learn from UOPX about online education and strategies to best serve non-traditional learners.

- What's the actual revenue stream we hear about? How does the money actually change hands?
It will be part of the stipulations in the agreement. Non-profit institutions can give money to each other, like what happens with our Foundation. How revenue stream moves to U of I will be stipulated in the agreement.
- What about potential risks and liabilities?
The liabilities will belong to 43 Education. The due diligence was extensive and calculated risks that were considered when finalizing the transaction. Provost Lawrence will come back with more information.
- Is it possible that the State will allocate less money to the U of I, because of the new revenue?
We can't predict what our legislature will do. They reconsider our budgets annually.
- Why U of I and not another, more comparable, institution?
Our missions align well. As a public and land grant institution, we serve the entire population, which connects with the non-traditional population UOPX is serving. This is a key common point we can capitalize on. We see opportunities to gain from this affiliation. They also see opportunities to learn from us through this affiliation.
- What are the net steps?
They include approval from accreditors, finalizing transactional details, the 43 Education Board of Directors has to be finalized; the bonding process; the closing process; then we enter a post-closing phase.

Time is coming to an end. On behalf of Vice Chair Haltinner, Chair Gauthier reminded everyone that many faculty have expressed interest in a survey about the degree of approval of the UOPX affiliation. Vice Chair Haltinner invites everyone to think about suitable questions and, generally, the nature of the survey, to be discussed next week.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Roberson, Long). Meeting adjourned at 4:59pm.

Respectfully Submitted,

Francesca Sammaruca

Change Type (Choose all that apply)

Change curriculum requirements

Description of Change

The BA/BS in Interdisciplinary Studies draws from existing courses across many programs. Some of those programs are available fully or partially online and this means that students can complete this degree entirely online. The program will be available to students online and face-to-face, according to their particular study plan.

Will this request have a fiscal impact of \$250K or greater?

No

Academic Level

Undergraduate

College

Letters Arts & Social Sciences

Department/Unit:

Letters Arts & Social Sciences

Effective Catalog Year

2024-2025

Program Title

Interdisciplinary Studies (BA or BS)

Program Credits

50

CIP Code

30.9999 - Multi-/Interdisciplinary Studies, Other.

Curriculum:

The Interdisciplinary Studies program provides a unique opportunity for a student to create a curriculum that meets their needs and desired goals. Students develop their unique curriculum by combining at least two fields of study into one program to allow them to pursue their career and educational goals.

Students in the Interdisciplinary Studies B.A. or B.S. degree program would select at least two fields of study. Areas of study may include a pre-existing minor curriculum, academic certificate, or specific courses to be selected in consultation with the program director and relevant faculty. Students will also take additional upper-division courses to complement the broader curriculum and meet upper-division degree requirements.

The requirements of the Interdisciplinary Studies major are:

- A one-page proposal outlining the student's career goals and explaining how the proposed curriculum will meet those desired career goals.
- The program director or the CLASS Dean's office must approve the study plan.
- A minimum of 50 credits in courses numbered 200 or above, including 36 credits in courses numbered 300 or above. It is recommended, however, that majors in interdisciplinary studies complete at least 50 credits in upper-division courses.
- INTR 401 Career and Leadership Development (2 credits)
- University requirements (see regulation J-3 (<https://catalog.uidaho.edu/general-requirements-academic-procedures/j-general-requirements-baccalaureate-degrees/>)) and CLASS requirements for either the B.A. or the B.S. degree.

Interested students should consult the CLASS Dean's office in Moscow for further information about this program.

A maximum of thirty credits earned in Experiential Learning may be applied toward a baccalaureate degree. See Regulation J-5-a.

Courses total 120 credits for this degree.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

No

Learning Objectives

1. The student will be able to learn and integrate across disciplinary lines.
2. The student will be able to communicate an understanding of a complex idea in written or verbal form.
3. The student will be able to articulate their career goals and their plans to achieve them.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The primary impetus for this change is to indicate that the Interdisciplinary Program is both an online and face-to-face program. The program relies on courses offered as part of other programs. Thus, students can develop a study plan that engages two (or more) disciplines where online coursework is available that would allow them to complete their degree entirely online. The Interdisciplinary Studies program should be added to the portfolio of programs that our online students can complete, and this proposal is being forwarded to that end.

Secondarily, we are also proposing a few minor curriculum changes that were identified during previous assessment cycles. We are dropping the requirement that faculty in chosen disciplines approve the plan. It adds a burden for both our students and faculty in other units with limited benefit to students. Students are still encouraged to seek the advice of faculty from disciplines, and plans often follow established curricular paths for minors/certificates. The dean's office/program director will still approve final study plans.

We are also dropping the requirement to have students include at least one discipline in CLASS. This change will allow the program to serve a broader population of students by allowing them to propose study plans that rely on fields from other colleges without having to add a CLASS discipline if it is not relevant to the student's goals.

Finally, as part of our assessment goals, we are adding the INTR 401 course as a requirement for the program and incorporating the senior capstone into the program curriculum directly.

Reviewer Comments

Theodore Unzicker (tunzicker) (Tue, 24 Jan 2023 23:38:38 GMT): Rollback: Tabled at UCC until it can be determined whether or not U of I would be permitted to offer a BAS degree and conform to SBOE policy.

Sydney Beal (sbeal) (Mon, 07 Aug 2023 15:36:59 GMT): Rollback: Rolled back for additional edits

Key: 136

2023 – 2024 Faculty Senate – Pending Approval**Meeting # 8**

Tuesday, October 10, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Raney, Rode, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Haltinner (excused), Ramirez, Reynolds

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #7, October 3, 2023, were approved as distributed.

Chair's Report:

- A reminder about Annual Enrollment. This is the annual opportunity to review and make changes to your benefits for the upcoming plan year. Annual Enrollment begins October 16th and ends November 7th at midnight pacific time.
<https://www.uidaho.edu/human-resources/benefits/annual-enrollment>
- IT concerns – Update
The IT committee has been charged. The frequent concerns we continue to receive about OIT policy and its impact on research are being forwarded to the IT committee.
- Faculty welfare concerns – Update
Last week, we discussed with Dean of Students Blaine Eckles safety concerns and safety trainings employees would like to see offered. Dean Eckles will come back next week with updates.
Last week we didn't have time to talk about parking issues. In the meantime, we charged the Parking Committee with looking into those.
- University of Phoenix - Task Force Update, Barb Kirchmeier
The following senators volunteered to serve on the task force: Barb Kirchmeier, Erin Chapman, Stefanie Ramirez, Florian Justwan and Vice Chair Haltinner. So far we have been brainstorming survey questions in a google doc – and soliciting questions from others (Jean-Marc and Torrey have offered some). We will be meeting this week to finalize the draft to present to senate at the next meeting. As discussed at senate, the goal is to identify concerns about the UOPX affiliation and hopefully use this information to inform discussions moving forward.
- On-going effort by the Committee on Committees – Update
The committee on committees has begun an audit of existing committees. We are surveying former committee chairs to assess: the workload of the committee (both in terms of time and mental load); the scope of the committees; whether the current make up is appropriate for the scope and equitable. For instance, we found that women are overrepresented by 5%, something to keep in mind in our next appointment process.

Addendum by the Secretary: The process of eliminating inactive committees started last year. We also want to refresh your memory about [FSH 1620 University-Level Committees](#), which needed revision. We hope to bring it back in a few weeks. It's out of the Committee on Committees and waiting for Policy Coordinator and General Counsel review.

Provost's Report:

- A reminder that midterm grades are due Monday, October 16. Please be sure to submit midterm grades for all of your classes.
- It is Homecoming Week. The Homecoming Parade is Saturday at 12:30pm. The football game starts at 7:30pm on Saturday, Oct.14. Some colleges are hosting special events this week. COS has a solar eclipse watch party, Saturday, October 14, 8:00 – 10:45am. CAA has an open house around their project of affordable housing in Moscow. CALS has a groundbreaking event for the Meat Science and Innovation Center from 4:00-7:00 pm. The complete Homecoming schedule: <https://www.uidaho.edu/events/signature-events/homecoming>
- UOPX Working Group nominations are due Friday, October 13. About 70 nominations have been received at this time. The nomination form is at: https://uidaho.co1.qualtrics.com/jfe/form/SV_bg50bV9m4qrqS7I

Announcements and Communications:

- University of Phoenix – Torrey Lawrence
Provost Lawrence is in the process of visiting all colleges to talk about UOPX and correct some common misconceptions.
Slides shown during this presentation are attached to these minutes.
In response to an earlier question by a senator, the Provost presented data from IPEDS (Integrated Postsecondary Education Data Statistics), covering the period from 2012 to 2021, for:
 - Enrollment at the four four-year institutions in Idaho: BSU, ISU, LCSC, U of I.
 - Total number of employees for the same regional peers.
 - Breakdown of all employees in faculty and non-faculty (as defined by IPEDS) at U of I.

Enrollment has been fairly stable. The numbers for ISU and UI are very close. On the other hand, the number of employees at U of I is substantially above the one at ISU. Extension and a larger number of research staff at U of I explain a large part of the difference. The number of employees follows the enrollment trends. The U of I data broken down in faculty and non-faculty shows a decrease in both groups around 2020, due to the budget cuts. (Note: postdoctoral researchers and some staff in extension offices are included in the non-faculty group.)

Similar charts were then presented for UOPX.

Enrollment data for UOPX between 2012 and 2021 reveals a significant reduction – from about 346,000 to 8,800. They refocused under new ownership and started a major downsizing (including the closure of all in-person locations). As a result, enrollment started to stabilize. The number of employees shows a large reduction for both faculty and non-faculty. Prior to the downsizing, the number of faculty was much larger than the number of staff. In recent years, those figures have become very similar. (Note: when comparing staff data from UI and UOPX, one should keep in mind that UOPX does not have some of our offices or units (such as Extension, Advancement, athletic department, etc.).

Discussion:

A senator asked why UOPX needs our involvement. Provost Lawrence replied that it's very difficult for a for-profit institution to become non-profit on its own. With our relationship, they will have greater ability to focus on their mission. Also, their goals and mission to serve non-traditional learners align with ours, as a public land-grant institution, and we are open to innovative ideas.

In response to a question as to whether U of I and UOPX online programs are unique to each other or there may be a competition, the Provost cited the slides he displayed last week ([attached to these minutes](#)) showing that UOPX online programs have little overlap with ours. (Disclaimer: this information is not the result of a thorough study of the two curriculums. The Provost put it together cross-referencing program names in the catalogs.) We do not plan to close any of our online programs as a result of this affiliation. Furthermore, we are offering programs in different ways. At UOPX, there are no traditional semesters or terms, which give students more flexibility. We have the opportunity to create pathways (such as, "4+1" MS degrees) across the two institutions.

A senator inquired about the possible impact on Engineering Outreach (EO). Provost Lawrence ensured that EO will continue. UOPX has a very established team to set up all aspects of online programs, and we can take advantage of their experience and capabilities for our online learning programs.

A senator expressed concerns about the Computer Science (CS) program. Their graduate admission committee recently denied admission to a student whose credits were all from UOPX. The committee didn't think that the UOPX offerings in CS met our standards. The senator expects some areas to be problematic and worries about the culture at UOPX. Provost Lawrence replied that it's important to look carefully at the curriculum. This is an issue that may happen with transfer students from any other school. Hundreds of UOPX credits have already been approved for transfer.

- Artificial Intelligence (AI) Task Force - Jean-Marc Gauthier
Chair Gauthier mentioned several on-going initiatives at U of I. For example, Barrie Robison and his team gave a great presentation about AI last Friday. The focus of the AI task force, when assembled, is to develop responsible uses of artificial intelligence and machine learning for academic activities. These are key elements to tackling some of the university's most challenging problems. ([Chair Gauthier proceeded to display the slides that are attached to these minutes.](#)) He also mentioned a virtual classroom project – a novel way of teaching and learning – that his team is working on.

Discussion:

A discussion followed on the importance of more open data availability across the university, and the need to facilitate data access, storage, and dissemination. Comments were in strong support of an early start of this initiative. It's a big undertaking that goes beyond teaching and learning and may potentially involve new policies. Collaborating with CETL's existing work in this area around teaching and learning aspects will be useful.

New Business:

- New Policy Tracking Schedule and Planning
The purpose is to develop a visual planning of what's coming to senate, what has been approved, where those policies are in the approval pipeline, if they are going forward, etc.

We will discuss this with Policy Coordinator Diane Whitney.

- **New Senate Networking Event**
This is a preliminary idea originating from some senators' "zoom fatigue." Perhaps we could raise funds to support an event for senators and others to meet in person and network. Suggestions are welcome.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:30pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Meeting # 7
Tuesday, October 3, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mittelstaedt, Murphy, Rode, Ramirez, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals, McKenna.
Absent: Raney (excused), Blevins (excused), Mischel, Reynolds, Strickland.

Guests/Speakers: Traci Craig, Blaine Eckles.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #6, September 26, 2023, were approved as distributed.

Chair’s Report:

- Chair Gauthier gave an overview of today’s program. He anticipates a constructive discussion ending with a vote about the UOPX survey.
- We are happy to have Dean of Students Blaine Eckles participate in a conversation about employee welfare.

Provost’s Report:

- The Provost introduced Chris Parker, who will replace Cari Espenschade in supporting Faculty Senate. Welcome, Chris!
- The first faculty gathering at the ICCU Arena was a success. The next one will be on Wednesday, October 25, hosted by the College of Education, Health and Human Sciences.
- All Employee Required Training is open. It must be completed by November 1, 2023.
- The government shutdown has been avoided.

Committee Reports (vote):

- UCC 136: Interdisciplinary Studies (BA or BS) – Traci Craig, Associate Dean, College of Letters, Arts and Social Sciences
The BA/BS in Interdisciplinary Studies draws from existing courses across many programs. Some of those programs are available fully or partially online and this means that students can complete this degree entirely online. The program will be available to students online and face-to-face, according to their particular study plan. The Interdisciplinary Studies program provides a unique opportunity for a student to create a curriculum that meets their needs and desired goals. Students develop their unique curriculum by combining at least two fields of study into one program to allow them to pursue their career and educational goals. The primary impetus for this change is to indicate that the Interdisciplinary Program is both an online and face-to-face program.
There were no questions or comments.
Vote: 21/21 in favor. Motion passes.

Announcements and Communications:

- University of Phoenix Discussion

Task Force Creation - Survey for Opinions Surrounding University of Phoenix (vote)

At the last UFM, faculty expressed interest in a survey about the affiliation with UOPX. The questions to address are: does Senate want to move on with the survey? If so, what are the goals? The FSL idea is to task a small group of senators with developing a constructive survey. Both Chair Gauthier and Vice Chair Haltinner agree that it is important to know what concerns people have at this time. It is a complex situation for which we have no precedent. Some Senators reported that many faculty in their colleges are interested in such a survey. Some senators thought we should collect quantitative information on the percentage of employees who are in support of the affiliation, and to know how people understand this partnership.

The discussion moved to the best way to utilize the poll results. There seems to be agreement that the survey should be a way to collect opinions as well as a conversation starter. The Secretary recommended a simple and succinct survey, to capture, in a sensitive way, the degree of employees' enthusiasm or concern. The Provost reminded all that the administration is open to suggestions on how to best engage the university community to increase understanding about the affiliation.

Some senators emphasized that the UOPX affiliation shouldn't have been made without faculty and staff involvement – this is a major source of discontent that should be communicated to the President. Perhaps, a senator argued, the best way to move forward at this point is to make sure that people have accurate information and the transaction works.

More comments were offered in favor of a survey – it would help people feel heard. The Secretary suggested that a confidential poll to find out how people feel now, and why, would be a constructive and informative way to proceed.

After some additional discussion, it was moved (Long) to approve the creation of a task force charged with working on the survey. Seconded by Kirchmeier. Motion to amend (Roberson) with the inclusion of a timeline. Amendment accepted by Long.. Motion to vote on: *To approve the creation of task force for survey of opinions surrounding University of Phoenix* with the inclusion of the friendly amendment that the task force will report to Senate in two weeks.

Vote: 19/21 yes; 2/21 no. Motion passes.

Contact Vice Chair Haltinner if you wish to be on the task force.

- Charge for the IT committee

The purpose of this discussion is to identify topics that Faculty Senate would like the university-level IT committee to look into. Items which came up during last week discussion include: the need of local IT professionals instead of global OIT professionals; satisfaction with OIT handling researchers' specialized needs. It was also brought up that Idaho Falls competes with INL for staff, which makes it difficult to attract and retain highly qualified staff. Chair Gauthier that the idea of a faculty "mediator" brought up last week (to help find a collaborative solution in some of the special cases), could be something to consider.

Other senators wondered about the cost saving from removing phones. A senator pointed to the President's memo from July 13, 2023 (communicating his decision about APM 30.16) for information on the savings from centralized procurement.

A Senator reported that some faculty are requesting reimbursement for the use of their personal phones for university business.

Vice Chair Haltinner thinks that the broader issue is decision making without faculty input.

- Improving faculty's work environment and quality of life – a broad discussion on faculty welfare. Issues of concern include:
 - Safety on campus, particularly at night; increase of guns on campus; teaching safety to students; ability to reach 911 using Teams (this question is addressed in the list of [FAQ](#) about the transition to Microsoft Teams Voice). Dean of Students Blaine Eckles noted that in September (Kathy Benoit Safety Awareness Month), many improvements with campus lighting were implemented.
 - Sensitivity towards employees with young families should be used when scheduling meetings. Childcare remains a major problem for U of I employees with young children. Blaine Eckles' team is working on those problems, but it will take time.
 - Among the many mandatory trainings, there should be active shooter training. Cameras in classrooms to record display of guns, panic buttons in the TLC classrooms, self-defense classes, were also brought up. Blaine Eckles ensured the senators that display of guns is taken very seriously, even when accidental. As for self-defense, his office was not able to secure an instructor for a class, but they are now working on self-defense seminars, to reach out to as many people as possible. Dean Eckles suggested to include in the UOPX survey a question about major safety concerns.
 - A senator recalled the efforts undertaken last year by senate to improve working conditions for non-tenure track faculty. Senate will take this up again.
- In the remaining time, Provost Lawrence will address some of the questions about UOPX which could not be addressed last week. Parking on campus will be discussed at a later meeting.
 - A question was raised earlier about U of I exposure to UOPX liability. UOPX liability does not transfer to UI as a consequence of this affiliation – we are fully insulated from that. However, we may get a better bond rate if we guarantee more. The number which we might consider is up to \$9.9M. The choice will be made during the bonding process. It is possible that we don't get a better bond rate, or that the rate at that time is not worth taking on the risk. If we do choose to take on this liability to benefit the deal, the risk is very low as it would require an extreme scenario.
 - There was a question two weeks ago about whether U of I and UOPX online programs are unique to each other. The Provost displayed a slide with U of I and UOPX online programs side by side, showing little overlap. Note: this information is not the result of a thorough study of curriculums. The Provost put it together cross referencing same or similar program names in the catalogs.

Adjournment:

The agenda not being completed, Chair Gauthier asked for a motion to adjourn. So moved (Gauthier, Chapman). Meeting adjourned at 5:01pm.

Respectfully Submitted,

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 9

Approved at Mtg #10
October 24, 2023

Tuesday, October 17, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mittelstaedt, Murphy, Ramirez, Rode, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals

Absent: Kirchmeier (excused), Blevins, Mischel, Raney, Reynolds

Guests/Speakers: Janis Johnson, Sydney Freeman, Ben Barton, Marco Seiferle-Valencia, Blaine Eckles, Lee Espey, Crystal Callahan

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #8, October 10, 2023, were approved as distributed.

Chair's Report:

- Chair Gauthier extended a warm welcome back to Policy Coordinator Diane Whitney. Her expertise was missed.
- In the spirit of the policy tracking mentioned at an earlier meeting, we plan to take a closer look at APM policies that impact faculty, and report to Senate before those policies move forward. For instance, the group of APM 45.xx policies deals with grants and research. Chair Gauthier is seeking one or two faculty who are familiar with research grant processes and are willing to read these policies and report to Senate. We look forward to working with the Policy Coordinator on this matter.
- Artificial Intelligence (AI) and Machine Learning (ML) is gathering a lot of interest! We received a large number of responses. The members of the AI/ML task force are: Bert Baumgaertner (Politics and Philosophy, Chair), Jagdish Patel (Chemical and Biological Engineering), Barrie Robison (Institute of Interdisciplinary Data Science, Director), Esteban Hernandez-Vargas (Math and Statistics), Douglas Habib, Center for Excellence in Teaching and Learning (CETL).
- UOPX survey: We acknowledge and thank Kristin and the members of the team for the great work produced in such a limited time.
- Reminders about scope of and motivation for the survey.
 - To give people the opportunity to voice their opinions.
 - We wish to honor the request for a survey voiced at the last UFM.
 - 94% of the senators voted (two weeks ago) in favor of a survey.
 - To provide constructive information to the administration and the working groups as we move forward.

Provost's Report:

- October 15 was the official census date for fall enrollment. We have the second largest incoming class (second to last year's), with 1,869 students. The total enrollment is at 11,849, a 3% overall increase. We are up 1.4% in retention rate, which is great news.

- There was great interest in joining the UOPX working groups – we received about 86 nominations/self-nominations, after removing duplicates. Soon we'll announce the names.
- "Common Read" event is tonight at 7:00pm in the Pitman Center International Ballroom.

Discussion:

Senator: There will be a Board for the "43 Education" entity. How will that Board be constituted? Provost's response: The Uof I Regents will appoint the members of "43 Education" board who will functional as the Board of Directors for UOPX. Most likely, our president and their president will be on it, and possibly a Regent. Also, indepent members are required. For continuity, one or two members of the current UOPX Board of Directors may be invited.

Committee Reports (vote)

- UCC 139: International Business Minor, drop – Stefanie Ramirez, Department of Business
Low student interest is a major reason for dropping the minor. In addition, efforts needed to truly provide a rich international business experience are beyond the available resources. Integrating international business topics and issues in existing courses, as we do, has been effective at providing exposure to the entire college student body. Supporting student-abroad opportunities by working to integrate those opportunities into degree requirements continues to provide a portion of the student body with additional international business experiences. There were no questions.
Vote: 21/21 yes. Motion passes.

- UCC 149: Black Studies Minor – Janis Johnson, English Department, Sydney Freeman, Leadership & Counseling
Changing degree name from Africana Studies Minor to Black Studies Minor. We believe this will make the degree more attractive and more accessible to more students. The term and concept "Africana" is confusing to many people. People tend to understand what "Black" means in relation to people and culture. There were no questions.
Vote: 21/21 yes. Motion passes.

The next two items will be discussed and voted on as a package.

- UCC 520: Chemical Addictions: Principals and Practice Academic Certificate – Ben Barton, Department Chair, Psychology and Communication
All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor.
- UCC 521: Professional Skills in Chemical Addictions Counseling Academic Certificate – Ben Barton, Department Chair, Psychology and Communication
All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor. There were no questions.
Vote: 20/20 yes. Motion passes.

Announcements and Communications:

- Spread Pay Task Force – Erin Chapman, School of Family and Consumer Sciences
The Spread Pay Task Force met on October 13, 2023, and will report to Senate shortly.
- State Board’s Instructional Materials Accessibility and Affordability Policy – Marco Seiferle-Valencia, General Library
The Open Campus Committee is in the process of bringing zero and very low cost *course marking* to the U of I. The SBOE Instructional Materials Accessibility and Affordability Policy defines “zero cost” as a total list price of \$0, and “very low cost” as a total list price of \$1 - \$30. In view of the SBOE policy and the growing interest in cost-conscious strategies, the plan is to see our first Zero and Very Low Cost marked courses in Fall 2024. By Idaho SBOE definition, *course marking* is the assignment of attributes to course sections that help students quickly identify important course information at registration time.
Research has shown that Open Textbooks (complete textbooks designed to replace traditional textbooks) are of similar quality to traditional texts and often better ranked by faculty and students. See <https://openedgroup.org/review> for the research. Equivalent learning performance between open and traditional textbooks, and a withdrawal rate 29% lower with open textbooks, have been reported. Marco cited many studies that demonstrate the benefits of open textbooks. Preliminary results of a Spring 2023 course material survey show high student desire for affordable course materials and faculty interest in developing OER. After bringing this new item from Library Affairs to Faculty Senate, the plan is to finalize supporting web content, tools for cost checking, etc. The communication should go out to department chairs in late October. The next steps involve: the Registrar office, departments workflow updating, process for quality control, beginning to apply cost attributes to course material for fall 2024 scheduling, and a student-facing campaign. First Zero and Very-Low Cost courses will appear at U of I in Fall 2024.

Discussion:

Different instructors require different material. Can the course marking be different depending on who is teaching the class? Marco responded that it’s indeed possible. Basically, it goes back to the difference between catalog and schedule. The catalog is the permanent metadata about the course but does not include an assigned instructor. On the other hand, course marking will happen at the scheduling level. So, the same class taught by different instructors can have different course markings on the schedule.

There was a question about the origin of the Open Campus Committee and absence of teaching faculty in the membership. Marco’s response: The library is already leading all the “open” activities. After the leadership transition in the office of the Vice Provost for Academic Initiatives, Dean Ben Hunter convened this committee to revisit the SB policy and our obligations. As for the absence of teaching faculty at the committee, Marco will be happy to visit with specific senate committees interested in this. He also noted that there is some time pressure because our peer institutions in the state are further along and some are offering course marking.

The provost added that this initiative is not a change in teaching. The group was charged with the implementation of a characterization of courses.

Scholars pay large sums to publish in open-access journals. A senator inquired about the funding source for publishing open textbooks. Marco’s reply: There are faculty who created interactive digital textbooks at no extra compensation. If these faculty connect with the library, we offer

Open Fellowship and are able to provide some honorarium. There are also big publishers of open books, such as OpenStack, affiliated with various universities. Libraries have significant funding through university, Microsoft, or private donors. There is strong institutional support also for peer review and, in some cases, the development of course software. There are multiple options, especially for textbooks at the lower-division undergraduate level.

Please contact Marco at marcosv@uidaho.edu for any questions.

- **Campus Safety Concerns** – Blaine Eckles, Vice President Student Affairs, Dean of Students; Lee Espey, Finance and Administration, Division Operation Officer
Many employees are interested in training for critical situations. We have received many requests for active shooter training, which we can offer together with MPD. We can also go to people's location on campus and teach them what to do in those crisis situations. Contact the Safety subcommittee to let them know what you would like to see offered that's not already covered. Reach out, ask, etc. We have many resources people may not know about.
Lee Espey:
Active shooter training, etc. (with MPD): More to come on how to access those trainings.
Discussion
What kind of training is being offered at the U of I Children Center, and how is that training/education being rolled down to the children at the center? Dean Eckles has recently spoken with the director of the center and asked her to prepare a communication to share with families.
- **University of Phoenix Draft Survey** – Jean-Marc Gauthier, Senate Chair, Kristin Haltinner, Senate Vice Chair.
Please provide constructive feedback on the questions that you think need improvement. The survey is a way to breakdown the complex situation with the University of Phoenix into several categories starting with academic issues. You can use the chat for feedback. An open document will also be available for you to provide feedback. The open doc is accessible to all senators through the link posted in the chat.
Kristin gave a brief background on the task force, followed by a brief discussion that articulated through the following points:
The survey will be administered through Qualtrics.
Should the respondent's college or unit be identified (see Question #18 in the draft)?
The draft can be shared with Staff Council.
The purpose of the survey: To give people the opportunity to voice their opinions. To collect constructive information for the administration and the working groups as we move forward.
The survey's results will be shared with the administration.

New Business:

There was none.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:36pm.

Respectfully Submitted,

Francesca Sammaruca

Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 8

Tuesday, October 10, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Raney, Rode, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Haltinner (excused), Ramirez, Reynolds

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #7, October 3, 2023, were approved as distributed.

Chair's Report:

- A reminder about Annual Enrollment. This is the annual opportunity to review and make changes to your benefits for the upcoming plan year. Annual Enrollment begins October 16th and ends November 7th at midnight pacific time.
<https://www.uidaho.edu/human-resources/benefits/annual-enrollment>
- IT concerns – Update
The IT committee has been charged. The frequent concerns we continue to receive about OIT policy and its impact on research are being forwarded to the IT committee.
- Faculty welfare concerns – Update
Last week, we discussed with Dean of Students Blaine Eckles safety concerns and safety trainings employees would like to see offered. Dean Eckles will come back next week with updates.
Last week we didn't have time to talk about parking issues. In the meantime, we charged the Parking Committee with looking into those.
- University of Phoenix - Task Force Update, Barb Kirchmeier
The following senators volunteered to serve on the task force: Barb Kirchmeier, Erin Chapman, Stefanie Ramirez, Florian Justwan and Vice Chair Haltinner. So far we have been brainstorming survey questions in a google doc – and soliciting questions from others (Jean-Marc and Torrey have offered some). We will be meeting this week to finalize the draft to present to senate at the next meeting. As discussed at senate, the goal is to identify concerns about the UOPX affiliation and hopefully use this information to inform discussions moving forward.
- On-going effort by the Committee on Committees – Update
The committee on committees has begun an audit of existing committees. We are surveying former committee chairs to assess: the workload of the committee (both in terms of time and mental load); the scope of the committees; whether the current make up is appropriate for the scope and equitable. For instance, we found that women are overrepresented by 5%, something to keep in mind in our next appointment process.

Addendum by the Secretary: The process of eliminating inactive committees started last year. We also want to refresh your memory about [FSH 1620 University-Level Committees](#), which needed revision. We hope to bring it back in a few weeks. It's out of the Committee on Committees and waiting for Policy Coordinator and General Counsel review.

Provost's Report:

- A reminder that midterm grades are due Monday, October 16. Please be sure to submit midterm grades for all of your classes.
- It is Homecoming Week. The Homecoming Parade is Saturday at 12:30pm. The football game starts at 7:30pm on Saturday, Oct.14. Some colleges are hosting special events this week. COS has a solar eclipse watch party, Saturday, October 14, 8:00 – 10:45am. CAA has an open house around their project of affordable housing in Moscow. CALS has a groundbreaking event for the Meat Science and Innovation Center from 4:00-7:00 pm. The complete Homecoming schedule: <https://www.uidaho.edu/events/signature-events/homecoming>
- UOPX Working Group nominations are due Friday, October 13. About 70 nominations have been received at this time. The nomination form is at: https://uidaho.co1.qualtrics.com/jfe/form/SV_bg50bV9m4qrgS7I

Announcements and Communications:

- University of Phoenix – Torrey Lawrence
Provost Lawrence is in the process of visiting all colleges to talk about UOPX and correct some common misconceptions.
[Slides shown during this presentation are attached to these minutes.](#)
In response to an earlier question by a senator, the Provost presented data from IPEDS (Integrated Postsecondary Education Data Statistics), covering the period from 2012 to 2021, for:
 - Enrollment at the four four-year institutions in Idaho: BSU, ISU, LCSC, U of I.
 - Total number of employees for the same regional peers.
 - Breakdown of all employees in faculty and non-faculty (as defined by IPEDS) at U of I.

Enrollment has been fairly stable. The numbers for ISU and UI are very close. On the other hand, the number of employees at U of I is substantially above the one at ISU. Extension and a larger number of research staff at U of I explain a large part of the difference. The number of employees follows the enrollment trends. The U of I data broken down in faculty and non-faculty shows a decrease in both groups around 2020, due to the budget cuts. (Note: postdoctoral researchers and some staff in extension offices are included in the non-faculty group.)

Similar charts were then presented for UOPX.

Enrollment data for UOPX between 2012 and 2021 reveals a significant reduction – from about 346,000 to 8,800. They refocused under new ownership and started a major downsizing (including the closure of all in-person locations). As a result, enrollment started to stabilize. The number of employees shows a large reduction for both faculty and non-faculty. Prior to the downsizing, the number of faculty was much larger than the number of staff. In recent years, those figures have become very similar. (Note: when comparing staff data from UI and UOPX, one should keep in mind that UOPX does not have some of our offices or units (such as Extension, Advancement, athletic department, etc.).

[Discussion:](#)

A senator asked why UOPX needs our involvement. Provost Lawrence replied that it's very difficult for a for-profit institution to become non-profit on its own. With our relationship, they will have greater ability to focus on their mission. Also, their goals and mission to serve non-traditional learners align with ours, as a public land-grant institution, and we are open to innovative ideas.

In response to a question as to whether U of I and UOPX online programs are unique to each other or there may be a competition, the Provost cited the slides he displayed last week ([attached to these minutes](#)) showing that UOPX online programs have little overlap with ours. (Disclaimer: this information is not the result of a thorough study of the two curriculums. The Provost put it together cross-referencing program names in the catalogs.) We do not plan to close any of our online programs as a result of this affiliation. Furthermore, we are offering programs in different ways. At UOPX, there are no traditional semesters or terms, which give students more flexibility. We have the opportunity to create pathways (such as, "4+1" MS degrees) across the two institutions.

A senator inquired about the possible impact on Engineering Outreach (EO). Provost Lawrence ensured that EO will continue. UOPX has a very established team to set up all aspects of online programs, and we can take advantage of their experience and capabilities for our online learning programs.

A senator expressed concerns about the Computer Science (CS) program. Their graduate admission committee recently denied admission to a student whose credits were all from UOPX. The committee didn't think that the UOPX offerings in CS met our standards. The senator expects some areas to be problematic and worries about the culture at UOPX. Provost Lawrence replied that it's important to look carefully at the curriculum. This is an issue that may happen with transfer students from any other school. Hundreds of UOPX credits have already been approved for transfer.

- Artificial Intelligence (AI) Task Force - Jean-Marc Gauthier
Chair Gauthier mentioned several on-going initiatives at U of I. For example, Barrie Robison and his team gave a great presentation about AI last Friday. The focus of the AI task force, when assembled, is to develop responsible uses of artificial intelligence and machine learning for academic activities. These are key elements to tackling some of the university's most challenging problems. ([Chair Gauthier proceeded to display the slides that are attached to these minutes.](#)) He also mentioned a virtual classroom project – a novel way of teaching and learning – that his team is working on.

Discussion:

A discussion followed on the importance of more open data availability across the university, and the need to facilitate data access, storage, and dissemination. Comments were in strong support of an early start of this initiative. It's a big undertaking that goes beyond teaching and learning and may potentially involve new policies. Collaborating with CETL's existing work in this area around teaching and learning aspects will be useful.

New Business:

- New Policy Tracking Schedule and Planning
The purpose is to develop a visual planning of what's coming to senate, what has been approved, where those policies are in the approval pipeline, if they are going forward, etc.

We will discuss this with Policy Coordinator Diane Whitney.

- **New Senate Networking Event**
This is a preliminary idea originating from some senators' "zoom fatigue." Perhaps we could raise funds to support an event for senators and others to meet in person and network. Suggestions are welcome.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:30pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Program Inactivation Proposal

Date Submitted: Wed, 31 Aug 2022 00:26:06 GMT

Viewing: 139 : International Business Minor

Last edit: Tue, 03 Oct 2023 18:14:57 GMT

Changes proposed by: Daniel Eveleth

Final Catalog

2024-2025

What is the student impact, if any?

Little impact on students. Interest in the minor has been low; and opportunities to learn about international business are available in other program-courses.

What will be the last semester of the teach-out period?

There are currently no students enrolled in the minor, and we have been advising students against enrolling in it. Thus, we expect the number to stay at zero.

What is the teach-out plan?

As stated above, there are no students enrolled in the minor; a pattern that has been true for some time. Thus, there is no need for a teach-out plan.

Rationale for Inactivation

Low student interest is a major reason for dropping the minor. In addition, efforts needed to truly provide a rich international business experience are beyond the available resources. Integrating international business topics and issues in existing courses, as we do, has been effective at providing exposure to the entire college student body, and supporting student abroad opportunities by working to integrate those opportunities into degree requirements continues to provide a portion of the student body with additional international business experiences.

Program Title

International Business Minor

CIP Code

52.1101 - International Business/Trade/Commerce.

Curriculum:

Note: This minor is limited to students majoring in the College of Business and Economics.

| Code | Title | Hours |
|---|---|--------------|
| BUS 490 | Strategic Management | 3 |
| ECON 446 | International Economics | 3 |
| FIN 381 | International Finance | 3 |
| MKTG 482 | International Marketing | 3 |
| POLS 237 | Introduction to International Politics | 3 |
| Select one of the following courses or another elective approved by the International Business Minor Advisor: | | 3 |
| ECON 447 | International Development Economics | |
| FLEN 307 | Institutions of the European Union | |
| MHR 418 | Managing Organization Design and Leading Changes | |
| POLS 440 | International Organizations and International Law | |

Total Hours**18**

Foreign language mastery is required equivalent to completion of the introductory and intermediate courses, and an upper-division course in a language. A semester of study and/or internship in another country is recommended. CBE students currently have direct access to academic programs at Växjö University (Sweden), Ecole Supérieure de Commerce de Chambéry (France), Pontificia Universidad Católica del Ecuador, Griffith University (Australia), Fachhochschule für Technik und Wirtschaft Berlin (Germany), University of Zaragoza (Spain), Haagse Hogeschool (The Netherlands), the Southern Denmark Business School, and the University of Newcastle upon Tyne (United Kingdom). CBE students also have access to programs in Australia, Chile, France, Italy, and Spain through the University Studies Abroad Consortium, and to numerous schools in various countries through the International Student Exchange Program. Internships are developed on an ad hoc basis.

Courses to total 18 credits for this minor

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Coeur d'Alene

Student Learning Outcomes

Have learning outcomes changed?

No

Learning Objectives

1. Students will be able to communicate effectively about topics related to Africa and the African diaspora.
2. Students will be able to explain their positionality in relation to Africa and the African diaspora.
3. Students will be able to discuss the history and contemporary experiences of people in Africa and the African diaspora and their contribution to the global community from more than one disciplinary perspective.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

We believe this will make the degree more attractive and more accessible to more students. The term and concept "Africana" is confusing to many people. People tend to understand what "Black" means in relation to people and culture.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. The student will demonstrate knowledge about the extent of substance abuse in society, the implications of substance abuse beyond the individual, and approaches to addiction treatment.
- 2.#The student will be able to understand ethical standards and ethical dilemmas, and how ethics relates to personal, legal, and professional standards.
- 3.#The students will understand strategies and tools for individual and group counseling.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Signature assignments will be embedded in courses. Students' performance on signature assignments will be used to determine the percentages of students who failed to meet, met, or exceeded expectations articulated in the program learning outcomes.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be reviewed during the annual assessment cycle and used to refine course materials.

What direct and indirect measures will be used to assess student learning?

Signature assignments embedded in courses will serve as direct measures.

When will assessment activities occur and at what frequency?

All learning outcomes will be assessed at least once during a three-year period.

Student Learning Outcomes

Learning Objectives

1. The student will demonstrate knowledge about the extent of substance abuse in society, the implications of substance abuse beyond the individual, and approaches to addiction treatment.
2. The student will be able to understand ethical standards and ethical dilemmas, and how ethics relates to personal, legal, and professional standards.
3. The students will understand strategies and tools for individual and group counseling.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor.

Reviewer Comments

Charles Tibbals (ctibbals) (Wed, 06 Sep 2023 14:57:55 GMT): Rollback: Rolled back at Ben's request

Linda Lundgren (lindalundgren) (Thu, 21 Sep 2023 22:44:25 GMT): Chemical Addictions: Principles and Practice position description received from Benjamin Barton on 9/21/23 (below): The Chemical Addictions: Principles and Practice certificate comprises four of the eight courses in the Addictions minor, which is among the programs in Psychology and Communication. This certificate will serve all students who are completing the minor. However, the certificate will be especially useful for students who are interested in the addictions subject area but do not want to pursue the entire curriculum in the Addictions program. The curriculum for this certificate comprises courses already active and in faculty members' rotations. No new faculty must be hired to support this certificate and no resources are required for online course development.

Rebecca Frost (rfrost) (Tue, 03 Oct 2023 18:16:55 GMT): Adjusted course listing to meet catalog standards.

CIP Code

34.0104 - Addiction Prevention and Treatment.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

Yes

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

Financial impact will comprise tuition and fees generated by students enrolling in courses.

Curriculum:

All required coursework must be completed with a grade of 'C' or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|-------------|---|--------------|
| PSYC 475 | Professional Ethics in Addictions Counseling | 3 |
| PSYC 476 | Relapse Prevention in Chemical Addictions Counseling | 3 |
| PSYC 478 | Individual and Group Therapy Techniques in Chemical Addictions Counseling | 3 |
| PSYC 482 | Client Screening, Assessment, and Placement | 3 |

Total Hours**12**

Courses to total 12 credits for this certificate.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. The student will demonstrate knowledge about the extent of substance abuse in society, the implications of substance abuse beyond the individual, and approaches to addiction treatment.
- 2.#The student will be able to understand ethical standards and ethical dilemmas, and how ethics relates to personal, legal, and professional standards.
- 3.#The students will understand strategies and tools for individual and group counseling.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Signature assignments will be embedded in courses. Students' performance on signature assignments will be used to determine the percentages of students who failed to meet, met, or exceeded expectations articulated in the program learning outcomes.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be reviewed during the annual assessment cycle and used to refine course materials.

What direct and indirect measures will be used to assess student learning?

Signature assignments embedded in courses will serve as direct measures.

When will assessment activities occur and at what frequency?

All learning outcomes will be assessed at least once during a three-year period.

Student Learning Outcomes

Learning Objectives

1. The student will demonstrate knowledge about the extent of substance abuse in society, the implications of substance abuse beyond the individual, and approaches to addiction treatment.
- 2.#The student will be able to understand ethical standards and ethical dilemmas, and how ethics relates to personal, legal, and professional standards.
- 3.#The students will understand strategies and tools for individual and group counseling.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor.

Reviewer Comments

Linda Lundgren (lindalundgren) (Thu, 21 Sep 2023 22:41:27 GMT): Program Description received from Benjamin Barton on 9/21/23 (below) The Professional Skills in Chemical Addictions Counseling certificate comprises four of the eight courses in the Addictions minor, which is among the programs in Psychology and Communication. This certificate will serve all students who are completing the minor. However, the certificate will be especially useful for students who are interested in the addictions subject area but do not want to pursue the entire curriculum in the Addictions program. The curriculum for this certificate comprises courses already active and in faculty members' rotations. No new faculty must be hired to support this certificate and no resources are required for online course development.

Rebecca Frost (rfrost) (Tue, 03 Oct 2023 18:18:21 GMT): Adjusted to catalog standards.

Key: 521

Safety Programming

University of Idaho

Violence Prevention Programs

Voices for Change--STUDENTS

- All new incoming and transfer students under the age of 24 are assigned to this online Safety Program: <https://www.uidaho.edu/student-affairs/dean-of-students/violence-prevention/required-safety-program>
- There is a specific student-athlete refresher course that all athletes are also required to complete.

Katy Benoit Campus Safety Awareness Month--ANYONE

- A month of intentional programming and outreach relating to campus safety and wellbeing, including a safety resource fair, keynote, personal safety/self-defense, and so much more: <https://www.uidaho.edu/events/safety-month>
 - Campus Safety Resource Fair
 - Green Dot for Employees
 - Keynote Forum on Safety
 - Stalking in Diverse Communities
 - Personal Safety & Vigilance Education Training (Multiple Dates)
 - Campus Safety Light Audit
- Though some things shift between years, many of the events/programs occur annually.

Sexual Assault Awareness Month--ANYONE

- Another month of intentional programming to mobilize our community around sexual assault awareness and prevention: <https://www.uidaho.edu/student-affairs/dean-of-students/violence-prevention/events/saam>

Other Awareness Months

- We also do tabling/outreach:
 - Domestic Violence Awareness Month (October)
 - National Stalking Awareness Month (January)
 - Healthy Relationships Month (February)

On-Demand Trainings—STUDENTS OR EMPLOYEES

- Anyone on campus can request us to come in and provide trainings/workshops on Power-Based Violence: <https://www.uidaho.edu/student-affairs/dean-of-students/violence-prevention/presentations>
- The most prominent of these is **Green Dot**, our Bystander Intervention Program: <https://www.uidaho.edu/student-affairs/dean-of-students/violence-prevention/green-dot>

In the Works

- **Campus Safety Focus Groups** with students from diverse backgrounds.
 - *Suggest faculty also do focus groups with faculty on what safety training they would like to see/have*
- An **Empowerment Self-Defense Committee** has met a couple of times to look at the viability of starting a for-credit class on campus.--**ANYONE**
 - This is a more evidence-based program that encompasses boundary setting, verbal de-escalation, and much more in addition to the physical self-defense skills.
 - Welcome others to join the committee. Can have a faculty representative. We NEED faculty.
 - Email Cori Damron at cdamron@uidaho.edu or askjoe@uidaho.edu

Campus Safety: <https://www.uidaho.edu/infrastructure/pss> --**ANYONE**

- 24-hour/365 Day a year campus safety patrols

UI Policy: Creation and Change

FSH 1460 University-wide Policy Development

Contains all procedure for
policy development and
approval.

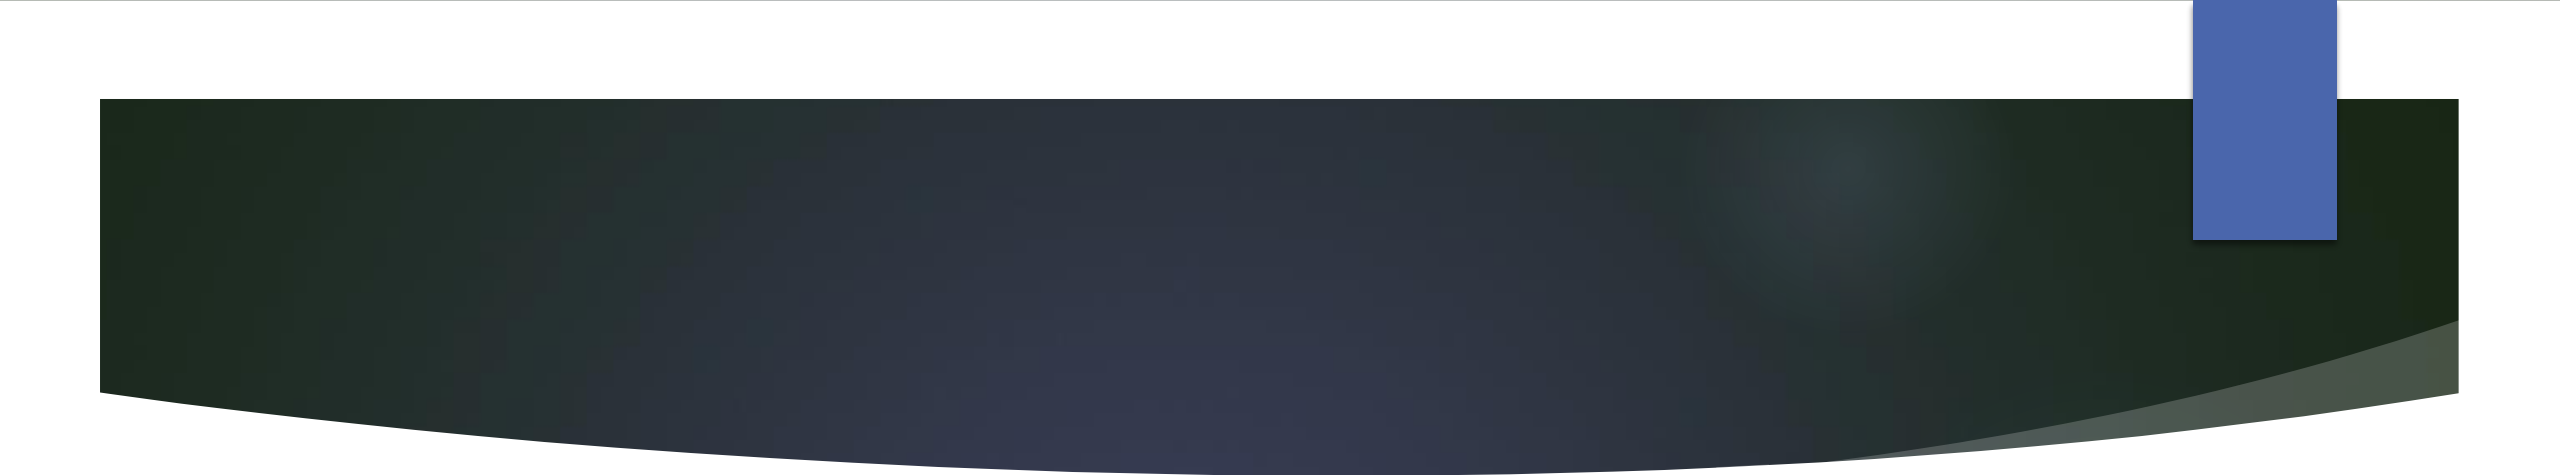

What is a policy?

Must

1. Advance our mission, **or**
2. Be needed for legal compliance

And do one or more of the following:

- Reduce institutional risk
- Promote efficiency
- Have a significant impact on UI

Faculty-Staff
Handbook
VS
Administrative
Procedures
Manual

- ▶ Confusing names for historical reasons
- ▶ Both contain policy and procedure
- ▶ Approval pathways depend on whether subject matter is within the purview of faculty governance

The Big Picture

- 376 policies and procedures
- SBOE requires system for regular review
- Policy ownership system
- Need to prioritize

Policy Approval Pathways: Overview

1. “Normal” approval process:
FSH 1460
2. Minor amendment
3. Interim policy
4. Emergency actions during
communicable disease
outbreak: FSH 6990

1. Notify the Policy Director of Your Plan

The Policy Director can help with

- ▶ Early input and advice
- ▶ Preventing duplicative revisions
- ▶ Drafting
- ▶ Ensuring review by all stakeholders

2. Request the official document of an existing policy

Policy revisions using text copied from website will be rejected 😞

3. Follow best practices for policy drafting

- ▶ Use the policy development materials on the University Policy website:
 - ▶ Policy Manual
 - ▶ Guidance for Policy Owners
 - ▶ Policy Template
- ▶ Learn from other institutions. No such thing as plagiarism in policy.
- ▶ Check that your revisions don't conflict with related policies or procedures, including Board policy.
- ▶ Consult with all stakeholders.
- ▶ Resist the urge to address every possibility!

4. Once you're done developing the policy

Email the policy and cover sheet to the Policy Director.

The Policy Director will

- ▶ Review for drafting problems and conflicts with other policies
- ▶ Submit for legal review
- ▶ Ensure appropriate stakeholder input

The
Approval
Process:
**Policies
within
purview of
faculty
governance**

Faculty Senate

University Faculty Meeting

President

For some policies, State Board of Education

Back to Policy Director for publication

The Approval
Process:
**Policies *not*
within purview
of faculty
governance**

To Faculty Senate and Staff Council for
Review and Comment Only

University Faculty Meeting (FYI only)

President

For some policies, State Board of Education

Back to Policy Director for publication

Minor Amendments

- ▶ No approvals needed when change is for
 - ▶ Making policy consistent with controlling legal authority, or
 - ▶ Making clerical changes
- ▶ Just email request to Policy Director

Interim policies

- ▶ Used when there's not enough time to complete the standard review and approval process
- ▶ Only to address legal requirements or significant institutional risk
- ▶ Have to include timeline for completing standard review and approval

Questions?

Diane Whitney

Director of University Policy

University Compliance Coordinator

Office of the Provost and Office of General Counsel

Uofl-policy@uidaho.edu

Draft Survey Questions

This survey is attended to assess employee levels of excitement, concern, and other sentiments regarding the affiliation with the University of Phoenix. It is being sent out by faculty senate due to employee request.

We will not be collecting any identifying data and your responses will remain confidential.

1. *How knowledgeable are you about the University of Phoenix and its programs?*

Not at all knowledgeable
Not very knowledgeable
Fairly Knowledgeable
Very Knowledgeable

2. *How knowledgeable are you about the details of the affiliation agreement with the University of Phoenix?*

Not at all knowledgeable
Not very knowledgeable
Fairly Knowledgeable
Very Knowledgeable

3. *Did you attend one of Provost Lawrence's listening sessions in early October?*

Yes
No

4. *What have been your primary sources of information about the proposed University of Phoenix affiliation?*

Local/state news reports (Lewiston Tribune, Idaho Statesman, Idaho Ed News, etc.)
National news reports (Chronicle of Higher Education, Inside Higher Ed, etc.)
University of Idaho's FAQ
University of Idaho's written communications
University of Idaho's town halls
University of Idaho's informational sessions with University of Phoenix administrators
Provost Lawrence's sessions with colleges in October
Other (please specify)

5. *To what degree do you support the University of Idaho affiliation with the University of Phoenix?*

Strongly Opposed
Somewhat Opposed
Neutral
Somewhat Support
Strongly Support

Please rate the degree to which you agree with the following statements

6. *University employees were adequately involved in the decision to affiliate with the University of Phoenix.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

7. *The affiliation with the University of Phoenix will positively impact my unit.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

8. *The affiliation with the University of Phoenix will negatively impact my unit.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

9. *The University of Idaho's affiliation with the University of Phoenix is a smart way to bolster us as we approach the "enrollment cliff."*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

10. *The University of Idaho's affiliation with the University of Phoenix will have a positive impact on UI.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

11. *The University of Idaho's affiliation with the University of Phoenix will have a negative impact on UI.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

12. *The [FAQ](#) was helpful in answering my questions about the affiliation.*

Strongly Disagree
Somewhat Disagree
Neutral
Somewhat Agree
Strongly Agree
Unsure

13. *Moving forward, the University of Idaho and the University of Phoenix should pursue joint initiatives in the following areas:*
(Strongly Disagree, Somewhat Disagree, Neutral, Somewhat Agree, Strongly Agree, Unsure)

- Student Recruitment
- Delivery of Undergraduate Curricula
- Professional Development for Faculty
- Delivery of Academic Certificates
- Instructional Design
- Student support services
- Registration processes
- Technology
- Data storage
- Other (Fill in space)

**14. I am looking forward to potential benefits of this affiliation such as:
(Yes/No/Don't Know)**

- Improved access to online teaching and learning technology
- Financial security for UI
- A solution to the “enrollment cliff”
- Access to undergraduate education and certificate programs for UI students
- Professional opportunities for students
- Access to new populations of students
- The new line of income for the University of Idaho
- The opportunity to collaborate with employees at the University of Phoenix
- Other (Fill in space)

**15. I remain concerned about the following aspects of the affiliation:
(Yes/No/Don't Know)**

- The financial risk posed to UI
- The impact on UI's reputation
- The prestige of my program
- Our goal of achieving R1 status
- The status of online programs offered by both institutions
- The status of UI's commitment to online education
- The lack of involvement by faculty in this decision
- The lack of involvement by staff in this decision
- The ethical behaviors of for-profit universities
- Other (Fill in space)

16. What else would you like to tell us about your thoughts regarding the University of Idaho and University of Phoenix affiliation?

17. What is your role at the University of Idaho?

Classified Staff
Exempt Staff
Temporary Help
Assistant Professor
Associate Professor
Full Professor
Clinical Assistant Professor
Clinical Associate Professor
Clinical Full Professor
Instructor
Senior Instructor
Lecturer
Visiting Professor
Research Assistant Professor
Research Associate Professor
Research Full Professor
Other (please specify): _____

(IF FACULTY)

18. What College or Unit do you work in?

Agricultural and Life Sciences
Art and Architecture
Business and Economics
Education, Health and Human Sciences
Engineering
Graduate Studies
Law
Letters, Arts and Social Sciences
Natural Resources
Science
WWAMI
Counseling & Testing Center
University Library
Other

2023 – 2024 Faculty Senate – Pending Approval**Meeting # 10**

Tuesday, October 24, 2023, 3:30 pm – 5:00 pm

Zoom only

**Approved at Mtg #11
October 31, 2023**

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Tibbals.

Absent: Haltinner (excused), Miller, Roberson, Schwarzlaender (excused), Strickland (excused)

Guests/Speakers: Ken Udas

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #9, October 17, 2023, were approved as distributed.

Chair's Report:

- The UOPX survey is likely to attract a significant amount of interest. It's important to exercise caution. Please remind your constituents not to include any identifying information about themselves, their units, or others. Responses containing personal information may be discarded. The survey should be constructive and usable.
- During the New Business phase of this meeting, we'll hear from Steve Mills, Director of Parking and Transportation Services, and Tao Xing, Chair of the Parking Committee, concerning on-campus parking issues.

Provost's Report:

- The October Faculty Gathering will be held on October 25, 2023, from 4:30-6:30 PM on the first floor of the Education, Health and Human Sciences building (open area on the first floor), hosted by Dean Blevins.
- Leadership Weekend is coming up. Many of our Advisory Boards will be on campus Thursday, Friday and Saturday. The game against Montana State is on Saturday at 1PM.
- November 1 is the deadline for completing the All Employee Required Training.

Committee Reports (vote):

- UCC 519: Aerospace Certificate - Vibhav Durgesh, Mechanical Engineering
The undergraduate aerospace certificate is intended to provide students with a foundational understanding of the principles and practices of aerospace engineering. The certificate program is designed to enhance students' knowledge and skills in aerospace engineering and to prepare them for careers in the aerospace industry or for advanced studies in the field. It may also be helpful for students who are interested in pursuing related fields such as mechanical engineering, electrical engineering, or computer science. There has been a growing interest from engineering students in specializing in aerospace engineering, and thus we expect this certificate to enhance the recruitment of students into the engineering programs at the University of Idaho. Furthermore, the certificate will help meet the employment needs of our industry partners.

Discussion:

There were no questions.

Vote: 100% in favor. Motion passes.

Other Voting Items

- University of Phoenix Revised Survey

Chair Jean-Marc asked the senators to place in the Zoom chat the numbers corresponding to those questions which they would like to see discussed, amended, or removed.

Discussion:

Questions # 5, 6, 7, 10 were placed in the chat.

Questions #6, 7: They ask about expected impact on units. Provost Lawrence argued that there will be no impact on units, thus those questions are unnecessary. Some of the task force members explained the rationale for including them. For instance, some units that teach classes also offered by UOPX worry that the affiliation may negatively impact their classes.

At this point, task force members wondered whether the on-going discussion suggests that we should revisit the purpose of the survey. The Secretary noted that the purpose is provided in the paragraph heading the survey.

The discussion moved to Question #5, which asks whether university employees believe they *were appropriately involved in the decision to affiliate with the University of Phoenix, as determined by existing University of Idaho policies*. A senator worries that the presence of the links to the policies makes the question appear “leading.” A task force member explained that the inclusion of the policies resulted from additional feedback received after last week’s meeting. Also, it may increase employee’s awareness of university policies and processes. Some senators felt strongly that Question #5 is very important and is part of the reasons why the survey was developed. The Secretary disagrees. While the question is indeed very important and goes to the core of shared governance at U of I, it does not fall under the goals stated in the headings. In the interest of the survey, she suggested avoiding questions the answers to which may be influenced by, for instance, feelings of resentment.

Motion by Long, seconded by Tibbals: *Move to accept Question #5 as submitted.*

Vote: 14/18 yes; 4/18 no. Motion passes.

Motion by Mittelstadt, seconded by Long: *Move to accept the survey as submitted. (Possibly with some minor rewording.)*

Vote: 17/20 yes; 3/20 no. Motion passes.

Announcements and Communications:

- CAPE – Ken Udas, Vice Provost for Digital Learning

CAPE (Continuing Adult and Professional Education) is an entity or function that provides services to non-traditional education programs providers, including basic capacity for infrastructure such as information systems for administrative support, promotion and marketing of the CAPE portfolio, and also for new programs market analyses and forecasting. These services are generally available for traditional programs, but not for non-traditional programs. Along with his team and with the help of other colleagues, such as Barb Kirchmeier, Erin Doty, and Brook’s team in EHHS, they have worked to provide support. The goal is to offer a three-year pilot program starting in early 2024, with 30 courses mostly from EHHS, and eventually open it to colleges and units interested in these services. The financial model covers 3 years. For the first year, the offerings will be supported by P3 funds, to get things off the ground. For the second and third years, it should be a self-sustained effort. For the second year, we’ll cap the fee at 10% of revenue. After that, the fee may go above or below 10%, depending on cost and

revenue. Hopefully, by year #3 there is enough activity to keep the fee low relative to the services. This effort will make U of I competitive with BSU, ISU, Utah State, Arizona, and more. Vice Provost Udas is happy to share the full version of today's presentation through Faculty Senate distribution.

Discussion:

A discussion followed about possible overlap with UOPX and why not wait until we can work in partnership with UOPX. Waiting for UOPX is not a viable option because there is an immediate need for these services. In the college of EHHS they are already working on initiatives such as those that Ken Udas talked about, but we need a more robust system soon. CETL is involved.

New Business:

- Chair Gauthier introduced Steve Mills Director, Parking and Transportation Services and Tao Xing, Chair of Parking Committee.

Below is a list of talking points, to be expanded at a later time:

- Budget model for parking permit charges
- Equity of permit cost. Should it be salary-based?
- Availability of and cost of parking for part-time lecturers/adjuncts
- Status of station on-campus to charge electric bikes and cars
- Parking permit cost:
 1. Regarding questions about parking permit costs, here is a link to the survey Parking and Transportation Services conducted in 2020 of peer-institution parking permit pricing: <https://www.uidaho.edu/-/media/UIDaho-Responsive/Files/infrastructure/Parking/future-plans/peer-institution-permit-prices-fy18.pdf>
 2. The link below will take the reader to the Budget Books pages for Auxiliary Services; Parking and Transportation Services begins on page 56.
[FY2024 Auxiliary Enterprise Budget Book Excluding Athletics \(uidaho.edu\)](https://www.uidaho.edu/infrastructure/parking/future-plans/peer-institution-permit-prices-fy18.pdf)

There was a brief discussion about reciprocal parking agreement with WSU. The WSU & UI Reciprocal Parking Agreement can be found at: <https://transportation.wsu.edu/wsu-ui-permits>
Additional options: There are visitor parking permits, daily or for ten (consecutive or non-consecutive) days. With those, one can park anywhere on campus.

<https://www.uidaho.edu/infrastructure/parking/visitors-community/visitors>

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:58pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 9

Tuesday, October 17, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mittelstaedt, Murphy, Ramirez, Rode, Rinker, Roberson, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals

Absent: Kirchmeier (excused), Blevins, Mischel, Raney, Reynolds

Guests/Speakers: Janis Johnson, Sydney Freeman, Ben Barton, Marco Seiferle-Valencia, Blaine Eckles, Lee Espey, Crystal Callahan

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #8, October 10, 2023, were approved as distributed.

Chair's Report:

- Chair Gauthier extended a warm welcome back to Policy Coordinator Diane Whitney. Her expertise was missed.
- In the spirit of the policy tracking mentioned at an earlier meeting, we plan to take a closer look at APM policies that impact faculty, and report to Senate before those policies move forward. For instance, the group of APM 45.xx policies deals with grants and research. Chair Gauthier is seeking one or two faculty who are familiar with research grant processes and are willing to read these policies and report to Senate. We look forward to working with the Policy Coordinator on this matter.
- Artificial Intelligence (AI) and Machine Learning (ML) is gathering a lot of interest! We received a large number of responses. The members of the AI/ML task force are: Bert Baumgaertner (Politics and Philosophy, Chair), Jagdish Patel (Chemical and Biological Engineering), Barrie Robison (Institute of Interdisciplinary Data Science, Director), Esteban Hernandez-Vargas (Math and Statistics), Douglas Habib, Center for Excellence in Teaching and Learning (CETL).
- UOPX survey: We acknowledge and thank Kristin and the members of the team for the great work produced in such a limited time.
- Reminders about scope of and motivation for the survey.
 - To give people the opportunity to voice their opinions.
 - We wish to honor the request for a survey voiced at the last UFM.
 - 94% of the senators voted (two weeks ago) in favor of a survey.
 - To provide constructive information to the administration and the working groups as we move forward.

Provost's Report:

- October 15 was the official census date for fall enrollment. We have the second largest incoming class (second to last year's), with 1,869 students. The total enrollment is at 11,849, a 3% overall increase. We are up 1.4% in retention rate, which is great news.

- There was great interest in joining the UOPX working groups – we received about 86 nominations/self-nominations, after removing duplicates. Soon we'll announce the names.
- “Common Read” event is tonight at 7:00pm in the Pitman Center International Ballroom.

Discussion:

Senator: There will be a Board for the “43 Education” entity. How will that Board be constituted? Provost’s response: The Uof I Regents will appoint the members of “43 Education” board who will functional as the Board of Directors for UOPX. Most likely, our president and their president will be on it, and possibly a Regent. Also, indepent members are required. For continuity, one or two members of the current UOPX Board of Directors may be invited.

Committee Reports (vote)

- UCC 139: International Business Minor, drop – Stefanie Ramirez, Department of Business
Low student interest is a major reason for dropping the minor. In addition, efforts needed to truly provide a rich international business experience are beyond the available resources. Integrating international business topics and issues in existing courses, as we do, has been effective at providing exposure to the entire college student body. Supporting student-abroad opportunities by working to integrate those opportunities into degree requirements continues to provide a portion of the student body with additional international business experiences. There were no questions.
Vote: 21/21 yes. Motion passes.

- UCC 149: Black Studies Minor – Janis Johnson, English Department, Sydney Freeman, Leadership & Counseling
Changing degree name from Africana Studies Minor to Black Studies Minor. We believe this will make the degree more attractive and more accessible to more students. The term and concept "Africana" is confusing to many people. People tend to understand what "Black" means in relation to people and culture. There were no questions.
Vote: 21/21 yes. Motion passes.

The next two items will be discussed and voted on as a package.

- UCC 520: Chemical Addictions: Principals and Practice Academic Certificate – Ben Barton, Department Chair, Psychology and Communication
All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor.
- UCC 521: Professional Skills in Chemical Addictions Counseling Academic Certificate – Ben Barton, Department Chair, Psychology and Communication
All courses in this proposed certificate are already in the course catalog. No new courses need to be created. The courses already exist as part of the addictions minor and regularly draw enrollments of 40-50 students. Creating this certificate will provide an academic opportunity for students who take all, or only half, of the curriculum required by the addictions minor. There were no questions.
Vote: 20/20 yes. Motion passes.

Announcements and Communications:

- Spread Pay Task Force – Erin Chapman, School of Family and Consumer Sciences
The Spread Pay Task Force met on October 13, 2023, and will report to Senate shortly.
- State Board’s Instructional Materials Accessibility and Affordability Policy – Marco Seiferle-Valencia, General Library
The Open Campus Committee is in the process of bringing zero and very low cost *course marking* to the U of I. The SBOE Instructional Materials Accessibility and Affordability Policy defines “zero cost” as a total list price of \$0, and “very low cost” as a total list price of \$1 - \$30. In view of the SBOE policy and the growing interest in cost-conscious strategies, the plan is to see our first Zero and Very Low Cost marked courses in Fall 2024. By Idaho SBOE definition, *course marking* is the assignment of attributes to course sections that help students quickly identify important course information at registration time.
Research has shown that Open Textbooks (complete textbooks designed to replace traditional textbooks) are of similar quality to traditional texts and often better ranked by faculty and students. See <https://openedgroup.org/review> for the research. Equivalent learning performance between open and traditional textbooks, and a withdrawal rate 29% lower with open textbooks, have been reported. Marco cited many studies that demonstrate the benefits of open textbooks. Preliminary results of a Spring 2023 course material survey show high student desire for affordable course materials and faculty interest in developing OER. After bringing this new item from Library Affairs to Faculty Senate, the plan is to finalize supporting web content, tools for cost checking, etc. The communication should go out to department chairs in late October. The next steps involve: the Registrar office, departments workflow updating, process for quality control, beginning to apply cost attributes to course material for fall 2024 scheduling, and a student-facing campaign. First Zero and Very-Low Cost courses will appear at U of I in Fall 2024.

Discussion:

Different instructors require different material. Can the course marking be different depending on who is teaching the class? Marco responded that it’s indeed possible. Basically, it goes back to the difference between catalog and schedule. The catalog is the permanent metadata about the course but does not include an assigned instructor. On the other hand, course marking will happen at the scheduling level. So, the same class taught by different instructors can have different course markings on the schedule.

There was a question about the origin of the Open Campus Committee and absence of teaching faculty in the membership. Marco’s response: The library is already leading all the “open” activities. After the leadership transition in the office of the Vice Provost for Academic Initiatives, Dean Ben Hunter convened this committee to revisit the SB policy and our obligations. As for the absence of teaching faculty at the committee, Marco will be happy to visit with specific senate committees interested in this. He also noted that there is some time pressure because our peer institutions in the state are further along and some are offering course marking.

The provost added that this initiative is not a change in teaching. The group was charged with the implementation of a characterization of courses.

Scholars pay large sums to publish in open-access journals. A senator inquired about the funding source for publishing open textbooks. Marco’s reply: There are faculty who created interactive digital textbooks at no extra compensation. If these faculty connect with the library, we offer

Open Fellowship and are able to provide some honorarium. There are also big publishers of open books, such as OpenStack, affiliated with various universities. Libraries have significant funding through university, Microsoft, or private donors. There is strong institutional support also for peer review and, in some cases, the development of course software. There are multiple options, especially for textbooks at the lower-division undergraduate level.

Please contact Marco at marcosv@uidaho.edu for any questions.

- **Campus Safety Concerns – Blaine Eckles, Vice President Student Affairs, Dean of Students; Lee Espey, Finance and Administration, Division Operation Officer**
Many employees are interested in training for critical situations. We have received many requests for active shooter training, which we can offer together with MPD. We can also go to people's location on campus and teach them what to do in those crisis situations. Contact the Safety subcommittee to let them know what you would like to see offered that's not already covered. Reach out, ask, etc. We have many resources people may not know about.
Lee Espey:
Active shooter training, etc. (with MPD): More to come on how to access those trainings.
Discussion
What kind of training is being offered at the U of I Children Center, and how is that training/education being rolled down to the children at the center? Dean Eckles has recently spoken with the director of the center and asked her to prepare a communication to share with families.
- **University of Phoenix Draft Survey – Jean-Marc Gauthier, Senate Chair, Kristin Haltinner, Senate Vice Chair.**
Please provide constructive feedback on the questions that you think need improvement. The survey is a way to breakdown the complex situation with the University of Phoenix into several categories starting with academic issues. You can use the chat for feedback. An open document will also be available for you to provide feedback. The open doc is accessible to all senators through the link posted in the chat.
Kristin gave a brief background on the task force, followed by a brief discussion that articulated through the following points:
The survey will be administered through Qualtrics.
Should the respondent's college or unit be identified (see Question #18 in the draft)?
The draft can be shared with Staff Council.
The purpose of the survey: To give people the opportunity to voice their opinions. To collect constructive information for the administration and the working groups as we move forward.
The survey's results will be shared with the administration.

New Business:

There was none.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:36pm.

Respectfully Submitted,

Francesca Sammaruca

Secretary of the University Faculty & Secretary to Faculty Senate

519: AEROSPACE CERTIFICATE

| Vibhav | Durgesh |

Will this request have a fiscal impact of \$250K or greater?

No

Academic Level

Undergraduate

College

Engineering

Department/Unit:

Mechanical Engineering

Effective Catalog Year

2024-2025

Program Title

Aerospace Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

12

CIP Code

14.1901 - Mechanical Engineering.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

None. Classes are already in the Mechanical Engineering curriculum and are periodically taught by department faculty.

Curriculum:**Certificate Objectives:**

The undergraduate aerospace certificate aims to provide students with a foundational understanding of the principles and practices of aerospace engineering with a focus on the key areas of aerodynamics, propulsion, materials, and aero-structures.

The certificate program is designed to enhance students' knowledge and skills in aerospace engineering and to prepare them for careers in the aerospace industry or for advanced studies in the field. It may also be helpful for students who are interested in pursuing related fields such as mechanical engineering, electrical engineering, or computer science. The required coursework must be completed with a grade of 'C' or better.

Required Coursework

| Code | Title | Hours |
|--------------------------------------|--|-------|
| Choose 4 courses from the following: | | |
| ME 417 | Turbomachinery | 12 |
| ME 412 | Gas Dynamics | |
| ME 450 | Fundamentals of Computational Fluid Dynamics | |
| ME 451 | Experimental Methods in Fluid Dynamics | |
| ME 415 | Materials Selection and Design | |
| ME 458 | Finite Element Applications in Engineering | |

ME 461

Fatigue and Fracture Mechanics

Total Hours**12****Course to total 12 credits for this certificate.**

Students should consult with their academic advisor regarding this certificate.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

LO#1: Attain career advancement in the aerospace sciences or related fields based on knowledge and skills gained from the certificate in aerospace.

LO#2 - An ability to develop and design aerospace systems or components using basic engineering principles while following real-world constraints.

LO#3 - An ability to effectively communicate to clients, engineers, or the general public on topics related to engineering solutions in aerospace engineering, technologies, and/or related fields.

Overall, these learning outcomes demonstrate that students who have completed a certificate in aerospace have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the aerospace industry. The students are well-prepared to pursue further education or employment in the aerospace field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certificate in aerospace will involve regular evaluations of the learning outcomes. This assessment process will include reporting on student assignments, exams, and projects. The summary of the evaluations will be submitted as part of the institutional assessment and accreditation process.

How will you ensure that the assessment findings will be used to improve the program?

Corrective actions will be undertaken whenever students do not meet the expected criteria for learning outcomes, including emphasizing specific content and adding learning activities and resources as needed. The results of the periodic review will be shared with the aerospace faculty cohort for implementing continuous improvements.

What direct and indirect measures will be used to assess student learning?

Direct measures will include exams, assignments, and class projects, which will be required for all the relevant classes. These tasks will be graded on a regular basis. Indirect measures will include self-assessment by students of achievement levels for each learning outcome. An exit survey will also be used as an indirect measure to assess student learning.

When will assessment activities occur and at what frequency?

Assessments of each learning outcome will be performed each year as part of the regular course activities.

Student Learning Outcomes

Learning Objectives

1 - Attain career advancement in the aerospace sciences or related fields based on knowledge and skills gained from the certificate in aerospace.

2 - An ability to develop and design aerospace systems or components using basic engineering principles while following real-world constraints.

3 - An ability to effectively communicate to clients, engineers, or the general public on topics related to engineering solutions in aerospace engineering, technologies, and/or related fields.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

There has been a growing interest from engineering students in specializing in aerospace engineering, and thus we expect this certificate to enhance the recruitment of students into the engineering programs at the University of Idaho. Furthermore, the certificate will help meet the employment needs of our industry partners.

The certificate in aerospace is designed to provide undergraduate students with specialized knowledge and skills in the field of aerospace, which is a rapidly growing and evolving industry. This certificate program is intended to prepare students for careers in the aerospace industry or related fields, as well as future graduate studies in the field of aerospace and/or aero sciences. The department currently already offers the courses required for the aerospace certificate. All courses include aerospace-specific content.

Reviewer Comments

Linda Lundgren (lindalundgren) (Wed, 20 Sep 2023 21:37:50 GMT): Program Description received from Durgesh Vibhav on 9/20/23 (see below): The certificate will provide students with a foundational understanding of the principles and practices of aerospace engineering with a focus on the key areas of aerodynamics, propulsion, materials, and aerostructures. Designed to enhance students' knowledge and skills in aerospace engineering and to prepare them for careers in the aerospace industry and/or for graduate studies in the field.

Rebecca Frost (rfrost) (Tue, 03 Oct 2023 18:10:28 GMT): Adjusted course listing into catalog standard.

Key: 519

Attach. #3

In response to requests by faculty, the Faculty Senate charged a task force to assess employee perspectives regarding the upcoming affiliation with the University of Phoenix. The task force developed the following survey for the purpose of evaluating current levels of understanding with regards to the affiliation and to collect related feedback from employees. The questions are designed to gather employee perceptions and constructive suggestions, which will be informative and helpful to the Faculty Senate in our conversations with administration as we move forward.

All questions are optional.

There will be no identifying information collected in survey questions.

Draft Survey Questions

- 1. In your opinion, how knowledgeable are you about the University of Phoenix and its programs?*

Not at all knowledgeable
Not very knowledgeable
Fairly knowledgeable
Very knowledgeable
Prefer not to answer

- 2. In your opinion, how knowledgeable are you about the details of the affiliation with the University of Phoenix?*

Not at all knowledgeable
Not very knowledgeable
Fairly knowledgeable
Very knowledgeable
Prefer not to answer

- 3. What sources of information have you used to learn about the University of Phoenix affiliation? [Choose all that Apply]*

Local/state news reports (Moscow-Pullman Daily News, Lewiston Tribune, Idaho Statesman, Idaho Ed News, etc.)

National news reports (Chronicle of Higher Education, Inside Higher Ed, etc.)

University of Idaho colleagues
University of Idaho's FAQ and resource website
University of Idaho's written communications
University of Idaho's town halls
University of Idaho's informational sessions with University of Phoenix administrators
Provost Lawrence's meetings with units in October
[NOTE: WE ARE WAITING ON A COMPREHENSIVE LIST FROM UCM OF ALL UI SPONSORED EVENTS PERTAINING TO AFFILIATION - INSERT DATES HERE]
Other (please specify)

4. To what degree do you support the University of Idaho affiliation with the University of Phoenix?

Strongly Oppose
Somewhat Oppose
Neutral
Somewhat Support
Strongly Support
Unsure

Please rate the degree to which you agree with the following statements

5. Based on my understanding of the Constitution of University Faculty (<https://www.uidaho.edu/governance/policy/policies/fsh/1/1520>), APM 60.21 (<https://www.uidaho.edu/governance/policy/policies/apm/60/21>), the role of Staff Council (<https://www.uidaho.edu/governance/policy/policies/fsh/1/1800>), and the role of shared governance at the University of Idaho (<https://www.uidaho.edu/governance>), I believe that university employees were appropriately involved in the decision to affiliate with the University of Phoenix as determined by existing University of Idaho policies.

Strongly Disagree

2023 – 2024 Faculty Senate – Pending Approval**Approved at Mtg #13
November 14, 2023**Meeting # 11Tuesday, October 31, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: McKenna

Guests/Speakers: Trevor White, Karen Humes, Erin James, Chandra Ford, Sean Quinlan, Michael Parrella

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #10, October 24, 2023, were approved as distributed.

Chair's Report:

- Happy Halloween if this suits you!
I would like to acknowledge that there are several conflicts across the world — some going on at the same time. We need to keep in mind that social media are bringing these conflicts very close to us and the people around us, with a new level of polarization and disturbing content. As we never know what people are individually experiencing -let's please be sensitive to each other and our students - knowing this can be a difficult time for many.

Provost's Report:

- Last week, the college of EHHS hosted a great faculty gathering. Thanks to Dean Blevins. The next one will be Tuesday, November 14, 4:30 – 6:30, in the Vandal Ballroom, hosted by CLASS and Dean Quinlan.
- We need to assemble the University Distinguished Professor Advising Committee, composed of 4 faculty and 3 deans, appointed by the provost for three-year staggered terms. Qualifications: "Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records of teaching, research and/or outreach." Below is the link to the relevant policy
FSH 1565-D-8: <https://www.uidaho.edu/governance/policy/policies/fsh/1/1565#d> Submit nomination for the committee through the form at: <https://forms.office.com/r/ridZTrQB97>
- 11:59pm, November 1 is the deadline for completing the All Employee Required Training.
- Update on the UOPX Working Groups (Chandra Ford).
There was great interest in participating. The invite went out to the initial group, but we will also communicate with the rest of the group to let them know that they will still be engaged.

Discussion:

Back to the University Distinguished Professors, Dean Parrella pointed out that an extension specialist has never received this award. Teaching excellence is an important part of the process, but extension specialists don't teach. Perhaps we could consider some changes to open the criteria.

A senator inquired about the candle vigil to be held on November 13 to remember the four students who died a year ago. There will be an event led by students and everyone is welcome. It will take place on the Administration Building lawn at 6:00 pm on Monday, Nov. 13.

Committee Reports (vote):

- UCC 434 Child Development M.S. – Trevor White
The Margaret Ritchie School of Family and Consumer Sciences (FCS) currently offers a single Master of Science degree in Family and Consumer Sciences that includes a focus on either child development, family studies, nutrition, or apparel textile and design. As it currently exists, it is difficult for prospective students interested in graduate studies in any of the areas to locate the degree via a simple search. Furthermore, some students may feel an M.S. degree in FCS does not truly reflect what they studied in graduate school, especially on one's resume/curriculum vitae; thus, it may affect future job prospects. The purpose of creating an M.S. degree in Child Development is to specifically delineate a specialization in Child Development as a graduate degree while maintaining the rigor of the current program. Additionally, having a more specific degree title will optimize their career opportunities.
Discussion:
Vote: 19/19 yes. Motion passes.
- UCC 529: Sustainability Academic Certificate – Karen Humes, Earth and Spatial Sciences and Erin James, English Department
Erin James provided a brief history of the certificate. On 09/05/2023, Senate appointed the existing interdisciplinary faculty-led committee as an ad-hoc program committee to serve as the "relevant unit and college" authorized to submit curricular proposals per FSH 4120-E. This committee shall be empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum. The program was approved by UCC, and the committee is now back to the Senate to seek approval for the program content. Karen Humes added that the UCC vote was unanimous.
Discussion:
Friendly amendment: It must be stated explicitly that a grade of C or better is required.
Vote: 19/20 yes; 1/20 no. The motion passes.

Announcements and Communications:

- Magic Valley Working Group White Paper - Torrey Lawrence, Provost & Executive Vice President, Chandra Ford, Center Executive Officer Southwest Idaho, Sean Quinlan, Dean, College of Letters, Arts and Social Sciences, Michael Parrella, Dean, College of Agricultural and Live Sciences.
Chandra Ford gave an introduction. President Green established the Magic Valley working group and tasked it to explore strategic opportunities for the University of Idaho in the Magic Valley. The working group was divided into three subgroups. The first subgroup, directed by Associate Dean and Director of UI Extension Barbara Petty, focused on outreach and tourism and took a critical look at the Jerome site and the potential return on investment (ROI) associated with the development. The second, led by Dean Michael Parrella, investigated potential research connections associated with CAFE. The third, headed by Dean Sean Quinlan, was charged with exploring expanded educational opportunities, such as undergraduate degrees, graduate degrees and 2+2 programs that pair with CSI.
Some key points: There are multiple opportunities for the University of Idaho to serve the workforce in the Magic Valley. We can help them meet their needs by expanding existing U of I

academic programs in partnership with CSI. Programs most suitable for expansion include undergraduate programs in aquaculture, natural resources, and agriculture with a focus on food production. Our expertise in the meat science area (e.g. Vandal Brand Meats program) is an excellent opportunity for the Magic Valley.

There are important areas where CSI and the U of I can collaborate in instruction delivery across various disciplines and develop hybrid programs that combine two-year face-to-face instruction and online course delivery to complete the four-year degree. These programs would have U of I faculty on the CSI campus to provide experiential learning opportunities. Hybrid programs would meet curricular requirements while providing greater flexibility in course delivery and a clear pathway to four-year degree completion.

The many impactful research opportunities are focused on Aquaculture, Food Science/Processing and Water.

After a visit to the Jerome site and to CSI, the group concluded that the most strategic location is in proximity to the CSI campus. A site close to our academic partners is ideal for reaching out to the potential students we want to enroll in our programs. One recommendation is to grow programs specifically in the College of Ag and Life Sciences and build out a second location for CALS. CSI is very supportive of a collaborative expansion of their ATI Center that involves U of I. (For a complete description, please see the White Paper attached to this meeting binder.)

Discussion:

Q. Why this particular region?

A. It's a place with potential for significant growth. Twin Falls is growing fast and offers many opportunities to serve unmet needs. It is existential for the U of I to increase its presence at CSI, in proximity to students who want to complete a 4-year degree.

Q. Was any thought given to including INBRE in these plans?

A. We have not. We are concentrating on developing food-processing connections.

Q. Do you plan to connect with specific farms/industries, or do you mainly want to increase the U of I presence in the region?

A. As a land grant university we connect broadly, with a focus on serving the food-processing industry. There are many opportunities for students with a variety of backgrounds, such as computer science, engineering, and more.

Contact Dean Michael Parrella if you wish to participate in these connections.

- Spread Pay Task Force Recommendations – Kristin Haltinner

The task force was charged with investigating the possibility of offering spread pay as a benefit for all faculty currently on 9-month appointments at U of I.

In the process of doing this, we first sought to verify that this was, in fact, desired by the faculty. We conducted a survey of faculty on 9-month contracts last year. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey leading to a response rate of 61%. 127 faculty were on spread pay, 443 on standard pay. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to spread pay if given the option. Regardless of whether they would go on spread pay, 94% of surveyed faculty supported implementing it as an option for others.

We then worked with the provost's office and Brian Foisy's office to determine whether or not it was even possible to offer the benefit. As you may remember, U of I incentivized faculty switching to standard pay in 2017 due to incompatibilities between the Banner 8 system used by HR and the form of spread pay we were using at the time.

In the process of this investigation, we learned that the system we were using was different than Banner (our current system). We also learned about an alternative model for payment over 12 months, used by many universities and compatible with Banner 9.

There are three possible systems of payment. The first is what we are calling “standard pay” this is a system in which 9-month faculty are paid at the time of their work, over a 9-month period. It is what most faculty are currently using. The second is called “spread pay.” This system “spreads” people’s pay from the academic year to the fiscal year. In effect, we currently pay the 122 faculty on spread pay in advance of their work in July and August and then we defer a part of their paycheck to pay them in May and June. The part of this practice in which we pay people in advance of their work in July and August is incompatible with the Banner system. The third is called “deferred pay.” This is a system in which a portion of faculty’s paychecks are held and then paid out over the summer. This calendar pays people on a schedule from September (or two weeks after contracts start – August 30th next year) through the following August. This is the system used at most schools and is compatible with the Banner system.

The University of Idaho can begin to offer the deferred pay option to faculty on 9-month contracts beginning next academic year. Faculty would need to opt into this payment plan – the details of that opting are still being figured out – and a portion of their 9-month pay would be held and paid out over the summer of 2025, so they are paid over 12 months.

So, this is a very exciting possibility for the faculty who struggle to make ends meet in the summers as single parents or primary income earners.

There are two challenges that were unearthed by this process. The first is that we need to move the 122 faculty currently on the noncompliant spread pay system onto either the deferred pay or spread pay system – whichever they choose. In so doing, they will be paid for the current academic year as planned – until the end of June. Then they will need to switch to the deferred pay (or standard pay) system. Regardless of which they choose, there will be a pause in their payment for three pay periods in July and August as this switch occurs. They are not missing out on salary! We are finishing the spread pay system (July through June calendar), pausing, and then switching to the deferred pay (September to August) calendar.

Something should be very clear: the 122 faculty currently on spread pay will need to switch to the standard pay or – if deferred pay is offered – choose between standard pay or deferred pay system. To ease the transition from spread pay to deferred pay, the provost’s office has set up an option for faculty on spread pay to have a portion of their salaries withheld in the Spring semester and paid out in July and August. There is one other challenge that was unearthed in this process. That is that the Banner system expects and is built for faculty to be on 20 pay period contracts, but UI’s faculty are on 19.5 pay period contracts. This is another change that will need to be made. Faculty will not be expected to work an additional week, but this will slightly lower hourly salary rates for academic year faculty on full time contracts for the entire summer – something significant to people on external grants.

The recommendation of the task force that we open the option for deferred pay to all eligible faculty – that is, fulltime faculty on 9-month contracts.

Discussion:

Concern about the delayed payments next summer

To alleviate people’s concerns about having to get by for two months without paychecks, Payroll has set up a system to withhold money (starting in January) to be paid in summer 2024 to the 122 faculty currently on spread pay. Or people can do it on their own.

Incentive?

There will not be an incentive to switch. This transition is something that we have to do. But the provost office and Payroll will help make it less painful. Once again, it was emphasized that there will be no loss of wages – people are getting paid at a different time. This is about moving to a system where we can incorporate everyone.

Impact on summer salaries from grants

The discussion moved to how summer salaries from grants are impacted. There is a maximum salary (due to various regulations) based on what one's salary would be if it were extended to 12 months and keep the salary at that level. A change in the contract period will alter this calculation, as the summer maximum salary will impact faculty who receive 3 months of summer salary from their sponsoring agency. There are still several moving parts. If this recommendation goes forward, it will be useful to provide actual examples covering several scenarios.

Hourly rate reduction

Linda Campos: the hourly rate reduction arose from the need to have 20 pay periods, which presents some system challenges. However, deferred pay can move forward independently. Back to the change in hourly rate, a senator noted that it can be easily calculated from the total salary divided by the total number of hours in the 20-pay period system (compared to the corresponding ratio in the 19.5 system).

Faculty need to choose the deferred pay option every year. So, if a faculty expects to receive 3 months of summer salary from a grant, they may decide not to opt for deferred pay on that particular summer.

The recommendations of the task force will be an action item at the next meeting.

- UOPX – Draft Survey, Chair Gauthier
Just a quick note to remind everyone that the attached survey is a draft. The modalities of distribution are being worked out.

New Business:

There was none.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:42pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting # 11

Tuesday, October 31, 2023 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #10 October 24, 2023 **Attach. #1**
- III. Chair’s Report
- IV. Provost’s Report
- V. Committee Reports (vote)
 - UCC 434: Child Development M.S. - Trevor White, Academic Advisor/Administrative Assistant, School of Family and Consumer Sciences **Attach. #2**
 - UCC 529: Sustainability Academic Certificate – Karen Humes, Earth and Spatial Sciences and Erin James, English Department **Attach. #3**
- VI. Announcements and Communications
 - Magic Valley Working Group White Paper - Torrey Lawrence, Provost & Executive Vice President, Chandra Ford, Center Executive Officer Southwest Idaho, Sean Quinlan, Dean, College of Letters, Arts & Social Sciences, Michael Parrella, Dean, College of Agricultural & Life Sciences **Attach. #4**
 - Spread Pay Task Force – Recommendations
 - University of Phoenix – Draft Survey **Attach. #5**
- VII. New Business
- VIII. Adjournment

- **Attach. #5** University of Phoenix – Draft Survey

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 10

Tuesday, October 24, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Tibbals.

Absent: Haltinner (excused), Miller, Roberson, Schwarzlaender (excused), Strickland (excused)

Guests/Speakers: Ken Udas

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #9, October 17, 2023, were approved as distributed.

Chair's Report:

- The UOPX survey is likely to attract a significant amount of interest. It's important to exercise caution. Please remind your constituents not to include any identifying information about themselves, their units, or others. Responses containing personal information may be discarded. The survey should be constructive and usable.
- During the New Business phase of this meeting, we'll hear from Steve Mills, Director of Parking and Transportation Services, and Tao Xing, Chair of the Parking Committee, concerning on-campus parking issues.

Provost's Report:

- The October Faculty Gathering will be held on October 25, 2023, from 4:30-6:30 PM on the first floor of the Education, Health and Human Sciences building (open area on the first floor), hosted by Dean Blevins.
- Leadership Weekend is coming up. Many of our Advisory Boards will be on campus Thursday, Friday and Saturday. The game against Montana State is on Saturday at 1PM.
- November 1 is the deadline for completing the All Employee Required Training.

Committee Reports (vote):

- UCC 519: Aerospace Certificate - Vibhav Durgesh, Mechanical Engineering
The undergraduate aerospace certificate is intended to provide students with a foundational understanding of the principles and practices of aerospace engineering. The certificate program is designed to enhance students' knowledge and skills in aerospace engineering and to prepare them for careers in the aerospace industry or for advanced studies in the field. It may also be helpful for students who are interested in pursuing related fields such as mechanical engineering, electrical engineering, or computer science. There has been a growing interest from engineering students in specializing in aerospace engineering, and thus we expect this certificate to enhance the recruitment of students into the engineering programs at the University of Idaho. Furthermore, the certificate will help meet the employment needs of our industry partners.

Discussion:

There were no questions.

Vote: 100% in favor. Motion passes.

Other Voting Items

- University of Phoenix Revised Survey

Chair Jean-Marc asked the senators to place in the Zoom chat the numbers corresponding to those questions which they would like to see discussed, amended, or removed.

Discussion:

Questions # 5, 6, 7, 10 were placed in the chat.

Questions #6, 7: They ask about expected impact on units. Provost Lawrence argued that there will be no impact on units, thus those questions are unnecessary. Some of the task force members explained the rationale for including them. For instance, some units that teach classes also offered by UOPX worry that the affiliation may negatively impact their classes.

At this point, task force members wondered whether the on-going discussion suggests that we should revisit the purpose of the survey. The Secretary noted that the purpose is provided in the paragraph heading the survey.

The discussion moved to Question #5, which asks whether university employees believe they *were appropriately involved in the decision to affiliate with the University of Phoenix, as determined by existing University of Idaho policies*. A senator worries that the presence of the links to the policies makes the question appear “leading.” A task force member explained that the inclusion of the policies resulted from additional feedback received after last week’s meeting. Also, it may increase employee’s awareness of university policies and processes. Some senators felt strongly that Question #5 is very important and is part of the reasons why the survey was developed. The Secretary disagrees. While the question is indeed very important and goes to the core of shared governance at U of I, it does not fall under the goals stated in the headings. In the interest of the survey, she suggested avoiding questions the answers to which may be influenced by, for instance, feelings of resentment.

Motion by Long, seconded by Tibbals: *Move to accept Question #5 as submitted.*

Vote: 14/18 yes; 4/18 no. Motion passes.

Motion by Mittelstadt, seconded by Long: *Move to accept the survey as submitted. (Possibly with some minor rewording.)*

Vote: 17/20 yes; 3/20 no. Motion passes.

Announcements and Communications:

- CAPE – Ken Udas, Vice Provost for Digital Learning

CAPE (Continuing Adult and Professional Education) is an entity or function that provides services to non-traditional education programs providers, including basic capacity for infrastructure such as information systems for administrative support, promotion and marketing of the CAPE portfolio, and also for new programs market analyses and forecasting. These services are generally available for traditional programs, but not for non-traditional programs. Along with his team and with the help of other colleagues, such as Barb Kirchmeier, Erin Doty, and Brook’s team in EHHS, they have worked to provide support. The goal is to offer a three-year pilot program starting in early 2024, with 30 courses mostly from EHHS, and eventually open it to colleges and units interested in these services. The financial model covers 3 years. For the first year, the offerings will be supported by P3 funds, to get things off the ground. For the second and third years, it should be a self-sustained effort. For the second year, we’ll cap the fee at 10% of revenue. After that, the fee may go above or below 10%, depending on cost and

revenue. Hopefully, by year #3 there is enough activity to keep the fee low relative to the services. This effort will make U of I competitive with BSU, ISU, Utah State, Arizona, and more. Vice Provost Udas is happy to share the full version of today's presentation through Faculty Senate distribution.

Discussion:

A discussion followed about possible overlap with UOPX and why not wait until we can work in partnership with UOPX. Waiting for UOPX is not a viable option because there is an immediate need for these services. In the college of EHHS they are already working on initiatives such as those that Ken Udas talked about, but we need a more robust system soon. CETL is involved.

New Business:

- Chair Gauthier introduced Steve Mills Director, Parking and Transportation Services and Tao Xing, Chair of Parking Committee.

Below is a list of talking points, to be expanded at a later time:

- Budget model for parking permit charges
- Equity of permit cost. Should it be salary-based?
- Availability of and cost of parking for part-time lecturers/adjuncts
- Status of station on-campus to charge electric bikes and cars
- Parking permit cost:
 1. Regarding questions about parking permit costs, here is a link to the survey Parking and Transportation Services conducted in 2020 of peer-institution parking permit pricing: <https://www.uidaho.edu/-/media/UIDaho-Responsive/Files/infrastructure/Parking/future-plans/peer-institution-permit-prices-fy18.pdf>
 2. The link below will take the reader to the Budget Books pages for Auxiliary Services; Parking and Transportation Services begins on page 56.
[FY2024 Auxiliary Enterprise Budget Book Excluding Athletics \(uidaho.edu\)](https://www.uidaho.edu/infrastructure/parking/future-plans/peer-institution-permit-prices-fy18.pdf)

There was a brief discussion about reciprocal parking agreement with WSU. The WSU & UI Reciprocal Parking Agreement can be found at: <https://transportation.wsu.edu/wsu-ui-permits>
Additional options: There are visitor parking permits, daily or for ten (consecutive or non-consecutive) days. With those, one can park anywhere on campus.

<https://www.uidaho.edu/infrastructure/parking/visitors-community/visitors>

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:58pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

Discribe the financial impact

The Margaret Ritchie School of Family and Consumer Sciences has all classroom, instructional, and administrative resources needed to implement this program. Our core graduate faculties Dr. Tsao and Dr. Chen specialize in early education, education research methods, intervention, and educational psychology. They will be fully capable to support future graduate students of M.S. Child Development.

Curriculum:

| Code | Title | Hours |
|-----------------------|--|-------|
| FCS 501 | Seminar | 2 |
| FCS 500 or FCS 599 | Master's Research and Thesis Non-thesis Master's Research | 3 |
| ECDE 540 | Parent-Child Relationships | 3 |
| ECDE 530 | Cognitive and Motivation in Human Learning | 3 |
| FCS 504 | Special Topics (Applied Teaching in FCS Professions) | 3 |
| STAT 431 | Statistical Analysis | 3 |
| PSYC 512 | Research Methods | 3 |

| | |
|---|-----------|
| Select 6 credits of 500-level FCS courses | 6 |
| Select 4 credits of 500-level courses | 4 |
| Additional 4 credits of 500-level courses for non-thesis students | |
| Total Hours | 30 |

Courses to total 30 credits for this degree if thesis track.

Courses to total 34 credits for this degree is non-thesis track.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Learn and Integrate/ Think and Create: Students will be able to understand children's physical, cognitive, and social-emotional development. Students will achieve this learning outcome by successfully passing graduate-level classes related to child development such as FCS 530 Learning and motivation in Learning and FCS 540 Parent-Child Relationships and completing their thesis or non-thesis projects (e.g., designing a curriculum, an action research project, a childcare center business plan). By completing their thesis project, students will be able to design, execute, interpret, and defend their research project. By completing their non-thesis project, students will be able to integrate their subject expertise directly to real-world practices.

Communicate: Students will be able to interpret, apply, and communicate theories and research. Students will achieve this via graduate-level classes related to research methods, statistics, and scientific communication (e.g., FCS 501, a seminar class where graduate students present up to date research studies as well as their thesis and non-thesis projects.

Practice Citizenship: Students will be able to understand the value of and advocate for child development. Students will achieve this learning outcome by presenting their research and projects at conferences and/or classes, and by successfully passing graduate-level classes related to child development such as FCS 540 Parent-Child Relationships.

Clarify Purpose and Perspective: Students will be able to develop delineated research interests and content area expertise. Students will achieve this learning outcome by successfully passing classes related to their research interests, working closely with faculty members, and completing their thesis and non-thesis projects.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Learn and Integrate, Think and Create.

This learning outcome will be assessed by students' thesis or non-thesis project. By completing their thesis project, students will be able to design, execute, interpret, and defend their research project. By completing their non-thesis project, students will be able to integrate their subject expertise directly into real-world practices. The quality of students' written documents and oral defense will be evaluated by the major professor and two other committee members. The committee member will provide feedback on the content of the written documents (i.e., thesis or non-thesis), the design of the project, and the final oral defense. The quality of students' work will be evaluated based on a rubric. Rubric criteria are such as the thoroughness of the literature review, the quality of the project design, and result interpretation.

Communicate.

This learning outcome will be assessed by the research paper presentation assignment in ECDE 530 Cognition and Motivation in Learning and FCS 501 Graduate Seminar. Students will be able to orally present research papers of their interest for 20 minutes, using PowerPoint as a visual aid. The quality of student presentations will be graded using rubrics. Evaluation criteria are such as students' understanding and critique of the research study and their ability to lead an in-depth discussion.

Practice Citizenship.

This learning outcome will be assessed by the literature review assignment in ECDE 540 Parent-Child Relationships. To complete this assignment, students will be able to identify a critical issue that impacts the quality of parent-child relationships (e.g., child behavior, parental stress) and write a thorough literature review on this topic. Students' work will be graded using a rubric. Evaluation criteria

are such as the thoroughness of the review and the coherence of their argument. Additionally, students in ECDE 540 are required to complete family relationship training (e.g., Strengthening Families Professional Development Program).

Clarify Purpose and Perspective.

This learning outcome will be assessed by the teaching philosophy assignment in ECDE530 Cognition and Motivation in Learning. To complete this assignment, students will be able to identify their core beliefs related to teaching and learning as future educators, and use research and real-life example to justify their beliefs. This assignment will be graded using a rubric. Rubric criteria are such as the appropriateness of core beliefs and the interpretation of research and theories.

How will you ensure that the assessment findings will be used to improve the program?

To improve the proposed program, the instructors will review students' assessment results under each learning outcome at the end of every semester and adjust their course design accordingly. Assessment results will also be compared across several years annually to ensure the consistency and quality of the proposed graduate program.

What direct and indirect measures will be used to assess student learning?

Measures explained above under the assessment process used to evaluate outcomes.

Direct, summative measures include the students' thesis defense (or non-thesis exit requirement) will be used to assess students' learning. During the defense, the students' committee members will ask high-level research and application questions related and unrelated to the thesis project to comprehensively assess the students' knowledge, critical thinking skills, integrative skills, perspective, and communication skills. Additionally, graduate students will be evaluated after the first year during their annual evaluation meeting.

Indirect, formative measures including routing meetings with mentor professors will also be used to assess students' learning. Mentor professors will monitor and assess students' progress during those meetings.

When will assessment activities occur and at what frequency?

Meetings with mentors will happen bi-weekly or as needed, final class grades will be reviewed at the end of every semester, the annual evaluation will take place by the end of their first year, the thesis defense or non-thesis exit presentation will happen at the end of students' programs of study.

Student Learning Outcomes

Learning Objectives

1. Learn and Integrate: Students will understand the mental, physical, cognitive, and affective growth infancy through adolescence with special foci on learning, instruction, and family dynamics.
2. Think and Create; Communicate; Practice Citizenship: Students will learn how to interpret and apply theories and research into practice.
3. Clarify Purpose and Perspective: Students will integrate knowledge in the context of social, economic, and environmental factors affecting children's developmental trajectory.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Margaret Ritchie School of Family and Consumer Sciences (FCS) currently offers a single Master of Science degree in Family and Consumer Sciences that includes a focus on either child development, family studies, nutrition, or apparel textile and design. As it currently exists, it is difficult for prospective students interested in graduate studies in any of the areas to locate the degree via a simple search. Furthermore, some students may feel an M.S. degree in FCS does not truly reflect what they studied in graduate school, especially on one's resume/curriculum vitae; thus, it may affect future job prospects. The purpose of creating an M.S. degree in Child Development is to specifically delineate a specialization in Child Development as a graduate degree while maintaining the rigor of the current program. Additionally, having a more specific degree title will optimize their career opportunities.

Reviewer Comments

Lauren Perkinson (V00763280) (Fri, 15 Jan 2021 23:55:07 GMT): Rollback: Graduate Council is requesting more information about program specifics. Please include more information about credit requirements for nonthesis students and specific differences between this program and Curriculum and Instruction programs. Members also suggested considering an online science degree and showing areas of concentration in the curriculum (curriculum build out). Please contact Jerry McMurtry or Lauren Perkinson with questions.

Joana Espinoza (joanae) (Wed, 03 Feb 2021 16:59:23 GMT): Dept. resubmitted the state form but not sure if it aligns with the CIM form. Please review to make sure that the requested changes have been made. Please see new state form attached. If CIM needs updating, please return to dept via the workflow for them to provide updates.

Rebecca Frost (rfrost) (Wed, 17 Mar 2021 15:30:54 GMT): Rollback: Learning Outcomes must be entered before the proposal can move forward. Curriculum review is fine.

Lauren Perkinson (V00763280) (Thu, 16 Sep 2021 17:23:07 GMT): Votes: 4 approved, 3 denied, 3 abstained. 1. Limited faculty to deliver both an UG and GR/masters program – 2 tenure line faculty are not believed to be sufficient 2. Reliance on courses outside the unit and no attempt was made to coordinate with those units on delivery or rotation of courses – or if there is room to absorb additional students

Gwen Gorzelsky (gwen) (Mon, 03 Oct 2022 20:29:30 GMT): Rollback: Please see 10.3.22 email re: adding market data (to be provided) and using updated SBOE form.

Sara Mahuron (sara) (Tue, 14 Mar 2023 20:07:21 GMT): Emailed Shiyi and Trevor requesting more detail on the direct measures that will be used to evaluate the PLOs.

Sara Mahuron (sara) (Thu, 23 Mar 2023 19:11:25 GMT): added assessment information about measures received by email from Shiyi. Assessment section complete.

Theodore Unzicker (tunzicker) (Tue, 17 Oct 2023 22:02:27 GMT): FCS 530 is listed under curriculum. That course was in activated in Spring 2021.

Theodore Unzicker (tunzicker) (Tue, 17 Oct 2023 22:03:46 GMT): ...FCS 530 was INactivated in Spring 2021. Sent email to Trevor.

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

None. The certificate will be comprised of existing courses and staffed with existing instructors.

Curriculum:

The 12-credit multidisciplinary Sustainability Certificate can be completed by students in any program across the university and is comprised of classes from all nine academic colleges. Sustainability is an interdisciplinary topic relevant to nearly every area of work and life. Certificate completion will allow students to contribute to an informed citizenry that is creating sustainable solutions for Idaho and beyond, and to cultivate an ecologically sound, economically prosperous, and equitable society for current and future generations. Students are required to take at least three credits in the integrative core course category and at least three credits from each of the following three categories: ecological, social, and economic. A minimum of 12 credits must be achieved for certificate completion. Integrative core courses introduce students to the breadth of sustainability as a concept involving ecological, social, and economic processes. Courses centered around ecological sustainability focus on protecting and restoring the integrity of Earth's ecological systems, with special concern for biological diversity and the natural processes that sustain life. Courses centered on social sustainability focus on meeting the needs of communities without compromising the ability of future generations to meet their own needs. Courses centered on economic sustainability focus on long-term economic prosperity without negative impacts on the environment, society, or culture.

| Code | Title | Hours |
|--|--|-------|
| Core Integrative Course | | |
| <i>Select at least one of the following:</i> | | |
| FSP 201 | Forest and Sustainable Products for a Green Planet | 3 |
| GEOG 435 | Climate Change Mitigation | |
| LARC 150 | Landscape, Culture and the Environment | |

| | |
|----------|--|
| PSYC 319 | Environmental Psychology |
| SOIL 436 | Principles of Sustainability |
| MHR 315 | Corporate Social Responsibility and Sustainability |

Ecological Course

Select at least one of the following: 3

| | |
|----------|--|
| BIOL 102 | Biology and Society |
| FOR 460 | Mountain Ecology |
| EPPN 100 | Human, Plant, Animal and Insect Epidemics: Drivers of Societ |
| SOIL 448 | Drinking Water and Human Health |
| GEOG 313 | Global Climate Change |
| GEOG 430 | Climate Change Ecology |
| GEOL 309 | Ground Water Hydrology |
| GEOL 474 | Stable Isotopes in the Environment |
| LARC 288 | Plant Materials & Design 1 |
| REM 440 | Restoration Ecology |

Economic Course

Select at least one of the following: 3

| | |
|--------------------------|--|
| AGEC 451 or ECON 451 | Applied Environmental and Natural Resource Economics |
| AGEC 452 | Water Economics and Policy Analysis |
| ARCH 463 | Principles of Environmental Building Design |
| ECE 487 | Sustainable and Renewable Energy |
| ECON 447 or AGECE 447 | International Development Economics |
| ENVS 423 | Planning Sustainable Places |
| FIN 435 | Sustainable Finance and Investments |
| SOIL 444 | Water Quality in the Pacific Northwest |
| IAD 368 | Interior Materials and Specifications ¹ |
| INDT 419 | Industrial Sustainability Analysis |
| LAW 407 | Agriculture and Environmental Law |
| ME 436 | Sustainable Energy Sources and Systems |

Social Course

Select at least one of the following: 3

| | |
|----------|--|
| ENGL 316 | Environmental Writing |
| ENGL 322 | Climate Change Fiction |
| HIST 424 | American Environmental History |
| IAD 151 | Introduction to Interior Architecture and Design |
| IAD 443 | Universal Design |
| LAW 406 | Foundations of Natural Resources Law |
| RSTM 380 | Principles of Travel and Tourism |
| SOC 340 | Environmental Sociology and Globalization |
| SOC 344 | Understanding Communities |
| SOC 465 | Environmental Justice |
| SOC 466 | Climate Change and Society |

Total Hours 12

IAD 368 is being renamed "Materials for Health and Sustainability."

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. Students will be able to define sustainability and identify major local, national, and global sustainability challenges.
2. Students will be able to explain how natural, economic, and social systems interact to create or prevent sustainability.
3. Students will be able to reflect critically on the global implications of their personal and professional actions.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Faculty must apply to the Sustainability Certificate Committee to have their course included in the certificate. That application asks the faculty member to consent to administering a sustainability literacy survey based on an Association for the Advancement of Sustainability in Higher Education (AASHE)-accepted instrument developed by the University of Seattle. The survey is integrated with the learning objectives and will be used to gauge student knowledge. Based on discussion of the outcomes and survey responses, the Sustainability Certificate Committee will develop recommendations, share those with instructors teaching the certificate courses, and ask those instructors to attend an annual workshop on implementing changes based on the recommendations.

How will you ensure that the assessment findings will be used to improve the program?

Each year, the University Sustainability Director and Sustainability Certificate Committee will 1.) meet to discuss assessment findings and develop recommendations, 2.) share the recommendations with instructors, and 3.) offer a workshop for current and potential certificate faculty on using the findings to improve course and curriculum design and instructional delivery.

What direct and indirect measures will be used to assess student learning?

Direct measure: Sustainability Literacy Assessment Survey

Indirect measure: Survey soliciting students' feedback on their certificate experience

When will assessment activities occur and at what frequency?

Annually, as explained above.

Student Learning Outcomes**Learning Objectives**

1. Students will be able to define sustainability and identify major local, national, and global sustainability challenges.
2. Students will be able to explain how natural, economic, and social systems interact to create or prevent sustainability.
3. Students will be able to reflect critically on the global implications of their personal and professional actions.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The 12-credit multidisciplinary Sustainability Certificate can be completed by students in any program across the university and will be comprised of classes from all nine academic colleges. Sustainability is an interdisciplinary topic that has relevance in nearly every area of work and life. Certificate completion will allow students to contribute to an informed citizenry and cultivate an ecologically sound, economically prosperous, and equitable society for current and future generations. According to the Princeton Review's annual College Hopes & Worries Survey, an overwhelming majority of college applicants each year – often more than 75% - say that a university's commitment to sustainability and the environment affected their decision to apply to or attend the school. Therefore, participation in the certificate program is expected to grow over the next several years. The certificate complements many majors and minors and is not anticipated to compete with any existing programs. Courses for the certificate are chosen based on established criteria (see below) that will help students meet the learning outcomes. Since these are existing courses, there will be no added workload related to teaching. Assessment workload will be managed by the University Sustainability Director and Sustainability Certificate Committee stated above.

SUSTAINABILITY & SUSTAINABILITY CHALLENGES

AASHE (Advancement of Sustainability in Higher Education) defines **sustainability** in a “pluralistic and inclusive way, encompassing human and ecological health, social justice, secure livelihoods, and a better world for all generations. Major sustainability challenges include (but are not limited to) climate change, global poverty and inequality, natural resource depletion, and **environmental degradation.**” **The solutions for many sustainability challenges are enumerated in the UN’s [Sustainable Development Goals](#).**

Sustainability of courses is determined through alignment with the criteria enumerated below. Course descriptions must include the listed criteria for consideration of inclusion. Courses in the Ecological, Economic, and Social Sustainability categories must include at least 50% criteria concepts.

COURSE CATEGORIES

1. Integrative Core

Integrative Core courses have a primary and explicit focus on sustainability. Thematic courses may qualify as foundational if social, environmental, and economic dimensions are addressed with sufficient balance and depth to confer foundational knowledge that is transferable to other themes or issues.

2. General Courses:

a. **Ecological Sustainability:** Courses centered on ecological sustainability focus on protecting and restoring the integrity of Earth’s ecological systems, with special concern for biological diversity and the natural processes that sustain life. Such courses may include the following themes:

- The interdependence of species
- Local biomes, watersheds, and natural history
- Ecosystem services
- Soil conservation and management
- Biodiversity loss and protection
- Invasive species
- Plant and wildlife disease
- Habitat loss and fragmentation
- Habitat connectivity and remediation
- Impacts of pollution on natural systems and mitigating pollution
- Impacts of over-harvesting of plants or wildlife

- Impacts of climate change on natural systems
- Ecosystem degradation
- Restoration ecology
- Ecological impacts of sea-level rise
- Natural disasters

b. **Economic Sustainability:** Courses centered on economic sustainability focus on long-term economic prosperity without negative impacts on the environment, society, or culture. They examine patterns of production and consumption that safeguard Earth's regenerative capacities. Such courses may include themes such as:

- The economics of population growth
- Human consumption patterns or impacts
- Impacts of biodiversity loss on local markets
- Food, water, and energy resource availability
- Fisheries collapse or recovery
- Sustainable resource consumption
- Sustainable agriculture
- Food waste
- Organic farming
- Permaculture
- Biodynamic farming
- Agroforestry
- Sustainable food systems
- Environmental impacts of poverty and inequity
- Sustainable materials production
- Economic impacts of climate change
- Prosperity without growth
- "Green" chemistry
- Cradle-to-cradle production/manufacturing
- Degrowth
- Circular economy
- Waste management
- Carbon sequestration
- Sustainable business
- Sustainable architecture or landscape design
- Renewable energy (solar, wind, water, tidal, biofuel)
- Geothermal energy
- Centralized vs decentralized energy production
- Oil dependence

- Subsidies
- Energy efficiency
- Technological solutions to sustainability challenges
- Greenwashing
- Marketing for sustainability
- Energy systems
- Energy conservation
- Pollution prevention
- Water conservation
- Sustainable innovation
- Designing climate-resilient communities
- Ecotourism
- Sustainable textiles, fashion, or materials design
- Desalination
- Wastewater treatment
- Recycling/reducing/reusing
- Carbon footprint
- Water footprint
- Environmental/human health impacts of supply chains
- Environmental certifications (MSC, FSC, B Corp, 1% for the Planet, etc.)
- Global commons
- Management for sustainability
- Sustainable economic growth
- Sustainable development
- Corporate environmental responsibility
- Natural resource scarcity and/or management
- Other concepts of energy, water, and waste
- Climate change adaptation
- Sanitation

c. **Social Sustainability:** Courses centered on social sustainability focus on the interactions between society and nature. Topics may include themes such as:

- The impact of social systems on ecological systems
- Cultural comparisons of sustainability
- Indigenous environmental issues
- The relationships between poverty, social justice, and environmental degradation
- Impacts of the built environment on ecology and society
- Humanity's place and limits within ecological systems
- Environmental ethics

- Environmental law and policy
- Food insecurity
- Fresh water availability
- Impacts of resource scarcity
- Climate refugees and societal impacts of climate change
- Impacts of climate change on healthcare
- Environmental justice
- Sense of place
- Impacts of nature on mental health
- Impact of nature on physical health
- Gender equality and equity as prerequisites to sustainable development
- Access to green space
- Environmental history
- Sounds of nature
- Environmental poetry
- Environmental literature
- Environmental philosophy
- Environmental history
- Environmental psychology
- Art or design with reclaimed materials
- Migration

529 Program Description

The 12-credit multidisciplinary Sustainability Certificate can be completed by students in any program across the university and is comprised of classes from all nine academic colleges. Sustainability is an interdisciplinary topic relevant to nearly every area of work and life. Certificate completion will allow students to contribute to an informed citizenry that is creating sustainable solutions for Idaho and beyond, and to cultivate an ecologically sound, economically prosperous, and equitable society for current and future generations. Students are required to take at least one integrative core course and one course from each of the following three categories: ecological, social, and economic. A minimum of 12 credits must be achieved for certificate completion.

 Recommendations for Magic Valley Execution..... 20

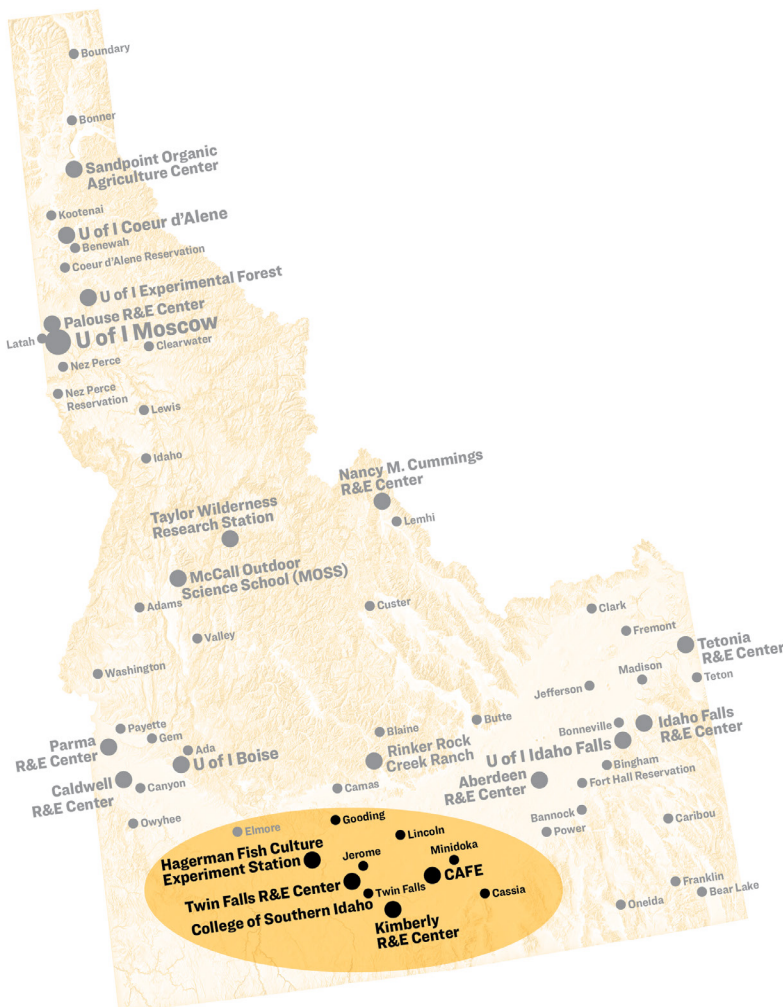

INTRODUCTION & CHARGE FROM PRESIDENT GREEN

President Green established the Magic Valley working group and tasked it to explore strategic opportunities for the University of Idaho in the Magic Valley.

While the initial impetus for the working group was to explore a real estate opportunity and partnership at the Crossroads site in Jerome, ultimately the three subgroups took a deeper look at a long list of opportunities for the University of Idaho to serve our statewide mission and support the economy in the region. The groups took a critical look at how the U of I could have greater visibility and presence in the Magic Valley.

The timing of this process was driven by a number of factors. First, the urgency to make a decision about the feasibility of building a facility at the Crossroads site in partnership with the Charter Equities development (Discovery Center). Second, a number of opportunities currently exist to forge stronger and more expansive partnerships with College of Southern Idaho (CSI). The working group traveled to Twin Falls and Jerome to see the Crossroads site and visit CSI. The conversations focused on (1) exploring ways to expand educational programming and research associated with CAFE, (2) identifying facility needs to accommodate the fulfillment of the University’s land-grant mission, (3) the development of companion programming associated with CAFE, and (4) additionally, the group evaluated how the University of Idaho could develop the appropriate strategies to expand participation from colleges other than the College of Agricultural & Life Sciences (CALS) to serve the needs of this growing market.

The working group was divided into three subgroups. The first subgroup, directed by Associate Dean and Director of UI Extension Barbara Petty focused on outreach and tourism

and took a critical look at the Jerome site and the potential return on investment (ROI) associated with the development. The second, led by Dean Michael Parrella, was tasked with investigating potential research connections associated with CAFE. The third, headed by Dean Sean Quinlan, focused on exploring expanded educational opportunities – both undergraduate degrees, graduate degrees and 2+2 programs that pair with CSI. The report generated by each group has been incorporated into this white paper.

OVERVIEW

For almost 15 years, the University of Idaho (through a partnership with stakeholders and the legislature) has been developing the Idaho Center for Agriculture, Food and the Environment (CAFE), the heart of which will be a research dairy and demonstration farm located in Minidoka County. CAFE will provide the university with a modern and unique research facility consistent with the scale of agricultural production in the Magic Valley - a major agricultural area in the state. Although the dairy and demonstration farm have an obvious agricultural connection, the industries in the area need expertise in multiple disciplines. By working collaboratively with two-year institutions U of I can create other educational opportunities, including 2+2 degrees and 4-year degrees which align with our expertise and statewide mission in Southern Idaho.

As a 2-year school, CSI has an interest in research from a student experiential learning perspective, but their faculty do not have a research mandate. CAFE affords the opportunity to enhance student training to engage with industries in the Magic Valley, in partnership with CSI. The extension/outreach component is a focus of the Discovery Center vision and its connection to the burgeoning area of Agri-Tourism was a piece of the original CAFE concept and is further detailed in this document. Ultimately, the recommendations from this process focus on what we can do in the immediate future to launch programming to serve the needs of this region and point to the most strategic path forward given our mission and financial position. As originally conceived in 2008 and updated in 2017, CAFE encompasses 4 overlapping areas: a 2000 cow dairy, an adjacent 600+ acre demonstration farm in Minidoka County, the Discovery Center at the Crossroads of U. S. Highway 93 and Interstate Highway 84 in Jerome County focused on outreach and education, and a Food Processing Research and Educational component in conjunction with CSI on their campus in Twin Falls County.

CALS faculty have been actively collecting baseline data at the demonstration farm for over one year and bids for dairy construction were received on February 23, 2023. The food processing component is under discussion with CSI and is still in a preliminary stage.

JEROME & CROSSROADS LOCATION

An examination of the Discovery Center (DC) location: History and Concept

The Points Consulting Feasibility Study recommended co-locating with the Southern Idaho Legacy Center (Rick Ryerson development) as the ideal site for the CAFE Discovery Center. Mr. Ryerson joined the working group's session on the CSI campus in November. He presented highlights of his vision for the site and stood for questions.

Mr. Ryerson clarified the difference between the Discovery Center and his Western Heritage Museum. He explained that the museum will be focused on settlers up to 1900's and that there is a strong partnership with the Native American population. Exhibit space will be available for a travelling museum. Rick doesn't think that the content will overlap since U of I will focus on agriculture. He suggested that the two entities need to be connected for greater overall success. Mr. Ryerson has indicated he has a Plan B should the Discovery Center not go forward.

An MOU has been signed between U of I and Rick Ryerson. In February 2022, UI and Charter Equities (Rick Ryerson) entered into a non-binding MOU to possibly exchange properties the parties separately own near Jerome ID. Based on a subsequently completed property value appraisal, UI would convey its current parcel near Jerome and \$400,000 to Mr. Ryerson in exchange for his nearby parcel. It was the conclusion of UI administration that Mr Ryerson's parcel was superior for the development of UI's proposed "Discovery Center" because of its more prominent location and the parcel's adjacency to a planned development Mr. Ryerson has proposed. The MOU anticipated that any subsequent binding exchange agreement between UI and Charter Equities would include a condition that before exchange both parties would have approved the other party's development plans.

As originally envisioned, the facility was intended to educate school children (K-12), the public, legislators, and tourists visiting Idaho on their route to Sun Valley about food production in Idaho. Through a series of

changing interactive displays, the DC as proposed, would provide the avenue for many of our commodities to tell their story – highlighting the positive aspects of their production with respect to impact on the economy, nutritional benefits, sustainable production practices, etc. The Agri-Tourism piece of this concept pointed the working group to look at tourism data and expertise to provide input to the deliberations. (See attached tourism data provided by Idaho Department of Commerce – Addendum B)

The facility would allow the University to sell Idaho products and would provide a multi-functional meeting space. Finally, the design would include animal pens and areas that could be used by 4-H, FFA and high school educators in the area.

The acreage U of I acquired along U.S. 93 was purchased in 2019 from Arlen Crouch at a discount with a considerable ‘in kind’ contribution. While many in the Magic Valley are extremely positive and quite vocal in their support of the DC, to date the University has been unable to generate additional external financial support. At this point the U of I would need to either borrow money to build the facility or work out a ‘built to suit’ with a developer where we rent the facility with an eye toward eventual ownership.

A thorough feasibility study of the DC was conducted in 2021 that examined the cost of the building and operations (among other variables) vs. a potential revenue stream. See Full Points Consulting Report – Addendum A. Proponents of the DC suggest this project provides U of I a chance to have a greater presence in a critical area of the state. They argue that gains would result from partnerships with CSI and expanding our educational programming in the Magic Valley. That being the case for a return on any investment in facilities, the group took a look at what is the best location for us to begin launching these programs.

According to Points Consulting Feasibility Study, the Discovery Center is likely to come close to covering its costs once fully stabilized (between years three and five of operation). It was noted that the University would need to provide considerable support during start-up, amounting to an estimated \$2.13 million in the first five years. Additionally, it is estimated the U of I would also have to pay ongoing costs after this point, in the range of \$282K/year. To subsidize these costs, it has been suggested U of I could commit resources to develop popular and recognized products at the Food Technology Center in Caldwell that develop a strong

retail and e-commerce following. If the University could align programming, location and financial investment, the Discovery Center could provide a significant boost to the Jerome County economy and a vital home for agribusiness and agricultural activity in South Central Idaho.

TWIN FALLS LOCATION

Expansion of the Applied Technology and Innovation Center (ATI) on the CSI campus

In CSI’s preliminary planning, there are accommodations for a broad sharing of the new space in support of Food Science/Processing and CAFE partnerships as well as classrooms, labs and dedicated office space for U of I faculty. This original project was funded primarily with federal (EDA) money. It is important to note that it is the current home of their Food Processing Technology program and Automation Engineering Technology that serves local food processing industry partners.

The intent of the addition is almost entirely around food, including meat science. Other components may include (CSI):

- Office space for Region IV Development Association, Southern Idaho Economic Development, CSI Workforce and Economic Development, and the Small Business Development Center.
- Relocation of Culinary Arts including Baking and Pastry as well as Hospitality Management. It is CSI’s intent to incorporate a rooftop event space that will serve these (and other) programs.
- Various industry training activities including meat cutting.

The project is not 100% scoped yet, but preliminary estimates put the building at around 32,000 sf. A white paper has been prepared in addition to a programming spreadsheet that was used in support of a BBB grant submitted a few years ago.

There have been lower-level discussions around CSI and the U of I possibly connecting on a joint fundraising campaign for expansion of the ATI Center. Much of what has been discussed focuses on food science/processing at the Discovery Center that could be achieved at the expanded ATI center. As stated earlier, this was part of the original CAFE plan.

Todd Schwarz, Provost at CSI and a member of the working group has re-started meetings with leadership about the ATI Center and focused on applying for a promising federal grant that would result in a significant investment in this partnership.

SCRIBE:

Amy Calabretta

Marketing & Communications Manager, CALS

This subcommittee focused our attention on the potential for non-credit educational offerings and tourism. It was understood that the mission is to increase the presence of University of Idaho in southern Idaho, specifically the Magic Valley area in the areas of teaching, research and outreach in a way that it can be sustainable.

As a companion to the research dairy, the original vision of the Discovery Center was to be a hub for educational activities with a two-fold mission of educating the public about where their food comes from and promoting the agriculture industry in Idaho. The following describes the original vision for the Discovery Center.

The educational activities at the Discovery Center would vary from large group producer meetings to school classroom field trips to individual self-guided tours for all ages through interactive displays telling the story of Idaho agriculture. The Points Consulting Feasibility Study warned against a museum type facility – it will need to be a fully interactive, constantly changing educational experience.

The proposed design of the Discovery Center includes a total square footage of 23,000 with 10,000 square feet of the building dedicated to an area for interactive displays. It would also include meeting space to accommodate 150 people for educational classes, workshops and seminars, retail space and an outdoor animal pavilion. The meeting/classroom space would be designed with flexibility to be divided into small spaces to accommodate multiple smaller classes or breakout groups on site. A warming kitchen was included in the design so food service could be included in the educational offerings. The meeting/classroom space would include technology to facilitate distance educational class offerings from the various University of Idaho campuses and extension offices located throughout the state and a direct live stream feed from the CAFE Research Dairy in Minidoka County. The meeting/classroom space could be accessed separately from the rest of the facility to accommodate evening activities for Extension and University of Idaho classes as well as events hosted by the community.

As proposed, the display area would be the size of approximately two basketball courts. Interactive displays using gamification to teach concepts would be incorporated throughout the display areas. The displays would be rotated to avoid stagnation and apathy to encourage return visits by patrons. The displays representing the different commodity groups could include a visual tractor simulator, the introduction of water and power on agricultural land, a simulation of milking a cow, a model of ruminant digestion, etc. The outdoor animal pavilion would allow 4-H clubs and FFA students a place to conduct livestock judging contests and shows. In addition, there could be opportunities to educate and provide experiences for elementary students in a petting zoo context, and demonstrations on milking a cow as well as animal care highlighting careers associated with animal agriculture.

A retail component would promote the sales of Idaho products, provide a reason for drive-by tourists to stop, and support the operations of the DC. To enhance the tourist experience retail local entrepreneurs could market their products for retail sale. The sub-group concluded that ice cream sales would promote the connection to the dairy and appeal to locals as well as tourists. Idaho Milk Products have expressed an interest in selling more retail products and could be a good partner. True West Beef Snake River Farms American Wagyu jerky could be a partner as well. Local branded apparel was also an item that was identified as a possible revenue source for the retail side of the DC.

The subcommittee supports the vision of the major design aspects of the facility but also recognizes the sizeable investment needed to bring this vision into reality. The following is a compilation of the many ideas that surfaced during our deliberations around programming for the Discovery Center site.

EDUCATIONAL OFFERINGS: 4-H FOCUS

University of Idaho Extension has hired a 4-H STEM Extension educator, Matt Fisher to specifically deliver agricultural STEM programming to youth in the Magic Valley Area. Partners that Matt has visited with or is in the process of meeting in the Magic Valley include Chobani, Agropur, McCain, Simplot, True West Beef; statewide partners are DairyWest, Amalgamated Sugar and Commodities/Bureaus include Farm Bureau, Snake River Sugar Beets, Idaho Wheat Commission, Idaho Forest Products Commission, Idaho Potato Commission.

Matt's vision is that the Discovery Center's goal would be to educate school groups/public in three areas (with the help of Extension employees):

- a. Nutrition and Sustainability
- b. Youth and Adult Education and Awareness
- c. Social and Environmental Impact

Nutrition and Sustainability

Interactive displays, AG STEM Challenge (youth designing programming robots to accomplish tasks in agriculture—testing soil samples, growing mediums, transferring seedlings, etc.), ePotato multidisciplinary and multimedia program, Family and Consumer Science curriculum.

Youth Education and Awareness

Opportunities for schools, out of school network, day camps to come to the Discovery Center for teaching and hands-on experiences. 4-H would play a big role here using 4-H national curriculum and Idaho created curriculum: Ag Innovator Challenge, Maker Space STEM modules, plant and animal science, etc.

Social and Environmental Impact

What is being done within Extension and agriculture? An example: How is a county affected by dairy farmers? How is your life affected? A cow can eat what humans cannot and still make high-protein food for human consumption. How many humans can be fed with high quality food? A tie into the dairy since operations may be live streamed.

CONNECTING WITH CSI

In addition to calling out the many opportunities to support the education offerings from our 4-H and extension team, the outreach subgroup also spent time brainstorming other ideas which intersect with the focus of the other two subgroups: academic programs and research. Below is a partial list of some of the areas where we see University of Idaho's expertise that could serve the Magic Valley and strengthen our partnerships with CSI. **It is important to note, we did not debate how some of the programs would fit into current SBOE policy or conflict with current regional restrictions for programming.**

1. Current workforce shortages are driving an interest in internship programs. This usually takes the form of students attending school part time and working in a corporate environment part time. This can be done at the high school, CSI or, college level with U of I.
2. STRAP – School to Registered Apprenticeship Program is another apprenticeship / internship program where students have worked with Agropur, Automated Dairy, AA Dairy, etc. with a path to employment by the sponsor company upon graduation.
3. Cesar Perez from the Jerome CSI Center indicated that CSI has many Hispanic adult learners who would be referred to the Discovery Center and engage with the programming and destination services offered. The U of I Juntos 4-H program would be a great student peer resource to incorporate in the Discovery Center and help serve students of color as they navigate relationships with the Discovery Center.

4. Agricultural Technology, which includes Robotics, is becoming more and more popular with the efficiencies and lack of qualified and committed employees. Robotics are used in various dairy operations, farming irrigation insight, of planting and cultivating, maneuvering tractors, and more. Robotics are also used with crop management in using drones for monitoring crops and smart pivots, satellite imagery, and artificial detection that communicates with the farmer. Again, courses can be established at the high school, CSI or, college level with U of I.
5. The Veterinary Technology (Vet Tech) program at the College of Southern Idaho is thriving. This program allows for individuals to be a small animal Veterinarian or Vet for dairies. A little-known fact is that we have 500,000 head of dairy cattle in the Magic Valley. Each cow is milked with automated milking equipment three times daily producing 90lbs of milk per day, per cow. This totals 45 million pounds per day of milk that is processed by approximately 12 processors in the greater Magic Valley. With this cow count, there is great demand. There are also thousands of beef cattle in the Magic Valley needing veterinary services, although not to the extent of the dairy cattle.
6. Logistics which includes warehousing and trucking, is also a huge area where U of I can be involved in education. This is a much more sophisticated business than one would think. Many trucking firms have over 100 trucks in their fleet that have to be monitored, loaded and repaired constantly. Our operations and supply chain management expertise could serve the large dairy operations.
7. Lab work for the U of I research dairy, processing companies and private dairies could be an important service and course offering for University of Idaho. In addition to a Lab operated by U of I, other labs could be part of a consortium for practical experiential learning focused on research.
8. Paving the way for students to start their own Ag Business could be a great course offering for CSI and U of I to join forces and support entrepreneurship education. Succession Planning is another benefit of educating our students to pursue careers in agriculture. It will help to keep the industry alive for the future.
9. In education, STEM stands for Science, Technology, Engineering, and Mathematics. In Ag, it might stand for Science (Research & Development), Technology (Agricultural Technology), Engineering (Crop Management), and Mathematics (Logistics).
10. Events like the Food Fest planned for Jerome with U of I, Kimberly Good Neighbor Days, Dairy Days in Wendell, etc. are ways for U of I to gain exposure for the Discovery Center and the educational programs.

OTHER EDUCATIONAL OPPORTUNITIES:

- A festival similar to the Trailing of the Sheep Festival held in Ketchum. Look to celebrate the animal that produces these great products; have vendors that sell products made from cows; etc.
- Take visitors out to a farm to see cows or something through virtual reality. Partner with processing plants and local dairies for tours. Maybe something in June during Dairy Month.
- During harvest, a festival highlighting all the foods produced in Idaho; cooking classes using Idaho products.
- Adventure sport events are a huge draw – could draw in educational information related to different water issues. Bike tours through agricultural areas is also popular. Tying in outdoor recreation and great food options. Could also gamify that by having a passport for different tours, food locations and outdoor activities.
- Educational programs could be in conjunction with agricultural businesses in the area. A Farm to School approach. For example, Millenkamp Dairy is located in Jerome and offers tours to the public. Youth and adults could see in action what they have learned at the Discovery Center.

TARGET AUDIENCE

For the Discovery Center to be successful, it would need to be supported by local people and tourists to the area. Local people would need to view the Discovery Center as a place where they could learn something new each time they visit. It would be the local place for educational meetings and a place where they could bring their out-of-town family and friends. The Discovery Center would not be successful in accomplishing the land grant mission of the University of Idaho without buy-in from the local population.

TOURISM

See Addendum B – Visit Idaho: Department of Commerce Tourism Data

Income from tourism would be critical for the sustainability of the Discovery Center as indicated by the Points Consulting Feasibility Study. Research indicated that there are over 56,000 cars that stop at the I-84 exit daily. For the Discovery Center to attract the drive-by tourist, it would need to offer an experience that is quick and meaningful.

OUTREACH AND TOURISM RECOMMENDATIONS AND OBSERVATIONS

1. Refine our scope. We cannot sustain a high level of excellence in what we do if we try to meet too many needs all at once. This white paper addresses all of the following: for credit and non-credit education, research opportunities, supporting the food processing industry, providing a tourism experience for the area, and meeting the community needs for meeting space. These efforts need to be prioritized in alignment with the University's current strategic plan.
2. Further define the project with a more robust business plan. With the additional information from the other subcommittees on the financial return on investment, how much ongoing institutional resources would be needed to support the Discovery Center project? The largest population base is in Twin Falls and the probability of this population driving 4.5 miles from Twin Falls

to the Crossroads was questioned. The Crossroads has been the main location discussion because of traffic, but other factors should be considered.

3. There are other facilities in the area being planned that could accommodate programming or be in competition with the vision of DC. CSI is planning a new 20,000 square foot facility in downtown Jerome. They plan to start building this facility in late 2023. A Children's Museum in Twin Falls has a partnership proposal in the works with only 7% of their fundraising completed to date.
4. If the capital project at the Crossroads is developed further, a different name should be considered from Discovery Center to something that more accurately describes the project. While CAFE (Center for Agriculture Food and the Environment) would reflect the entire project and the dairy located in Minidoka County, the CAFE brand could be confused for a restaurant.

RESEARCH OPPORTUNITIES

Carly Schoepflin

Director, CALS Communications & Strategic Initiatives

The following information is a compilation of the research opportunities that intersect with expertise on the ground in the Magic Valley and compatible with the CAFE project.

AQUACULTURE

The global aquaculture market was valued at \$204 billion in 2020 and is expected to reach \$262 billion by the end of 2026, growing at a compound annual growth rate (CAGR) of 3.6% from 2021-2026. The U.S. faces a significant and growing seafood trade deficit with nearly 90% of consumed seafood and over 50% of aqua-cultured products imported from foreign countries. Further, many exporting countries do not possess regulatory frameworks that meet U.S. health, environmental, and safety standards.

In the US, Idaho leads the way in trout production, with more than 70% of trout produced in the US coming from the Magic Valley. In the past two years, the industry has seen consolidation and substantial investment from outside of Idaho. With this, there has been an adoption of new technologies and research-based management being emphasized, and the industry is expected to more than double over the next decade. These trends will not only lead to greater interactions between Idaho producers and researchers but also require a more technically trained workforce. Both the U of I Aquaculture Research Institute (with faculty in CALS, CNR, COS, and COE) and CSI are active partners with the Magic Valley aquaculture industry. These collaborations can be expanded by engaging additional faculty across the U of I, especially those working on sustainability, water, food science, biosensors, engineering, and data science. Through working with CSI, these research efforts can be integrated in aquaculture workforce development, extension, and course offerings.

RESEARCH AREAS FOR IMPROVED SUSTAINABILITY OF THE AQUACULTURE INDUSTRY IN IDAHO

Aquaculture is a highly diverse activity involving food production, but in the state of Idaho also supports fisheries enhancement and fisheries stock restoration. Like all animal production, aquaculture involves the application of an array of scientific disciplines, including fish nutrition, genetics, physiology, immunology, water quality, food science, engineering and data science. The U of I Aquaculture

Research Institute (ARI) has served the Magic Valley aquaculture industry for nearly three decades, through both extension support and research based at the Hagerman Fish Culture Experiment Station. The CSI aquaculture program dates back to the 1970's, providing aquaculture students hands-on experience at the Priebe Hatchery in Twin Falls. The program offers an intermediate technical certificate and an associate degree.

Recent changes to the CSI program have resulted in CSI moving its fish hatchery to the Jerome side of the canyon at Pristine Springs, closer to the proposed Discovery Center. They also have seen turnover in the program, hiring of a new aquaculture instructor this year. Together with the hiring of a new Aquaculture Extension faculty by U of I, this has led to renewed collaboration and discussions of developing a 2+2 program and joint workforce development activities. Furthermore, the largest trout producer, Riverence, has been engaged with CSI and U of I regarding aquaculture education and workforce development, expressing a willingness to support such efforts. These fortuitous events have created the perfect opportunity for a comprehensive aquaculture education and research program involving multiple colleges, institutes, and programs at both U of I and CSI.

The areas addressed below represent potential educational, outreach and research opportunities that highlight existing strengths at both U of I and CSI. This information can also be used as ARI builds a stronger, more collaborative aquaculture program with CSI. This can also serve to encourage faculty working on sustainability, water, food science, biosensors, engineering, and data science to collaborate in this area. Finally, the ROI will come from addressing the needs of a critical industry in the Magic Valley and state that should be able to generate support from the local industry, the USDA-ARS and NIFA programs, and the United Nations Sustainability Development Fund.

AQUACULTURE - TROUT NUTRITION AND FEEDS

U of I ranks #1 in fish nutrition research programs in North America and is globally recognized for its fundamental and applied research to support sustainable feed development. ARI research and extension faculty contributed to nearly \$2M in federally funded research to improve water quality, through optimized nutrition and feeds, of effluent

coming from aquaculture facilities in the Magic Valley. Furthermore, ARI research and extension efforts, where industry contributed both in-kind matches and estimated direct expenditures of \$30M, led to a 40% reduction on total phosphorus discharged. However, increasingly stringent phosphorus discharge limits require innovative research and feed technologies, especially in light of industry goals to more than double production.

Another big component of feed sustainability is the transition away from high fishmeal/fish oil feeds. ARI faculty lead the nation in this area of research while working with national and regional commodity groups, ingredient, and feed companies. U of I and the USDA-ARS Trout Grains Lab with researchers in Hagerman, Aberdeen, and Bozeman have recently focused on protein concentrates from barley, corn, alfalfa, soy and insect proteins, and well as oils from oilseed crops, such as high omega-3 canola. Novel utilization and processing of row and oilseed crops provide alternative markets and profitability. This area of research has obvious intersections across crops, nutrition, engineering, cows and fish.

AQUACULTURE - WATER QUALITY AND QUANTITY

U of I Extension faculty have served on the Middle Snake River Watershed Advisory Group and Technical Committee since its inception in 1996, providing an interface for the Idaho state government, DEQ, EPA, and aquaculture facilities and provide educational and on-farm visits to implement BMPs and ensure NPDES compliance for state aquaculture facilities. New research by U of I ARI faculty and USDA-ARS partners at the HFCES are engaged in characterizing water quality and the microbial ecosystem on fish farms. However, with higher production, lower P discharge allowance, and lower water flows in the Magic Valley, there is a critical need for alternative production methodologies. The past few years have seen inland recirculating aquaculture systems (RAS) popping up in the US and across the globe. Thought leaders in the aquaculture industry see RAS as the solution to sustainability and global fish demand. The Idaho trout industry is interested in adopting partial water reuse. To be successful, they will need new technologies and a technically trained workforce. This is where the U of I and CSI can collaborate to create a small-scale

RAS system for training skilled professionals to enter the Idaho aquaculture workforce. It also presents opportunities for greater engagement across colleges, institutes, and programs to develop new water technologies, sensors, and water quality remediation, as well as support data management. Further industry support might be provided through a water quality service lab.

AQUACULTURE – DISEASE AND ANIMAL HEALTH

The Idaho aquaculture industry lacks a diagnostic service center and access to veterinary services specifically for fish. Currently, to test for diseases, samples must be sent to Washington State University and results are not timely enough to be effective. Furthermore, any disease treatment requires a veterinary relationship and prescription. Research in fish health and immunology is also critically lacking in the Magic Valley. While the research at the Hagerman Fish Culture Experiment Station on microbial ecology and water quality applies to fish health, it does not directly address pathogens, disease mitigation or epidemiology. This is an area for expansion and collaboration with CALS and could be an added strength for training at CSI through fish health-tech training.

FOOD PROCESSING – INCLUDING MEAT SCIENCE

Several trends are driving the demand for animal-based foods in the US and globally. These trends have science and technology components that CALS and CSI faculty can help to address. This can be expanded by engaging other colleges at U of I in the food science/processing area. Since Food Processing has a strong engineering component, there are real opportunities to involve faculty from the U of I College of Engineering as well as the Engineering Program at CSI.

Research areas for improved sustainability of the Food Industry in Idaho Food Science is a cross-disciplinary field involving chemistry, physics, nutrition, dietetics, microbiology and engineering. Food processing is a widely applicable area designed to provide the scientific knowledge to solve practical problems associated with food production. It is defined as any procedure that enables the improvement of texture, nutrition, and safety of food products, including but

not limited to heating, mixing, canning, freezing, drying, milling, and fermenting. Given these extremely broad definitions, building a comprehensive food science/food processing program will involve multiple colleges/programs at both U of I and CSI.

The areas addressed below represent potential educational, outreach and research opportunities that highlight existing strengths in the food and animal science programs at both U of I and CSI. This information can also be used as AVFS builds its Food Science program going forward while CSI considers what will be the focus in an expanded ATI center. This can also serve as a guidepost if COE is interested in investing more in this area. Finally, the ROI will come from addressing the needs of a critical industry in the state - via support from the food processing industry throughout Idaho as well as support aligned with selected USDA programs.

FOOD PROCESSING – FOOD SAFETY

Microbial food safety – Dairy and meat products are high risk foods and susceptible to vegetative pathogens such as *Listeria monocytogenes* and pathogenic *Escherichia coli*. This can even be a concern in pasteurized refrigerated and frozen foods (e.g., Blue Bell Ice Cream).

Another ongoing concern is with thermostable bacterial spores (*Bacillus* species) that are opportunistic pathogens that can survive in milk powder and *Cronobacter sakasakii* a heat tolerant microbe that also survives in powdered milk and poses a risk of illness from infant formula. Moreover, *Clostridia* species pose risks to processed meat products and the use of natural or chemically derived nitrates and nitrites are important to aid in maintaining cured meat safety and quality.

Online retailing of perishable foods such as dairy and meat products will force the industry to reevaluate current processing, packaging, and distribution systems for these foods. The growth of pre-packaged ready-to-heat, ready-to-eat meals has created new food safety challenges in both the consumer and restaurant environment (e.g., see the episodes with Chipotle food borne illnesses). Addressing these demands will require new technological solutions, particularly at a time when food additives and preservatives are being frowned upon from a marketing standpoint.

Other considerations are that foods developed to meet the nutritional, portioning, packaging and preparation

needs for children and the elderly must be designed in such a way to be safe for these vulnerable individuals. Furthermore, some locally sourced, natural, simply made and additive free foods are not inherently safer than conventional foods and can pose their own unique food safety risks (e.g., raw milk cheese) which needs to be researched as well as taught and discussed.

The University of Idaho have faculty both on and off campus in the Department of AVFS that focus on food safety microbiology research (Drs. Unlu, Bohach, Minnich, Ryu, and Hamlett) as well as teaching and outreach (Drs. Colle and Bass) who can provide feedback and technical assistance with microbial growth parameters, survival, inactivation strategies, and risk assessment. Furthermore, the USDA certified meat laboratory on the Moscow campus provides hands-on learning of the use of meat processing equipment and ingredients as well as an expert meat processor (James Nasados) who can lead technical training of students in the meat processing arts.

Chemical contaminants – Milk and meat are routinely screened for drug and agricultural chemical residues, mold toxins (from milk and feed) and unapproved additives (e.g., melamine). Dr Ryu is an expert in chemical food safety with a focus on mycotoxins in milk and dairy products. His work also includes the effects of processing on the chemical and toxicological properties of contaminants and toxicants. Furthermore, Dr. Hamlett focuses on chemical and physical contaminants in food during her food safety training workshops.

FOOD PROCESSING – FOOD QUALITY

Microbial quality

Microbial quality for dairy and meat involves both beneficial microbes and spoilage microflora. New foods such as dairy based beverages, high protein foods, and ready-to-eat or ready-to-cook prepared meals or snacks will pose stability challenges for food producers.

Dr. Unlu studies food spoilage microorganisms and has developed methods for their control in foods. Dr. Janna Verburg-Hamlett works with TechHelp and the U of I to provide HACCEP training for employees of food processing companies in Idaho and performs inspections for companies when requested. Dr. Bohach and Minnich have background knowledge of microbial contamination of milk as related to production practices and may be able to contribute to this area as

well. Moreover, Dr. Phil Bass investigates the impact of microflora and the microbiome on dry-aged beef. Dry-aged beef and other meat products, continue to gain in popularity throughout the United States and the world. The University of Idaho has conducted numerous studies on dry-aged beef and the microbes that interact with the product.

Appearance

Dairy and meat foods have very specific and often difficult to quantify appearance characteristics. Defects are easy to define (bleeding of color, cracking, syneresis, two toning, browning, etc.) but are often difficult to control. The scientific term for this area of science in dairy processing is microstructure, and Dr. Da Chen has research expertise in characterizing the appearance of dairy foods at multiple structural levels. Microbial impact on fresh meat is also a concern with shelf-life appearance and stability. At the University of Idaho Dr. Michael Colle is a leader in retail meat shelf-life and color.

Flavor retention

Flavor in dairy and meat foods is often impacted by lipid oxidation, protein-polysaccharides interactions, lipid content and microbial fermentation, which can change with formulation, processing and storage conditions. Development of desirable flavor and reduction of off-flavor is essential for the quality attributes of desirable dairy and meat products.

Dr. Da Chen has years of experience on characterization of volatile compounds from different types of food products using GC-MS by combination of solid-phase extraction. His experience could be extended to dairy foods around impact of food ingredients and processing on the flavor of milk, yoghurt and cheese. Drs. Phil Bass and Michael Colle regularly evaluate the flavor of meat products using trained sensory panels, consumer sensory panels, and food chemistry assessments (TBARS, volatile compounds, etc.) and train students on these assessment practices.

Texture and tenderness

Texture and rheological properties of dairy foods associate closely with their mouthful feelings, which are more critical to their overall acceptability and quality perception compared to appearance and flavor. Varying the fat and protein content of the milk, the types of cultures, the amount of rennet

prior to production of cheese or yogurt could affect final product texture. Dr. Da Chen has experience on measuring the texture and rheological properties of foods with respect to dairy and dairy ingredients. Drs. Phil Bass and Michael Colle utilize Warner-Bratzler shear force analysis to investigate tenderness of meat products.

Nutrient retention

Stability of probiotics, vitamins, minerals (calcium) and protein components are important features of specific dairy foods, particularly those that have undergone thermal processing (pasteurization or dehydration) or have been exposed to UV light (dehydration, packaging). Faculty from CALS (Ryu, Unlu,) and the College of Engineering (Wu) have analytical skills to monitor loss of key nutrients by chromatographic methods or other appropriate tests such as loss of microbial viability. Drs. Phil Bass and Michael Colle collaborate with research colleagues to assess proximate analysis, volatile compounds, and metabolomics of meat products.

Protein

The increasing demands of high protein foods drives food industries to incorporate more proteins (mainly dairy proteins) during food production. Due to the highly reactive characters of proteins, their addition is most likely to change the texture, taste and nutrition of food products. A challenge is the optimization of protein content and modifying their structure by processing so that high protein foods with desirable quality can be achieved. Dr. Da Chen (AVFS) has a strong background in protein isolation, modification, physicochemical and functional properties characterization, as well as evaluation of their structures on the effects of food product quality.

Sensory evaluation

Sensory characteristics of dairy and meat foods are very complex. Trained and consumer panels are commonly used for evaluation of animal food products. Further, instrumental methods including gas chromatography-mass spectroscopy (GC-MS) and electronic tongue can also be used to assess the sensory experience of foods. Dr. Phil Bass and Dr. Michael Colle at the University of Idaho have extensive experience in sensory evaluation in meat products, whereas Dr. Chen enables to conduct flavor compound analysis using GC-MS in dairy foods.

FOOD PROCESSING

Process Modeling

Processors are always looking for ways to increase efficiency, reduce energy, and develop ways to reuse wastewater. Drs. McKellar and Mirkouei (COE) and Dr. Wu (COS) have thermal and chemical process modeling skills that can assist large processing operations in these critical areas.

Fermentation technology

Fermentation is the critical process for the manufacture of soft and hard cheeses and yogurt. Fermented dairy beverages such as kefir are growing in popularity at a rapid pace.

Dr. Unlu is an expert in various aspects of fermentation technology and has a BS degree in biochemical engineering. Moreover, Dr. Phil Bass and James Nasados have experience in meat fermentation and regularly train students on the art of fermenting meat products.

Fermentation cultures/probiotics

Selection and use of fermentation cultures is critical to the production of food. Probiotics such as Lactobacillus strains can be added to various foods for their digestive health promoting properties. Dr. Unlu has substantial expertise in fermentation microbiology, particularly with Lactobacillus and probiotic strains. Dr. Phil Bass and James Nasados regularly train students and professionals on the use of Lactobacillus strains in meat products for both safety and flavor development.

Milk processing (filtration)

These are critical unit operations for recovering milk and whey protein components, concentrating milk proteins, and removing lactose.

Dr. Wu (COE) is familiar with these technologies because of her background in engineering and protein processing.

Pasteurization

Thermal and non-thermal – These technologies include conventional pasteurization, aseptic processing and packaging, commercial sterilization, and high-pressure processing (non-thermal

pasteurization). All these techniques are used to make milk safer, or as is the case with high pressure processing to reduce microbial load while also modifying protein functionality.

Drs. Unlu and Wu have expertise in this area.

Packaging

Unique packaging design has been shown to reduce quality defects such as cracking and weeping in dairy gels. Active packaging involves technologies to improve nutrient retention, maintain quality and extend shelf-life of dairy and other perishable foods. This can include sensors that monitor microbial quality. Dr. Michael Colle has practical industry experience in meat product packaging technologies as well as having great interest in pursuing more meat packaging technology research.

Dehydration and encapsulation

Dehydration is required to produce milk powder and is an important ingredient in dry mix beverages including infant formula as well as an ingredient in many other foods. Whey protein and other milk fractions are commonly dehydrated and sold in a powder form. Encapsulation commonly involves the formation of a protective chemical shell around a heat labile component with dehydration being part of the production process. Nutrients (lipid soluble vitamins), probiotics, and flavors are components in dairy foods that could be present in a microencapsulated form. Drs. Unlu and Chen have expertise in dehydrated dairy products. Dr. Phil Bass and James Nasados regularly discuss and train on the value of dehydrated meat products for adding value, extending shelf-life, and maintaining meat product safety.

FOOD PROCESSING – FACILITIES

Issues at production facilities include the use and reuse of water, and modeling processes to improve efficiency. Dr. Moller (Department of Soil and Water Systems) has considerable experience in water treatment using Biochar. Dr. Mirkouei (COE) has experience with biochar and Dr. McKellar (COE) has experience with basic milk processing models. The University of Idaho also has a small-scale food processing pilot plant at the Food Technology Center in Caldwell, Idaho. The Food Technology Center is available to private entities needing access to food processing and to learn about creating and marketing new products.

The University of Idaho also has a very active USDA meat processing facility on campus. The meat processing facility allows for training and research for all aspects of animal processing from harvest to further processed and ready-to-eat meat products. Beef, pork, lamb, and some goats are processed at the meat facility on the Moscow campus.

Additionally, CSI's Jerome Center plans include dedicated meat processing space and the preliminary plans for the ATI Center expansion do as well. The University of Idaho is committed to collaborating with CSI to provide food processing training including faculty participation from the U of I when needed. Finally, the CAFE project includes construction of dairy/food processing facility and the U of I will collaborate with CSI in the construction and use of that facility.

Overview: Center for Ecohydraulics Research (CER)

The Center for Ecohydraulics Research (CER) is an internationally recognized organization dedicated to the study of critical water resource issues, located in the Idaho Water Center in Boise, Idaho's Capital. CER conducts research and graduate education and provides expertise related to preserving, restoring, and holistically managing river systems in a sustainable manner.

CER conducts interdisciplinary research, both fundamental and applied, on water-related issues involving hydrology, fluid mechanics, geomorphology, stream and floodplain ecology, and water resource management. Research is conducted through a combination of laboratory studies, utilizing the state-of-the-art CER Stream Laboratory, field programs, cyberinfrastructure development, advanced computer simulation, microsensor development, and data mining. Research findings are disseminated to policy makers, academic peer groups, management agencies, students, relevant business communities and the public through journal articles, reports, workshops, and presentations.

CER provides a unique and focused educational, professional, and life experience for our PhD and MS students, faculty, staff and undergraduate students interested in a research experience. The quality and diversity of students define the research center. CER strives to offer a recognized high quality program through interdisciplinary classes, problem-based courses, and innovative research, frequently distinguished by the scale of the research and scope of collaboration with agencies, national and international research institutions.

CER provides value-added academic expertise to support policy makers, agencies, local government, NGOs, the consulting community, and industry to address state and regional problems. CER was originally established to address needs identified by local agencies and consultants in the State of Idaho. Its activities are undertaken to add value to existing programs through expertise and collaboration, knowledge discovery, equipment, and newly developed computer simulation and modeling tools. Typically, these activities involve graduate students, many of whom subsequently join agencies and consulting firms in a related field, thus contributing to the intellectual capacity of the region.

CER supports international research and education activities for the benefit of our students and the host countries. International experiences foster global cultural understanding and extend scientific knowledge of diverse river systems.

CER AND THE IDAHO CENTER FOR AGRICULTURE, FOOD AND THE ENVIRONMENT

The mission of CAFE is to develop science-based answers to address key challenges faced by agriculture and food production, as well as provide solutions and increase the economic viability and sustainability of agriculture (especially dairy systems in Idaho). One of CAFE's top priorities is to manage water resources sustainably. In such context, CER is uniquely positioned to provide scientific and technical support for the development of holistic and synergistic water resources management approaches specifically tailored to local needs and regulatory requirements. CER can assess and predict the effects of water removal from, and discharge to, inland waters on ecosystems and aquatic habitat quality across scales, from the scale of single structures to entire watersheds.

CER's expertise can support research related to watershed restoration, riverine dynamics, as well as nutrient and sediment management, all focused on identifying sustainable water use. CER can quantify nutrient transport and sediment erosion from agricultural areas and their interactions with river morphology, water quality and aquatic organisms. CER's expertise could be used to examine the impact of different grazing, irrigation, and fertilizer deployment strategies, as well as their effects on nutrient and sediment loads, receiving water quality, and potential green-house gas emissions. CER can provide support in developing predictive models and in

designing, building, and implementing environmental monitoring systems for constituents of concern, such as water temperature, dissolved oxygen, sediment, electrical conductivity, nitrates and phosphorous.

In summary, the key elements of CER research that are closely aligned with CAFE mission are:

1. Water resources monitoring (including surface and subsurface water bodies as well as examining their mutual and dynamic interactions)
2. Nutrient fate from fields to the broader environment and water re-use strategies
3. Field erosion, soils losses, sediment transport and deposition
4. Reduce detrimental impacts on aquatic species
5. Impacts of flood and drought on receiving waters

ACADEMIC OPPORTUNITIES IN THE MAGIC VALLEY

University of Idaho Junior | English & Pre-Medicine

The Magic Valley offers critical opportunities for the University of Idaho to expand its academic offerings in this region of the state through a partnership with the College of Southern Idaho and the potential building of the Discovery Center. These opportunities involve growing distance programs, partnering and collaborating with our two-year sister institutions, expanding student services and experiential learning, rekindling previous transfer articulations and pathway programs, and building the University of Idaho's on-site presence at the College of Southern Idaho. Some of these opportunities already exist and could expand further, particularly given the state-wide responsibility afforded the Colleges of Agriculture and Life Sciences, Natural Resources, and Law — the latter of which could provide much needed legal services and outreach in the region.

However, further opportunities exist for more significant partnerships with other entities at the University of Idaho, notably the Colleges of Education, Art & Architecture, Engineering, Business and Economics and Letters, Arts & Social Sciences. By cultivating these relationships with the College of Southern Idaho, we could rethink regional responsibilities and provide more excellent educational offerings to our state citizens. We hope this white paper will provide a roadmap for institutional collaboration and programming with the College of Southern Idaho that we could duplicate across the University of Idaho centers with our two-year partners.

We are overwhelmingly concerned with how to provide Idaho citizens with a clear pathway to completing a four-year college degree and making higher education more affordable and accessible across the board. The University of Idaho is well prepared to address this need. We offer an exceptional quality student experience and emphasize disciplinary excellence in all academic programs. Regrettably, several factors limit students from attending our campus. Geographical distance, financial constraints, work and family responsibilities: all of them prohibit students from a traditional residential experience. Therefore, the University must meet students where they are, directly bringing academic programming to them across the state. We can engage more fully in our online distance programs, extension offices, and educational centers in Boise, Coeur d'Alene, Idaho Falls, and McCall. To achieve this objective, however, we must reconsider how we partner with our two-year sister institutions and work together to deliver four-year degree programming and beyond.

We identified five (5) possibilities regarding collaborating in the Magic Valley with the College of Southern Idaho and the potential Discovery Center.

- 1.** The most far-ranging suggestion is that we work to deliver a four-year curriculum directly at the College of Southern Idaho. This curriculum would constitute hybrid programs in which we would combine a two-year residential experience with a four-year online degree option with full-time faculty from the University of Idaho situated on the CSI campus. Students would co-enroll at both institutions, completing their Associates Degree at CSI and finishing their four-year degree online with the University of Idaho. The presence of full-time faculty for these four-year degrees would facilitate high-impact experiential learning – undergraduate research and collaboration, internships, professional development, etc. – and allow in-person faculty advising and mentorship, thereby elevating possibilities for student success. There would be logistical challenges – such as faculty position descriptions, attribution of enrollment and credit hour production, and financial aid assessment – but we can readily imagine reasonable solutions.
- 2.** In tandem with on-site programs, the University of Idaho could explore expanding the student service hub at the College of Southern Idaho or the potential Discovery Center itself. The hub would help provide students with easy access to four-year advising and mentoring, counseling and testing resources, CDAR services, distance/online help, career services, and opportunities for faculty-led experiential learning, notably with service learning, internships and co-ops, and undergraduate research/creative collaboration. It could complement the planned expansion of the Applied Technology and Innovation Center. These services allow Moscow-based students to return home to the south, saving time and reducing debt.
- 3.** As part of the on-site services, there are fantastic opportunities to collaborate with the College of Law. The immediate academic connection is with the 3 + 3 program, which allows undergraduates to transfer seamlessly from their degree program and enter law school, thereby shaving an entire year of cost for their legal education. Similarly, we see possibilities with providing an immigration clinic (as seen on other campus sites) and

offering extensions for law students. The Magic Valley offers the opportunity to expand the Idaho Heritage Project, which creates externships to provide legal services in state counties lacking such resources—potentially opening synergies with law school alums.

- 4.** The potential Discovery Center also offers unique academic opportunities. The museum center could offer a space for a full-time public historian, for example, who would work at both the Center and the CSI campus. This faculty member would have a digital humanities/public history component built into their position description and could connect service learning, internships, and research possibilities at the Discovery Center. Other areas of collaboration include agricultural history, rural sociology, and American Indian Studies. Alternatively, Moscow-based students could benefit from the professional experience afforded by a semester in the Magic Valley and the opportunities afforded by the CSI–UI partnership.
- 5.** Lastly, by expanding into the Magic Valley, the University of Idaho could reinvigorate more traditional partnerships with the College of Southern Idaho. These ideas include strengthening statewide co-admit and co-enrollment opportunities for undergraduate programs in fields such as aquaculture and natural resources; 4 +1 programs in landscape architecture and public administration; the 3 + 3 program in law; MA-level programs in teaching certification and teaching endorsements; as well as new programs regarding specialized certificates (such as the University of Idaho's new sustainability certificate) and other forms of micro-credentialing.

The following is a compilation of the degree programs this group considers to have the most promise in terms of serving the community and launching with investment in targeted faculty and staff to support. In addition, an investment in marketing is needed to promote the opportunities.

DEGREE PROGRAMS FOR MAGIC VALLEY

Degrees noted with an asterisk could be first to launch based on maturity of program and online availability.

College of Agricultural & Life Sciences:

- *1. Current faculty expertise position us to offer a joint CALS/CNR degree in Sustainability & Environment Quality
- *2. Current UI faculty housed at CSI Evergreen Building have expertise to work with Moscow faculty to develop a degree in dairy management & dairy nutrition.
3. Groundwork is set for a meats training program that would start with entry level certificate all the way up to a 4-year degree. This would require a meat science hire on the CSI campus.
- *4. Currently CALS is facilitating the following 2+2 program at CSI and CWI: Agricultural Science, Communication and Leadership which builds upon an associate of arts degree in agriculture.

Graduate Degrees:

Adult Organizational Learning and Leadership (MS)
Human Factors (MS)
Music (M Mus)
Public Administration (MPA)
Movement and Leisure Sciences (MS)
All of the Engineering online degrees
Masters in Natural Resources (MNR)
Environmental Science Masters (online MS)

4-year Majors:

History
Psychology*
Criminology*
General Studies*
Interdisciplinary Studies
Organizational Science

Architecture degree (already in Boise)

Additional Offerings

All of the Business online degrees (Management and HR, Marketing)

Recreation, Sport, and Tourism Management

Anything for which we have statewide responsibility

Existing 2+2 programs with CSI that would benefit from stronger Twin Falls presence/courses:

- Rangeland Ecology and Management (BS)
- Fisheries Sciences with emphasis in Aquaculture and Hatchery Management (BS)

Associates of Science:

Wildland Fuel and Fire Technology (online)

Certificates:

Corporate Social Responsibility
Applied Finance
Fire Ecology, Management and Technology
Human and Community Engagement
Natural and Resource Management
Precision Agriculture
Promotions and Digital Marketing
Technical Program Management
Technology Integration Specialist
Sales Management
Virtual Technologies

Minors:

Spanish
Psychology
Addictions (Psychology)

In addition, we have many programs with 2+2 or Transfer Pathways that we have had for years with CSI and CWI. Here's the link and data:

<https://www.uidaho.edu/registrar/transfer/transfer-pathways>

SUMMARY OBSERVATIONS AND RECOMMENDATIONS

1. It is clear, there is huge opportunity for the University of Idaho to serve the workforce needs in the Magic Valley. These needs could be served by expanding existing U of I academic programs in partnership with CSI. Obvious areas that could be expanded include undergraduate programs in aquaculture, natural resources and agriculture with a focus on food production. Our expertise in the meat science area, and the successful and well-known Vandal Brand Meats program, makes this a natural fit for the Magic Valley. The working group suggests the expanded programming proposals for the area are prioritized and evaluated for best early implementation.
2. There are substantive areas where CSI and the U of I can collaborate specifically in curricular delivery across various disciplines (beyond the agricultural sciences) and develop hybrid programs that combine two-year face-to-face instruction and online course delivery to complete the four-year degree. These hybrid programs would have U of I faculty on the CSI campus who could also provide experiential learning opportunities, notably with undergraduate research, creative activity, internships, and other forms of professional development. These programs would meet curricular demands where the students are, providing greater flexibility in course delivery and a clear pathway to four-year degree completion.
3. The research opportunities comprise a very long and impactful list and are focused on Aquaculture, Food Science/Processing and Water. It will be important to identify a list of priority research endeavors going forward.
4. The ability to deliver on these mission-driven educational programs and research activities will require the right facility to serve our faculty and students in the area.
5. The working group made a visit to the Jerome site and to CSI. The conclusion of that activity helped the group identify our most strategic location in the Magic Valley. There is strong support to join in a collaboration with CSI to expand the ATI Center on the CSI campus. In general, if the University of Idaho is to invest in more programming in the Magic Valley – a location in proximity to the CSI campus shows more promise in terms of stakeholder funding and in service to our student population.
6. Expanding collaboration with CSI (and other 2-year schools) is a priority for the SBOE and the state legislature. As already stated, this collaboration brings us into closer contacts with potential students, provides a facility for research in food/meat science, and will potentially garner support from many of the larger food processors in the area. In addition, there is much less financial risk associated with this collaboration. A partnership with CSI has more potential for external stakeholder and federal funding than a stand alone facility in Jerome.
7. The working group determined that the Jerome site and partnership with Rick Ryerson comes with challenges in terms of fit within our University of Idaho mission but even more concerning is the cost and ROI calculation. One subgroup identified some good ideas for extension programming and tourism for this site. But even then – the costs are prohibitive. It is unclear how much ongoing institutional budget will be required and there was some skepticism about the location's draw to the groups we would be targeting. There is no question that this is a phenomenal location that will be unrecognizable in 20 years – considerable development is already visible at the Crossroads site. However, the short term costs associated with building the DC together with ongoing initial operational expenses without a clear ROI (at least for the next 5 years) makes this an enormous challenge for the U of I. All of the subgroups expressed concerns about the project's financial model and long term viability.
8. An advantage to the site on the CSI campus is the close proximity to our academic partners and to the potential students we would want to enroll in our programs. One recommendation suggested we grow programs specifically in the College of Ag and Life Sciences and build out a second location for CALS similar to the "two locations/one college" model under which we are operating the College of Law.
9. CSI is very supportive of a collaborative expansion of their ATI Center with U of I in mind, and has developed renderings with equivalent square footage in place for this partnership to move forward. CSI remains supportive of all elements of the CAFE project, but is reluctant to have a physical presence or activity in the proposed Discovery Center location due to their current Jerome Center development and the proximity to the CSI campus in Twin Falls.
10. The Development unit within the College of Ag & Life Sciences has endeavored to raise funds for the DC over the past 5 years without success. The proposed project in Jerome has not attracted the same industry interest or investment as the dairy/demonstration farm in Minidoka County.

RECOMMENDATIONS FOR MAGIC VALLEY EXECUTION

It is recommended an execution team is put together at the discretion of President Green and Provost Lawrence to begin mapping the path forward to cement our commitment to the ATI Center and partnership with CSI. The following tasks should be undertaken and issues should be addressed:

1. A lead/project manager for the efforts in Magic Valley should be assigned.
2. The facility needs of the U of I in the Magic Valley area and specifically at the ATI expansion site need to be identified.
3. Finalize the scope and cost for an ATI expansion. A campaign plan should be developed to identify private partners, available University resources, state funding opportunities with PBF, and federal grants that may be applied for in collaboration with CSI.
4. We recommend that a team is assigned to pull together information for the EDA Tech Hub grant which shows promise for significant funding for ATI partnership and vision for expanding our capability in the region.
5. The top four-year viable degree programs should be identified and prepared to launch (preferably soon) and a correlated faculty hiring plan should be developed along with a curriculum mapping and marketing plan for identified programs.
6. A strategic plan to recruit and hire faculty and staff for the Magic Valley should be developed in conjunction with CAFE hiring.
7. In coordination with ORED and with consideration of faculty expertise and interest, map out research focus areas and priorities.

In response to requests by faculty, the Faculty Senate charged a task force to assess employee perspectives regarding the upcoming affiliation with the University of Phoenix. The task force developed the following survey for the purpose of evaluating current levels of understanding with regards to the affiliation and to collect related feedback from employees. The questions are designed to gather employee perceptions and constructive suggestions, which will be informative and helpful to the Faculty Senate in our conversations with administration as we move forward.

All questions are optional.

There will be no identifying information collected in survey questions.

Draft Survey Questions

- 1. In your opinion, how knowledgeable are you about the University of Phoenix and its programs?***

Not at all knowledgeable
Not very knowledgeable
Fairly knowledgeable
Very knowledgeable
Prefer not to answer

- 2. In your opinion, how knowledgeable are you about the details of the affiliation with the University of Phoenix?***

Not at all knowledgeable
Not very knowledgeable
Fairly knowledgeable
Very knowledgeable
Prefer not to answer

- 3. What sources of information have you used to learn about the University of Phoenix affiliation? [Choose all that Apply]***

Local/state news reports (Moscow-Pullman Daily News, Lewiston Tribune, Idaho Statesman, Idaho Ed News, etc.)

National news reports (Chronicle of Higher Education, Inside Higher Ed, etc.)

University of Idaho colleagues
University of Idaho's FAQ and resource website
University of Idaho's written communications
University of Idaho's town halls
University of Idaho's informational sessions with University of Phoenix administrators
Provost Lawrence's meetings with units in October
[NOTE: WE ARE WAITING ON A COMPREHENSIVE LIST FROM UCM OF ALL UI SPONSORED EVENTS PERTAINING TO AFFILIATION - INSERT DATES HERE]
Other (please specify)

4. To what degree do you support the University of Idaho affiliation with the University of Phoenix?

Strongly Oppose
Somewhat Oppose
Neutral
Somewhat Support
Strongly Support
Unsure

Please rate the degree to which you agree with the following statements

5. Based on my understanding of the Constitution of University Faculty (<https://www.uidaho.edu/governance/policy/policies/fsh/1/1520>), APM 60.21 (<https://www.uidaho.edu/governance/policy/policies/apm/60/21>), the role of Staff Council (<https://www.uidaho.edu/governance/policy/policies/fsh/1/1800>), and the role of shared governance at the University of Idaho (<https://www.uidaho.edu/governance>), I believe that university employees were appropriately involved in the decision to affiliate with the University of Phoenix as determined by existing University of Idaho policies.

Somewhat Agree
Strongly Agree
I did not read the FAQ

13. What recommendations do you have for improving the FAQ?

14. Moving forward, on which topics related to the affiliation would you like to give input?

15. I see the following as potential benefits of this affiliation (please specify if selected):

- Financial (TEXT BOX FOR ADDITIONAL COMMENTS)
- Student (TEXT BOX FOR ADDITIONAL COMMENTS)
- Faculty (TEXT BOX FOR ADDITIONAL COMMENTS)
- Staff (TEXT BOX FOR ADDITIONAL COMMENTS)
- Outreach (TEXT BOX FOR ADDITIONAL COMMENTS)
- Institutional (TEXT BOX FOR ADDITIONAL COMMENTS)
- Other (TEXT BOX FOR ADDITIONAL COMMENTS)

16. I see the following as potential concerns of this affiliation:

- Financial (TEXT BOX FOR ADDITIONAL COMMENTS)
- Student (TEXT BOX FOR ADDITIONAL COMMENTS)
- Faculty (TEXT BOX FOR ADDITIONAL COMMENTS)
- Staff (TEXT BOX FOR ADDITIONAL COMMENTS)
- Outreach (TEXT BOX FOR ADDITIONAL COMMENTS)
- Institutional (TEXT BOX FOR ADDITIONAL COMMENTS)
- Other (TEXT BOX FOR ADDITIONAL COMMENTS)

17. What else would you like to share with Faculty Senate about your thoughts regarding the University of Idaho and University of Phoenix affiliation?

18. What remaining questions do you have about the University of Phoenix affiliation?

19. What is your primary role at the University of Idaho?

Staff

Faculty

Other _____

Choose not to answer

20. What is your primary campus location?

Moscow

Coeur d'Alene
Boise
Idaho Falls
Twin Falls
Extension center
Choose not to answer

DRAFT

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting # 12

Tuesday, November 7, 2023 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #11 October 31, 2023 **Attach. #1**

- **Attach. #4** Promotion and Tenure Nomination Process

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 11

Tuesday, October 31, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: McKenna

Guests/Speakers: Trevor White, Karen Humes, Erin James, Chandra Ford, Sean Quinlan, Michael Parrella

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #10, October 24, 2023, were approved as distributed.

Chair's Report:

- Happy Halloween if this suits you!
I would like to acknowledge that there are several conflicts across the world — some going on at the same time. We need to keep in mind that social media are bringing these conflicts very close to us and the people around us, with a new level of polarization and disturbing content. As we never know what people are individually experiencing -let's please be sensitive to each other and our students - knowing this can be a difficult time for many.

Provost's Report:

- Last week, the college of EHHS hosted a great faculty gathering. Thanks to Dean Blevins. The next one will be Tuesday, November 14, 4:30 – 6:30, in the Vandal Ballroom, hosted by CLASS and Dean Quinlan.
- We need to assemble the University Distinguished Professor Advising Committee, composed of 4 faculty and 3 deans, appointed by the provost for three-year staggered terms. Qualifications: "Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records of teaching, research and/or outreach." Below is the link to the relevant policy
FSH 1565-D-8: <https://www.uidaho.edu/governance/policy/policies/fsh/1/1565#d> Submit nomination for the committee through the form at: <https://forms.office.com/r/ridZTrQB97>
- 11:59pm, November 1 is the deadline for completing the All Employee Required Training.
- Update on the UOPX Working Groups (Chandra Ford).
There was great interest in participating. The invite went out to the initial group, but we will also communicate with the rest of the group to let them know that they will still be engaged.

Discussion:

Back to the University Distinguished Professors, Dean Parrella pointed out that an extension specialist has never received this award. Teaching excellence is an important part of the process, but extension specialists don't teach. Perhaps we could consider some changes to open the criteria.

A senator inquired about the candle vigil to be held on November 13 to remember the four students who died a year ago. The event is student led, but everyone is welcome.

Committee Reports (vote):

- UCC 434 Child Development M.S. – Trevor White
The Margaret Ritchie School of Family and Consumer Sciences (FCS) currently offers a single Master of Science degree in Family and Consumer Sciences that includes a focus on either child development, family studies, nutrition, or apparel textile and design. As it currently exists, it is difficult for prospective students interested in graduate studies in any of the areas to locate the degree via a simple search. Furthermore, some students may feel an M.S. degree in FCS does not truly reflect what they studied in graduate school, especially on one's resume/curriculum vitae; thus, it may affect future job prospects. The purpose of creating an M.S. degree in Child Development is to specifically delineate a specialization in Child Development as a graduate degree while maintaining the rigor of the current program. Additionally, having a more specific degree title will optimize their career opportunities.

Discussion:

Vote: 19/19 yes. Motion passes.

- UCC 529: Sustainability Academic Certificate – Karen Humes, Earth and Spatial Sciences and Erin James, English Department
Erin James provided a brief history of the certificate. On 09/05/2023, Senate appointed the existing interdisciplinary faculty-led committee as an ad-hoc program committee to serve as the "relevant unit and college" authorized to submit curricular proposals per FSH 4120-E. This committee shall be empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum. The program was approved by UCC, and the committee is now back to the Senate to seek approval for the program content. Karen Humes added that the UCC vote was unanimous.

Discussion:

Friendly amendment: It must be stated explicitly that a grade of C or better is required.

Vote: 19/20 yes; 1/20 no. The motion passes.

Announcements and Communications:

- Magic Valley Working Group White Paper - Torrey Lawrence, Provost & Executive Vice President, Chandra Ford, Center Executive Officer Southwest Idaho, Sean Quinlan, Dean, College of Letters, Arts and Social Sciences, Michael Parrella, Dean, College of Agricultural and Live Sciences.

Chandra Ford gave an introduction. President Green established the Magic Valley working group and tasked it to explore strategic opportunities for the University of Idaho in the Magic Valley. The working group was divided into three subgroups. The first subgroup, directed by Associate Dean and Director of UI Extension Barbara Petty, focused on outreach and tourism and took a critical look at the Jerome site and the potential return on investment (ROI) associated with the development. The second, led by Dean Michael Parrella, investigated potential research connections associated with CAFE. The third, headed by Dean Sean Quinlan, was charged with exploring expanded educational opportunities, such as undergraduate degrees, graduate degrees and 2+2 programs that pair with CSI.

Some key points: There are multiple opportunities for the University of Idaho to serve the workforce in the Magic Valley. We can help them meet their needs by expanding existing U of I academic programs in partnership with CSI. Programs most suitable for expansion include

undergraduate programs in aquaculture, natural resources, and agriculture with a focus on food production. Our expertise in the meat science area (e.g. Vandal Brand Meats program) is an excellent opportunity for the Magic Valley.

There are important areas where CSI and the U of I can collaborate in instruction delivery across various disciplines and develop hybrid programs that combine two-year face-to-face instruction and online course delivery to complete the four-year degree. These programs would have U of I faculty on the CSI campus to provide experiential learning opportunities. Hybrid programs would meet curricular requirements while providing greater flexibility in course delivery and a clear pathway to four-year degree completion.

The many impactful research opportunities are focused on Aquaculture, Food Science/Processing and Water.

After a visit to the Jerome site and to CSI, the group concluded that the most strategic location is in proximity to the CSI campus. A site close to our academic partners is ideal for reaching out to the potential students we want to enroll in our programs. One recommendation is to grow programs specifically in the College of Ag and Life Sciences and build out a second location for CALS. CSI is very supportive of a collaborative expansion of their ATI Center that involves U of I. (For a complete description, please see the White Paper attached to this meeting binder.)

Discussion:

Q. Why this particular region?

A. It's a place with potential for significant growth. Twin Falls is growing fast and offers many opportunities to serve unmet needs. It is existential for the U of I to increase its presence at CSI, in proximity to students who want to complete a 4-year degree.

Q. Was any thought given to including INBRE in these plans?

A. We have not. We are concentrating on developing food-processing connections.

Q. Do you plan to connect with specific farms/industries, or do you mainly want to increase the U of I presence in the region?

A. As a land grant university we connect broadly, with a focus on serving the food-processing industry. There are many opportunities for students with a variety of backgrounds, such as computer science, engineering, and more.

Contact Dean Michael Parrella if you wish to participate in these connections.

- Spread Pay Task Force Recommendations – Kristin Haltinner

The task force was charged with investigating the possibility of offering spread pay as a benefit for all faculty currently on 9-month appointments at U of I.

In the process of doing this, we first sought to verify that this was, in fact, desired by the faculty. We conducted a survey of faculty on 9-month contracts last year. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey leading to a response rate of 61%. 127 faculty were on spread pay, 443 on standard pay. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to spread pay if given the option. Regardless of whether they would go on spread pay, 94% of surveyed faculty supported implementing it as an option for others.

We then worked with the provost's office and Brian Foisy's office to determine whether or not it was even possible to offer the benefit. As you may remember, U of I incentivized faculty switching to standard pay in 2017 due to incompatibilities between the Banner 8 system used by HR and the form of spread pay we were using at the time.

In the process of this investigation, we learned that the system we were using was different than Banner (our current system). We also learned about an alternative model for payment over 12 months, used by many universities and compatible with Banner 9.

There are three possible systems of payment. The first is what we are calling “standard pay” this is a system in which 9-month faculty are paid at the time of their work, over a 9-month period. It is what most faculty are currently using. The second is called “spread pay.” This system “spreads” people’s pay from the academic year to the fiscal year. In effect, we currently pay the 122 faculty on spread pay in advance of their work in July and August and then we defer a part of their paycheck to pay them in May and June. The part of this practice in which we pay people in advance of their work in July and August is incompatible with the Banner system. The third is called “deferred pay.” This is a system in which a portion of faculty’s paychecks are held and then paid out over the summer. This calendar pays people on a schedule from September (or two weeks after contracts start – August 30th next year) through the following August. This is the system used at most schools and is compatible with the Banner system.

The University of Idaho can begin to offer the deferred pay option to faculty on 9-month contracts beginning next academic year. Faculty would need to opt into this payment plan – the details of that opting are still being figured out – and a portion of their 9-month pay would be held and paid out over the summer of 2025, so they are paid over 12 months.

So, this is a very exciting possibility for the faculty who struggle to make ends meet in the summers as single parents or primary income earners.

There are two challenges that were unearthed by this process. The first is that we need to move the 122 faculty currently on the noncompliant spread pay system onto either the deferred pay or spread pay system – whichever they choose. In so doing, they will be paid for the current academic year as planned – until the end of June. Then they will need to switch to the deferred pay (or standard pay) system. Regardless of which they choose, there will be a pause in their payment for three pay periods in July and August as this switch occurs. They are not missing out on salary! We are finishing the spread pay system (July through June calendar), pausing, and then switching to the deferred pay (September to August) calendar.

Something should be very clear: the 122 faculty currently on spread pay will need to switch to the standard pay or – if deferred pay is offered – choose between standard pay or deferred pay system. To ease the transition from spread pay to deferred pay, the provost’s office has set up an option for faculty on spread pay to have a portion of their salaries withheld in the Spring semester and paid out in July and August. There is one other challenge that was unearthed in this process. That is that the Banner system expects and is built for faculty to be on 20 pay period contracts, but UI’s faculty are on 19.5 pay period contracts. This is another change that will need to be made. Faculty will not be expected to work an additional week, but this will slightly lower hourly salary rates – something significant to people on external grants.

The recommendation of the task force that we open the option for deferred pay to all eligible faculty – that is, fulltime faculty on 9-month contracts.

Discussion:

Concern about the delayed payments next summer

To alleviate people’s concerns about having to get by for two months without paychecks, Payroll has set up a system to withhold money (starting in January) to be paid in summer 2024 to the 122 faculty currently on spread pay. Or people can do it on their own.

Incentive?

There will not be an incentive to switch. This transition is something that we have to do. But the provost office and Payroll will help make it less painful. Once again, it was emphasized that there will be no loss of wages – people are getting paid at a different time. This is about moving to a system where we can incorporate everyone.

Impact on summer salaries from grants

The discussion moved to how summer salaries from grants are impacted. There is a maximum salary (due to various regulations) based on what one's salary would be if it were extended to 12 months and keep the salary at that level. A change in the contract period will alter this calculation, as the summer maximum salary will impact faculty who receive 3 months of summer salary from their sponsoring agency. There are still several moving parts. If this recommendation goes forward, it will be useful to provide actual examples covering several scenarios.

Hourly rate reduction

Linda Campos: the hourly rate reduction arose from the need to have 20 pay periods, which presents some system challenges. However, deferred pay can move forward independently. Back to the change in hourly rate, a senator noted that it can be easily calculated from the total salary divided by the total number of hours in the 20-pay period system (compared to the corresponding ratio in the 19.5 system).

Faculty need to choose the deferred pay option every year. So, if a faculty expects to receive 3 months of summer salary from a grant, they may decide not to opt for deferred pay on that particular summer.

The recommendations of the task force will be an action item at the next meeting.

- UOPX – Draft Survey, Chair Gauthier
Just a quick note to remind everyone that the attached survey is a draft. The modalities of distribution are being worked out.

New Business:

There was none.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:42pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Spread Pay Task Force Findings and Recommendations

History of the Task Force

In 2022 Faculty Senate charged a task force to consider the possibility of developing a system that would allow University of Idaho faculty on 9-month contracts to be paid over 12 months. The catalyst for this work was a combination of faculty interest and its potential to both retain and recruit faculty.

The old spread pay system was an offered benefit until FY 2017. However, difficulties with the Banner 8 system and managing faculty on complicated contracts made the system too cumbersome.

In the Spring of 2022, the Task Force sent a survey to eligible faculty to determine the degree to which faculty supported this initiative. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey, resulting in a response rate of 61%. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to a 12 month pay system if given the option. Regardless of whether or not they would go on a 12 month pay system, 94% of surveyed faculty supported implementing it as an option for others.

In AY 23-24, there are 576 U of I faculty on academic year contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months on a system using a problematic pay schedule.

Current Realities

In the process of investigating the possibility of reoffering a benefit that would allow people on 9-month contracts to be paid over 12, it became evident that the current system of providing advanced pay in July and August poses significant problems for the university. Our current system of spread pay operates by paying people in July and August prior to the beginning of their contract. Paying employees for work before the contract begins presents challenges and the schedule must be reset – regardless of whether or not we offer deferred pay as a benefit for all eligible faculty.

There are 122 faculty members currently on this old spread pay schedule. To resolve the schedule problems, they will need to shift to a new pay schedule or opt for standard pay. The new model, called deferred pay, will allow faculty to defer portions of their pay through the academic year to be paid over the following summer. The pay system aligns with the start of their work period.

Key Terms:

Standard Pay: a pay system in which faculty on a 9-month contract are paid over nine months. Their pay is in line with the pay periods they work.

Deferred Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. A portion of their pay for the academic year is deferred and covers the pay periods in the summer.

Spread Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. In July and August they are paid in advance of their work. A portion of their pay for the academic year is delayed covering May and June.

Figure 1: Illustration of Different Pay Schedule Examples Based on AY 23-24

Required Changes Discovered During the System Review

The old system must be terminated. In doing so, the university needs to move the 122 faculty currently on the old spread pay schedule to the new deferred pay schedule or to allow them to opt for standard pay. These faculty members will finish the current fiscal year on the old spread pay schedule (ending June 22, 2024 (pay date July 5th) with the end of the current fiscal year) and begin the following year on the new deferred pay schedule (or, if they choose, standard pay). Faculty on the old spread pay system will receive their July 5, 2024 paycheck and then will have a six-week gap as we shift between schedules. This will occur from mid-July through August. This pay schedule will align with the start of the academic year and the pay will be “deferred” to the following summer. The payroll dates for this disruption are the following: July 19, 2024; August 2, 2024; and August 16, 2024. Pay will resume on August 30, 2024.

The task force review also uncovered a second problem with our current system. Currently academic faculty are paid according to two pay schedules. There is one schedule for faculty on standard pay which uses a schedule of 19.5 factors; and another for those on the old spread pay which uses a 20 factor schedule. The deferred pay system cannot use partial schedules, so the whole schedule needs to use a 20 factor schedule. The payroll system needs to bring all academic year faculty on the same schedule.

This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate. There will be an impact to an academic year faculty’s summer earnings if an hourly rate is used to calculate the salary for the summer. The summer hourly rate will be 2.5% less than the previous pay schedule. See the Appendix for additional information.

Opportunities for Faculty on Standard Pay to Switch to Deferred Pay and Other Required Changes Uncovered by this Process

The University of Idaho can offer deferred pay to faculty who are on 1.0 FTE academic year (9-month) appointments beginning in AY 24-25. These faculty must opt in to deferred pay for the entire year. New faculty who are hired mid-year will have to wait for the following year to elect deferred pay. Faculty who would like to remain on standard pay are not required to opt into deferred pay. The details of this new schedule are included as an appendix. To reset the schedule, there are three required adjustments.

- First, there will be a disruption in pay for the 122 faculty on the current spread pay system to transition to the new deferred pay system;
- Second, the payroll system needs to bring all academic year faculty on the same 20 factor schedule;
- Third, the new system requires that administrative stipends be paid differently. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months. The new system requires the base salary and the administrative stipend to be paid separately.

Recommendations of the Task Force

The task force recommends the following:

- The University of Idaho offer deferred pay to all eligible faculty effective on academic year (9-month) contracts starting in 2024-25;
- The University of Idaho transition faculty currently on the old system of advanced spread pay to the system of their choosing: either the new deferred pay system or the standard pay system effective 2024-25;
- The University of Idaho provide options for the 122 affected faculty members on the legacy spread pay system to navigate the gap in three pay periods offering the following:
 - Financial planning tools for those who wish to immediately transition to the new deferred pay system to manage the three-pay disruption on their own;
 - The option to enroll in a UI payroll managed system that withholds an amount of their choice (up to 3/26th of their annual salary) which will be used to provide the UI paychecks during the three pay periods of transition. (See Appendix for details)

Appendix—Updated UI Deferred Pay Schedule

Compiled by the Provost's Office and the Division of Finance and Administration
November 6, 2023

Context

A faculty senate deferred pay Task Force worked with individuals from the Division of Finance and Administration and the Provost's Office to make deferred pay available to all full-time faculty in AY 24-25 as a recruiting and retention benefit.

Currently, there are 576 U of I faculty on Academic Year (AY) contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months.
- 19 of the 122 faculty on the old spread pay system currently have administrative stipends that are currently included in their spread salary.

Eligibility for deferred pay:

- Full-time faculty on Academic Year contracts can opt in to deferred pay prior to each academic year.
- Must start the Academic Year on deferred pay; faculty who begin mid-year must wait to join deferred pay until the following year.
- Faculty must have a 1.0 FTE appointment for the entire academic year.

Transition from the old system to the new system:

This system change involves a one-time payroll system reset that will mean the following:

- The start date of the deferred pay schedule must be aligned with the start of the academic year contract. For the 122 faculty on the old system, this means there will be a disruption in pay for three pay periods (six weeks) in the summer of 2024. Faculty on the old spread pay system would receive their paycheck on July 5, 2024 and then there would be a six week disruption. These include the pay dates of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024. In future years, there will be no gap in pay as faculty continue on deferred pay.
- Administrative stipends can only be paid according to the academic year calendar. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months.
- The new deferred pay system requires a reset in the payroll schedule from 19.5 pay factors to 20 pay factors. Work expectations and job duties remain the same for positions, but the Banner system requires an even number of weeks in the pay

schedule (and not split pay periods) to avoid errors and manual work. This will impact academic year faculty on standard pay who have contracts in the summer that require salary calculations based on an hourly rate. The total amount that a faculty member in this situation could earn in the summer under the new system could be slightly less because summer will not include a half pay period and because the new schedule reduces the calculation of the hourly rate by 2.5%.

- The system does not support half pay periods.
- U of I cannot sustain two separate payroll systems.

FAQ:

Q1: Is deferred pay required for all academic year faculty? I am an academic year faculty member and I prefer to be paid according to the nine-month contract period.

A: No, deferred pay is an option offered to faculty on AY contracts. The default way to be paid is standard pay according to the contract period. Deferred pay must be selected as an option each year.

Q2: I moved from spread pay to standard pay in 2017 and received a \$1,000 incentive payment. Do I have to pay this back?

A: No. You received that incentive to stop using the old spread pay system.

Q3: What is wrong with the old spread pay system and why were some faculty allowed to stay on it?

A: The old system of spread pay relies on paying faculty prior to the start of their contract which creates significant challenges. The updated process will allow the administrative systems (Banner) to manage these deferred pay schedules in the manner intended and reduce the administrative burden associated with managing those pay schedules. Likewise, the new system allows for contracts for standard pay and deferred pay operate with the same payroll schedule assumptions. We can only have one payroll system for academic year faculty. It is no longer possible to support two distinct payroll systems for academic year faculty.

Q4: Can faculty on the old spread pay system opt into the new deferred spread pay system?

A: Yes, but they will have to manage a one-time disruption in three pay periods in late summer 2024. They can manage this on their own or they can set up UI payroll withholdings during spring semester to manage this.

Q5: How will the 122 faculty on the old spread pay system be transitioned to the new system?

A: They will receive their July 5, 2024 paycheck, which represents the last pay for their 2023-2024 academic year salary. Then, there will be a disruption in the three pay periods

of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024 with their 2024-2025 academic year salary. These faculty can either budget and manage the transition on their own or UI payroll can assist through a withholding program.

Q6: What does the UI payroll withholding system to bridge the transition look like for faculty on the old spread pay system?

A: A contract time would be established where a faculty member would establish a set amount to be withheld from their paychecks (up to 3/26th of their annual salary). Payroll would create a holding account for the faculty member. The established amount would be taken out over 14 pay periods January 5, 2024 through July 5, 2024. These funds would be used to pay the faculty member during the transition pay periods of July 19, 2024 through August 16, 2024. The faculty member chooses the amount to be withheld. This arrangement would need to be signed and approved by the faculty member by December 21, 2023.

Alternately, faculty who are on the old spread pay system, can manage the transition on their own. They are not required to use the UI withholding system.

Q7: Am I losing money with this transition from the old spread pay schedule to the new deferred pay schedule?

A: No, you will still be paid the same amount for your work according to your contract. Depending on how a person elects to manage the transition in payroll systems, there will be variability in the timing of paychecks.

Q8: Why does the new system remove a week from the summer pay schedule and what is the impact?

A: U of I is currently running two payroll systems for academic year faculty; one of the systems uses half pay periods to calculate salary. The ability to offer all academic year faculty deferred pay requires an adjustment to the payroll schedule to bring all academic year faculty on the same schedule. This one-time adjustment changes the summer schedule by a week. This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate.

This change will impact academic year faculty who calculate their summer salary earnings using an hourly rate. The hourly rate will be 2.5% less than the hourly rate of the old system. Potentially, the earnings for faculty on grant funded work for the entire summer could have the summer earnings reduced by a maximum of 10% if they are paid exclusively on grant funds. The reduction results from the schedule adjustment of a week and the reduction in the hourly rate. Grants require the calculation of faculty effort on based on an hourly rate.

In summer 2023, there were 182 faculty who had summer contracts that included compensation for work on grants.

Q9: Why can't administrative stipends be included in the deferred pay option?

A: Faculty who hold administrative appointments (e.g. associate dean, department chair, program director, etc.) and who receive an administrative stipend can opt into having their base salary paid as deferred pay, but the administrative stipend must be paid according to the academic calendar. This is because these positions often fluctuate or start at different points in the year. The new system cannot accommodate the variability with these types of positions and so this part of the appointment will be treated separately. For faculty in these types of positions, they can opt to defer their base salary over 12 months, but the administrative stipend will be paid over 9 months.

Q10: I am a faculty whose FTE is variable over the course of the academic year due to availability of grant funding. Am I eligible for deferred pay?

A: No. Faculty are only eligible to be on deferred pay if they have a 1.0 FTE appointment for an entire academic year.

Q11: What happens for faculty on full-year sabbatical as it relates to supplemental pay on grants?

A: This information is forthcoming and solution will be in place by the time of implementation.

Five Myths about the U of I/UOPX Affiliation

October 27, 2023

Myth #1:

U of I is merging with the University of Phoenix (UOPX)

Both universities will continue to operate independently. They will have unique governing boards, operate separately, and there are no plans to merge the institutions. We will not combine curricula, faculty, support programs, policies, etc.

Myth #2:

U of I is purchasing the UOPX.

U of I's Board of Regents have formed a legally separate, independent, non-profit corporation called Four Three Education, Inc. (43EI). 43EI, not U of I, is purchasing the assets of UOPX. 43EI will place bonds to fund this purchase. After closing, 43EI will "do business as" the University of Phoenix. It will repay the debt using UOPX revenue. U of I is not contributing financially to the purchase.

Myth #3:

U of I is taking on the liabilities of UOPX.

The debt resulting from this transaction belongs to 43EI, not U of I or the state of Idaho. The same applies to any other liabilities of 43EI. UI may choose to take on specific responsibilities to assist the transaction and UOPX's transition to a non-profit operation. For example, to secure better bond terms, U of I may choose to guarantee up to \$10 million annually to cover the debt payment in the event UOPX cannot do so. These responsibilities will be finalized at closing. UOPX has strong financial stability, generates approximately \$100 million of unrestricted cash flow annually, and \$200 million of cash will be transferred to 43EI in addition to the regular working capital of the UOPX operation. In addition, 43EI will not pay income taxes or ownership dividends. We are confident that the UOPX will be able to fully fund all obligations.

Myth #4:

U of I is only doing this for a financial benefit.

Yes, the U of I will benefit from this transaction. We anticipate a minimum \$10M annually; however, that is not the only reason for the affiliation. This affiliation provides greater financial security to U of I through diversification of programs and student populations. It is also a unique opportunity for the institutions to work together by sharing strengths and developing partnerships that will benefit one or both institutions. President Green is launching a working group to identify and prioritize these collaborative opportunities.

Myth #5:

UOPX will take students away from U of I.

UOPX is already a competitor to all Idaho institutions. U of I and UOPX serve largely different student populations, offer mostly unique programs, offer courses on a very different timeline (rolling calendar vs. semester), and have a nearly identical price. This transaction does not change these primary drivers for attendance decisions. Through the affiliation we may improve opportunities for students such as student pathways, 3+1 programs, etc.

FINANCIAL FLOW CHART

For U of I/UOPX Affiliation

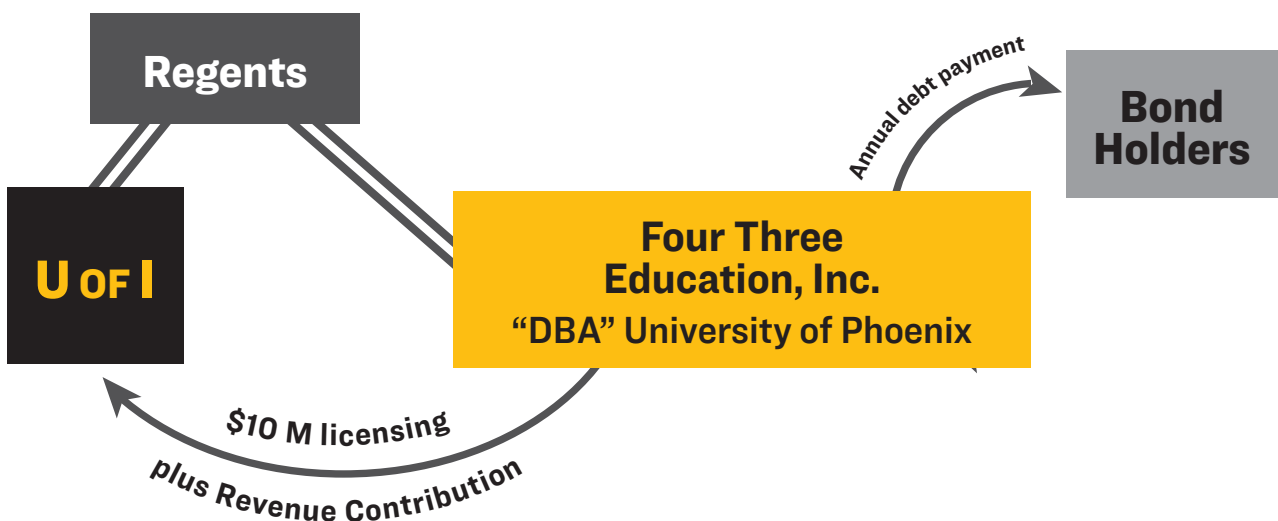

PURCHASE TRANSACTION

(Est. January 2024)

ANNUAL TRANSACTION

(post-closing)

NOTE: U of I may choose to take on specific responsibilities to assist the transaction and UOPX's transition to a non-profit operation. For example, U of I may agree to guarantee UOPX up to \$10M annually as emergency support; however, it is highly unlikely this would occur given UOPX's strong financial position.

OFFICE OF THE PROVOST
AND EXECUTIVE VICE PRESIDENT
875 Perimeter Drive MS 3152
Moscow ID 83844-3152
208-885-6448
208-885-6558 [FAX]
provost@uidaho.edu
provost.uidaho.edu

Date: November 2, 2023

To: Kristin Haltinner, Vice Chair, Faculty Senate
From: Diane Kelly-Riley, Vice Provost for Faculty
Subject: Selection of Members for University-Level Promotion and Tenure Committee
CC: Francesca Sammarruca, Faculty Secretary

Please alert faculty senators nominations are open for individuals to serve on this year’s University-Level Promotion and Tenure Committees. Two committees will be convened this year given the number of dossiers to be reviewed. Details about the committee meetings and nomination process follow:

Nomination deadline: Friday, November 17, 2023 [NOMINATION FORM LINK](#)

Senator nomination process:

College senators must submit the total number of nominees for **Two Committees based on the chart below**. If senators do not complete the nomination form by the deadline, the provost shall appoint members from that college/unit.

University P&T Committee meeting dates:

Silver Committee, Saturday, January 27, 2024, 8:00am PT, via zoom
 Gold Committee, Saturday, February 3, 8:00am PT, via zoom

Nominee availability:

Nominees must be available for both meeting dates but can express preference for one of the dates. Faculty selected for the committee will only participate on one day. The University Level Promotion and Tenure meeting typically takes eight hours. A required orientation will be held within the first two weeks of December. Dossier review begins after the orientation.

Nominee selection considerations:

The responsibilities of the committee collectively are to understand and make recommendations regarding the university’s policies regarding promotion and/or tenure. Senators should consider the diverse configurations of academic appointments within their college and nominate committee members to be representational of the diverse array of faculty appointments. Eligible nominees include full-time faculty from the Instructor or Professorial ranks. Faculty who have not previously served on the committee should be prioritized.

| College/Unit | Number of Nominees (FSH 3500 G.) | |
|--|----------------------------------|----------------|
| | One Committee | Two Committees |
| College of Agricultural & Life Sciences Faculty w/>50% Teaching & Research | 2 | 4 |
| College of Agricultural & Life Sciences Faculty w/>50% University Extension | 2 | 4 |
| College of Letters, Arts & Social Sciences | 4 | 8 |
| College of Art & Architecture | 2 | 4 |
| College of Business & Economics | 2 | 4 |
| College of Education | 2 | 4 |
| College of Engineering | 2 | 4 |
| College of Natural Resources | 2 | 4 |
| College of Law | 2 | 4 |
| College of Science | 2 | 4 |
| Faculty at Large | 2 | 4 |

2023 – 2024 Faculty Senate – Pending Approval

**Approved at Mtg #14
November 28, 2023**

Meeting # 13

Tuesday, November 14, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Torrey Lawrence (w/o vote), McKenna, Miller, Mischel, Murphy, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Long (excused), Mittelstaedt, Ramirez, Reynold

Guests/Speakers: Alistair Smith, Cari Fealy

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #11, October 31, 2023, were approved as distributed.

Chair's Report:

- We honor the memories of Madison Mogen, Kaylee Goncalves, Xana Kernodle, and Ethan Chapin with a minute of silence.
- I would like to propose a few ideas about APM and FSH policies in shared governance. I hope that the following questions can be addressed in the next months. With the current process, we have the opportunity to comment on APM items when they come through Faculty Senate. How can we improve the process for APMs impacting directly faculty activities? Can we have some control on what goes into the APM? Can we propose changes to APM policies that impact academic activities?

Provost's Report:

- We faced new challenges last week with both internet and natural gas outages. Thank you all for your patience. Please extend your thanks to any Facilities staff who worked long hours during the outage.
- Faculty gathering today, 4:30 – 6:30, in the Vandal Ballroom. Hosted by Dean Sean Quinlan, CLASS.
- "Talks with Torrey" series: November 16, 11:30am - 12:30pm.
<https://www.uidaho.edu/provost/talks-with-torrey>
- Winter Commencement is Saturday, December 9. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena. All faculty are encourage to attend the ceremony for their college. Details about the events: <https://www.uidaho.edu/events/commencement/winter>

Committee Reports (vote):

- FSH 1620 University-Level Committees & FSH 1640 Committee Directory – Francesca Sammarruca, Faculty Secretary
FSH 1620 has been revised to clarify procedures for university-level committees. The changes to FSH 1640 are needed for consistency. The two policies must be taken as a package.
An audit of the university-level committees is in progress with the Committee on Committees, and a comprehensive review will follow.

Vote: 18/18 yes. Motion passes.

- FSH 1565 Academic Ranks and Responsibilities – Alistair Smith
Changes to FSH 1565 D-8 University Distinguished Professor are proposed to make Extension faculty eligible for the rank of University Distinguished Professor.
Vote: 16/18 yes; 2/18 no. Motion passes.
- FSH 3320 Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators – Alistair Smith
Change to A-1.d is proposed to clarify that chairs may confer with deans during the evaluation process, to align with standard practices.
Vote: 20/20 yes. Motion passes.

Other Voting Items:

- Spread Pay Task Force Recommendations – Kristin Haltinner
Vice Chair Haltinner heard from some of the 122 faculty currently on the old “spread pay” system. They expressed serious concerns about the transition to the new “deferred pay” system happening in summer 2024 – saving between now and June 2024 in preparation for the paycheck gap would be a heavy burden. They requested to wait a year. The other source of concern is the shift from 19.5 units to 20 units pay schedule.

Current proposal: we can have everyone on standard pay and keep the 19.5 pay factors or offer deferred pay to anyone qualified who wants it and resetting of the payroll schedule to 20 pay factors, but we can't mix the two options. Provost Lawrence confirmed that the university (not the individual) can choose one or the other.

Some senators reported that their constituents are very unhappy about the shift to 20 units, which amounts to three pay cuts because: it effectively reduces the AY pay, lowering hourly pay by asking faculty to work another contract week for the same total amount; it reduces the hourly rate used to compute summer salary; it reduces the total number of weeks available for summer salary from 13 to 12. Would it be possible to go from 19.5 to 19 units instead?

Linda Campos explained that the deferred pay system cannot use partial schedules, because it creates a discrepancy between hourly rates for faculty on spread pay and faculty on standard pay. The payroll system needs to bring all AY faculty on the same schedule. However, she cannot speak for a scenario where the university moves to a schedule of 19 pay factors. The Provost added that a 38 week AY may be something to look into. The problem is that our payroll system does not align with the academic year calendar.

Some senators felt strongly that the transition should happen in summer 2025. For some, saving sufficient funds to cover the pay gap in summer 2024 would be impossible without falling in debt. Others replied that faculty currently on standard pay have had to set money aside for the summer for many years.

There was confusion about the 19.5 vs. 20 pay factors. A Senator was unclear as to why the shift requires a reduction of the summer period during which people can earn salary. They argue that, if the total number of hours in a full-year contract is 2080, and the total number of hours in the AY is still 1560, the difference – 520 hours – is the maximum number of hours (13 weeks)

faculty can earn salary during the summer. Provost Lawrence explained that 40 hours are moved from the summer period into the nine-month contract period (which would then contain 1600 hours). It's important to keep in mind that exempt employees don't work by hours – their responsibilities are set in the PD for the AY, outside of the payroll system, and do not change with the addition of 0.5 weeks. Hourly rates are introduced for the only purpose of calculating summer salaries, because some summer contracts require salary calculations based on an hourly rate. Basically, our payroll system and the AY faculty contracts do not line up.

Some senators argued that, if this transition is going to happen regardless, there is no point in waiting a year. The issue of 19.5 vs. 20 pay factors is a separate one and will not be resolved by procrastinating.

In response to a question about timelines, Linda Campos said that moving the implementation down by one year is possible. However, if the transition has to happen in summer 2024, a decision within the next few weeks is desirable.

The option of postponing the decision until after the fall break and, in the meantime, seeking clarification, was discussed. There was a consensus that options where faculty must take a pay cut are not acceptable.

Moved (Barannyk/Justwan) to accept the recommendations of the task force, with summer 2025 as the implementation date.

During the discussion that followed, the option of postponing the decision until the next Faculty Senate meeting gained traction. Aspects to learn more about are: Can we move to 19 units instead of 20 or keep hourly wages the same and increase salaries instead?

The motion was withdrawn. New motion (Roberson/Murphy) to postpone the decision by two weeks to get clarification on the aspects raised above.

Vote: 19/20 yes; 1/20 no. Motion passes.

Announcements and Communications:

- Promotion and Tenure Nomination Process – Provost Lawrence
Nominations are open for individuals to serve on this year's University-Level Promotion and Tenure Committees (see [FSH 3500 G-1](#)). Two committees will be convened this year due to the large number of dossiers to be reviewed. Nomination deadline: Friday, November 17, 2023. The nomination form for senators to complete can be found at https://forms.office.com/pages/responsepage.aspx?id=Y2u8fpJXGUqyCwS4JgSIU8wgEFrYhyNOn_qCDVIL5jNUREVSNURESkRCUzFFVlpUSFMxNFdNVk0xOS4u

- FSH 2300 Student Code of Conduct & Resolution Process – Cari Fealy
Comprehensive review/rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
The following are the major changes to the policy:
 - The policy was rewritten using language more accessible and understandable for students.

- The Code of Conduct and conduct process were combined in a single policy for easier use.
- Processes related to Title IX sexual harassment were removed to align with the recently revised FSH 6100. Added clarifying language around academic dishonesty resolution.
- Language aligning with case law was added to follow best practices in student conduct policies.
- A section on free speech was included.

This item will be voted on at the November 28 Faculty Senate meeting.

New Business:

- From Erin Chapman: The deadline for the Athena Mentorship Program has been extended to December 1, 2023 https://uidaho.co1.qualtrics.com/jfe/form/SV_9tA1uFgedGAATk

With some time remaining, Chair Gauthier moved back to the University of Phoenix Financial Flow Chart (previously deferred). Provost Lawrence went over Attachment #7. On p.2, there is a flow chart for the U of I/UOPX affiliation, describing in a simple way the financial transaction.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 4:50pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting # 13

Tuesday, November 14, 2023 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #11 October 31, 2023 **Attach. #1**
- III. Chair's Report
 - We honor the memories of Madison Mogen, Kaylee Goncalves, Xana Kernodle, and Ethan Chapin with a minute of silence.
- IV. Provost's Report
- V. Committee Reports (vote)
 - FSH 1620 University-Level Committees – Francesca Sammarruca, Faculty Secretary **Attach. #2**
 - FSH 1640 Committee Directory – Francesca Sammarruca, Faculty Secretary **Attach. #3**
 - FSH 1565 Academic Ranks and Responsibilities – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #4**
 - FSH 3320 Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #5**
- VI. Other Voting Items
 - Spread Pay Task Force Recommendations – Kristin Haltinner, Vice Chair Faculty Senate **Attach. #6**
- VII. Announcements and Communications
 - University of Phoenix Financial Flow Chart – Torrey Lawrence, Provost & Executive Vice President **Attach. #7**
 - Promotion and Tenure Nomination Process – Diane Kelly-Riley, Vice Provost for Faculty **Attach. #8**
 - FSH 2300 Student Code of Conduct & Resolution Process – Cari Fealy, Associate Dean of Students
 - FSH 2300 – Second interim revision **Attach. #9**
 - FSH 2300 – Comprehensive rewrite **Attach. #10**
- VIII. New Business
- IX. Adjournment

Attachments

- **Attach. #1** Minutes of the 2023-24 Faculty Senate Meeting #11 October 31, 2023

- **Attach. #2** FSH 1620
- **Attach. #3** FSH 1640
- **Attach. #4** FSH 1565
- **Attach. #5** FSH 3320
- **Attach. #6** Spread Pay Task Force Report
- **Attach. #7** University of Phoenix Financial Flow Chart
- **Attach. #8** Promotion and Tenure Nomination Process
- **Attach. #9** FSH 2300
- **Attach. #10** FSH 2300

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 11

Tuesday, October 31, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: McKenna

Guests/Speakers: Trevor White, Karen Humes, Erin James, Chandra Ford, Sean Quinlan, Michael Parrella

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #10, October 24, 2023, were approved as distributed.

Chair's Report:

- Happy Halloween if this suits you!
I would like to acknowledge that there are several conflicts across the world — some going on at the same time. We need to keep in mind that social media are bringing these conflicts very close to us and the people around us, with a new level of polarization and disturbing content. As we never know what people are individually experiencing -let's please be sensitive to each other and our students - knowing this can be a difficult time for many.

Provost's Report:

- Last week, the college of EHHS hosted a great faculty gathering. Thanks to Dean Blevins. The next one will be Tuesday, November 14, 4:30 – 6:30, in the Vandal Ballroom, hosted by CLASS and Dean Quinlan.
- We need to assemble the University Distinguished Professor Advising Committee, composed of 4 faculty and 3 deans, appointed by the provost for three-year staggered terms. Qualifications: "Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records of teaching, research and/or outreach." Below is the link to the relevant policy
FSH 1565-D-8: <https://www.uidaho.edu/governance/policy/policies/fsh/1/1565#d> Submit nomination for the committee through the form at: <https://forms.office.com/r/ridZTrQB97>
- 11:59pm, November 1 is the deadline for completing the All Employee Required Training.
- Update on the UOPX Working Groups (Chandra Ford).
There was great interest in participating. The invite went out to the initial group, but we will also communicate with the rest of the group to let them know that they will still be engaged.

Discussion:

Back to the University Distinguished Professors, Dean Parrella pointed out that an extension specialist has never received this award. Teaching excellence is an important part of the process, but extension specialists don't teach. Perhaps we could consider some changes to open the criteria.

A senator inquired about the candle vigil to be held on November 13 to remember the four students who died a year ago. The event is student led, but everyone is welcome.

Committee Reports (vote):

- UCC 434 Child Development M.S. – Trevor White
The Margaret Ritchie School of Family and Consumer Sciences (FCS) currently offers a single Master of Science degree in Family and Consumer Sciences that includes a focus on either child development, family studies, nutrition, or apparel textile and design. As it currently exists, it is difficult for prospective students interested in graduate studies in any of the areas to locate the degree via a simple search. Furthermore, some students may feel an M.S. degree in FCS does not truly reflect what they studied in graduate school, especially on one's resume/curriculum vitae; thus, it may affect future job prospects. The purpose of creating an M.S. degree in Child Development is to specifically delineate a specialization in Child Development as a graduate degree while maintaining the rigor of the current program. Additionally, having a more specific degree title will optimize their career opportunities.

Discussion:

Vote: 19/19 yes. Motion passes.

- UCC 529: Sustainability Academic Certificate – Karen Humes, Earth and Spatial Sciences and Erin James, English Department
Erin James provided a brief history of the certificate. On 09/05/2023, Senate appointed the existing interdisciplinary faculty-led committee as an ad-hoc program committee to serve as the "relevant unit and college" authorized to submit curricular proposals per FSH 4120-E. This committee shall be empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum. The program was approved by UCC, and the committee is now back to the Senate to seek approval for the program content. Karen Humes added that the UCC vote was unanimous.

Discussion:

Friendly amendment: It must be stated explicitly that a grade of C or better is required.

Vote: 19/20 yes; 1/20 no. The motion passes.

Announcements and Communications:

- Magic Valley Working Group White Paper - Torrey Lawrence, Provost & Executive Vice President, Chandra Ford, Center Executive Officer Southwest Idaho, Sean Quinlan, Dean, College of Letters, Arts and Social Sciences, Michael Parrella, Dean, College of Agricultural and Live Sciences.

Chandra Ford gave an introduction. President Green established the Magic Valley working group and tasked it to explore strategic opportunities for the University of Idaho in the Magic Valley. The working group was divided into three subgroups. The first subgroup, directed by Associate Dean and Director of UI Extension Barbara Petty, focused on outreach and tourism and took a critical look at the Jerome site and the potential return on investment (ROI) associated with the development. The second, led by Dean Michael Parrella, investigated potential research connections associated with CAFE. The third, headed by Dean Sean Quinlan, was charged with exploring expanded educational opportunities, such as undergraduate degrees, graduate degrees and 2+2 programs that pair with CSI.

Some key points: There are multiple opportunities for the University of Idaho to serve the workforce in the Magic Valley. We can help them meet their needs by expanding existing U of I academic programs in partnership with CSI. Programs most suitable for expansion include

undergraduate programs in aquaculture, natural resources, and agriculture with a focus on food production. Our expertise in the meat science area (e.g. Vandal Brand Meats program) is an excellent opportunity for the Magic Valley.

There are important areas where CSI and the U of I can collaborate in instruction delivery across various disciplines and develop hybrid programs that combine two-year face-to-face instruction and online course delivery to complete the four-year degree. These programs would have U of I faculty on the CSI campus to provide experiential learning opportunities. Hybrid programs would meet curricular requirements while providing greater flexibility in course delivery and a clear pathway to four-year degree completion.

The many impactful research opportunities are focused on Aquaculture, Food Science/Processing and Water.

After a visit to the Jerome site and to CSI, the group concluded that the most strategic location is in proximity to the CSI campus. A site close to our academic partners is ideal for reaching out to the potential students we want to enroll in our programs. One recommendation is to grow programs specifically in the College of Ag and Life Sciences and build out a second location for CALS. CSI is very supportive of a collaborative expansion of their ATI Center that involves U of I. (For a complete description, please see the White Paper attached to this meeting binder.)

Discussion:

Q. Why this particular region?

A. It's a place with potential for significant growth. Twin Falls is growing fast and offers many opportunities to serve unmet needs. It is existential for the U of I to increase its presence at CSI, in proximity to students who want to complete a 4-year degree.

Q. Was any thought given to including INBRE in these plans?

A. We have not. We are concentrating on developing food-processing connections.

Q. Do you plan to connect with specific farms/industries, or do you mainly want to increase the U of I presence in the region?

A. As a land grant university we connect broadly, with a focus on serving the food-processing industry. There are many opportunities for students with a variety of backgrounds, such as computer science, engineering, and more.

Contact Dean Michael Parrella if you wish to participate in these connections.

- Spread Pay Task Force Recommendations – Kristin Haltinner

The task force was charged with investigating the possibility of offering spread pay as a benefit for all faculty currently on 9-month appointments at U of I.

In the process of doing this, we first sought to verify that this was, in fact, desired by the faculty. We conducted a survey of faculty on 9-month contracts last year. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey leading to a response rate of 61%. 127 faculty were on spread pay, 443 on standard pay. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to spread pay if given the option. Regardless of whether they would go on spread pay, 94% of surveyed faculty supported implementing it as an option for others.

We then worked with the provost's office and Brian Foisy's office to determine whether or not it was even possible to offer the benefit. As you may remember, U of I incentivized faculty switching to standard pay in 2017 due to incompatibilities between the Banner 8 system used by HR and the form of spread pay we were using at the time.

In the process of this investigation, we learned that the system we were using was different than Banner (our current system). We also learned about an alternative model for payment over 12 months, used by many universities and compatible with Banner 9.

There are three possible systems of payment. The first is what we are calling “standard pay” this is a system in which 9-month faculty are paid at the time of their work, over a 9-month period. It is what most faculty are currently using. The second is called “spread pay.” This system “spreads” people’s pay from the academic year to the fiscal year. In effect, we currently pay the 122 faculty on spread pay in advance of their work in July and August and then we defer a part of their paycheck to pay them in May and June. The part of this practice in which we pay people in advance of their work in July and August is incompatible with the Banner system. The third is called “deferred pay.” This is a system in which a portion of faculty’s paychecks are held and then paid out over the summer. This calendar pays people on a schedule from September (or two weeks after contracts start – August 30th next year) through the following August. This is the system used at most schools and is compatible with the Banner system.

The University of Idaho can begin to offer the deferred pay option to faculty on 9-month contracts beginning next academic year. Faculty would need to opt into this payment plan – the details of that opting are still being figured out – and a portion of their 9-month pay would be held and paid out over the summer of 2025, so they are paid over 12 months.

So, this is a very exciting possibility for the faculty who struggle to make ends meet in the summers as single parents or primary income earners.

There are two challenges that were unearthed by this process. The first is that we need to move the 122 faculty currently on the noncompliant spread pay system onto either the deferred pay or spread pay system – whichever they choose. In so doing, they will be paid for the current academic year as planned – until the end of June. Then they will need to switch to the deferred pay (or standard pay) system. Regardless of which they choose, there will be a pause in their payment for three pay periods in July and August as this switch occurs. They are not missing out on salary! We are finishing the spread pay system (July through June calendar), pausing, and then switching to the deferred pay (September to August) calendar.

Something should be very clear: the 122 faculty currently on spread pay will need to switch to the standard pay or – if deferred pay is offered – choose between standard pay or deferred pay system. To ease the transition from spread pay to deferred pay, the provost’s office has set up an option for faculty on spread pay to have a portion of their salaries withheld in the Spring semester and paid out in July and August. There is one other challenge that was unearthed in this process. That is that the Banner system expects and is built for faculty to be on 20 pay period contracts, but UI’s faculty are on 19.5 pay period contracts. This is another change that will need to be made. Faculty will not be expected to work an additional week, but this will slightly lower hourly salary rates – something significant to people on external grants.

The recommendation of the task force that we open the option for deferred pay to all eligible faculty – that is, fulltime faculty on 9-month contracts.

Discussion:

Concern about the delayed payments next summer

To alleviate people’s concerns about having to get by for two months without paychecks, Payroll has set up a system to withhold money (starting in January) to be paid in summer 2024 to the 122 faculty currently on spread pay. Or people can do it on their own.

Incentive?

There will not be an incentive to switch. This transition is something that we have to do. But the provost office and Payroll will help make it less painful. Once again, it was emphasized that there will be no loss of wages – people are getting paid at a different time. This is about moving to a system where we can incorporate everyone.

Impact on summer salaries from grants

The discussion moved to how summer salaries from grants are impacted. There is a maximum salary (due to various regulations) based on what one's salary would be if it were extended to 12 months and keep the salary at that level. A change in the contract period will alter this calculation, as the summer maximum salary will impact faculty who receive 3 months of summer salary from their sponsoring agency. There are still several moving parts. If this recommendation goes forward, it will be useful to provide actual examples covering several scenarios.

Hourly rate reduction

Linda Campos: the hourly rate reduction arose from the need to have 20 pay periods, which presents some system challenges. However, deferred pay can move forward independently. Back to the change in hourly rate, a senator noted that it can be easily calculated from the total salary divided by the total number of hours in the 20-pay period system (compared to the corresponding ratio in the 19.5 system).

Faculty need to choose the deferred pay option every year. So, if a faculty expects to receive 3 months of summer salary from a grant, they may decide not to opt for deferred pay on that particular summer.

The recommendations of the task force will be an action item at the next meeting.

- UOPX – Draft Survey, Chair Gauthier
Just a quick note to remind everyone that the attached survey is a draft. The modalities of distribution are being worked out.

New Business:

There was none.

Adjournment:

The agenda being completed, Chair Gauthier adjourned at 4:42pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://sitecore.uidaho.edu/governance/policy>.

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Faculty Staff Handbook (FSH)

Addition Revision* Deletion* Emergency Minor Amendment
Policy Number & Title: **FSH 1620 University-Level Committees**

Policy Sponsor, if different from Originator:

Reviewed by General Counsel xYes __No

Name & Date: Kim Rytter 4/19/23

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.
Comprehensive review. Revised to clarify procedures for university-level committees and to highlight that all faculty who have voting privileges and all board-appointed staff are welcome to serve on committees.
2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?
None.
3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.
FSH 1640
4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

UI FACULTY-STAFF HANDBOOK
CHAPTER ONE:
HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

1620
UNIVERSITY-LEVEL COMMITTEES

LAST REVISION: January 2018

CONTENTS:

- A. Purpose—Function, Structure, and Membership of Committees
- B. ~~Scope~~ Regulations Governing Committees
- C. ~~Function, s~~Structure, and ~~m~~Membership of University-Level Standing Committees
- D. ~~Regulations g~~Governing ~~University Level Standing c~~Committees. Guidelines for Committee Chairs
- E. Guidelines for University-Level Committee Chairs

A. PURPOSE. ~~This policy regulates university-level standing committees, including their establishment, discontinuance, responsibilities, appointment, and operation. [It also addresses meeting procedure for all committees under the jurisdiction of the university faculty or any of its constituencies.]~~

B. SCOPE. ~~This policy applies to all university-level standing committees.~~

CA. FUNCTION, STRUCTURE, AND MEMBERSHIP OF UNIVERSITY-LEVEL STANDING COMMITTEES. ~~University-Level Standing Committees comprise all committees listed Senate Committees and Other University Level Standing Committees in FSH 1640 -A- identifies Senate Committees and Other University Level Standing Committees. T and sets forth the function, structure, and membership of each committee are~~ set forth in FSH 1640 -B~~See 1640 for the function and structure of each university level standing committee.~~ The list of members appointed to serve on ~~these committees~~ the Senate standing c~~ommittees~~ in FSH 1640 -A-~~1~~ is published on the [Faculty Senate website](#) after the beginning of the academic year by the Committee on Committees. ~~Committees in FSH 1640 -A-1 are also referred to as “standing committees under the jurisdiction of the Faculty Senate.” All faculty who qualify under FSH 1520 -II and all board-appointed staff are eligible to serve on university level-these~~senate committees.

DB. REGULATIONS GOVERNING COMMITTEES. The following is a codification of the general regulations governing university-level committees:

DB-1. As used here, “committee” is a general term denoting any university-level standing or special committee, subcommittee, council, board, senate or similar bodies~~y~~.

DB-2. The establishment, discontinuance, or restructuring of, and the assignment of responsibilities to, ~~the University-Level Senate-standing Standing C~~ommittees ~~as identified in FSH 1640 -A-1 of the university faculty~~ are policy actions that require approval by the Faculty Senate.

DB-3. *Ad hoc* committees to advise the president and university-level standing committees that are composed primarily of administrators (e.g., Publications Board) are appointed by the president.

D-4 ~~Other University-Level Standing Committees as identified in FSH 1640 -A-2 are appointed, charged, restructured, and discontinued, as specified in the description of each commi-~~ as specified in

the committee description.

DB-54. The Committee on Committees appoints, subject to confirmation by the Faculty Senate, members of ~~standing committees of the university faculty~~ FSH 1640 -A--1 ~~Senate c~~Committees, ~~other than those addressed in B-3.~~ The chair of Faculty Senate establishes special Faculty Senate committees and appoints their members.

~~DB-65. In selecting staff members to serve, the Committee on Committees receives names of those approved by the Staff Council~~ Staff and student members of FSH 1640 -A--1 committees are selected and recommended by their respective leaderships. ~~The Council forwards to the Committee on Committees~~ appoints the names of the recommended staff members, subject to confirmation by the Faculty to be appointed to ~~Senate~~ Committees, which recommendation shall be followed by the ~~Committee on Committees, which considers expressions of interest and qualifications of employees to serve on various committees.~~ Approved service by staff members on university committees is considered a valuable service to UI, within the scope and course of employment. Provided the staff employee can be released from regular duties, time spent in committee service is not charged against the employee's annual leave or compensatory time balances, and the employee is not expected to make up time away from normal duties for committee service. (In cases where staff employees are elected to serve, e.g., on Staff Council itself, it is expected that the employee will first secure the consent of ~~his or her~~their supervisor before becoming a candidate.)

DB-76. Ordinarily, no ~~faculty~~ FSH 1640 -A--1 committee will be chaired by an officer who is substantially responsible for implementing the policies or recommendations developed by the committee.

DB-87. Unless otherwise noted within the structure of a committee in FSH 1640 -A-1, chairs are selected by the Committee on Committees. The chairs of ~~faculty standing e~~these ~~Senate~~ Committees generally are rotated so that no committee comes to be identified with one person.

DB-98. The president of the university, or the president's designee, is a ~~member~~ member ex officio of all UI committees, regardless of how the committees may have been established or appointed. On committees under the jurisdiction ~~of the university faculty or~~ of the Faculty Senate, the president or the president's designee serves without vote.

DB-109. The chair of the Faculty Senate is a member ex officio without vote of all committees under the jurisdiction ~~of the university faculty or~~ of the Faculty Senate.

DB-110. Students are to be represented, if they so desire, on ~~FSH 1640 -A--1 faculty~~ committees that deal with matters affecting them. Except for student members of the Faculty Senate, the Committee on Committees receives names of those approved by the ASUI, GPSA and SBA to fill positions established for student members of ~~FSH 1640 -A--1 faculty~~ committees. ~~[See 1640.]~~ If, 21 days after the first day of classes of the fall semester, nominations have not been submitted to fill student positions, the committees on which the vacancies exist are authorized to disregard the vacant student positions in determining a quorum.

DB-121. The membership of individual members of ~~standing committees of the university faculty~~ FSH 1640 -A--1 ~~Senate~~ Committees may not be terminated involuntarily except for cause and with the concurrence of the Committee on Committees with the possibility of appeal by the ~~faculty~~ member to the Faculty Senate.

DB-132. University-level UI committees meet on the call of the chair. Committees under the jurisdiction of the Faculty Senate ~~university faculty or any of its constituencies~~ may be convened by at least 35 percent of the members of the committee with a three-day written notice to all members.

~~DB-143.~~ A quorum for any committee under the jurisdiction of the ~~university faculty Senate or any of its constituencies~~ consists of at least 50% of its voting members, unless otherwise stated in the committee structure.

~~DB-154.~~ Voting:

a.

Proxy votes are not permitted in committees under the jurisdiction ~~of the university faculty or~~ of the Faculty Senate.

- b. Email voting under some circumstances is allowable. However, it must be agreed to by all members at the meeting. There must be an explicit understanding that anyone can ask that voting be delayed until the next meeting as a group. Examples of allowable email voting include: committee is nearing the end of a meeting and discussion has been sufficient for the secretary/chair to draft a recommendation, confirming nominees/appointments, etc.

~~DB-165.~~ Unless otherwise provided, assignments to standing faculty committees begin on the official opening date of the academic year, ~~which ever is earlier.~~

~~DB-176.~~ Open cCommittee mMeetings.

a. Meetings of university-level committees, committees of the colleges, divisions, subdivisions, and other UI units, and *ad hoc* committees, however created, are open to the public with the exception of those meetings, or those parts of meetings, that deal with confidential employee or student matters; But [see DB-176-d].

b. Observers may speak only by invitation of the chair.

c. Observers may use their own ~~tape recorders or other~~ recording devices. Also, they will be provided a copy of any recordings made by the committee, if they request a copy through the appropriate regular channels and pay the full costs involved in producing~~making~~ the copy.

d. An exception to the exception stated in DB-176-a is permitted in hearings on appeals when the appellant demands in writing before the hearing board's first meeting that the hearing be open to the public; nevertheless, the chair of the hearing board has the authority~~power~~ to close the hearing to the public if, in the chair's opinion, the atmosphere becomes detrimental to the orderly conduct of the proceeding. Moreover, the chair has the authority~~power~~ to exclude prospective witnesses from the hearing until they have testified.

~~DB-187.~~ ~~University level Standing S~~standing ~~committees under the jurisdiction of the Faculty Senate~~ are to keep minutes and to distribute them as provided in EC-78.

~~B-18. Smoking is prohibited in official meetings and hearings of UI committees.~~

~~DB-199.~~ Rules of oOrder. [See FSH 1520 VI.]

EC. GUIDELINES FOR FSH 1640 -A-1 COMMITTEE CHAIRS. These guidelines were developed by the Committee on Committees as suggestions for the effective handling of committee business and clarification of certain minimal requirements of these committees. The Committee on Committees recognizessd that not all items will apply equally to all committees and that some items will not be appropriate to some committees.

~~EC-1.~~ At the beginning of each semester, contact committee members ~~about times they would be available to identify for a set meeting time when committee members are available through the semester (for committees that do not have set meeting times already established), so that the times that the committee members will be available to meet can be ascertained.~~

~~EC-2.~~ Hold an organizational meeting as early as possible in ~~the Fall semester-September~~ to discuss and review the charge of the committee (see FSH 1640), its procedures, and possible agenda items, and if desirable select a secretary.

~~EC-3.~~ To ensure that committee business is not delayed when the semester begins, committee chairs are encouraged to recommend and submit names of faculty, staff and students for any vacant position to the Faculty Secretary's Office for consideration and confirmation. All names that are recommended will be handled following the normal approval process.

~~EC-4.~~ Establish the best means of getting in touch with each student member.

~~EC-5.~~ Issue a standing invitation to members to submit appropriate agenda items. Call a meeting when enough agenda items have accumulated to warrant it or when a particular agenda item warrants immediate attention. Alternatively, contact committee members periodically to ask if there are ~~matters~~~~problems~~ that need to be considered.

~~EC-6.~~ Send an agenda ~~to -with the call of a meeting-~~ to all members at least one day (24 hours) in advance of the meeting, if possible.

~~EC-7.~~ ~~Review~~ad the minutes of each meeting carefully to make certain that the intent of the committee is accurately represented.

~~EC-8.~~ Send agenda and approved minutes of each meeting of the committee ~~to the Faculty Secretary's Office at faesec@uidaho.edu and send copies to members of the committee. Also, inform other officers who are directly concerned with the work of the committee. To assist with record keeping, number meetings of the committee consecutively; e.g., "minutes#1 mmddyy."~~ It's recommended that you forward the minutes to the next committee chair, after your term is completed.

Committees that address ~~matters with~~ confidential employee or student matters, shall keep such minutes confidential. All materials for these committees will be forwarded to the Office of the Faculty Secretary for filing and archiving. ~~Also, inform other officers who are directly concerned with the work of the committee. To assist with record keeping, number meetings of the committee consecutively; e.g., "minutes#1 mmddyy."~~

~~EC-9.~~ Hold hearings when substantive policy changes are proposed. When feasible, invite those who will be affected by the committee's action to present their views to the committee.

~~EC-10.~~ Inform those who are affected by the committee's actions of such actions.

~~EC-11.~~ Promptly submit reports of actions requiring approval by the Faculty Senate in care of the Office of the Faculty Secretary for placement on the Faculty Senate agenda. Be prepared to attend the Faculty Senate meeting to answer any questions that arise.

~~EC-12.~~ Inform the Office of the Faculty Secretary of any resignations from the committee and any excessive absences. Excessive absences will be referred to Committee on Committees to determine whether cause exists to replace the member.

~~EC-13.~~ Prepare a ~~succinct~~brief year-end report for submission to the Faculty Senate in care of the Office

of the Faculty Secretary for distribution as needed. The report must contain: number and approximate frequency of the committee meetings; committee goals; committee accomplishments. For committees that address confidential matters (see E-8), send the report to the Office of the Faculty Secretary for filing and archiving.

EC-14. Prepare a transition file for next year's chair highlighting past issues (year-end report could be used), issues that are in progress, or issues that still need to be addressed. Plan to attend one or two meetings of the new committee to ease transitioning.

EC-15. Call on the Office of the Faculty Secretary for information and assistance concerning points not fully covered in these guidelines.

Version History

Amended January 2018. Changes were made to empower staff and students with making final decisions on whom they appoint.

Amended July 2017. Editorial changes.

Amended January 2017. Minor edits to update processes, to enable committees to vote by email under specific conditions, and to ensure that committee business is not delayed due to staff and student groups who sometimes struggle in finding individuals early in the fall semester.

Amended July 2015. Edit to ensure any major changes go forward to the general faculty to ensure faculty governance.

Amended July 2014. Edits to conform to change in quorum requirements in University Judicial Council/Student Disciplinary Review Board which came about due to student code of conduct policy changes.

Amended January 2014. This edit brought 1620 B-10 into conformity with FSH 1640.93 C which states that "Five members, at least two of which must be students" constitutes a quorum for the University Judicial Council.

Amended July 2010. Faculty Council was changed to Faculty Senate and B-7 was revised to address chair appointments.

Amended July 2008. Minor changes were made to B-2, 13 and C-13.

Amended January 2007. This section was substantially revised to reflect current process.

Amended July 2000. Editorial changes.

Adopted: No adoption date is available for this policy.

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Committee directory sections renamed to clarify which committees are within the purview of Faculty Senate. Title of 1640.69 updated to University Promotion and Tenure Committee.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 1620.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

- .69 ~~Promotions Review Committee~~ University Promotion and Tenure Committee
- .70 Publications Board
- .71 Radiation Safety Committee
- .72 Research Council

ACADEMIC HEARING BOARD (AHB)

A. FUNCTION.

A-1. To act on requests for redress of academic grievances and to decide appeals from decisions made by college authorities.

a. Grievances may concern, but are not limited to, such matters as: (1) eligibility for advanced placement or credit by examination; (2) objectivity or fairness in making, administering, and evaluating class assignments; (3) maintenance of standards for conscientious performance of teaching duties; and (4) scheduling of classes, field trips, and examinations.

b. The AHB does not hear appeals concerning requirements or regulations of the College of Graduate Studies or the College of Law. Appeals from decisions of other college authorities are subject to the limitations specified in C-3.

A-2. To observe the effects of academic requirements, regulations, and policies, and to report its findings and recommendations to the Faculty Senate.

B. STRUCTURE. Five faculty members, at least one of whom holds an administrative position in a college. In selecting a chair, a tenured faculty member will receive priority.

C. PROCEDURES.

C-1. Generally the student who is dissatisfied with an institutional academic action should first request reconsideration by the appropriate academic authority. Normally, AHB should hear an appeal only after the student has exhausted the appellate procedures provided at the levels of the department and college. Nevertheless, AHB may grant a request for an earlier hearing if at least two of its members recommend an exception on the grounds that an immediate hearing is warranted.

C-2. When an appeal is to be heard, AHB summons the student concerned and a representative of the academic authority whose action is challenged. A UI student or employee who is summoned to a hearing has the same responsibility to respond as though directed by the president to do so.

C-3. AHB recommends reversal of a departmental or college decision as to the satisfaction or waiver of a requirement or regulation only when it finds that (a) regular procedures have not been followed, (b) the petitioner has been denied a fair hearing, or (c) the decision being appealed was discriminatory with respect to the petitioner.

C-4. Although AHB cannot change a grade or require that it be changed, it may order that the grade it considers appropriate also be recorded on the student's academic records. (NOTE: Procedures for changing grades are outlined in the catalog.)

C-5. It is within the purview of the AHB to hear an appeal of a grade imposed by an instructor as a result of academic misconduct, e.g., cheating or plagiarism. Such a grade constitutes an evaluation and is not to be construed as a penalty. Penalties for academic misconduct are considered to be disciplinary in nature and must be imposed through the student judicial system. Appeals from penalties imposed through the student judicial system are directed to the Faculty Senate. [see 2200, 2300 II, and 2400.]

C-6. AHB reports its decisions and recommendations to the student, instructor, departmental administrator, and dean concerned and to the registrar. The department, college, and registrar make such reports part of their permanent records for the student concerned.

C-7. AHB may devise additional procedures, consonant with the constitution of the university faculty [1520] and the "Statement of Student Rights" [2200], for the discharge of its functions.

C-8. Actions of the AHB may be appealed as stated in 2500.

1640.04
ACADEMIC PETITIONS COMMITTEE (APC)

A. FUNCTION.

A-1. To act on petitions for exceptions to the academic requirements and regulations printed in part 3 of the General Catalog and to the requirements of the SBOE core printed in part 2. APC is the body with original jurisdiction over such petitions.

A-2. To observe the effects of university-level academic requirements, regulations, and policies and to report its findings and recommendations to the Faculty Senate.

A-3. This committee traditionally meets on Thursdays at 2:30 p.m. and during the summer.

B. STRUCTURE. Five faculty members, at least one from the Counseling and Testing Center and include two assistant or associate deans, and (w/o vote) the registrar or that officer's designee. To assure a quorum alternates are appointed for the dean and faculty positions by the chair of the APC from a list of those who have previously served on the committee.

C. ASSUMPTIONS AND PROCEDURES.

C-1. APC must be careful not to establish the petition process as an alternative to being governed by the faculty's legislated academic requirements. There are not two sets of requirements--one for those petitioning and another for those following the catalog.

C-2. All academic work undertaken should be accurately reflected in the student's record. The faculty expects APC to ensure that the record is faithful to the actual experience (cosmetic adjustments or "corrections" are not sanctioned) and that the record is properly interpreted in relation to academic requirements.

C-3. The responsibility for complying with deadlines specified in the academic calendar belongs to the student.

C-4. The decisions of APC should be focused on the academic consideration involved that caused the student to petition, rather than on the consequences, either real or imagined, that may face the student.

C-5. Petitions are presented to APC by a representative of the student's college.

C-6. APC reports its decisions to the registrar and to the student via his or her dean.

C-7. Procedures for appeals from decisions of this committee are as provided in 2500.

1640.06
ADMINISTRATIVE HEARING BOARD (AdHB)

A. FUNCTION.

A-1. The AdHB, acting for the Faculty Senate, hears and decides:

a. Appeals by students and employees from administrative decisions in such matters as residence status for tuition purposes, granting of student financial aid, and assessment of fees or charges (except in connection with parking regulations, see 1640.66).

b. Disputes involving interpretation and application of policies concerning such matters as student records.

A-2. Disputes involving requests for accommodation for persons with disabilities will be handled under 3210.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

A-3. The AdHB is directed to observe the effects of university-level requirements, regulations, and policies and to report its findings and recommendations to the Faculty Senate.

A-4. AdHB is empowered to call students and employees to hearings and any such person called has the same responsibility to respond as though summoned by the president. Decisions of AdHB are subject to review by the president and regents, and may be appealed to them when they consent to hear such appeals.

A-5. This committee meets during the summer.

B. STRUCTURE. Four members of the faculty (including one from the College of Law), one staff member, one student and the following *ex officio* members, or their designees: Registrar and Manager of Student Accounts. In selecting a chair, a tenured faculty member will receive priority.

1640.08

ADMISSIONS COMMITTEE

A. FUNCTION. To act on applications for admission to UI in the cases of undergraduate applicants who do not meet minimum requirements for admission but who request a review. The Admissions Committee also evaluates and acts on applications of undergraduate students to special UI programs requiring minimum qualifications lower than those for regular admission to the University of Idaho. The Admissions Committee also hears appeals from disenrollment when that disenrollment is the result of the presentation of incomplete or false information on initial application as an undergraduate at UI. Decisions of this committee may be appealed as stated in 2500. (Similar applications for admission to the College of Graduate Studies are acted on by the Graduate Council, and its decisions may be appealed as stated in 2500; those for admission to the College of Law are acted on by that college's Committee on Admissions, and its decisions may be appealed, in order, to the full faculty of the college and, when they consent to hear the appeal, to the president of the university and the regents.)

A-1. This committee traditionally meets during the summer.

B. STRUCTURE. Five members of the faculty, director of counseling and testing center or designee, chair of Ubuntu or designee, a member of the American Language and Culture Program faculty, and the following without vote: director of admissions (or designee), a Student Support Services designee, a representative from the Office of Multicultural Affairs, a professional advisor, and up to two representatives from student support programs. To assure a quorum, alternates for the faculty positions are appointed by the chair of the Admissions Committee from a list of those who have previously served on the Committee.]

1640.10

AMERICANS WITH DISABILITIES ACT ADVISORY COMMITTEE

A. FUNCTION.

A-1. To advise the Director of The Office of Civil Rights and Investigations on all matters relating to disability, including universal access and design of university facilities, websites, and programming; accommodation of students, faculty and staff with disabilities; full compliance with the Americans With Disabilities Act as amended, Idaho Human Rights Act, Rehabilitation Act of 1974, and Fair Housing Act; and to discharge such other functions as may be assigned by the Faculty Senate or by the president or the president's designee.

A-2. To fulfill the major faculty responsibility for monitoring and advancing UI's commitment to ensuring that its facilities, programs, activities and services are accessible to all persons with learning, sensory, physical and other disabilities, and to serve the needs of these members of the university community. The committee works closely with administrative officers in identifying and ensuring compliance with applicable laws, regulations and best practices, as well as regents' policy.

A-3. To submit periodic reports on its activities to the Director of The Office of Civil Rights and Investigations,

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

who will distribute them to the Faculty Senate along with recommendations for appropriate program or policy changes.

B. STRUCTURE AND MEMBERSHIP. Three (one from the library, one academic administrator, and the third should have experience and/or possess knowledge of persons with disabilities) all of whom are selected by the Committee on Committees, ITS Director (or designee), Facilities Director (or designee), Executive Director for Human Resources (or designee), Director of Center for Disability Access and Resources,, Director of Housing and Residence Life, Director of Counseling and Testing Center (or designee), Director of The Office of Civil Rights and Investigations, two staff members, two students (undergraduate and graduate), and the following without vote: Parking and Transportation Services, Center on Disabilities and Human Development, Public Safety & Security (or designee), and Office of General Counsel.

1640.12

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC)

(See also APM 45.01)

A. FUNCTION. To perform the functions of the IACUC as defined in APM 45.01.

B. STRUCTURE.

B-1. Members are appointed to three year terms by the Institutional Official (IO) who is the VP for Research and Economic Development. To provide the necessary expertise and continuity members may serve successive terms with reappointment by the IO.

B-2. The committee is composed of not less than five voting members including a chairperson, the Attending Veterinarian (ex-officio appointment a practicing scientist experienced in animal research, a non-scientist, and an individual not affiliated with the University. No more than three voting members may be from the same administrative unit.

B-3. Alternates that meet the criteria for each of the specified positions may be appointed by the IO.

B-4. The Office of Research Assurances Director serves as a non-voting, ex-officio member.

B-5. The IO may remove and replace a committee member at any time when the IO has determined that the member is unwilling or unable to perform committee member functions.

1640.14

INSTITUTIONAL BIOSAFETY COMMITTEE (IBC)

A. FUNCTION. On behalf of the University, the Institutional Biosafety Committee (IBC) is responsible for:

A-1. Reviewing and approving the use of potentially biohazardous material, select agents and toxins, and recombinant DNA in research or teaching activities conducted at or sponsored by the institution for 1) compliance with government agency requirements, including NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines) and regulations promulgated by the CDC and USDA related to select agents and toxins; and 2) alignment with best practices as provided in Biosafety in Microbiological and Biomedical Laboratories (BMBL) and other appropriate best practices. This review shall include: 1) independent assessment of the containment levels appropriate for the proposed research, and 2) assessment of the facilities, procedures, practices, and training and expertise of personnel involved in work with these materials. Consultants may be utilized to assist the IBC. See NIH Guidelines section IV-B-2-b-1 and APM 35.11. Biohazard Safety

A-2. Notifying the Principal Investigator of the results of the IBC's review and approval. See NIH Guidelines section IV-B-2-b-2.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

A-3. Lowering containment levels for certain experiments as specified in NIH Guidelines section III-D-2-a, Experiments in which DNA from Risk Group 2, Risk Group 3, Risk Group 4, or Restricted Agents is Cloned into Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector systems. See NIH Guidelines section IV-B-2-b-3.

A-4. Setting containment levels as specified in NIH Guidelines sections III-D-4-b, Experiments Involving Whole Animals, and III-D-5, Experiments Involving Whole Plants. See NIH Guidelines section IV-B-2-b-4.

A-5. Periodically reviewing recombinant DNA research and potentially infectious material research conducted at the institution to ensure compliance with NIH Guidelines and BMBL best practices. Reviews occur every three years, or more often as deemed necessary by the IBC. See NIH Guidelines section IV-B-2-b-5.

A-6. Adopting emergency plans covering accidental spills and personnel contamination resulting from potentially infectious material and recombinant DNA research. See NIH Guidelines section IV-B-2-b-6.

A-7. Serving as an advisory body to the Vice President for Research and Economic Development for biohazardous research activities.

B. STRUCTURE. The IBC is a faculty-chaired committee. In accordance with NIH Guidelines, the IBC must comprise no fewer than five members selected so that they collectively have experience and expertise in recombinant DNA technology, the capability to assess the safety of recombinant DNA research, and the capability to identify any potential risk to public health or the environment. Members are nominated by the Vice President for Research and Economic Development.

Two members of the committee serve as standing members of the committee as part of their job role: 1) Biosafety Officer and 2) Attending Veterinarian. At least two members shall not be affiliated with the University (apart from their membership on the IBC) and shall represent the interest of the surrounding community with respect to health and protection of the environment. The IBC shall include at least one individual with expertise in plant, plant pathogen, or plant pest containment principles when experiments utilizing the appendix associated with plant research in the NIH Guidelines require prior approval by the IBC. The IBC shall include at least one scientist with expertise in animal containment principles when experiments utilizing the appendix associated with animal research in the NIH Guidelines require IBC prior approval. When the institution conducts recombinant DNA research at BL3 or Large Scale (greater than 10 liters), a Biosafety Officer is mandatory and shall be a member of the IBC.

In order to ensure the competence necessary to review and approve research protocols, every effort is made to ensure that the committee also includes members with expertise in infectious materials, biological safety, physical containment, institutional commitments and policies, applicable law, standards of professional conduct and practice, and a member of the laboratory technical staff.

When changes in NIH guidelines require change in committee structure, such changes will become effective at the time required by federal law. See NIH Section IV-B-2-a. To provide the necessary expertise and continuity of operation, members may serve consecutive three-year terms. The Responsible Official (RO) who is the Vice President for Research and Economic Development may remove and replace a committee member at any time when the RO has determined that the member is unwilling or unable to perform committee member functions.

Reference: NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines) April 2019

1640.18

BORAH FOUNDATION COMMITTEE

A. FUNCTION. To outline and execute a continuing program to achieve the objectives of the foundation established at UI in memory of United States Senator William E. Borah. In accordance with those objectives, the Borah Foundation Committee will sponsor programs and projects focusing on understanding the causes of war and the

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

conditions that contribute to peace.

B. STRUCTURE. Six faculty members, two staff, four students, and (without vote) the associate director of the Martin Institute for Peace Studies and Conflict Resolution. This committee requires a heavy time commitment; as such, elected members will serve two year terms. The Borah Foundation Committee meets weekly and elects its own chair. The Borah Foundation Committee members serve from April 1st of the year of appointment.

1640.20

UNIVERSITY BUDGET AND FINANCE COMMITTEE

A. FUNCTION. The function of the University Budget and Finance Committee is

A-1. To advise the president, provost and the vice president for finance on matters pertaining to operating and capital budgets. The Committee will periodically review policy matters regarding the use of state appropriated funds, university expenditures (e.g., salaries, benefits, operating costs, capital outlays, etc.), operating and strategic reserves, long and short term capital plans, and deferred maintenance plans.

A-2. To be involved strategically in the university budget process. The Committee may help define the budget process and goals, and participate in university budget hearings and meetings.

A-3. To initiate and/or respond to the study of budget and financial policies and issues.

A-4. To provide periodic reports to Faculty Senate and Staff Council on matters pertaining to university finances and budgets.

B. AGENDA. The agenda of each meeting will be set by the Chair of the committee in collaboration with the vice president for finance and/or the provost. The vice president for finance is the point of contact for the committee and is responsible for notifying the committee of relevant meetings dealing with university finances and budgets. The Senator on the Budget and Finance Committee is responsible for reporting activities of the committee to the Senate.

C. STRUCTURE AND MEMBERSHIP. The committee is composed of 19 voting members, plus 3 nonvoting members. The voting members will consist of ten faculty selected by Committee on Committees (preferably, one faculty member from each academic college and one representative from faculty-at-large), and one Senator elected from the Faculty Senate; five staff, (one from each vice presidential area nominated by Staff Council); and three students (selected by the Committee on Committees from nominations provided by the Associated Students of the University of Idaho, Graduate & Professional Student Association and the Student Bar Association). Ex Officio (w/o vote) members include: Provost and Executive Vice President, Vice President for Finance, and Budget Office representative.

The committee's chair will be selected by the Committee on Committees from one of the faculty members. ,

1640.22

CAMPUS PLANNING ADVISORY COMMITTEE

A. FUNCTION.

A-1. To advise the Faculty Senate, Space Advisory Council, and the president concerning campus planning, including such areas as the following:

- a.** To recommend projects that affect the campus environment and to review such projects that originate outside of the committee.
- b.** To encourage optimal use of UI's human and physical resources in the planning of campus development.
- c.** To consider faculty and staff views concerning interrelationships between academic and support programs

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

and their environment.

d. To be concerned with both short-term and long-term projects and with their immediate and future implications.

e. To be concerned with the coordination of campus and community planning: keeping informed on development planning in the community, taking such planning into consideration in campus planning, and informing community planners of projected campus developments.

A-2. To present annually to the Faculty Senate and the president a report on the campus plan. Because of the responsibility of the vice president for finance and administration for overseeing facility planning and maintenance [see 1420 B-1], this committee regularly reports to the president through that vice president.

B. STRUCTURE. Six faculty members, two of whom are elected by Faculty Senate. The committee's chair will be selected from one of these six. The other members of the committee will include one student elected by ASUI, be the Vice President for Finance and Administration (or designee), the Assistant Vice President for Facilities, the CIO of Information Technology, one staff member, and the Coordinator for Student Disability Services (or designee).

1640.26

COMMENCEMENT COMMITTEE

A. FUNCTION.

A-1. To recommend policies applicable to the annual commencement exercises, to provide the president with a list of recommended speakers for the general ceremony, to consider and communicate the concerns of faculty members and colleges with regard to the entire commencement proceedings, and to provide advice to the registrar or president on any other business that pertains to the academic aspects of commencement. [See also 4980.]

A-2. To screen nominations for honorary degrees. [See Section 4930.]

A-3. To act for the faculty in recommending candidates for honorary degrees to the president. [See Section 4910.]

A-4. To review the guidelines and procedures concerning the awarding of honorary degrees and to recommend changes to the Faculty Senate.

B. STRUCTURE. Five faculty members (one of whom serves as chair), one honors student (nominated by ASUI in consultation with the director of the University Honors Program), and the registrar. The chair of this committee also serves as an ex-officio member of the administrative committee charged with production of the commencement activities.

1640.28

COMMITTEE ON COMMITTEES

A. FUNCTION.

A-1. To appoint members to and fill vacancies on all university-level faculty standing committees, subject to confirmation by the Faculty Senate. To ensure full membership when committees begin meeting each fall, authority is given to the Faculty Secretary, Faculty Senate Chair and Vice Chair (aka Committee on Committees Chair) to fill vacancies as they arise over the summer and early fall semester, subject to confirmation by the Committee on Committees and Faculty Senate.

A-2. To conduct a continuing study of UI's committee structure and of the function and structure of individual standing committees, and to make recommendations to the Faculty Senate.

A-3. The Faculty Secretary is a resource for this committee and oversees the process for solicitation of faculty members to serve on university-wide standing committees and maintains committee membership lists.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

B. STRUCTURE. Six faculty members, vice chair of the Faculty Senate (chair), Faculty Secretary (w/o vote) a representative of staff council, and ASUI president, or designee.

1640.34 PROVOST COUNCIL

A. FUNCTION. [See also 1420 D.] To advise the provost and provide a communication forum for the following purposes:

- A-1. Implementing academic policies and procedures.
- A-2. Operating faculty personnel policies.
- A-3. Evaluating the effectiveness of academic-management procedures.
- A-4. Developing academic budgetary priorities.
- A-5. Implementing academic budgetary procedures.

B. STRUCTURE. Provost (chair), vice provosts for academic affairs and student affairs, vice president for research and economic development, dean of graduate studies, WWAMI director, library dean, center leadership and academic deans.

1640.36 DISMISSAL HEARINGS COMMITTEES

A. FUNCTION. This committee will conduct a hearing at the request of a faculty member who has been terminated to determine whether their termination was properly based on the grounds stated (see FSH 3910 D-3 and 3920 D.)

B. STRUCTURE AND MEMBERSHIP: The DHC is composed of four faculty members and one administrator at the departmental level or above, six faculty members and three administrators as alternates. Committee members, including alternates, are chosen on the basis of their objectivity and competence and the high regard in which they are held in the UI community. In appointing members the Committee on Committees should attempt to reflect the diversity of the UI faculty. Due to the possibility a case may be appealed to the Faculty Appeals Hearing Board care should be taken in appointing members to both Faculty Appeals Hearing Board and Dismissal Hearings Committee. The term of membership is three years.

C. SELECTION: The faculty member requesting a hearing has the right to substitute up to two members appointed with two others from the alternate list. The provost also has the right to substitute two members appointed with two others from the alternate list. If as a result of substitutions and conflicts of interest there are an insufficient number of faculty members or administrators on the alternate list, the Committee on Committees will be asked to appoint more members to the alternate list as needed. Once the panel for an individual hearing has been determined, it will meet at the direction of the chair of the Dismissal Hearings Committee and elect its own panel chair. In selecting a chair, a tenured faculty member will receive priority.

C-1. Panel Chair's Role: Once a panel chair has been selected, he/she will request a meeting with the Faculty Secretary at their earliest opportunity to discuss and review process. The panel chair may request assistance from the Faculty Secretary, Ombuds or General Counsel's office throughout the hearing.

C-2. Observers: Both parties may have an advisor or counsel at the hearing.

1640.40
INSTRUCTIONAL SPACE COMMITTEE
[. See also *APM 40.10*]

A. FUNCTION.

- A-1:** To develop and oversee a systematic approach for evaluating, building, and maintaining modern learning spaces on an ongoing basis.
- A-2:** To monitor and report on classroom and class lab utilization, offering recommendations to the Space Advisory Council regarding any conversion from centrally scheduled learning spaces to departmentally scheduled, or vice versa.
- A-3:** To develop classroom and teaching lab renovation priorities; also develop design and technical standards in support of continuous learning space improvements and implementation of curriculum.
- A-4:** To evaluate and recommend changes current scheduling policy to ensure flexibility in meeting the needs of modern active learning spaces.
- A-5:** To make recommendations on prioritization of budgeted expenditures for any general or departmental classroom construction, renovation, major maintenance and/or equipment upgrade project.

B. STRUCTURE. The Registrar, or designee, shall serve as Chair and one additional member from the Registrar's Office; two members from facilities selected by the assistant vice president of facilities; three faculty members; two ASUI representatives; one member selected by the senior executive director from each of the following areas: Information Technology, Center for Excellence in Teaching and Learning (CETL), Purchasing; and the Director of General Education, ex officio without vote.

C. CONTEXT: A systematic approach for evaluating the creation and/or maintenance of classroom environments that are acceptable, sustainable and which effectively facilitate the teaching and learning processes is essential. Numerous discussions with faculty, administration, and staff point to the lack of coordination among the many people who are involved with classrooms. This has contributed to classroom environments which no longer effectively facilitate the teaching and learning process. A coordinated strategic approach moving forward will ensure that classroom environments effectively support the instructional mission of the University and that policy and procedures are in place to facilitate equitable scheduling practices with good classroom utilization rates.

FSH 1640.41
FACULTY AND STAFF POLICY GROUP (FSPG)

A. FUNCTION.

- A-1.** To review non-academic policies and procedures (other than minor amendments, see FSH 1460 B-2) that affect both faculty and staff and that reside in the *Faculty-Staff Handbook* and/or *Administrative Procedures Manual*.
- A-2.** To ensure that both Faculty Affairs and Staff Council are informed, the chair of FSPG will communicate regularly with the chairs of Faculty Affairs and Staff Leadership.
- A-3.** To address and possibly resolve any perceived problems before forwarding proposed policies and procedures to Faculty Senate, the committee is encouraged to seek assistance from, or request meetings with the policy sponsor (see FSH 1460 B-6), general counsel, or others as necessary.

B. STRUCTURE. Three faculty, three staff, and the following as ex officio: Faculty Secretary, and the official responsible for coordinating policy, or designee. A broad representation of faculty and staff across the university is expected and who are seen as leaders among their peers. A current member of Faculty Affairs and Staff Council is

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

desirable, if possible. The chair of this committee will be elected by the committee. An ex officio member may be elected as chair of the committee .

1640.42

FACULTY AFFAIRS COMMITTEE (FAC)

A. FUNCTION.

A-1. To conduct a continuing study of salaries, professional problems, welfare, retirement options and benefits (including 403b plans), and working conditions of faculty members.

A-2. To call the attention of the Faculty Senate or the president, as appropriate, to matters concerning faculty affairs in any college or other unit that the committee believes should be of concern.

A-3. To serve as a point of first contact involving questions of interpretation and application of policies affecting the welfare of faculty members such as promotion and tenure.

B. STRUCTURE. Nine faculty members, not more than two of whom are departmental administrators (administrators above the departmental level are not eligible for membership on this committee). The Vice Provost for Faculty and the Faculty Secretary serve as ex officio members without vote.

1640.43

FACULTY APPEALS HEARING BOARD

A. FUNCTION. This board will conduct a hearing at the request of a faculty member who wishes to appeal an institutional decision under FSH 3840 A. In each case referred to it, the board will review all documentary evidence submitted by the parties prior to the hearing and all evidence submitted by the parties at the hearing. The board may require the parties to submit evidence deemed relevant by the board. The board will make recommendations to the president (see FSH 3840 for further details).

B. STRUCTURE AND MEMBERSHIP: Five faculty members, one of whom is a departmental administrator, are principal members. In addition, five other faculty members, two other departmental administrators, and three off-campus faculty members are appointed as alternate members of the board. In appointing members, including alternates, the Committee on Committees must ensure that the majority of the members are tenured and each of them have been employed at the UI for longer than two years. Since a case for dismissal is appealable to the Faculty Appeals Hearing Board, care should be taken in appointing members to both Faculty Appeals Hearing Board and Dismissal Hearings Committee. The term of membership is three years, with initial terms staggered to form a rotation pattern. The off-campus alternates will serve, in place of principal faculty members chosen by lot, when an appeal by an off-campus faculty member is to be heard. The other alternate members will serve, as appropriate, when a principal member is deemed to have a conflict of interest. Once the panel for an individual hearing has been determined, it will meet at the direction of the chair of the Faculty Appeals Hearing Board and elect its own panel chair. In selecting a chair, a tenured faculty member will receive priority.

B-1. Panel Chair's Role: Once a panel chair has been selected, he/she will request a meeting with the Faculty Secretary at their earliest opportunity to discuss and review process. The panel chair may request assistance from the Faculty Secretary, Ombuds, or General Counsel's office throughout the hearing.

B-2. Observers: Both parties may have an advisor or counsel at the hearing.

C. SPECIAL CONSIDERATION: Faculty members serving on the Faculty Appeals Hearing Board (FAHB) should take careful note of the following additional considerations and conditions for service: 1) appeals usually occur following tenure, promotion, and salary decisions in the middle of the Spring semester, 2) appeal hearings usually require a 2-4 hour time block which will require meeting on a weekday evening or Saturday to accommodate the schedules of all of the parties involved in a hearing, and 3) the term of office of a member of the FAHB ends when the last active case final report is

submitted. Faculty members not willing to abide by these conditions should not apply for service on the Faculty Appeals Hearing Board.

1640.44

FACULTY SENATE

[See 1520 V and 1580 for the function and structure of this senate.]

1640.46

ARTS COMMITTEE

A. FUNCTION:

A-1. To advise the University administration regarding the management of the University arts, including but not limited to acquisition, deaccession, maintenance, and display of works of visual and performing art at the University of Idaho.

A-2. To serve in an advisory capacity for future needs and developments regarding the arts, including but not limited to expenditures, inclusion of the arts in new construction, fundraising, and the direction of the arts on campus.

A-3. To serve as a liaison on arts issues between colleges, departments, faculty, staff, student body, local community and the University administration.

A-4. To advocate for the arts through endeavors that advance arts education on campus, and through community outreach and enrichment, to increase the University of Idaho's reputation as a leading cultural center in the Northwest.

A-5. To oversee the Student Arts Fee Grant program, including but not limited to soliciting and reviewing proposals and working with the Office of the Provost to ensure timely distribution of funds to successful applicants.

B. STRUCTURE AND MEMBERSHIP. The committee is composed of eight voting members consisting of five faculty members representing at least four units, one staff member, two students (including a representative from the ASUI Fine Arts Committee when possible), and seven ex-officio (non-voting) members to include two administrators designated by the president (representing separate colleges or schools), a University administrator in the arts, a representative from the UI Foundation, a representative from Facilities Management, a representative from Special Collections of the UI Library, and the City of Moscow Arts Program manager or designee.

1640.48

GRADUATE COUNCIL

[See 1700 V for the function and structure of this council.]

1640.50

GRIEVANCE COMMITTEE FOR STAFF EMPLOYEES

[See 3860 for the function and structure of this committee.]

1640.51
GRIEVANCE COMMITTEE FOR STUDENT EMPLOYEES
[See 3880 for the function and structure of this committee.]

1640.53
HONORS PROGRAM COMMITTEE

A. FUNCTION.

- A-1.** To recommend policies for the University Honors Program, including admission requirements.
- A-2.** To act on changes in the program.
- A-3.** To act on petitions for exceptions to the requirements of the program. (The committee's actions on petitions may be appealed as stated in 2500.)

B. STRUCTURE. Six faculty members to represent a broad spectrum of the UI community, an academic dean from one of the six colleges representing the honors curriculum (college representation to rotate on an annual basis), President of the Honors Student Advisory Board or designee, and (w/o vote) director of the University Honors Program (UHP), program advisor of the UHP (staff). The latter serves as secretary. One of the six appointed faculty members serves as chair. ,

1640.54
INSTITUTIONAL REVIEW BOARD

A. FUNCTION. The federal government requires the University of Idaho (University) to designate an Institutional Review Board (IRB) to ensure that human subject research conducted under the auspices of the University meets federal requirements. Under the approved federal-wide assurance for the University, the IRB shall apply the regulations set forth by United States Department of Health and Human Services (HHS) at [45 CFR 46](#) to all federally funded human subject research, and shall be guided by the ethical principles set forth in *The Belmont Report: Ethical Principles and Guidelines for the Protection of Human Subjects of Research of the National Commission for the Protection of Human Subjects*. All non-federally funded or unfunded human subject research shall comply with these regulations unless otherwise specified by University policy. The IRB shall also apply the human subject research regulations established by the Food and Drug Administration for clinical investigations involving drugs, biologics, medical devices, and other test articles. ([21 CFR 50](#); [56](#); [312](#), and [812](#)). The IRB shall not approve FDA-regulated human subject research without prior approval for such research from the Office of Research and Economic Development. The IRB shall act in conformance with other federal laws and regulations germane to human subject research and with applicable state and local law. [See FSH 5200]

- A-1.** Human subject research that has been approved by the IRB may be subject to further review and approval by University officials. However, a University official may not approve such research, or that portion of a research project that constitutes human subject research, if it has not been approved by the IRB.
- A-2.** The committee serves as an advisory body to the Vice President for Research and Economic Development for matters related to human subject research.

B. STRUCTURE AND MEMBERSHIP.

- B-1.** The IRB is composed of at least five (5) members with varying backgrounds to promote complete and adequate review of research activities commonly conducted at the University. The IRB is chaired by a faculty member.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

B-2. The Director of Research Assurances serves as an *ex officio* non-voting member to assist in representing institutional commitments and regulations.

B-3. The IRB shall include at least one member whose primary concerns are in scientific areas and one member whose primary concerns are in nonscientific areas.

B-4. The IRB shall include one member who is not otherwise affiliated with the institution and who is not part of the immediate family of a person affiliated with the institution.

B-5. At its discretion, the IRB may invite individuals with competence in special areas to assist in the review of issues that require expertise beyond or in addition to that available on the IRB. These individuals may not vote with the IRB.

B-6. The Vice President for Research and Economic Development may remove and replace a committee member at any time the member is unwilling or unable to carry out committee functions.

B-7. Alternates. The IRB Chair, or designee, may select an alternate member to substitute for, with vote, an absent voting member at a convened meeting. The alternate member shall have similar expertise as the absent voting member for whom they are serving as a replacement.

B-8. The Vice President for Research and Economic Development appoints all members of the IRB, including the alternates.

1640.55

INFORMATION TECHNOLOGY COMMITTEE

A. FUNCTION. To advise and recommend university policies regarding the planning, implementation, and maintenance of information technology in the areas of teaching, research, outreach, and management.

A-1. To make recommendations to the Faculty Senate, the president, the provost, and other appropriate administrators concerning policies and procedures affecting university-wide information technology.

A-2. To solicit recommendations from the faculty, staff, students, and administration concerning present and proposed policies and procedures related to university-wide information technology.

A-3. To review, in an advisory capacity, short-term and long-term plans related to university-wide technology.

A-4. This committee traditionally meets on Mondays at 3:30 p.m.

B. STRUCTURE AND MEMBERSHIP. Six faculty members broadly representative of disciplines in the university including one from the library, the Vice-President for Research, or designee (w/o vote), the Vice President for Finance and Administration, or designee (w/o vote), the Vice Provost for Digital Learning Initiatives or designee (w/o vote), the Vice President for Information Technology or designee (w/o vote), the Registrar, or designee (w/o vote), the Director of the Center for Teaching Innovation, or designee, a representative of the off-campus faculty, the student chair of the Student Computing Advisory Committee, or designee. The voting members of the committee (including the committee chair but excluding the student member) are selected by the Committee on Committees, giving special attention to appointing faculty members who are active in and have a great interest in the general area of information technology and its application to teaching, research, outreach, and management.

1640.58

UBUNTU

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

A. CONTEXT. Ubuntu, as explained by Desmond Tutu, is essential to the interconnectedness of being human and living in interdependent communities. Ubuntu is affirming and inclusive of others because we all belong to a larger whole which is diminished when any members are humiliated, disrespected or oppressed. People with Ubuntu enrich themselves but do so in ways that enable the community and all its members to also improve. In this spirit the Ubuntu committee is established to advance these ideals.

B. FUNCTION.

B-1. Ubuntu will promote the values of respect, understanding, and fairness within our diverse university experience; review university policies and programs affecting under-represented and/or under-served students, staff, and faculty in consultation with appropriate representatives as necessary across campus; recommend changes and additions in university policies and programs that enhance student/staff/faculty success and advancement. [See also 4340.]

B-2. Ubuntu will monitor and advance the university's affirmative action and equal opportunity programs [see FSH [3060](#)] being a strong and active voice ensuring that the university's programs, activities and services are accessible to persons with learning, sensory, physical and other disabilities. The committee will also work closely with the Americans with Disabilities Act Advisory Committee (ADA) to identify relevant rules and regulations pertaining to specific affirmative action and equal opportunity problems at the university. Ubuntu also recommends policies and procedures to address specific disabled access challenges at the university, consistent with requirements of applicable regulations and regents' policy ensuring that the 'spirit of the law' is followed.

B-3. This committee will advise the president on matters of equal opportunity, ensuring that UI's programs, activities and services are available to persons with learning, sensory, physical and other disabilities, and identify avenues for ensuring the campus community creates a fair and inclusive environment for all.

B-4. This committee will also discharge such other functions as may be assigned by the Faculty Senate or by the president or the president's designee. It will also submit periodic reports on its activities to the Faculty Senate including recommendations for appropriate program or policy changes (see FSH *1460*).

C. STRUCTURE. Four faculty, one of whom serves as chair; two staff members (one from Staff Council); two students (one undergraduate (ASUI) and one graduate (GPSA or SBA), one of whom belongs to an under-represented and/or under-served student population and the following *ex officio* members without vote or their designees: the ASUI Director of Diversity Affairs, Coordinator of Student Support Services, the Director of Multicultural Affairs, the Director of the Women's Center, a representative from Human Resources, the Director of Civil Rights and Investigations, the Director of Diversity and Community, the Coordinator for Disability Support Services, the Director of International Programs, the LGBTQA Coordinator, and the Director of the Native American Student Center or the Native American Tribal Liaison.

1640.60

LIBRARY AFFAIRS COMMITTEE

A. FUNCTION. To recommend policies and procedures concerning the needs, functions, and objectives of the University Library. [See also 6920.]

B. STRUCTURE. One faculty member plus one faculty member each from humanities, sciences, and social sciences; one faculty from the library; one undergraduate student; one graduate student; and (w/o vote) dean of library services.

1640.64

OFFICER EDUCATION COMMITTEE

A. FUNCTION. [See also 1565 G.]

A-1. To be concerned with the academic integrity of the Officer Education Program (OEP).

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

A-2. To advise the president, the faculty, and the Departments of Aerospace Studies (WSU), Military Science, and Naval Science on academic matters concerning OEP.

A-3. To review and recommend to the University Curriculum Committee courses to be offered by the above-named departments.

A-4. To carefully review and evaluate the academic credentials of proposed OEP instructional appointments and to report these evaluations and recommendations to the vice provost of academic affairs.

A-5. To assist the OEP to integrate effectively within the UI community.

B. STRUCTURE. Heads of the Departments of Aerospace Studies (WSU), Military Science, and Naval Science, three other members of the faculty, (one of whom serves as chair), the Vice Provost for Academic Affairs, or designee (ex officio), and two students (one ROTC and one non-ROTC).

1640.66

PARKING COMMITTEE

A. FUNCTION. To hear and decide appeals concerning matters involving parking and to review and advise the university administration on campus parking conditions, policy, **and** regulations. Decisions of this committee regarding parking violations may be appealed to the assistant vice president for facilities.

B. STRUCTURE. Three members of the faculty, three members of the staff, two students, and (w/o vote) the parking coordinator.

1640.69

PROMOTIONS REVIEW COMMITTEE/UNIVERSITY PROMOTION AND TENURE COMMITTEE

[See ~~3560-H-2~~FSH 3500 for the function and structure of this faculty committee.]

1640.70

PUBLICATIONS BOARD

A. FUNCTION. To advise the UI administration on major publications, such as catalogs, viewbooks, magazine, faculty-staff newsletter, and annual reports; to consider communication options; and to recommend the most effective ways to reach targeted audiences. Specific responsibilities include:

A-1. Reviewing UI publications intended for general audiences, including public, civic, and governmental leaders and alumni, and, from time to time, recruiting and other outreach materials. These are evaluated as to purpose, content, type of message, and effectiveness.

A-2. Reviewing trends and proposing priorities, content, and means of reaching new audiences.

A-3. Reviewing policy related to use of UI's corporate identity symbols and recommending policy changes.

B. STRUCTURE. Director of university communications (chair), vice provost for academic affairs, executive director of UI Foundation, director of alumni relations, director of New-Student Services, publication creative director, publications editor, and secretary of the faculty.

1640.71

RADIATION SAFETY COMMITTEE

A. FUNCTION. To be responsible to the vice president for finance and administration for all aspects of UI's radiation-safety program and consult with individual investigators concerning radiation safety procedures. The Radiation Safety Committee is responsible for all matters pertaining to the formation, administration and operation of a comprehensive

radiation safety program. The Radiation Safety Committee reviews new applications and renewal applications to use radioactive materials, conducts audits and reviews of the radiation safety program, determines appropriate levels of radiation safety training and testing, maintains records of committee proceedings and actions, develops radiation safety manuals and safety practices, and ensures compliance with all applicable rules and regulations.

B. STRUCTURE. Radiation safety officer, director of Environmental Health and Safety or a representative of Division of Infrastructure, and an academic dean or department head and up to eight technical members. The academic administrator and the technical members are selected from the various areas of teaching and research where radioactive materials are used. These include, but are not limited to, agricultural sciences, forestry, life sciences, mining and metallurgical sciences, engineering, and physical sciences. A technical member must meet the requirements of an authorized user. To provide the necessary expertise and continuity of operation, technical members may serve two or more consecutive terms, but the membership may not include more than two technical members who have served continuously for more than two three-year terms. The chair and vice chair are elected each spring by the current members of the committee to serve for the next membership year. The term of the chair is one year but may serve two consecutive terms. A quorum shall consist of the chair, radiation safety officer, director of Environmental Health and Safety or a representative of Division of Infrastructure, and a minimum of four of the eight technical members. All requests for committee action are submitted to the radiation safety officer. When a sufficient number of items have been received, the radiation safety officer, with approval from the chair, will arrange a meeting of the Radiation Safety Committee. The Radiation Safety Committee shall meet as often as necessary but not less than quarterly.

1640.72 RESEARCH COUNCIL

A. FUNCTION. The Research Council is the faculty's standing committee that oversees the implementation of discovery, creativity, and research policies [see 5100 and 5200] and resolves disagreements about the interpretation or implementation of those policies.

B. STRUCTURE. One faculty member from each of the colleges, four members appointed by the president to ensure adequate representation from faculty constituencies that are most active in discovery, creativity, and research policies while ensuring that faculty engaged in multidisciplinary activities are represented, and (w/o vote) vice president for research and economic development and dean of library services (or the latter's designee). The representatives from the colleges are designated in accordance with procedures determined by their respective faculties. The vice president for research and economic development serves as chair of the Research Council.

1640.74 SABBATICAL LEAVE EVALUATION COMMITTEE

A. FUNCTION. To review applications for sabbatical leave, to make recommendations to the Faculty Senate for approval and referral to the president, to review the reports of those returning from sabbatical leave, and to evaluate annually the results of the program. [See also 3720.]

B. STRUCTURE. Five faculty members (with at least one representative each from the humanities, natural sciences, and social sciences) and vice provost of academic affairs, or designee (w/o vote).

1640.76 SAFETY AND LOSS-CONTROL COMMITTEE

A. FUNCTION. The responsibilities and purposes of the committee are as follows: **a.** to promote policies and programs that will provide a safe and healthy working and living environment for university students, employees, and members of the public, and that will protect public property from injury or damage; **b.** to promote the principles and associated benefits of an effective Safety and Loss-Control Policy; **c.** to endorse and systematically promote university employee safety training; **d.** to encourage the campus community to identify, correct, and report potential hazards and/or unsafe work practices; **e.** to monitor and review University of Idaho accident and loss summarized reports and statistics; and; **f.** to report annually to Faculty Senate and the President's Executive Council on campus-wide safety initiatives and program development.

B. STRUCTURE. The committee is composed of 21 voting members and 3 ex-officio (non-voting) members, as follows: One faculty member from each college; a member from Information Technology Services, University

Support Services, University Library, Office of Research and Economic Development; Director of University Residences or designee; Director of Student Health Services or designee; Assistant VP of Facilities, or designee; senior Human Resources executive, or designee; a Staff Council representative; one undergraduate student; one graduate student, and the Risk Manager, or designee; the three ex-officio non-voting members include the Commander, Moscow Police Department, campus subdivision; Occupational Safety Specialist; the Director, Environmental Health & Safety.

The Safety and Loss-Control Committee is governed by a chair and vice-chair, with the vice-chair assuming responsibilities of the chair after one-year rotation. The committee elects its own chair and vice-chair from among the voting members. Committee members representing colleges are appointed by the university's Committee on Committees and serve a three-year period. The faculty representatives are *ex officio* members of their college unit safety committees. Student members of the committee will serve terms as recommended by the ASUI and GPSA.

1640.77

SCIENTIFIC MISCONDUCT COMMITTEE

A. FUNCTION. An inquiry board (FSH 3230 E-3) formed from the members of this committee is charged with making a preliminary evaluation of the evidence and testimony of the respondent, complainant, and key witnesses to determine whether there is sufficient evidence of possible scientific misconduct to warrant an investigation. The purpose is not to determine whether scientific misconduct definitely occurred or who was responsible.

B. STRUCTURE AND MEMBERSHIP. The vice president for research and economic development will nominate, with appointment by the Committee on Committees and confirmation by the Faculty Senate, six principal and three alternate tenured faculty members to a Scientific Misconduct Committee (SMC) with one member appointed as chair. The vice president will initially nominate three tenured faculty members to one-year terms, three tenured faculty members to two-year terms, and three tenured faculty members to three-year terms. Thereafter, tenured faculty members will be nominated for three-year terms. A departmental administrator may not chair the SMC.

1640.80

STAFF COUNCIL

[See 1800 for the function and structure of this committee.]

1640.81

UNIVERSITY STAFF COMPENSATION COMMITTEE

A. FUNCTION. The function of the University Staff Compensation Committee (USCC) is:

A-1. To advise the president, provost and the vice president for finance and administration on matters pertaining to staff compensation. The USCC will periodically review policy matters regarding annual change in employee compensation (CEC) allocations and annual market-based adjustment to staff salary based on College and University Professional Association (CUPA) and the Bureau of Labor Statistics (BLS);

A-2. To be involved strategically in the university annual CEC process. The USCC will advise on the CEC process and staff compensation goals, and participate in university hearings and meetings;

A-3. To initiate and/or respond to the study of staff compensation policies and issues; and,

A-4. To provide periodic reports to Staff Council and Faculty Senate on matters pertaining to staff compensation.

B. AGENDA. The agenda of each meeting will be set by the chair of the committee in collaboration with the senior human resources executive and/or the vice president for finance and administration, or designee. The senior human resources executive is the point of contact for the committee and is responsible for notifying the committee of relevant

matters pertaining to staff salaries.

C. STRUCTURE AND MEMBERSHIP. The committee is composed of eleven members as follows: voting members will consist of nine staff. Ex officio (w/o vote) members include the vice president for finance and administration and the senior human resources executive. The committee's chair will be selected by Staff Council. The membership is appointed by Staff Council and will consist of a broad representation of staff located university-wide with a minimum of two off-campus members.

**FSH 1640.83
STUDENT CONDUCT BOARD**

A. FUNCTION. UI's process for reviewing alleged violations of the Student Code of Conduct (FSH 2300) is set forth in FSH 2400. The SCB is the reviewing body involved in the conduct process set out in FSH 2400 D., E. and F.

B. STRUCTURE AND MEMBERSHIP. The SCB is broadly representative of the UI community and is composed of 21 voting members: seven faculty, seven staff, and seven students. The student members should include at least one graduate student and at least one law student. Hearing panels will be drawn from these committee members. Given the nature of responsibility of the Chair of SCB, Committee on Committees shall first consider a tenured faculty member. Pursuant to FSH 2400 the chair will appoint the three person panels.

C. SPECIAL CONSIDERATION. Each committee member shall be required to participate in Title IX training and other training as needed. Members of the SCB should be aware that federal regulations governing the handling of disciplinary matters recommend a specific hearing time schedule. Therefore, SCB members may need to be available on short notice and during the summer months. Outgoing committee members should be aware that their appointment will continue until their replacement is confirmed and has received the required Title IX training (typically by early fall).

**1640.84
STUDENT FINANCIAL AID COMMITTEE**

A. FUNCTION. [See also 2900.]

A-1. To recommend policies and procedures for the administration of all student financial aids under UI's jurisdiction, i.e., scholarships, grants-in-aid, loans, work-study programs, and educational opportunity grants.

A-2. To advise the director of student financial aid.

A-3. To hear and decide appeals from students in matters concerning student financial aid.

A-4. To ensure that all pertinent documents are forwarded to the Administrative Hearing Board [see 1640.06] when students appeal decisions or procedures of this committee to that body.

A-5. To promote the increase of funds for student financial aid.

B. STRUCTURE. Five faculty members, two students, and (w/o vote) director of student financial aid, a member of the Student Support Services staff, and an additional person designated by the director.

**1640.86
TEACHER EDUCATION COORDINATING COMMITTEE**

A. FUNCTION. [See also 4300]

A-1. To conduct a continuing review of teacher-education policies and to promote quality teacher preparation.

A-2. To act on and submit to the respective college committees proposed changes in programs leading to teacher education certifications and endorsements.

A-3. To provide updates on state and national issues pertaining to the preparation of educators.

A-4. Will meet three times per year prior to UCC deadlines, to facilitate curriculum changes. Meeting dates/times will be posted annually by the first week of September.

B. STRUCTURE AND MEMBERSHIP. The members of the committee are appointed by the College of Education, Health & Human Sciences (CEHHS) as follows:

- Four faculty members from the Department of Curriculum and Instruction with representation from elementary, secondary, career and technical education, and special education programs;
- One faculty member from the Department of Movement Science physical education teacher education program;
- One faculty member from the Department of Leadership and Counseling educational leadership program;
- One faculty member from each of the following programs -- early childhood, agricultural education, music education, English education, mathematics education, social sciences, natural sciences and business;
- Two junior or senior level students (one from CEHHS and the second annually rotating between early childhood education, agricultural education and music education);
- Three P-12 school personnel including a superintendent, principal and teacher from multiple districts representing both elementary and secondary education;
- The Director of Teacher Education, who serves as chair; and
- The CEHHS Director of Assessment and the Dean of CEHHS, or designee, both without vote.

1640.87

UNIVERSITY TEACHING COMMITTEE

Preamble: In March 2020, FSH 1640.87 Teaching and Advising Committee was split into two committees: FSH 1640.87 University Teaching Committee and FSH 1640.88 University Advising Committee.

A. FUNCTION.

A-1. To promote a faculty and administrative culture dedicated to the enhancement of teaching and learning across all instructional modalities.

A-2. To review and make recommendations concerning policies and procedures that affect teaching and the assessment of student, program and institutional learning outcomes.

A-3. To monitor and advise on matters relating to student teaching evaluations and student learning outcomes, and to advise on the design and content of reports to the Vice Provost for Academic Initiatives, Faculty Senate, Institutional Assessment and Effectiveness, deans, unit leaders, and faculty.

A-4. To serve as an advisory resource for the Director of the Center for Excellence in Teaching and Learning to promote effective teaching.

B. STRUCTURE. Six faculty members, preferably some of whom have received university-level teaching awards; an associate dean; the director of general education; one undergraduate student; one graduate student; a representative from the Office of Institutional Effectiveness and Accreditation (without vote); and the Director of the Center for Excellence in Teaching and Learning, or designee.

1640.88

UNIVERSITY ADVISING COMMITTEE

Preamble: In March 2020, FSH 1640.87 Teaching and Advising Committee was split into two committees: FSH 1640.87 University Teaching Committee and FSH 1640.88 University Advising Committee.

A. FUNCTION. For the purposes of this policy, advising includes mentoring and retention activities.

A-1. To promote a faculty and administrative culture dedicated to effective student advising.

A-2. To review and make recommendations concerning policies and procedures that affect student advising.

A-3. To monitor the student advising program and to advise on the design and content of reports to the Vice Provost for Academic Initiatives, Faculty Senate, deans, unit leaders, and faculty.

A-4. To serve as an advisory resource for Executive Director of Student Success Initiatives to promote effective student advising.

B. STRUCTURE. Five faculty members, preferably some of whom have received university-level or college-level advising awards; an associate dean; a professional academic advisor; a University Advising Services associate director; two undergraduate students; and the Executive Director of Student Success Initiatives, or designee (without vote).

1640.89

UNIVERSITY COMMITTEE FOR GENERAL EDUCATION

A. FUNCTION.

A-1. University Committee for General Education serves as the curriculum body for general education by soliciting and approving proposals and courses to be included in the University's general education and general education courses eligible for transfer to other state institutions (SBOE general education matriculation "GEM" courses). The UCGE committee also engages in program review and assessment and then makes recommendations for the continuous refinement of general education in conjunction with the Director of General Education and the Assistant Director of Institutional Research and. Recommendations for change will be forwarded to UCC, Faculty Senate, and the university faculty.

A-2. The committee reports periodically (at least once a year) to the Faculty Senate on the status of general education.

A-3. This committee traditionally meets on Thursdays at 3:30 p.m.

[Information on University General Education can be accessed at the general education website: <http://www.uidaho.edu/class/general-education>]

B. STRUCTURE AND MEMBERSHIP. At least one member from each of the six GEM areas who also serve as institutional representatives to SBOE on statewide general education, one of whom serves as chair, selected by Committee on Committees in consultation with the Director of General Education, and one each from the colleges of Agricultural and Life Sciences, Art and Architecture, Business and Economics, Education, Engineering, Natural Resources and Library; two undergraduate students appointed by ASUI and chosen to represent two different colleges; and the following without vote: Director of General Education, College of Letters, Arts and Social Sciences Dean, or designee, College of Science Dean, or designee, Registrar, or designee, Assistant Director of Institutional Research and Assessment, or designee, Director of Academic Advising, or designee.

1640.90

UNIVERSITY ASSESSMENT & ACCREDITATION COMMITTEE (UAAC)

A. FUNCTION

A-1. Facilitate communication on the development and implementation of the program review process, student learning outcomes assessment, and university-wide student achievement and satisfaction surveys in respective departments and colleges. The UAAC will support the development of assessment activities that assess university-wide student learning outcomes to ensure a quality education and co-curricular

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

experience, continuous program improvement, and compliance with accreditation standards.

A-2. Facilitate communication between Institutional Assessment and Accreditation (IAA) and faculty.

A-3. Develop and implement program and learning outcomes assessment guidelines based on SBOE and NWCCU expectations.

A-4. Recognize those who are actively engaged in assessment work.

A-5. Review and comment on results from university-wide assessment plans and individual program assessment plans and processes and recommend ways for improvement.

A-6. Provide input and feedback on the online UI student learning outcomes reporting system as requested.

A-7. Serve as subject matter experts from colleges and units on student learning outcomes assessment and continuous program improvement.

A-8. Review Annual Program Reviews (APR) and specialized accreditation reports and assist with feedback to programs and the Provost's Office.

A-9. Review NWCCU reports and recommendations and provide input or feedback.

A-10. Assist with special projects pertaining to accreditation or APRs, as appropriate.

A-11. Advise on matters related to ongoing collection of data and evidence for accreditation standards.

A-12. Maintain a timeline for accreditation reporting.

A-13. Advise IAA on accreditation issues, as requested.

B. STRUCTURE AND MEMBERSHIP. Eleven faculty representatives, comprising one from Library and one from each of the following colleges: Agricultural and Life Sciences; Art and Architecture; Business and Economics; Education, Health and Human Sciences; Engineering; Graduate Studies; Law; Letters, Arts, and Social Sciences; Natural Resources; and Science. The representative from the College of Graduate Studies shall be named by their Dean. Preference shall be given to faculty members with expertise and experience in assessment and accreditation, and a chair shall be chosen by the Committee on Committees from among the faculty representatives, preferably a tenured faculty member. The following positions shall serve on the committee as ex officio members (without vote): the Vice Provost of Academic Initiatives or designee, Associate Director of Assessment & Accreditation, a recorder from the office of Assessment & Accreditation, a representative from the office of Equity, Diversity & Inclusion, a representative from the Division of Student Affairs, a representative from Strategic Enrollment management, the Director of General Education, and the Director of CETL or designee.

1640.91

UNIVERSITY CURRICULUM COMMITTEE

A. FUNCTION. [See 1540 B and C and also 4110 and 4120.]

A-1. To act on catalog changes involving the curriculum, including changes in the general requirements and academic procedures, and to coordinate curricular matters among UI's major academic divisions.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

A-2. To recommend policies and procedures concerning the matriculation, advising, and registration of students.

A-3. This committee traditionally meets on Mondays at 3:30 p.m.

B. STRUCTURE. One faculty member from each college except Graduate Studies, of whom at least one must be a member of the graduate faculty and at least one of whom must have experience in an interdisciplinary area; one faculty member at large, one faculty member from the library, two upper-division undergraduate students; one graduate student; and the following without vote: vice provost of academic affairs, registrar, secretary of the faculty (or their designees), and the director of general education as a non-voting member of the University Curriculum Committee. To assure a quorum alternates for the faculty positions are appointed by the chair of the University Curriculum Committee from a list of those who have previously served on the Committee from that college. If there should be no such alternates available from a particular college, the chair of that college's curriculum committee is the designated alternate.

1640.92

UNIVERSITY DEVELOPMENT COUNCIL

A. FUNCTION. To plan and coordinate the fund-raising activities of the university and its units.

B. STRUCTURE. Vice president for university advancement (chair), financial vice president, provost, academic deans, executive director of the UI Foundation, director of athletics, director of alumni relations, trust and investment officer, and executive director of development.

1640.95

UNIVERSITY SECURITY AND COMPLIANCE COMMITTEE (USCC)

A. FUNCTION.

A-1. The USCC is charged with ensuring the University's compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), and planning and facilitating activities that support a safe and secure living, learning and working experience. USCC will focus on accurate disclosure (reporting of Clery crime statistics) and implementation of best practices regarding safety policies and procedures. The USCC will conduct an annual review of all reportable crimes prior to submitting crime statistics to the U.S. Department of Education. The committee will also perform a thorough review of the Annual Security and Fire Safety Report (ASFR) prior to its publication.

A-2. The USCC shall meet a minimum of three times each year. Topics will include, but not be limited to, the following:

- Review updates to the law, policies and procedures related to security and Clery Act compliance
- Ensure timely collection of Clery crime statistics from applicable jurisdictions
- Recommend enhancements to security policies
- Identify programming efforts and recommend improvements
- Review crime and disciplinary data to avoid report duplication
- Conduct a final review of the data elements for the ASFR and recommend policy changes
- Confirm procedures for distributing the ASFR.

B. STRUCTURE. Executive Director, Office of Public Safety & Security who serves as Chair, one member from each of the following: Staff Council, Dean of Students, Moscow Police Department, Title IX Coordinator, Environmental Health & Safety Fire Safety Specialist, two faculty members, one off-site representative

UI FACULTY-STAFF HANDBOOK

Section 1640: Committee Directory

(faculty/staff), two undergraduate students and one graduate student; and one member from General Counsel without vote.

Version History

Amended July 2023. Reorganized committee directory; deleted Fiscal Emergency Committee, Disability Affairs Committee; Shared Leave Committee, and Multi-Campus Communication Committee; revised structure of University Assessment & Accreditation Committee and University Teaching Committee.

Amended July 2022. Updated structure of Arts Committee and Scientific Misconduct Committee, extensively revised description of Biosafety Committee, and deleted the Intellectual Property Committee.

Amended January 2022. Updated structure of Information Technology Committee.

Amended July 2021. Editorial changes.

Amended July 2020. Updated the Admissions Committee to clarify its purpose and to increase the number of faculty members to provide additional capacity for processing student petitions. A member of the American Language and Culture Program faculty was added.

Amended January 2020. Revised to split the roles of the Teaching and Advising Committee to two separate groups. In addition, it was thought that the work on teaching and advising award selection would be best taken up by Center for Excellence in Teaching and Learning and UI ACADA, respectively.

Amended July 2019. Revised B of the Admissions Committee, B-2 and B-4 of the Institutional Animal Care and Use Committee, A-1, A-2, and B of the Campus Planning Advisory Committee, B of the Committee on Committees, B of the Faculty and Staff Policy Ground, B of the Faculty Affairs Committee, B of the Arts Committee, and B of the University Curriculum Committee. Added A-3 to the Committee on Committees. Substantially revised the Instructional Space Committee.

Amended January 2019. The Safety and Loss-Control Committee voted to have the Risk Manager as a permanent voting member. Removed “the Executive Director of Public Safety” from FSH 1640.76 section B. and replaced the wording with “Risk Management.”

Amended July 2018. Revised B of the Americans with Disabilities Act Advisory Committee, A of the Faculty Appeals Hearing Board, A and B-1 of the Institutional Review Board, C of Ubuntu, A of the Research Council, B of the Sabbatical Leave Evaluation Committee, and B of the Safety and Loss-Control Committee. Editorial changes were made to A-1 and A-3 of the Americans with Disabilities Act Advisory Committee, A-4 and C of the University Budget and Finance Committee, B-2, B-3, B-4, B-5, and B-6 of the Institution Review Board, and B of the University Security and Compliance Committee. Added B-7 and B-8 to the Institutional Review Board. Created the University Staff Compensation Committee.

Amended January 2018. Revised B of the Faculty and Staff Policy Ground, the Institutional Review Board, A-4, and B of the Teacher Education Coordinating Committee, and B of the University Teaching Committee. Editorial changes were made to A-2 of the Teacher Education Coordinating Committee.

Amended July 2017. Revised B of Academic Hearing Board, B of the Administrative Hearing Board, B and C of the University Budget and Finance Committee, C of the Dismissal Hearings Committees, A-3 of the Faculty Affairs Committee, and B of the Faculty Appeals Hearing Board. Created the Faculty and Staff Policy Group and the Student Conduct Board.

Amended January 2017. Editorial changes were made to A-2 and B of the Campus Planning Advisory Committee.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

Amended July 2016. Revised C of the University Budget and Finance Committee and B of the Sabbatical Leave Evaluation Committee.

Amended January 2016. Revised B of the University Multi-Campus Communications Committee. Editorial changes were made to B of the Campus Planning Advisory Committee, B of the Information Technology Committee, B of the Radiation Safety Committee.

Amended July 2015. Revised A-1, A-2, A-3, A-4, B, and C of the University Budget and Finance Committee. Added C-1 and C-2 of the Dismissal Hearings Committees, and B-1 and B-2 of the Faculty Appeals Hearing Board. Created the University Security and Compliance Committee.

Amended January 2015. Revised A-1 and B of the University Committee for General Education and A-1 of the Committee on Committees.

Amended July 2014. Revised B of the Honors Program Committee, and A-2, A-3, and B of the Teacher Education Coordinating Committee. Added A-4 to the Teacher Education Committee.

Amended January 2014. Revised C of Ubuntu, B of the Borah Foundations Committee, and B of the Safety and Loss-Control Committee.

Amended July 2013. Revised A-4 and A-5 of the Administrative Hearing Board. Added A-3 to the Administrative Hearing Board.

Amended January 2013. Revised A-1, A-2, A-3, and B of the University Committee for General Education, and B of the University Multi-Campus Communications Committee. Editorial changes were made to B of the Americans with Disabilities Act Advisory Committee, A of the Parking Committee, B of the University Teaching Committee, B of the University Committee for General Education, and B of the University Curriculum Committee,

Amended July 2012. Revised B of the Intellectual Property Committee. Editorial changes were made to B of the Admissions Committee. Created the Americans with Disabilities Act Advisory Committee, and Ubuntu.

Amended January 2012. Editorial changes were made to A-3 of the University Committee for General Education.

Amended July 2011. Revised to take into consideration the possibility that both of the Dismissal Hearings and Faculty Appeals Hearings Committees could affect the other, and thus care should be taken in the appointment of members to both of these committees due to a potential conflict.

Amended January 2011. Revisions were made in committee reporting structure. Revised to give oversight of radiation safety to Finance and Administration. The NRC requires a representative of the University's administration to serve a committee member to assist in financial matters of the radiation safety program. This change replaced the Budget Officer with the director of Environmental Health and Safety or a representative of Finance and Administration to better align the source of financial support of the committee. The University's radioactive materials license was amended to no longer require NRC approval of the committee chair.

Amended July 2010. Revisions were made to allow committees to more efficiently conduct business.

Amended January 2010. Editorial changes were made to B of the Provost Council, B of the Radiation Safety Committee, B of the Research Council, and B of the Scientific Misconduct Committee.

Amended July 2009. Revised A-4 of the Officer Education Committee and B of the Sabbatical Leave Evaluation Committee. Editorial changes were made to A-2 and C-5 of the Academic Hearing Board, A-2 of the Academic Petitions Committee, A-1 of the Administration Hearing Board, A-4 and C of the University Budget and Finance Committee, A-1, A-2, and B of the Campus Planning Advisory Committee, A-4 of the Commencement Committee, A-1, A-2, and B of the Committee on Committees, A-2 of the Faculty Affairs Committee, to the Faculty Senate, A-1

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

of the Information Technology Committee, A-2 of the Intellectual Property Committee, A of the Sabbatical Leave Evaluation Committee, A of the Safety and Loss-Control Committee, B of the Scientific Misconduct Committee, Staff Affairs, A-3 of the University Teaching Committee, and A-2 of the University Committee for General Education. Created the University Multi-Campus Communications Committee.

Amended January 2009. Revisions were made to allow committees to more efficiently conduct business.

Amended July 2008. Revised to provide clarification, publish established meeting times, consolidate committee structures found elsewhere in the FSH into this main committee directory, and make minor edits. Restrictive language was removed from the Faculty Affairs committee section and now allows more flexibility in selecting a chair. There was a complete restructure and renaming of the Fine Arts Committee. Quorum and alternate issues were addressed for the UCC. Revisions were made to address the difficulty in appointing 3 faculty council reps and a desire by other faculty to serve on the Campus Planning Advisory Committee. Additional diversity groups were added to Juntura

Amended January 2007. Revised B of the Provost Council.

Amended July 2006. Revised B of the Admissions Committee, B of the Administrative Hearing Board, B of the Borah Foundations Committee, B of the Campus Planning Advisory Committee, B of the Honors Program Committee, B of the Intellectual Property Committee, B of the Library Affairs Committee, A and B of the Parking Committee, B of the Sabbatical Leave Evaluation Committee, B of the Safety and Loss-Control Committee, B of the Student Financial Aid Committee, and B of the University Curriculum Committee. Editorial changes made to B of the Academic Petitions Committee, A of the Institutional Animal Care and Use Committee, A-1 and B of the University Budget and Finance Committee, B of the Committee on Committees, B of the Provost Council, B of the Information Technology Committee, A, A-4, and B of the Officer Education Committee, A of the Radiation Safety Committee, A of the Teacher Education Coordinating Committee, and A-2 and B of the University Committee for General Education. Removed the International Affairs Committee. Combined the Disability Affairs Committee with Affirmative Action.

Amended January 2006. Revised A and B of the Research Council.

Amended July 2005. Removed the Fiscal Emergency Committee, the Shared Leave Review Committee, and the Space Allocations Committee.

Amended January 2005. Created the University Budget and Finance Committee.

Amended July 2004. Editorial changes were made to B of the Campus Planning Advisory Committee, and A-2 of the Commencement Committee.

Amended July 2003. Revised B of the Provost Council, B of the Honors Program Committee, and A-4 and B of the Officer Education Committee. Editorial changes were made to B of the Academic Petitions Committee and A of the Parking Committee.

Amended January 2003. Revised A of the Borah Foundation Committee.

Amended July 2002. Added C to the Faculty Appeals Hearing Board.

Amended July 2000. Editorial changes were made to A of the Admissions Committee, A-2 of the Commencement Committee, to the Promotions Review Committee, and to A of the Sabbatical Leave Evaluation Committee. Created the Information Technology Committee and the Safety and Loss-Control Committee.

Amended July 1999. Revised B of Campus Planning Advisory Committee, B of the Faculty Appeals Hearing Board, and the Arts Committee. Editorial changes were made to A of the Parking Committee, and B of the Publications Board.

LAST REVISION: July 2022

CONTENTS:

- A. Introduction
- B. Definitions
- C. Responsibility Areas
- D. University Faculty
- E. Emeriti
- F. Associated Faculty
- G. Temporary Faculty
- H. Non-Faculty
- I. Qualification of Non-faculty Members for Teaching UI Courses

A. INTRODUCTION.

A-1. The principal functions of a university are the preservation, advancement, synthesis, application, and transmission of knowledge. Its chief instrument for performing these functions is its faculty, and its success in doing so depends largely on the quality of its faculty. The University of Idaho, therefore, strives to recruit and retain distinguished faculty members with outstanding qualifications.

In order to carry out its functions and to serve most effectively its students and the public, the university supports the diversification of faculty roles. Such diversification ensures an optimal use of the university's faculty talents and resources.

Diversification is achieved through developing a wide range of faculty position descriptions that allow the faculty to meet the varying responsibilities placed upon the institution, both internally and externally. No more than 25 percent, or a lower limit as defined by the department or similar unit's by-laws, of the faculty positions in any department or similar unit may be held by instructors, senior instructors, and lecturers who have voting privileges under FSH 1520 II, Section 1. While the capabilities and interests of the individual faculty members are to be taken into account, it is essential that individual faculty position descriptions are consonant with carrying out the roles and mission of the university, the college, and the unit. Annual position descriptions are developed by the unit head in consultation with the unit faculty and with the incumbent or new faculty member. In each college, all position descriptions are subject to the approval of the dean and must be signed by both unit head and faculty member. If the faculty member, unit head, and dean are unable to reach agreement on the position description, the faculty member may appeal the unit head's decision to the Faculty Appeals Hearing Board [FSH [3840](#)].

As indicated in Section 3320 A-1, faculty performance evaluations that are used for yearly, third-year and periodic reviews as well as for promotion, tenure, and post-tenure decisions are to be based on faculty members' annual position descriptions (FSH 3050). Each unit will develop substantive criteria in its bylaws for promotion and review of its faculty

Faculty members shall conduct themselves in a civil and professional manner (see FSH 3160 and 3170).

B. DEFINITIONS:

B-1. Advancement: focuses on fostering relationships, building partnerships, creating awareness and generating

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

support with alumni, donors, leaders, business partners, legislators and the community for the university's mission in academics, scholarship and outreach (see the office of University Advancement at <http://www.uidaho.edu/givetoidaho/meetourpeople/universityadvancementvpooffice.aspx>).

B-2. Cooperative education: a structured educational strategy that blends classroom studies with learning through productive work experiences. It provides progressive experiences for integrating theory and practice. Co-op education (including internships and externships) is a partnership between students, educational institutions and employers, with specified responsibilities for each party.

B-3. Distance education: the process through which learning occurs when teachers, students, and support services are separated by physical distance. Technology, sometimes in tandem with face-to-face communication, is used to bridge the distance gap.

B-4. Extension Service: Extension is an outreach activity that generally involves non-formal educational programs that transfer knowledge from the university to help improve people's lives through research in areas like agriculture and food, environment and natural resources, families and youth, health and nutrition, and community and economic development.

B-5. Extramural Professional Service: refers to activities that extend service beyond the university and can include elements of service, outreach, scholarship, and/or teaching.

B-6. Interdisciplinary: "an activity that involves teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or field of research practice."¹

B-7. Professional Development: a learning process that expands the capacity of the faculty member to advance in the responsibilities as defined in his/her position description and aligns with the university's goals. Examples include but are not limited to participation in conferences, continuing professional education (including credit and noncredit courses) and other activities that enhance a faculty member's expertise and ability.

B-8. Service learning: an activity that integrates student learning with service and civic engagement to meet real community needs and achieve learning outcomes. Service-learning can be used in curricular settings (i.e. academic courses) or co-curricular settings, (e.g. ASUI's volunteer/civic engagement programs).

B-9. Technology transfer: a process through which knowledge, technical information, and products developed through various kinds of scientific, business, and engineering research are provided to potential users. Technology transfer encourages and accelerates testing and using new knowledge, information and products. The benefit of technology transfer may occur either at the community (public) or firm (private) level.

B-10. Unit Administration: includes assisting higher administration in the assignment and in the evaluation of the services of each member of the unit's faculty and staff; promoting effective leadership of personnel and management of unit resources; providing leadership in the development and implementation of unit plans; providing for open communication with faculty and staff; fostering excellence in teaching, scholarship and outreach for faculty, students, and staff in the unit; effectively representing all constituents of the unit; and continuing personal professional development in areas of leadership.

C. RESPONSIBILITY AREAS: Faculty members are expected to contribute in each of the four major responsibility areas (C-1 through C-4 below). Expectations are more specifically defined in the individual position description and are consistent with unit by-laws. Each responsibility area may include activities in advancement, extramural professional service, interdisciplinary, and/or professional development./

C-1. TEACHING AND ADVISING: The university's goal is to engage students in a transformational experience of discovery, understanding and global citizenship. Faculty achieve this goal through effective instructing, advising

¹ National Academy of Science

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

and/or mentoring of students./

a. Teaching: Effective teaching is the foundation for both the advancement and transmission of knowledge. The educational function of the university requires the appointment of faculty members devoted to effective teaching. Teaching may take many different forms and any instruction must be judged according to its central purposes. Active participation in the assessment of learning outcomes is expected of all faculty at the course, program, and university-wide levels. Individual colleges and units have the responsibility to determine appropriate teaching loads for faculty position descriptions. Teaching appointments must be reflected by hours and level of effort spent in teaching activity, and justified in position descriptions. Any adjustments to a teaching appointment (e.g. teaching unusually large classes, team-teaching, teaching studios or laboratories, intensive graduate or undergraduate student mentoring, technology-enhanced teaching, and others) must be documented in the position description.

Evidence of teaching effectiveness shall include student feedback on teaching, and may include course design reviews, teaching observations, self-assessment, learning outcome assessment data, teaching recognition and awards, mid-term formative feedback on instruction (FSH 2700 B-6), or other documentation of effective teaching. Additional information about evidence of teaching effectiveness can be found through the Provost's Office.

b. Advising: For the purposes of this section, advising includes mentoring and student retention activities. These activities are an important faculty responsibility and a key function of academic citizenship, and may include: (1) overseeing course selection and scheduling; (2) seeking solutions to conflicts and academic problems; (3) working with students to develop career goals and identify employment opportunities; (4) making students aware of programs and sources for identifying employment opportunities, (5) facilitating undergraduate and graduate student participation in professional activities (e.g. conferences, workshops, demonstrations, applied research); and (6) serving as a faculty advisor to student organizations or clubs. Advising also includes attendance at sessions (e.g. workshops, training courses) sponsored by the university, college, unit, or professional organizations to enhance a faculty member's capacity to advise.

Effective advising performance may be documented by: (1) the evaluation of peers or other professionals in the unit or college; (2) undergraduate or graduate student advisees' evaluations; (3) level of activity and accomplishment of the student organization advised; (4) evaluations of persons being mentored by the candidate; (5) number of undergraduate and graduate students guided to completion; and (6) receiving awards for advising, especially those involving peer evaluation.

C-2. SCHOLARSHIP AND CREATIVE ACTIVITIES: Scholarship is creative intellectual work that is communicated and validated. The creative function of a university requires the appointment of faculty members devoted to scholarship and creative activities. The university promotes an environment that increases faculty engagement in interdisciplinary scholarship. The university's Carnegie designation as "research university high" fosters an emphasis on scholarly and creative activities.

Scholarship and creative activities take diverse forms and are characterized by originality and critical thought. Both must be validated through internal and external peer review or critique and disseminated in ways having a significant impact on the university community and/or publics beyond the university. Both are ongoing obligations of all members of the faculty.

The basic role of a faculty member at the University of Idaho is to demonstrate and validate continuing sound and effective scholarship in the areas of teaching and learning, artistic creativity, discovery, integration, and outreach/application/engagement. While these areas may overlap, these distinctions are made for purposes of defining position descriptions and for developing performance standards. Units and colleges shall adopt criteria for the evaluation of scholarship and creative activities. Demonstrated excellence that is focused in only one of these scholarship and creative activity areas is acceptable if it is validated and judged to be in the best interests of the institution and the individual faculty member.

a. Scholarship in Teaching and Learning: can involve classroom action research (site-specific pedagogy), qualitative or quantitative research, case studies, experimental design and other forms of teaching and learning

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

research. It consists of the development, careful study, and validated communication of new teaching or curricular discoveries, observations, applications and integrated knowledge and continued scholarly growth. Evidence that demonstrates this form of scholarship might include: publications and/or professional presentations of a pedagogical nature; publication of textbooks, laboratory manuals, or educational software; advancing educational technology; presentation in workshops related to teaching and learning; development and dissemination of new curricula and other teaching materials to peers; and individual and/or collective efforts in securing and carrying out education grants.

The validation of scholarship in the area of teaching and learning is based in large measure on evaluation by the faculty member's peers both at the University and at other institutions of higher learning.

b. Scholarship in Artistic Creativity: involves validated communication and may be demonstrated by significant achievement in an art related to a faculty member's work, such as musical composition, artistic performance, creative writing, mass media activity, or original design.

The validation of scholarship in the area of artistic creativity is based in large part on the impact that the activity has on the discipline and/or related fields as determined by the peer review process. Many modes of dissemination are possible depending on the character of the art form or discipline. For example, a published novel or book chapter for an anthology or edited volume or similar creative work is regarded as scholarship. Each mode of dissemination has its own form of peer review that may include academic colleagues, practitioner or performance colleagues, editorial boards, and exhibition, performance, or competition juries.

c. Scholarship in Discovery: involves the generation and interpretation of new knowledge through individual or collaborative research. It may include: novel and innovative discovery; analyzing and synthesizing new and existing knowledge and/or research to develop new interpretations and new understanding; research of a basic or applied nature; individual and collaborative effort in securing and carrying out grants and research projects; membership on boards and commissions devoted to inquiry; and scholarly activities that support the mission of university research centers.

Evidence of scholarship in this area may include: publication of papers in refereed and peer reviewed journals; published books and chapters; published law reviews; citation of a faculty member's work by other professionals in the field; published reviews and commentary about a faculty member's work; invited presentations at professional meetings; seminar, symposia, and professional meeting papers and presentations; direction and contribution to originality and novelty in graduate student theses and dissertations; direction and contribution to undergraduate student research; awards, scholarships, or fellowships recognizing an achievement, body of work, or career potential based on prior work; appointment to editorial boards; and significant scholarly contributions to university research centers. The validation of scholarship in the area of discovery is based on evaluation by other professionals in the faculty member's discipline or sub-discipline.

d. Scholarship of Integration: often interdisciplinary and at the borders of converging fields, is the serious, disciplined work that seeks to synthesize, interpret, contextualize, critically review, and bring new insights into, the larger intellectual patterns of the original research. Similar to the scholarship of discovery, the scholarship of integration can also seek to investigate, consolidate, and synthesize new knowledge as it integrates the original work into a broader context. It often, but not necessarily, involves a team or teams of scholars from different backgrounds working together, and it can often be characterized by a multidisciplinary or interdisciplinary investigative approach. The consolidation of knowledge offered by the scholarship of integration has great value in advancing understanding and isolating unknowns. Beyond the differences, the scholarship of integration can include many of the activities of scholarship of discovery and thus may be rigorously demonstrated and validated in a similar manner.

e. Scholarship of Outreach/Application/Engagement: These activities apply faculty members' knowledge and expertise to issues that impact individuals, communities, businesses, government, or the environment. Examples may include economic development, environmental sustainability, stimulation of entrepreneurial activity, integration of arts and sciences into people's lives, enhancement of human well being, and resolution of societal problems. Like other forms of scholarship and creative activities, the scholarship of

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

outreach/application/engagement involves active communication and validation. Examples of validation may include (but are not limited to): peer reviewed or refereed publications and presentations; patents, copyrights, or commercial licensing; adoption or citation of techniques as standards of practice; invited presentation at a seminar, symposium or professional meeting; and citations of the faculty member's work.

C-3. OUTREACH and EXTENSION: Outreach activities are originated by every unit on UI's Moscow campus and from each of the University's physical locations around the state.

Outreach includes a wide variety of activities including, but not limited to, (a) extension (see 1565 B); (b) teaching, training, certification, and other dissemination of information to the general public, practitioner, and specialty audiences; (c) volunteer development and establishment/maintenance of relationships with private and public organizations; (d) unpaid extramural consultation and other professional services to individuals, organizations, and communities; and (e) undergraduate and graduate student recruiting activities. Delivery mechanisms include distance education, service learning, cooperative education, technology transfer, noncredit courses, workshops, presentations, and publications. Most of the examples provided, such as distance education, are not exclusively outreach. Instead, they lie at the intersection of outreach and teaching or research. Likewise, professional services may be associated with teaching, scholarship, or university service and leadership. A faculty member's position description specifies where his or her activities will be counted.

Evidence of effective outreach activities may include, but are not limited to, (1) documentation of the process by which needs were identified and what steps were taken to deliver carefully planned and implemented programs; (2) numbers of individuals and types of audiences affected; (3) evaluation by participants in outreach activities; (4) other measures of significance to the discipline/profession, state, nation, region and/or world; (5) quantity and quality of outreach publications and other mass-media outlets; (6) evaluation of the program's effects on participants and stakeholders; (7) awards, particularly those involving peer evaluation; (8) letters of commendation from individuals within organizations to whom service was provided; (9) service in a leadership role of a professional or scientific organization as an officer or other significant position; and (10) other evidence of professional service oriented projects/outputs.

C-4. UNIVERSITY SERVICE AND LEADERSHIP: The university seeks to create formal and informal organizational structures, policies, and processes that enable the university community to be effective, while also fostering a climate of participatory decision making and mutual respect.

a. Intramural service is an essential component of the University of Idaho mission and is the responsibility of faculty members in all units. Service by members of the faculty to the university in their special capacities as scholars should be a part of both the position description and annual performance review.

Within the university, intramural service includes participation in unit, college, and university committees, and any involvement in aspects of university governance and academic citizenship. University, college, and unit committee leadership roles are seen as more demanding than those of a committee member or just regularly attending faculty meetings. Because faculty members play an important role in the governance of the university and in the formulation of its policies, recognition should be given to faculty members who participate effectively in faculty and university governance. Intramural service can include clinical service, routine support, and application of specialized skills or interpretations, and expert consultancies. The beneficiaries of these forms of service can be colleagues and co-workers.

Effective performance in intramural service may be documented by a variety of means. Examples include: (1) letters of support from university clientele to whom your service was provided; (2) serving as a member or chairperson of university, college, or unit committees; and (3) receiving University service awards, especially those involving peer evaluation.

b. Administration:

(1) Unit Administration (see FSH 1565 B): FSH 1420 E describes the responsibilities and the selection and review procedures for unit administrators. Unit administration is not normally considered in tenure

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

and promotion deliberations; it is accounted for insofar as expectations are proportionally adjusted in the other sections of the position description. For faculty in nonacademic units (e.g. faculty at large), administration may be considered in tenure and promotion deliberations.

(2) Other: Effective conduct of university programs requires administrative activities that support scholarship, outreach and teaching. Program support activities are to be noted in position descriptions and performance reviews. The role of the principal or co-investigator of a university program or project may include the following administrative responsibilities: (1) budgetary and contract management; (2) compliance with University purchasing and accounting standards; (3) supervision and annual review of support personnel; (4) purchasing and inventory management of goods; (5) graduate student and program personnel recruitment, training in University procedures/policies, and annual review; (6) collaborator coordination and communication; (7) management of proper hazardous waste disposal; (8) laboratory safety management; (9) authorization and management of proper research animal care and use; (10) authorization and management of human subjects in research; (11) funding agency reporting; (12) intellectual property reporting; and (13) compliance with local, state, and federal regulation as well as University research policy.

Demonstration of effective administration may be documented by a variety of means. Examples include: (1) compliance with applicable rules, standards, policies, and regulations; (2) successful initiation, conduct and closeout of research contracts and grants as evidenced by timely reporting and budget management; (3) completion of the research contract or proposal scope-of-work; organized program operations including personnel and property management. Documentation of effective university program operation, beyond scholarship, may also include input by graduate and undergraduate students participating in the university program; and input by collaborators, cooperators, funding agency and beneficiaries of the program. Documentation of effective administration may include evaluations by faculty and staff, as well as objective measures of performance under the incumbent's leadership.

D. UNIVERSITY FACULTY (FSH 1520 Article II):

D-1. INSTRUCTOR: Instructors may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Appointment to instructor constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated below. To avoid confusion over university faculty (those who have voting rights per FSH 1520 II, Section 1) the title of Instructor shall not be used in any other university position.

a. Instructor. Appointment to this rank requires proof of advanced study in the field in which the instructor will teach, the promise of teaching effectiveness, and satisfactory recommendations. Instructors have charge of instruction in assigned classes or laboratory sections under the general supervision of the departmental administrator. When they are engaged in teaching classes with multiple sections, the objectives, content, and teaching methods of the courses will normally be established by senior members of the faculty or by departmental committees. Instructors are expected to assist in the general work of the department and to make suggestions for innovations and improvements.

b. Senior Instructor. Appointment to this rank requires qualifications that correspond to those for the rank of instructor and evidence of outstanding teaching ability. Instructors are promotable to senior instructor. Effective teaching is the primary responsibility of anyone holding this rank and this primary responsibility is weighted accordingly in the annual performance evaluation and when a senior instructor is being considered for tenure. Except in very rare instances, this rank is considered terminal (i.e., it does not lead to promotion to the professorial ranks and there is no limitation on the number of reappointments). Prospective appointees to the rank of senior instructor must be fully informed of its terminal nature.

D-2. FACULTY:

a. Assistant Professor. Appointment to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons in the final stages of completing doctoral dissertations or with

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

outstanding talents or experience may be appointed to this rank. Evidence of potential effective teaching and potential scholarship in teaching and learning, artistic creativity, discovery, and outreach/application/engagement is a prerequisite to appointment to the rank of assistant professor. Appointees in this rank have charge of instruction in assigned classes or laboratories and independent or shared responsibility in the determination of course objectives, methods of teaching, and the subject matter to be covered. Assistant professors are expected to demonstrate the ability to conduct and direct scholarly activities, and to provide intramural and extramural professional service. [1565 C]

b. Associate Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons with outstanding talents or experience may be appointed or promoted to this rank. Associate professors must have demonstrated maturity and conclusive evidence of having fulfilled the requirements and expectations of the position description. An appointee to this rank will have demonstrated effective teaching or the potential for effective teaching, the ability to conduct and direct scholarly activities in his or her special field, and provide service to the university and/or his or her profession. Evidence of this ability includes quality publications or manuscripts of publishable merit; and/or unusually productive scholarship in teaching and learning; and/or significant artistic creativity; and/or major contributions to the scholarship of outreach/application/engagement. Associate professors generally have the same responsibilities as those of assistant professors, except that they are expected to play more significant roles in initiating, conducting, and directing scholarly activities, and in providing intramural and extramural professional service. [1565 C]

c. Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. A professor should have intellectual and academic maturity, demonstrated effective teaching or the potential for effective teaching and the ability to organize, carry out, and direct significant scholarship in his or her major field. A professor will have made major scholarly contributions to his or her field as evidenced by several quality publications and/or highly productive scholarship in one or more of the areas of teaching and learning, discovery, artistic creativity, and outreach/application/ engagement. Professors have charge of courses and supervise research, and are expected to play a major role of leadership in the development of academic policy, and in providing intramural and extramural professional service. [1565 C]

D-3. RESEARCH FACULTY:

a. Assistant, Associate and Professor. Appointment to these ranks requires qualifications, except for teaching effectiveness, that correspond to their respective ranks as for faculty in D-2 above.

D-4. EXTENSION FACULTY:

a. Extension Faculty with Rank of Instructor. Appointment to this rank requires: sound educational background and experience for the specific position; satisfactory standard of scholarship; personal qualities that will contribute to success in an extension role; evidence of a potential for leadership, informal instruction, and the development of harmonious relations with others.

b. Extension Faculty with Rank of Assistant Professor. Appointment to this rank requires a master's degree along with the qualifications of extension faculty with rank of instructor and: demonstrated leadership ability in motivating people to analyze and solve their own problems and those of their communities; evidence of competence to plan and conduct an extension program; a record of effectiveness as an informal instructor and educational leader; proven ability in the field of responsibility; evidence of continued professional growth through study and participation in workshops or graduate training programs; acceptance of responsibility and participation in regional or national training conferences; membership in appropriate professional organizations, and scholarship in extension teaching or practical application of research; demonstrated ability to work in harmony with colleagues in the best interests of UI and of the people it serves.

c. Extension Faculty with Rank of Associate Professor. In addition to the qualifications required of extension faculty with rank of assistant professor, appointment or promotion to this rank requires: achievement of a higher degree of influence and leadership in the field; continued professional improvement demonstrated by keeping up to date in subject matter, extension teaching methods, and organization procedures; progress

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

toward an advanced degree if required in the position description; demonstrated further successful leadership in advancing extension educational programs; evidence of a high degree of insight into county and state problems of citizens and communities in which they live, and the contribution that education programs can make to their solution; an acceptance of greater responsibilities; a record of extension teaching or practical application of research resulting in publication or comparable productivity; a reputation among colleagues for stability, integrity, and capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Extension Faculty with Rank of Professor. In addition to the qualifications required of extension faculty with rank of associate professor, appointment or promotion to this rank requires: regional or national recognition in the special professional field or area of responsibility; a record of successful organization and direction of county, state, or national programs; an outstanding record of creative extension teaching or practical application of research resulting in significant publications or comparable scholarship; active membership and effective participation in professional committee assignments and other professional organization activities; demonstrated outstanding competence in the field of responsibility; achievement of full maturity as an effective informal teacher, wise counselor, leader of extension educational programs, and representative of the university. These activities may occur in a domestic or international context.

D-5. LIBRARIAN:

a. Librarian with Rank of Instructor. Appointment to this rank requires an advanced degree in library science from a library school accredited by the American Library Association or an equivalent terminal degree and relevant experience and: (a) evidence of potential for successful overall performance and for development as an academic librarian; (b) when required for specific positions (e.g., cataloger, assistant in a subject library), knowledge of one or more subject areas or pertinent successful experience in library work.

b. Librarian with Rank of Assistant Professor. Appointment to this rank requires the qualifications for librarian with rank of instructor and: (a) demonstrated ability, competence, and effectiveness in performing assigned supervisory-administrative, specialized public service, or technical service responsibilities; (b) demonstrated ability to establish and maintain harmonious working relationships with library colleagues and other members of the university community; (c) evidence of professional growth through study; creative activity; participation in workshops, conferences, seminars, etc.; participation in appropriate professional organizations; awareness of current developments in the profession and ability to apply them effectively in the area of responsibility; (d) service to the library, university, or community through committee work or equivalent activities.

c. Librarian with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) acceptance of greater responsibilities, and conclusive evidence of success in the performance of them, e.g., bibliographical research performed in support of research activities of others; development of research collections; the preparation of internal administrative studies and reports; interpreting, and facilitating effective use of, the collections; effectively applying bibliographic techniques for organizing library collections; effective supervision of an administrative unit; (b) evidence of further professional growth, as demonstrated by keeping up to date in subject matter, methods, and procedures and by practical application of research resulting in significant improvement of library operations or in publication; effective participation in the work of appropriate professional organizations; and/or formal study, either in library science or in pertinent subject areas; (c) evaluation by colleagues as a person of demonstrated maturity, stability, and integrity, with the capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Librarian with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) demonstrated outstanding competence in the area of responsibility; (b) achievement of an outstanding record of creative librarianship, of effective administration, or of practical application of research resulting in significant publications or comparable productivity; (c) an additional degree in library science or in a pertinent subject area or equivalent achievement; (d) regional or national recognition for contributions to the profession based on publications or active and effective

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

participation in the activities of professional organizations; (e) evaluation by colleagues as an effective librarian who will continue to recognize that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

D-6. PSYCHOLOGIST OR LICENSED PSYCHOLOGIST:

a. Psychologist with Rank of Instructor. Appointment to this rank requires: an advanced degree in counseling, counseling psychology, clinical psychology, or closely related field earned in a professional program accredited by the appropriate accrediting association; evidence of effective skills in counseling or therapy; and evidence of pursuit of a terminal degree.

b. Psychologist or Licensed Psychologist with Rank of Assistant Professor. Appointment to this rank requires the qualifications for psychologist with rank of instructor and: a doctoral or equivalent terminal degree; evidence of effective skills in counseling or therapy; awareness of current developments in the profession; and demonstrated potential for participation in appropriate professional organizations, service to the Counseling and Testing Center, the university, and the community through teaching, committee membership, or equivalent activities, and the development and execution of research projects or the development and execution of outreach services designed to benefit UI students.

c. Licensed Psychologist with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: possession of a license as a psychologist in the state of Idaho; evidence of continued development of skills in counseling or therapy, as demonstrated by attendance at training workshops, personal study that leads to the presentation of workshops, classes, or seminars, or private study that leads to in-service training of personnel of the Counseling and Testing Center; evidence of continued professional development through service in professional organizations; evidence of effective teaching or training; completion of research that has resulted in quality publications or manuscripts of publishable merit, or the design and implementation of a continuing program in the Counseling and Testing Center that is of benefit to UI students and represents professional achievement of publishable merit; and continued service to the university and community through committee work or participation in community organizations. These activities may occur in a domestic or international context.

d. Licensed Psychologist with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: demonstration of outstanding competence in counseling or therapy; establishment of an outstanding record in research and publication or in development of continuing programs that contribute to the betterment of university students; continued professional improvement through private study, directed study, or attendance at workshops, conventions, etc.; regional or national recognition for contributions to the profession through publication, presentation of workshops, or active and effective participation in the activities of professional organizations; and recognition by colleagues as an effective psychologist who realizes that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

D-7. OFFICER-EDUCATION: Appointment of persons to the faculties of the officer education programs was established for the purpose of ensuring the academic soundness of the programs. The dual role of these faculty members as military officers and academic instructors is recognized. The university expects the nominees to have demonstrated academic and intellectual capabilities and exemplary professional achievement. Specifically, UI expects:

a. Academic Preparation. It is desirable for officer education faculty members to have at least a master's degree. In his or her most recent education, the officer should have a superior academic record as demonstrated by such measures as high grade-point average in graduate school, being in the upper half of the class in graduate school, or superior graduate-level ability as attested in letters of recommendation from graduate-school professors.

b. Specialized Preparation. The officer must have significant education, experience, or formal preparation in the subject areas in which he or she will teach.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

c. Military Background and Preparation. A junior officer is expected to have had significant professional performance and experience. It is also desirable that the officer have some formal military education beyond commissioning. A senior officer should have broad experience with excellent performance. He or she is expected to have attended a junior or senior military college and to have made a distinguished record there.

d. Teaching. It is desirable for officers to have had some teaching experience. It is recognized that this is not always possible for junior officers. For such an officer, there should be some evidence that he or she will become a satisfactory teacher. Heads of officer education programs are expected to be experienced instructors.

e. Nominees who will pursue graduate studies at UI for one year before becoming an instructor will be given preliminary approval. In their last semester of full-time graduate enrollment, the service should submit the required information to the Officer Education Committee for regular, final approval. For preliminary approval, the officer should, in addition to the military requirement, show promise of being successful in graduate studies. This could be demonstrated by (a) a high score on the Graduate Record Examination, if taken, (b) full enrollment status as a graduate student at UI, (c) a high overall grade-point average in college (3.00 or above on a 4-point scale), (d) a high grade-point average in a major area, or (e) a good record in the final year of college and graduate-level ability as attested by letters of recommendation from college professors.

f. Appointment:

1. The following information is submitted by the nominee's service: (1) transcripts from undergraduate and graduate academic institutions; (2) transcripts or appropriate records from military schools and staff colleges; (3) at least three letters of recommendation from appropriate sources, such as former professors, military instructors, and supervisors or commanders. These letters should be concerned with matters such as the officer's civilian academic performance, military record and leadership ability, and actual or potential performance as a teacher. (Former supervisors or commanders could give their opinion based on the officer's demonstration of leadership ability and his or her experience as a training officer.); (4) a summary of the officer's duty assignments and military and teaching positions held; (5) copies of favorable communications from the officer's file.

2. The following is provided by the program unit concerned: (1) a description of the military schools attended and courses completed by the nominee; (2) a description of the positions held by the nominee; (3) an explanation of the appropriateness of the officer's experience and training to the courses he or she will teach.

3. Copies of the requested material are distributed by the local unit to the members of the Officer Education Committee at least 72 hours before the meeting at which the committee will consider the nominee. For appointments commencing in the fall, this information should normally be made available not later than the preceding May 1.

4. In the case of a person nominated to head an officer education program, UI may require a personal interview.

5. A minimum of two weeks, after receipt of all required information, is necessary for consideration of the nominee. UI notifies the nominee's service of its decision within one month.

D-8. UNIVERSITY DISTINGUISHED PROFESSOR: Acknowledgment of outstanding academic contributions to the university is appropriate and desirable. The rank of University Distinguished Professor² is bestowed upon University of Idaho faculty in recognition of sustained excellence in all the areas of their areas of responsibility, ~~in teaching, scholarship³, outreach, and service.~~ The rank will be held for the remainder of the recipient's active

² As a result of Development Fund efforts, endowment support eventually may be obtained for many University Distinguished Fellowships, in which case a donor's name may be added to the title.

³ ~~Scholarship in this context includes scholarship of discovery, scholarship of pedagogy, scholarship of application and~~

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

service at the University; if the recipient leaves the University and is eligible for emeritus status, the rank will change to University Distinguished Professor Emeritus. The rank is highly honorific and therefore will be conferred on no more than three faculty members university-wide in any given academic year. Selection of University Distinguished Professors will reflect the diversity of scholarly fields at the University. University Distinguished Faculty will receive a stipend of at least \$5,000 per year for five years to be used to enhance salary or support professional activities (e.g., professional travel, student support, equipment, materials and supplies, etc.). Final discretion in conferring the rank of Distinguished Professor and the number of appointments in a given year resides with the President.

A. Selection Criteria: In general, University Distinguished Professors will have received national and usually international recognition. They will have brought distinction to the University through their work.

University Distinguished Professors will have achieved a superior record in at least three of the following areas: scholarly, creative, and artistic achievement; breadth and depth of teaching; excellence in extension or outreach; and University service and service involving the application of scholarship, creative, or artistic activities to addressing the needs of one or more external publics.

University Distinguished Professorships will be conferred on members of the University of Idaho Faculty who have attained the rank of Professor and have completed a minimum of seven years of service at the University, typically at the rank of Professor.

b. Selection Process: University Distinguished Professorships will be awarded by the president upon recommendation of The University Distinguished Professorship Advisory Committee a standing committee composed of four faculty members and three deans. The committee members should reflect all dimensions of diversity in the university community. They will be appointed by the Provost to serve three-year terms on a staggered basis. Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records in all the areas of their areas of responsibility of teaching, research and/or outreach.

1. The Provost will request nominations from faculty, deans, directors and unit administrators annually.
2. Written nominations will be submitted to the Provost and must include:
 - a. A nominating letter with a brief summary of the candidate's achievements;
 - b. The candidate's *curriculum vitae*, including a list of any significant previous awards;
 - c. Letters of endorsement from the appropriate deans and unit administrators or director(s). The candidate may also include a maximum of three additional letters of support, as appropriate, from students, colleagues at the University of Idaho, and/or other institutions. Letters should describe the impact of the nominee on their her/his-field, evidence of external recognition, and the context of her/his/their work over the course of her/his/their employment.
3. The University Distinguished Professorship Advisory Committee reviews the nominations and makes recommendations to the Provost for transmittal to the President.
4. Because the rank of University Distinguished Professorship is intended to be highly honorific, it is possible that in a given year no candidates will be selected.
5. The applications of nominees who are not selected in the first year of nomination will remain active for a total of three years. Nominators will have the opportunity to update their nomination during subsequent years in which their candidate is under consideration.

D-9. CLINICAL FACULTY: Clinical faculty may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Clinical faculty is a non-tenure track position. Clinical faculty positions are appropriate for professional disciplines having strong applied and/or clinical elements or those serving university units or academic departments in a supporting capacity. Appointment to clinical-faculty status constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated in a below. Clinical faculty members may be appointed and/or promoted to the ranks of clinical assistant professor, clinical associate professor or clinical full professor.

integration, and artistic creativity.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

a. Responsibilities, Privileges, and Rights. A clinical faculty member has a primary employment responsibility in a UI unit. The relationship of a clinical faculty member to UI is essentially that of a collaborator with a UI unit, program, or faculty member. The guarantees afforded by the principle of academic freedom [see 3160] are extended to members of the clinical faculty. They have the same responsibilities and privileges as university faculty (FSH 1520 II 1)

Clinical faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Clinical faculty members may have teaching as a primary or major responsibility; in addition, they may advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees, engage in outreach and engagement activities, and act as expert advisers to faculty members or groups.

2. The nature and extent of the services to be rendered are determined jointly by the clinical faculty member, his or her immediate supervisor, and the unit administrator(s) concerned.

b. Qualifications. Assignment to a clinical faculty position is based on demonstrated knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to those expected of faculty within the unit.

c. Conversion. Instructors and senior instructors who meet the qualifications for clinical faculty defined in D-9 b. may be considered for clinical faculty status upon the recommendation of the unit administrator and dean, subject to approval by the provost. Credit for prior equivalent experience may be granted by the provost up to a maximum of four years. Conversion of an existing tenure-track or tenure line in a unit to clinical status requires the approval of the dean and provost. A unit must demonstrate that a clinical position better advances the university's strategic goals than a tenure-track position.

E. EMERITUS STATUS. (FSH 1520 II.2)

E-1. PURPOSE. Emeritus status benefits both the university and emeriti by providing opportunities for emeriti to maintain ties with faculty members and continue service to the university and community.

E-2. ELIGIBILITY. A board-appointed, benefit-eligible member of the university faculty who holds one of the ranks described in 1565 D and who leaves the university and has a minimum of 8 years of service and attained the rule of 65 (age plus years of service is at least 65) is eligible for emeritus status.

E-3. APPOINTMENT.

1. Faculty must request consideration for emeritus status. This request may be made in the notice of resignation or in a request made directly to the provost. This request may be made along with or at any point following the submission of the letter of resignation. If a faculty member who is eligible for emeritus status under section E-2 does not request consideration for emeritus status in their resignation letter, then their college or department will send a notice to the faculty member asking if they wish to request emeritus status. The college or department will send a similar notice to any eligible faculty who receives a terminal contract due to program closure or similar circumstances.

2. In ordinary circumstances, the provost will grant emeritus status if the eligibility requirements specified in E-2 are satisfied. In exceptional circumstances, the provost may suspend the above eligibility rules and award, deny, or revoke a faculty member's emeritus status with a written notification to the faculty member stating the reasons for the decision and notifying them of the ability to appeal. A faculty member may appeal this decision to the Faculty Senate Chair, Faculty Senate Vice Chair, and Faculty Secretary, where the provost's decision must be upheld by a unanimous vote in order to be enacted. Examples of exceptional circumstances include the reasons outlined in FSH 3910 A-1.

3. A list of emeriti is maintained by the Provost's office.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

4. Emeriti are responsible for updating contact information with the university.

E-4. PRIVILEGES.

- a. **Access.** Emeriti continue to have access to research, library, and other UI facilities.
- b. **Participation.** UI encourages the voluntary continued participation of emeriti in the activities of the academic community. Emeriti may take an active role in the service and committee functions of their department, college, and the university as described in FSH 1520 II.2. Other activities are subject to approval by the provost.
- c. **Title.** Emeriti may use the title “professor emeritus/emerita,” “research professor emeritus/emerita,” or “extension professor emeritus/emerita,” as applicable. A faculty member without such rank has the designation “emeritus” or “emerita,” as applicable, added to the administrative or service title held at the time of retirement.
- d. **Mail.** Departmental mailboxes continue to be available to emeriti who reside locally. Emeriti who have departmental mailboxes receive full distribution of departmental notices unless otherwise requested.
- e. **Office supplies.** Office supplies are available under regular departmental procedures.
- f. **Postage.** Departmental postage may be used for professional mail.
- g. **Parking.** Emeriti receive one non-transferable gold parking permit annually.
- h. **Discount programs.** Emeriti receive any discounts available to other faculty members through various UI programs.
- i. **Functions.** Emeriti are invited to the same university, college, and departmental functions as active faculty.
- j. **Travel funding.** Travel funding may be used to support professional activities of emeriti in service to the university (e.g. guest lectures, research design, consultation, etc.). Emeriti may have a lower priority for travel funding than active faculty and such funding is at the discretion of the unit administrator or dean.
- k. **Office/lab space.** Offices and labs for emeriti are provided on a space-available basis as determined by the unit administrator or dean, giving higher priority to active faculty and unit needs. Office and lab space allocations to emeriti may be revoked upon 60 days’ notice.
- l. **Information technology services.** Emeriti who elect to maintain an active computing account will retain access to services provided by Information Technology Services (ITS) including electronic communications (e.g., email, instant messaging, etc.), technical support, and offered software.

E-5. EMPLOYMENT OPPORTUNITIES.

- a. Emeriti may hold a temporary or permanent part-time position (0.49 FTE or less) subject to regular employment procedures. It is the responsibility of emeriti to consult with HR regarding impact to benefits.
- b. Emeriti shall not serve as supervisors of other employees unless they hold a position as outlined in E-5-a herein.

F. ASSOCIATED FACULTY: Associated faculty members (see FSH 1520 II-3) have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit’s discretion. They are not eligible for sabbatical leave.

F-1. AFFILIATE FACULTY:

a. **General.** The affiliate faculty consists of professional personnel who serve academic departments in a supporting capacity. Appointment to affiliate-faculty status constitutes a recognition of the appointee’s scholarly contributions and professional accomplishments, confers responsibilities and privileges as stated in subsection d below, and authorizes assignment of service functions as described in subsection d-2 below. It is also a means of encouraging greater cooperation between and among academic departments and other units. An affiliate faculty member holds a non-tenure-track faculty status in an appropriate academic discipline.

b. **Employment Status.** An affiliate faculty member may, by virtue of his or her employment, have either one of the following relationships with UI: (1) that of a UI employee, normally an exempt employee, who is [a] a

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

member of the faculty or staff of a unit of the university other than the one in which he or she has affiliate-faculty status, or [b] a member of the professional support staff of the same unit of the university in which he or she has affiliate-faculty status; (2) that of an employee of a governmental or private agency who is assigned by that agency to a UI unit or to one of the agency's units or programs that is officially associated with the university.

c. Distinction between Affiliate and Adjunct Faculties. Members of the affiliate faculty have a more direct relationship with UI than do members of the adjunct faculty [see 1565 F-2]. Members of the adjunct faculty are not UI employees. An adjunct faculty member's primary employment is with a unit or program that is not officially associated with UI. Thus, the relationship of a member of this faculty category to UI is essentially that of a collaborator with a UI unit, program, or faculty member. An affiliate faculty member, in contrast, has a primary employment responsibility in a UI unit or in a non-UI unit that is officially associated with UI. In addition, he or she has a secondary relationship to another unit in a supporting role, or has a secondary relationship to the academic program in the same unit in which he or she has a primary employment responsibility. These latter relationships are the kind that are recognized by the affiliate faculty membership.

d. Responsibilities, Privileges, and Rights. The guarantees afforded by the principle of academic freedom [see 3160] are extended to members of the affiliate faculty. They have substantially the same responsibilities and privileges as do members of the university faculty; however, their right to vote in meetings of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. (Those who, in addition to their affiliate-faculty status, have status as members of the university faculty [e.g., psychologists in the Counseling and Testing Center and regular faculty members in other academic departments] have, of course, full rights of participation in meetings of the university faculty and of the constituent faculties to which they belong.)

Affiliate faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Affiliate faculty members, as such, do not normally have teaching as a primary or major responsibility; however, with the approval of academic departments, they may teach classes, advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees (with approval by the dean of graduate studies), or act as expert advisers to faculty members or groups.

2. The nature and extent of the services to be rendered are determined jointly by the affiliate faculty member, his or her immediate supervisor, and the departmental administrator(s) concerned.

3. Affiliate faculty qualify for the faculty-staff educational privilege [see 3740]

e. Qualifications. Assignment to an affiliate faculty position is based on demonstrating knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to what is expected of faculty within that unit.

f. Appointment.

1. Appointments to the affiliate faculty may be made at any time. They are reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointment should be continued unless the affiliate faculty member remains in UI employment or continues in his or her assignment to an entity that is officially associated with the university.

2. A recommendation for appointment to the affiliate faculty normally originates in the appropriate academic department and requires the concurrence of the nominee's immediate supervisor and the faculty of the appointing department. The appointment must be approved by the dean of the college, the president, and the regents.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

3. An appointment, termination, or other change in affiliate-faculty status is made official by means of a “Personnel Action” form.

F-2. ADJUNCT FACULTY:

a. General. The adjunct faculty includes highly qualified persons who are not employed by UI but are closely associated with its programs. [For the distinction between the affiliate and the adjunct faculty categories, see 1565 F-1-c.]

b. Responsibilities. Members of the adjunct faculty have the same academic freedom and responsibility as do members of the university faculty; however, their right to vote in meetings of the university faculty and of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. Adjunct faculty members may be assigned to advise students on their academic or professional programs at any level; to work in cooperative research projects; to serve on committees, including graduate students’ supervisory committees (with approval by the College of Graduate Studies); to act as expert advisers to faculty members or groups; and to teach courses in their branch of learning.

c. Qualifications. Adjunct faculty members must be highly qualified in their fields of specialization and should have exhibited positive interest in UI programs in the field of their appointment. Their qualifications should ordinarily be equivalent to those required of regular members of the faculty in the area and at the level of the adjunct faculty member’s responsibility.

d. Adjunct faculty do not qualify for the faculty-staff educational privilege. (see 3740)

e. Appointment.

1. Appointments to the adjunct faculty may be made at any time. b. Appointments are for an indefinite period, but are to be reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointments should be continued unless the adjunct faculty member is actively engaged in the responsibilities for which he or she was appointed.

2. Recommendations for appointment to the adjunct faculty are normally developed at the departmental level and have the concurrence of the departmental faculty. For interdisciplinary degree programs, adjunct faculty may also be assigned responsibilities with respect to the degree programs with approval of the program faculty and of the program director. Appointments must be approved by the dean of the college, the provost, the president, and the regents.

3. Before formal appointment procedures are begun, the prospective adjunct faculty member must agree to serve under the provisions herein described. When necessary, the consent of the nominee’s employer, if any, will be requested and recorded.

4. Appointment information is recorded on the regular “Personnel Action” form.

5. The appointment of adjunct faculty members to graduate students’ supervisory committees requires approval by the dean of the College of Graduate Studies.

G. TEMPORARY FACULTY: Temporary faculty have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit’s discretion. They are not eligible for sabbatical leave.

G-1. LECTURER. A teaching title that may be used at any level, i.e., it carries no specific connotation of rank among the professorial titles. This title is conferred on one who has special capabilities or a special instructional role. Lecturers are neither tenurable nor expected to progress through the professorial ranks. A lecturer qualifies for faculty status with vote during any semester in which he or she (a) is on an appointment greater than half-time and (b) has been on such appointment for at least four semesters. When a lecturer qualifies for faculty status they shall

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

be reviewed at a minimum of every 5 years thereafter as determined by the unit's bylaws. The review committee defined by the unit's bylaws shall include tenure-track faculty within the unit.

G-2. VISITING FACULTY. A designation that, when used with a professorial title, customarily indicates that the appointee holds a regular teaching or research position at another institution. A visiting appointee who does not hold a professorial rank elsewhere may be designated as a lecturer. Appointees with visiting academic ranks (e.g., visiting associate professor, visiting professor) are considered temporary members of the university faculty. Those on full-time appointment have the privilege of voting in meetings of the university faculty and of the appropriate constituent faculties.

G-3. ACTING. Persons who are judged competent to perform particular duties may be appointed for temporary service as acting members of the faculty. An acting appointment may also be used to establish a probationary period for an initial appointment of a person who, while being considered for a regular position on the faculty, is completing the required credentials for a permanent appointment. Persons on acting status are not voting members of the university faculty or of constituent faculties.

G-4. ASSOCIATE. A title for a nonstudent with limited credentials who is assigned to a specialized teaching, research, or outreach position. Associates are exempt staff and are not members of the university faculty or of constituent faculties.

H. NON-FACULTY: Those within this category are not members of the faculty.

H-1. POSTDOCTORAL FELLOW. Postdoctoral fellows are persons who hold the doctoral degree or its equivalent at the time of their appointment and are continuing their career preparation by engaging in research or scholarly activity. Postdoctoral fellows are special exempt employees in the category of "temporary or special" (FSH 3080 D-2 a) employees recognized by the regents. [See also 3710 B-1.b.]

H-2. GRADUATE STUDENT APPOINTEES: The general nature of the following graduate assistantships is defined as an apprenticeship experience that consists of a work obligation partnered with educational and developmental activities, all of which are integrated with the graduate degree program of the student. All graduate assistants must be individually mentored by a faculty advisor and may receive additional mentoring from other faculty and/or staff on or off campus. All graduate assistant positions (H-2. a, b, c) are limited to twenty hours per week of work. All graduate student appointees must be academically qualified and registered. [See also 3080 D-2-a.]

a. Graduate Teaching Assistant. Graduate Teaching Assistants perform duties related to the instructional efforts of the unit in which they are employed under the supervision of a member of the university faculty, associated faculty, or temporary faculty (see FSH 1565 D, F, and G). These duties, which must be associated with academic credit instruction and constitute at least 50 percent of a Graduate Teaching Assistant's effort, may include, but not be limited to: primary teaching responsibilities; grading assignments; assisting with the delivery of instruction through technology; and providing other assistance related to instruction.

b. Graduate Research Assistant. Graduate Research Assistants develop competence in performing professional-level work in support of research, scholarship, or creative activity. These positions can only have duties within the scope of work permitted by the funding source.

c. Graduate Support Assistant. Graduate Support Assistants perform a wide range of duties and can have varying responsibilities in academic and non-academic campus departments and programs. The specific duties depend on the needs of the office or project and on the qualifications and experiences of the Graduate Support Assistant. Graduate Support Assistants may provide academic and/or non-academic instruction, and/or assist with research, or provide other support functions. The duties must be directly related to the Graduate Support Assistant's program of study. The College of Graduate Studies shall periodically publish standards governing the permissible scope of Graduate Support Assistant appointments on its website.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

I. QUALIFICATIONS OF NONFACULTY MEMBERS FOR TEACHING UI COURSES. Persons who are not members of the university faculty but are selected to teach UI courses offered for university-level credit (including continuing-education courses and those offered by correspondence study) are required to have scholarly and professional qualifications equivalent to those required of faculty members.

Version History

Amended July 2022. Revised and clarified section C-1.a. to expand and clarify the evidence that may be used in evaluating teaching effectiveness.

Amended July 2021. Editorial changes.

Amended July 2020. The policy on emeritus status was extensively revised to provide greater clarity, ensure conformity with labor law, and add the ability to revoke emeritus status in exceptional circumstances. Section D-5 Librarian was revised to provide more flexibility in recruiting efforts.

Amended January 2020. The policy on office hours was moved from FSH 3240 to C-1.c. Changes were made to sections C-1 and C-3 to ensure that faculty efforts in the areas of teaching, advising, and outreach and extension are properly credited.

Amended July 2018. A new category for graduate support assistants was added to address needs that are not covered under the role of a typical teaching or research assistant position.

Amended July 2014. The cap on non-tenure track faculty appointments in a unit was adjusted and promotion processes clarified and revised.

Amended January 2014. The time necessary to qualify for emeritus status was redefined.

Amended July 2013. Definitions for research and teaching assistants were more clearly defined.

Amended July 2012. Edits were made to the Distinguished Professor under D-8 and to the qualifications for Emeritus status and a search waiver under E.

Amended July 2011. Voting for associated faculty was clarified and Clinical Faculty under “G. Temporary Faculty” moved to “D. University Faculty” as D-9 and was revised.

Amended July 2010. The affiliate and adjunct terms were switched to conform to national norms and the rank of Distinguished Professor was added.

Amended January 2010. Changes to the faculty position description and evaluation forms integrating faculty interdisciplinary activities into the evaluation processes were incorporated into this policy. Ranks for Associated Faculty in F were removed because the promotion process as detailed in 3560 for faculty ranks was deemed excessive for associated faculty. Those currently holding a specific rank in adjunct or affiliate will retain that privilege.

Amended July 2008. The policy was reorganized to better reflect classifications as stated in FSH 1520 Article II.

Amended July 2006. Substantial revisions were made to Section A.

Amended July 2001. Section J-1, voting rights for lecturers, was changed.

Amended July 2000. Revisions were made to C-1, D-1, and E-1.

Amended 1998. Extensive revisions were made to B (entirely new), C, D, and E.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

Amended July 1998. Section A underwent additional substantial revision.

Amended July 1996. The definitions of ‘postdoctoral fellow’ (J-5), ‘graduate assistant’ (K-3) and ‘research fellow’ (K-4) were revised.

Amended July 1994. Section A was substantially revised, so as to underline better the importance of both teaching and scholarship. The so-called “Voxman Amendment” (the addition of ‘in the classroom and laboratory’ to the list of possible venues wherein the evaluation of scholarship might take place) made its first appearance.

Amended 1987. The material in section I was added.

Adopted 1979.

ANNUAL PERFORMANCE EVALUATIONS OF FACULTY MEMBERS
AND
PERFORMANCE EVALUATION OF ACADEMIC ADMINISTRATORS

CONTENTS:

- A. Annual Performance Evaluation for Faculty Members
- B. Faculty Performance that does not Meet Expectations
- C. Annual Performance Evaluation and Review of Administrators Holding Faculty Appointments
- D. Sequence of Evaluation of Faculty Members and Administrators

A. ANNUAL PERFORMANCE EVALUATION FOR FACULTY MEMBERS.

A-1. PERFORMANCE EVALUATION. Annual evaluation of the performance of each member of the faculty is primarily the responsibility of the faculty member and unit administrator. The provost is responsible for preparing supplementary instructions each year, including the schedule for completion of the annual performance evaluation. Personnel on international assignment see FSH 3380 C.

a. Forms. The Annual Performance Evaluation Form is available below. The form may not be altered without following the appropriate governance process set forth in FSH 1460. The supervisor is responsible for ensuring that each faculty member uses the proper form together with the supplementary instructions as provided by the Provost's Office.

b. Evaluation ratings. Performance evaluation ratings are described below. The narrative in the evaluation form shall provide evidence to support the evaluation.

i. Performance that meets or exceeds expectations is at least satisfactory performance during the review period of a faculty member relative to the position description.

ii. Performance that does not meet expectations is performance during the review period that is less than expected of a faculty member relative to the position description and means improvement is necessary. An evaluation of not meeting expectations in one or more responsibility areas triggers procedures outlined in section B.

c. Annual report of efforts and accomplishments by faculty member. Each faculty member shall provide their supervisor with the following materials in preparation for the annual performance evaluation:

1. Current curriculum vitae
2. Position description for the time under review.
3. Written report of faculty activity for the period of the annual performance review that compares accomplishments to expectations in the position description for the review period. This report may be in the form of a self-evaluation using the annual evaluation form included in this policy.
4. Other materials necessary to document efforts and accomplishments for the review period.

d. Evaluation of faculty by supervisors. Supervisors shall evaluate the faculty members in their unit. The performance of each faculty member during the review period is judged on the basis of the position description in effect during that period. In the case of a faculty member holding a joint appointment or involved in interdisciplinary activities in two or more academic or administrative units, it is the responsibility of the supervisor in the faculty member's primary academic discipline to solicit and consider relevant information on job performance from other administrators with responsibility for the faculty member's work.

Whether a faculty member's performance meets expectations is determined by comparing the faculty member's performance to the position description for the review period. For each area of responsibility, the supervisor shall describe the basis for their evaluation of the faculty member's performance in the narrative on the form. The supervisor shall also describe the basis for their overall evaluation of the faculty member's performance. The overall evaluation is not weighted by the percentage and rating of each responsibility area in the position description; rather, the overall evaluation is a holistic assessment of the faculty member's

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3320: Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators

performance. The supervisor shall also include comments and recommendations for the faculty member's progress toward tenure, promotion, and continued satisfactory performance, as applicable, in the appropriate place on the annual evaluation form. The supervisor may confer with the Dean as needed. After the supervisor has completed the narrative evaluation for all faculty for the review period, the supervisor shall provide to each reviewed individual a copy of the individual's annual evaluation form prior to the conference described in A-1.e.

e. Conference. The supervisor shall provide each faculty member with the opportunity to meet to discuss the unit administrator's evaluation, either in person or by remote meeting technology and the faculty member's detailed report of activities. The supervisor should explain the narrative providing a formative assessment on progress toward tenure, promotion, and continued satisfactory performance, as appropriate. The faculty member and the supervisor should work to identify strategies and goals to help the faculty member improve performance. The evaluation may be modified as a result of the discussion.

f. Signature. At the conclusion of the review process, each faculty member shall sign the evaluation form indicating that they have had the opportunity to read the evaluation report and to discuss it with the supervisor. The supervisor shall give the faculty member a copy of the supervisor's final evaluation signed by both parties. The employee's signature does not signify agreement with the content of the evaluation; it signifies that the employee has had the opportunity to review the evaluation and to meet with the supervisor.

g. Opportunity for response. If the faculty member wishes to respond to the contents of the review, they shall be permitted to append a response to the supervisor's evaluation within five days of receipt of the supervisor's evaluation.

h. Forwarding to dean. The supervisor shall forward to the dean the following materials for evaluation at the college level:

1. The evaluation form with the complete narrative and the comments and recommendations on progress towards tenure, promotion, and continued satisfactory performance, as appropriate, and
2. Any comments provided by interdisciplinary administrators or administrators of faculty holding joint appointments provided pursuant to subsection A-1.d.

If the supervisor fails to include the required narrative comments, recommendations, or the signed copy of the evaluation, the college shall return the materials to the supervisor .

i. Responses to evaluation of a faculty member. If the faculty member has attached a response to the evaluation, the unit administrator shall provide the response to the dean with the annual evaluation form. The dean shall meet with the unit administrator and the faculty member to attempt to resolve the relevant issues. If the dean disagrees with the unit administrator's evaluation, the dean shall attach a narrative stating the reasons for the disagreement. A copy of the dean's narrative shall be provided to the faculty member. The faculty member may respond to the dean's evaluation within five days of receipt. The faculty member, unit administrator, and dean are encouraged to resolve the disagreement at the college level. If the matter cannot be resolved, the dean shall notify the provost of the disagreement.

j. Responses to evaluation of a direct report to dean. If a direct report to a dean has attached a response to the evaluation, the dean shall meet with the direct report to attempt to resolve the relevant issues. The dean and direct report are encouraged to resolve the disagreement at the college level. If the matter cannot be resolved, the dean shall attach a narrative stating the reasons for the disagreement. A copy of the dean's narrative shall be provided to the direct report. The direct report may respond to the dean's narrative and the dean shall notify the provost of the disagreement.

k. Signed copies of evaluation to faculty member and provost. At the conclusion of the evaluation process, the college shall forward to both the faculty member and the provost all evaluation material at the unit and college level, including the dean's narrative and faculty responses, if any, with the signatures of the faculty, supervisor, and dean.

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3320: Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators

A-2. Relationship to promotion and tenure process. The faculty annual performance evaluation is an administrative review. Annual evaluations are but one component of the independent promotion and tenure procedure set forth in FSH 3500 and do not guarantee a successful promotion or tenure decision.

B. FACULTY PERFORMANCE THAT DOES NOT MEET EXPECTATIONS.

B-1. IN GENERAL. If the unit administrator determines that a faculty member is not meeting expectations, the unit administrator should consider the reasons for and explanations of the performance. See FSH 3190. The unit administrator, in consultation with the faculty member, should address the possible causes of the problem, suggest appropriate resources and encourage the employee to seek such help. Faculty members and unit administrators may obtain referral information and advice from the Ombuds, Human Resources, or the Provost's Office. Additional required procedures are set forth below.

B-2. FIRST OCCURRENCE. In the event that a faculty member has not met expectations overall or within one or more areas of responsibility, the unit administrator shall offer to meet with the faculty member. At this meeting, the faculty member and the unit administrator shall review the faculty member's position description and examine strategies that would permit the faculty member to improve performance. A mentoring committee shall be formed upon the request of either the faculty member or the unit administrator. The committee shall be composed of two or more faculty members agreed upon by the unit administrator and faculty member.

B-3. TWO OCCURRENCES WITHIN THREE YEARS. In the event of two annual evaluations within three years concluding that the faculty member has not met expectations overall or within one or more areas of responsibility, the unit administrator shall arrange a meeting of the faculty member, the unit administrator and the college dean.

The purpose of the meeting is to review:

- a. the current position description and revise it if necessary to address the issues identified during the discussion.
- b. the strategies implemented in the previous year(s) and to identify why the strategies did not result in the faculty member meeting expectations. The parties should re-examine strategies that would support improved performance by the faculty member.

B-4. THREE OCCURRENCES WITHIN FIVE YEARS. In the event of three annual evaluations of "does not meet expectations" within a five-year period, either overall or within one or more areas of responsibility, the dean shall initiate a formal peer review. The purpose of the review is to assess the level of performance of the faculty member, the reasonableness of the previous evaluations, and the appropriateness of the strategies put in place to assist the faculty member. The dean shall first consult with the provost's office to obtain guidance regarding the review process.

a. Composition of the Review Committee. The Review Committee shall comprise four members from within the unit and one member from outside of the unit. If the faculty member is tenured or tenurable, the committee shall include tenured faculty unless no tenured faculty are available. The faculty member may submit to the unit administrator a list of the names of up to three faculty members from within the unit and up to one faculty member from outside of the unit. The faculty member may also submit the names of up to two faculty members who shall be excluded from serving on the committee. The unit administrator shall appoint the committee, including, if provided, at least two names from the faculty member's list. The committee members shall select a chair from their membership.

b. Timing. The committee shall complete its review and report, as described below, within 60 days of the submission of the evaluation to the Office of the Provost.

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3320: Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators

c. Materials. The review shall be based on the materials described below.

1. Materials submitted by faculty member. The faculty member shall provide the following materials to the committee:

- a. Updated curriculum vitae.
- b. A self-assessment summary of each area of the faculty member's responsibility and what the faculty member has learned and achieved during the review period, including contributions to the department, university, state, nation, and field, not to exceed five pages.

2. Materials submitted by unit administrator. The unit administrator shall provide the following materials to the committee:

- a. Position descriptions for the period under review.
- b. The official record, as maintained by the provost's office, of annual evaluation materials for the period under review.
- c. Student and any peer evaluations of teaching for the period under review.
- d. A summary of the strategies put in place to assist the faculty member.

3. Additional materials requested by committee. The committee may request additional materials from the faculty member or unit administrator as it deems necessary.

d. Responses to committee report. The committee chair shall submit the report to the faculty member, unit administrator, and dean. Each recipient shall have 15 days from the report's date to submit written responses to the review committee. The committee chair shall send the report and all responses to the provost.

e. Provost. The provost shall be responsible for determining the appropriate resolution, which may include:

1. Continuing the status quo
2. Mentoring to address areas of concern
3. Termination for cause
4. Other recommended resolutions.

B-5. CIRCUMSTANCES WARRANTING IMMEDIATE REVIEW BY PROVOST. In the event of an overall evaluation of "does not meet expectations" where the faculty member's performance is so far below expectations that immediate corrective action is deemed necessary to protect the interests of the university, the provost may, in consultation with the dean and unit administrator, determine that immediate further review of the faculty member's performance is required. In such a case, the review will follow the procedure set forth in B-4.a. through e.

B-6. Non-Tenured Faculty. Pursuant to Regent's policy, non-tenured faculty do not have an expectation of contract renewal beyond that stated in FSH 3900 B-2, absent a written multi-year contract. The process set forth in FSH 3320 B does not require the University to renew a non-tenured faculty contract. The process set forth in FSH 3320 B shall not be required for a non-tenured faculty member who has been given notice of non-renewal.

C. ANNUAL PERFORMANCE EVALUATION AND REVIEW OF ADMINISTRATORS HOLDING FACULTY APPOINTMENTS. This policy applies to all administrators holding faculty appointments including, but not limited to, those reporting directly to the provost and deans.

C-1. Annual performance evaluation of administrators. Each administrator holding an appointment as a faculty member shall have a position description pursuant to FSH 3050, and shall undergo the annual performance evaluation process described above. The performance evaluation shall be conducted by the administrator's direct supervisor. When the administrator holds a faculty appointment in a unit not under the supervision of the evaluator, the evaluator shall seek input from the unit administrator of that unit regarding the evaluation of Teaching and Advising, Scholarship and Creative Activities and Outreach and Extension to the extent the administrator's position description includes expectations in these areas. The evaluator shall also review the administrator's performance in the area of University Service and Leadership. The evaluation

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3320: Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators

of administrators in the area of University Service and Leadership shall focus on the responsibilities set forth in FSH 1420, if applicable, the responsibilities set forth in the unit bylaws, if applicable, and the expectations set forth in the administrator's position description. An administrator's annual performance evaluation shall be completed using the Faculty Annual Performance Evaluation Form or the Annual Performance Self-Evaluation Form for Direct Reports to the Provost and Executive Vice President, as appropriate, appended to this policy. The review shall state whether the administrator met or did not meet expectations.

C-2. Faculty and staff feedback. The evaluator shall ensure that faculty and staff interacting with the administrator have the opportunity to provide confidential feedback regarding the administrator's performance to the evaluator. All feedback will be collected by Institutional Research to maintain confidentiality. Identifying information will be redacted from the feedback by Institutional Research before the feedback is provided to the evaluator.

C-3. No expectation of continued service. Administrators do not have an expectation of continued service in their administrative appointments. The president, provost or dean may determine at any time that it is not in the best interest of the university, college or unit that the administrator continue to serve in their administrative capacity.

C-4. Review initiated by faculty. An administrator review may be initiated through a petition signed by at least 50% of the faculty members in the unit and delivered to the provost. The names and percentages of faculty signing the petition shall be maintained in confidence by the provost.

a. A review under this sub-section shall be conducted by a three-person committee appointed by the provost or dean composed of at least one individual in a similar position to the administrator as well as at least one tenured faculty member from the unit. The review shall focus on the administrator's performance of the responsibilities.

b. The committee shall consider the following information:

1. Any report submitted by the administrator regarding their performance
2. Input from the administrator's supervisor regarding their performance
3. Input from the faculty and staff in the unit
4. Input from other constituencies that engage with the administrator

c. The committee shall prepare a written report summarizing its findings and recommendations regarding the administrator's performance. This report shall be provided to the administrator. The administrator shall have the opportunity to respond to the committee report within five business days. The committee report, and any response, shall be forwarded to administrator's supervisor and the provost.

d. The supervisor and provost may provide further feedback and performance recommendations to the administrator based on the report.

e. The supervisor or provost shall notify the faculty and staff of the relevant unit that the review has been completed.

C-5. Periodic review as required by unit bylaws. Unit bylaws may require review of administrators at prescribed intervals, provided the review follows the process set forth in section C-4.a. through e.

D. SEQUENCE OF EVALUATION OF FACULTY MEMBERS AND ADMINISTRATORS. The provost prepares the schedule for completion of steps in the performance evaluation and salary determination process each year. The schedule will ensure that faculty members' evaluations of unit or center administrators and assistant and associate deans have been received by the dean before the administrators' recommendations on faculty salary, promotion, and tenure are made known to the faculty and, similarly, that faculty members' evaluations of deans have been received by the provost before the deans' recommendations on faculty salary, promotion, and tenure are made

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3320: Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators

known to the faculty. Likewise, the summaries of faculty evaluations of unit or center administrators, assistant and associate deans, and deans will be communicated to the persons evaluated after their recommendations on faculty salary, promotion, and tenure have been transmitted to the provost.

Version History

Amended July 2022. Language clarified throughout and conflicting information resolved. New provision introduced allowing bylaws to require regular review of administrators but requiring such review to follow the same process as faculty-initiated review, to avoid disparities in review process across units. Review committee reconfigured.

Amended July 2019. Section C. was completely rewritten and all faculty will now use one form.

Amended July 2018. The words “and goals” to FSH 3320 A-1. e were added to encourage a discussion.

Amended July 2018. Revised A-1 e and B-2.

Amended January 2018. An emergency revision (rewrite of the faculty section, not the administrator section) to this policy was put in place to address the new narrative evaluation process so as to be effective before the next evaluation process.

Amended January 2017. A temporary fix to this policy was put in place to allow for a pilot narrative evaluation process for 2016 and ensure that existing policy would apply.

Amended July 2014. Changes were incorporated to ensure all faculty go through a review by their peers.

Amended July 2010. B was added and FSH 1420 E-6 was incorporated into D to consolidate the evaluation process into one policy.

Amended July 2009. Revised to reflect recent changes to the faculty position description and evaluation forms to better integrate faculty interdisciplinary activities.

Amended January 2008. Form 1 was revised to include a Disclosure of Conflicts statement to comply with FSH 6240.

Amended July 2007. Form 1 underwent substantial revisions to address enforcement and accountability issues in the UI promotion and the tenure process as well to align the form with the Strategic Action Plan.

Amended January 2007. Revised A-1 j, B-1, and B-4

Amended July 2001. Revised A-1 a, e, and j. Added A-1 c. 4.

Amended July 2003. Revised A-1 and A-1 d.

Amended July 2002. Policies concerning performance evaluation were completely rewritten.

Adopted 1979.

Spread Pay Task Force Findings and Recommendations

History of the Task Force

In 2022 Faculty Senate charged a task force to consider the possibility of developing a system that would allow University of Idaho faculty on 9-month contracts to be paid over 12 months. The catalyst for this work was a combination of faculty interest and its potential to both retain and recruit faculty.

The old spread pay system was an offered benefit until FY 2017. However, difficulties with the Banner 8 system and managing faculty on complicated contracts made the system too cumbersome.

In the Spring of 2022, the Task Force sent a survey to eligible faculty to determine the degree to which faculty supported this initiative. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey, resulting in a response rate of 61%. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to a 12 month pay system if given the option. Regardless of whether or not they would go on a 12 month pay system, 94% of surveyed faculty supported implementing it as an option for others.

In AY 23-24, there are 576 U of I faculty on academic year contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months on a system using a problematic pay schedule.

Current Realities

In the process of investigating the possibility of reoffering a benefit that would allow people on 9-month contracts to be paid over 12, it became evident that the current system of providing advanced pay in July and August poses significant problems for the university. Our current system of spread pay operates by paying people in July and August prior to the beginning of their contract. Paying employees for work before the contract begins presents challenges and the schedule must be reset – regardless of whether or not we offer deferred pay as a benefit for all eligible faculty.

There are 122 faculty members currently on this old spread pay schedule. To resolve the schedule problems, they will need to shift to a new pay schedule or opt for standard pay. The new model, called deferred pay, will allow faculty to defer portions of their pay through the academic year to be paid over the following summer. The pay system aligns with the start of their work period.

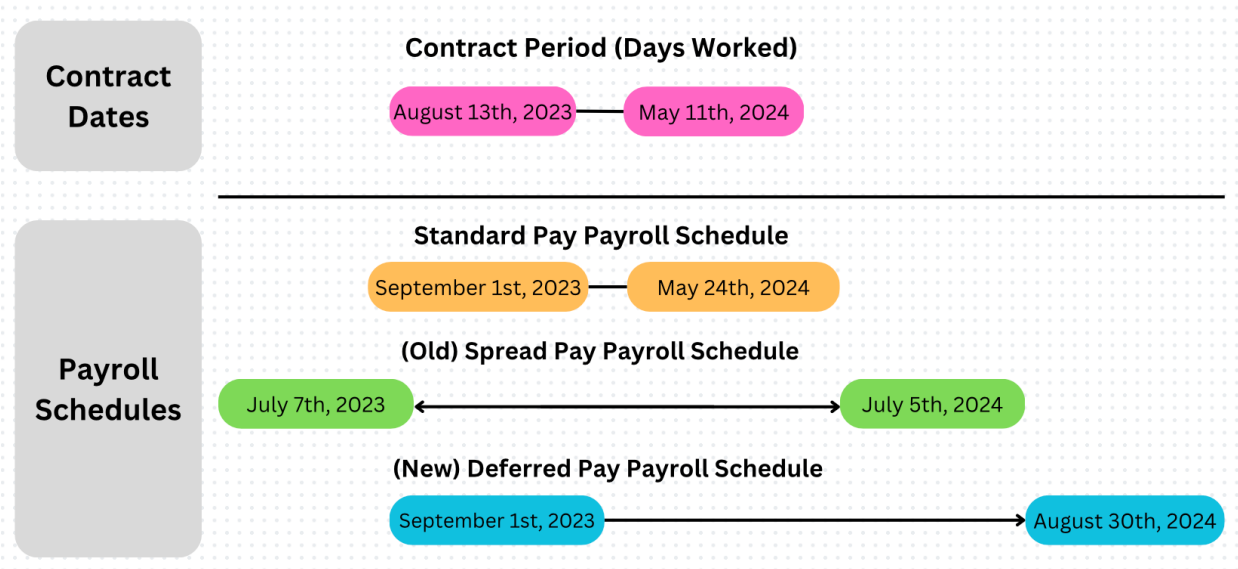

Key Terms:

Standard Pay: a pay system in which faculty on a 9-month contract are paid over nine months. Their pay is in line with the pay periods they work.

Deferred Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. A portion of their pay for the academic year is deferred and covers the pay periods in the summer.

Spread Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. In July and August they are paid in advance of their work. A portion of their pay for the academic year is delayed covering May and June.

Figure 1: Illustration of Different Pay Schedule Examples Based on AY 23-24

Required Changes Discovered During the System Review

The old system must be terminated. In doing so, the university needs to move the 122 faculty currently on the old spread pay schedule to the new deferred pay schedule or to allow them to opt for standard pay. These faculty members will finish the current fiscal year on the old spread pay schedule (ending June 22, 2024 (pay date July 5th) with the end of the current fiscal year) and begin the following year on the new deferred pay schedule (or, if they choose, standard pay). Faculty on the old spread pay system will receive their July 5, 2024 paycheck and then will have a six-week gap as we shift between schedules. This will occur from mid-July through August. This pay schedule will align with the start of the academic year and the pay will be “deferred” to the following summer. The payroll dates for this disruption are the following: July 19, 2024; August 2, 2024; and August 16, 2024. Pay will resume on August 30, 2024.

The task force review also uncovered a second problem with our current system. Currently academic faculty are paid according to two pay schedules. There is one schedule for faculty on standard pay which uses a schedule of 19.5 factors; and another for those on the old spread pay which uses a 20 factor schedule. The deferred pay system cannot use partial schedules, so the whole schedule needs to use a 20 factor schedule. The payroll system needs to bring all academic year faculty on the same schedule.

This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate. There will be an impact to an academic year faculty’s summer earnings if an hourly rate is used to calculate the salary for the summer. The summer hourly rate will be 2.5% less than the previous pay schedule. See the Appendix for additional information.

Opportunities for Faculty on Standard Pay to Switch to Deferred Pay and Other Required Changes Uncovered by this Process

The University of Idaho can offer deferred pay to faculty who are on 1.0 FTE academic year (9-month) appointments beginning in AY 24-25. These faculty must opt in to deferred pay for the entire year. New faculty who are hired mid-year will have to wait for the following year to elect deferred pay. Faculty who would like to remain on standard pay are not required to opt into deferred pay. The details of this new schedule are included as an appendix. To reset the schedule, there are three required adjustments.

- First, there will be a disruption in pay for the 122 faculty on the current spread pay system to transition to the new deferred pay system;
- Second, the payroll system needs to bring all academic year faculty on the same 20 factor schedule;
- Third, the new system requires that administrative stipends be paid differently. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months. The new system requires the base salary and the administrative stipend to be paid separately.

Recommendations of the Task Force

The task force recommends the following:

- The University of Idaho offer deferred pay to all eligible faculty effective on academic year (9-month) contracts starting in 2024-25;
- The University of Idaho transition faculty currently on the old system of advanced spread pay to the system of their choosing: either the new deferred pay system or the standard pay system effective 2024-25;
- The University of Idaho provide options for the 122 affected faculty members on the legacy spread pay system to navigate the gap in three pay periods offering the following:
 - Financial planning tools for those who wish to immediately transition to the new deferred pay system to manage the three-pay disruption on their own;
 - The option to enroll in a UI payroll managed system that withholds an amount of their choice (up to 3/26th of their annual salary) which will be used to provide the UI paychecks during the three pay periods of transition. (See Appendix for details)

Appendix—Updated UI Deferred Pay Schedule

Compiled by the Provost's Office and the Division of Finance and Administration
November 6, 2023

Context

A faculty senate deferred pay Task Force worked with individuals from the Division of Finance and Administration and the Provost's Office to make deferred pay available to all full-time faculty in AY 24-25 as a recruiting and retention benefit.

Currently, there are 576 U of I faculty on Academic Year (AY) contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months.
- 19 of the 122 faculty on the old spread pay system currently have administrative stipends that are currently included in their spread salary.

Eligibility for deferred pay:

- Full-time faculty on Academic Year contracts can opt in to deferred pay prior to each academic year.
- Must start the Academic Year on deferred pay; faculty who begin mid-year must wait to join deferred pay until the following year.
- Faculty must have a 1.0 FTE appointment for the entire academic year.

Transition from the old system to the new system:

This system change involves a one-time payroll system reset that will mean the following:

- The start date of the deferred pay schedule must be aligned with the start of the academic year contract. For the 122 faculty on the old system, this means there will be a disruption in pay for three pay periods (six weeks) in the summer of 2024. Faculty on the old spread pay system would receive their paycheck on July 5, 2024 and then there would be a six week disruption. These include the pay dates of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024. In future years, there will be no gap in pay as faculty continue on deferred pay.
- Administrative stipends can only be paid according to the academic year calendar. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months.
- The new deferred pay system requires a reset in the payroll schedule from 19.5 pay factors to 20 pay factors. Work expectations and job duties remain the same for positions, but the Banner system requires an even number of weeks in the pay

schedule (and not split pay periods) to avoid errors and manual work. This will impact academic year faculty on standard pay who have contracts in the summer that require salary calculations based on an hourly rate. The total amount that a faculty member in this situation could earn in the summer under the new system could be slightly less because summer will not include a half pay period and because the new schedule reduces the calculation of the hourly rate by 2.5%.

- The system does not support half pay periods.
- U of I cannot sustain two separate payroll systems.

FAQ:

Q1: Is deferred pay required for all academic year faculty? I am an academic year faculty member and I prefer to be paid according to the nine-month contract period.

A: No, deferred pay is an option offered to faculty on AY contracts. The default way to be paid is standard pay according to the contract period. Deferred pay must be selected as an option each year.

Q2: I moved from spread pay to standard pay in 2017 and received a \$1,000 incentive payment. Do I have to pay this back?

A: No. You received that incentive to stop using the old spread pay system.

Q3: What is wrong with the old spread pay system and why were some faculty allowed to stay on it?

A: The old system of spread pay relies on paying faculty prior to the start of their contract which creates significant challenges. The updated process will allow the administrative systems (Banner) to manage these deferred pay schedules in the manner intended and reduce the administrative burden associated with managing those pay schedules. Likewise, the new system allows for contracts for standard pay and deferred pay operate with the same payroll schedule assumptions. We can only have one payroll system for academic year faculty. It is no longer possible to support two distinct payroll systems for academic year faculty.

Q4: Can faculty on the old spread pay system opt into the new deferred spread pay system?

A: Yes, but they will have to manage a one-time disruption in three pay periods in late summer 2024. They can manage this on their own or they can set up UI payroll withholdings during spring semester to manage this.

Q5: How will the 122 faculty on the old spread pay system be transitioned to the new system?

A: They will receive their July 5, 2024 paycheck, which represents the last pay for their 2023-2024 academic year salary. Then, there will be a disruption in the three pay periods

of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024 with their 2024-2025 academic year salary. These faculty can either budget and manage the transition on their own or UI payroll can assist through a withholding program.

Q6: What does the UI payroll withholding system to bridge the transition look like for faculty on the old spread pay system?

A: A contract time would be established where a faculty member would establish a set amount to be withheld from their paychecks (up to 3/26th of their annual salary). Payroll would create a holding account for the faculty member. The established amount would be taken out over 14 pay periods January 5, 2024 through July 5, 2024. These funds would be used to pay the faculty member during the transition pay periods of July 19, 2024 through August 16, 2024. The faculty member chooses the amount to be withheld. This arrangement would need to be signed and approved by the faculty member by December 21, 2023.

Alternately, faculty who are on the old spread pay system, can manage the transition on their own. They are not required to use the UI withholding system.

Q7: Am I losing money with this transition from the old spread pay schedule to the new deferred pay schedule?

A: No, you will still be paid the same amount for your work according to your contract. Depending on how a person elects to manage the transition in payroll systems, there will be variability in the timing of paychecks.

Q8: Why does the new system remove a week from the summer pay schedule and what is the impact?

A: U of I is currently running two payroll systems for academic year faculty; one of the systems uses half pay periods to calculate salary. The ability to offer all academic year faculty deferred pay requires an adjustment to the payroll schedule to bring all academic year faculty on the same schedule. This one-time adjustment changes the summer schedule by a week. This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate.

This change will impact academic year faculty who calculate their summer salary earnings using an hourly rate. The hourly rate will be 2.5% less than the hourly rate of the old system. Potentially, the earnings for faculty on grant funded work for the entire summer could have the summer earnings reduced by a maximum of 10% if they are paid exclusively on grant funds. The reduction results from the schedule adjustment of a week and the reduction in the hourly rate. Grants require the calculation of faculty effort on based on an hourly rate.

In summer 2023, there were 182 faculty who had summer contracts that included compensation for work on grants.

Q9: Why can't administrative stipends be included in the deferred pay option?

A: Faculty who hold administrative appointments (e.g. associate dean, department chair, program director, etc.) and who receive an administrative stipend can opt into having their base salary paid as deferred pay, but the administrative stipend must be paid according to the academic calendar. This is because these positions often fluctuate or start at different points in the year. The new system cannot accommodate the variability with these types of positions and so this part of the appointment will be treated separately. For faculty in these types of positions, they can opt to defer their base salary over 12 months, but the administrative stipend will be paid over 9 months.

Q10: I am a faculty whose FTE is variable over the course of the academic year due to availability of grant funding. Am I eligible for deferred pay?

A: No. Faculty are only eligible to be on deferred pay if they have a 1.0 FTE appointment for an entire academic year.

Q11: What happens for faculty on full-year sabbatical as it relates to supplemental pay on grants?

A: This information is forthcoming and solution will be in place by the time of implementation.

Five Myths about the U of I/UOPX Affiliation

October 27, 2023

Myth #1:

U of I is merging with the University of Phoenix (UOPX)

Both universities will continue to operate independently. They will have unique governing boards, operate separately, and there are no plans to merge the institutions. We will not combine curricula, faculty, support programs, policies, etc.

Myth #2:

U of I is purchasing the UOPX.

U of I's Board of Regents have formed a legally separate, independent, non-profit corporation called Four Three Education, Inc. (43EI). 43EI, not U of I, is purchasing the assets of UOPX. 43EI will place bonds to fund this purchase. After closing, 43EI will "do business as" the University of Phoenix. It will repay the debt using UOPX revenue. U of I is not contributing financially to the purchase.

Myth #3:

U of I is taking on the liabilities of UOPX.

The debt resulting from this transaction belongs to 43EI, not U of I or the state of Idaho. The same applies to any other liabilities of 43EI. UI may choose to take on specific responsibilities to assist the transaction and UOPX's transition to a non-profit operation. For example, to secure better bond terms, U of I may choose to guarantee up to \$10 million annually to cover the debt payment in the event UOPX cannot do so. These responsibilities will be finalized at closing. UOPX has strong financial stability, generates approximately \$100 million of unrestricted cash flow annually, and \$200 million of cash will be transferred to 43EI in addition to the regular working capital of the UOPX operation. In addition, 43EI will not pay income taxes or ownership dividends. We are confident that the UOPX will be able to fully fund all obligations.

Myth #4:

U of I is only doing this for a financial benefit.

Yes, the U of I will benefit from this transaction. We anticipate a minimum \$10M annually; however, that is not the only reason for the affiliation. This affiliation provides greater financial security to U of I through diversification of programs and student populations. It is also a unique opportunity for the institutions to work together by sharing strengths and developing partnerships that will benefit one or both institutions. President Green is launching a working group to identify and prioritize these collaborative opportunities.

Myth #5:

UOPX will take students away from U of I.

UOPX is already a competitor to all Idaho institutions. U of I and UOPX serve largely different student populations, offer mostly unique programs, offer courses on a very different timeline (rolling calendar vs. semester), and have a nearly identical price. This transaction does not change these primary drivers for attendance decisions. Through the affiliation we may improve opportunities for students such as student pathways, 3+1 programs, etc.

FINANCIAL FLOW CHART

For U of I/UOPX Affiliation

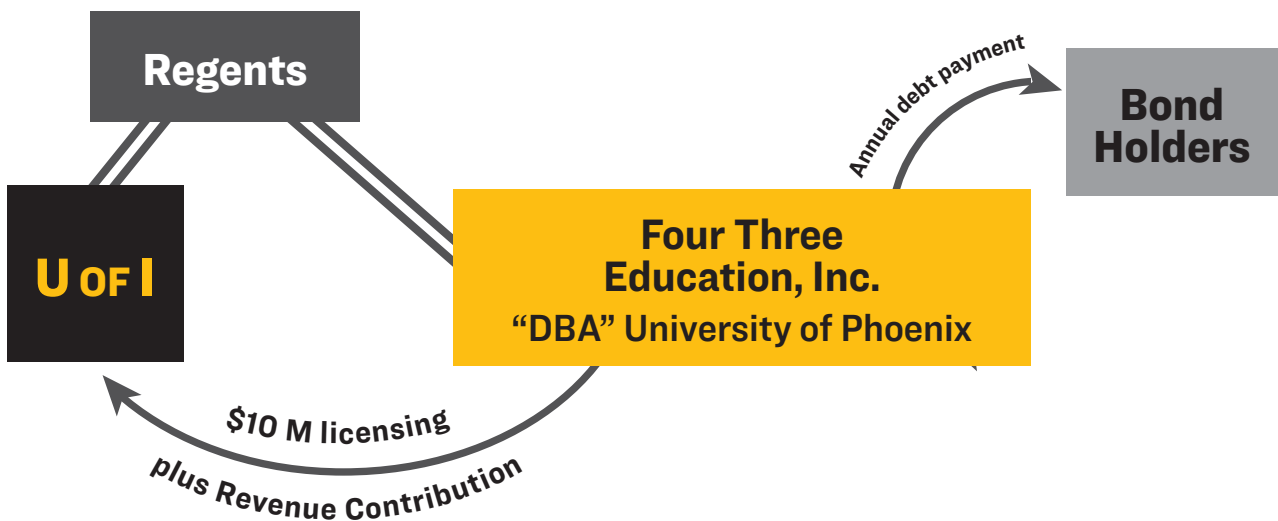

PURCHASE TRANSACTION

(Est. January 2024)

ANNUAL TRANSACTION

(post-closing)

NOTE: U of I may choose to take on specific responsibilities to assist the transaction and UOPX's transition to a non-profit operation. For example, U of I may agree to guarantee UOPX up to \$10M annually as emergency support; however, it is highly unlikely this would occur given UOPX's strong financial position.

OFFICE OF THE PROVOST
AND EXECUTIVE VICE PRESIDENT

Date: November 2, 2023

To: Kristin Haltinner, Vice Chair, Faculty Senate
From: Diane Kelly-Riley, Vice Provost for Faculty
Subject: Selection of Members for University-Level Promotion and Tenure Committee
CC: Francesca Sammarruca, Faculty Secretary

Please alert faculty senators nominations are open for individuals to serve on this year’s University-Level Promotion and Tenure Committees. Two committees will be convened this year given the number of dossiers to be reviewed. Details about the committee meetings and nomination process follow:

Nomination deadline: Friday, November 17, 2023 [NOMINATION FORM LINK](#)

Senator nomination process:

College senators must submit the total number of nominees for **Two Committees based on the chart below**. If senators do not complete the nomination form by the deadline, the provost shall appoint members from that college/unit.

University P&T Committee meeting dates:

Silver Committee, Saturday, January 27, 2024, 8:00am PT, via zoom
 Gold Committee, Saturday, February 3, 8:00am PT, via zoom

Nominee availability:

Nominees must be available for both meeting dates but can express preference for one of the dates. Faculty selected for the committee will only participate on one day. The University Level Promotion and Tenure meeting typically takes eight hours. A required orientation will be held within the first two weeks of December. Dossier review begins after the orientation.

Nominee selection considerations:

The responsibilities of the committee collectively are to understand and make recommendations regarding the university’s policies regarding promotion and/or tenure. Senators should consider the diverse configurations of academic appointments within their college and nominate committee members to be representational of the diverse array of faculty appointments. Eligible nominees include full-time faculty from the Instructor or Professorial ranks. Faculty who have not previously served on the committee should be prioritized.

| College/Unit | Number of Nominees (FSH 3500 G.) | |
|--|----------------------------------|----------------|
| | One Committee | Two Committees |
| College of Agricultural & Life Sciences Faculty w/>50% Teaching & Research | 2 | 4 |
| College of Agricultural & Life Sciences Faculty w/>50% University Extension | 2 | 4 |
| College of Letters, Arts & Social Sciences | 4 | 8 |

STUDENT CODE OF CONDUCT & RESOLUTION PROCESS

CONTENTS:

- A. Introduction**
- B. Purpose**
- C. Scope**
- D. Definitions**
- E. Prohibited conduct**
- F. Conduct resolution process**
- G. Miscellaneous**

A. Introduction

A-1. The University of Idaho is committed to creating and maintaining a productive living-and-learning community that fosters the intellectual, personal, cultural, and ethical development of its students. Self-discipline and respect for the rights and privileges of others are essential to the educational process and to good citizenship. Student expectations include:

- Students are expected to show respect for order, civility, respect for the rights of others within and without the University as these attributes are demanded of good citizens.
- Students are expected to uphold the rights and dignity of others regardless of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or socio-economic status.
- Students are expected to uphold the integrity of the University as a community of scholars in which free speech is available to all and intellectual honesty is demanded of all.
- Students are expected to respect University policies as well as local, state, and federal law.

A-2. The University of Idaho conduct process works to balance the safety and security of the members of the University of Idaho community through personal accountability, reflection, and growth. Students have an opportunity to reflect on their choices, understand how their actions have an impact on those around them, and grow from the experience.

A-3. The University strives to provide a fair and consistent student conduct process based on university policy and best practices. By educating students to better understand how their decisions affect themselves and their community they learn reflection, follow-up, and accountability. The Dean of Students Office collaborates with campus and community partners to provide resources and support to students.

B. Purpose

B-1. This Code contains regulations addressing reported student violations of university standards of conduct in a manner consistent with the requirements of procedural due process. In addition to the general expectations for conduct as set forth in this chapter, it contains a description of prohibited conduct.

B-2. The Dean of Students ~~or their designee (referred to collectively in this Code as "the DOS"); or their designee,~~ has primary authority and responsibility for the administration of ~~the student conduct and resolution process~~ this Code, except that the Director of the University's Office of Civil Rights and Investigations ("OCRI") has primary authority and responsibility for the administration of prohibited student conduct that includes allegations of discrimination, as defined in this Code. We invite you to learn more about the interplay between this Code and OCRI's policies, procedures, and processes by visiting OCRI's website or directing inquiries to ocri@uidaho.edu.

~~—~~The DOS, upon finding, in its discretion, that there is a conflict of interest, or for other reasons necessary to effectuate the policy, may appoint an external person to serve in any of the roles created in this Code. The Dean of Students works with faculty, staff, hearing officers, and/or the student conduct board in the disposition of Student Code of Conduct violations. There is no standard discipline that applies to violations of the Student Code of Conduct. They range from informal resolutions to formal warnings, to community service to expulsion. In each situation, the nature and seriousness of the behavior, the motivation underlying the behavior, and precedent in similar cases are considered.

B-3. The Student Code of Conduct does not restrict speech that is otherwise protected, including speech that some may find objectionable. The interplay between freedom of speech and expectations for students is complex and we invite you to learn more about freedom of speech and the Dean of Students office student conduct processes as they relate to freedom of speech by directing inquiries to askjoe@uidaho.edu.

B-4. Findings of responsibility will be determined using a Preponderance of the Evidence Standard. The standard is satisfied if the reported conduct is deemed more likely than not to have occurred.

B-5. The University bears the burden of proving that a student engaged in

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

misconduct by a preponderance of evidence. A “preponderance of evidence” means that quantity and quality of evidence which, when fairly considered, produces the stronger impression, and has the greater weight, and is more convincing as to its truth than the evidence in opposition – or in other words, the facts as determined by the Hearing Officer or Board indicate that it is more likely than not that the student violated this Code. Formal rules of evidence applied in courtroom proceedings do not apply to this process. Evidence that is determined to be relevant to a case, by the Facilitator or Board Chair, is admissible at a hearing. This may include direct evidence, circumstantial evidence, documentary evidence, hearsay evidence, and signed statements. This does not imply that all evidence admitted is equivalent in weight. Unduly repetitive information may be excluded.

B-6. The administration of the Student Code of Conduct and Student Conduct Process applies affirmative action and equal opportunity standards consistent with FSH 3060 and 3065. Additionally, this process is supported by nondiscrimination practices consistent with FSH 3200, 3210, and 3215.

C. Scope

C-1. Individuals subject to the Code

a. Students

1. By enrolling at the University of Idaho, students voluntarily accept responsibility for compliance with all University policies including the Code.
2. Students are responsible for their behavior from time of admittance to the University through the awarding of a degree, even though conduct may occur before classes begin or after classes end. Students are responsible for their conduct during the academic year and during periods between enrollment terms.
3. The University recognizes that students may also be employees, and their conduct may be subject to review and discipline under this Code and any applicable employment policies.

b. Reporting parties. Employees and students who are reporting student behavior that may be prohibited by the Student Code of Conduct.

c. Other. Employees and students who are otherwise involved in the conduct process.

C-2. Behavior subject to the Code

a. The Code applies to conduct that occurs on University property, within or at University–sponsored activities, off campus, online, or through other electronic means.

b. The University may address off-campus behaviors when the Dean of Students or university designee determines that the off-campus conduct affects a University interest. University interests include but are not limited to health and safety, protection of rights or property of others and promoting the University’s

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

mission.

c. Jurisdiction for the DOS to address student behavior or misconduct begins upon admission and ends at commencement. If serious misconduct was committed while a student was enrolled but is reported after graduation, the University may invoke the disciplinary process referred to in Article III and may revoke the student's degree if they are found responsible.

d. If a student withdraws from school while a conduct matter is pending, the Code remains applicable to the student's conduct prior to withdrawal.

e. The University reserves the right to proceed with the conduct process in a student's absence or to delay the process until the student seeks re-enrollment.

f. Depending on conduct process outcomes, a hold may be placed on the student's ability to re-enroll and the student may be required to satisfy all outcome requirements prior to re-enrollment eligibility.

g. Behavior conducted online, or through any other electronic medium, including online postings, video, photographs, blogs, web postings, chats, and social networking sites is in the public sphere and is not private and falls within the jurisdiction of this Code provided the other criteria, e.g., student status, are satisfied.

h. If the prohibited conduct involves a student organization, the individual students are subject to this Code, and the organization is subject to FSH 2350 Student Organization Code and Resolution Process.

i. DOS encourages all behavior to be reported in a timely manner but understands that barriers may exist to reporting prohibited behavior and that some reported behavior warrants DOS review for conduct proceedings even if the reported behavior occurred well in the past. DOS has discretion to initiate conduct proceedings for all reported behaviors, regardless of time of occurrence, based on the nature of the totality of the circumstances.

D. Definitions. The following definitions explain the terminology used in this Code. Particular code violations are listed and defined in Section E Prohibited conduct.

D-1. Academic dishonesty: Intentional participation in deceptive practice in one's academic work or the academic work of others. Examples include cheating, fraud, plagiarism, or falsification of research results and are individually addressed and more fully defined in Article II .

D-2: Academic outcome: A consequence imposed by instructors for findings of academic dishonesty. Academic outcomes include, but are not limited to, grade adjustments, failing a class, or resubmission of academic work.

D-3: Academic work: Any academic work required for completion of academic requirements in a course. Academic work includes but is not limited to assignments, quizzes, examinations, problem solving, class exercises, and/or drafts of work.

D-4: Administrator: The Dean of Students or designee will serve as the administrator. The administrator can serve as a decision-maker and is the non-voting advisor to the Student Conduct Board and each SCB hearing panel.

D-5: Advisor: The person of the student's choosing who has agreed to advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

D-7: Complainant: An individual who was subject to alleged misconduct described in the Student Code of Conduct. There may be more than one complainant for an incident. In certain circumstances, the Dean of Students or another University official may assume the role of complainant on behalf of the University.

D-8: Conduct decision: A written decision determining the resolution of the reported behavior. The decision will include a finding of responsible or not responsible and any applicable required or suggested outcomes.

D-9: Conduct record: The student conduct record maintained by the Dean of Students in connection with a reported violation or violation of the Code. The student conduct record may include complaints, notices, hearing records, conduct findings, outcomes, and other documents deemed relevant by the Dean of Students.

D-10: Consent: Knowing, voluntary, and clear permission by word or action to engage in activity with another individual(s), not limited to sexual activity. Consent can be withdrawn at any time upon notice, by word or action, to the other party.

D-11: Days: Days that the University is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

D-12: DOS: The Office of the Dean of Students, which is responsible for the administration of the Student Code of Conduct and includes the Dean of Students and their designees.

D-13: Educational setting: All academic, educational, extracurricular, athletic, and other programs of the University of Idaho, regardless of location, including online formats.

D-14: Finding: A conclusion reached as result of an inquiry, investigation, or hearing and is also referred to as a decision.

D-15: Formal resolution process: A conduct process by which notice and opportunity to be heard is provided and that often includes a student conduct

process occurring before a Hearing Panel which issues a written decision following the hearing.

D-16: Hearing: A formal process maintained by the University to review and address allegations of violations that follows the process and rules outlined in this Code but is not subject to other external rules (such as federal or state evidentiary rules or procedures).

D-17: Hearing officer: A person appointed by the Administrator to serve as the person presiding over a hearing. The hearing officer investigates the alleged behavior and administers the conduct process for informal resolutions. The Administrator may also serve as the hearing officer.

D-18: Hearing panel: A panel composed of members of the Student Conduct Board, who are selected by the Student Conduct Board chairperson for purposes of hearing a formal resolution process and issuing a written decision that may include findings.

D-19: Informal resolution process: An alternative method of resolving a matter under this Code, entered into willingly by all parties as well as by the University, that seeks to address and resolve the alleged conduct or harm without the use of the formal process outlined below.

D-20: Instructor: In cases of academic dishonesty, the instructor may be the faculty member, teaching assistant, or other employee responsible for course instruction.

D-21: Investigator: The person assigned by the University to investigate a report of a violation of the Code. The investigator may be any qualified person assigned by DOS.

D-22: Mediation: An intervention between conflicting parties to promote reconciliation, settlement, or compromise.

D-23: Misconduct: Behavior that is prohibited by the Student Code of Conduct or that violates a University directive or policy.

D-24: Office of Civil Rights & Investigations (OCRI): The Office at the University that is responsible for ensuring compliance with federal and state laws and University policies related to discrimination or harassment based on a protected class. This includes retaliation when engaging in a protected process. OCRI undertakes necessary investigations and prepares recommendations and written reports that may be reviewed by the DOS for further conduct processes related to the underlying facts investigated and the nature of the reported behaviors of students investigated by their office.

D-25: Outcome: Disciplinary or corrective action imposed by the deciding body of a student conduct process following a finding of student misconduct. The term includes, but is not limited to, educational programming, restitution, community service activities, apology letters, probation (including denial of specified University privileges), suspension, termination, or other such outcomes deemed appropriate.

D-26: Parties: The Respondent(s) and the Complainant(s).

D-27: Policy: The written regulations of the University as found in, but not limited to, the Faculty Staff Handbook, including the Student Code of Conduct, the Administrative Procedures Manual, the Residence Hall Handbook, all Housing and Residence Life policies, and Graduate and Undergraduate Catalogs.

D-28: Protected Status: Protected status includes race, color, religion, national origin, age, protected military status, disability, family status, genetic information, creed, or sex (including pregnancy, parenting, sexual orientation, or gender identity or expression).

D-2829: More likely than not standard: The standard of evidence that is used to decide responsibility of Code violation in a hearing, it means that it is more likely than not, based upon the totality of all relevant evidence and reasonable inferences from the evidence, that there is a violation of the Code.

D-2930: Probation: The process or period of observing the character or abilities of a student to determine whether other corrective action should occur. An additional resolution process is not necessary to modify outcomes following a finding of misconduct where probation is imposed. The DOS has discretion to modify the terms of probation as necessary based on the information available to the DOS during a student's probation.

D-3031: Respondent: The student who is alleged to have violated the Code.

D-3132: Student: Includes, but is not limited to, all persons admitted to the University, either full time or part time, online or in person, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

- a. **Persons** who are suspended, or those who withdraw or graduate after allegedly violating the Code of Conduct.
- b. **Persons** who are eligible to enroll for classes without applying for re-admission.
- c. Individuals participating in the American Language and Culture Program, Independent Study of Idaho sponsored by the University of Idaho, the University

of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

D-3233: The Code: The Student Code of Conduct and Conduct Resolution Process.

D-3334: Student Conduct Administrator (Administrator): The University of Idaho official designated by the DOS to serve as an investigator or hearing officer. It will also include the Administrator's designee.

D-3435: Student Conduct Board (SCB): The formal body that reviews student conduct matters, as set forth in this Code.

D-3536: Weapon: Weapon is defined in APM 95.12.

Commented [W(1)]: Embedded link

E. Prohibited conduct. Specific behaviors of misconduct are identified and defined below.

E-1. Academic dishonesty. Acts of academic dishonesty include but are not limited to the following:

a. Cheating. Cheating includes, but is not limited to, the following actions as they relate to academic work:

- (1) Using, purchasing, providing, or possessing unauthorized materials, sources, or assistance without authorization from the instructor.
- (2) Copying from another's academic work either for the student's own use or for the use of others.
- (3) Sharing academic work without prior permission from instructor.
- (4) Acquiring, without written or verbal permission, tests or other academic material belonging to the instructor or another member of the University faculty or staff.
- (5) Completing academic work for someone else or having someone else complete academic work on your behalf.
- (6) Representing another student in a class for attendance or participation purposes or asking another person for representation for attendance or participation purposes.
- (7) Fabrication or falsification of data, research or academic content and the unauthorized alteration or invention of any information or citation.
- (8) Forging, altering, reproducing, removing, destroying, or misusing any University document, record, or instrument of identification.

b. Plagiarism. Plagiarism includes, but is not limited to, the following:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- (1) Using, by paraphrase or direct quotation, the published or unpublished work of another person without full and clear acknowledgment.
- (2) The unauthorized alteration or invention of a citation.
- (3) Buying or selling academic work for the purpose of submitting it for course completion.
- (4) Submitting academic work, or any part of academic work, completed for one course as work for another course without the express prior approval of both instructors.

- c. Prohibited behavior.** Engaging in any behavior related to course completion prohibited by the instructor or otherwise including but not limited to unauthorized collaboration and reliance on prohibited technological assistance/artificial intelligence tools.
- d. Misrepresenting facts for academic advantage.** Examples include but are not limited to providing false academic achievements and false medical documentation for academic extensions.
- e. Violation of University policy regarding intellectual property and research.** All data acquired through participation in University research programs is the property of the University and must be provided to the principal investigator. In addition, collaboration with the Office of Research and Economic Development for the assignment of rights, title, and interest in patentable inventions resulting from the research is also required. See FSH 3200 and 5400.

E-2. Disruption or misuse of University resources or property. This behavior includes but is not limited to the following:

- a. Theft or damage.** Attempted or actual theft of or damage to University property.
- b. Unauthorized possession.** Unauthorized possession, duplication, or use of University keys, lock combinations or other access codes or passwords that can be used to access University property or facilities.
- c. Unauthorized entry or use.** Unauthorized entry into or use of any University owned or managed building, space, outdoor area, or property. This also includes other restricted areas identified in APM 35.35.
- d. Violation of law or other policy.** Violation of local, state, federal or campus fire policies including but not limited to:

Formatted: Not Highlight

1. Building or setting fire(s) without proper authorization as required by APM 35.25.
2. Removing or otherwise tampering with fire equipment or fire alarm systems.
3. Failure to promptly vacate a building
4. Intentionally or recklessly causing a fire that damages University or personal property or causes injury.
5. Causing, making, or circulating a false report or warning of fire, explosion or another emergency.

Formatted: Not Highlight

Formatted: Not Highlight

E-3. Misuse of technology resources. Theft or other abuse of University computer facilities or resources. This includes but is not limited to the following:

- a. Unauthorized entry into, or transfer of a file.
- b. Using another individual's identification or password.
- c. Interfering with the normal operation of the University computing system or resources.
- d. Any violation of the University Computer Use Policy.
- e. Inappropriate or disproportionate use of an IT resource owned or controlled by the University.
- f. Using an IT resource for an illegal, threatening, or intentionally destructive purpose.
- g. Circumventing University system or network security measures.

E-4. Threat of harm or actual harm to a person's physical or mental health or safety. This behavior includes but is not limited to the following:

- a. **Behavior involving physical force or threat of physical force.** Behavior involving physical force that hurts another person or intimidation or threat of such force directed at another person where a reasonable person would believe the threat to be serious and imminent in nature. It includes the following:
 1. **Fighting.** Engaging in violence, combat, or aggression.
 2. **Assault.** Behavior intended to cause apprehension of harmful or offensive contact that causes apprehension of physical safety of another. The act required for an assault must be overt. Although words alone are insufficient, they may create an assault when coupled with some action that indicates the ability to carry out the threat and it creates a fear of it being carried out in the person the assault behavior is directed at.
 3. **Battery.** Actual and intentional unwanted touching or contact with another person, even if the physical injury is slight.

- 4. Use of a knife, gun, or other weapon.** The use of a knife, gun, or other weapon except in reasonable self-defense in any act of violence as defined in the Code.
- 5. Involuntary restraint or transport.** Restraining or transporting a person against their will.
- 6. Other.** Any action that threatens or endangers the physical health or safety of any person.

b. Prohibited harassment

1. General definition. Prohibited harassment is hostile or threatening conduct or speech, whether verbal, written, or symbolic, that ~~i:~~—
~~(a) Is sufficiently severe or pervasive, as viewed by a reasonable person under similar circumstances and with similar identities to the victim, and results in an objectively hostile or threatening environment that interferes with or diminishes another's ability to participate in or benefit from the services, activities, or privileges provided by the University. and~~

~~—(b) Describes with personal particularity or is personally directed to one or more specific individuals.~~

~~**2. Definitions used for sex- or gender-based harassment.** When harassment is sex- or gender-based, the definitions used to determine coverage can be found in FSH 6100. Violations that meet the definitions of FSH 6100 but that do not occur within the covered Applicability of paragraph B of that policy, may be investigated and determined under this Code.~~

23. Exception. Speech that is protected by the First Amendment to the United States Constitution, including relevant academic speech spoken in a classroom or writing assignment, protests and statements that do not meet the narrow definition described above, is not a violation of this Code, though it may go against community norms and may be harmful or hurtful to other members of the University community or members of certain groups.

c. Threatening or intimidating behavior. Threatening or intimidating behavior includes, but is not limited to:

- 1. Coercion.** The practice of persuading someone to do something by using force or threats.

Formatted: Indent: Left: 1.25", First line: 0"

2. Bullying. Behavior seeking to harm, intimidate, or coerce another.

3. Deliberate destruction of or damage to property. Deliberate destruction of or damage to public or private property, where a reasonable person would believe that the full or partial intention of the act is to harass an individual or a group based on protected characteristics as defined in [FSH 3200 Policy of Nondiscrimination](#).

d. Hazing. Hazing includes, but is not limited to, any action or participation in any activity that (i) causes or intends to cause physical or mental discomfort or distress, (ii) may demean any person, regardless of location, intent, or consent of perpetrators or victims or (iii) destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in, a group or organization. The express or implied consent of the victim will not be a defense. Apathy or acquiescence in the presence of hazing are not neutral acts. They are also violations of this rule.

Hazing also includes any activity that compels a student to participate in any activity that is unlawful, publicly indecent, or contrary to the policies and regulations of the University, or any activity that unreasonably and materially interferes with a student's academic efforts.

E-5. Discrimination and retaliation.

a. Discrimination. Limiting or denying services, benefits, or opportunities of the University based on a protected status. Examples of prohibited discrimination can be found on the OCRI website or by directing inquiries to ocri@uidaho.edu.

A person can engage in prohibited discrimination even if the person belongs to has the same protected Class status as or does not mean to offend the target(s) of the conduct. Alleged discrimination will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processes.

Discrimination includes:

— Conduct prohibited by this Code, if based on a protected status, including harassment as defined in paragraph E-4.a, above.

1. Retaliation, as defined in paragraph E-5.b, below, when the protected activity is based on a protected status.

Discrimination. Discrimination includes conduct that violates the Board of Regent's or the University's nondiscrimination and antidiscrimination policies contained in FSH 3200, 3210, or 3215.

Formatted: Font: (Default) Arial, 12 pt

b. Retaliation. Retaliation includes conduct that intimidates, interferes with, threatens, coerces, or otherwise discriminates against any individual because that individual opposes or reports a perceived wrongdoing, inequity, or violation of law or University policy, files a complaint alleging illegal or prohibited discrimination, participates in a grievance or response procedure, or participates in dispute resolution. Alleged retaliation when the protected activity is based on a protected status or when the alleged perpetrator is an employee will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processesa. Discrimination. Discrimination includes conduct that violates the Board of Regent's or the University's nondiscrimination and antidiscrimination policies contained in FSH 3200, 3210, or 3215.

E-6. Disruption, obstruction, or interference with normal University activities. Members of the University community have the right to a campus that is free from unreasonable disruption, obstruction, or interference. Disrupting or obstructing normal University activities, including, but not limited to, all academic activities, University programming, athletic events, and administrative functions is prohibited. Examples include:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- a. Classroom disruption: Behavior that interferes with the teaching or learning process in the classroom or educational setting and continues after an instructor's request to cease.
- b. Obstruction of the free flow of pedestrian or vehicular traffic on campus.
- c. Conduct that is lewd, indecent or disruptive that is not otherwise constitutionally protected speech.
- d. Falsifying, distorting, or misrepresenting information provided to the University.
- e. Interference with the student conduct system, which includes, but is not limited to, any of the following:
 - 1. Failure to cooperate with the University's investigation or disciplinary proceeding. If a party in a case does not want to participate because they believe that doing so would cause them to speak or offer evidence against themselves, and they notify the DOS that this is the reason they are choosing not to participate or only to participate partially, this violation will not apply.
 - 2. Disrupting or interfering with the University's investigation and student conduct proceedings.
 - 3. Making false allegations.
 - 4. Attempting to discourage an individual's proper participation in, or use of, the student conduct process.
 - 5. Harassment (verbal, physical, written, or electronic) or intimidation of any person participating in the University's investigation prior to, during, or after the investigation and conduct process concludes.
 - 6. Failure to comply with the outcome(s) imposed pursuant to the disciplinary process.
- f. Influencing or attempting to influence another person to commit any violation of the Code.
- g. Engaging in speech, including but not limited to verbal, electronic, or written communication, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

E-7. Use and Misuse of Substances

- a. **Smoking.** Smoking in violation of APM 35.28.
- b. **Drugs and controlled substances**

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. Using, possessing, manufacturing, cultivating, selling, or distributing any state or federally controlled drug, designer/synthetic drug, or substance, including, but not limited to, cannabis, heroin, narcotics, or other controlled substances, in violation of any applicable law or University policy.
2. Possessing or using any paraphernalia used for drug consumption. Paraphernalia includes but is not limited to bongs, bowls, pipes, or any homemade smoking device.
3. Using, possessing, selling or distributing prescription or over-the-counter medications by an individual for whom it was not prescribed.
4. Inhaling or ingesting any substance (e.g., nitrous oxide, glue, paint, etc.) that is intended to alter a student's mental state without a prescription.
5. A violation may also occur when the odor of an illegal or controlled substance or drug is present when more than one individual can reasonably trace it to a specific individual.

c. Alcohol

1. Consuming, possessing, manufacturing, or distributing alcoholic beverages in violation of any applicable law or University policy (see APM 80.01 for alcohol permit requirements and APM 95.31 for alcohol policy).
2. For persons under 21, the use or possession of alcoholic beverages. public intoxication or excessive consumption of alcohol. disorderly or irresponsible conduct resulting from consumption of alcohol.
3. For persons over 21, the use or possession of alcohol in public areas where alcohol is not permitted. excessive consumption of alcohol resulting in disorderly or irresponsible conduct.
4. Selling, distributing, or furnishing alcohol to a person under 21 years of age.

E-8. Housing and living groups. Violations of any rules imposed by University Housing or living groups outlined in the Housing contract and Housing handbook.

E-9. Violation of University policy. Violation of published University policies, rules and regulations.

E-10. Violation of law. Any violation of federal law, state law, or local ordinance may be a violation of the Code, independent of the status of any civil or criminal litigation in court or criminal arrest and prosecution. Decisions made or outcomes imposed under this Code will not be subject to change because criminal charges arising out of the same facts were adjudicated in a civil or criminal court process. The University will cooperate as appropriate with law enforcement and other agencies in the enforcement of criminal law and in the conditions imposed by criminal courts for the rehabilitation of student violators provided that the conditions do not conflict with University policies.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

E-11. Furnishing false information, refusal to identify, and refusal to comply

- a. Furnishing false information or false representations to any person working for or authorized to act as an authority on behalf of the University.
- b. Refusal to identify oneself to an institutional representative in response to a request when on any University owned or managed property.
- c. Failure to comply with directions of a University official, law enforcement, fire department, or other government official acting in performance of their duties.
 - 1. Identification includes giving one's name, substantiated by a current driver license or student identification card or other official documentation, or by stating truthfully whether one is a student of the University or not.
 - 2. An institutional representative includes any employee, faculty member, or representative of the University, and any attorney, peace officer, or campus security officer of the University acting under the authority of the University.
- d. Using false identification or another individual's identification card to procure goods, entry or services.
- e. Submission of false information or withholding requested information at the time of admission or readmission.

E-12. Firearms, explosives, and other weapons. Possessing or using firearms, explosives, other weapons, projectile or explosive devices or substances, or dangerous chemicals in violation of APM 95.12, APM 35.34, or APM 35.35.

E-13. Disruption to community

- a. Attempted, threatened, or actual theft of or damage to another's property.
- b. Unauthorized entry into or use of another's property.
- c. Excessive noise, amplified sound, or music that produces a level of noise that disrupts members of the community.

F. Conduct resolution process

F-1. Reporting alleged violations

- a. The DOS will accept reports from anyone with knowledge of potential Code violations. Reports must be made to the DOS. Reports of Title IX and related violations covered by [FSH 6100](#) will not be reviewed under this Code but will be accepted by DOS and then forwarded to the Title IX Coordinator or other appropriate office for review. Allegations against Student Organizations will be addressed as per the Student Organization Code of Conduct, FSH 2350.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. Reports should be in writing but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the incident takes place.

F-2. Initial review. The DOS will review all reports of Code violations. The purpose of the review is to gather relevant information concerning each allegation and determine whether further investigation is warranted. When appropriate, the DOS will transfer the notice and investigation process to the Office of Civil Rights & Investigations (OCRI). The initial review may include interviewing the involved parties and witnesses without formal notice.

F-3. Notice of allegation.

- a. Following the initial review, the hearing officer will determine whether to initiate the conduct resolution process. In order to initiate that process, the hearing officer will provide notice of reported Code violation(s) to the respondent.
- b. The notice informs the respondent of the reported Code violations including a short description of the basis of the reported violation.
- c. The notice may include resolution options if further investigation is not required. Resolution options are detailed in the Hearing Process section below. If further investigation is required, the notice will include details of the investigative process.
- d. The notice will include a link to or copy of this Code.
- e. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.
- f. If a respondent does not participate in the initial meeting, the hearing officer will make reasonable attempts to reach the respondent for five business days. If there is no response, the hearing officer will determine the appropriate resolution process.

F-4. Initial meeting. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.

F-5. Interim action.

- a. At any time before a final institutional decision, the Administrator, or designee, may impose restrictions on a student or separate the student from the University community pending the final institutional decision. If circumstances allow, the Administrator (or designee) should meet with the student prior to imposing the interim action.
- b. Other than issuance of no-contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when
 1. The Administrator determines that the student represents a threat of serious harm to any person.
 2. The student is facing allegations of serious criminal activity.
 3. The action is necessary to preserve the integrity of the investigation.
 4. The action is necessary to preserve University property or the action is necessary to prevent disruption of, or interference with, the normal operations of the University.
- c. After the hearing decision, pending any response review of the decision, the Administrator may impose an outcome issued by the Hearing Panel as an interim action at the discretion of the Administrator.
- d. Interim actions may include, but are not limited to, the following:
 - Suspension from the University pending a final institutional decision.
 - Issuance of a no-contact order.
 - Exclusion from University property.
 - Removal from the residence halls.
 - Removal from extracurricular activities, including participation on athletic teams.
 - Withholding the award of a degree pending the conclusion of the investigation and hearing process. or
 - Any other action deemed necessary and appropriate by the Administrator to maintain orderly and appropriate University operations.
- e. When a student is suspended from the University, or directed not to attend certain classes, alternative coursework options may be pursued, with the approval of the Administrator and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- f. An interim action must be issued in writing and is effective when the Administrator delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.
- g. The respondent may submit a response to the issuance of any interim action by filing a response with the Administrator. There are no formal procedures for this response, and the interim outcomes remain in effect unless removed by the Administrator.
- h. A violation of the provisions of an interim action will be considered a violation of the Code.

F-6. Informal resolution process: Decision by hearing officer

- a. During the initial meeting, the respondent may be given an opportunity to resolve the complaint informally. All parties must mutually agree to engage in the Informal Resolution Process. The Informal Resolution Process may also be used when the respondent is not participating.
- b. At any point in the Informal Resolution process, any party may request a Formal Resolution Process, described below. The hearing officer may refer a matter to Formal Resolution Process at any point during the Informal Resolution process.
- c. In the Informal Resolution Process, the hearing officer determines based on the preponderance of the evidence whether the respondent is responsible for a code violation and determines the outcomes. The hearing officer will first meet with the parties (if applicable), share available information, and hear their response, if any. A respondent may also accept responsibility for a Code violation at any point in the process. If the respondent accepts responsibility, the hearing officer will determine the outcomes.
- d. Informal Resolution decisions are not subject to response review.
- e. If the respondent does not participate and a decision is made through Informal Resolution, the respondent may request their case to be reopened. Requests must be made in accordance with the instructions in the outcome notice and received no later than five (5) days after that outcome notice. If the request is timely submitted, the hearing officer will offer to meet with the respondent. During that meeting the respondent can share information with the hearing officer. The hearing officer reserves the right to update the decision of responsibility and any applicable outcomes after meeting with the respondent. The

hearing officer will notify the respondent within five (5) days whether the decision of responsibility or applicable outcomes have changed.

F-7. Formal resolution process: Decision by Administrator or Student Conduct Board

a. Investigation

1. The University will investigate the allegations. At any time during the investigation, either the complainant or the respondent may, but is not required to, provide information to the investigator for consideration. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask other Parties or other witnesses, etc. Except in the rare circumstances described in this Code, only information that is presented to the investigator may be used in a hearing.
2. The investigator will provide the interview summaries to all parties and witnesses to review and provide additional comments and clarifications. Comments must be received within five days of receiving the interview summaries. The investigator will revise the interview summaries based on relevant comments provided by the parties and witnesses.

b. Preliminary report review

1. At the conclusion of the investigation, the investigator will draft a Preliminary Report of Investigation (Preliminary Report). The preliminary report will include the steps taken during the investigation., a list of witnesses contacted. a detailed summary of any witness interviews. a detailed summary of any interviews of the respondent or complainant (if applicable). a detailed summary of any other information considered as part of the investigation. and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the respondent or the complainant.
2. The Preliminary Report will not include any conclusions, findings, or credibility analysis.
3. The parties will be provided an opportunity to review the Preliminary Report and may provide a written response to the

Preliminary Report within five days of the review of the report. A party will be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.

4. After the time for submitting a written response to the Preliminary Report has passed, the investigator will review any responses received and determine whether additional investigation is needed. After addressing the responses, if any, the investigator will incorporate the responses into the final report.
5. The investigator has sole discretion of determining whether sufficient information has been obtained to end the investigation process.

c. Final Report of Investigation

1. The Final Report of Investigation (final report) will include the following:
 - Everything included in the Preliminary Report,
 - Complete copies of any timely-submitted written responses to the Preliminary Report,
 - A credibility analysis, and
 - Findings of facts.
2. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The investigator may serve as the Administrator's designee to send out the final report to parties.
3. The credibility analysis is an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be

part of the finding of facts. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.

4. The findings of facts will include a description of the basis for each finding. Each finding will be based on a more likely than not standard and will include a rationale based on supporting documentation or information such as information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the respondent, complainant and/or witnesses.

d. Review by Administrator

1. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The parties may submit a written response to the final report to the Administrator no later than five days after the final report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the final report.
2. Decisions are made either by the Student Conduct Board (SCB) after a hearing or by the Administrator after their review. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the final report is provided to the parties. The Administrator may also decide to refer matters to the SCB.

e. Decision by Administrator

1. If a matter is not referred to the SCB for a hearing, the Administrator will decide whether the respondent violated the Code. The Administrator will make the decision based on the information contained in the final report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
2. The Administrator will adopt the findings and credibility analysis contained in the final report if the Administrator finds that they are more likely than not to be accurate. Any additional or different

findings issued by the Administrator must be based on a more likely than not standard.

3. If the Administrator determines that the respondent violated the Code, the Administrator will determine the appropriate outcome.
4. The Administrator's decision will be in writing and include the basis for the decision. The written decision will be simultaneously provided to the parties.
5. The Administrator's decision may be subject to a response review in accordance with this Code.
6. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms of appropriate alternative resolution. All parties must agree to participate with DOS in an alternative resolution process.

f. Hearing and Decision by Student Conduct Board

1. **Student Conduct Board in general.** The description and makeup of the SCB can be found in FSH [1640.83](#).
2. **Conflict of interest.** A member of the SCB will not serve on any Hearing Panel or Response Review Panel in any case where the member has a conflict of interest or bias for or against either party.
3. **Training required.** A member cannot serve on either a Hearing Panel or Response Review Panel until the member has completed training as required by DOS.
4. **Confidentiality.** Proceedings before the SCB, whether before a Hearing Panel or Response Review Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.

- 5. Notice of Hearing.** In matters referred to the SCB, the Administrator (or designee) must send written notice of the hearing to the SCB and the parties. The notice will include the following:
- a. the specific provision(s) of the Code the respondent is accused of violating.
 - b. a short description of the basis of the alleged violation,
 - c. the date and time for the hearing, and
 - d. the deadline for submitting written materials to the Administrator.
 - e. a link to or copy of the final report and any responses to the final report which were timely submitted to the Administrator.

6. Scheduling

The hearing will be held no fewer than five days after the notice is provided to the parties, unless extended by the Administrator. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator will have the sole discretion as to whether to reschedule the hearing. Except in cases of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

7. Consolidation

If a report of a violation of the Code involves more than one respondent, the Hearing Panel will conduct a joint hearing with all respondents. However, the panel chair may permit the hearing pertinent to each respondent to be conducted separately. In joint hearings, separate decisions of responsibility will be made for each respondent.

8. Composition of the Hearing or Response Review Panel

- a. The chair of the SCB will appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.
- b. The chair of the SCB will appoint one of the Hearing Panel members to serve as chair of the panel. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Response Review Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Response Review Panel. A student may not serve as chair of the Hearing Panel or Response Review Panel.

- c. The Administrator (or designee) will serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations.

9. Pre-hearing procedures. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator will ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- a. Suggested questions for the panel to ask the respondent or the complainant.
- b. Written discussion or argument addressing the information contained in the final report.
- c. Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the final report only if the information was not available prior to the completion of the final report or if the information was provided to the investigator prior to the completion of the investigation but the information was not included in the final report.

10. Hearing logistics

- a. The hearing will be held at the time and place listed in the notice.
- b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, members of the Hearing Panel, and others only if requested by DOS.
- c. Hearings may be held in person or using secure video conferencing software supported by the University. The University will make a single record of all hearings. Hearing Panel deliberations are not recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for response review or reversal of the Hearing Panel's decision. All parties will work with the Administrator for access to the software and a private secure space to use the software.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- d. All parties are invited to fully participate in the hearing. The administrator may grant any party the ability to attend the hearing, answer questions, and make a statement from behind a partition, from another room, or through another alternative method.
- e. The complainant, if any, may only be present during the portion of the hearing where the Hearing Panel questions the complainant, unless the Administrator determines in appropriate cases that the complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of the investigator. Neither the complainant nor the respondent is required to speak at the hearing.
- f. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator. Additional witnesses may be called by the chair after consultation with the Administrator if additional witnesses are necessary for the Hearing Panel to properly resolve the case. The intention of the Code is that the final report, in most cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the final report.
- g. Only the chair of the Hearing Panel may ask questions during the hearing and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing if the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.
- h. The hearing will generally be conducted as follows:
 - i. Introductions to those present
 - ii. Summary of the hearing process
 - iii. Explanation of the charges against the respondent

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- iv. Opening statement by the complainant (if applicable) addressing the final report and the allegations that the respondent violated the Code.
- v. Opening statement by the respondent addressing the final report and the allegations that the respondent violated the Code.
- vi. Questions, if any, by the Hearing Panel chair for the investigator(s) or the parties.
- vii. Final statements by the parties.
- viii. All parties dismissed, and the recording of the hearing is stopped.
- ix. Hearing Panel deliberation.

11. Hearing Panel decision.

- a. All Hearing Panel decisions will be made by a majority vote.
- b. In making its decision, the Hearing Panel will consider all relevant information from the following sources:
 - i. The final report, including the findings and conclusions contained in the report.
 - ii. Any written information provided by the parties as provided above.
 - iii. The information received at the hearing.
- c. The Hearing Panel should adopt the findings and credibility analysis contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different finding. Any findings issued by the Hearing Panel must be based on a more likely than not standard.
- d. The Administrator will also serve as a resource to the Hearing Panel, including to help ensure that outcomes are reasonably consistent among similar cases. If the Hearing Panel determines that a respondent is responsible for a violation of this Code, the Administrator will inform the panel of any previous conduct violations or other relevant disciplinary actions involving the respondent.
- e. The Hearing Panel will not consider previous findings in any legal or campus proceeding when determining responsibility for violation of this Code. The Hearing Panel may consider such previous findings solely when determining outcomes after a finding of responsibility is made.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- f. The Hearing Panel will issue a written decision within 10 days after completing deliberations. If the Hearing Panel needs additional time to issue the written decision, the Administrator will notify the parties. The panel chair will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
- g. The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:
 - i. The investigator failed to properly investigate the allegation and the failure was substantial and impacted the decision. or
 - ii. There is new information that could substantially affect the decision and the new information could not have been discovered before the issuance of the final report.

F-8. Response to the Formal Resolution Process Decision

- a. Any party may respond to the Formal Resolution Process decision, whether it was made by the Administrator or the SCB.
- b. Responses are not limited to arguments that the Hearing Panel decision should be overturned or modified but can be statements in support of the findings using the factors for response established below. That is to say, the Response is an opportunity to argue in favor of, or against, the decision based on the specific listed factors.
- c. Outcomes imposed by the Hearing Panel will not go into effect until either the deadline for a response has expired and no response has been filed or until the decision is upheld after response. However, the Administrator may impose any outcome issued by the Hearing Panel as an interim action pending the response review.
- d. Any party may submit a response to the Administrator's, Hearing Officer's, or Hearing Panel's final decision. Responses must be submitted in writing to the Administrator and must set forth the grounds for the response. The response must be filed no later than five days after the decision is delivered to the parties. Responses are to be directed to the University and will not be provided to other parties in the case, if any. There is no expectation that the response be of a certain level of formality or read like a legal filing.
- e. Responses are limited to the following grounds:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. A conflict of interest by a decision maker that significantly impacted the outcome of the hearing or a procedural error in the investigation process that significantly impacted the outcome of the hearing.
2. New information, unavailable during the investigation or hearing, or information that was technically available but for which no reasonable person would have sought that information in advance of the hearing, as the need for the information or its evidentiary value did not reasonably arise until during the hearing, and that would likely have substantially impacted the original finding or outcome if known.
3. The outcomes imposed are substantially disproportionate to the severity of the violation. Note that the imposition of an administrative fee is not a outcome, and therefore cannot be reversed or modified.

f. A response review will be limited to a review of the decision, the final report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and- any written materials submitted with the response. Where a response is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the decision and whether the new information would likely have substantially impacted the original finding or outcome if known.

g. Response review procedure

1. The chair of the SCB will appoint three to five members of the SCB to serve on the Response Review Panel and will designate one member to serve as chair of the Response Review Panel. Any member who served on the Hearing Panel will not serve on the Response Review Panel on the same case. A student may not serve as chair of a Response Review Panel.
2. The Response Review Panel will issue a written decision. The decision should be issued within 15 days of receiving the response or responses. The chair of the Response Review Panel will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
3. The Response Review Panel may:
 - a. Uphold the Administrator's, Hearing Officer's, or Hearing Panel's decision.

- b. Uphold the finding that the respondent violated the code but revise the outcome(s).
- c. Return the matter for reconsideration. or
- d. Return the matter for additional investigation.

h. Unless the case is returned for reconsideration or to the investigator for additional investigation, the decision of the Response Review Panel is the final institutional decision. If the decision upholds the finding that the respondent violated the Code, the outcomes imposed will go into effect immediately.

F-9. Supplemental process and standards applying to allegations of academic dishonesty

- a. Academic dishonesty allegations are processed following the Conduct Resolution Processes in this Code. Following a report to DOS of instances or concerns of academic dishonesty, DOS will investigate the incident and will determine if there is a code violation, resulting in potential outcomes intended to address acts of academic dishonesty. Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under this Code there is a finding of responsibility for academic dishonesty/misconduct.
- b. The following information supplements the resolution processes in cases of academic dishonesty:
 - i. When the alleged academic dishonesty is discovered by the instructor, the instructor will notify the student of the allegation of academic dishonesty and will notify DOS.
 - ii. DOS receives the report and communicates with the instructor on the process of resolving the complaint.
 - iii. The instructor will have an opportunity to provide additional information regarding the allegation.
 - iv. DOS will meet with the student and may seek additional information from the instructor.
 - v. The instructor is included in the following communication with the student: the notice of allegation and decision letter.
 - vi. If the student chooses an informal process, DOS will meet with the student and provide an informal decision, consistent with policies, progressive discipline, and other previous and similar examples of academic dishonesty. The outcome of an informal process is not eligible for Response Review.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- vii. If the student chooses a formal process, the hearing officer will conduct a formal investigation and will interview the instructor and other witnesses as part of the investigation.
- viii. In disciplinary cases involving allegations of academic dishonesty, a majority of the Hearing Panel or Response Review Panel should be faculty members.
- ix. The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.
- x. The resolution decision of DOS, subject to the Response Review process outlined in this Code, is final.
- xi. In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of "incomplete" until the process is complete.
- xii. In situations where the instructor is no longer in their position prior to the completion of the conduct process, the instructor of record or the chair of the department may be asked to step in to finish the conduct process and the instructor may coordinate the final grade based on the totality of the academic performance.

F-10. Outcomes.

a. Outcomes may be imposed for any student determined to have violated the Code. Possible outcomes include, but are not limited to:

- **Warning:** Written notice to the student.
- **Probation:** Written reprimand accompanied by a probationary period during which the student must not violate the Code to avoid more severe disciplinary outcomes.
- **Loss of privileges:** Denial of specified privileges for a designated period of time.
- **Restitution:** Compensation for loss, damage, or injury. This may take the form of appropriate service or monetary or material replacement.
- **Educational outcomes:** Completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.
- **Deferred suspension:** The last opportunity before being suspended, which remains in place until the natural end of the academic relationship with the University.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- **Housing suspension:** Separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.
- **Housing expulsion:** Permanent separation of the student from University Housing.
- **University suspension:** Separation of the student from the University for a definite period, after which the student is eligible to return. Conditions for return may be specified.
- **University expulsion:** Permanent separation of the student from the University.
- **Revocation of admission:** Admission to the University may be revoked .
- **Revocation of degree:** A degree awarded from the University may be revoked.
- **Withholding of degree:** The University may withhold awarding a degree otherwise earned until the completion of all outcomes imposed.

b. More than one of the outcomes listed above may be imposed for any single violation.

c. A student who fails to comply with the outcome(s) imposed will have a disciplinary hold placed on their record until the student complies with all outcome(s) imposed.

d. Disciplinary outcomes other than suspension, expulsion or revocation or withholding of a degree will not be made part of the student's permanent academic record but will become part of the student's disciplinary record. Such outcomes will be expunged from the student's disciplinary record seven years after final disposition of the case unless the University is legally required to maintain them for a further time.

G. MISCELLANEOUS

G-1. Role of an advisor. In accordance with the educational purpose of the Code, all students, including respondents and complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any response. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of the University official

conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student or make a presentation on behalf of the student.

G-2. Administrative fee. Any time a student is found to have violated the Code, except in situations where the hearing officer issues only a warning, the hearing officer may charge the student an administrative fee of \$150. This is not considered an outcome and will not be a subject of a response review.

G-3. Parent notification. The University may notify parents of students under the age of 21 when a student has been found to have committed a drug- or alcohol-related violation. This is not considered an outcome and may not be a subject of a response review. The decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

G-4. Training. All members of the SCB, the Administrator, and the investigators will receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, as well as all applicable federal and state laws.

G-5. Timeframe. With the exception of deadlines for requesting a hearing before the SCB (see section F.7) or for filing a response (see section F.8), all other timeframes contained in the Code are suggested timeframes. While the timeframes should be followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for response review or reversal of any decision.

G-6. Interpretation. Any question of interpretation regarding the Code or these procedures will be referred to the Administrator or their designee for final decision.

G-7. Disclosure. The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of Title 18, United States Code), incest, or statutory rape, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the reporting victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim will be treated as the victim for purposes of this paragraph.

G-8. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

G-9. Review by Board of Regents: Board of Regents review of a final institutional decision to the Board of Regents is governed by Idaho State Board of Education Governing Policies and Procedures Section III.P.17.

Version History

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

Amended October 2023: Interim policy. Changes to B-2 to clarify jurisdiction of OCRI, added definition of protected status, changes to E-4 regarding prohibited harassment and E-5 regarding discrimination and retaliation.

Formatted: Font: Not Bold

Amended August 2023. Editorial and legal edits.

Amended August 2023: Interim policy. Complete rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct were combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. FSH 2400 was deleted. Procedure related to Title IX sexual harassment was removed to align with the recently revised FSH 6100.

Amended July 2021. Editorial changes.

Amended July 2014. All disciplinary language from FSH 2300 Student Code of Conduct was consolidated into FSH 2400 and updated removing redundancies in policy.

Amended July 2009. Editorial changes.

Amended January 2007. Reformatted the Student Code of Conduct into subsections for easier management of judicial cases

Amended July 2005. Revised Article II, Section 2.

Amended July 1998. Revised Article II.

Amended July 1993.

Amended July 1992.

Adopted July 1970.

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://www.uidaho.edu/governance/policy>

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Comprehensive review? _x_Yes __No

- Policy/Procedure Statement:** Briefly explain the reason for the proposed change. Comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.

The following are the major changes to the policy:

- The policy was rewritten using language more accessible and understandable for students.
- The Code of Conduct and conduct process were combined in a single policy for ease of use.
- Removed processes related to Title IX sexual harassment to align with the recently revised FSH 6100.
- Added clarifying language around academic dishonesty resolution.
- Added language aligning with case law to follow best practices in student conduct policies.
- Added a section on free speech.

- Fiscal Impact:** What fiscal impact, if any, will this change have?

No direct impact.

- Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 2400

STUDENT CODE OF CONDUCT & RESOLUTION PROCESS

CONTENTS:

- A. Introduction**
- B. Purpose**
- C. Scope**
- D. Definitions**
- E. Prohibited conduct**
- F. Conduct resolution process**
- G. Miscellaneous**

A. Introduction

A-1. The University of Idaho is committed to creating and maintaining a productive living-and-learning community that fosters the intellectual, personal, cultural, and ethical development of its students. Self-discipline and respect for the rights and privileges of others are essential to the educational process and to good citizenship. Student expectations include:

- Students are expected to show respect for order, civility, and respect for the rights of others within and without the University as these attributes are demanded of good citizens.
- Students are expected to uphold the rights and dignity of others regardless of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation or gender identity..
- Students are expected to uphold the integrity of the University as a community of scholars in which free speech is available to all and intellectual honesty is demanded of all.
- Students are expected to respect University policies as well as local, state, and federal law.

A-2. The University of Idaho conduct process works to balance the safety and security of the members of the University of Idaho community through personal accountability, reflection, and growth. Students have an opportunity to reflect on their choices, understand how their actions have an impact on those around them, and grow from the experience.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

A-3. The University strives to provide a fair and consistent student conduct process based on university policy and best practices. By educating students to better understand how their decisions affect themselves and their community they learn reflection, follow-up, and accountability. The Dean of Students Office collaborates with campus and community partners to provide resources and support to students.

B. Purpose

B-1. The Student Code of Conduct & Conduct Resolution Process (“the Code”) contains prohibited student conduct and regulations for addressing reports of of such conduct in a manner consistent with the requirements of procedural due process. In addition to the general expectations for conduct as set forth in this chapter, it contains a description of prohibited conduct.

B-2. The Dean of Students or their designee (referred to collectively in the Code as “the DOS”) has primary authority and responsibility for the administration of the Code, except that the Director of the University’s Office of Civil Rights and Investigations (“OCRI”) has primary authority and responsibility for the administration of prohibited student conduct that includes allegations of discrimination, as defined in the Code. We invite you to learn more about the interplay between the Code and OCRI’s policies, procedures, and processes by visiting [OCRI’s website](#) or directing inquiries to ocri@uidaho.edu.

The DOS, upon finding, in its discretion, that there is a conflict of interest, or for other reasons necessary to effectuate the policy, may appoint an external person to serve in any of the roles created in the Code. The Dean of Students works with faculty, staff, hearing officers, and/or the student conduct board in the disposition of Student Code of Conduct violations. There is no standard discipline that applies to violations of the Student Code of Conduct. In deciding the outcome in each situation, the Dean of Students will consider, among other factors, the nature and seriousness of the behavior, the motivation underlying the behavior, and precedent in similar cases.

B-3. The Code does not restrict protected speech, even speech that some may find objectionable. The interplay between freedom of speech and expectations for students is complex and we invite you to learn more about freedom of speech and the Dean of Students office student conduct processes as they relate to freedom of speech by directing inquiries to askjoe@uidaho.edu.

B-4. The University bears the burden of proving that a student engaged in misconduct by a preponderance of evidence. A “preponderance of evidence” means that quantity and quality of evidence which, when fairly considered, produces the stronger impression, and has the greater weight, and is more convincing as to its truth than the evidence in opposition – or in other words, the facts as determined by the Hearing Officer or Board indicate that it is more likely than not that the student violated the Code. Formal rules of evidence applied in courtroom proceedings do not

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

apply to this process. Evidence that is determined to be relevant to a case, by the Hearing Officer, Administrator, or Board Chair, is admissible at a hearing. This may include direct evidence, circumstantial evidence, documentary evidence, hearsay evidence, and signed statements. Admitting evidence does not imply that the evidence carries specific level of weight, including persuasiveness and credibility. Unduly repetitive information is not relevant.

B-5. The administration of the Student Code of Conduct and Student Conduct Process applies affirmative action and equal opportunity standards consistent with FSH 3060 and 3065. Additionally, the Code is supported by nondiscrimination practices and definitions in FSH 3200, 3210, 3215, and 6100.

C. Scope

C-1. Individuals subject to the Code

a. Students

1. By enrolling at the University of Idaho, students voluntarily accept responsibility for compliance with all University policies including the Code.
2. Students are responsible for their behavior from time of admittance to the University through the awarding of a degree, even though conduct may occur before classes begin or after classes end. Students are responsible for their conduct during the academic year and during periods between enrollment terms.
3. The University recognizes that students may also be employees, and their conduct may be subject to review and discipline under the Code and any applicable employment policies.

b. Reporting parties. Employees and students who are reporting student behavior that may be prohibited by the Student Code of Conduct.

c. Other. Employees and students who are otherwise involved in the conduct process.

C-2. Behavior subject to the Code

a. The Code applies to conduct that occurs on University property, within or at University-sponsored activities, off campus, online, or through other electronic means.

b. The University may address off-campus behaviors when the Dean of Students determines that the off-campus conduct affects a University interest. University interests include but are not limited to health and safety, protection of rights or property of others and promoting the University's mission.

c. Jurisdiction for the DOS to address student behavior or misconduct begins upon admission and ends at commencement. If serious misconduct was committed while a student was enrolled but is reported after graduation, the University may invoke the disciplinary process referred to in Article III and may revoke the student's degree if they are found responsible.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- d. If a student withdraws from school while a conduct matter is pending, the Code remains applicable to the student's conduct prior to withdrawal.
- e. The University reserves the right to proceed with the conduct process in a student's absence or to delay the process until the student seeks re-enrollment.
- f. Depending on conduct process outcomes, a hold may be placed on the student's ability to re-enroll and the student may be required to satisfy all outcome requirements prior to re-enrollment eligibility.
- g. Behavior conducted online, or through any other electronic medium, including online postings, video, photographs, blogs, web postings, chats, and social networking sites is in the public sphere and is not private and falls within the jurisdiction of the Code provided the other criteria, e.g., student status, are satisfied.
- h. If the prohibited conduct involves a student organization, the individual students are subject to the Code, and the organization is subject to FSH 2350 Student Organization Code and Resolution Process.
- i. DOS encourages all behavior to be reported in a timely manner but understands that barriers may exist to reporting prohibited behavior and that some reported behavior warrants DOS review for conduct proceedings even if the reported behavior occurred well in the past. DOS has discretion to initiate conduct proceedings for all reported behaviors, regardless of time of occurrence, based on the nature of and totality of the circumstances.

D. Definitions. The following definitions explain the terminology used in the Code. Particular code violations are listed and defined in Section E Prohibited conduct.

D-1. Academic dishonesty: Intentional participation in deceptive practice in one's academic work or the academic work of others. Examples include cheating, fraud, plagiarism, or falsification of research results and are individually addressed and more fully defined in Article II .

D-2: Academic outcome: A consequence imposed by instructors for findings of academic dishonesty. Academic outcomes include, but are not limited to, grade adjustments, failing a class, or resubmission of academic work.

D-3: Academic work: Any academic work required for completion of academic requirements in a course. Academic work includes but is not limited to assignments, quizzes, examinations, problem solving, class exercises, and/or drafts of work.

D-4: Administrator: The Dean of Students or designee will serve as the administrator. The administrator can serve as a decision-maker and is the non-voting advisor to the Student Conduct Board and each SCB hearing panel.

D-5: Advisor: The person of the student's choosing who has agreed to

advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

D-6: Complainant: An individual who is alleged to have been subjected to conduct that could constitute prohibited conduct under the Code. There may be more than one complainant for an incident. In certain circumstances, the Dean of Students or another University official may initiate a resolution process under the Code against one or more respondents on behalf of the University where there is not a complainant in the incident, the complainant(s) is(are) unknown, or the complainant(s) does(do) not wish to participate in the resolution process. Initiating a resolution process under the Code does not suggest that the allegations are credible or have merit or that there is evidence sufficient to determine responsibility. The Dean of Students or other University official who initiates the resolution process does not become a complainant or other party to the resolution process and still serves free from bias or conflict of interest for or against any party in the process.

D-7: Conduct decision: A written decision determining the resolution of the reported behavior. The decision will include a finding of responsible or not responsible and any applicable outcomes.

D-8: Conduct record: The student conduct record maintained by the Dean of Students in connection with a reported or substantiated violation of the Code. The student conduct record may include complaints, notices, hearing records, conduct findings, outcomes, and other documents deemed relevant by the Dean of Students.

D-9: Consent: Knowing, voluntary, and clear permission by word or action to engage in activity with another individual(s), not limited to sexual activity. Consent can be withdrawn at any time upon notice, by word or action, to the other party.

D-10: Days: Days that the University is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

D-11: DOS: The Office of the Dean of Students, which is responsible for the administration of the Student Code of Conduct and includes the Dean of Students and their designees.

D-12: Educational setting: All academic, educational, extracurricular, athletic, and other programs of the University of Idaho, regardless of location, and including online formats.

D-13: Finding: A conclusion reached as result of an inquiry, investigation, or hearing and is also referred to as a decision.

D-14: Formal resolution process: A conduct process by which notice and opportunity to be heard is provided and that often includes a student conduct process occurring before a Hearing Officer or Student Conduct Board which issues a written decision following the hearing.

D-15: Hearing: A formal process maintained by the University to review and address allegations of violations of the Code that follows the process and rules outlined in the Code but is not subject to other external rules (such as federal or state evidentiary rules or procedures).

D-16: Hearing officer: A person appointed by the Administrator to serve as the person presiding over a hearing. The hearing officer investigates the alleged behavior and administers the conduct process for informal resolutions. The Administrator may also serve as the hearing officer.

D-17: Hearing panel: A panel composed of members of the Student Conduct Board, who are selected by the Student Conduct Board chairperson for purposes of hearing a formal resolution process and issuing a written decision that may include findings of responsibility of Code violation.

D-18: Informal resolution process: An alternative method of resolving a matter under the Code, entered into voluntarily by all parties and the University, that seeks to address and resolve the alleged conduct or harm without the use of the formal resolution process outlined below.

D-19: Instructor: In cases of academic dishonesty, the instructor may be the faculty member, teaching assistant, or other employee responsible for course instruction.

D-20: Investigator: The person assigned by the University to investigate a report of a violation of the Code.

D-21: Mediation: An intervention between conflicting parties to promote reconciliation, settlement, or compromise.

D-22: Misconduct: Behavior that is prohibited by the Student Code of Conduct or that violates a University directive or policy.

D-23: Office of Civil Rights & Investigations (OCRI): The Office at the University that is responsible for ensuring compliance with federal and state laws and University policies related to discrimination or harassment based on a protected class. This includes retaliation when engaging in a protected process. OCRI undertakes necessary investigations and prepares recommendations and written reports that may be reviewed by the DOS for further conduct processes related to the underlying facts investigated and the nature of the reported behaviors of students investigated by their office.

D-24: Outcome: Disciplinary or corrective action imposed by the deciding body of a student conduct process following a finding of student misconduct. The term includes, but is not limited to, educational programming, restitution, community service activities, apology letters, probation (including denial of specified University privileges), suspension, termination, or other such outcomes deemed appropriate.

D-25: Parties: The Respondent(s) and the Complainant(s).

D-26: Policy: The written regulations of the University as found in, but not limited to, the Faculty Staff Handbook, including the Student Code of Conduct, the Administrative Procedures Manual, the Residence Hall Handbook, all Housing and Residence Life policies, and Graduate and Undergraduate Catalogs.

D-27: Protected Status: Protected status includes race, color, religion, national origin, age, protected military status, disability, family status, genetic information, creed, or sex (including pregnancy, parenting, sexual orientation, or gender identity or expression).

D-28: More likely than not standard: The standard of evidence that is used to decide responsibility of Code violation in a hearing, it means that it is more likely than not, based upon the totality of all relevant evidence and reasonable inferences from the evidence, that there is a violation of the Code.

D-29: Probation: The process or period of observing the character or abilities of a student to determine whether other corrective action should occur. An additional resolution process is not necessary to modify outcomes following a finding of misconduct where probation is imposed. The DOS has discretion to modify the terms of probation as necessary based on the information available to the DOS during a student's probation.

D-30: Respondent: The student who is alleged to have violated the Code.

D-31: Student: Includes, but is not limited to, all persons admitted to the University, either full time or part time, online or in person, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

- a. Persons who are suspended, or those who withdraw or graduate after allegedly violating the Code of Conduct.
- b. Persons who are eligible to enroll for classes without applying for re-admission.
- c. Individuals participating in the American Language and Culture Program,

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

Independent Study of Idaho sponsored by the University of Idaho, the University of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

D-32: The Code: The Student Code of Conduct and Conduct Resolution Process.

D-33: Student Conduct Administrator (Administrator): The University of Idaho official designated by the DOS to serve as an investigator or hearing officer. It will also include the Administrator's designee.

D-34: Student Conduct Board (SCB): The formal body that reviews student conduct matters, as set forth in the Code.

D-35: Weapon: Weapon is defined in APM 95.12.

E. Prohibited conduct. Specific behaviors of misconduct are identified and defined below.

E-1. Academic dishonesty. Acts of academic dishonesty include but are not limited to the following:

- a. **Cheating.** Cheating includes, but is not limited to, the following actions as they relate to academic work:
 - 1. Using, purchasing, providing, or possessing unauthorized materials, sources, or assistance without authorization from the instructor.
 - 2. Copying from another's academic work either for the student's own use or for the use of others.
 - 3. Sharing academic work without prior permission from instructor.
 - 4. Acquiring, without written or verbal permission, tests or other academic material belonging to the instructor or another member of the University faculty or staff.
 - 5. Completing academic work for someone else or having someone else complete academic work on your behalf.
 - 6. Representing another student in a class for attendance or participation purposes or asking another person for representation for attendance or participation purposes.
 - 7. Fabrication or falsification of data, research or academic content and the unauthorized alteration or invention of any information or citation.
 - 8. Forging, altering, reproducing, removing, destroying, or misusing any University document, record, or instrument of identification.

b. **Plagiarism.** Plagiarism includes, but is not limited to, the following:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. Using, by paraphrase or direct quotation, the published or unpublished work of another person without full and clear acknowledgment.
 2. The unauthorized alteration or invention of a citation.
 3. Buying or selling academic work for the purpose of submitting it for course completion.
 4. Submitting academic work, or any part of academic work, completed for one course as work for another course without the express prior approval of both instructors.
- c. **Prohibited behavior.** Engaging in any behavior related to course completion prohibited by the instructor or otherwise including but not limited to unauthorized collaboration and reliance on prohibited technological assistance/artificial intelligence tools.
- d. **Misrepresenting facts for academic advantage.** Examples include but are not limited to providing false academic achievements and false medical documentation for academic extensions.
- e. **Violation of University policy regarding intellectual property and research.** All data acquired through participation in University research programs is the property of the University and must be provided to the principal investigator. In addition, collaboration with the Office of Research and Economic Development for the assignment of rights, title, and interest in patentable inventions resulting from the research is also required. See FSH 3200 and 5400.

E-2. Disruption or misuse of University resources or property. This behavior includes but is not limited to the following:

- a. **Theft or damage.** Attempted or actual theft of or damage to University property.
- b. **Unauthorized possession.** Unauthorized possession, duplication, or use of University keys, lock combinations or other access codes or passwords that can be used to access University property or facilities.
- c. **Unauthorized entry or use.** Unauthorized entry into or use of any University owned or managed building, space, outdoor area, or property. This also includes other restricted areas identified in APM 35.35.
- d. **Violation of law or other policy.** Violation of local, state, federal or campus fire policies including but not limited to:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. Building or setting fire(s) without proper authorization as required by APM 35.25.
2. Removing or otherwise tampering with fire equipment or fire alarm systems.
3. Failure to promptly vacate a building
4. Intentionally or recklessly causing a fire that damages University or personal property or causes injury.
5. Causing, making, or circulating a false report or warning of fire, explosion or another emergency.

E-3. Misuse of technology resources. Theft or other abuse of University computer facilities or resources. This includes but is not limited to the following:

- a. Interfering with the normal operation of the University computing system or resources.
- b. Inappropriate or disproportionate use of an IT resource owned or controlled by the University.
- c. Any violation of APM 30.12 [University Acceptable Use of Technology Resources](#).

E-4. Threat of harm or actual harm to a person's physical or mental health or safety. This behavior includes but is not limited to the following:

- a. **Behavior involving physical force or threat of physical force.** Behavior involving physical force that hurts another person or intimidation or threat of such force directed at another person where a reasonable person would believe the threat to be serious and imminent in nature. It includes the following:
 1. **Fighting.** Engaging in violence, combat, or aggression.
 2. **Assault.** Behavior intended to cause apprehension of harmful or offensive contact that causes apprehension of physical safety of another. The act required for an assault must be overt. Although words alone are insufficient, they may create an assault when coupled with some action that indicates the ability to carry out the threat and it creates a fear of it being carried out in the person the assault behavior is directed at.
 3. **Battery.** Actual and intentional unwanted touching or contact with another person, even if the physical injury is slight.
 4. **Use of a knife, gun, or other weapon.** The use of a knife, gun, or other weapon except in reasonable self-defense in any act of violence as defined in the Code.
 5. **Involuntary restraint or transport.** Restraining or transporting a person against their will.

6. Other. Any action that threatens or endangers the physical health or safety of any person.

b. Prohibited harassment

1. General definition. Prohibited harassment is hostile or threatening conduct or speech, whether verbal, written, or symbolic, that is sufficiently severe or pervasive, as viewed by a reasonable person under similar circumstances and with similar identities to the victim, and results in an objectively hostile or threatening environment that interferes with or diminishes another's ability to participate in or benefit from the services, activities, or privileges provided by the University.

2. Exception. Speech that is protected by the First Amendment to the United States Constitution, including relevant academic speech spoken in a classroom or writing assignment, protests and statements that do not meet the narrow definition described above, is not a violation of the Code, though it may go against community norms and may be harmful or hurtful to other members of the University community or members of certain groups.

c. Threatening or intimidating behavior. Threatening or intimidating behavior includes, but is not limited to:

1. Coercion. The practice of persuading someone to do something by using force or threats.

2. Bullying. Behavior seeking to harm, intimidate, or coerce another.

3. Deliberate destruction of or damage to property. Deliberate destruction of or damage to public or private property, where a reasonable person would believe that the full or partial intention of the act is to harass an individual or a group based on protected characteristics as defined in [FSH 3200 Policy of Nondiscrimination](#).

d. Hazing. Hazing includes, but is not limited to, any action or participation in any activity that (i) causes or intends to cause physical or mental discomfort or distress, (ii) may demean any person, regardless of location, intent, or consent of perpetrators or victims or (iii) destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in, a group or organization. The express or implied consent of the victim will not be a defense. Apathy or acquiescence in the presence of hazing are not neutral

acts. They are also violations of this rule.

Hazing also includes any activity that compels a student to participate in any activity that is unlawful, publicly indecent, or contrary to the policies and regulations of the University, or any activity that unreasonably and materially interferes with a student's academic efforts.

E-5. Discrimination and retaliation.

- a. Discrimination.** Limiting or denying services, benefits, or opportunities of the University based on a protected status. Examples of prohibited discrimination can be found on the [OCRI website](#) or by directing inquiries to ocri@uidaho.edu.

A person can engage in prohibited discrimination even if the person has the same protected status as or does not mean to offend the target(s) of the conduct. Alleged discrimination will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processes.

Discrimination includes:

1. Conduct prohibited by the Code, if based on a protected status, including harassment as defined in paragraph E-4.a, above.
2. Retaliation, as defined in paragraph E-5.b, below, when the protected activity is based on a protected status.
3. Different treatment discrimination, meaning intentionally treating an individual or group differently based on a protected status.
4. Disparate impact discrimination, meaning evenhandedly implementing a facially neutral practice or rule in a way that has an adverse impact on one or more individuals based on a protected status.

- b. Retaliation.** Retaliation includes conduct that intimidates, interferes with, threatens, coerces, or otherwise discriminates against any individual because that individual opposes or reports a perceived wrongdoing, inequity, or violation of law or University policy, files a complaint alleging illegal or prohibited discrimination or violation of law or University policy, participates in a University grievance or response procedure, or participates in a University dispute resolution process. Alleged retaliation when the activity is based on a protected status will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processes.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

E-6. Disruption, obstruction, or interference with normal University activities.

Members of the University community have the right to a campus that is free from unreasonable disruption, obstruction, or interference. Disrupting or obstructing normal University activities, including, but not limited to, all academic activities, University programming, athletic events, and administrative functions is prohibited. Examples include:

- a. Classroom disruption: Behavior that interferes with the teaching or learning process in the classroom or educational setting and continues after an instructor's request to cease.
- b. Obstruction of the free flow of pedestrian or vehicular traffic on campus.
- c. Conduct that is lewd, indecent or disruptive that is not otherwise constitutionally protected speech.
- d. Falsifying, distorting, or misrepresenting information provided to the University.
- e. Interference with the student conduct system, which includes, but is not limited to, any of the following:
 - 1. Failure to cooperate with the University's investigation or disciplinary proceeding. If a party in a case does not want to participate because they believe that doing so would cause them to speak or offer evidence against themselves, and they notify the DOS that this is the reason they are choosing not to participate or only to participate partially, this violation will not apply.
 - 2. Disrupting or interfering with the University's investigation and student conduct proceedings.
 - 3. Making false allegations.
 - 4. Attempting to discourage an individual's proper participation in, or use of, the student conduct process.
 - 5. Harassment (verbal, physical, written, or electronic) or intimidation of any person participating in the University's investigation prior to, during, or after the investigation and conduct process concludes.
 - 6. Failure to comply with the outcome(s) imposed pursuant to the disciplinary process.
- f. Influencing or attempting to influence another person to commit any violation of the Code.
- g. Engaging in speech, including but not limited to verbal, electronic, or written communication, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

E-7. Use and Misuse of Substances

a. Smoking. Smoking in violation of APM 35.28.

b. Drugs and controlled substances

1. Using, possessing, manufacturing, cultivating, selling, or distributing any state or federally controlled drug, designer/synthetic drug, or substance, including, but not limited to, cannabis, heroin, narcotics, or other controlled substances, in violation of any applicable law or University policy.

2. Possessing or using any paraphernalia used for drug consumption. Paraphernalia includes but is not limited to bongs, bowls, pipes, or any homemade smoking device.

3. Using, possessing, selling or distributing prescription or over-the-counter medications by an individual for whom it was not prescribed.

4. Inhaling or ingesting any substance (e.g., nitrous oxide, glue, paint, etc.) that is intended to alter a student's mental state without a prescription.

5. A violation may also occur when the odor of an illegal or controlled substance or drug is present when more than one individual can reasonably trace it to a specific individual.

c. Alcohol

1. Consuming, possessing, manufacturing, or distributing alcoholic beverages in violation of any applicable law or University policy (see APM 80.01 for alcohol permit requirements and APM 95.31 for alcohol policy).

2. For persons under 21, the use or possession of alcoholic beverages. public intoxication or excessive consumption of alcohol. disorderly or irresponsible conduct resulting from consumption of alcohol.

3. For persons over 21, the use or possession of alcohol in public areas where alcohol is not permitted. excessive consumption of alcohol resulting in disorderly or irresponsible conduct.

4. Selling, distributing, or furnishing alcohol to a person under 21 years of age.

E-8. Housing and living groups. Violations of any rules imposed by University Housing or living groups outlined in the Housing contract and Housing handbook.

E-9. Violation of University policy. Violation of published University policies, rules and regulations.

E-10. Violation of law. Any violation of federal law, state law, or local ordinance may be a violation of the Code, independent of the status of any civil or criminal litigation in court or criminal arrest and prosecution. Decisions made or outcomes imposed under the Code will not be subject to change because criminal charges

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

arising out of the same facts were adjudicated in a civil or criminal court process. The University will cooperate as appropriate with law enforcement and other agencies in the enforcement of criminal law and in the conditions imposed by criminal courts for the rehabilitation of student violators provided that the conditions do not conflict with University policies.

E-11. Furnishing false information, refusal to identify, and refusal to comply

- a. Furnishing false information or false representations to any person working for or authorized to act as an authority on behalf of the University.
- b. Refusal to identify oneself to an institutional representative in response to a request when on any University owned or managed property.
- c. Failure to comply with directions of a University official, law enforcement, fire department, or other government official acting in performance of their duties.
 1. Identification includes giving one's name, substantiated by a current driver license or student identification card or other official documentation, or by stating truthfully whether one is a student of the University or not.
 2. An institutional representative includes any employee, faculty member, or representative of the University, and any attorney, peace officer, or campus security officer of the University acting under the authority of the University.
- d. Using false identification or another individual's identification card to procure goods, entry or services.
- e. Submission of false information or withholding requested information at the time of admission or readmission.

E-12. Firearms, explosives, and other weapons. Possessing or using firearms, explosives, other weapons, projectile or explosive devices or substances, or dangerous chemicals in violation of APM 95.12, APM 35.34, or APM 35.35.

E-13. Disruption to community

- a. Attempted, threatened, or actual theft of or damage to another's property.
 - b. Unauthorized entry into or use of another's property.
 - c. Excessive noise, amplified sound, or music that produces a level of noise that disrupts members of the community
- F. Conduct resolution process**

F-1. Reporting alleged violations

- a. The DOS will accept reports from anyone with knowledge of potential Code violations. Reports must be made to the DOS. Reports of Title IX and related violations covered by [FSH 6100](#) will not be reviewed under the Code but will be accepted by DOS and then forwarded to the Title IX

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

Coordinator or other appropriate office for review. Allegations against Student Organizations will be addressed as per the Student Organization Code of Conduct, FSH 2350.

b. Reports should be in writing but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the incident takes place.

F-2. Initial review. The DOS or office assigned by DOS will conduct an initial review of reports of Code violations. The purpose of the review is to gather relevant information concerning each allegation and determine whether further investigation is warranted. When appropriate, the DOS will transfer the notice and investigation process to the Office of Civil Rights & Investigations (OCRI). The initial review may include interviewing the involved parties and witnesses without formal notice.

F-3. Notice of allegation.

- a.** Following the initial review, the hearing officer will determine whether to initiate the conduct resolution process. In order to initiate that process, the hearing officer will provide notice of reported Code violation(s) to the respondent.
- b.** The notice informs the respondent of the reported Code violations including a short description of the basis of the reported violation.
- c.** The notice may include resolution options if further investigation is not required. Resolution options are detailed in the Hearing Process section below. If further investigation is required, the notice will include details of the investigative process.
- d.** The notice will include a link to or copy of the Code.
- e.** The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.
- f.** If a respondent does not participate in the initial meeting, the hearing officer will make reasonable attempts to reach the respondent for five business days. If there is no response, the hearing officer will determine the appropriate resolution process.

F-4. Initial meeting. The hearing officer must give the respondent an

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.

F-5. Interim action and supportive measures.

- a. At any time before a final institutional decision, the Administrator, or designee, may impose restrictions on a student or separate the student from the University community pending the final institutional decision. If circumstances allow, the Administrator or designee should meet with the student prior to imposing the interim action.
- b. Other than issuance of no-contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when
 1. The Administrator determines that the student represents a threat of serious harm to any person.
 2. The student is facing allegations of serious criminal activity.
 3. The action is necessary to preserve the integrity of the investigation.
 4. The action is necessary to preserve University property or the action is necessary to prevent disruption of, or interference with, the normal operations of the University.
- c. After the hearing decision, pending any response review of the decision, the Administrator may impose an outcome issued by the Hearing Panel as an interim action at the discretion of the Administrator.
- d. Supportive measures are neutral actions intended to preserve the ability of the parties to continue their academic and other pursuits. Supportive measures may continue beyond the final resolution of the incident.
- e. Interim actions and supportive measures may include, but are not limited to, the following:
 - Suspension from the University pending a final institutional decision.
 - Issuance of a no-contact order.
 - Exclusion from University property.
 - Removal from the residence halls.
 - Removal from extracurricular activities, including participation on athletic teams.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- Withholding the award of a degree pending the conclusion of the investigation and hearing process.
- Requesting class section changes.
- Housing relocation (either temporary or permanent).
- Any other action deemed necessary and appropriate by the Administrator to maintain orderly and appropriate University operations.

f. When a student is suspended from the University, or directed not to attend certain classes, alternative coursework options may be pursued, with the approval of the Administrator and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.

g. An interim action must be issued in writing and is effective when the Administrator delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.

h. The respondent may submit a response to the issuance of any interim action by filing a response with the Administrator. There are no formal procedures for this response, and the interim outcomes remain in effect unless removed by the Administrator.

i. A violation of the provisions of an interim action will be considered a violation of the Code.

F-6. Informal resolution process: Decision by hearing officer

- a.** During the initial meeting, the respondent may be given an opportunity to resolve the complaint informally. All parties must mutually agree to engage in the Informal Resolution Process. The Informal Resolution Process may also be used when the respondent is not participating.
- b.** At any point in the Informal Resolution process, any party may request a Formal Resolution Process, described below. The hearing officer may refer a matter to Formal Resolution Process at any point during the Informal Resolution process.
- c.** In the Informal Resolution Process, the hearing officer determines based on the preponderance of the evidence whether the respondent is responsible for a code violation and determines the outcomes. The hearing officer will first meet with the parties (if applicable), share available information, and hear their response, if any. A respondent may also accept responsibility for a Code violation at any point in the

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

process. If the respondent accepts responsibility, the hearing officer will determine the outcomes.

- d. Informal Resolution decisions are not subject to response review.
- e. If the respondent does not participate and a decision is made through Informal Resolution, the respondent may request their case to be reopened. Requests must be made in accordance with the instructions in the outcome notice and received no later than five (5) days after that outcome notice. If the request is timely submitted, the hearing officer will offer to meet with the respondent. During that meeting the respondent can share information with the hearing officer. The hearing officer reserves the right to update the decision of responsibility and any applicable outcomes after meeting with the respondent. The hearing officer will notify the respondent within five (5) days whether the decision of responsibility or applicable outcomes have changed.

F-7. Formal resolution process: Decision by Administrator or Student Conduct Board

a. Investigation

- 1. The University will investigate the allegations. At any time during the investigation, either the complainant or the respondent may, but is not required to, provide information to the investigator for consideration. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask other Parties or other witnesses, etc. Except in the rare circumstances described in the Code, only information that is presented to the investigator may be used in a hearing.
- 2. The investigator will provide the interview summaries to all parties and witnesses to review and provide additional comments and clarifications. Comments must be received within five days of receiving the interview summaries. The investigator will revise the interview summaries based on relevant comments provided by the parties and witnesses.

b. Preliminary report review

- 1. At the conclusion of the investigation, the investigator will draft a Preliminary Report of Investigation (Preliminary Report). The

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

preliminary report will include the steps taken during the investigation., a list of witnesses contacted. a detailed summary of any witness interviews. a detailed summary of any interviews of the respondent or complainant (if applicable). a detailed summary of any other information considered as part of the investigation. and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the respondent or the complainant.

2. The Preliminary Report will not include any conclusions, findings of facts, credibility analysis, or recommended findings of responsibility of Code violation.
3. The parties will be provided an opportunity to review the Preliminary Report and may provide a written response to the Preliminary Report within five days of the review of the report. A party will be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.
4. After the time for submitting a written response to the Preliminary Report has passed, the investigator will review any responses received and determine whether additional investigation is needed. After addressing the responses, if any, the investigator will incorporate the responses into the final report.
5. The investigator has sole discretion of determining whether sufficient information has been obtained to end the investigation process.

c. Final Report of Investigation

1. The Final Report of Investigation (final report) will include the following:
 - Everything included in the Preliminary Report,
 - Complete copies of any timely-submitted written responses to the Preliminary Report,
 - A credibility analysis,
 - Findings of facts, and
 - Recommended findings of code of conduct violation

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

2. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The investigator may serve as the Administrator's designee to send out the final report to parties.
3. The credibility analysis is an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be part of the finding of facts. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.
4. The findings of facts will include a description of the basis for each finding. Each finding will be based on a more likely than not standard and will include a rationale based on supporting documentation or information such as information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the respondent, complainant and/or witnesses.
5. The recommended finding of responsibility includes the specific section of the code of conduct that was reportedly violated, which will not exceed the scope of the notice of allegation. The investigator will provide their assessment regarding the finding of responsibility based on the totality of the investigative report.

d. Review by Administrator

1. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The parties may submit a written response to the final report to the Administrator no later than five days after the final report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the final report.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

2. If all parties agree to the recommended findings of responsibility, the parties can request that the Administrator make a decision on applicable outcomes only, and forgo a request for a hearing. If parties do not agree with the recommended findings of responsibility, the decisions regarding findings of responsibility are made by either the Administrator or the Student Conduct Board (SCB).
3. Decisions regarding findings of responsibility are made either by the Student Conduct Board after a hearing or by the Administrator after their review. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the final report is provided to the parties. The Administrator may also decide to refer matters to the SCB.

e. Decision by Administrator

1. If a matter is not referred to the SCB for a hearing, the Administrator will decide whether the respondent violated the Code. The Administrator will make the decision based on the information contained in the final report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
2. The Administrator will adopt the findings of facts, credibility analysis, and recommended findings of responsibility of Code violation contained in the final report if the Administrator finds that they are more likely than not to be accurate. Any additional or different findings issued by the Administrator must be based on a more likely than not standard.
3. If the Administrator determines that the respondent violated the Code, the Administrator will determine the appropriate outcome.
4. The Administrator's decision will be in writing and include the basis for the decision. The written decision will be simultaneously provided to the parties.
5. The Administrator's decision may be subject to a response review in accordance with the Code.
6. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms

of appropriate alternative resolution. All parties must agree to participate with DOS in an alternative resolution process.

f. Hearing and Decision by Student Conduct Board

- 1. Student Conduct Board in general.** The description and makeup of the SCB can be found in FSH 1640.83.
- 2. Conflict of interest.** A member of the SCB will not serve on any Hearing Panel or Response Review Panel in any case where the member has a conflict of interest or bias for or against either party.
- 3. Training required.** A member cannot serve on either a Hearing Panel or Response Review Panel until the member has completed training as required by DOS.
- 4. Confidentiality.** Proceedings before the SCB, whether before a Hearing Panel or Response Review Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.
- 5. Notice of Hearing.** In matters referred to the SCB, the Administrator or designee must send written notice of the hearing to the SCB and the parties. The notice will include the following:
 - a. the specific provision(s) of the Code the respondent is accused of violating.
 - b. a short description of the basis of the alleged violation,
 - c. the date and time for the hearing, and
 - d. the deadline for submitting written materials to the Administrator.
 - e. a link to or copy of the final report and any responses to the final report which were timely submitted to the Administrator.

6. Scheduling

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

The hearing will be held no fewer than five days after the notice is provided to the parties, unless extended by the Administrator. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator will have the sole discretion as to whether to reschedule the hearing. Except in cases of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

7. Consolidation

If a report of a violation of the Code involves more than one respondent, the Hearing Panel will conduct a joint hearing with all respondents. However, the panel chair may permit the hearing pertinent to each respondent to be conducted separately. In joint hearings, separate decisions of responsibility will be made for each respondent.

8. Composition of the Hearing or Response Review Panel

- a. The chair of the SCB will appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.
- b. The chair of the SCB will appoint one of the Hearing Panel members to serve as chair of the panel. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Response Review Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Response Review Panel. A student may not serve as chair of the Hearing Panel or Response Review Panel.
- c. The Administrator (or designee) will serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations.

9. Pre-hearing procedures. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator will ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- a. Suggested questions for the panel to ask the respondent or the complainant.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- b. Written discussion or argument addressing the information contained in the final report.
- c. Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the final report only if the information was not available prior to the completion of the final report or if the information was provided to the investigator prior to the completion of the investigation but the information was not included in the final report.

10. Hearing logistics

- a. The hearing will be held at the time and place listed in the notice.
- b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, members of the Hearing Panel, and others only if requested by DOS.
- c. Hearings may be held in person or using secure video conferencing software supported by the University. The University will make a single record of all hearings. Hearing Panel deliberations are not recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for response review or reversal of the Hearing Panel's decision. All parties will work with the Administrator for access to the software and a private secure space to use the software.
- d. All parties are invited to fully participate in the hearing. The administrator may grant any party the ability to attend the hearing, answer questions, and make a statement from behind a partition, from another room, or through another alternative method.
- e. The complainant, if any, may only be present during the portion of the hearing where the Hearing Panel questions the complainant, unless the Administrator determines in appropriate cases that the complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

the investigator. Neither the complainant nor the respondent is required to speak at the hearing.

- f. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator. Additional witnesses may be called by the chair after consultation with the Administrator if additional witnesses are necessary for the Hearing Panel to properly resolve the case. The intention of the Code is that the final report, in most cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the final report.
- g. Only the chair of the Hearing Panel may ask questions during the hearing and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing if the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.
- h. The hearing will generally be conducted as follows:
 - i. Introductions to those present
 - ii. Summary of the hearing process
 - iii. Explanation of the charges against the respondent
 - iv. Opening statement by the complainant (if applicable) addressing the final report and the allegations that the respondent violated the Code.
 - v. Opening statement by the respondent addressing the final report and the allegations that the respondent violated the Code.
 - vi. Questions, if any, by the Hearing Panel chair for the investigator(s) or the parties.
 - vii. Final statements by the parties.
 - viii. All parties dismissed, and the recording of the hearing is stopped.
 - ix. Hearing Panel deliberation.

11. Hearing Panel decision.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- a. All Hearing Panel decisions will be made by a majority vote.
- b. In making its decision, the Hearing Panel will consider all relevant information from the following sources:
 - i. The final report.
 - ii. Any written information provided by the parties as provided above.
 - iii. The information received at the hearing.
- c. The Hearing Panel should adopt the findings of facts, credibility analysis, and recommended findings of responsibility of Code violations contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different conclusion. Any findings of responsibility of Code violation issued by the Hearing Panel must be based on a more likely than not standard.
- d. The Administrator will also serve as a resource to the Hearing Panel, including to help ensure that outcomes are reasonably consistent among similar cases. If the Hearing Panel determines that a respondent is responsible for a violation of the Code, the Administrator will inform the panel of any previous conduct violations or other relevant disciplinary actions involving the respondent.
- e. The Hearing Panel will not consider previous legal or campus proceedings when determining responsibility for violation of the Code. The Hearing Panel may consider such previous proceedings solely when determining outcomes after a finding of responsibility is made.
- f. The Hearing Panel will issue a written decision within 10 days after completing deliberations. If the Hearing Panel needs additional time to issue the written decision, the Administrator will notify the parties. The panel chair will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
- g. The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:
 - i. The investigator failed to properly investigate the allegation and the failure was substantial and impacted the decision. or
 - ii. There is new information that could substantially affect the decision and the new information could not

have been discovered before the issuance of the final report.

F-8. Response to the Formal Resolution Process Decision

- a. Any party may respond to the Formal Resolution Process decision, whether it was made by the Administrator or the SCB.
- b. Responses are not limited to arguments that the Hearing Panel decision should be overturned or modified but can be statements in support of the findings of responsibility of Code violations using the factors for response established below. That is to say, the Response is an opportunity to argue in favor of, or against, the decision based on the specific listed factors.
- c. Outcomes imposed by the Hearing Panel will not go into effect until either the deadline for a response has expired and no response has been filed or until the decision is upheld after response. However, the Administrator may impose any outcome issued by the Hearing Panel as an interim action pending the response review.
- d. Any party may submit a response to the Administrator's, Hearing Officer's, or Hearing Panel's final decision. Responses must be submitted in writing to the Administrator and must set forth the grounds for the response. The response must be filed no later than five days after the decision is delivered to the parties. Responses are to be directed to the University and will not be provided to other parties in the case, if any. There is no expectation that the response be of a certain level of formality or read like a legal filing.
- e. Responses are limited to the following grounds:
 - 1. A conflict of interest by a decision maker that significantly impacted the outcome of the hearing or a procedural error in the investigation process that significantly impacted the outcome of the hearing.
 - 2. New information, unavailable during the investigation or hearing, or information that was technically available but for which no reasonable person would have sought that information in advance of the hearing, as the need for the information or its evidentiary value did not reasonably arise until during the hearing, and that would likely have substantially impacted the original findings of responsibility of Code violation or outcome if known.
 - 3. The outcomes imposed are substantially disproportionate to the severity of the violation. Note that the imposition of an administrative fee is not a outcome, and therefore cannot be reversed or modified.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

f. A response review will be limited to a review of the decision, the final report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and- any written materials submitted with the response. Where a response is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the decision and whether the new information would likely have substantially impacted the original findings of responsibility of Code violation or outcome if known.

g. Response review procedure

- 1.** The chair of the SCB will appoint three to five members of the SCB to serve on the Response Review Panel and will designate one member to serve as chair of the Response Review Panel. Any member who served on the Hearing Panel will not serve on the Response Review Panel on the same case. A student may not serve as chair of a Response Review Panel.
- 2.** The Response Review Panel will issue a written decision. The decision should be issued within 15 days of receiving the response or responses. The chair of the Response Review Panel will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
- 3.** The Response Review Panel may:
 - i.** Uphold the Administrator's, Hearing Officer's, or Hearing Panel's decision.
 - ii.** Uphold the finding that the respondent violated the code but revise the outcome(s).
 - iii.** Return the matter for reconsideration. or
 - iv.** Return the matter for additional investigation.

h. Unless the case is returned for reconsideration or to the investigator for additional investigation, the decision of the Response Review Panel is the final institutional decision. If the decision upholds the finding that the respondent violated the Code, the outcomes imposed will go into effect immediately.

F-9. Supplemental process and standards applying to allegations of academic dishonesty

- a.** Academic dishonesty allegations are processed following the Conduct Resolution Processes in the Code. Following a report to DOS of instances or

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

concerns of academic dishonesty, DOS will investigate the incident and will determine if there is a code violation, resulting in potential outcomes intended to address acts of academic dishonesty. Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under the Code there is a finding of responsibility for academic dishonesty/misconduct.

- b.** The following information supplements the resolution processes in cases of academic dishonesty:
- 1.** When the alleged academic dishonesty is discovered by the instructor, the instructor will notify the student of the allegation of academic dishonesty and will notify DOS.
 - 2.** DOS receives the report and communicates with the instructor on the process of resolving the complaint.
 - 3.** The instructor will have an opportunity to provide additional information regarding the allegation.
 - 4.** DOS will meet with the student and may seek additional information from the instructor.
 - 5.** The instructor is included in the following communication with the student: the notice of allegation and decision letter.
 - 6.** If the student chooses an informal process, DOS will meet with the student and provide an informal decision, consistent with policies, progressive discipline, and other previous and similar examples of academic dishonesty. The outcome of an informal process is not eligible for Response Review.
 - 7.** If the student chooses a formal process, the hearing officer will conduct a formal investigation and will interview the instructor and other witnesses as part of the investigation.
 - 8.** In disciplinary cases involving allegations of academic dishonesty, a majority of the Hearing Panel or Response Review Panel should be faculty members.
 - 9.** The resolution decision of DOS, subject to the Response Review process outlined in the Code, is final.
 - 10.** The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.
 - 11.** In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of “incomplete” until the process is complete.
 - 12.** In situations where the instructor is no longer in their position prior to the completion of the conduct process, the instructor of record or the

chair of the department may be asked to step in to finish the conduct process and the instructor may coordinate the final grade based on the totality of the academic performance.

F-10. Outcomes.

a. Outcomes may be imposed for any student determined to have violated the Code. Possible outcomes include, but are not limited to:

- **Warning:** Written notice to the student.
- **Probation:** Written reprimand accompanied by a probationary period during which the student must not violate the Code to avoid more severe disciplinary outcomes.
- **Loss of privileges:** Denial of specified privileges for a designated period of time.
- **Restitution:** Compensation for loss, damage, or injury. This may take the form of appropriate service or monetary or material replacement.
- **Educational outcomes:** Completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.
- **Deferred suspension:** The last opportunity before being suspended, which remains in place until the natural end of the academic relationship with the University.
- **Housing suspension:** Separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.
- **Housing expulsion:** Permanent separation of the student from University Housing.
- **University suspension:** Separation of the student from the University for a definite period, after which the student is eligible to return. Conditions for return may be specified.
- **University expulsion:** Permanent separation of the student from the University.
- **Revocation of admission:** Admission to the University may be revoked .
- **Revocation of degree:** A degree awarded from the University may be revoked.
- **Withholding of degree:** The University may withhold awarding a degree otherwise earned until the completion of all outcomes imposed.

b. More than one of the outcomes listed above may be imposed for any single violation.

c. A student who fails to comply with the outcome(s) imposed will have a disciplinary hold placed on their record until the student complies with all

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

outcome(s) imposed.

d. Disciplinary outcomes other than suspension, expulsion or revocation or withholding of a degree will not be made part of the student's permanent academic record but will become part of the student's disciplinary record. Such outcomes will be expunged from the student's disciplinary record seven years after final disposition of the case unless the University is legally required to maintain them for a further time.

G. MISCELLANEOUS

G-1. Role of an advisor. In accordance with the educational purpose of the Code, all students, including respondents and complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any response. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of the University official conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student or make a presentation on behalf of the student.

G-2. Administrative fee. Any time a student is found to have violated the Code, except in situations where the hearing officer issues only a warning, the hearing officer may charge the student an administrative fee of \$150. This is not considered an outcome and will not be a subject of a response review.

G-3. Parent notification. The University may notify parents of students under the age of 21 when a student has been found to have committed a drug- or alcohol-related violation. This is not considered an outcome and may not be a subject of a response review. The decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

G-4. Training. All members of the SCB, the Administrator, and the investigators will receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, as well as all applicable federal and state laws.

G-5. Timeframe. With the exception of deadlines for requesting a hearing before the SCB (see section F.7) or for filing a response (see section F.8), all other timeframes

contained in the Code are suggested timeframes. While the timeframes should be followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for response review or reversal of any decision.

G-6. Interpretation. Any question of interpretation regarding the Code or these procedures will be referred to the Administrator or their designee for final decision.

G-7. Disclosure. The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of Title 18, United States Code), incest, or statutory rape, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the reporting victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim will be treated as the victim for purposes of this paragraph.

G-8. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

G-9. Review by Board of Regents: Board of Regents review of a final institutional decision to the Board of Regents is governed by Idaho State Board of Education Governing Policies and Procedures Section III.P.17.

Version History

Amended October 2023: Interim policy. Changes to B-2 to clarify jurisdiction of OCRI, added definition of protected status, changes to E-4 regarding prohibited harassment and E-5 regarding discrimination and retaliation.

Amended August 2023. Editorial and legal edits.

Amended August 2023: Interim policy. Complete rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct were combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. FSH 2400 was deleted. Procedure related to Title IX sexual harassment was removed to align with the recently revised FSH 6100.

Amended July 2021. Editorial changes.

Amended July 2014. All disciplinary language from FSH 2300 Student Code of Conduct was consolidated into FSH 2400 and updated removing redundancies in policy.

Amended July 2009. Editorial changes.

Amended January 2007. Reformatted the Student Code of Conduct into subsections

for easier management of judicial cases

Amended July 2005. Revised Article II, Section 2.

Amended July 1998. Revised Article II.

Amended July 1993.

Amended July 1992.

Adopted July 1970.

2023 – 2024 Faculty Senate – Pending Approval Approved at Mtg #15
Meeting # 14 Dec. 5, 2023
Tuesday, November 28, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Blevins, Reynolds, Rinker

Also present: Samantha Thompson-Franklin, proxy for Kenyon.

Guests/Speakers: Alistair Smith, Cari Fealy, Michael McCollough, Jerry McMurtry, Linda Campos

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #13, November 14, 2023, were approved as distributed.

Chair's Report:

- We'll have one more Faculty Senate meeting, December 5. Please attend.
- We are close to the end of the semester. It's been great working with you all! I have learned a lot during the past months, especially on the importance of keeping an open mind and encouraging a collaborative approach.
- Vice Provost for Academic Initiatives Gwen Gorzelsky is looking for a senator interested in participating in a working group with SBOE about admissions. The project involves discussing a possible direct admissions pact across [Western Interstate Commission for Higher Education](#) (WICHE) states, based on the [Smarter Balanced Assessment](#). If interested, please let Kristin or me know.

Provost's Report:

- 3MT (Three-Minute Thesis) competition. Tomorrow at 2:30pm, in the Vandal Ballroom.
- Next faculty gathering: Monday, December 4, 4:30pm to 6:30pm, at the Seed Potato Germplasm building, near Facilities. Hosted by CALS. RSVP: <https://forms.office.com/r/pvTQ8UBxYY>
- Winter Commencement is Saturday December 9. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena. Please encourage faculty to attend. <https://www.uidaho.edu/events/commencement/winter>
- The football team made it to the playoffs. The first game is Saturday at 7pm in the Kibbie Dome.

Committee Reports (vote):

- Proposed changes to the University Catalog
 - UCC 522 Marketing Analytics Undergraduate Academic Certificate – Michael McCollough
The Marketing Analytics certificate allows students to apply statistical tools to examine marketing decisions. Completion of the certificate will allow students to apply quantitative analytical skills to assess and solve marketing problems and provide strategic recommendations. We are eliminating the Marketing Analytics

Emphasis in the Marketing Degree and introducing a Marketing Analytics Certificate. Enrollments have not been strong in the degree emphasis, and we hope by converting to a certificate, we will make marketing analytics accessible to a larger number of students across campus.

Vote: 21/21 yes. Motion passes.

- UCC 526 Scientific Communication and Leadership Academic Certificate – Jerry McMurtry

The courses which make up the proposed certificate are already part of the Professional Science Masters (PSM) degree. By creating a certificate using the PSM organizational skills courses, non-thesis (primarily - but not exclusively) degrees can integrate some or all of the courses, and the student would earn both the degree and the certificate. In conversations with directors of graduate studies, department chairs, and deans, there is support for the certificate as a standalone program as well. All of the courses have capacity, and faculty/departments are eager to use the certificate to increase enrollment.

Vote: 22/22 yes. Motion passes.

- UCC 483 International Economics Academic Certificate – Stefanie Ramirez
Many business and social issues are the subject of International Economics, from export promotion to sustainable development. This certificate brings together economics courses already being taught at UI that form the basis of knowledge of International Economics. It will serve potential students from outside the university as well as those already at UI who seek to learn more about the subject. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

Vote: 19/19 yes. Motion passes.

- UCC 523 Economics of Public Policy Undergraduate Academic Certificate – Stefanie Ramirez

A wide range of jobs are engaged with public policy in various ways, from jobs in businesses affected by regulations to the policy makers and their aides making the regulations. All parties need to be better informed about the economics of public policy. This certificate brings together Economics courses already being taught at UI that together form the basis of knowledge of public policy issues. It will serve potential students from outside the university as well as those already at UI who seek to learn more about public policy. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

Vote: 21/21 yes. Motion passes.

- Proposed changes to the Faculty Staff Handbook
 - FSH 1565 Academic Ranks and Responsibilities – Alistair Smith
C-2 revised to clarify how advising is credited for evaluative purposes.

Discussion

There was a brief discussion on how to best clarify that research advisees can be graduate or undergraduate. Friendly amendment: Drop the first three words, “*The number of*” from the relevant sentence in the policy.

Vote: 23/23 yes. Motion passes.

- FSH 2300 Student Code of Conduct & FSH 2400 Disciplinary Process for Alleged Violations of Student Code of Conduct – Cari Fealy
Comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
Vote (FSH 2300): 22/22 yes. Motion passes.
Vote (FSH 2400): 23/23 yes. Motion passes.

- FSH 4620 Academic Calendars – Torrey Lawrence, Lindsey
This revision delays all dates for Fall 2025, Spring 2026, and Summer 2026 by one week. Details are attached. The current dates for Academic Year 2025-26 align with WSU for Spring commencement on May 9, 2026. This will be a major challenge for the Moscow and Pullman communities as well as our families seeking housing and dining. UI’s calendar currently “flips” to a later start in AY 26-27; however, that change can take place during AY 25-26 to avoid concurrent spring commencements while still following the normal pattern of UI semesters. In addition, earlier starts creating a hardship for many UI students who are involved in agricultural harvest or firefighting. Delaying all AY 25-26 dates addresses these concerns. One additional impact is that the irregular 14-week summer (normally 13 weeks) will shift from Summer 2026 to Summer 2025. Provost Lawrence noted that the first page (p.96 of the packet, containing the 2014-2020 calendars), can be dropped.
Vote: 23/23 yes. Motion passes.

Other Voting Items:

- Spread Pay Task Force Recommendations – Kristin Haltinner
Vice Chair Haltinner summarized the current status. There are currently 122 faculty on the old spread pay system, and 361 on standard pay and wanting to switch, or 63% of all faculty on standard pay. There are currently 20 to 30 faculty earning maximum summer salary through grants. Since the last meeting, we learned that it is possible to delay the implementation of the new deferred pay by one year. Switching to a 38-week AY is not possible, and raising salaries by 2.5% to compensate for the hourly rate reduction for the calculation of summer salaries is also not an option. Motion to approve the (displayed) recommendations of the task force: Chapman/Long, followed by discussion.

With regard to the six-week pay gap, a senator said that, in some universities, they introduced interest-free loans for up to one month salary. Could this be an option for us? Linda Campos responded that state law forbids loaning state funds to employees. Instead, they came up with the option of setting aside a portion of the impacted faculty’s pay checks from January 2024 to draw from during the pay gap.

A senator inquired about the reasons why a 38-week AY is not possible. They reiterated that a 2.5% summer hourly rate pay reduction is a non-starter for many faculty. Having to take an arbitrary pay cut to fix the payroll system is unacceptable. Provost Lawrence responded that a 38-week AY presents the same challenges as a 40-week one. In addition, we would be eliminating one week from the contract period during which faculty actually work, namely, the start-up week prior to the first week of classes when faculty get ready for the semester. The semester ends on Friday of final exam week and the contract ends on that Saturday. Grades are due on Tuesday or Wednesday of the following week, and, therefore, faculty work about 39.5 weeks, only a few days short of 40 weeks, making the switch from 39 to 40 weeks reasonable. Work expectations for the contract period as defined in policy are unchanged. Moving to 38 weeks would create even more problems: faculty would not have access to Canvas or benefits until the first day of classes. Presently, we use both 19.5 and 20 pay periods, but we need to bring everyone to the same system. We are trying to offer deferred pay to anyone who wants it, in addition to the 122 faculty on spread pay. A 40-week AY (20 pay periods) can accomplish that and reflects the work we are actually doing. Linda Campos had some comments from the technical side of the payroll system: an hourly rate is required for the purpose of summer contracts, which requires manual adjustment because we cannot rely on Banner for an accurate calculation of hourly rates. This is why we need to align the systems. The Provost added that the 2.5% pay cut will impact those faculty who earn 13 weeks of summer salary. For others, the calculated hourly rate does not necessarily translate into a pay cut, it depends on how they are paid. For instance, if summer work is paid in a lump sum, the amount remains the same, as long as the summer period is less than 13 weeks. The senator had other thoughts, based on the assumption that faculty are not paid through the winter break. Actually, faculty are on payroll during the time between semesters.

Other senators reported that their constituents are very unhappy about the summer pay cut and would consider leaving the university for that reason. They support deferred pay, but cannot agree to a pay cut to make accounting simpler.

A senator did not understand why the number of pay periods we use has an impact on contracts. Provost Lawrence explained that the contract period would be 40 weeks, with the extra week taken from the summer period when faculty are already working (prior to the start of classes). However, per policy, our academic year contract obligations are determined by the academic calendar and would not change. The senator remained unclear on why adding a week to their contract without adding pay is not a pay cut. The Provost reiterated that the reason is that faculty are exempt and not paid by the hour. It is a pay cut for those on 13-week full summer contracts. The source of the limitation on how much we can be paid in the summer and the connection with the computed hourly rates is grants rules.

It became clear that, for the sake of moving forward, deferred pay and the 12-week summer issue must be seen as separate. Senate priority is to come up with a deferred pay system for all who are interested.

Question in the zoom chat: If someone teaches the first summer session, would they have an overlap in contracts? Or, would the summer schedule have to move back by a week? The Provost replied that there is overlap. It will be necessary to rethink the summer schedule and its pay schedule.

We have to get everyone on the same schedule, and people on standard pay are on a 19.5 pay period schedule, but deferred pay is calculated based on 20 pay “factors” spread over 26 pay periods. The financial system (Banner) in use by the University does not support, without manual “work-arounds”, 19.5 pays so standard pay must be changed to a 20-pay schedule. People currently on spread pay will be able to remain on it for another year.

Proposed amendment to the motion (Justwan/Barannyk): Delay the implementation of deferred pay by one year. Some additional discussion followed. Some senators argued that waiting one more year does not change anything, while others felt strongly that more time to prepare for the pay gap is crucial to their constituents. Those on standard pay wishing to switch stressed the urgency for about 400 faculty to have deferred pay. They were never offered any help to set money aside for the summer. The provost noted that the current offer to help faculty set money aside in anticipation of the pay gap is feasible because it involves one tax year. On the other hand, financial tools are available. One can solution currently available in Vandalweb is to have their paychecks deposited in two different accounts, one of which would be used to cover the summer. This tool should be widely publicized.

Vote on the amendment: 3/19 yes; 16/19 no. Motion fails.

Back to the original motion – approve the task force recommendations for deferred pay effective in AY 2024-25.

Vote: 11/18 yes; 7/18 no. Motion passes.

There was a general consensus that a better solution should be found to the problem of summer salaries and the 20 pay factors.

New Business:

There was none.

Chair Gauthier had two questions from constituents for Provost Lawrence:

If someone works at the U of I and under the “umbrella” for both universities, how do they get compensated?

Provost Lawrence replied that there is no structure or umbrella for the two universities. U of I will continue as usual under the Regents, and UOPX under the Four Three Education and their board. Nothing like a joint employee is contemplated at this time.

What’s the correct cost of the UOPX purchase? Is it about \$500M or closer to \$600M?

Linda Campos replied that \$680M is the estimated amount of bonds to be issued in order to finance the purchase.

A senator argued that, with the R1 rank getting closer, we should start comparing our salaries with those of a different group of peer institutions. Provost Lawrence replied that our current faculty market rates are based on both R1 and R2 peer salaries. Those lists could change when the new Carnegie system is implemented. We could look at our marked-based salary system and consider just R1 peers. Ultimately, funding available for CEC is determined by the legislators. Chair Gauthier suggested to look at other forms of revenue streams, potentially generated by the UOPX transaction.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 4:55pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 13

Tuesday, November 14, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Torrey Lawrence (w/o vote), McKenna, Miller, Mischel, Murphy, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Long (excused), Mittelstaedt, Ramirez, Reynold

Guests/Speakers: Alistair Smith, Cari Fealy

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #11, October 31, 2023, were approved as distributed.

Chair's Report:

- We honor the memories of Madison Mogen, Kaylee Goncalves, Xana Kernodle, and Ethan Chapin with a minute of silence.
- I would like to propose a few ideas about APM and FSH policies in shared governance. I hope that the following questions can be addressed in the next months. With the current process, we have the opportunity to comment on APM items when they come through Faculty Senate. How can we improve the process for APMs impacting directly faculty activities? Can we have some control on what goes into the APM? Can we propose changes to APM policies that impact academic activities?

Provost's Report:

- We faced new challenges last week with both internet and natural gas outages. Thank you all for your patience. Please extend your thanks to any Facilities staff who worked long hours during the outage.
- Faculty gathering today, 4:30 – 6:30, in the Vandal Ballroom. Hosted by Dean Sean Quinlan, CLASS.
- "Talks with Torrey" series: November 16, 11:30am - 12:30pm.
<https://www.uidaho.edu/provost/talks-with-torrey>
- Winter Commencement is Saturday, December 9. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena. All faculty are encourage to attend the ceremony for their college. Details about the events: <https://www.uidaho.edu/events/commencement/winter>

Committee Reports (vote):

- FSH 1620 University-Level Committees & FSH 1640 Committee Directory – Francesca Sammarruca, Faculty Secretary
FSH 1620 has been revised to clarify procedures for university-level committees. The changes to FSH 1640 are needed for consistency. The two policies must be taken as a package.
An audit of the university-level committees is in progress with the Committee on Committees, and a comprehensive review will follow.

Vote: 18/18 yes. Motion passes.

- FSH 1565 Academic Ranks and Responsibilities – Alistair Smith
Changes to FSH 1565 D-8 University Distinguished Professor are proposed to make Extension faculty eligible for the rank of University Distinguished Professor.
Vote: 16/18 yes; 2/18 no. Motion passes.
- FSH 3320 Annual Performance Evaluations and Salary Determination of Faculty Members and Performance Evaluation of Academic Administrators – Alistair Smith
Change to A-1.d is proposed to clarify that chairs may confer with deans during the evaluation process, to align with standard practices.
Vote: 20/20 yes. Motion passes.

Other Voting Items:

- Spread Pay Task Force Recommendations – Kristin Haltinner
Vice Chair Haltinner heard from some of the 122 faculty currently on the old “spread pay” system. They expressed serious concerns about the transition to the new “deferred pay” system happening in summer 2024 – saving between now and June 2024 in preparation for the paycheck gap would be a heavy burden. They requested to wait a year. The other source of concern is the shift from 19.5 units to 20 units pay schedule.

Current proposal: we can have everyone on standard pay and keep the 19.5 pay factors or offer deferred pay to anyone qualified who wants it and resetting of the payroll schedule to 20 pay factors, but we can't mix the two options. Provost Lawrence confirmed that the university (not the individual) can choose one or the other.

Some senators reported that their constituents are very unhappy about the shift to 20 units, which amounts to three pay cuts because: it effectively reduces the AY pay, lowering hourly pay by asking faculty to work another contract week for the same total amount; it reduces the hourly rate used to compute summer salary; it reduces the total number of weeks available for summer salary from 13 to 12. Would it be possible to go from 19.5 to 19 units instead?

Linda Campos explained that the deferred pay system cannot use partial schedules, because it creates a discrepancy between hourly rates for faculty on spread pay and faculty on standard pay. The payroll system needs to bring all AY faculty on the same schedule. However, she cannot speak for a scenario where the university moves to a schedule of 19 pay factors. The Provost added that a 38 week AY may be something to look into. The problem is that our payroll system does not align with the academic year calendar.

Some senators felt strongly that the transition should happen in summer 2025. For some, saving sufficient funds to cover the pay gap in summer 2024 would be impossible without falling in debt. Others replied that faculty currently on standard pay have had to set money aside for the summer for many years.

There was confusion about the 19.5 vs. 20 pay factors. A Senator was unclear as to why the shift requires a reduction of the summer period during which people can earn salary. They argue that, if the total number of hours in a full-year contract is 2080, and the total number of hours in the AY is still 1560, the difference – 520 hours – is the maximum number of hours (13 weeks)

faculty can earn salary during the summer. Provost Lawrence explained that 40 hours are moved from the summer period into the nine-month contract period (which would then contain 1600 hours). It's important to keep in mind that exempt employees don't work by hours – their responsibilities are set in the PD for the AY, outside of the payroll system, and do not change with the addition of 0.5 weeks. Hourly rates are introduced for the only purpose of calculating summer salaries, because some summer contracts require salary calculations based on an hourly rate. Basically, our payroll system and the AY faculty contracts do not line up.

Some senators argued that, if this transition is going to happen regardless, there is no point in waiting a year. The issue of 19.5 vs. 20 pay factors is a separate one and will not be resolved by procrastinating.

In response to a question about timelines, Linda Campos said that moving the implementation down by one year is possible. However, if the transition has to happen in summer 2024, a decision within the next few weeks is desirable.

The option of postponing the decision until after the fall break and, in the meantime, seeking clarification, was discussed. There was a consensus that options where faculty must take a pay cut are not acceptable.

Moved (Barannyk/Justwan) to accept the recommendations of the task force, with summer 2025 as the implementation date.

During the discussion that followed, the option of postponing the decision until the next Faculty Senate meeting gained traction. Aspects to learn more about are: Can we move to 19 units instead of 20 or keep hourly wages the same and increase salaries instead?

The motion was withdrawn. New motion (Roberson/Murphy) to postpone the decision by two weeks to get clarification on the aspects raised above.

Vote: 19/20 yes; 1/20 no. Motion passes.

Announcements and Communications:

- Promotion and Tenure Nomination Process – Provost Lawrence
Nominations are open for individuals to serve on this year's University-Level Promotion and Tenure Committees (see [FSH 3500 G-1](#)). Two committees will be convened this year due to the large number of dossiers to be reviewed. Nomination deadline: Friday, November 17, 2023. The nomination form for senators to complete can be found at https://forms.office.com/pages/responsepage.aspx?id=Y2u8fpJXGUqyCwS4JgSIU8wgEFrYhyNOn_qCDVIL5jNUREVSNURESkRCUzFFVlpUSFMxNFdNVk0xOS4u

- FSH 2300 Student Code of Conduct & Resolution Process – Cari Fealy
Comprehensive review/rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
The following are the major changes to the policy:
 - The policy was rewritten using language more accessible and understandable for students.

- The Code of Conduct and conduct process were combined in a single policy for easier use.
- Processes related to Title IX sexual harassment were removed to align with the recently revised FSH 6100. Added clarifying language around academic dishonesty resolution.
- Language aligning with case law was added to follow best practices in student conduct policies.
- A section on free speech was included.

This item will be voted on at the November 28 Faculty Senate meeting.

New Business:

- From Erin Chapman: The deadline for the Athena Mentorship Program has been extended to December 1, 2023 https://uidaho.co1.qualtrics.com/jfe/form/SV_9tA1uFgedGAATk

With some time remaining, Chair Gauthier moved back to the University of Phoenix Financial Flow Chart (previously deferred). Provost Lawrence went over Attachment #7. On p.2, there is a flow chart for the U of I/UOPX affiliation, describing in a simple way the financial transaction.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 4:50pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

We are eliminating the Marketing Analytics Emphasis in the Marketing major and replacing it with a certificate. The courses are already being offered and there will be no additional cost.

Curriculum:

The Marketing Analytics certificate allows students to apply statistical tools to examine marketing decisions. Completion of the certificate will allow students to apply quantitative analytical skills to assess and solve marketing problems and provide strategic recommendations.

All required coursework must be completed with a grade of 'C' or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |

or STAT 301

Probability and Statistics

Total Hours**12****Courses to total 12 credits for this certificate.****Distance Education Availability**

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. Students will determine the appropriate level, scope, and depth of information required for decision-making.
2. Students will apply quantitative analytical skills to assess and solve marketing problems/opportunities.
3. Students will prepare and analyze data, report the research results, and provide strategic marketing recommendations (i.e., managerial insights/implications).

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Among the assessment tools that will be used will be some combination of exams, quizzes, projects, and presentations.

How will you ensure that the assessment findings will be used to improve the program?

We will practice continuous improvement, monitor where assessment scores are low, and make changes to improve student outcomes.

What direct and indirect measures will be used to assess student learning?

Direct measures will include student scores on graded deliverables. Indirect will include qualitative feedback such as student-teacher evaluations, discussions with students in the class, and program enrollment (as a measure of student interest and by extension student learning).

When will assessment activities occur and at what frequency?

Ongoing throughout the courses. Each year we will assess the overall program/certificate.

Student Learning Outcomes**Learning Objectives**

1. Students will determine the appropriate level, scope, and depth of information required for decision-making.
2. Students will apply quantitative analytical skills to assess and solve marketing problems/opportunities.
3. Students will prepare and analyze data, report the research results, and provide strategic marketing recommendations.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

We are eliminating the Marketing Analytics Emphasis in the Marketing Degree and introducing a Marketing Analytics Certificate. Enrollments have not been strong in the degree emphasis, and we hope by converting to a certificate, we will make marketing analytics accessible to a larger number of students across campus.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Students will be able to describe, classify, and understand the concepts of data, data science, big data, datafication, data ethics, and the data science process.

Students will be able to find, clean, transform, and analyze data using RStudio and Tidyverse functions.

Students will understand key ideas around managing themselves, including leadership assessments, leadership frameworks, and best practices to consider.

Students will examine concepts associated with leading teams with a focus on specific topics such as decision making, managing conflict, and motivation.

Student will explore the elements of becoming a leader of leaders within an organization and understand how their focus changes with higher level positions within an organization.

Students will refine their professional communication skills, preparing them to communicate effectively about science, technology, and policy topics with diverse and geographically dispersed audiences.

Students will draw from research in science communication, mass media, psychology, and other fields to specifically focus on developing students to expand their ability to develop strategic messages for delivery in a wide range of contemporary contexts.

Students will be able to implement an exploratory data analysis that (1) wrangles data, (2) cleans data, (3) visualizes data, and (4) summarizes data.

Student will understand and utilize predictive analytics techniques.

Students will learn theoretical foundations, practical skills, and tools to define, organize, plan, monitor, and control a project to ensure effective execution.

Students will analyze and interpret basic financial statements and understand how a given project impacts these statements.

Students will learn theoretical foundations, practical skills, and tools to critically analyze and assess how organizational processes, policies, structure, and culture contribute to or impede organizational change and innovation.

Students will understand the components of an organization's business model and be able to critically assess and design mutually reinforcing mechanisms between the business model and scientific innovation.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Each course will have assessment components to gather information on student performance against the course outcomes.

Each faculty member will determine the best assessment protocol for the particular content in the course. Examinations, reports, communications through discussion, and other products may be used in the courses to determine gains in student knowledge, skills, and abilities.

How will you ensure that the assessment findings will be used to improve the program?

Each fall, the faculty teaching in the certificate program will meet with the COGS dean to review data gathered by various surveys and indirect assessment measures in an effort to revise and adjust the courses and ascertain effectiveness.

What direct and indirect measures will be used to assess student learning?

Direct measures would be:

Course assessments and examinations
 Course projects and reports
 Instructor assessment through products produced, performances, or communication
 Indirect measures would be:
 Annual follow up of completers with a survey regarding impact of the courses/program
 Annual COGS graduate survey

When will assessment activities occur and at what frequency?

Direct assessment will occur regularly through the courses. Indirect assessment will take place at the end of each term. A comprehensive evaluation of the students experience will take place at the end of each spring term.

Student Learning Outcomes

Learning Objectives

- Students will be able to describe, classify, and understand the concepts of data, data science, big data, datafication, data ethics, and the data science process.
- Students will be able to find, clean, transform, and analyze data using RStudio and Tidyverse functions.
- Understand key ideas around managing yourself, including leadership assessments, leadership frameworks, and best practices to consider.
- Examine concepts associated with leading teams with a focus on specific topics such as decision making, managing conflict, motivation.
- Explore the elements of becoming a leader of leaders within an organization and understand how your focus changes with higher level positions within an organization
- Students will refine their professional communication skills, preparing them to communicate effectively about science, technology, and policy topics with diverse and geographically dispersed audiences.
- Students will draw from research in science communication, mass media, psychology, and other fields, to specifically focuses on developing students to expand their ability to develop strategic messages for delivery in a wide range of contemporary contexts.
- Students will be able to implement an exploratory data analysis that (1) wrangles data, (2) cleans data, (3) visualizes data, and (4) summarize data.
- Student will understand and utilize predictive analytics techniques.
- Students will learn theoretical foundations, practical skills, and tools to define, organize, plan, monitor, and control a project to ensure effective execution.
- Students will analyze and interpret basic financial statements and understand how a given project impacts these statements.
- Students will learn theoretical foundations, practical skills, and tools to critically analyze and assess how organizational processes, policies, structure, and culture contribute to or impede organizational change and innovation.
- Students will understand the components of an organization's business model and be able to critically assess and design mutually reinforcing mechanisms between the business model and scientific innovation.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rational should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The courses which make up the proposed certificate are already part of the Professional Science Masters (PSM) degree. By creating a certificate using the PSM organizational skills courses, non-thesis (primarily - but not exclusively) degrees can integrate some or all of the courses, and the student would earn both the degree and the certificate. In conversations with directors of graduate studies, department chairs, and deans, there is support for the certificate as a stand alone program as well.

All of the courses have capacity, and faculty/departments are eager to use the certificate to increase enrollment.

Reviewer Comments

Linda Lundgren (lindalundgren) (Wed, 20 Sep 2023 21:17:50 GMT): Program description received from Jerry M. below: As the technical workforce changes and grows there is a need for organizational and professional skills as well as technical skills in advanced preparation. The Graduate Certificate in Science Communication and Leadership prepares student to enhance their technical expertise with content in communications, leadership, data analytics, project and innovation management, and workplace dynamics. The certificate is focused toward meeting the needs of those who are, or wish to be, employees in technical or scientific organizations.

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

All courses required for the certificate are currently being offered by UI in Moscow.

Curriculum:

International Economics is the study of productive differences between countries, the economic implications of such differences, and the linkages between economies. Incorporating both micro- and macroeconomics, this certificate focuses on sustainable economic development, poverty reduction, international trade, immigration, and globalization.

All required coursework must be completed with a grade of 'C' or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Students completing this program will be able to:

- describe how national and international policies impact globalization.
- use models to analyze the pros and cons of international trade and other international linkages in the global economy.
- compare and contrast countries' levels of economic development using country-level datasets.
- critically evaluate the factors contributing to economic growth and stagnation in countries around the globe.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Instructors of courses in the program will use written assignments and evaluations such as problem sets, essays, research papers, and exams, and responses on these assignments to particular learning outcomes. Responses will be determined to "exceed", "meet", or "not meet" expectations. The proportion of students meeting or exceeding expectations is the statistic used to gauge performance of the program.

How will you ensure that the assessment findings will be used to improve the program?

The Economics area coordinator and Department of Business Head will review the assessment findings and make recommendations to instructors on content improvements.

What direct and indirect measures will be used to assess student learning?

Direct and indirect measures include written responses on problem sets, essays, research papers, and/or exams, as described above.

When will assessment activities occur and at what frequency?

All learning objectives will be assessed by some courses in the certificate each semester.

Student Learning Outcomes

Learning Objectives

Students completing this program will be able to:

- describe how national and international policies impact globalization.
- use models to analyze the pros and cons of international trade and other international linkages in the global economy.
- compare and contrast countries' levels of economic development using country-level datasets.
- critically evaluate the factors contributing to economic growth and stagnation in countries around the globe.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Many business and social issues are the subject of International Economics, from export promotion to sustainable development. This certificate brings together economics courses already being taught at UI that form the basis of knowledge of International Economics. It will serve potential students from outside the university as well as those already at UI who seek to learn more about the

subject. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

A wide range of jobs are engaged with public policy in various ways, from jobs in businesses affected by regulations to the policy makers and their aides making the regulations. All parties need to be better informed about the economics of public policy. This certificate brings together Economics courses already being taught at UI that together form the basis of knowledge of public policy issues. It will serve potential students from outside the university as well as those already at UI who seek to learn more about public policy. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

- B. Definitions
- C. Responsibility Areas
- D. University Faculty
- E. Emeriti
- F. Associated Faculty
- G. Temporary Faculty
- H. Non-Faculty
- I. Qualification of Non-faculty Members for Teaching UI Courses

A. INTRODUCTION.

A-1. The principal functions of a university are the preservation, advancement, synthesis, application, and transmission of knowledge. Its chief instrument for performing these functions is its faculty, and its success in doing so depends largely on the quality of its faculty. The University of Idaho, therefore, strives to recruit and retain distinguished faculty members with outstanding qualifications.

In order to carry out its functions and to serve most effectively its students and the public, the university supports the diversification of faculty roles. Such diversification ensures an optimal use of the university's faculty talents and resources.

Diversification is achieved through developing a wide range of faculty position descriptions that allow the faculty to meet the varying responsibilities placed upon the institution, both internally and externally. No more than 25 percent, or a lower limit as defined by the department or similar unit's by-laws, of the faculty positions in any department or similar unit may be held by instructors, senior instructors, and lecturers who have voting privileges under FSH 1520 II, Section 1. While the capabilities and interests of the individual faculty members are to be taken into account, it is essential that individual faculty position descriptions are consonant with carrying out the roles and mission of the university, the college, and the unit. Annual position descriptions are developed by the unit head in consultation with the unit faculty and with the incumbent or new faculty member. In each college, all position descriptions are subject to the approval of the dean and must be signed by both unit head and faculty member. If the faculty member, unit head, and dean are unable to reach agreement on the position description, the faculty member may appeal the unit head's decision to the Faculty Appeals Hearing Board [FSH [3840](#)].

As indicated in Section 3320 A-1, faculty performance evaluations that are used for yearly, third-year and periodic reviews as well as for promotion, tenure, and post-tenure decisions are to be based on faculty members' annual position descriptions (FSH 3050). Each unit will develop substantive criteria in its bylaws for promotion and review of its faculty

Faculty members shall conduct themselves in a civil and professional manner (see FSH 3160 and 3170).

B. DEFINITIONS:

B-1. Advancement: focuses on fostering relationships, building partnerships, creating awareness and generating

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

support with alumni, donors, leaders, business partners, legislators and the community for the university's mission in academics, scholarship and outreach (see the office of University Advancement at <http://www.uidaho.edu/givetoidaho/meetourpeople/universityadvancementvpooffice.aspx>).

B-2. Cooperative education: a structured educational strategy that blends classroom studies with learning through productive work experiences. It provides progressive experiences for integrating theory and practice. Co-op education (including internships and externships) is a partnership between students, educational institutions and employers, with specified responsibilities for each party.

B-3. Distance education: the process through which learning occurs when teachers, students, and support services are separated by physical distance. Technology, sometimes in tandem with face-to-face communication, is used to bridge the distance gap.

B-4. Extension Service: Extension is an outreach activity that generally involves non-formal educational programs that transfer knowledge from the university to help improve people's lives through research in areas like agriculture and food, environment and natural resources, families and youth, health and nutrition, and community and economic development.

B-5. Extramural Professional Service: refers to activities that extend service beyond the university and can include elements of service, outreach, scholarship, and/or teaching.

B-6. Interdisciplinary: "an activity that involves teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or field of research practice."¹

B-7. Professional Development: a learning process that expands the capacity of the faculty member to advance in the responsibilities as defined in his/her position description and aligns with the university's goals. Examples include but are not limited to participation in conferences, continuing professional education (including credit and noncredit courses) and other activities that enhance a faculty member's expertise and ability.

B-8. Service learning: an activity that integrates student learning with service and civic engagement to meet real community needs and achieve learning outcomes. Service-learning can be used in curricular settings (i.e. academic courses) or co-curricular settings, (e.g. ASUI's volunteer/civic engagement programs).

B-9. Technology transfer: a process through which knowledge, technical information, and products developed through various kinds of scientific, business, and engineering research are provided to potential users. Technology transfer encourages and accelerates testing and using new knowledge, information and products. The benefit of technology transfer may occur either at the community (public) or firm (private) level.

B-10. Unit Administration: includes assisting higher administration in the assignment and in the evaluation of the services of each member of the unit's faculty and staff; promoting effective leadership of personnel and management of unit resources; providing leadership in the development and implementation of unit plans; providing for open communication with faculty and staff; fostering excellence in teaching, scholarship and outreach for faculty, students, and staff in the unit; effectively representing all constituents of the unit; and continuing personal professional development in areas of leadership.

C. RESPONSIBILITY AREAS: Faculty members are expected to contribute in each of the four major responsibility areas (C-1 through C-4 below). Expectations are more specifically defined in the individual position description and are consistent with unit by-laws. Each responsibility area may include activities in advancement, extramural professional service, interdisciplinary, and/or professional development./

C-1. TEACHING AND ADVISING: The university's goal is to engage students in a transformational experience of discovery, understanding and global citizenship. Faculty achieve this goal through effective instructing, advising

¹ National Academy of Science

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

and/or mentoring of students./

a. Teaching: Effective teaching is the foundation for both the advancement and transmission of knowledge. The educational function of the university requires the appointment of faculty members devoted to effective teaching. Teaching may take many different forms and any instruction must be judged according to its central purposes. Active participation in the assessment of learning outcomes is expected of all faculty at the course, program, and university-wide levels. Individual colleges and units have the responsibility to determine appropriate teaching loads for faculty position descriptions. Teaching appointments must be reflected by hours and level of effort spent in teaching activity, and justified in position descriptions. Any adjustments to a teaching appointment (e.g. teaching unusually large classes, team-teaching, teaching studios or laboratories, intensive graduate or undergraduate student mentoring, technology-enhanced teaching, and others) must be documented in the position description.

Evidence of teaching effectiveness shall include student feedback on teaching, and may include course design reviews, teaching observations, self-assessment, learning outcome assessment data, teaching recognition and awards, mid-term formative feedback on instruction (FSH 2700 B-6), or other documentation of effective teaching. Additional information about evidence of teaching effectiveness can be found through the Provost's Office.

b. Advising: For the purposes of this section, advising includes mentoring and student retention activities. These activities are an important faculty responsibility and a key function of academic citizenship, and may include: (1) overseeing course selection and scheduling; (2) seeking solutions to conflicts and academic problems; (3) working with students to develop career goals and identify employment opportunities; (4) making students aware of programs and sources for identifying employment opportunities, (5) facilitating undergraduate and graduate student participation in professional activities (e.g. conferences, workshops, demonstrations, applied research); and (6) serving as a faculty advisor to student organizations or clubs. Advising also includes attendance at sessions (e.g. workshops, training courses) sponsored by the university, college, unit, or professional organizations to enhance a faculty member's capacity to advise.

Effective advising performance may be documented by: (1) the evaluation of peers or other professionals in the unit or college; (2) undergraduate or graduate student advisees' evaluations; (3) level of activity and accomplishment of the student organization advised; (4) evaluations of persons being mentored by the candidate; (5) number of undergraduate and graduate students guided to completion; and (6) receiving awards for advising, especially those involving peer evaluation.

C-2. SCHOLARSHIP AND CREATIVE ACTIVITIES: Scholarship is creative intellectual work that is communicated and validated. The creative function of a university requires the appointment of faculty members devoted to scholarship and creative activities. The university promotes an environment that increases faculty engagement in interdisciplinary scholarship. The university's Carnegie designation as "research university high" fosters an emphasis on scholarly and creative activities.

Scholarship and creative activities take diverse forms and are characterized by originality and critical thought. Both must be validated through internal and external peer review or critique and disseminated in ways having a significant impact on the university community and/or publics beyond the university. Both are ongoing obligations of all members of the faculty.

The basic role of a faculty member at the University of Idaho is to demonstrate and validate continuing sound and effective scholarship in the areas of teaching and learning, artistic creativity, discovery, integration, and outreach/application/engagement. While these areas may overlap, these distinctions are made for purposes of defining position descriptions and for developing performance standards. Units and colleges shall adopt criteria for the evaluation of scholarship and creative activities. The number of undergraduate and graduate students advised may be credited to Scholarship and Creative Activity or to Teaching and Advising for evaluative purposes, but not to both. Demonstrated excellence that is focused in only one of these scholarship and creative activity areas is acceptable if it is validated and judged to be in the best interests of the institution and the individual faculty member.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

a. Scholarship in Teaching and Learning: can involve classroom action research (site-specific pedagogy), qualitative or quantitative research, case studies, experimental design and other forms of teaching and learning research. It consists of the development, careful study, and validated communication of new teaching or curricular discoveries, observations, applications and integrated knowledge and continued scholarly growth. Evidence that demonstrates this form of scholarship might include: publications and/or professional presentations of a pedagogical nature; publication of textbooks, laboratory manuals, or educational software; advancing educational technology; presentation in workshops related to teaching and learning; development and dissemination of new curricula and other teaching materials to peers; and individual and/or collective efforts in securing and carrying out education grants.

The validation of scholarship in the area of teaching and learning is based in large measure on evaluation by the faculty member's peers both at the University and at other institutions of higher learning.

b. Scholarship in Artistic Creativity: involves validated communication and may be demonstrated by significant achievement in an art related to a faculty member's work, such as musical composition, artistic performance, creative writing, mass media activity, or original design.

The validation of scholarship in the area of artistic creativity is based in large part on the impact that the activity has on the discipline and/or related fields as determined by the peer review process. Many modes of dissemination are possible depending on the character of the art form or discipline. For example, a published novel or book chapter for an anthology or edited volume or similar creative work is regarded as scholarship. Each mode of dissemination has its own form of peer review that may include academic colleagues, practitioner or performance colleagues, editorial boards, and exhibition, performance, or competition juries.

c. Scholarship in Discovery: involves the generation and interpretation of new knowledge through individual or collaborative research. It may include: novel and innovative discovery; analyzing and synthesizing new and existing knowledge and/or research to develop new interpretations and new understanding; research of a basic or applied nature; individual and collaborative effort in securing and carrying out grants and research projects; membership on boards and commissions devoted to inquiry; and scholarly activities that support the mission of university research centers.

Evidence of scholarship in this area may include: publication of papers in refereed and peer reviewed journals; published books and chapters; published law reviews; citation of a faculty member's work by other professionals in the field; published reviews and commentary about a faculty member's work; invited presentations at professional meetings; seminar, symposia, and professional meeting papers and presentations; direction and contribution to originality and novelty in graduate student theses and dissertations; direction and contribution to undergraduate student research; awards, scholarships, or fellowships recognizing an achievement, body of work, or career potential based on prior work; appointment to editorial boards; and significant scholarly contributions to university research centers. The validation of scholarship in the area of discovery is based on evaluation by other professionals in the faculty member's discipline or sub-discipline.

d. Scholarship of Integration: often interdisciplinary and at the borders of converging fields, is the serious, disciplined work that seeks to synthesize, interpret, contextualize, critically review, and bring new insights into, the larger intellectual patterns of the original research. Similar to the scholarship of discovery, the scholarship of integration can also seek to investigate, consolidate, and synthesize new knowledge as it integrates the original work into a broader context. It often, but not necessarily, involves a team or teams of scholars from different backgrounds working together, and it can often be characterized by a multidisciplinary or interdisciplinary investigative approach. The consolidation of knowledge offered by the scholarship of integration has great value in advancing understanding and isolating unknowns. Beyond the differences, the scholarship of integration can include many of the activities of scholarship of discovery and thus may be rigorously demonstrated and validated in a similar manner.

e. Scholarship of Outreach/Application/Engagement: These activities apply faculty members' knowledge and expertise to issues that impact individuals, communities, businesses, government, or the environment. Examples may include economic development, environmental sustainability, stimulation of entrepreneurial

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

activity, integration of arts and sciences into people's lives, enhancement of human well being, and resolution of societal problems. Like other forms of scholarship and creative activities, the scholarship of outreach/application/engagement involves active communication and validation. Examples of validation may include (but are not limited to): peer reviewed or refereed publications and presentations; patents, copyrights, or commercial licensing; adoption or citation of techniques as standards of practice; invited presentation at a seminar, symposium or professional meeting; and citations of the faculty member's work.

C-3. OUTREACH and EXTENSION: Outreach activities are originated by every unit on UI's Moscow campus and from each of the University's physical locations around the state.

Outreach includes a wide variety of activities including, but not limited to, (a) extension (see 1565 B); (b) teaching, training, certification, and other dissemination of information to the general public, practitioner, and specialty audiences; (c) volunteer development and establishment/maintenance of relationships with private and public organizations; (d) unpaid extramural consultation and other professional services to individuals, organizations, and communities; and (e) undergraduate and graduate student recruiting activities. Delivery mechanisms include distance education, service learning, cooperative education, technology transfer, noncredit courses, workshops, presentations, and publications. Most of the examples provided, such as distance education, are not exclusively outreach. Instead, they lie at the intersection of outreach and teaching or research. Likewise, professional services may be associated with teaching, scholarship, or university service and leadership. A faculty member's position description specifies where his or her activities will be counted.

Evidence of effective outreach activities may include, but are not limited to, (1) documentation of the process by which needs were identified and what steps were taken to deliver carefully planned and implemented programs; (2) numbers of individuals and types of audiences affected; (3) evaluation by participants in outreach activities; (4) other measures of significance to the discipline/profession, state, nation, region and/or world; (5) quantity and quality of outreach publications and other mass-media outlets; (6) evaluation of the program's effects on participants and stakeholders; (7) awards, particularly those involving peer evaluation; (8) letters of commendation from individuals within organizations to whom service was provided; (9) service in a leadership role of a professional or scientific organization as an officer or other significant position; and (10) other evidence of professional service oriented projects/outputs.

C-4. UNIVERSITY SERVICE AND LEADERSHIP: The university seeks to create formal and informal organizational structures, policies, and processes that enable the university community to be effective, while also fostering a climate of participatory decision making and mutual respect.

a. Intramural service is an essential component of the University of Idaho mission and is the responsibility of faculty members in all units. Service by members of the faculty to the university in their special capacities as scholars should be a part of both the position description and annual performance review.

Within the university, intramural service includes participation in unit, college, and university committees, and any involvement in aspects of university governance and academic citizenship. University, college, and unit committee leadership roles are seen as more demanding than those of a committee member or just regularly attending faculty meetings. Because faculty members play an important role in the governance of the university and in the formulation of its policies, recognition should be given to faculty members who participate effectively in faculty and university governance. Intramural service can include clinical service, routine support, and application of specialized skills or interpretations, and expert consultancies. The beneficiaries of these forms of service can be colleagues and co-workers.

Effective performance in intramural service may be documented by a variety of means. Examples include: (1) letters of support from university clientele to whom your service was provided; (2) serving as a member or chairperson of university, college, or unit committees; and (3) receiving University service awards, especially those involving peer evaluation.

b. Administration:

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

(1) Unit Administration (see FSH 1565 B): FSH 1420 E describes the responsibilities and the selection and review procedures for unit administrators. Unit administration is not normally considered in tenure and promotion deliberations; it is accounted for insofar as expectations are proportionally adjusted in the other sections of the position description. For faculty in nonacademic units (e.g. faculty at large), administration may be considered in tenure and promotion deliberations.

(2) Other: Effective conduct of university programs requires administrative activities that support scholarship, outreach and teaching. Program support activities are to be noted in position descriptions and performance reviews. The role of the principal or co-investigator of a university program or project may include the following administrative responsibilities: (1) budgetary and contract management; (2) compliance with University purchasing and accounting standards; (3) supervision and annual review of support personnel; (4) purchasing and inventory management of goods; (5) graduate student and program personnel recruitment, training in University procedures/policies, and annual review; (6) collaborator coordination and communication; (7) management of proper hazardous waste disposal; (8) laboratory safety management; (9) authorization and management of proper research animal care and use; (10) authorization and management of human subjects in research; (11) funding agency reporting; (12) intellectual property reporting; and (13) compliance with local, state, and federal regulation as well as University research policy.

Demonstration of effective administration may be documented by a variety of means. Examples include: (1) compliance with applicable rules, standards, policies, and regulations; (2) successful initiation, conduct and closeout of research contracts and grants as evidenced by timely reporting and budget management; (3) completion of the research contract or proposal scope-of-work; organized program operations including personnel and property management. Documentation of effective university program operation, beyond scholarship, may also include input by graduate and undergraduate students participating in the university program; and input by collaborators, cooperators, funding agency and beneficiaries of the program. Documentation of effective administration may include evaluations by faculty and staff, as well as objective measures of performance under the incumbent's leadership.

D. UNIVERSITY FACULTY (FSH 1520 Article II):

D-1. INSTRUCTOR: Instructors may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Appointment to instructor constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated below. To avoid confusion over university faculty (those who have voting rights per FSH 1520 II, Section 1) the title of Instructor shall not be used in any other university position.

a. Instructor. Appointment to this rank requires proof of advanced study in the field in which the instructor will teach, the promise of teaching effectiveness, and satisfactory recommendations. Instructors have charge of instruction in assigned classes or laboratory sections under the general supervision of the departmental administrator. When they are engaged in teaching classes with multiple sections, the objectives, content, and teaching methods of the courses will normally be established by senior members of the faculty or by departmental committees. Instructors are expected to assist in the general work of the department and to make suggestions for innovations and improvements.

b. Senior Instructor. Appointment to this rank requires qualifications that correspond to those for the rank of instructor and evidence of outstanding teaching ability. Instructors are promotable to senior instructor. Effective teaching is the primary responsibility of anyone holding this rank and this primary responsibility is weighted accordingly in the annual performance evaluation and when a senior instructor is being considered for tenure. Except in very rare instances, this rank is considered terminal (i.e., it does not lead to promotion to the professorial ranks and there is no limitation on the number of reappointments). Prospective appointees to the rank of senior instructor must be fully informed of its terminal nature.

D-2. FACULTY:

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

a. Assistant Professor. Appointment to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons in the final stages of completing doctoral dissertations or with outstanding talents or experience may be appointed to this rank. Evidence of potential effective teaching and potential scholarship in teaching and learning, artistic creativity, discovery, and outreach/application/engagement is a prerequisite to appointment to the rank of assistant professor. Appointees in this rank have charge of instruction in assigned classes or laboratories and independent or shared responsibility in the determination of course objectives, methods of teaching, and the subject matter to be covered. Assistant professors are expected to demonstrate the ability to conduct and direct scholarly activities, and to provide intramural and extramural professional service. [1565 C]

b. Associate Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. In some situations, however, persons with outstanding talents or experience may be appointed or promoted to this rank. Associate professors must have demonstrated maturity and conclusive evidence of having fulfilled the requirements and expectations of the position description. An appointee to this rank will have demonstrated effective teaching or the potential for effective teaching, the ability to conduct and direct scholarly activities in his or her special field, and provide service to the university and/or his or her profession. Evidence of this ability includes quality publications or manuscripts of publishable merit; and/or unusually productive scholarship in teaching and learning; and/or significant artistic creativity; and/or major contributions to the scholarship of outreach/application/engagement. Associate professors generally have the same responsibilities as those of assistant professors, except that they are expected to play more significant roles in initiating, conducting, and directing scholarly activities, and in providing intramural and extramural professional service. [1565 C]

c. Professor. Appointment or promotion to this rank normally requires the doctorate or appropriate terminal degree. A professor should have intellectual and academic maturity, demonstrated effective teaching or the potential for effective teaching and the ability to organize, carry out, and direct significant scholarship in his or her major field. A professor will have made major scholarly contributions to his or her field as evidenced by several quality publications and/or highly productive scholarship in one or more of the areas of teaching and learning, discovery, artistic creativity, and outreach/application/engagement. Professors have charge of courses and supervise research, and are expected to play a major role of leadership in the development of academic policy, and in providing intramural and extramural professional service. [1565 C]

D-3. RESEARCH FACULTY:

a. Assistant, Associate and Professor. Appointment to these ranks requires qualifications, except for teaching effectiveness, that correspond to their respective ranks as for faculty in D-2 above.

D-4. EXTENSION FACULTY:

a. Extension Faculty with Rank of Instructor. Appointment to this rank requires: sound educational background and experience for the specific position; satisfactory standard of scholarship; personal qualities that will contribute to success in an extension role; evidence of a potential for leadership, informal instruction, and the development of harmonious relations with others.

b. Extension Faculty with Rank of Assistant Professor. Appointment to this rank requires a master's degree along with the qualifications of extension faculty with rank of instructor and: demonstrated leadership ability in motivating people to analyze and solve their own problems and those of their communities; evidence of competence to plan and conduct an extension program; a record of effectiveness as an informal instructor and educational leader; proven ability in the field of responsibility; evidence of continued professional growth through study and participation in workshops or graduate training programs; acceptance of responsibility and participation in regional or national training conferences; membership in appropriate professional organizations, and scholarship in extension teaching or practical application of research; demonstrated ability to work in harmony with colleagues in the best interests of UI and of the people it serves.

c. Extension Faculty with Rank of Associate Professor. In addition to the qualifications required of extension faculty with rank of assistant professor, appointment or promotion to this rank requires: achievement

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

of a higher degree of influence and leadership in the field; continued professional improvement demonstrated by keeping up to date in subject matter, extension teaching methods, and organization procedures; progress toward an advanced degree if required in the position description; demonstrated further successful leadership in advancing extension educational programs; evidence of a high degree of insight into county and state problems of citizens and communities in which they live, and the contribution that education programs can make to their solution; an acceptance of greater responsibilities; a record of extension teaching or practical application of research resulting in publication or comparable productivity; a reputation among colleagues for stability, integrity, and capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Extension Faculty with Rank of Professor. In addition to the qualifications required of extension faculty with rank of associate professor, appointment or promotion to this rank requires: regional or national recognition in the special professional field or area of responsibility; a record of successful organization and direction of county, state, or national programs; an outstanding record of creative extension teaching or practical application of research resulting in significant publications or comparable scholarship; active membership and effective participation in professional committee assignments and other professional organization activities; demonstrated outstanding competence in the field of responsibility; achievement of full maturity as an effective informal teacher, wise counselor, leader of extension educational programs, and representative of the university. These activities may occur in a domestic or international context.

D-5. LIBRARIAN:

a. Librarian with Rank of Instructor. Appointment to this rank requires an advanced degree in library science from a library school accredited by the American Library Association or an equivalent terminal degree and relevant experience and: (a) evidence of potential for successful overall performance and for development as an academic librarian; (b) when required for specific positions (e.g., cataloger, assistant in a subject library), knowledge of one or more subject areas or pertinent successful experience in library work.

b. Librarian with Rank of Assistant Professor. Appointment to this rank requires the qualifications for librarian with rank of instructor and: (a) demonstrated ability, competence, and effectiveness in performing assigned supervisory-administrative, specialized public service, or technical service responsibilities; (b) demonstrated ability to establish and maintain harmonious working relationships with library colleagues and other members of the university community; (c) evidence of professional growth through study; creative activity; participation in workshops, conferences, seminars, etc.; participation in appropriate professional organizations; awareness of current developments in the profession and ability to apply them effectively in the area of responsibility; (d) service to the library, university, or community through committee work or equivalent activities.

c. Librarian with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) acceptance of greater responsibilities, and conclusive evidence of success in the performance of them, e.g., bibliographical research performed in support of research activities of others; development of research collections; the preparation of internal administrative studies and reports; interpreting, and facilitating effective use of, the collections; effectively applying bibliographic techniques for organizing library collections; effective supervision of an administrative unit; (b) evidence of further professional growth, as demonstrated by keeping up to date in subject matter, methods, and procedures and by practical application of research resulting in significant improvement of library operations or in publication; effective participation in the work of appropriate professional organizations; and/or formal study, either in library science or in pertinent subject areas; (c) evaluation by colleagues as a person of demonstrated maturity, stability, and integrity, with the capacity for further significant intellectual and professional achievement. These activities may occur in a domestic or international context.

d. Librarian with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of librarians and: (a) demonstrated outstanding competence in the area of responsibility; (b) achievement of an outstanding record of creative librarianship, of effective administration, or of practical application of research resulting in significant publications or comparable productivity; (c) an

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

additional degree in library science or in a pertinent subject area or equivalent achievement; (d) regional or national recognition for contributions to the profession based on publications or active and effective participation in the activities of professional organizations; (e) evaluation by colleagues as an effective librarian who will continue to recognize that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

D-6. PSYCHOLOGIST OR LICENSED PSYCHOLOGIST:

a. Psychologist with Rank of Instructor. Appointment to this rank requires: an advanced degree in counseling, counseling psychology, clinical psychology, or closely related field earned in a professional program accredited by the appropriate accrediting association; evidence of effective skills in counseling or therapy; and evidence of pursuit of a terminal degree.

b. Psychologist or Licensed Psychologist with Rank of Assistant Professor. Appointment to this rank requires the qualifications for psychologist with rank of instructor and: a doctoral or equivalent terminal degree; evidence of effective skills in counseling or therapy; awareness of current developments in the profession; and demonstrated potential for participation in appropriate professional organizations, service to the Counseling and Testing Center, the university, and the community through teaching, committee membership, or equivalent activities, and the development and execution of research projects or the development and execution of outreach services designed to benefit UI students.

c. Licensed Psychologist with Rank of Associate Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: possession of a license as a psychologist in the state of Idaho; evidence of continued development of skills in counseling or therapy, as demonstrated by attendance at training workshops, personal study that leads to the presentation of workshops, classes, or seminars, or private study that leads to in-service training of personnel of the Counseling and Testing Center; evidence of continued professional development through service in professional organizations; evidence of effective teaching or training; completion of research that has resulted in quality publications or manuscripts of publishable merit, or the design and implementation of a continuing program in the Counseling and Testing Center that is of benefit to UI students and represents professional achievement of publishable merit; and continued service to the university and community through committee work or participation in community organizations. These activities may occur in a domestic or international context.

d. Licensed Psychologist with Rank of Professor. Appointment or promotion to this rank requires the qualifications applicable to the lower ranks of psychologists and: demonstration of outstanding competence in counseling or therapy; establishment of an outstanding record in research and publication or in development of continuing programs that contribute to the betterment of university students; continued professional improvement through private study, directed study, or attendance at workshops, conventions, etc.; regional or national recognition for contributions to the profession through publication, presentation of workshops, or active and effective participation in the activities of professional organizations; and recognition by colleagues as an effective psychologist who realizes that optimum productivity is a reasonable personal goal. These activities may occur in a domestic or international context.

D-7. OFFICER-EDUCATION: Appointment of persons to the faculties of the officer education programs was established for the purpose of ensuring the academic soundness of the programs. The dual role of these faculty members as military officers and academic instructors is recognized. The university expects the nominees to have demonstrated academic and intellectual capabilities and exemplary professional achievement. Specifically, UI expects:

a. Academic Preparation. It is desirable for officer education faculty members to have at least a master's degree. In his or her most recent education, the officer should have a superior academic record as demonstrated by such measures as high grade-point average in graduate school, being in the upper half of the class in graduate school, or superior graduate-level ability as attested in letters of recommendation from graduate-school professors.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

b. Specialized Preparation. The officer must have significant education, experience, or formal preparation in the subject areas in which he or she will teach.

c. Military Background and Preparation. A junior officer is expected to have had significant professional performance and experience. It is also desirable that the officer have some formal military education beyond commissioning. A senior officer should have broad experience with excellent performance. He or she is expected to have attended a junior or senior military college and to have made a distinguished record there.

d. Teaching. It is desirable for officers to have had some teaching experience. It is recognized that this is not always possible for junior officers. For such an officer, there should be some evidence that he or she will become a satisfactory teacher. Heads of officer education programs are expected to be experienced instructors.

e. Nominees who will pursue graduate studies at UI for one year before becoming an instructor will be given preliminary approval. In their last semester of full-time graduate enrollment, the service should submit the required information to the Officer Education Committee for regular, final approval. For preliminary approval, the officer should, in addition to the military requirement, show promise of being successful in graduate studies. This could be demonstrated by (a) a high score on the Graduate Record Examination, if taken, (b) full enrollment status as a graduate student at UI, (c) a high overall grade-point average in college (3.00 or above on a 4-point scale), (d) a high grade-point average in a major area, or (e) a good record in the final year of college and graduate-level ability as attested by letters of recommendation from college professors.

f. Appointment:

1. The following information is submitted by the nominee's service: (1) transcripts from undergraduate and graduate academic institutions; (2) transcripts or appropriate records from military schools and staff colleges; (3) at least three letters of recommendation from appropriate sources, such as former professors, military instructors, and supervisors or commanders. These letters should be concerned with matters such as the officer's civilian academic performance, military record and leadership ability, and actual or potential performance as a teacher. (Former supervisors or commanders could give their opinion based on the officer's demonstration of leadership ability and his or her experience as a training officer.); (4) a summary of the officer's duty assignments and military and teaching positions held; (5) copies of favorable communications from the officer's file.

2. The following is provided by the program unit concerned: (1) a description of the military schools attended and courses completed by the nominee; (2) a description of the positions held by the nominee; (3) an explanation of the appropriateness of the officer's experience and training to the courses he or she will teach.

3. Copies of the requested material are distributed by the local unit to the members of the Officer Education Committee at least 72 hours before the meeting at which the committee will consider the nominee. For appointments commencing in the fall, this information should normally be made available not later than the preceding May 1.

4. In the case of a person nominated to head an officer education program, UI may require a personal interview.

5. A minimum of two weeks, after receipt of all required information, is necessary for consideration of the nominee. UI notifies the nominee's service of its decision within one month.

D-8. UNIVERSITY DISTINGUISHED PROFESSOR: Acknowledgment of outstanding academic contributions to the university is appropriate and desirable. The rank of University Distinguished Professor² is bestowed upon

² As a result of Development Fund efforts, endowment support eventually may be obtained for many University Distinguished Fellowships, in which case a donor's name may be added to the title.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

University of Idaho faculty in recognition of sustained excellence in teaching, scholarship³, outreach, and service. The rank will be held for the remainder of the recipient's active service at the University; if the recipient leaves the University and is eligible for emeritus status, the rank will change to University Distinguished Professor Emeritus. The rank is highly honorific and therefore will be conferred on no more than three faculty members university-wide in any given academic year. Selection of University Distinguished Professors will reflect the diversity of scholarly fields at the University. University Distinguished Faculty will receive a stipend of at least \$5,000 per year for five years to be used to enhance salary or support professional activities (e.g., professional travel, student support, equipment, materials and supplies, etc.). Final discretion in conferring the rank of Distinguished Professor and the number of appointments in a given year resides with the President.

a. Selection Criteria: In general, University Distinguished Professors will have received national and usually international recognition. They will have brought distinction to the University through their work.

University Distinguished Professors will have achieved a superior record in the following areas: scholarly, creative, and artistic achievement; breadth and depth of teaching; and University service and service involving the application of scholarship, creative, or artistic activities to addressing the needs of one or more external publics.

University Distinguished Professorships will be conferred on members of the University of Idaho Faculty who have attained the rank of Professor and have completed a minimum of seven years of service at the University, typically at the rank of Professor.

b. Selection Process: University Distinguished Professorships will be awarded by the president upon recommendation of The University Distinguished Professorship Advisory Committee a standing committee composed of four faculty members and three deans. The committee members should reflect all dimensions of diversity in the university community. They will be appointed by the Provost to serve three-year terms on a staggered basis. Nominations will be made by Faculty Senate and the Academic Deans, in consultation with faculty and administrators of units. Committee members must be tenured professors who themselves have outstanding records of teaching, research and/or outreach.

1. The Provost will request nominations from faculty, deans, directors and unit administrators annually.
2. Written nominations will be submitted to the Provost and must include:
 - a. A nominating letter with a brief summary of the candidate's achievements;
 - b. The candidate's *curriculum vitae*, including a list of any significant previous awards;
 - c. Letters of endorsement from the appropriate deans and unit administrators or director(s). The candidate may also include a maximum of three additional letters of support, as appropriate, from students, colleagues at the University of Idaho, and/or other institutions. Letters should describe the impact of the nominee on her/his field, evidence of external recognition, and the context of her/his work over the course of her/his employment.
3. The University Distinguished Professorship Advisory Committee reviews the nominations and makes recommendations to the Provost for transmittal to the President.
4. Because the rank of University Distinguished Professorship is intended to be highly honorific, it is possible that in a given year no candidates will be selected.
5. The applications of nominees who are not selected in the first year of nomination will remain active for a total of three years. Nominators will have the opportunity to update their nomination during subsequent years in which their candidate is under consideration.

D-9. CLINICAL FACULTY: Clinical faculty may be appointed for the purpose of performing practicum, laboratory, or classroom teaching. Clinical faculty is a non-tenure track position. Clinical faculty positions are appropriate for professional disciplines having strong applied and/or clinical elements or those serving university units or academic departments in a supporting capacity. Appointment to clinical-faculty status constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, and confers responsibilities and privileges as stated in a below. Clinical faculty members may be appointed and/or promoted to

³ Scholarship in this context includes scholarship of discovery, scholarship of pedagogy, scholarship of application and integration, and artistic creativity.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

the ranks of clinical assistant professor, clinical associate professor or clinical full professor.

a. Responsibilities, Privileges, and Rights. A clinical faculty member has a primary employment responsibility in a UI unit. The relationship of a clinical faculty member to UI is essentially that of a collaborator with a UI unit, program, or faculty member. The guarantees afforded by the principle of academic freedom [see 3160] are extended to members of the clinical faculty. They have the same responsibilities and privileges as university faculty (FSH 1520 II 1)

Clinical faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Clinical faculty members may have teaching as a primary or major responsibility; in addition, they may advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees, engage in outreach and engagement activities, and act as expert advisers to faculty members or groups.

2. The nature and extent of the services to be rendered are determined jointly by the clinical faculty member, his or her immediate supervisor, and the unit administrator(s) concerned.

b. Qualifications. Assignment to a clinical faculty position is based on demonstrated knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to those expected of faculty within the unit.

c. Conversion. Instructors and senior instructors who meet the qualifications for clinical faculty defined in D-9 b. may be considered for clinical faculty status upon the recommendation of the unit administrator and dean, subject to approval by the provost. Credit for prior equivalent experience may be granted by the provost up to a maximum of four years. Conversion of an existing tenure-track or tenure line in a unit to clinical status requires the approval of the dean and provost. A unit must demonstrate that a clinical position better advances the university's strategic goals than a tenure-track position.

E. EMERITUS STATUS. (FSH 1520 II.2)

E-1. PURPOSE. Emeritus status benefits both the university and emeriti by providing opportunities for emeriti to maintain ties with faculty members and continue service to the university and community.

E-2. ELIGIBILITY. A board-appointed, benefit-eligible member of the university faculty who holds one of the ranks described in 1565 D and who leaves the university and has a minimum of 8 years of service and attained the rule of 65 (age plus years of service is at least 65) is eligible for emeritus status.

E-3. APPOINTMENT.

1. Faculty must request consideration for emeritus status. This request may be made in the notice of resignation or in a request made directly to the provost. This request may be made along with or at any point following the submission of the letter of resignation. If a faculty member who is eligible for emeritus status under section E-2 does not request consideration for emeritus status in their resignation letter, then their college or department will send a notice to the faculty member asking if they wish to request emeritus status. The college or department will send a similar notice to any eligible faculty who receives a terminal contract due to program closure or similar circumstances.
2. In ordinary circumstances, the provost will grant emeritus status if the eligibility requirements specified in E-2 are satisfied. In exceptional circumstances, the provost may suspend the above eligibility rules and award, deny, or revoke a faculty member's emeritus status with a written notification to the faculty member stating the reasons for the decision and notifying them of the ability to appeal. A faculty member may appeal this decision to the Faculty Senate Chair, Faculty Senate Vice Chair, and Faculty Secretary, where the provost's decision must be upheld by a unanimous vote in order to be enacted. Examples of exceptional circumstances include the reasons outlined in FSH 3910 A-1.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

3. A list of emeriti is maintained by the Provost's office.
4. Emeriti are responsible for updating contact information with the university.

E-4. PRIVILEGES.

- a. **Access.** Emeriti continue to have access to research, library, and other UI facilities.
- b. **Participation.** UI encourages the voluntary continued participation of emeriti in the activities of the academic community. Emeriti may take an active role in the service and committee functions of their department, college, and the university as described in FSH 1520 II.2. Other activities are subject to approval by the provost.
- c. **Title.** Emeriti may use the title "professor emeritus/emera," "research professor emeritus/emera," or "extension professor emeritus/emera," as applicable. A faculty member without such rank has the designation "emeritus" or "emera," as applicable, added to the administrative or service title held at the time of retirement.
- d. **Mail.** Departmental mailboxes continue to be available to emeriti who reside locally. Emeriti who have departmental mailboxes receive full distribution of departmental notices unless otherwise requested.
- e. **Office supplies.** Office supplies are available under regular departmental procedures.
- f. **Postage.** Departmental postage may be used for professional mail.
- g. **Parking.** Emeriti receive one non-transferable gold parking permit annually.
- h. **Discount programs.** Emeriti receive any discounts available to other faculty members through various UI programs.
- i. **Functions.** Emeriti are invited to the same university, college, and departmental functions as active faculty.
- j. **Travel funding.** Travel funding may be used to support professional activities of emeriti in service to the university (e.g. guest lectures, research design, consultation, etc.). Emeriti may have a lower priority for travel funding than active faculty and such funding is at the discretion of the unit administrator or dean.
- k. **Office/lab space.** Offices and labs for emeriti are provided on a space-available basis as determined by the unit administrator or dean, giving higher priority to active faculty and unit needs. Office and lab space allocations to emeriti may be revoked upon 60 days' notice.
- l. **Information technology services.** Emeriti who elect to maintain an active computing account will retain access to services provided by Information Technology Services (ITS) including electronic communications (e.g., email, instant messaging, etc.), technical support, and offered software.

E-5. EMPLOYMENT OPPORTUNITIES.

- a. Emeriti may hold a temporary or permanent part-time position (0.49 FTE or less) subject to regular employment procedures. It is the responsibility of emeriti to consult with HR regarding impact to benefits.
- b. Emeriti shall not serve as supervisors of other employees unless they hold a position as outlined in E-5-a herein.

F. ASSOCIATED FACULTY: Associated faculty members (see FSH 1520 II-3) have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit's discretion. They are not eligible for sabbatical leave.

F-1. AFFILIATE FACULTY:

- a. **General.** The affiliate faculty consists of professional personnel who serve academic departments in a supporting capacity. Appointment to affiliate-faculty status constitutes a recognition of the appointee's scholarly contributions and professional accomplishments, confers responsibilities and privileges as stated in subsection d below, and authorizes assignment of service functions as described in subsection d-2 below. It is also a means of encouraging greater cooperation between and among academic departments and other units. An affiliate faculty member holds a non-tenure-track faculty status in an appropriate academic discipline.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

b. Employment Status. An affiliate faculty member may, by virtue of his or her employment, have either one of the following relationships with UI: (1) that of a UI employee, normally an exempt employee, who is [a] a member of the faculty or staff of a unit of the university other than the one in which he or she has affiliate-faculty status, or [b] a member of the professional support staff of the same unit of the university in which he or she has affiliate-faculty status; (2) that of an employee of a governmental or private agency who is assigned by that agency to a UI unit or to one of the agency's units or programs that is officially associated with the university.

c. Distinction between Affiliate and Adjunct Faculties. Members of the affiliate faculty have a more direct relationship with UI than do members of the adjunct faculty [see 1565 F-2]. Members of the adjunct faculty are not UI employees. An adjunct faculty member's primary employment is with a unit or program that is not officially associated with UI. Thus, the relationship of a member of this faculty category to UI is essentially that of a collaborator with a UI unit, program, or faculty member. An affiliate faculty member, in contrast, has a primary employment responsibility in a UI unit or in a non-UI unit that is officially associated with UI. In addition, he or she has a secondary relationship to another unit in a supporting role, or has a secondary relationship to the academic program in the same unit in which he or she has a primary employment responsibility. These latter relationships are the kind that are recognized by the affiliate faculty membership.

d. Responsibilities, Privileges, and Rights. The guarantees afforded by the principle of academic freedom [see 3160] are extended to members of the affiliate faculty. They have substantially the same responsibilities and privileges as do members of the university faculty; however, their right to vote in meetings of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. (Those who, in addition to their affiliate-faculty status, have status as members of the university faculty [e.g., psychologists in the Counseling and Testing Center and regular faculty members in other academic departments] have, of course, full rights of participation in meetings of the university faculty and of the constituent faculties to which they belong.)

Affiliate faculty members perform administrative, analytical, and research functions that complement UI's mission in teaching, research, and service.

1. Affiliate faculty members, as such, do not normally have teaching as a primary or major responsibility; however, with the approval of academic departments, they may teach classes, advise students on their academic or professional programs, participate in research projects, serve on graduate students' supervisory committees (with approval by the dean of graduate studies), or act as expert advisers to faculty members or groups.

2. The nature and extent of the services to be rendered are determined jointly by the affiliate faculty member, his or her immediate supervisor, and the departmental administrator(s) concerned.

3. Affiliate faculty qualify for the faculty-staff educational privilege [see 3740]

e. Qualifications. Assignment to an affiliate faculty position is based on demonstrating knowledge and experience, academic degrees, scholarly contributions, or other professional accomplishments comparable to what is expected of faculty within that unit.

f. Appointment.

1. Appointments to the affiliate faculty may be made at any time. They are reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointment should be continued unless the affiliate faculty member remains in UI employment or continues in his or her assignment to an entity that is officially associated with the university.

2. A recommendation for appointment to the affiliate faculty normally originates in the appropriate academic department and requires the concurrence of the nominee's immediate supervisor and the faculty

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

of the appointing department. The appointment must be approved by the dean of the college, the president, and the regents.

3. An appointment, termination, or other change in affiliate-faculty status is made official by means of a "Personnel Action" form.

F-2. ADJUNCT FACULTY:

a. General. The adjunct faculty includes highly qualified persons who are not employed by UI but are closely associated with its programs. [For the distinction between the affiliate and the adjunct faculty categories, see 1565 F-1-c.]

b. Responsibilities. Members of the adjunct faculty have the same academic freedom and responsibility as do members of the university faculty; however, their right to vote in meetings of the university faculty and of their constituent faculties is limited in accordance with the provisions of 1520 II-3-b. Adjunct faculty members may be assigned to advise students on their academic or professional programs at any level; to work in cooperative research projects; to serve on committees, including graduate students' supervisory committees (with approval by the College of Graduate Studies); to act as expert advisers to faculty members or groups; and to teach courses in their branch of learning.

c. Qualifications. Adjunct faculty members must be highly qualified in their fields of specialization and should have exhibited positive interest in UI programs in the field of their appointment. Their qualifications should ordinarily be equivalent to those required of regular members of the faculty in the area and at the level of the adjunct faculty member's responsibility.

d. Adjunct faculty do not qualify for the faculty-staff educational privilege. (see 3740)

e. Appointment.

1. Appointments to the adjunct faculty may be made at any time. b. Appointments are for an indefinite period, but are to be reviewed by the dean of the college before publication of each issue of the *General Catalog*. No appointments should be continued unless the adjunct faculty member is actively engaged in the responsibilities for which he or she was appointed.

2. Recommendations for appointment to the adjunct faculty are normally developed at the departmental level and have the concurrence of the departmental faculty. For interdisciplinary degree programs, adjunct faculty may also be assigned responsibilities with respect to the degree programs with approval of the program faculty and of the program director. Appointments must be approved by the dean of the college, the provost, the president, and the regents.

3. Before formal appointment procedures are begun, the prospective adjunct faculty member must agree to serve under the provisions herein described. When necessary, the consent of the nominee's employer, if any, will be requested and recorded.

4. Appointment information is recorded on the regular "Personnel Action" form.

5. The appointment of adjunct faculty members to graduate students' supervisory committees requires approval by the dean of the College of Graduate Studies.

G. TEMPORARY FACULTY: Temporary faculty have access to the library and other UI facilities. Reimbursement for travel or for services to UI is at the unit's discretion. They are not eligible for sabbatical leave.

G-1. LECTURER. A teaching title that may be used at any level, i.e., it carries no specific connotation of rank among the professorial titles. This title is conferred on one who has special capabilities or a special instructional

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

role. Lecturers are neither tenurable nor expected to progress through the professorial ranks. A lecturer qualifies for faculty status with vote during any semester in which he or she (a) is on an appointment greater than half-time and (b) has been on such appointment for at least four semesters. When a lecturer qualifies for faculty status they shall be reviewed at a minimum of every 5 years thereafter as determined by the unit's bylaws. The review committee defined by the unit's bylaws shall include tenure-track faculty within the unit.

G-2. VISITING FACULTY. A designation that, when used with a professorial title, customarily indicates that the appointee holds a regular teaching or research position at another institution. A visiting appointee who does not hold a professorial rank elsewhere may be designated as a lecturer. Appointees with visiting academic ranks (e.g., visiting associate professor, visiting professor) are considered temporary members of the university faculty. Those on full-time appointment have the privilege of voting in meetings of the university faculty and of the appropriate constituent faculties.

G-3. ACTING. Persons who are judged competent to perform particular duties may be appointed for temporary service as acting members of the faculty. An acting appointment may also be used to establish a probationary period for an initial appointment of a person who, while being considered for a regular position on the faculty, is completing the required credentials for a permanent appointment. Persons on acting status are not voting members of the university faculty or of constituent faculties.

G-4. ASSOCIATE. A title for a nonstudent with limited credentials who is assigned to a specialized teaching, research, or outreach position. Associates are exempt staff and are not members of the university faculty or of constituent faculties.

H. NON-FACULTY: Those within this category are not members of the faculty.

H-1. POSTDOCTORAL FELLOW. Postdoctoral fellows are persons who hold the doctoral degree or its equivalent at the time of their appointment and are continuing their career preparation by engaging in research or scholarly activity. Postdoctoral fellows are special exempt employees in the category of "temporary or special" (FSH 3080 D-2 a) employees recognized by the regents. [See also 3710 B-1.b.]

H-2. GRADUATE STUDENT APPOINTEES: The general nature of the following graduate assistantships is defined as an apprenticeship experience that consists of a work obligation partnered with educational and developmental activities, all of which are integrated with the graduate degree program of the student. All graduate assistants must be individually mentored by a faculty advisor and may receive additional mentoring from other faculty and/or staff on or off campus. All graduate assistant positions (H-2. a, b, c) are limited to twenty hours per week of work. All graduate student appointees must be academically qualified and registered. [See also 3080 D-2-a.]

a. Graduate Teaching Assistant. Graduate Teaching Assistants perform duties related to the instructional efforts of the unit in which they are employed under the supervision of a member of the university faculty, associated faculty, or temporary faculty (see FSH 1565 D, F, and G). These duties, which must be associated with academic credit instruction and constitute at least 50 percent of a Graduate Teaching Assistant's effort, may include, but not be limited to: primary teaching responsibilities; grading assignments; assisting with the delivery of instruction through technology; and providing other assistance related to instruction.

b. Graduate Research Assistant. Graduate Research Assistants develop competence in performing professional-level work in support of research, scholarship, or creative activity. These positions can only have duties within the scope of work permitted by the funding source.

c. Graduate Support Assistant. Graduate Support Assistants perform a wide range of duties and can have varying responsibilities in academic and non-academic campus departments and programs. The specific duties depend on the needs of the office or project and on the qualifications and experiences of the Graduate Support Assistant. Graduate Support Assistants may provide academic and/or non-academic instruction, and/or assist with research, or provide other support functions. The duties must be directly related to the Graduate Support

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1565: Academic Ranks and Responsibilities

Assistant's program of study. The College of Graduate Studies shall periodically publish standards governing the permissible scope of Graduate Support Assistant appointments on its website.

I. QUALIFICATIONS OF NONFACULTY MEMBERS FOR TEACHING UI COURSES. Persons who are not members of the university faculty but are selected to teach UI courses offered for university-level credit (including continuing-education courses and those offered by correspondence study) are required to have scholarly and professional qualifications equivalent to those required of faculty members.

Version History

Amended July 2022. Revised and clarified section C-1.a. to expand and clarify the evidence that may be used in evaluating teaching effectiveness.

Amended July 2021. Editorial changes.

Amended July 2020. The policy on emeritus status was extensively revised to provide greater clarity, ensure conformity with labor law, and add the ability to revoke emeritus status in exceptional circumstances. Section D-5 Librarian was revised to provide more flexibility in recruiting efforts.

Amended January 2020. The policy on office hours was moved from FSH 3240 to C-1.c. Changes were made to sections C-1 and C-3 to ensure that faculty efforts in the areas of teaching, advising, and outreach and extension are properly credited.

Amended July 2018. A new category for graduate support assistants was added to address needs that are not covered under the role of a typical teaching or research assistant position.

Amended July 2014. The cap on non-tenure track faculty appointments in a unit was adjusted and promotion processes clarified and revised.

Amended January 2014. The time necessary to qualify for emeritus status was redefined.

Amended July 2013. Definitions for research and teaching assistants were more clearly defined.

Amended July 2012. Edits were made to the Distinguished Professor under D-8 and to the qualifications for Emeritus status and a search waiver under E.

Amended July 2011. Voting for associated faculty was clarified and Clinical Faculty under "G. Temporary Faculty" moved to "D. University Faculty" as D-9 and was revised.

Amended July 2010. The affiliate and adjunct terms were switched to conform to national norms and the rank of Distinguished Professor was added.

Amended January 2010. Changes to the faculty position description and evaluation forms integrating faculty interdisciplinary activities into the evaluation processes were incorporated into this policy. Ranks for Associated Faculty in F were removed because the promotion process as detailed in 3560 for faculty ranks was deemed excessive for associated faculty. Those currently holding a specific rank in adjunct or affiliate will retain that privilege.

Amended July 2008. The policy was reorganized to better reflect classifications as stated in FSH 1520 Article II.

Amended July 2006. Substantial revisions were made to Section A.

Amended July 2001. Section J-1, voting rights for lecturers, was changed.

Amended July 2000. Revisions were made to C-1, D-1, and E-1.

UI FACULTY-STAFF HANDBOOK
Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE
Section 1565: Academic Ranks and Responsibilities

Amended 1998. Extensive revisions were made to B (entirely new), C, D, and E.

Amended July 1998. Section A underwent additional substantial revision.

Amended July 1996. The definitions of ‘postdoctoral fellow’ (J-5), ‘graduate assistant’ (K-3) and ‘research fellow’ (K-4) were revised.

Amended July 1994. Section A was substantially revised, so as to underline better the importance of both teaching and scholarship. The so-called “Voxman Amendment” (the addition of ‘in the classroom and laboratory’ to the list of possible venues wherein the evaluation of scholarship might take place) made its first appearance.

Amended 1987. The material in section I was added.

Adopted 1979.

POLICY COVER SHEET

For instructions on policy creation and change, please see
<https://www.uidaho.edu/governance/policy>

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Comprehensive review? _x_Yes __No

- Policy/Procedure Statement:** Briefly explain the reason for the proposed change. Comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.

The following are the major changes to the policy:

- The policy was rewritten using language more accessible and understandable for students.
- The Code of Conduct and conduct process were combined in a single policy for ease of use.
- Removed processes related to Title IX sexual harassment to align with the recently revised FSH 6100.
- Added clarifying language around academic dishonesty resolution.
- Added language aligning with case law to follow best practices in student conduct policies.
- Added a section on free speech.

- Fiscal Impact:** What fiscal impact, if any, will this change have?

No direct impact.

- Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 2400

STUDENT CODE OF CONDUCT & RESOLUTION PROCESS

CONTENTS:

- A. Introduction**
- B. Purpose**
- C. Scope**
- D. Definitions**
- E. Prohibited conduct**
- F. Conduct resolution process**
- G. Miscellaneous**

A. Introduction

A-1. The University of Idaho is committed to creating and maintaining a productive living-and-learning community that fosters the intellectual, personal, cultural, and ethical development of its students. Self-discipline and respect for the rights and privileges of others are essential to the educational process and to good citizenship. Student expectations include:

- Students are expected to show respect for order, civility, and respect for the rights of others within and without the University as these attributes are demanded of good citizens.
- Students are expected to uphold the rights and dignity of others regardless of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation or gender identity.
- Students are expected to uphold the integrity of the University as a community of scholars in which free speech is available to all and intellectual honesty is demanded of all.
- Students are expected to respect University policies as well as local, state, and federal law.

A-2. The University of Idaho conduct process works to balance the safety and security of the members of the University of Idaho community through personal accountability, reflection, and growth. Students have an opportunity to reflect on their choices, understand how their actions have an impact on those around them, and grow from the experience.

A-3. The University strives to provide a fair and consistent student conduct process based on university policy and best practices. By educating students to better understand how their decisions affect themselves and their community they learn reflection, follow-up, and accountability. The Dean of Students Office collaborates with campus and community partners to provide resources and support to students.

B. Purpose

B-1. The Student Code of Conduct & Conduct Resolution Process (“the Code”) contains prohibited student conduct and regulations for addressing reports of such conduct in a manner consistent with the requirements of procedural due process. In addition to the general expectations for conduct as set forth in this chapter, it contains a description of prohibited conduct.

B-2. The Dean of Students or their designee (referred to collectively in the Code as “the DOS”) has primary authority and responsibility for the administration of the Code.

The DOS, upon finding, in its discretion, that there is a conflict of interest, or for other reasons necessary to effectuate the policy, may appoint an external person to serve in any of the roles created in the Code. The Dean of Students works with faculty, staff, hearing officers, and/or the student conduct board in the disposition of Student Code of Conduct violations. There is no standard discipline that applies to violations of the Student Code of Conduct. In deciding the outcome in each situation, the Dean of Students will consider, among other factors, the nature and seriousness of the behavior, the motivation underlying the behavior, and precedent in similar cases.

B-3. Although DOS has primary authority and responsibility for administration of the Code, the Director of the University's Office of Civil Rights and Investigations (“OCRI”) has primary authority and responsibility for the investigation of prohibited student conduct that includes allegations of discrimination, as defined in the Code. We invite you to learn more about the interplay between the Code and OCRI's policies, procedures, and processes by visiting [OCRI's website](#) or directing inquiries to ocri@uidaho.edu.

B-4. The Code does not restrict protected speech, even speech that some may find objectionable. The interplay between freedom of speech and expectations for students is complex and we invite you to learn more about freedom of speech and the Dean of Students office student conduct processes as they relate to freedom of speech by directing inquiries to askjoe@uidaho.edu.

B-5. The University bears the burden of proving that a student engaged in misconduct by a preponderance of evidence. A “preponderance of evidence” means that quantity and quality of evidence which, when fairly considered, produces the stronger impression, and has the greater weight, and is more convincing as to its

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

truth than the evidence in opposition – or in other words, the facts as determined by the Hearing Officer or Board indicate that it is more likely than not that the student violated the Code. Formal rules of evidence applied in courtroom proceedings do not apply to this process. Evidence that is determined to be relevant to a case, by the Hearing Officer, Administrator, or Board Chair, is admissible at a hearing. This may include direct evidence, circumstantial evidence, documentary evidence, hearsay evidence, and signed statements. Admitting evidence does not imply that the evidence carries specific level of weight, including persuasiveness and credibility. Unduly repetitive information is not relevant.

B-6. The administration of the Student Code of Conduct and Student Conduct Process applies affirmative action and equal opportunity standards consistent with FSH 3060 and 3065. Additionally, the Code is supported by nondiscrimination practices and definitions in FSH 3200, 3210, 3215, and 6100.

C. Scope

C-1. Individuals subject to the Code

a. Students

1. By enrolling at the University of Idaho, students voluntarily accept responsibility for compliance with all University policies including the Code.
2. Students are responsible for their behavior from time of admittance to the University through the awarding of a degree, even though conduct may occur before classes begin or after classes end. Students are responsible for their conduct during the academic year and during periods between enrollment terms.
3. The University recognizes that students may also be employees, and their conduct may be subject to review and discipline under the Code and any applicable employment policies.

b. Reporting parties. Employees and students who are reporting student behavior that may be prohibited by the Student Code of Conduct.

c. Other. Employees and students who are otherwise involved in the conduct process.

C-2. Behavior subject to the Code

a. The Code applies to conduct that occurs on University property, within or at University–sponsored activities, off campus, online, or through other electronic means.

b. The University may address off-campus behaviors when the Dean of Students determines that the off-campus conduct affects a University interest. University interests include but are not limited to health and safety, protection of rights or property of others and promoting the University’s mission.

c. Jurisdiction for the DOS to address student behavior or misconduct begins upon admission and ends at commencement. If serious misconduct was

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

committed while a student was enrolled but is reported after graduation, the University may invoke the disciplinary process referred to in Section F and may revoke the student's degree if they are found responsible.

d. If a student withdraws from school while a conduct matter is pending, the Code remains applicable to the student's conduct prior to withdrawal.

e. The University reserves the right to proceed with the conduct process in a student's absence or to delay the process until the student seeks re-enrollment.

f. Depending on conduct process outcomes, a hold may be placed on the student's ability to re-enroll and the student may be required to satisfy all outcome requirements prior to re-enrollment eligibility.

g. Behavior conducted online, or through any other electronic medium, including online postings, video, photographs, blogs, web postings, chats, and social networking sites is in the public sphere and is not private and falls within the jurisdiction of the Code provided the other criteria, e.g., student status, are satisfied.

h. If the prohibited conduct involves a student organization, the individual students are subject to the Code, and the organization is subject to FSH 2350 Student Organization Code and Resolution Process.

i. DOS encourages all behavior to be reported in a timely manner but understands that barriers may exist to reporting prohibited behavior and that some reported behavior warrants DOS review for conduct proceedings even if the reported behavior occurred well in the past. DOS has discretion to initiate conduct proceedings for all reported behaviors, regardless of time of occurrence, based on the nature of and totality of the circumstances.

D. Definitions. The following definitions explain the terminology used in the Code. Particular code violations are listed and defined in Section E Prohibited conduct.

D-1. Academic dishonesty: Intentional participation in deceptive practice in one's academic work or the academic work of others. Examples include cheating, fraud, plagiarism, or falsification of research results and are individually addressed and more fully defined in Section E .

D-2: Academic outcome: A consequence imposed by instructors for findings of academic dishonesty. Academic outcomes include, but are not limited to, grade adjustments, failing a class, or resubmission of academic work.

D-3: Academic work: Any academic work required for completion of academic requirements in a course. Academic work includes but is not limited to assignments, quizzes, examinations, problem solving, class exercises, and/or drafts of work.

D-4: Administrator: The Dean of Students or designee will serve as the administrator. The administrator can serve as a decision-maker and is the non-

voting advisor to the Student Conduct Board and each SCB hearing panel.

D-5: Advisor: The person of the student's choosing who has agreed to advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

D-6: Complainant: An individual who is alleged to have been subjected to conduct that could constitute prohibited conduct under the Code. There may be more than one complainant for an incident. In certain circumstances, the Dean of Students or another University official may initiate a resolution process under the Code against one or more respondents on behalf of the University where there is not a complainant in the incident, the complainant(s) is(are) unknown, or the complainant(s) does(do) not wish to participate in the resolution process. Initiating a resolution process under the Code does not suggest that the allegations are credible or have merit or that there is evidence sufficient to determine responsibility. The Dean of Students or other University official who initiates the resolution process does not become a complainant or other party to the resolution process and still serves free from bias or conflict of interest for or against any party in the process.

D-7: Conduct decision: A written decision determining the resolution of the reported behavior. The decision will include a finding of responsible or not responsible and any applicable outcomes.

D-8: Conduct record: The student conduct record maintained by the Dean of Students in connection with a reported or substantiated violation of the Code. The student conduct record may include complaints, notices, hearing records, conduct findings, outcomes, and other documents deemed relevant by the Dean of Students.

D-9: Consent: Knowing, voluntary, and clear permission by word or action to engage in activity with another individual(s), not limited to sexual activity. Consent can be withdrawn at any time upon notice, by word or action, to the other party.

D-10: Days: Days that the University is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

D-11: DOS: The Office of the Dean of Students, which is responsible for the administration of the Student Code of Conduct and includes the Dean of Students and their designees.

D-12: Educational setting: All academic, educational, extracurricular, athletic, and other programs of the University of Idaho, regardless of location, and including online formats.

D-13: Final institutional decision: The final institution decision is the outcome of an informal resolution, hearing with a hearing officer, or hearing with a student conduct board and at the point at which the parties have pursued or declined all response opportunities.

D-14: Finding: A conclusion reached as result of an inquiry, investigation, or hearing and is also referred to as a decision.

D-15: Formal resolution process: A conduct process by which notice and opportunity to be heard is provided and that often includes a student conduct process occurring before a Hearing Officer or Student Conduct Board which issues a written decision following the hearing.

D-16: Hearing: A formal process maintained by the University to review and address allegations of violations of the Code that follows the process and rules outlined in the Code but is not subject to other external rules (such as federal or state evidentiary rules or procedures).

D-17: Hearing officer: A person appointed by the Administrator to serve as the person presiding over a hearing. The hearing officer investigates the alleged behavior and administers the conduct process for informal resolutions. The Administrator may also serve as the hearing officer.

D-18: Hearing panel: A panel composed of members of the Student Conduct Board, who are selected by the Student Conduct Board chairperson for purposes of hearing a formal resolution process and issuing a written decision that may include findings of responsibility of Code violation.

D-19: Informal resolution process: An alternative method of resolving a matter under the Code, entered into voluntarily by all parties and the University, that seeks to address and resolve the alleged conduct or harm without the use of the formal resolution process outlined below.

D-20: Instructor: In cases of academic dishonesty, the instructor may be the faculty member, teaching assistant, or other employee responsible for course instruction.

D-21: Investigator: The person assigned by the University to investigate a report of a violation of the Code.

D-22: Mediation: An intervention between conflicting parties to promote reconciliation, settlement, or compromise.

D-23: Misconduct: Behavior that is prohibited by the Student Code of Conduct or that violates a University directive or policy.

D-24: Office of Civil Rights & Investigations (OCRI): The Office at the University that is responsible for ensuring compliance with federal and state laws and University policies related to discrimination or harassment based on a protected class. This includes retaliation when engaging in a protected process. OCRI undertakes necessary investigations and prepares recommendations and written reports that may be reviewed by the DOS for further conduct processes related to the underlying facts investigated and the nature of the reported behaviors of students investigated by their office.

D-25: Outcome: Disciplinary or corrective action imposed by the deciding body of a student conduct process following a finding of student misconduct. The term includes, but is not limited to, educational programming, restitution, community service activities, apology letters, probation (including denial of specified University privileges), suspension, termination, or other such outcomes deemed appropriate.

D-26: Parties: The Respondent(s) and the Complainant(s).

D-27: Policy: The written regulations of the University as found in, but not limited to, the Faculty Staff Handbook, including the Student Code of Conduct, the Administrative Procedures Manual, the Residence Hall Handbook, all Housing and Residence Life policies, and Graduate and Undergraduate Catalogs.

D-28: Preponderance of the evidence standard: The standard of evidence that is used to decide responsibility of Code violation. It means that it is more likely than not, based upon the totality of all relevant evidence and reasonable inferences from the evidence, that there is a violation of the Code.

D-29: Probation: The process or period of observing the character or abilities of a student to determine whether other corrective action should occur. An additional resolution process is not necessary to modify outcomes following a finding of misconduct where probation is imposed. The DOS has discretion to modify the terms of probation as necessary based on the information available to the DOS during a student's probation.

D-30: Protected Status: Protected status includes race, color, religion, national origin, age, protected military status, disability, family status, genetic information, creed, or sex (including pregnancy, parenting, sexual orientation, or gender identity or expression).

D-31: Respondent: The student who is alleged to have violated the Code.

D-32: Student: Includes, but is not limited to, all persons admitted to the University, either full time or part time, online or in person, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- a. Persons who are suspended, or those who withdraw or graduate after allegedly violating the Code of Conduct.
- b. Persons who are eligible to enroll for classes without applying for re-admission.
- c. Individuals participating in the American Language and Culture Program, Independent Study of Idaho sponsored by the University of Idaho, the University of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

D-33: The Code: The Student Code of Conduct and Conduct Resolution Process.

D-34: Student Conduct Administrator (Administrator): The University of Idaho official designated by the DOS to serve as an investigator or hearing officer. It will also include the Administrator's designee.

D-35: Student Conduct Board (SCB): The formal body that reviews student conduct matters, as set forth in the Code.

D-36: Weapon: Weapon is defined in APM 95.12.

E. Prohibited conduct. Specific behaviors of misconduct are identified and defined below.

E-1. Academic dishonesty. Acts of academic dishonesty include but are not limited to the following:

- a. **Cheating.** Cheating includes, but is not limited to, the following actions as they relate to academic work:
 1. Using, purchasing, providing, or possessing unauthorized materials, sources, or assistance without authorization from the instructor.
 2. Copying from another's academic work either for the student's own use or for the use of others.
 3. Sharing academic work without prior permission from instructor.
 4. Acquiring, without written or verbal permission, tests or other academic material belonging to the instructor or another member of the University faculty or staff.
 5. Completing academic work for someone else or having someone else complete academic work on your behalf.
 6. Representing another student in a class for attendance or participation purposes or asking another person for representation

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

for attendance or participation purposes.

7. Fabrication or falsification of data, research or academic content and the unauthorized alteration or invention of any information or citation.

8. Forging, altering, reproducing, removing, destroying, or misusing any University document, record, or instrument of identification.

b. Plagiarism. Plagiarism includes, but is not limited to, the following:

1. Using, by paraphrase or direct quotation, the published or unpublished work of another person without full and clear acknowledgment.

2. The unauthorized alteration or invention of a citation.

3. Buying or selling academic work for the purpose of submitting it for course completion.

4. Submitting academic work, or any part of academic work, completed for one course as work for another course without the express prior approval of both instructors.

c. Prohibited behavior. Engaging in any behavior related to course completion prohibited by the instructor or otherwise including but not limited to unauthorized collaboration and reliance on prohibited technological assistance/artificial intelligence tools.

d. Misrepresenting facts for academic advantage. Examples include but are not limited to providing false academic achievements and false medical documentation for academic extensions.

e. Violation of University policy regarding intellectual property and research. All data acquired through participation in University research programs is the property of the University and must be provided to the principal investigator. In addition, collaboration with the Office of Research and Economic Development for the assignment of rights, title, and interest in patentable inventions resulting from the research is also required. See FSH 3200 and 5400.

E-2. Disruption or misuse of University resources or property. This behavior includes but is not limited to the following:

a. Theft or damage. Attempted or actual theft of or damage to University property.

b. Unauthorized possession. Unauthorized possession, duplication, or use of University keys, lock combinations or other access codes or passwords that can be used to access University property or facilities.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- c. Unauthorized entry or use.** Unauthorized entry into or use of any University owned or managed building, space, outdoor area, or property. This also includes other restricted areas identified in APM 35.35.
- d. Violation of law or other policy.** Violation of local, state, federal or campus fire policies including but not limited to:
 - 1. Building or setting fire(s) without proper authorization as required by APM 35.25.
 - 2. Removing or otherwise tampering with fire equipment or fire alarm systems.
 - 3. Failure to promptly vacate a building
 - 4. Intentionally or recklessly causing a fire that damages University or personal property or causes injury.
 - 5. Causing, making, or circulating a false report or warning of fire, explosion or another emergency.

- E-3. Misuse of technology resources.** Theft or other abuse of University computer facilities or resources. This includes but is not limited to the following:
- a. Interfering with the normal operation of the University computing system or resources.
 - b. Inappropriate or disproportionate use of an IT resource owned or controlled by the University.
 - c. Any violation of APM 30.12 [University Acceptable Use of Technology Resources](#).

- E-4. Threat of harm or actual harm to a person's physical or mental health or safety.** This behavior includes but is not limited to the following:

- a. Behavior involving physical force or threat of physical force.** Behavior involving physical force that hurts another person or intimidation or threat of such force directed at another person where a reasonable person would believe the threat to be serious and imminent in nature. It includes the following:
 - 1. **Fighting.** Engaging in violence, combat, or aggression.
 - 2. **Assault.** Behavior intended to cause apprehension of harmful or offensive contact that causes apprehension of physical safety of another. The act required for an assault must be overt. Although words alone are insufficient, they may create an assault when coupled with some action that indicates the ability to carry out the

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

threat and it creates a fear of it being carried out in the person the assault behavior is directed at.

- 3. Battery.** Actual and intentional unwanted touching or contact with another person, even if the physical injury is slight.
- 4. Use of a knife, gun, or other weapon.** The use of a knife, gun, or other weapon except in reasonable self-defense in any act of violence as defined in the Code.
- 5. Involuntary restraint or transport.** Restraining or transporting a person against their will.
- 6. Other.** Any action that threatens or endangers the physical health or safety of any person.

b. Prohibited harassment

1. General definition. Prohibited harassment is hostile or threatening conduct or speech, whether verbal, written, or symbolic, that is sufficiently severe or pervasive, as viewed by a reasonable person under similar circumstances and with similar identities to the victim, and results in an objectively hostile or threatening environment that interferes with or diminishes another's ability to participate in or benefit from the services, activities, or privileges provided by the University.

2. Exception. Speech that is protected by the First Amendment to the United States Constitution, including relevant academic speech spoken in a classroom or writing assignment, protests and statements that do not meet the narrow definition described above, is not a violation of the Code, though it may go against community norms and may be harmful or hurtful to other members of the University community or members of certain groups.

c. Threatening or intimidating behavior. Threatening or intimidating behavior includes, but is not limited to:

- 1. Coercion.** The practice of persuading someone to do something by using force or threats.
- 2. Bullying.** Behavior seeking to harm, intimidate, or coerce another.
- 3. Deliberate destruction of or damage to property.** Deliberate destruction of or damage to public or private property, where a reasonable person would believe that the full or partial intention of the act is to harass an individual or a group based on protected characteristics as defined in [FSH 3200 Policy of Nondiscrimination](#).

d. Hazing. Hazing includes, but is not limited to, any action or participation in any activity that (i) causes or intends to cause physical or mental discomfort or distress, (ii) may demean any person, regardless of location, intent, or consent of perpetrators or victims or (iii) destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in, a group or organization. The express or implied consent of the victim will not be a defense. Apathy or acquiescence in the presence of hazing are not neutral acts. They are also violations of this rule.

Hazing also includes any activity that compels a student to participate in any activity that is unlawful, publicly indecent, or contrary to the policies and regulations of the University, or any activity that unreasonably and materially interferes with a student's academic efforts.

E-5. Discrimination and retaliation.

- a. Discrimination.** Limiting or denying services, benefits, or opportunities of the University based on a protected status. Examples of prohibited discrimination can be found on the [OCRI website](#) or by directing inquiries to ocri@uidaho.edu.

A person can engage in prohibited discrimination even if the person has the same protected status as or does not mean to offend the target(s) of the conduct. Alleged discrimination will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processes.

Discrimination includes:

1. Conduct prohibited by the Code, if based on a protected status, including harassment as defined in paragraph E-4.a, above.
2. Retaliation, as defined in paragraph E-5.b, below, when the protected activity is based on a protected status.
3. Different treatment discrimination, meaning intentionally treating an individual or group differently based on a protected status.
4. Disparate impact discrimination, meaning evenhandedly implementing a facially neutral practice or rule in a way that has an adverse impact on one or more individuals based on a protected status.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

b. Retaliation. Retaliation includes conduct that intimidates, interferes with, threatens, coerces, or otherwise discriminates against any individual because that individual opposes or reports a perceived wrongdoing, inequity, or violation of law or University policy, files a complaint alleging illegal or prohibited discrimination or violation of law or University policy, participates in a University grievance or response procedure, or participates in a University dispute resolution process. Alleged retaliation when the activity is based on a protected status will be referred to OCRI, the office responsible for investigating those claims using its complaint resolution processes.

E-6. Disruption, obstruction, or interference with normal University activities.

Members of the University community have the right to a campus that is free from unreasonable disruption, obstruction, or interference. Disrupting or obstructing normal University activities, including, but not limited to, all academic activities, University programming, athletic events, and administrative functions is prohibited. Examples include:

- a.** Classroom disruption: Behavior that interferes with the teaching or learning process in the classroom or educational setting and continues after an instructor's request to cease.
- b.** Obstruction of the free flow of pedestrian or vehicular traffic on campus.
- c.** Conduct that is lewd, indecent or disruptive that is not otherwise constitutionally protected speech.
- d.** Falsifying, distorting, or misrepresenting information provided to the University.
- e.** Interference with the student conduct system, which includes, but is not limited to, any of the following:
 - 1.** Failure to cooperate with the University's investigation or disciplinary proceeding. If a party in a case does not want to participate because they believe that doing so would cause them to speak or offer evidence against themselves, and they notify the DOS that this is the reason they are choosing not to participate or only to participate partially, this violation will not apply.
 - 2.** Disrupting or interfering with the University's investigation and student conduct proceedings.
 - 3.** Making false allegations.
 - 4.** Attempting to discourage an individual's proper participation in, or use of, the student conduct process.
 - 5.** Harassment (verbal, physical, written, or electronic) or intimidation of any person participating in the University's investigation prior to, during, or after the investigation and conduct

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

process concludes.

6. Failure to comply with the outcome(s) imposed pursuant to the disciplinary process.

f. Influencing or attempting to influence another person to commit any violation of the Code.

g. Engaging in speech, including but not limited to verbal, electronic, or written communication, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

E-7. Use and Misuse of Substances

a. Smoking. Smoking in violation of APM 35.28.

b. Drugs and controlled substances

1. Using, possessing, manufacturing, cultivating, selling, or distributing any state or federally controlled drug, designer/synthetic drug, or substance, including, but not limited to, cannabis, heroin, narcotics, or other controlled substances, in violation of any applicable law or University policy.
2. Possessing or using any paraphernalia used for drug consumption. Paraphernalia includes but is not limited to bongs, bowls, pipes, or any homemade smoking device.
3. Using, possessing, selling or distributing prescription or over-the-counter medications by an individual for whom it was not prescribed.
4. Inhaling or ingesting any substance (e.g., nitrous oxide, glue, paint, etc.) that is intended to alter a student's mental state without a prescription.
5. A violation may also occur when the odor of an illegal or controlled substance or drug is present when more than one individual can reasonably trace it to a specific individual.

c. Alcohol

1. Consuming, possessing, manufacturing, or distributing alcoholic beverages in violation of any applicable law or University policy (see APM 80.01 for alcohol permit requirements and APM 95.31 for alcohol policy).
2. For persons under 21, the use or possession of alcoholic beverages. public intoxication or excessive consumption of alcohol. disorderly or irresponsible conduct resulting from consumption of alcohol.
3. For persons over 21, the use or possession of alcohol in public areas where alcohol is not permitted. excessive consumption of alcohol resulting in disorderly or irresponsible conduct.
4. Selling, distributing, or furnishing alcohol to a person under 21 years of age.

E-8. Housing and living groups. Violations of any rules imposed by University Housing or living groups outlined in the Housing contract and Housing handbook.

E-9. Violation of University policy. Violation of published University policies, rules and regulations.

E-10. Violation of law. Any violation of federal law, state law, or local ordinance may be a violation of the Code, independent of the status of any civil or criminal litigation in court or criminal arrest and prosecution. Decisions made or outcomes imposed under the Code will not be subject to change because criminal charges arising out of the same facts were adjudicated in a civil or criminal court process. The University will cooperate as appropriate with law enforcement and other agencies in the enforcement of criminal law and in the conditions imposed by criminal courts for the rehabilitation of student violators provided that the conditions do not conflict with University policies.

E-11. Furnishing false information, refusal to identify, and refusal to comply

- a. Furnishing false information or false representations to any person working for or authorized to act as an authority on behalf of the University.
- b. Refusal to identify oneself to an institutional representative in response to a request when on any University owned or managed property.
 1. Identification includes giving one's name, substantiated by a current driver license or student identification card or other official documentation, or by stating truthfully whether one is a student of the University or not.
 2. An institutional representative includes any employee, faculty member, or representative of the University, and any attorney, peace officer, or campus security officer of the University acting under the authority of the University.
- c. Failure to comply with directions of a University official, law enforcement, fire department, or other government official acting in performance of their duties.
- d. Using false identification or another individual's identification card to procure goods, entry or services.
- e. Submission of false information or withholding requested information at the time of admission or readmission.

E-12. Firearms, explosives, and other weapons. Possessing or using firearms, explosives, other weapons, projectile or explosive devices or substances, or dangerous chemicals in violation of APM 95.12, APM 35.34, or APM 35.35.

E-13. Disruption to community

- a. Attempted, threatened, or actual theft of or damage to another's property.
- b. Unauthorized entry into or use of another's property.

c. Excessive noise, amplified sound, or music that produces a level of noise that disrupts members of the community**F. Conduct resolution process**

F-1. Reporting alleged violations

a. The DOS will accept reports from anyone with knowledge of potential Code violations. Reports must be made to the DOS. Reports of Title IX and related violations covered by [FSH 6100](#) will not be reviewed under the Code but will be accepted by DOS and then forwarded to the Title IX Coordinator or other appropriate office for review. Allegations against Student Organizations will be addressed as per the Student Organization Code of Conduct, FSH 2350.

b. Reports should be in writing but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the incident takes place.

F-2. Initial review. The DOS or office assigned by DOS will conduct an initial review of reports of Code violations. The purpose of the review is to gather relevant information concerning each allegation and determine whether further investigation is warranted. When appropriate, the DOS will transfer the notice and investigation process to the Office of Civil Rights & Investigations (OCRI). The initial review may include interviewing the involved parties and witnesses without formal notice.

F-3. Notice of allegation.

- a. Following the initial review, the hearing officer will determine whether to initiate the conduct resolution process. In order to initiate that process, the hearing officer will provide notice of reported Code violation(s) to the respondent.
- b. The notice informs the respondent of the reported Code violations including a short description of the basis of the reported violation.
- c. The notice may include resolution options if further investigation is not required. Resolution options are detailed in the Hearing Process section below. If further investigation is required, the notice will include details of the investigative process.
- d. The notice will include a link to or copy of the Code.
- e. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

names of any witnesses the respondent would like the hearing officer to contact.

- f. If a respondent does not participate in the initial meeting, the hearing officer will make reasonable attempts to reach the respondent for five business days. If there is no response, the hearing officer will determine the appropriate resolution process.

F-4. Initial meeting. The hearing officer must give the respondent an opportunity to meet in person within a reasonable time after the notice of allegation is delivered to the respondent. The meeting gives the respondent an opportunity to respond to the notice, present any information the respondent would like the hearing officer to consider, and provide the names of any witnesses the respondent would like the hearing officer to contact.

F-5. Interim action and supportive measures.

- a. At any time before a final institutional decision, the Administrator, or designee, may impose restrictions on a student or separate the student from the University community pending the final institutional decision. If circumstances allow, the Administrator or designee should meet with the student prior to imposing the interim action.
- b. Other than issuance of no-contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when
 1. The Administrator determines that the student represents a threat of serious harm to any person.
 2. The student is facing allegations of serious criminal activity.
 3. The action is necessary to preserve the integrity of the investigation.
 4. The action is necessary to preserve University property or the action is necessary to prevent disruption of, or interference with, the normal operations of the University.
- c. After the hearing decision, pending any response review of the decision, the Administrator may impose an outcome issued by the Hearing Panel as an interim action at the discretion of the Administrator.
- d. Supportive measures are neutral actions intended to preserve the ability of the parties to continue their academic and other pursuits. Supportive measures may continue beyond the final resolution of the incident.
- e. Interim actions and supportive measures may include, but are not limited to, the following:

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- Suspension from the University pending a final institutional decision.
- Issuance of a no-contact order.
- Exclusion from University property.
- Removal from the residence halls.
- Removal from extracurricular activities, including participation on athletic teams.
- Withholding the award of a degree pending the conclusion of the investigation and hearing process.
- Requesting class section changes.
- Housing relocation (either temporary or permanent).
- Any other action deemed necessary and appropriate by the Administrator to maintain orderly and appropriate University operations.

f. When a student is suspended from the University, or directed not to attend certain classes, alternative coursework options may be pursued, with the approval of the Administrator and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.

g. An interim action must be issued in writing and is effective when the Administrator delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.

h. The respondent may submit a response to the issuance of any interim action by filing a response with the Administrator. There are no formal procedures for this response, and the interim outcomes remain in effect unless removed by the Administrator.

i. A violation of the provisions of an interim action will be considered a violation of the Code.

F-6. Informal resolution process: Decision by hearing officer

- a.** During the initial meeting, the respondent may be given an opportunity to resolve the complaint informally. All parties must mutually agree to engage in the Informal Resolution Process. The Informal Resolution Process may also be used when the respondent is not participating.
- b.** At any point in the Informal Resolution process, any party may request a Formal Resolution Process, described below. The hearing officer

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

may refer a matter to Formal Resolution Process at any point during the Informal Resolution process.

- c. In the Informal Resolution Process, the hearing officer determines based on the preponderance of the evidence whether the respondent is responsible for a code violation and determines the outcomes. The hearing officer will first meet with the parties (if applicable), share available information, and hear their response, if any. A respondent may also accept responsibility for a Code violation at any point in the process. If the respondent accepts responsibility, the hearing officer will determine the outcomes.
- d. Informal Resolution decisions are not subject to response review.
- e. If the respondent does not participate and a decision is made through Informal Resolution, the respondent may request their case to be reopened. Requests must be made in accordance with the instructions in the outcome notice and received no later than five (5) days after that outcome notice. If the request is timely submitted, the hearing officer will offer to meet with the respondent. During that meeting the respondent can share information with the hearing officer. The hearing officer reserves the right to update the decision of responsibility and any applicable outcomes after meeting with the respondent. The hearing officer will notify the respondent within five (5) days whether the decision of responsibility or applicable outcomes have changed.

F-7. Formal resolution process: Decision by Administrator or Student Conduct Board

a. Investigation

1. The University will investigate the allegations. At any time during the investigation, either the complainant or the respondent may, but is not required to, provide information to the investigator for consideration. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask other Parties or other witnesses, etc. Except in the rare circumstances described in the Code, only information that is presented to the investigator may be used in a hearing.
2. The investigator will provide the interview summaries to all parties and witnesses to review and provide additional comments and clarifications. Comments must be received within five days of

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

receiving the interview summaries. The investigator will revise the interview summaries based on relevant comments provided by the parties and witnesses.

b. Preliminary report review

1. At the conclusion of the investigation, the investigator will draft a Preliminary Report of Investigation (Preliminary Report). The preliminary report will include the steps taken during the investigation., a list of witnesses contacted. a detailed summary of any witness interviews. a detailed summary of any interviews of the respondent or complainant (if applicable). a detailed summary of any other information considered as part of the investigation. and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the respondent or the complainant.
2. The Preliminary Report will not include any conclusions, findings of facts, credibility analysis, or recommended findings of responsibility of Code violation.
3. The parties will be provided an opportunity to review the Preliminary Report and may provide a written response to the Preliminary Report within five days of the review of the report. A party will be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.
4. After the time for submitting a written response to the Preliminary Report has passed, the investigator will review any responses received and determine whether additional investigation is needed. After addressing the responses, if any, the investigator will incorporate the responses into the final report.
5. The investigator has sole discretion of determining whether sufficient information has been obtained to end the investigation process.

c. Final Report of Investigation

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

1. The Final Report of Investigation (final report) will include the following:
 - Everything included in the Preliminary Report,
 - Complete copies of any timely-submitted written responses to the Preliminary Report,
 - A credibility analysis,
 - Findings of facts, and
 - Recommended findings of responsibility.
2. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The investigator may serve as the Administrator's designee to send out the final report to parties.
3. The credibility analysis is an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be part of the finding of facts. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.
4. The findings of facts will include a description of the basis for each finding. Each finding will be based on a more likely than not standard and will include a rationale based on supporting documentation or information such as information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the respondent, complainant and/or witnesses.
5. The recommended finding of responsibility includes the specific section of the code of conduct that was reportedly violated, which will not exceed the scope of the notice of allegation. The investigator will provide their assessment regarding the finding of responsibility based on the totality of the investigative report.

d. Review by Administrator

1. The final report will be provided to the Administrator. The Administrator or designee will provide the final report simultaneously to the parties. The parties may submit a written response to the final report to the Administrator no later than five days after the final report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the final report.
2. If all parties agree to the recommended findings of responsibility, the parties can request that the Administrator make a decision on applicable outcomes only, and forgo a request for a hearing. If parties do not agree with the recommended findings of responsibility, the decisions regarding findings of responsibility are made by either the Administrator or the Student Conduct Board (SCB).
3. Decisions regarding findings of responsibility are made either by the Student Conduct Board after a hearing or by the Administrator after their review. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the final report is provided to the parties. The Administrator may also decide to refer matters to the SCB.

e. Decision by Administrator

1. If a matter is not referred to the SCB for a hearing, the Administrator will decide whether the respondent violated the Code. The Administrator will make the decision based on the information contained in the final report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
2. The Administrator will adopt the findings of facts, credibility analysis, and recommended findings of responsibility of Code violation contained in the final report if the Administrator finds that they are more likely than not to be accurate. Any additional or different findings issued by the Administrator must be based on a more likely than not standard.
3. If the Administrator determines that the respondent violated the Code, the Administrator will determine the appropriate outcome.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

4. The Administrator's decision will be in writing and include the basis for the decision. The written decision will be simultaneously provided to the parties.
5. The Administrator's decision may be subject to a response review in accordance with the Code.
6. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms of appropriate alternative resolution. All parties must agree to participate with DOS in an alternative resolution process.

f. Hearing and Decision by Student Conduct Board

1. **Student Conduct Board in general.** The description and makeup of the SCB can be found in FSH 1640.83.
2. **Conflict of interest.** A member of the SCB will not serve on any Hearing Panel or Response Review Panel in any case where the member has a conflict of interest or bias for or against either party.
3. **Training required.** A member cannot serve on either a Hearing Panel or Response Review Panel until the member has completed training as required by DOS.
4. **Confidentiality.** Proceedings before the SCB, whether before a Hearing Panel or Response Review Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.
5. **Notice of Hearing.** In matters referred to the SCB, the Administrator or designee must send written notice of the hearing to the SCB and the parties. The notice will include the following:
 - a. the specific provision(s) of the Code the respondent is accused of violating.
 - b. a short description of the basis of the alleged violation,

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- c. the date and time for the hearing, and
- d. the deadline for submitting written materials to the Administrator.
- e. a link to or copy of the final report and any responses to the final report which were timely submitted to the Administrator.

6. Scheduling

The hearing will be held no fewer than five days after the notice is provided to the parties, unless extended by the Administrator. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator will have the sole discretion as to whether to reschedule the hearing. Except in cases of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

7. Consolidation

If a report of a violation of the Code involves more than one respondent, the Hearing Panel will conduct a joint hearing with all respondents. However, the panel chair may permit the hearing pertinent to each respondent to be conducted separately. In joint hearings, separate decisions of responsibility will be made for each respondent.

8. Composition of the Hearing or Response Review Panel

- a. The chair of the SCB will appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.
- b. The chair of the SCB will appoint one of the Hearing Panel members to serve as chair of the panel. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Response Review Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Response Review Panel. A student may not serve as chair of the Hearing Panel or Response Review Panel.
- c. The Administrator (or designee) will serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations.

9. Pre-hearing procedures. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator will ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- a. Suggested questions for the panel to ask the respondent or the complainant.
- b. Written discussion or argument addressing the information contained in the final report.
- c. Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the final report only if the information was not available prior to the completion of the final report or if the information was provided to the investigator prior to the completion of the investigation but the information was not included in the final report.

10. Hearing logistics

- a. The hearing will be held at the time and place listed in the notice.
- b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, members of the Hearing Panel, and others only if requested by DOS.
- c. Hearings may be held in person or using secure video conferencing software supported by the University. The University will make a single record of all hearings. Hearing Panel deliberations are not recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for response review or reversal of the Hearing Panel's decision. All parties will work with the Administrator for access to the software and a private secure space to use the software.
- d. All parties are invited to fully participate in the hearing. The administrator may grant any party the ability to attend the hearing, answer questions, and make a statement from behind a partition, from another room, or through another alternative method.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- e. The complainant, if any, may only be present during the portion of the hearing where the Hearing Panel questions the complainant, unless the Administrator determines in appropriate cases that the complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of the investigator. Neither the complainant nor the respondent is required to speak at the hearing.
- f. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator. Additional witnesses may be called by the chair after consultation with the Administrator if additional witnesses are necessary for the Hearing Panel to properly resolve the case. The intention of the Code is that the final report, in most cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the final report.
- g. Only the chair of the Hearing Panel may ask questions during the hearing and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing if the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.
- h. The hearing will generally be conducted as follows:
 - i. Introductions to those present
 - ii. Summary of the hearing process
 - iii. Explanation of the charges against the respondent
 - iv. Opening statement by the complainant (if applicable) addressing the final report and the allegations that the respondent violated the Code.
 - v. Opening statement by the respondent addressing the final report and the allegations that the respondent violated the Code.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- vi.** Questions, if any, by the Hearing Panel chair for the investigator(s) or the parties.
- vii.** Final statements by the parties.
- viii.** All parties dismissed, and the recording of the hearing is stopped.
- ix.** Hearing Panel deliberation.

11. Hearing Panel decision.

- a.** All Hearing Panel decisions will be made by a majority vote.
- b.** In making its decision, the Hearing Panel will consider all relevant information from the following sources:
 - i.** The final report.
 - ii.** Any written information provided by the parties as provided above.
 - iii.** The information received at the hearing.
- c.** The Hearing Panel should adopt the findings of facts, credibility analysis, and recommended findings of responsibility of Code violations contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different conclusion. Any findings of responsibility of Code violation issued by the Hearing Panel must be based on a more likely than not standard.
- d.** The Administrator will also serve as a resource to the Hearing Panel, including to help ensure that outcomes are reasonably consistent among similar cases. If the Hearing Panel determines that a respondent is responsible for a violation of the Code, the Administrator will inform the panel of any previous conduct violations or other relevant disciplinary actions involving the respondent.
- e.** The Hearing Panel will not consider previous legal or campus proceedings when determining responsibility for violation of the Code. The Hearing Panel may consider such previous proceedings solely when determining outcomes after a finding of responsibility is made.
- f.** The Hearing Panel will issue a written decision within 10 days after completing deliberations. If the Hearing Panel needs additional time to issue the written decision, the Administrator will notify the parties. The panel chair will

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.

- g.** The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:
 - i.** The investigator failed to properly investigate the allegation and the failure was substantial and impacted the decision. or
 - ii.** There is new information that could substantially affect the decision and the new information could not have been discovered before the issuance of the final report.

F-8. Response to the Formal Resolution Process Decision

- a.** Any party may respond to the Formal Resolution Process decision, whether it was made by the Administrator or the SCB.
- b.** Responses are not limited to arguments that the Hearing Panel decision should be overturned or modified but can be statements in support of the findings of responsibility of Code violations using the factors for response established below. That is to say, the Response is an opportunity to argue in favor of, or against, the decision based on the specific listed factors.
- c.** Outcomes imposed by the Hearing Panel will not go into effect until either the deadline for a response has expired and no response has been filed or until the decision is upheld after response. However, the Administrator may impose any outcome issued by the Hearing Panel as an interim action pending the response review.
- d.** Any party may submit a response to the Administrator's, Hearing Officer's, or Hearing Panel's final decision. Responses must be submitted in writing to the Administrator and must set forth the grounds for the response. The response must be filed no later than five days after the decision is delivered to the parties. Responses are to be directed to the University and will not be provided to other parties in the case, if any. There is no expectation that the response be of a certain level of formality or read like a legal filing.
- e.** Responses are limited to the following grounds:
 - 1.** A conflict of interest by a decision maker that significantly impacted the outcome of the hearing or a procedural error in the investigation process that significantly impacted the outcome of the hearing.
 - 2.** New information, unavailable during the investigation or hearing, or information that was technically available but for which no

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

reasonable person would have sought that information in advance of the hearing, as the need for the information or its evidentiary value did not reasonably arise until during the hearing, and that would likely have substantially impacted the original findings of responsibility of Code violation or outcome if known.

3. The outcomes imposed are substantially disproportionate to the severity of the violation. Note that the imposition of an administrative fee is not a outcome, and therefore cannot be reversed or modified.

f. A response review will be limited to a review of the decision, the final report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and- any written materials submitted with the response. Where a response is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the decision and whether the new information would likely have substantially impacted the original findings of responsibility of Code violation or outcome if known.

g. Response review procedure

1. The chair of the SCB will appoint three to five members of the SCB to serve on the Response Review Panel and will designate one member to serve as chair of the Response Review Panel. Any member who served on the Hearing Panel will not serve on the Response Review Panel on the same case. A student may not serve as chair of a Response Review Panel.
2. The Response Review Panel will issue a written decision. The decision should be issued within 15 days of receiving the response or responses. The chair of the Response Review Panel will provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.
3. The Response Review Panel may:
 - i. Uphold the Administrator's, Hearing Officer's, or Hearing Panel's decision.
 - ii. Uphold the finding that the respondent violated the code but revise the outcome(s).
 - iii. Return the matter for reconsideration. or
 - iv. Return the matter for additional investigation.

h. Unless the case is returned for reconsideration or to the investigator for

additional investigation, the decision of the Response Review Panel is the final institutional decision. If the decision upholds the finding that the respondent violated the Code, the outcomes imposed will go into effect immediately.

F-9. Supplemental process and standards applying to allegations of academic dishonesty

- a. Academic dishonesty allegations are processed following the Conduct Resolution Processes in the Code. Following a report to DOS of instances or concerns of academic dishonesty, DOS will investigate the incident and will determine if there is a code violation, resulting in potential outcomes intended to address acts of academic dishonesty. Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under the Code there is a finding of responsibility for academic dishonesty/misconduct.
- b. The following information supplements the resolution processes in cases of academic dishonesty:
 - 1. When the alleged academic dishonesty is discovered by the instructor, the instructor will notify the student of the allegation of academic dishonesty and will notify DOS.
 - 2. DOS receives the report and communicates with the instructor on the process of resolving the complaint.
 - 3. The instructor will have an opportunity to provide additional information regarding the allegation.
 - 4. DOS will meet with the student and may seek additional information from the instructor.
 - 5. The instructor is included in the following communication with the student: the notice of allegation and decision letter.
 - 6. If the student chooses an informal process, DOS will meet with the student and provide an informal decision, consistent with policies, progressive discipline, and other previous and similar examples of academic dishonesty. The outcome of an informal process is not eligible for Response Review.
 - 7. If the student chooses a formal process, the hearing officer will conduct a formal investigation and will interview the instructor and other witnesses as part of the investigation.
 - 8. In disciplinary cases involving allegations of academic dishonesty, a majority of the Hearing Panel or Response Review Panel should be faculty members.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

9. The resolution decision of DOS, subject to the Response Review process outlined in the Code, is final.
10. The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.
11. In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of “incomplete” until the process is complete.
12. In situations where the instructor is no longer in their position prior to the completion of the conduct process, the instructor of record or the chair of the department may be asked to step in to finish the conduct process and the instructor may coordinate the final grade based on the totality of the academic performance.

F-10. Outcomes.

a. Outcomes may be imposed for any student determined to have violated the Code. Possible outcomes include, but are not limited to:

- **Warning:** Written notice to the student.
- **Probation:** Written reprimand accompanied by a probationary period during which the student must not violate the Code to avoid more severe disciplinary outcomes.
- **Loss of privileges:** Denial of specified privileges for a designated period of time.
- **Restitution:** Compensation for loss, damage, or injury. This may take the form of appropriate service or monetary or material replacement.
- **Educational outcomes:** Completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.
- **Deferred suspension:** The last opportunity before being suspended, which remains in place until the natural end of the academic relationship with the University.
- **Housing suspension:** Separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.
- **Housing expulsion:** Permanent separation of the student from University Housing.
- **University suspension:** Separation of the student from the University for a definite period, after which the student is eligible to return. Conditions for return may be specified.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2300: STUDENT CODE OF CONDUCT & CONDUCT RESOLUTION PROCESS

- **University expulsion:** Permanent separation of the student from the University.
- **Revocation of admission:** Admission to the University may be revoked .
- **Revocation of degree:** A degree awarded from the University may be revoked.
- **Withholding of degree:** The University may withhold awarding a degree otherwise earned until the completion of all outcomes imposed.

b. More than one of the outcomes listed above may be imposed for any single violation.

c. A student who fails to comply with the outcome(s) imposed will have a disciplinary hold placed on their record until the student complies with all outcome(s) imposed.

d. Disciplinary outcomes other than suspension, expulsion or revocation or withholding of a degree will not be made part of the student's permanent academic record but will become part of the student's disciplinary record. Such outcomes will be expunged from the student's disciplinary record seven years after final disposition of the case unless the University is legally required to maintain them for a further time.

G. MISCELLANEOUS

G-1. Role of an advisor. In accordance with the educational purpose of the Code, all students, including respondents and complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any response. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of the University official conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student or make a presentation on behalf of the student.

G-2. Administrative fee. Any time a student is found to have violated the Code, except in situations where the hearing officer issues only a warning, the hearing officer may impose an administrative fee of \$150. This is not considered an outcome and will not be a subject of a response review.

G-3. Parent notification. The University may notify parents of students under the age of 21 when a student has been found to have committed a drug- or alcohol-related violation. This is not considered an outcome and may not be a subject of a response review. The decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

G-4. Training. All members of the SCB, the Administrator, and the investigators will receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, as well as all applicable federal and state laws.

G-5. Timeframe. With the exception of deadlines for requesting a hearing before the SCB (see section F.7) or for filing a response (see section F.8), all other timeframes contained in the Code are suggested timeframes. While the timeframes should be followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for response review or reversal of any decision.

G-6. Interpretation. Any question of interpretation regarding the Code or these procedures will be referred to the Administrator or their designee for final decision.

G-7. Disclosure. The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of Title 18, United States Code), incest, or statutory rape, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the reporting victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim will be treated as the victim for purposes of this paragraph.

G-8. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

G-9. Review by Board of Regents: Board of Regents review of a final institutional decision to the Board of Regents is governed by Idaho State Board of Education Governing Policies and Procedures Section III.P.17.

Version History

Amended October 2023: Interim policy. Changes to B-2 to clarify jurisdiction of OCRI, added definition of protected status, changes to E-4 regarding prohibited harassment and E-5 regarding discrimination and retaliation.

Amended August 2023. Editorial and legal edits.

Amended August 2023: Interim policy. Complete rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student

Code of Conduct were combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. FSH 2400 was deleted. Procedure related to Title IX sexual harassment was removed to align with the recently revised FSH 6100.

Amended July 2021. Editorial changes.

Amended July 2014. All disciplinary language from FSH 2300 Student Code of Conduct was consolidated into FSH 2400 and updated removing redundancies in policy.

Amended July 2009. Editorial changes.

Amended January 2007. Reformatted the Student Code of Conduct into subsections for easier management of judicial cases

Amended July 2005. Revised Article II, Section 2.

Amended July 1998. Revised Article II.

Amended July 1993.

Amended July 1992.

Adopted July 1970.

CONTENTS

- A. Introduction**
- B. Definitions**
- C. Investigation**
- D. Hearing Process**
- E. Appeals**
- F. Student Conduct Board**
- G. Use of Hearing Officer**
- H. Interim Action**
- I. Sanctions**
- J. Miscellaneous**

A. INTRODUCTION. The purpose of the Student Code of Conduct (Code) is to help protect the safety of the University community and educate students about appropriate and responsible behavior and their civic and social responsibilities as members of the University community, while complying with applicable state and federal laws and institutional policy. The primary focus of the disciplinary process is on educational and corrective outcomes; however, sanctions including suspension or expulsion from the University may be necessary to uphold community standards and to protect the campus community. University discipline is not in the nature of punishment for a crime, and the University's discipline process is not equivalent to state or federal criminal prosecutions. University disciplinary proceedings for any and all matters encompassed within the Code [FSH 2300] and the Statement of Student Rights [FSH 2200] are addressed under the following rules and regulations.

B. DEFINITIONS:

B-1. Advisor: The person of the student's choosing who has agreed to advise the student during the University disciplinary process and attend scheduled meetings with the student. The Advisor's role is simply to advise the student, and the Advisor is not permitted to speak during hearings, conferences, or interviews unless allowed by the University official conducting the interview.

B-2. Chief Student Affairs Officer (CSA Officer): The Dean of Students, unless the President appoints a different official to serve as the CSA Officer.

B-3. Code: The Student Code of Conduct, which is currently found in FSH 2300 and FSH 2400.

B-4. Complainant: The person(s) reportedly harmed by the Respondent's alleged violation of the Code.

B-5. Days: Days that the university is open for business, not including Saturdays, Sundays, Fall Recess, Winter Recess, Spring Recess, or University holidays.

B-6. Investigator: The person assigned by the University to conduct an investigation into a report of a violation of the Code. In all Title IX cases, the Title IX Coordinator shall assign the investigator. In all other cases, the investigator may be any qualified person assigned by DOS.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

B-7. Student Conduct Administrator (Administrator): The official at the University of Idaho who has been designated by the CSA Officer to serve in this role. It shall also include the Administrator's designee.

B-8. DOS: The Office of the Dean of Students at the University of Idaho.

B-9. Hearing Officer: A person appointed by the Administrator to serve as the person presiding over a hearing in accordance with Section G.

B-10. Parties: The Respondent and, in Title IX cases only, the Complainant.

B-11. Respondent: The student who is alleged to have violated the Code.

B-12. Student: Includes, but is not limited to, all persons admitted to the University, either full-time or part-time, to pursue undergraduate, graduate, or professional studies, and includes non-degree seeking students. The following persons are also considered "students":

- a. Persons who withdraw after allegedly violating the Code;
- b. Persons who are eligible to enroll for classes without submitting an application for re-admission;
- c. Individuals participating in the American Language and Culture Program, Independent Study of Idaho sponsored by the University of Idaho, the University of Idaho International Student Success Program (UI-ISSP), or any other similar educational program of the University.

B-13. Student Conduct Board (SCB): The body which reviews student disciplinary matters, as set forth in sections D., E., and F., and FSH 1640.83.

B-14. Title IX case: Any disciplinary case, investigation, charge, or allegation involving alleged dating violence, domestic violence, sexual assault, sexual harassment, or stalking. The Title IX Coordinator may also designate any other case as a Title IX case.

B-15. University: The University of Idaho, in all of its campus locations, education, outreach and research programs, including extension programs and distance education programs, and at all locations where any of these programs are offered or administered.

C. INVESTIGATION:

C-1. Reporting Alleged Violations. Any member of the University community having knowledge of a potential violation of the Code may report the violation to either DOS or, in Title IX cases, to the Title IX Coordinator. A report should be in writing, but may be reported orally to the appropriate University official. A report should be submitted as soon as possible after the event takes place.

C-2. Initial Investigation. The University may conduct an investigation into any report of a violation of the Code. The purpose of the investigation is to determine whether a violation may have occurred and to gather relevant information concerning each allegation of a Code violation.

C-3. Notice of Alleged Violation. The investigator may conduct a preliminary review to determine whether there is sufficient information to engage in a formal investigation. The preliminary review may include interviewing the Complainant, Respondent, and other witnesses. If, after the conclusion of the preliminary review, the investigator decides to engage in a formal investigation, the investigator must notify the Respondent of the allegation.

- a. the notice must be in writing and may be delivered either in person to the Respondent, or by email to the

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

student's official University email account. If the notice cannot be delivered either in person or to the student's official University email account, the notice shall be delivered by any means reasonably likely to reach the student.

b. the notice shall inform the Respondent of the specific provision(s) of the Code the Respondent is alleged to have violated and include a short description of the basis of the alleged violation.

c. The notice will include a copy of the University Disciplinary Process for Alleged Violations of the Student Code of Conduct.

C-4. Meeting with Investigator. The investigator must give the Respondent an opportunity to meet with the investigator in person within a reasonable time after the notice of allegation is delivered to the Respondent in order to give the Respondent an opportunity to respond to the notice, present information in his or her defense, present any information the Respondent would like the investigator to consider, and provide the names of any witnesses the Respondent would like the investigator to contact.

C-5. Investigation. At any time during the investigation, either the Complainant or the Respondent may, but is not required to, provide information to the investigator for the investigator to consider. Such information may include documentary information, the names of witnesses, witness statements, suggested questions to ask the other Party or other witnesses, etc. Only information that is presented to the investigator may be used in a hearing under section D.

C-6. Preliminary Report of Investigation.

a. At the conclusion of the investigation, the investigator shall draft a Preliminary Report of Investigation (Preliminary Report) setting forth the steps taken during the investigation; a list of witnesses contacted; a detailed summary of any witness interviews; a detailed summary of any interviews of the Respondent and/or Complainant; a detailed summary of any other information considered as part of the investigation; and complete copies of any relevant documentary evidence gathered during the investigation, including copies of documentary information provided by the Respondent and/or the Complainant.

b. The Preliminary Report shall not include any conclusions, findings, or credibility analysis.

c. The parties shall be provided an opportunity to review the Preliminary Report and may provide a written response to the Preliminary Report within five days of the review of the report. A party shall be deemed to have waived the right to review the report if the party does not make arrangements with the investigator to review the report within five days of being notified that the report is available to be reviewed. The written response may include requests for additional investigation, additional witnesses to interview, or additional questions to ask any witness.

d. After the time for submitting a written response to the Preliminary Report has passed, the investigator shall review any responses received and determine whether additional investigation is needed. If additional investigation is deemed appropriate, the investigator shall draft a revised Preliminary Report and shall give the parties an opportunity to review the report, as set forth in section C-6. c., above.

e. After reviewing any written responses received within the time-period allowed for submitting written responses, the investigator shall either continue the investigation or draft a Final Report of Investigation. The investigator has sole discretion of determining whether sufficient information has been obtained in order to end the investigation process.

C-7. Final Report of Investigation. The Final Report of Investigation (Final Report) shall contain everything included in the Preliminary Report plus complete copies of any written responses received within the time period allowed for submitting written responses, a credibility analysis, recommended findings, and recommended conclusion (see below) as to whether the Respondent violated the Code. If the Final Report includes a

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

recommended finding that the Respondent violated the Code, the Final Report shall not include recommended sanctions. The Final Report shall be provided to the Administrator. The Administrator shall provide the Final Report simultaneously to the parties.

a. Credibility Analysis. The Final Report should include an analysis of the statements provided by each party and interviewee, as necessary, to determine whether the statements provided by that person are credible. The analysis may include a description of the person's demeanor during the interview(s), a comparison of statements made to known facts or statements from other witnesses, the person's ability to observe the event described, the person's bias, whether the person was under the influence of a controlled substance or alcohol, and any other information that a reasonable person would use in his or her everyday affairs to determine a person's credibility. Not every case will require a detailed credibility analysis of each interviewee, and the credibility analysis may be part of the particular finding. However, in cases where the credibility of the interviewee is material to the conclusion, there should generally be a separate credibility analysis.

b. Recommended Findings. The investigator's recommended findings regarding factual issues shall include a description of the basis for each finding. Each finding shall be based on a more likely than not standard and should include information from the interviews, documentary information obtained during the investigation, and, if relevant to that finding, information regarding the credibility of the Respondent, Complainant and/or witnesses.

c. Recommended Conclusion. In making a recommended conclusion, the investigator must apply the Code to the findings to reach a determination of whether the findings as found by a more likely than not standard constitute a violation of the Code.

D. HEARING PROCESS.

D-1. Student Conduct Administrator's Review:

a. After the Final Report is submitted to the Administrator, the parties may each submit a written response to the Final Report. This response must be provided to the Administrator no later than five days after the Final Report is provided to the parties. The Administrator may meet with the parties, separately, to discuss the Final Report.

b. A party may request that the matter be referred to the SCB for a hearing. The request must be in writing and must be submitted to the Administrator no later than five days after the Final Report is provided to the parties. If a party timely submits a request for the matter to be referred to the SCB:

- (i) In non-Title IX cases, the Administrator shall refer matters to the SCB for a hearing if:
 - (1) The Administrator determines that there is sufficient information in the Final Report such that a finding could be made that the Respondent violated the Code; and
 - (2) The Administrator determines that the appropriate sanction could include suspension, expulsion, or the withholding or revoking of a degree.
- (ii) In Title IX cases, the Administrator shall refer matters to the SCB for a hearing in matters in which the Administrator determines that there is sufficient information in the Final Report such that a finding could be made that the Respondent violated the Code.
- (iii) In all other cases, the Administrator shall decide whether the Respondent violated the Code.

c. If a matter is not referred to the SCB for a hearing:

- (i) The Administrator shall decide whether the Respondent violated the Code. The Administrator shall make the decision based on the information contained in the Final Report, the written responses to the report, if any, submitted to the Administrator by the parties, and, if the Administrator chooses to meet with the parties, the information provided at the meeting to the Administrator by the parties.
- (ii) The Administrator should adopt the findings and credibility analysis contained in the Final Report, unless the Administrator finds that the findings or credibility analysis are not more likely than not

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

to be true. Any additional or different findings issued by the Administrator must be based on a more likely than not standard.

- (iii) The Administrator is not required to defer to the recommendation contained in the Final Report as to whether the Respondent violated the Code, but is entitled to freely apply the Code to the findings in order to determine whether the Respondent violated the Code.
- (iv) If the Administrator determines that the Respondent violated the Code, the Administrator shall determine the appropriate sanction.
- (v) The Administrator's decision shall be in writing and include the basis for the decision. The written decision shall be simultaneously provided to the parties.
- (vi) The Administrator's decision may be appealed in accordance with section E.

d. At any time before the matter is submitted to the SCB, DOS may refer a charge of a violation of the Code to mediation or other forms of appropriate conflict resolution. All parties must agree to participate with DOS in the conflict resolution process. Complaints of physical sexual misconduct or violence shall not be referred for alternative resolution under this paragraph, except in unique circumstances approved by the Title IX Coordinator after consultation with the Office of General Counsel and the CSA Officer.

D-2. Student Conduct Board Hearing:

a. In matters referred to the SCB, the Administrator (or designee) must send written notice to the SCB and the parties.

- (i) The notice shall be in writing and may be delivered either in person to the parties, or by email to the student's official University email account. If the notice cannot be delivered either in person or to the student's official University account, the notice may be delivered by any means reasonably likely to reach the student.
- (ii) The notice must inform the Respondent of the specific provision(s) of the Code the Respondent is accused of violating, and include a short description of the basis of the alleged violation, the date and time for the hearing, and the deadline for submitting written materials to the Administrator.
- (iii) The written notice shall also include the Final Report and any responses to the Final Report which were timely submitted to the Administrator.

b. Except in cases referred to a Hearing Officer under Section G, the chair of the SCB shall appoint three to five members of the SCB to serve as a Hearing Panel to review each matter.

- (i) The chair of the SCB shall appoint one of the Hearing Panel members to serve as chair of the panel. A student may not serve as chair of a Hearing Panel.
- (ii) The Administrator (or designee) shall serve as a non-voting, ex-officio member of every Hearing Panel and may be present and available as a resource during all deliberations. The Administrator is responsible for informing the panel of any previous conduct violations or other relevant disciplinary actions involving the Respondent.

c. In every case submitted to a Hearing Panel, the parties may submit written materials for the panel to review as part of its decision. To be considered by the Hearing Panel, all written materials must be submitted to the Administrator prior to the deadline set forth in the notice. The Administrator shall ensure that any materials timely submitted are distributed to the parties and the Hearing Panel prior to the hearing. The written materials may only consist of the following:

- (i) Suggested questions for the panel to ask the Respondent or the Complainant;
- (ii) Written discussion or argument addressing the information contained in the Final Report;
- (iii) Information (as opposed to a discussion of the information contained in the report) that was not considered by the investigators in the Final Report only if the information was not available prior to the completion of the Final Report or if the information was provided to the investigator prior to the completion of the investigation but the information was not included in the Final Report.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

D-3. Hearing Procedures:

a. The hearing shall be held at the time and place listed in the notice. The hearing shall be held no less than five days after the notice is provided to the parties.

b. All hearings are closed to the public. The only people allowed to be present during the hearing are the parties, each individual party's Advisor, the investigator(s), the Administrator, the Title IX Coordinator (or designee) in Title IX cases, one or more attorneys from the Office of General Counsel, and the members of the Hearing Panel. The panel chair may give permission for others to attend the hearing in the panel chair's discretion, after consultation with the Administrator.

c. The only witnesses at the hearing shall be the investigator(s), the Complainant, and the Respondent. In non-Title IX cases, the Complainant may only be present during the portion of the hearing where the Hearing Panel questions the Complainant, unless the chair determines in appropriate cases that the Complainant may remain for the entire hearing. In extraordinary circumstances, if the investigator is unable to be present at the hearing, the DOS may designate a representative to be there in the place of the investigator. Neither the Complainant nor the Respondent is required to say anything at the hearing.

The panel chair, in consultation with the Administrator, may call additional witnesses if the panel chair determines that the additional witnesses are necessary for the Hearing Panel to properly resolve the case. This discretion should be used sparingly. The intention of the Code is that the Final Report, in the vast majority of cases, should provide a sufficient basis for the Hearing Panel's decision, recognizing that the parties may speak in person to the Hearing Panel and to respond to the Final Report.

d. It is each party's responsibility to inform the panel chair and the Administrator of scheduling conflicts no less than three days prior to the scheduled hearing. The Administrator shall have the sole discretion as to whether to reschedule the hearing. Except in cases of grave or unforeseen circumstances, if either party fails to appear, the hearing will proceed as scheduled.

e. If a report of a violation of the Code involves more than one Respondent, the Hearing Panel shall conduct a joint hearing with all Respondents. However, the panel chair may permit the hearing pertinent to each Respondent to be conducted separately. In joint hearings, separate determinations of responsibility shall be made for each Respondent.

f. Only the chair of the Hearing Panel may ask questions during the hearing, and doing so is at the sole discretion of the chair. However, the chair may seek input from panel members on areas for questioning. The parties may submit suggested questions in writing as long as the questions are received prior to the deadline for submitting written materials contained in the notice. Questions based on information that arises during the hearing may be submitted in writing during the hearing at the discretion of the panel chair.

g. For complaints involving sexual misconduct, discrimination, or other complaints of a sensitive nature, the panel chair, in consultation with the Title IX Coordinator and the Administrator, may allow the Complainant to attend the hearing, answer questions, and make a statement from behind a partition or from another room or location through audio/video technology.

h. The panel chair has discretion as to how to conduct the hearing. Generally, however, the hearing should be conducted as follows:

- (i) Opening statement by the Respondent addressing the Final Report and the allegations that the Respondent violated the Code;
- (ii) In Title IX cases, opening statement by the Complainant addressing the Final Report and the allegations that the Respondent violated the Code;
- (iii) Questions, if any, by the panel chair of the investigator(s), Respondent, and/or Complainant;
- (iv) Final statements by the Respondent and, in Title IX cases, the Complainant.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

i. In making its decision, the Hearing Panel shall consider all relevant information from the following sources:

- (i) the Final Report, including the findings and conclusions contained in the report;
- (ii) any written information provided by the parties as provided above; and
- (iii) the information received at the hearing.

j. In Title IX cases involving allegations of sexual misconduct, the past sexual history or sexual character of either party shall not be considered by the Hearing Panel except in extremely unusual cases where the panel chair determines that the information is critical to a proper understanding of the specific facts of the case at hand. Demonstration of pattern, repeated, and/or predatory behavior, in the form of previous findings in any legal or campus proceeding, or in the form of good faith allegations, may be considered in making the findings and, if a violation of the Code is found, the sanction.

k. There shall be a single record, such as an audio recording, for all hearings. Deliberations shall not be recorded. Failure to record the hearing for any reason is not to be considered a procedural error that substantially impacts the decision and will not be grounds for appeal or reversal of the Hearing Panel's decision.

D-4. Hearing Panel Decision.

a. The Hearing Panel shall issue a written decision, which should be issued within ten days after completing deliberations. The panel chair shall provide the written decision to the Administrator, who shall then simultaneously provide the decision to the parties

b. The Hearing Panel should adopt the findings and credibility analysis contained in the Final Report, unless the Hearing Panel finds that the information presented at the hearing warrants a different finding or the Hearing Panel finds that the findings or credibility analysis are not more likely than not to be true. Any findings issued by the Hearing Panel must be based on a more likely than not standard.

c. The Hearing Panel is not required to defer to the recommendation contained in the Final Report as to whether the Respondent violated the Code, but is entitled to freely apply the Code to the findings in order to determine whether the Respondent violated the Code.

d. Unless the panel chair is a Hearing Officer appointed to serve as chair without a vote, the panel chair shall participate in all votes, and all Hearing Panel decisions shall be made by a majority vote.

e. If the Hearing Panel determines that the Respondent violated the Code, the Hearing Panel shall determine the appropriate sanction(s). The Administrator shall serve as a resource to the Hearing Panel to help ensure that sanctions are reasonably consistent among similar cases.

f. The Hearing Panel may return the matter for additional investigation if the Hearing Panel determines that:

- (i) The investigator failed to properly investigate the allegation and the failure was both substantial and to the student's detriment; or
- (ii) There is new information that could substantially affect the outcome and the new information could not have been discovered before the issuance of the Final Report.

D-5. Either party may appeal a Hearing Panel's decision.

D-6. Sanctions imposed by the Hearing Panel shall generally not go into effect until either the time period for an appeal has expired and no appeal has been filed or until the decision is upheld on appeal. However, the CSA Officer may impose any sanction imposed by the Hearing Panel as an interim action pending the appeal.

E. APPEALS.

E-1. Any party may appeal the Administrator's or Hearing Panel's final decision. Appeals must be submitted in

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

writing to the Administrator and must set forth the grounds for the appeal. The appeal must be filed no later than five days after the decision is delivered to the parties. The Administrator shall ensure that the parties receive a copy of the appeal.

E-2. Appeals are limited to the following grounds:

- a. A procedural error occurred in the investigation process that significantly impacted the outcome of the hearing;
- b. New information, unavailable during the investigation or hearing, that could substantially impact the original finding or sanction has been presented in the appeal documents;
- c. The sanctions imposed are substantially disproportionate to the severity of the violation (the imposition of an administrative fee is not a sanction, and therefore cannot be appealed); or
- d. The decision is not based on substantial information. A decision is based on substantial information if there are facts in the case that, if believed by the fact finder, are sufficient to establish that a violation of the Code occurred.

E-3. An appeal shall be limited to a review of the decision, the Final Report, any written material considered in the decision, the recording of the hearing held before the Hearing Panel, and any written materials submitted with the appeal. Where an appeal is based on the discovery of new information, the new information may be considered only to determine whether the information was unavailable at the time of the decision and whether the new information could substantially impact the original finding or sanction.

E-4. Appeal Panel Procedures:

- a. The chair of the SCB shall appoint three to five members of the SCB to serve on the Appeal Panel, and shall designate one member to serve as chair of the Appeal Panel. Any member who served on a Hearing Panel shall not serve on the Appeal Panel on the same case. A student may not serve as chair of an Appeal Panel.
- b. In Title IX cases, the non-appealing party may file a response to the appeal within five days of the filing of the appeal.
- c. The Appeal Panel shall issue a written decision. The decision should be issued within fifteen days of receiving the appeal. The chair of the Appeal Panel shall provide the written decision to the Administrator, who will then simultaneously provide the decision to the parties.

E-5. Results of the Appeal Panel. The Appeal Panel may:

- a. uphold the Administrator's or Hearing Panel's decision;
- b. uphold the finding that the Respondent violated the code, but revise the sanction(s);
- c. return the matter for reconsideration; or
- d. return the matter for additional investigation.

E-6. Unless the case is returned for reconsideration or to the investigator for additional investigation, the decision of the Appeal Panel is the final institutional decision. If the decision upholds the findings that the Respondent violated the Code, the sanctions imposed shall go into effect immediately.

F. Student Conduct Board.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

F-1. The description and make-up of the SCB can be found in FSH 1640.83.

F-2. A member of the SCB shall not serve on any Hearing Panel or Appeal Panel in any case where the member has a conflict of interest or bias for or against either party.

F-3. If procedures call for the appointment of three or more members to serve on a Hearing Panel or Appeal Panel, the chair of the SCB should endeavor to appoint at least one student to the Hearing Panel or Appeal Panel. A student may not serve as chair of the Hearing Panel or Appeal Panel. In disciplinary cases involving allegations of academic misconduct, a majority of the Hearing Panel or Appeal Panel should ordinarily be faculty members.

F-4. All members of the SCB must receive annual training as determined by DOS, the Title IX Coordinator, and/or the Office of General Counsel. A member cannot serve on either a Hearing Panel or Appeal Panel until the member has completed this training.

F-5. Proceedings before the SCB, whether before a Hearing Panel or Appeal Panel, are confidential and protected by the Family Educational Rights and Privacy Act (FERPA). In specific disciplinary cases, members of the SCB must protect the confidentiality of the information they receive in fulfilling their duties as members of the SCB. Panel members must not discuss specific cases or share any information regarding specific disciplinary cases or their deliberations with anyone other than the SCB Chair, the Office of General Counsel, the Administrator, or fellow panel members appointed to the same panel in that specific case, and in all such instances, the discussion or sharing of information must be reasonably necessary for the panel's consideration of the specific case.

G. USE OF A HEARING OFFICER.

G-1. In any case requiring a hearing before a panel of the SCB, the University may use a Hearing Officer to conduct that hearing.

G-2. The decision as to whether to appoint a Hearing Officer shall be made by the Administrator. The decision as to whether to appoint a Hearing Officer may not be appealed and may not be challenged on appeal as a procedural error.

G-3. The Hearing Officer may be appointed to serve as follows:

a. As a non-voting chair of the Hearing Panel whose duties are to run the hearing and ensure all proper procedures are followed;

b. As a voting chair of the Hearing Panel whose duties are to run the hearing, ensure that all proper procedures are followed, and to have a vote on the decision; or

c. As the chair and only member of the Hearing Panel whose duties are to run the hearing, ensure that all proper procedures are followed, and to issue the decision. When the Hearing Officer serves as the sole decision-maker, the Hearing Officer's decision shall be treated for all purposes the same as the decision of a Hearing Panel under the Code.

d. In cases involving allegations of academic dishonesty, a Hearing Officer may only be appointed as a non-voting chair of the Hearing Panel, but may not be appointed as a voting member of the Hearing Panel or as the chair and only member of the Hearing Panel.

G-4. The Administrator shall appoint the Hearing Officer from a list of Hearing Officers approved by the Office of General Counsel. The Hearing Officer must not have a conflict of interest or bias for or against either party.

G-5. The Office of General Counsel shall determine the appropriate qualifications for a person to serve as a Hearing Officer and shall make a list of approved Hearing Officers available to the Administrator.

H. INTERIM ACTION.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

H-1. At any time before a final institutional decision, the CSA Officer, or designee, may impose restrictions on a student and/or separate the student from the University community pending the final institutional decision. If circumstances allow, the CSA Officer (or designee) should meet with the student prior to imposing the interim action.

H-2. Other than issuance of no contact orders, an interim action issued prior to a hearing before the Hearing Panel may only be imposed when the CSA Officer determines that the student represents a threat of serious harm to any person; the student is facing allegations of serious criminal activity; the action is necessary to preserve the integrity of the investigation; the action is necessary to preserve University property; and/or the action is necessary to prevent disruption of, or interference with, the normal operations of the University. After the Hearing Panel's decision, pending an appeal of the decision, the CSA Officer may impose a sanction issued by a Hearing Panel as an interim action at the discretion of the CSA Officer.

H-3. In any Title IX case, the investigator, in consultation with DOS, may issue a no contact order prohibiting the Respondent and/or the Complainant from contacting the other. A no contact order should be routinely issued in Title IX cases and there need not be a specific determination made as provided above.

H-4. Interim actions may include, but are not limited to, the following:

- a. Suspension from the University pending a final institutional decision;
- b. Issuance of a no contact order;
- c. Exclusion from University property;
- d. Removal from the residence halls;
- f. Removal from extracurricular activities, including participation on athletics teams;
- g. Withholding the award of a degree pending the conclusion of the investigation and hearing process; or
- h. Any other action deemed necessary and appropriate by the CSA Officer to maintain orderly and appropriate University operations.

H-5. Where a student is suspended from the University, or directed to not attend certain classes, alternative coursework options may be pursued, with the approval of the CSA Officer and the appropriate college dean, to ensure as minimal an impact as possible on the responding student.

H-6. An interim action must be made in writing and is effective when the CSA Officer delivers the Notice of Interim Action to the responding student either in person or by email sent to the student's official University of Idaho email account.

H-7. The Respondent may appeal the imposition of any interim action by filing an appeal with the CSA Officer. There are no formal procedures for this appeal, and the interim sanctions remain in effect unless overturned by the CSA Officer.

H-8. A violation of the provisions of an interim action shall be considered a violation of the Code.

I. SANCTIONS.

I-1. The following sanctions may be imposed upon any student determined to have violated the Code:

- a. **Warning:** a written notice to the student.

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

b. Probation: a written reprimand accompanied by a probationary period during which the student must not violate the Code in order to avoid more severe disciplinary sanctions.

c. Loss of Privileges: denial of specified privileges for a designated period of time.

d. Restitution: compensation for loss, damage, or injury. This may take the form of appropriate service and/or monetary or material replacement.

e. Educational Sanctions: completion of work assignments, essays, service to the University, community service, workshops, or other related educational assignments.

f. Housing Suspension: separation of the student from University Housing for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.

g. Housing Expulsion: permanent separation of the student from University Housing.

h. University Suspension: separation of the student from the University for a definite period of time, after which the student is eligible to return. Conditions for return may be specified.

i. University Expulsion: permanent separation of the student from the University.

j. Revocation of Admission and/or Degree: admission to or a degree awarded from the University may be revoked for fraud, misrepresentation, or other violation of University standards in obtaining the degree, or for other serious violations committed by a student prior to graduation.

k. Withholding Degree: the University may withhold awarding a degree otherwise earned until the completion of all sanctions imposed.

I-2. More than one of the sanctions listed above may be imposed for any single violation.

I-3. A student who fails to comply with the sanction(s) imposed shall have a disciplinary hold placed on his/her record until the student complies with all sanctions imposed.

I-4. Disciplinary sanctions other than suspension, expulsion or revocation or withholding of a degree shall not be made part of the student's permanent academic record, but shall become part of the student's disciplinary record. Such sanctions shall be expunged from the student's disciplinary record seven (7) years after final disposition of the case.

I-5. The student shall be responsible for administrative and educational costs of any and all sanctions imposed for alcohol related violations.

J. MISCELLANEOUS.

J-1. Agreement: At any point during the disciplinary process prior to a final institutional decision, the Administrator and the parties may agree to an appropriate resolution without further investigation, hearing, or appeal. The agreed upon resolution may include the use of appropriate alternative dispute resolution methods.

J-2. Role of an Advisor: In accordance with the educational purpose of the Code, all students, including Respondents and Complainants, are expected to speak for themselves at all stages of proceedings under the Code, including, but not limited to, during the investigation, hearing, and any appeal. Any student may have an Advisor present at any time during any interview, meeting, or proceeding under the Code, but the Advisor's role is to advise the student, not to speak for the student or make any presentation on behalf of the student. The student may, at any time and for a reasonable period of time, confer with the Advisor. If the University official conducting the proceeding determines at any time that the Advisor is acting outside of these parameters, the Advisor may be required to leave the proceeding at the official's discretion. In appropriate circumstances, at the sole discretion of

UI FACULTY-STAFF HANDBOOK

Chapter II: STUDENT AFFAIRS POLICIES

Section 2400: University Disciplinary Process for Alleged Violations of the Student Code of Conduct

the University official conducting the proceeding, the University official may allow the Advisor to speak on behalf of the student and/or make a presentation on behalf of the student.

J-3. Fee: Any time a student is found to have violated the Code, DOS may charge the student an administrative fee of \$150. This is not considered a sanction and may not be appealed.

J-4. Parent Notification: The University may notify parents of students under the age of 21 when a student has been found to have committed a drug or alcohol-related violation. This is not considered a sanction, and the decision as to whether to notify the parents or not rests entirely within the discretion of DOS.

J-5. Training: All members of the SCB, the Administrator, the Title IX Coordinator, and the investigators shall receive annual training in accordance with the requirements of the policies of the Board of Regents of the University of Idaho and the Idaho State Board of Education, the Clery Act and implementing regulations, and Title IX.

J-6. Timeframe: With the exception of the deadlines for filing an appeal (see section E) or for requesting a hearing before the SCB (see section D-1.b.), all other timeframes contained in the Code are suggested timeframes. While the timeframes should be followed absent exceptional circumstances, the failure to conduct any action within a designated timeframe is not grounds for appeal or reversal of any decision.

J-7. Interpretation: Any question of interpretation regarding the Code or these procedures will be referred to the CSA Officer or his/her designee for final determination.

J-8. Disclosure: The University will, upon written request, disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of title 18, United States Code), or a non-forcible sex offense, the report on the results of any disciplinary proceeding conducted by the University against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the alleged victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim shall be treated as the alleged victim for purposes of this paragraph.

J-9. Review by President: Any decision or action taken under the Code may be reviewed by the President at the President's discretion.

J-10. Review by Board of Regents: Appeals of a final institutional decision to the Board of Regents must be made in accordance with Idaho State Board of Education Governing Policies and Procedures Section III.P.18.

Version History

Amended January 2017. A rewrite was completed that found middle ground between the early 1970's court trial format and the strong investigative model which had unintentionally created many delays to this less confrontational investigative model. The objective is to provide a process that allows for fact-finding and decision-making that balances the rights of the individual with the legitimate interests of the University.

Amended July 2016. Addressed some cumbersome processes that arose which were affecting the ability to resolve cases quickly.

Amended July 2014. All disciplinary language from FSH 2200 Statement of Student Rights and FSH 2300 Student Code of Conduct was consolidated into this policy and updated removing redundancies in policy.

Amended July 2008. The committee composition was moved into FSH 1640 Committee Directory.

Amended July 1993. Membership and quorum were changed on the University Judicial Council.

Adopted 1979. While the disciplinary process contained in FSH 2400 is uniquely crafted to meet the University of Idaho's individual needs, portions of the process and Code are adapted from the NCHERM Group Model

UI FACULTY-STAFF HANDBOOK

Reviewed by General Counsel ___ Yes X No Name & Date:

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

This revision delays all dates for Fall 2025, Spring 2026, and Summer 2026 by one week. Details are attached. The current dates for Academic Year 2025-26 align with WSU for Spring commencement on May 9, 2026. This will be a major challenge for the Moscow and Pullman communities as well as our families seeking housing and dining. UI’s calendar currently “flips” to a later start in AY 26-27; however, that change can take place during AY 25-26 to avoid concurrent spring commencements while still following the normal pattern of UI semesters. In addition, earlier starts create a hardship for many UI students who are involved in agricultural harvest or firefighting. Delaying all AY 25-26 dates addresses these concerns. One additional impact is that the irregular 14-week summer (normally 13 weeks) will shift from Summer 2026 to Summer 2025. A 14-week summer is unavoidable.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

Spread Pay Task Force Findings and Recommendations

History of the Task Force

In 2022 Faculty Senate charged a task force to consider the possibility of developing a system that would allow University of Idaho faculty on 9-month contracts to be paid over 12 months. The catalyst for this work was a combination of faculty interest and its potential to both retain and recruit faculty.

The old spread pay system was an offered benefit until FY 2017. However, difficulties with the Banner 8 system and managing faculty on complicated contracts made the system too cumbersome.

In the Spring of 2022, the Task Force sent a survey to eligible faculty to determine the degree to which faculty supported this initiative. At that time, 570 faculty were on academic contracts and received the survey. 329 completed the survey, resulting in a response rate of 61%. Of those faculty currently on standard pay, 63% indicate that they would immediately switch to a 12 month pay system if given the option. Regardless of whether or not they would go on a 12 month pay system, 94% of surveyed faculty supported implementing it as an option for others.

In AY 23-24, there are 576 U of I faculty on academic year contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months on a system using a problematic pay schedule.

Current Realities

In the process of investigating the possibility of reoffering a benefit that would allow people on 9-month contracts to be paid over 12, it became evident that the current system of providing advanced pay in July and August poses significant problems for the university. Our current system of spread pay operates by paying people in July and August prior to the beginning of their contract. Paying employees for work before the contract begins presents challenges and the schedule must be reset – regardless of whether or not we offer deferred pay as a benefit for all eligible faculty.

There are 122 faculty members currently on this old spread pay schedule. To resolve the schedule problems, they will need to shift to a new pay schedule or opt for standard pay. The new model, called deferred pay, will allow faculty to defer portions of their pay through the academic year to be paid over the following summer. The pay system aligns with the start of their work period.

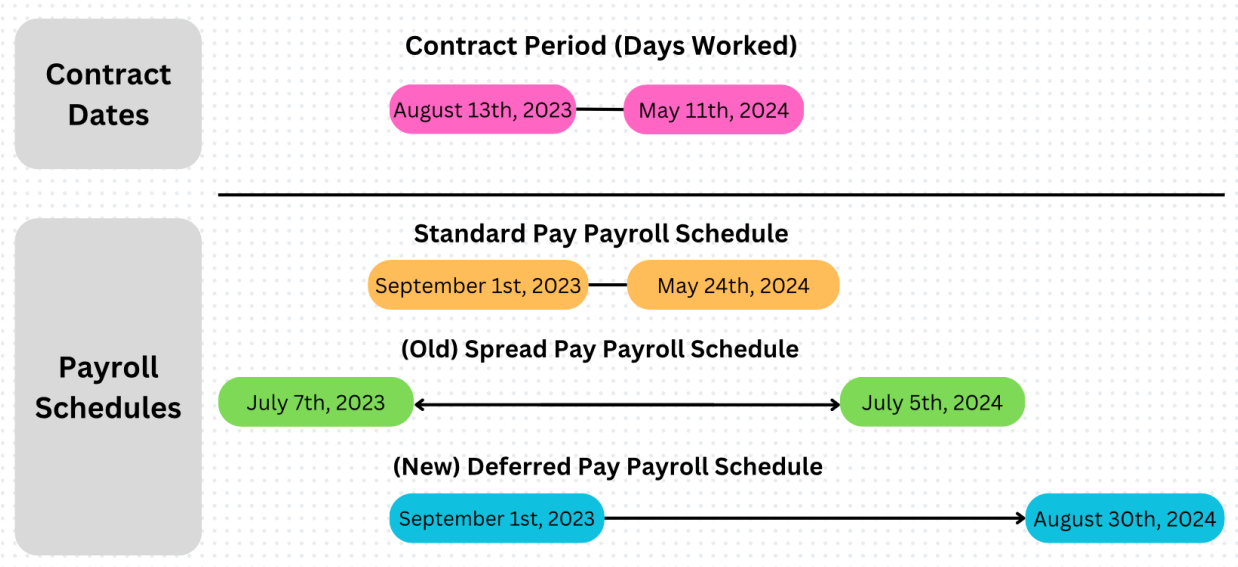

Key Terms:

Standard Pay: a pay system in which faculty on a 9-month contract are paid over nine months. Their pay is in line with the pay periods they work.

Deferred Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. A portion of their pay for the academic year is deferred and covers the pay periods in the summer.

Spread Pay: a pay system in which faculty on a 9-month contract are paid over 12 months. In July and August they are paid in advance of their work. A portion of their pay for the academic year is delayed covering May and June.

Figure 1: Illustration of Different Pay Schedule Examples Based on AY 23-24

Required Changes Discovered During the System Review

The old system must be terminated. In doing so, the university needs to move the 122 faculty currently on the old spread pay schedule to the new deferred pay schedule or to allow them to opt for standard pay. These faculty members will finish the current fiscal year on the old spread pay schedule (ending June 22, 2024 (pay date July 5th) with the end of the current fiscal year) and begin the following year on the new deferred pay schedule (or, if they choose, standard pay). Faculty on the old spread pay system will receive their July 5, 2024 paycheck and then will have a six-week gap as we shift between schedules. This will occur from mid-July through August. This pay schedule will align with the start of the academic year and the pay will be “deferred” to the following summer. The payroll dates for this disruption are the following: July 19, 2024; August 2, 2024; and August 16, 2024. Pay will resume on August 30, 2024.

The task force review also uncovered a second problem with our current system. Currently academic faculty are paid according to two pay schedules. There is one schedule for faculty on standard pay which uses a schedule of 19.5 factors; and another for those on the old spread pay which uses a 20 factor schedule. The deferred pay system cannot use partial schedules, so the whole schedule needs to use a 20 factor schedule. The payroll system needs to bring all academic year faculty on the same schedule.

This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate. There will be an impact to an academic year faculty’s summer earnings if an hourly rate is used to calculate the salary for the summer. The summer hourly rate will be 2.5% less than the previous pay schedule. See the Appendix for additional information.

Opportunities for Faculty on Standard Pay to Switch to Deferred Pay and Other Required Changes Uncovered by this Process

The University of Idaho can offer deferred pay to faculty who are on 1.0 FTE academic year (9-month) appointments beginning in AY 24-25. These faculty must opt in to deferred pay for the entire year. New faculty who are hired mid-year will have to wait for the following year to elect deferred pay. Faculty who would like to remain on standard pay are not required to opt into deferred pay. The details of this new schedule are included as an appendix. To reset the schedule, there are three required adjustments.

- First, there will be a disruption in pay for the 122 faculty on the current spread pay system to transition to the new deferred pay system;
- Second, the payroll system needs to bring all academic year faculty on the same 20 factor schedule;
- Third, the new system requires that administrative stipends be paid differently. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months. The new system requires the base salary and the administrative stipend to be paid separately.

Recommendations of the Task Force

The task force recommends the following:

- The University of Idaho offer deferred pay to all eligible faculty effective on academic year (9-month) contracts starting in 2024-25;
- The University of Idaho transition faculty currently on the old system of advanced spread pay to the system of their choosing: either the new deferred pay system or the standard pay system effective 2024-25;
- The University of Idaho provide options for the 122 affected faculty members on the legacy spread pay system to navigate the gap in three pay periods offering the following:
 - Financial planning tools for those who wish to immediately transition to the new deferred pay system to manage the three-pay disruption on their own;
 - The option to enroll in a UI payroll managed system that withholds an amount of their choice (up to 3/26th of their annual salary) which will be used to provide the UI paychecks during the three pay periods of transition. (See Appendix for details)

Appendix—Updated UI Deferred Pay Schedule

Compiled by the Provost's Office and the Division of Finance and Administration
November 6, 2023

Context

A faculty senate deferred pay Task Force worked with individuals from the Division of Finance and Administration and the Provost's Office to make deferred pay available to all full-time faculty in AY 24-25 as a recruiting and retention benefit.

Currently, there are 576 U of I faculty on Academic Year (AY) contracts.

- 454 are on standard pay; they are paid for 39 weeks of work during the academic year.
- 122 are on the old system of spread pay; they are paid for 39 weeks of work over twelve months.
- 19 of the 122 faculty on the old spread pay system currently have administrative stipends that are currently included in their spread salary.

Eligibility for deferred pay:

- Full-time faculty on Academic Year contracts can opt in to deferred pay prior to each academic year.
- Must start the Academic Year on deferred pay; faculty who begin mid-year must wait to join deferred pay until the following year.
- Faculty must have a 1.0 FTE appointment for the entire academic year.

Transition from the old system to the new system:

This system change involves a one-time payroll system reset that will mean the following:

- The start date of the deferred pay schedule must be aligned with the start of the academic year contract. For the 122 faculty on the old system, this means there will be a disruption in pay for three pay periods (six weeks) in the summer of 2024. Faculty on the old spread pay system would receive their paycheck on July 5, 2024 and then there would be a six week disruption. These include the pay dates of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024. In future years, there will be no gap in pay as faculty continue on deferred pay.
- Administrative stipends can only be paid according to the academic year calendar. Faculty with administrative appointments can opt into the deferred pay system to spread their base salary over 12 months, but the administrative stipend can only be paid according to the academic calendar. Currently, there are 19 faculty of the 122 on the old spread pay system who have their base salary and administrative stipend spread out over 12 months.
- The new deferred pay system requires a reset in the payroll schedule from 19.5 pay factors to 20 pay factors. Work expectations and job duties remain the same for positions, but the Banner system requires an even number of weeks in the pay

schedule (and not split pay periods) to avoid errors and manual work. This will impact academic year faculty on standard pay who have contracts in the summer that require salary calculations based on an hourly rate. The total amount that a faculty member in this situation could earn in the summer under the new system could be slightly less because summer will not include a half pay period and because the new schedule reduces the calculation of the hourly rate by 2.5%.

- The system does not support half pay periods.
- U of I cannot sustain two separate payroll systems.

FAQ:

Q1: Is deferred pay required for all academic year faculty? I am an academic year faculty member and I prefer to be paid according to the nine-month contract period.

A: No, deferred pay is an option offered to faculty on AY contracts. The default way to be paid is standard pay according to the contract period. Deferred pay must be selected as an option each year.

Q2: I moved from spread pay to standard pay in 2017 and received a \$1,000 incentive payment. Do I have to pay this back?

A: No. You received that incentive to stop using the old spread pay system.

Q3: What is wrong with the old spread pay system and why were some faculty allowed to stay on it?

A: The old system of spread pay relies on paying faculty prior to the start of their contract which creates significant challenges. The updated process will allow the administrative systems (Banner) to manage these deferred pay schedules in the manner intended and reduce the administrative burden associated with managing those pay schedules. Likewise, the new system allows for contracts for standard pay and deferred pay operate with the same payroll schedule assumptions. We can only have one payroll system for academic year faculty. It is no longer possible to support two distinct payroll systems for academic year faculty.

Q4: Can faculty on the old spread pay system opt into the new deferred spread pay system?

A: Yes, but they will have to manage a one-time disruption in three pay periods in late summer 2024. They can manage this on their own or they can set up UI payroll withholdings during spring semester to manage this.

Q5: How will the 122 faculty on the old spread pay system be transitioned to the new system?

A: They will receive their July 5, 2024 paycheck, which represents the last pay for their 2023-2024 academic year salary. Then, there will be a disruption in the three pay periods

of July 19, 2024; August 2, 2024; and August 16, 2024. Pay would resume on August 30, 2024 with their 2024-2025 academic year salary. These faculty can either budget and manage the transition on their own or UI payroll can assist through a withholding program.

Q6: What does the UI payroll withholding system to bridge the transition look like for faculty on the old spread pay system?

A: A contract time would be established where a faculty member would establish a set amount to be withheld from their paychecks (up to 3/26th of their annual salary). Payroll would create a holding account for the faculty member. The established amount would be taken out over 14 pay periods January 5, 2024 through July 5, 2024. These funds would be used to pay the faculty member during the transition pay periods of July 19, 2024 through August 16, 2024. The faculty member chooses the amount to be withheld. This arrangement would need to be signed and approved by the faculty member by December 21, 2023.

Alternately, faculty who are on the old spread pay system, can manage the transition on their own. They are not required to use the UI withholding system.

Q7: Am I losing money with this transition from the old spread pay schedule to the new deferred pay schedule?

A: No, you will still be paid the same amount for your work according to your contract. Depending on how a person elects to manage the transition in payroll systems, there will be variability in the timing of paychecks.

Q8: Why does the new system remove a week from the summer pay schedule and what is the impact?

A: U of I is currently running two payroll systems for academic year faculty; one of the systems uses half pay periods to calculate salary. The ability to offer all academic year faculty deferred pay requires an adjustment to the payroll schedule to bring all academic year faculty on the same schedule. This one-time adjustment changes the summer schedule by a week. This change has no effect to faculty base salary during the regular academic year and no impact to summer appointments paid by a flat rate.

This change will impact academic year faculty who calculate their summer salary earnings using an hourly rate. The hourly rate will be 2.5% less than the hourly rate of the old system. Potentially, the earnings for faculty on grant funded work for the entire summer could have the summer earnings reduced by a maximum of 10% if they are paid exclusively on grant funds. The reduction results from the schedule adjustment of a week and the reduction in the hourly rate. Grants require the calculation of faculty effort on based on an hourly rate.

In summer 2023, there were 182 faculty who had summer contracts that included compensation for work on grants.

Q9: Why can't administrative stipends be included in the deferred pay option?

A: Faculty who hold administrative appointments (e.g. associate dean, department chair, program director, etc.) and who receive an administrative stipend can opt into having their base salary paid as deferred pay, but the administrative stipend must be paid according to the academic calendar. This is because these positions often fluctuate or start at different points in the year. The new system cannot accommodate the variability with these types of positions and so this part of the appointment will be treated separately. For faculty in these types of positions, they can opt to defer their base salary over 12 months, but the administrative stipend will be paid over 9 months.

Q10: I am a faculty whose FTE is variable over the course of the academic year due to availability of grant funding. Am I eligible for deferred pay?

A: No. Faculty are only eligible to be on deferred pay if they have a 1.0 FTE appointment for an entire academic year.

Q11: What happens for faculty on full-year sabbatical as it relates to supplemental pay on grants?

A: This information is forthcoming and solution will be in place by the time of implementation.

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 15

Approved at Mtg #16
January 9, 2024

Tuesday, December 5, 2023, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Reynolds, Mischel

Also Present: Samantha Thompson-Franklin (proxy for Kenyon)

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #14, November 28, 2023, were approved as distributed.

Chair's Report:

- Fan mail is not how I would describe some of the emails Kristin and I have received about spread pay since we last met. There is lots of confusion about what was involved with the vote last week. New information has come up which Kristin will further cover later in the meeting to clarify any confusion and what is entailed in last week's vote. As serious concerns were raised, I would like to entertain a motion to reconsider last week's motion. Vice Chair Haltinner will explain the process at the beginning of the voting section.
- Many of the students who graduate this week may soon join the workforce with little or no idea about Artificial Intelligence (AI), the technological challenges associated with AI, or the impact of AI on their future careers. This is something that we need to think about as a university.

Provost's Report

- Final grades are due December 19 at noon.
- Winter Commencement: Saturday December 9. We have over 550 graduates. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena.
<https://www.uidaho.edu/events/commencement/winter>
- Football: we are entering the third round of playoffs. The next game is Saturday, at 7pm, at the Kibbie Dome, against the University of Albany.
- Related to the recent spread pay discussions: we will send a university-wide communication about splitting paychecks into multiple accounts in Banner.

Motion to reconsider the Spread Pay Task Force Recommendations (vote):

- Vice Chair Haltinner apologized for last week's confusion that led to the vote and proceeded to provide clarification.
 - Faculty Senate voted on the recommendation to offer deferred pay as a benefit to all eligible employees. Faculty Senate did not vote on implementation policies or practices, which will come through Senate in the spring.
 - FSL moved quickly to maximize the time available to the 122 faculty currently on the old spread pay system to plan for the pay gap in summer 2024.

- The recommendation is on the UFM agenda as a non-voting item because our constitution does not provide a mechanism for the general faculty to vote on Senate recommendations at UFM's. In accordance with FSH 1540 B-2, we wanted to be transparent with the full faculty about Faculty Senate work.
- Since last week, FSL received multiple messages from faculty who are deeply concerned about the implementation process that may result from the recommendation. FSL also learned that some non-senators voted last week for the FSH and UCC items on the agenda, but it's unknown whether non-senators participated in the vote regarding the Spread Pay Task Force recommendation. We confirmed that interest-free loans by the university are not permitted by state law. We also learned about a new option: rather than changing the contract length from 19.5 to 20 pay periods, we can change only the pay schedule to 20 weeks leaving the contract length to 19.5 weeks. In this way, hourly wages, contract length and summer length stay the same. The Provost Office, the Budget Office and ORED have been working hard to identify a better solution, the detailed implementation of which could be ready in January 2024. Any required policy changes will go through Faculty Affairs and Faculty Senate.

Vice Chair Haltinner explained the requirements for and implications of the Motion to Reconsider: it must be made by a member who voted on the prevailing side, it needs a second, who can be any member, it requires the presence of new information, it can be debated, it must be voted on, it requires a majority of the votes cast. If the motion to reconsider passes, last week's vote to support the Spread Pay Task Force recommendation is vacated. If the motion to reconsider does not pass, the recommendation from last week stands, but the task force, in partnership with FAC, will continue to work with the appropriate university bodies on the details of the implementation. The main difference is whether Faculty Senate votes on the recommendation before or after the implementation details have been ironed out. Some senators objected to the motion to reconsider because Robert's Rules of Order allow it only at the same meeting where the original motion was voted on, and because there is no new information to justify it. Others argued that there is new information – the possibility that non-senators may have voted on the original motion should, in itself, be enough to invalidate the vote.

Moved to reconsider (Raney/Barannyk).

Discussion:

People currently on standard pay are very worried about having to wait until summer 2026 for deferred pay. On the other hand, of the 122 employees currently on the legacy spread pay system, some are deeply anxious about the short time available to prepare for the pay gap in summer 2024. On behalf of their constituents, some urged Faculty Senate to reconsider and ultimately defer the implementation by one year. Vice Chair Haltinner reiterated that spread pay is going away in any case, and deferring by one year would give impacted faculty 18 months rather than 6 months to prepare for the pay gap. The university would hold on to the current spread pay system for another year.

There was again disagreement about the presence of new information and whether Robert's Rules of Order permit us to reconsider a motion at the next meeting. FSH 1520 VI – Rules of Order states that “...*Robert's Rules of Order Newly Revised govern all meetings of the university faculty, other faculties, the Faculty Senate...*” and those allow to reconsider a motion at the following meeting. A Senator noted that the reconsideration of the motion will not change anything, since it's only a recommendation.

At this point, Senators were ready to vote on the motion to reconsider the Spread Pay Task Force recommendation. If the motion passes, the original question from last week comes back before the assembly.

Vote: 15/21 yes; 6/21 no. Motion to reconsider passes.

The original motion can now be debated, amended, and voted on.

Discussion:

Chair Gauthier noted that, if the current recommendation of the task force are voted down, it will be important that all impacted groups are represented on the task force that will continue the work.

Motion to amend (Justwan/Mittelsteadt): Assemble a task force where all impacted groups are represented and charge this committee with working out the implementation details.

Discussion:

A debate followed on who the different groups are and whether it would be productive to include additional people on the task force. Senator Mittelsteadt volunteered to join the task force as a faculty impacted by potential changes in summer contracts.

Chair Gauthier suggested an official “heads up” communication to those faculty who would have to go through the pay gap in summer 2024, should that be the path we take. Provost Lawrence agrees that these faculty should be put on the alert but emphasizes that timing is crucial – if we are not going down that path, we shouldn’t put people on notice and then let them know that plans have changed.

Vote to approve the motion on the floor (to refer the matter to a representative committee):

6/20 yes; 14/20 no. Motion fails.

Back to the original motion from last week.

It was further clarified that, if implementation requires policy changes, those will go through FAC and Faculty Senate. Again, timing is extremely important – the implementation date must be very clear in the language of the motion.

Motion to amend with implementation delayed by one year (Justwan/Mittelstaedt).

Discussion:

Senators reiterated their constituents’ concerns, either strongly in favor of or strongly against the amendment.

Vote on the amendment: 50% yes; 50% no. The Chair already voted; thus, the motion fails for lack of majority.

Motion to call the question (Long/ Murphy).

Vote on motion to call the question (needs 2/3 majority): 19/20 yes; 1/20 no. Motion to call the question passes.

Vice Chair Haltinner displayed the original motion and recalled that, regardless the outcome of the vote, the task force will continue to work on implementation.

Vote on the original motion: 12/21 yes; 9/21 no. Motion passes.

Adjournment:

The agenda not being completed, Chair Gauthier entertained a motion to adjourn. So moved (Long, Raney). The meeting was adjourned at 4:57pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #15

Tuesday, December 5, 2023 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #14 November 28, 2023, **Attach. #1**
- III. Chair's Report
- IV. Provost's Report
- V. Old Business (vote)
 - Motion to Reconsider Spread Pay Task Force Recommendations – Kristin Haltinner, Vice Chair Faculty Senate
- VI. Committee Reports (vote)
 - Proposed changes to the University Catalog
 - UCC 164 Biological Sciences Teaching Major – Sydney Beal, Academic Publications and Curriculum, Registrar's Office **Attach. #2**
 - UCC 245 History Teaching Major 33 credits – Taylor Raney, Associate Department Chair, Curriculum and Instruction **Attach. #3**
 - UCC 218 English Teaching Major 34 credits – Taylor Raney, Associate Department Chair, Curriculum and Instruction **Attach. #4**
 - UCC 263 Mathematics Teaching Major 36 credits – Taylor Raney, Associate Department Chair, Curriculum and Instruction **Attach. #5**
 - UCC 322 Chemistry Teaching Major – Taylor Raney, Associate Department Chair, Curriculum and Instruction **Attach. #6**
 - UCC 326 Earth Sciences Teaching Major – Taylor Raney, Associate Department Chair, Curriculum and Instruction **Attach. #7**

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 14

Tuesday, November 28, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Blevins, Reynolds, Rinker

Also present: Samantha Thompson-Franklin, proxy for Kenyon.

Guests/Speakers: Alistair Smith, Cari Fealy, Michael McCollough, Jerry McMurtry, Linda Campos

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #13, November 14, 2023, were approved as distributed.

Chair's Report:

- We'll have one more Faculty Senate meeting, December 5. Please attend.
- We are close to the end of the semester. It's been great working with you all! I have learned a lot during the past months, especially on the importance of keeping an open mind and encouraging a collaborative approach.
- Vice Provost for Academic Initiatives Gwen Gorzelsky is looking for a senator interested in participating in a working group with SBOE about admissions. The project involves discussing a possible direct admissions pact across [Western Interstate Commission for Higher Education](#) (WICHE) states, based on the [Smarter Balanced Assessment](#). If interested, please let Kristin or me know.

Provost's Report:

- 3MT (Three-Minute Thesis) competition. Tomorrow at 2:30pm, in the Vandal Ballroom.
- Next faculty gathering: Monday, December 4, 4:30pm to 6:30pm, at the Seed Potato Germplasm building, near Facilities. Hosted by CALS. RSVP: <https://forms.office.com/r/pvTQ8UBxYY>
- Winter Commencement is Saturday December 9. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena. Please encourage faculty to attend. <https://www.uidaho.edu/events/commencement/winter>
- The football team made it to the playoffs. The first game is Saturday at 7pm in the Kibbie Dome.

Committee Reports (vote):

- Proposed changes to the University Catalog
 - UCC 522 Marketing Analytics Undergraduate Academic Certificate – Michael McCollough
The Marketing Analytics certificate allows students to apply statistical tools to examine marketing decisions. Completion of the certificate will allow students to apply quantitative analytical skills to assess and solve marketing problems and provide strategic recommendations. We are eliminating the Marketing Analytics

Emphasis in the Marketing Degree and introducing a Marketing Analytics Certificate. Enrollments have not been strong in the degree emphasis, and we hope by converting to a certificate, we will make marketing analytics accessible to a larger number of students across campus.

Vote: 21/21 yes. Motion passes.

- UCC 526 Scientific Communication and Leadership Academic Certificate – Jerry McMurtry

The courses which make up the proposed certificate are already part of the Professional Science Masters (PSM) degree. By creating a certificate using the PSM organizational skills courses, non-thesis (primarily - but not exclusively) degrees can integrate some or all of the courses, and the student would earn both the degree and the certificate. In conversations with directors of graduate studies, department chairs, and deans, there is support for the certificate as a standalone program as well. All of the courses have capacity, and faculty/departments are eager to use the certificate to increase enrollment.

Vote: 22/22 yes. Motion passes.

- UCC 483 International Economics Academic Certificate – Stefanie Ramirez
Many business and social issues are the subject of International Economics, from export promotion to sustainable development. This certificate brings together economics courses already being taught at UI that form the basis of knowledge of International Economics. It will serve potential students from outside the university as well as those already at UI who seek to learn more about the subject. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

Vote: 19/19 yes. Motion passes.

- UCC 523 Economics of Public Policy Undergraduate Academic Certificate – Stefanie Ramirez

A wide range of jobs are engaged with public policy in various ways, from jobs in businesses affected by regulations to the policy makers and their aides making the regulations. All parties need to be better informed about the economics of public policy. This certificate brings together Economics courses already being taught at UI that together form the basis of knowledge of public policy issues. It will serve potential students from outside the university as well as those already at UI who seek to learn more about public policy. Initially, no added workload is anticipated as the courses are already being offered. With substantially high enrollment in the certificate, additional sections of the courses may be added.

Vote: 21/21 yes. Motion passes.

- Proposed changes to the Faculty Staff Handbook
 - FSH 1565 Academic Ranks and Responsibilities – Alistair Smith
C-2 revised to clarify how advising is credited for evaluative purposes.

Discussion

There was a brief discussion on how to best clarify that research advisees can be graduate or undergraduate. Friendly amendment: Drop the first three words, “*The number of*” from the relevant sentence in the policy.

Vote: 23/23 yes. Motion passes.

- FSH 2300 Student Code of Conduct & FSH 2400 Disciplinary Process for Alleged Violations of Student Code of Conduct – Cari Fealy
Comprehensive review resulting in rewrite. FSH 2300 Student Code of Conduct and FSH 2400 University Disciplinary Process for Alleged Violations of Student Code of Conduct have been combined into one policy, FSH 2300 Student Code of Conduct and Resolution Process. This policy revision is accompanied by the proposed deletion of FSH 2400.
Vote (FSH 2300): 22/22 yes. Motion passes.
Vote (FSH 2400): 23/23 yes. Motion passes.

- FSH 4620 Academic Calendars – Torrey Lawrence, Lindsey
This revision delays all dates for Fall 2025, Spring 2026, and Summer 2026 by one week. Details are attached. The current dates for Academic Year 2025-26 align with WSU for Spring commencement on May 9, 2026. This will be a major challenge for the Moscow and Pullman communities as well as our families seeking housing and dining. UI’s calendar currently “flips” to a later start in AY 26-27; however, that change can take place during AY 25-26 to avoid concurrent spring commencements while still following the normal pattern of UI semesters. In addition, earlier starts creating a hardship for many UI students who are involved in agricultural harvest or firefighting. Delaying all AY 25-26 dates addresses these concerns. One additional impact is that the irregular 14-week summer (normally 13 weeks) will shift from Summer 2026 to Summer 2025. Provost Lawrence noted that the first page (p.96 of the packet, containing the 2014-2020 calendars), can be dropped.
Vote: 23/23 yes. Motion passes.

Other Voting Items:

- Spread Pay Task Force Recommendations – Kristin Haltinner
Vice Chair Haltinner summarized the current status. There are currently 122 faculty on the old spread pay system, and 361 on standard pay and wanting to switch, or 63% of all faculty on standard pay. There are currently 20 to 30 faculty earning maximum summer salary through grants. Since the last meeting, we learned that it is possible to delay the implementation of the new deferred pay by one year. Switching to a 38-week AY is not possible, and raising salaries by 2.5% to compensate for the hourly rate reduction for the calculation of summer salaries is also not an option. Motion to approve the (displayed) recommendations of the task force: Chapman/Long, followed by discussion.

With regard to the six-week pay gap, a senator said that, in some universities, they introduced interest-free loans for up to one month salary. Could this be an option for us? Linda Campos responded that state law forbids loaning state funds to employees. Instead, they came up with the option of setting aside a portion of the impacted faculty’s pay checks from January 2024 to draw from during the pay gap.

A senator inquired about the reasons why a 38-week AY is not possible. They reiterated that a 2.5% summer hourly rate pay reduction is a non-starter for many faculty. Having to take an arbitrary pay cut to fix the payroll system is unacceptable. Provost Lawrence responded that a 38-week AY presents the same challenges as a 40-week one. In addition, we would be eliminating one week from the contract period during which faculty actually work, namely, the start-up week prior to the first week of classes when faculty get ready for the semester. The semester ends on Friday of final exam week and the contract ends on that Saturday. Grades are due on Tuesday or Wednesday of the following week, and, therefore, faculty work about 39.5 weeks, only a few days short of 40 weeks, making the switch from 39 to 40 weeks reasonable. Work expectations for the contract period as defined in policy are unchanged. Moving to 38 weeks would create even more problems: faculty would not have access to Canvas or benefits until the first day of classes. Presently, we use both 19.5 and 20 pay periods, but we need to bring everyone to the same system. We are trying to offer deferred pay to anyone who wants it, in addition to the 122 faculty on spread pay. A 40-week AY (20 pay periods) can accomplish that and reflects the work we are actually doing. Linda Campos had some comments from the technical side of the payroll system: an hourly rate is required for the purpose of summer contracts, which requires manual adjustment because we cannot rely on Banner for an accurate calculation of hourly rates. This is why we need to align the systems. The Provost added that the 2.5% pay cut will impact those faculty who earn 13 weeks of summer salary. For others, the calculated hourly rate does not necessarily translate into a pay cut, it depends on how they are paid. For instance, if summer work is paid in a lump sum, the amount remains the same, as long as the summer period is less than 13 weeks. The senator had other thoughts, based on the assumption that faculty are not paid through the winter break. Actually, faculty are on payroll during the time between semesters.

Other senators reported that their constituents are very unhappy about the summer pay cut and would consider leaving the university for that reason. They support deferred pay, but cannot agree to a pay cut to make accounting simpler.

A senator did not understand why the number of pay periods we use has an impact on contracts. Provost Lawrence explained that the contract period would be 40 weeks, with the extra week taken from the summer period when faculty are already working (prior to the start of classes). However, per policy, our academic year contract obligations are determined by the academic calendar and would not change. The senator remained unclear on why adding a week to their contract without adding pay is not a pay cut. The Provost reiterated that the reason is that faculty are exempt and not paid by the hour. It is a pay cut for those on 13-week full summer contracts. The source of the limitation on how much we can be paid in the summer and the connection with the computed hourly rates is grants rules.

It became clear that, for the sake of moving forward, deferred pay and the 12-week summer issue must be seen as separate. Senate priority is to come up with a deferred pay system for all who are interested.

Question in the zoom chat: If someone teaches the first summer session, would they have an overlap in contracts? Or, would the summer schedule have to move back by a week? The Provost replied that there is overlap. It will be necessary to rethink the summer schedule and its pay schedule.

We have to get everyone on the same schedule, and people on standard pay are on a 19.5 pay period schedule, but deferred pay is calculated based on 20 pay “factors” spread over 26 pay periods. The financial system (Banner) in use by the University does not support, without manual “work-arounds”, 19.5 pays so standard pay must be changed to a 20-pay schedule. People currently on spread pay will be able to remain on it for another year.

Proposed amendment to the motion (Justwan/Barannyk): Delay the implementation of deferred pay by one year. Some additional discussion followed. Some senators argued that waiting one more year does not change anything, while others felt strongly that more time to prepare for the pay gap is crucial to their constituents. Those on standard pay wishing to switch stressed the urgency for about 400 faculty to have deferred pay. They were never offered any help to set money aside for the summer. The provost noted that the current offer to help faculty set money aside in anticipation of the pay gap is feasible because it involves one tax year. On the other hand, financial tools are available. One can solution currently available in Vandalweb is to have their paychecks deposited in two different accounts, one of which would be used to cover the summer. This tool should be widely publicized.

Vote on the amendment: 3/19 yes; 16/19 no. Motion fails.

Back to the original motion – approve the task force recommendations for deferred pay effective in AY 2024-25.

Vote: 11/18 yes; 7/18 no. Motion passes.

There was a general consensus that a better solution should be found to the problem of summer salaries and the 20 pay factors.

New Business:

There was none.

Chair Gauthier had two questions from constituents for Provost Lawrence:

If someone works at the U of I and under the “umbrella” for both universities, how do they get compensated?

Provost Lawrence replied that there is no structure or umbrella for the two universities. U of I will continue as usual under the Regents, and UOPX under the Four Three Education and their board. Nothing like a joint employee is contemplated at this time.

What’s the correct cost of the UOPX purchase? Is it about \$500M or closer to \$600M?

Linda Campos replied that \$680M is the estimated amount of bonds to be issued in order to finance the purchase.

A senator argued that, with the R1 rank getting closer, we should start comparing our salaries with those of a different group of peer institutions. Provost Lawrence replied that our current faculty market rates are based on both R1 and R2 peer salaries. Those lists could change when the new Carnegie system is implemented. We could look at our market-based salary system and consider just R1 peers. Ultimately, funding available for CEC is determined by the legislators. Chair Gauthier suggested to look at other forms of revenue streams, potentially generated by the UOPX transaction.

Adjournment:

The agenda being completed, Chair Gauthier adjourned the meeting at 4:55pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Coeur d'Alene
Moscow

Approved Upper Division History Electives to total 33 credits in the teaching major. *Note: A single course may satisfy more than one of the upper-division requirements.*

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Coeur d'Alene
Moscow

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the History Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:05:31 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the Earth Science Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:06:49 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Coeur d'Alene
Moscow

Student Learning Outcomes**Have learning outcomes changed?**

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the Geography Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Curriculum:

MATH 143 and MATH 144 may be necessary prerequisites for students with weak backgrounds.

A. 51-52-Credit Mathematics Teaching Major

| Code | Title | Hours |
|---|--|--------------|
| CS 112 | Computational Thinking and Problem Solving | 3 |
| MATH 170 | Calculus I | 4 |
| MATH 175 | Calculus II | 4 |
| MATH 176 | Discrete Mathematics | 3 |
| MATH 215 | Proof via Number Theory | 3 |
| MATH 275 | Calculus III | 3 |
| MATH 330 | Linear Algebra | 3 |
| MATH 388 | History of Mathematics | 3 |
| MATH 427 | Transformational Geometry | 3 |
| MTHE 409 | Algebraic and Functional Reasoning | 3 |
| MATH 461 | Abstract Algebra I | 3 |
| MATH 471 | Introduction to Analysis I | 3 |
| MATH 390 | Axiomatic Geometry | 3 |
| or MATH 391 | Modern Geometry | |
| Select one of the following: | | 3-4 |
| STAT 251 | Statistical Methods | |
| STAT 301 | Probability and Statistics | |
| MATH/STAT 451 | Probability Theory | |
| Select one of the following: | | 3 |
| MATH 430 | Advanced Linear Algebra | |
| MATH 452 | Mathematical Statistics | |
| MATH 453 | Stochastic Models | |
| MATH 462 | Abstract Algebra II | |
| MATH 472 | Introduction to Analysis II | |
| MATH 476 | Combinatorics | |
| In addition, the following special methods sequence is also required: | | |
| EDCI 434 | Secondary Mathematics Methods | 3 |
| EDCI 454 | Secondary Mathematics Methods Practicum | 1 |
| Total Hours | | 51-52 |

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Coeur d'Alene

Moscow

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the 51-credit Math Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:09:57 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

| EDCI 449/549 | Second Language Teaching Methods | 3 |

Approved upper division French electives to total 45 credits in the teaching major.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Moscow

Student Learning Outcomes**Have learning outcomes changed?**

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the French Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:08:50 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

Title

Academic Requirements for Graduate Admission concerning letters of recommendation

Request Details

Graduate Council voted on April 19, 2023 to remove the mandatory three letters of recommendation as part of the application and allow the programs to decide how many and what type/format of reference they would like to evaluate their prospective students. They are no longer bound by the static written letters. The minutes from Grad Councils vote and the marked up changes are attached for reference.

The sections in the catalog should read as follows:

Academic Requirements for Graduate Admission

Students who satisfy all criteria listed below will be considered for graduate admission to the University of Idaho:

1. Have a bachelor's degree from a regionally accredited U.S. college or university or recognized international institution. If the degree is not from a regionally accredited institution, the application may be reviewed by the department and by the College of Graduate Studies.

Or Have completed three years of undergraduate study in an international accredited institution which has a Memorandum of Understanding in place with the University of Idaho for a cooperative 3+2 program leading to a graduate degree. Cooperative 3+2 programs may have higher entrance requirements. (see COGS website for a list of 3+2 programs).

2. Have an undergraduate cumulative grade-point average of 3.00 or higher or an undergraduate grade-point average of 3.00 or higher for the last 60 semester credits (or 90 quarter credits),

3. Have maintained at least a 3.00 grade-point average in subsequent academic work if any, and

4. Have met any additional requirements set forth by the department or program which may be required. Please, review the graduate admissions website for specific departmental/program requirements at www.uidaho.edu/admissions/graduate.

5. Have been reviewed and recommended for acceptance by the academic unit administering the program in which the student seeks to enroll. For

individual academic unit admission requirements, please refer to individual department sections of this catalog or consult the Graduate Admissions website at www.uidaho.edu/admissions/graduate.

The College of Graduate Studies requires all applicants to provide a one to two-page Statement of Career Objectives, a curriculum vitae/resume, and transcripts from all colleges/universities attended. Recommendation letters or other type of references to support the application may be required by departments. Please see the individual program or department web page for reference requirements. A list of programs can be found here. <https://www.uidaho.edu/admissions/graduate/graduate-programs>.

Transcripts and Application for Graduate Admission

Students wishing to enter the College of Graduate Studies must submit a University of Idaho application for admission, a one to two page statement of career objectives, a curriculum vitae/resume, and transcripts from all colleges/universities attended. Recommendation letters or other types of references to support the application may be required by departments. Please see the individual program or department web page for reference material requirements. A list of programs can be found here. <https://www.uidaho.edu/admissions/graduate/graduate-programs>

A copy of the official transcript (and English translation for all foreign language documents) for every college and university the applicant attended is acceptable for the application review process. Applicants may upload copies of official transcripts and translations via the online application. Uploaded transcripts must be legible; illegible transcripts will not be processed. COGS recommends scanning at 600 dpi resolution.

Official transcripts of all college work will be required at the point of admission and must be sent directly to the Graduate Admissions Office. Applicants who have already earned a graduate degree from a regionally accredited U.S. institution and are seeking a graduate degree at Idaho will only need to submit official transcripts from the graduate degree granting institution. All documents received as part of the application process become part of the official Graduate Admissions application file.

- I. Minutes from 03/08/2022 (Vote: 10, 0, 1 to approve)

- II. Announcements
 - a. The Dean’s updates: COGS position opening and kudos to Grad Admissions for handling the high volume with a smaller crew.
 - b. There could be a \$1.20 increase for TAs to keep the salaries moving forward but waiting on SBOE April 26 for final confirmation of amount.
 - c. Linda Chen, going on sabbatical, Jeff B. from business is a possible replacement, if necessary, but we will send out an announcement to the deans for replacements for those rolling off 2023. Thanks Dan, Kelly, Linda, Leda/Kerri and Pedram!
 - d. Evan: Asked about the cost per course requirement to be placed in the catalog and whether that is a requirement for COGS. Jerry was going to inquire.
 - e. Strategic Enrollment Plan: Subgroup, Grad Recruitment-GC will be the body to review the Action Planning. Nice cross-section of the university to give feedback as SEP committee. We’ll send out your feedback by the end of the school year.
 - f. New 4+1s and a workshop tomorrow.

- III. Old Business
 - a. Academic requirements language-LOR recommendations-attached. Moved to Vote: 12, 0, 1
 - b. FSH 1700 2.1 revisited after committee review-See attached. Decision regarding senior instructors to serve on Grad Comm, up to dean of COGS. Moved to Vote (9 approved, 0 against, 2 abstentions)

- IV. New Business

Discussion:

 - a. TA Resource allocation: RECOMMENDED CRITERIA AND PROCESS draft review (attached) As UI charges toward R1, with growing PhD numbers, conferrals should continue to grow too, but it takes 5-7 years to increase the conferral rate. UI is going in the right direction.
 Discussion: Metric model for interdisciplinary degrees. Covering the high enrollment courses and labs, two aspects of the model might create inaccuracies in allocations and need. Student metrics go to MP, but not university metrics, they are department/college counted. Also, potential students are not encouraged to apply if no funding is available, so it skews the numbers. How do we capture that? State-funded RA positions in the future are a possibility. Narrative around R1 classification discussed. How is it inclusive of teaching faculty?

- Why R1? How does it affect us? Visibility. Investments surrounding the charge to R1 help all areas and make us more competitive and increasing support for recruitment to increase enrollment will move more students to completion. Programs with high need for TA, don't always have RA opportunities. Currently, positions are just historical allocated. We need to be creative about programs to increase access to more students. Break the mold!
- b. Adding the restriction for 4+1 to get a TA. The program was not intended to support these students on assistantships but to give Idaho residents a tuition break and pathway to a non-thesis MS in one year. Vote for a restriction on teaching assistantships for all 4+1 students. Moved to Vote: (10, 1, 1) Approved to restrict assistantships to 4+1 students.
 - c. UWP representative language should keep UWP representation.
in 1700 ARTICLE VI. GRADUATE COUNCIL, Section 2 and section 2b. [1700 - Bylaws of the Faculty of the College of Graduate Studies \(uidaho.edu\)](http://uidaho.edu)
 - d. Master of Arts in Teaching (M.A.T.) Mathematics (attached). Distinguish the 2 different MAT programs independently and accurately. John 1st, Pedram 2nd. Discussion: 10, 0, 1 approved,
 - e. Low GPA graduate applications: suggestions (example files will be shown at the meeting) Do we need a process for the student and dept to petition Jerry's denial? Evidence that low GPAs finish? Accreditation agency double app process...contingency for summer...waiting for additional coursework...looking for reasons to admit. 2nd level of review? MP Advocacy important. Decision, dept can then appeal or clarification. Puts a process to facilitate better outcome. Suggest in person and written advocacy. Opinion from council is to reconsider case. but upholding standards and integrity is important. Checks and balances are important so we should develop an appeal procedure. Bring back at the next meeting.

Program Title

Kinesiology and Leisure Sciences (MS)

Program Credits

30

CIP Code

31.0301 - Parks, Recreation and Leisure Facilities Management, General.

Curriculum:**Master of Science. Major in Kinesiology and Leisure Sciences.**

The MS Kinesiology and Leisure Sciences (KLS) master's degree is designed to develop advanced knowledge and skills for a diversity of KLS fields. Research and/or authentic professional skills are avenues for student-focused plans of study. Both online and face-to-face learning experience options are available to MS KLS students. The KLS degree has three specializations: Exercise, Sport, and Health Sciences (face-to-face specialization with some online course options); Recreation, Sport, and Tourism Management (available as either an online or hybrid specialization); and Physical Activity and Dance Pedagogy (face-to-face specialization with some online course options).

We prepare advanced KLS professionals to create, disseminate, and evaluate current research in a combination of movement, physical activity, exercise, fitness, recreation, sport and/or health fields.

MS KLS goals are centered on students engaging in inquiry to effectively explore scientific content and authentic problems through a holistic perspective in order to be ethical leaders within the KLS fields.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

Yes

Learning Objectives

1. Apply inquiry skills (e.g., exploring through questions, testing and reflection), techniques (e.g., case study, authentic field experience) and tools to effectively investigate problems and communicate knowledge related to healthy active lifestyles,
2. Analyze wellness through a holistic perspective in relation to healthy active lifestyles, and
3. Evaluate effective leadership, marketing, and/or ethics in working with individuals and/or groups to lead healthy active lifestyles.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The proposed program name change from Movement and Leisure Sciences to Kinesiology and Leisure Sciences was approved by the department faculty to increase marketability of the degree program. The name kinesiology is the key search term that prospective students would utilize to explore graduate programs such as the MS Movement and Leisure Sciences Program. The Leisure Sciences part of the name was kept so that we would continue to align the program with the recreation, sport and tourism management sphere of the degree program. The MS program name change is one of the department's strategies to increase enrollment through better program name recognition for prospective students. The program has capacity to grow in enrollment, which will increase the number of students in the current program courses.

FLEXTIME/FLEXPLACE~~Flexwork~~

LAST REVISION: ~~2022~~January 2023~~09~~

A. A. PURPOSE. This policy establishes the conditions under which employees may be allowed a change in work location or schedule. This policy addresses only discretionary flexwork arrangements; procedures for accommodations of disability are addressed in FSH 6420. The purpose of flextime/flexplace flexwork is to accommodate the personal needs of employees and/or to enable university departments to provide services for more hours each day. A department may use flextime and flexplace flexwork when either it would help an employee better accommodate personal needs and where the arrangement would not adversely affect productivity of the employee's department or the ability of the department to provide service for faculty, staff, and students.

B. SCOPE. This policy applies to all University of Idaho employees.

C. DEFINITIONS:

aC-1. Flexwork is a request initiated by the employee for a Flexwork. A change of work location or work schedule from what was assigned that originally assigned and is when the original assignment can be accomplished differently required in order for the employee to perform University business, programs, or purposes.

b. Domestic Flexwork is a flexwork request for a change of work location within the United States.

beC-2. International Flexwork. is a flexwork request for a change of work location to a location outside of the United States. Because work located in U.S. territories requires similar review, it is included in the definition of International Flexwork.

D. POLICY. Units may use flexwork to provide services for more hours each day or when it would help an employee better accommodate personal needs, if the arrangement would not adversely affect productivity of the employee's unit or the ability of the unit to provide service for employees, students, and/or the public.

BCD-1. CRITERIA CONSIDERATIONS FOR IN AUTHORIZING FLEXTIME OR FLEXPLACE FLEXWORK. Criteria Considerations applied in evaluating requests for flextime and/or flexplace flexwork shall include, but are not limited to: 1) the effect on productivity of the employee, 2) the ability of co-workers to accomplish their work, and 3) the effect on productivity of the department/unit; 4) the degree to which the accommodation is necessary in order to allow the employee to retain his or her job; and 5) whether the arrangement is expected to be temporary or ongoing.

D-2. INTERNATIONAL FLEXWORK. In some cases, International flexwork includes arrangements may shall be treated as University International Travel as defined by APM 70.23. Employees requesting an International flexplace flexwork arrangement may not take any University-owned equipment with them travel unless they comply with the requirements in APM 70.23.

~~E~~D-3. FLEX HOURS. ~~The flex hours enumerated below apply to employees working in departments which operate on a typical business office schedule. All~~Most university departments units which that provide business or student services are open between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday, with summer hours between 7:30 a.m. and 4:30 p.m. (Pacific Time for Moscow and surrounding areas and Mountain Time for Boise and surrounding areas). Such departments units are expected to be staffed during these hours, except for the noon hour in small departments units. Hours of operation for other departments units are influenced by the services they provide and the needs of ~~faculty, staff, employees~~, students, and the public.

~~E~~D-E. PROCEDURES FOR OBTAINING APPROVAL OF FLEXTIME OR FLEXPLACE FLEXWORK. An employee's ~~flextime-flexwork schedule or flexplace~~ arrangement ~~must be~~ is expected to be individually approved in writing and in advance by the ~~departmental-employee's supervisor and other authorities as identified by guidance maintained on the Human Resources website administrator and approved by the dean or director and/or Vice President/Provost in accordance with procedures of the college or administrative unit university.~~ A flextime ~~f~~Flexwork arrangement ~~schedule must be set at the beginning of each semester and remain in effect until the end of the semester can be requested at any time through the established flexwork process. and Approved flexwork arrangements may be renewed. Approved requests will ordinarily have a duration of up to six months. -In some situations, approval may be granted for up to one year.-~~

~~E~~E-1. ~~The departmental-administratorsupervisor and the employee requesting flexwork must determine measures of productivity prior to approval of the flexwork request. The measure of productivity must be approved by the employee's chain of supervision up to Vice President or Provost as identified by guidance maintained on the Human Resources website. The measure of productivity will be incorporated into the flexwork agreement. When work at home is to be incorporated into an approved flextime flexwork arrangement (flexplace), duration (not to exceed six months) of approval for off-site work and measures of productivity will be determined in advance by the departmental administrator and the employee, with the concurrence of the dean or director and/or Vice President/Provost, and incorporated into the flextime/flexplaceflexwork agreement.~~

~~a~~E-2. If the flexwork request ~~working at home~~ requires relocation of university equipment, such as a computer and peripheral equipment, the relocated equipment will be inventoried ~~by the unit. Contact and appropriate arrangements made with the~~ Risk Management Office to ~~discuss property coverage and contact~~ ~~the Office of Information Technology regarding computer security. insure it.~~ The ~~departmental-administratorsupervisor~~ is expected to verify return of the equipment when the ~~flexplace-flexwork~~ arrangement ceases.

~~b~~E-3. If the flexwork ~~request~~ arrangement contemplates work at an alternate location, the ~~e~~Employees working at a flexplace ~~must maintain adequate internet connectivity~~ ~~adequate~~ to support security and management software on any assigned technology resources. ~~home must be accessible by telephone (where applicable). When technology support is necessary, the employee may be required to be available during university business hours.~~

~~e~~E-4. Employees granted a flexwork ~~request~~ arrangement for a change of work location ~~working at a flexplace~~ ~~must be available~~ ~~accessible~~ for ~~real-time~~ synchronous communications (e.g., telephone or ~~web-video~~ conference) during designated working hours unless otherwise approved by the ~~department~~ unit.

E-5. Employees granted a Flexwork arrangement are responsible for ensuring their workstation design meets supportive ergonomic and human factors guidelines.

Version History

Amended 2023. Updated throughout to revise procedures and ensure compliance with export control requirements in international flexwork arrangements. Comprehensive review.

Amended July 2009. Changed Human Resource Services to Human Resources.

Amended July 2000. Editorial changes to D-1 a.

Amended July 1997. Editorial changes.

Adopted July 1994.

Attach. #20

FY24 CEC SUMMARY

Snapshot as of 05.18.2023

| | Staff GenEd | Staff GenEd | Non-Staff Total | Faculty GenEd | Faculty GenEd | Non-Faculty Total | GenEd Total | Non-GenEd Total | Grand Total | Staff % of Total | Faculty % of Total |
|---|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|------------------|--------------------|
| FY24 Target Salary | \$ 47,763,716 | \$ 44,172,405 | \$ 91,936,121 | \$ 48,478,160 | \$ 23,963,002 | \$ 72,441,162 | \$ 96,241,876 | \$ 68,135,407 | \$ 164,377,282 | 55.93% | 44.07% |

| # Eligible Still Below 80% of Target Due to Funding | | | 14 | | | 2 | | | 16 | 87.50% | 12.50% |

Calculations do not include employees ineligible for CEC or the President (SBOE determines)

2023 – 2024 Faculty Senate – Pending Approval**Approved at Mtg #17
Jan. 16, 2024**Meeting # 16

Tuesday, January 9, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Reynolds, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals.

Absent: Strickland (excused), Hobbs, Miller, Mischel, Reynolds, Rode.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The Secretary noted an error in the reporting of the votes on the motion to amend by postponing the implementation of deferred pay by one year – the vote should be a tie. The minutes of the 2023-24 Meeting #15, December 5, 2023, were approved as corrected.

Chair's Report:

- I wish you all a peaceful and productive 2024.
- Later today, Christopher Nomura will give a presentation about the new Carnegie criteria for university research classifications, R1, R2, or R3. Another upcoming change at the Office of Sponsored Programs is the adoption of a ticketing system, named TDNext system. Please ask your constituents for feedback or suggestions about this change and whether a survey would be helpful.
- Please let your constituents know about saving accounts available to faculty (4.5% interest).
- Other business for Spring 2024 includes:
 - Dependent benefits (including tuition reduction for dependents) task force.
 - Faculty compensation.
 - Changes in admission criteria (GPA and SAT scores).
 - Mental health initiatives.
 - The Artificial Intelligence and Machine Learning Task force plans to organize an exhibit of U of I faculty projects, both research and teaching, using AI and a workshop. This will take place during Spring 2024. We are placing a call for projects to be shown in the exhibit.

Provost's Report:

- Spring semester enrollment is currently up by 3.7% compared to the same time last year. We'll know more when the 10th day numbers become available.
- The legislature convened yesterday. The Governor delivered The State of the State Address focused on his priorities. One of them is the Idaho Launch Program. Recording of the address: https://www.youtube.com/results?search_query=State+of+the+state+address+Idaho
- The Provost gave a brief recap of the deferred pay issue. After the last senate meeting in December 2023, the 122 faculty currently on spread pay were notified of the recommendation. There was strong reaction, and many concerned messages were sent to the President. President Green considered the senate recommendation and decided not to approve the proposed summer 2024 implementation date because, due to the short timeframe, it could potentially

hurt some employees. Delaying to summer 2025 implementation could negatively impact other employees, but there are tools available to mitigate the impact on employees not currently on spread pay. Communication about those tools, which are very similar to spread pay, is forthcoming. Details towards summer 2025 implementation are being worked out.

Discussion:

There was an inquiry into the allegations against the leadership of the women's volleyball team. Is there a statement or additional information on what is being done? Provost Lawrence responded that the university is looking into the matter following appropriate processes. Given the nature of the investigation, the university will not release a statement.

Committee Reports (vote):

- Proposed changes to the University Catalog
Taylor Raney presented items UCC 164 to UCC 333 as a package, because they share identical rationale. In Idaho, a Teacher's Certification requires an endorsement attached to it, either a single 45 credit endorsement or two endorsements with 20 + 30 credits. Presently, the Catalog dictates what courses must be taken beyond the required 20 credits for the current teaching minor. With these changes, students will have the flexibility to select courses with their advisors.
 - UCC 164 Biological Sciences Teaching Major.
 - UCC 245 History Teaching Major 33 credits.
 - UCC 218 English Teaching Major 34 credits.
 - UCC 263 Mathematics Teaching Major 36 credits.
 - UCC 322 Chemistry Teaching Major.
 - UCC 326 Earth Sciences Teaching Major.
 - UCC 335 Geography Teaching Major.
 - UCC 329 English Teaching Major 46 credits.
 - UCC 337 German Teaching Major.
 - UCC 339 History Teaching Major 45 credits.
 - UCC 342 Mathematics Teaching Major 51 credits.
 - UCC 345 Physics Teaching Major.
 - UCC 350 Spanish Teaching Major.
 - UCC 347 Political Science Teaching Major.
 - UCC 333 French Teaching Major.

There were no objections to the suggestion to vote on all the 15 curricular changes listed above as a package.

Discussion: none

Vote: 20/20 in favor. Motion passes.

- UCC 108 Academic Requirements for Graduate Admission concerning letters of recommendation – Jerry McMurtry, Dean, College of Graduate Studies.
Graduate Council voted on April 19, 2023, to remove the mandatory three letters of recommendation as part of the application and allow the programs to decide how many and what type/format of reference they would like to evaluate their prospective students. They are no longer bound by the static written letters.

Discussion: none

Vote: 19/19 in favor. Motion passes.

- UCC 127 General Management (MBA) – Lisa Victoravich, Dean, College of Business and Economics.
This is a “repackaging” of an existing MBA, formerly offered in person in Coeur d'Alene, which became dormant due to COVID. They are now changing this existing program

from face-to-face in Coeur d'Alene to online delivery. Market demands and the business environment in which managers operate have changed. Hence, they seek to update the General Management (MBA) to a timely and relevant curriculum and delivery mode. They are changing from a business-only curriculum to an interdisciplinary MBA approach. This integrated approach, and the fact that all our faculty are in-house, differentiates this MBA from those of our competitors.

Discussion:

In response to a question about the different number of credits for courses in the current catalog, Lisa explained that one of the changes is to assign three credits to all courses. As a follow-up question, the senator asked whether course change proposals are coming through at the same time. Lisa confirmed that core changes will go through UCC and then come to Faculty Senate.

The next question was about program fees: since 12 credits are going to be earned outside the college, will other colleges receive some of those fees? Lisa replied that a lower fee would be paid to those other colleges.

Another follow-up question: Are those program fees? Are they approved by the State Board? Response: in the updating of the MBA curriculum and modality, we are transitioning the MBA from its current 'Self-Support Academic Program Fees' model to an 'Institutional Online Program Fee' model.

Vote: 19/19 in favor. Motion passes.

- UCC 502 Advanced Semiconductor Design Graduate Academic Certificate – Feng Li, Electrical and Computer Engineering.

Feng Li was not present. Dakota Roberson offered to help with questions.

Discussion: none

Vote: 18/19 in favor; 1/19 against. Motion passes.

- UCC 266 Kinesiology and Leisure Sciences (MS) – Philip Scruggs, Department Chair, Movement Sciences.

The proposed program name change from Movement and Leisure Sciences to Kinesiology and Leisure Sciences is to increase marketability of the degree program. The name kinesiology is the key search term prospective students would use to explore graduate programs like the MS Movement and Leisure Sciences Program. The MS program name change is one of the department's strategies to increase enrollment through better program name recognition for prospective students

Discussion: none

Vote: 20/20 in favor. Motion passes.

- UCC 506 Smart Grid Cybersecurity Graduate Academic Certificate – Yacine Chakhchoukh, Electrical and Computer Engineering.

This is a 15-credit graduate certificate. This proposal will enhance cybersecurity and power systems education at the University of Idaho. Improving the cybersecurity applied to critical infrastructures is becoming crucial with increased automation and renewable generation integration. The certificate will increase collaborative cybersecurity course offerings between the ECE and CS departments. Since the courses are offered online, the proposed certificate will increase online and collaborative offerings to increase the outreach to professionals, and the workforce.

Discussion: none

Vote: 21/21 in favor. Motion passes.

- Proposed changes to the Faculty Staff Handbook

- FSH 3250 Flextime/Flexplace – Brandi Terwilliger, Director of Human Resources. Updated throughout to revise procedures and ensure compliance with export control requirements in international flexwork arrangements. The title “flexwork” is chosen as a matter of internal notation.
Discussion: none
Vote: 21/21 in favor. Motion passes.
- FSH 1640.64 Officer Education Committee and FSH 1640.74 Sabbatical Leave Evaluation Committee – Diane Kelly-Riley, Vice Provost for Faculty. Structure revised to replace Vice Provost for Academic Affairs with Vice Provost for Faculty. The Vice Provost for Academic Affairs position no longer exists. Its functions were split into Vice Provost for Faculty and Vice Provost for Academic Initiatives.
Discussion:
Suggestion to check that the same changes are made everywhere in FSH where the old name for the position appears.
Vote: 20/21 in favor; 1/21 against. Motion passes.
- Announcements and Communications
 - R1 Initiative Update – Chris Nomura, Vice President, ORED
Vice President Nomura gave an overview of the new Carnegie criteria for university research classifications (R1, R2, R3). Recently, those moved under the American Council on Education (ACE).
Chris Nomura showed that our R1 Initiative resulted in real improvements since the 2021 Carnegie classifications, with considerable increase in the number of postdoctoral fellows and doctoral research staff, as well as the number of research Ph.Ds. awarded. In 2025, the U of I is expected to qualify as R1 under the new Carnegie criteria, and, after the improvements highlighted above, would qualify as R1 also under the old criteria. Measured against the new (2025) ACE metrics, the U of I reached R1 threshold for the first time in 2023.
The new Carnegie criteria emphasize research expenditures as the single best measure of research (and economic) impact. By this measure, U of I is leading in the state, with more research expenditures than BSU and ISU combined. In summary, we are on a great trajectory.
Discussion:
A senator brought up concerns about possible “unintended consequences” of achieving R1 status: increase in research support staff, both pre- and post-award, must be commensurate. We must be able to hire and retain talent, but presently we see a large turnover of staff. Chris Nomura acknowledged the large turnover, possibly related to salary limitations, and the need to invest in research administration staff. It may be useful to look at F&A funds and sponsors who can help support research administration staff. It may be a slow process, but P3R1 resources can be spent for hiring research staff. It’s a longer-term discussion.

A senator asked Vice President Nomura to elaborate on the positive impacts expected to result from moving to R1 status. Chris Nomura pointed out that federal funds, especially from the NSF, have been allocated for research. A fraction (about 15 or 20%) must go to EPSCoR states, which can submit proposals to programs that are earmarked for EPSCoR. Within those, some larger programs only accept proposals from R1

institutions. Thus, we may be able to apply for opportunities we didn't have before, which means more opportunities for our students.

Another concern raised by senators is the need to adjust salaries to be competitive for hiring at the R1 level – presently, we use a combination of R1 and R2.

In closing, Chris Nomura emphasized that, although we must acknowledge our success, we should also keep in mind that ACE numbers are only a baseline and can change. We'll work very carefully to keep a stable pipeline.

- Update on Faculty CV Revisions: postponed.

New Business:

None

Adjournment:

The agenda being completed, the meeting was adjourned at 4:42pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #16

Tuesday, January 9, 2024 at 3:30 pm
Zoom Only

- I. Call to Order

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 15

Tuesday, December 5, 2023, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Tibbals.

Absent: Kenyon (excused), Reynolds, Mischel

Also Present: Samantha Thompson-Franklin (proxy for Kenyon)

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #14, November 28, 2023, were approved as distributed.

Chair's Report:

- Fan mail is not how I would describe some of the emails Kristin and I have received about spread pay since we last met. There is lots of confusion about what was involved with the vote last week. New information has come up which Kristin will further cover later in the meeting to clarify any confusion and what is entailed in last week's vote. As serious concerns were raised, I would like to entertain a motion to reconsider last week's motion. Vice Chair Haltinner will explain the process at the beginning of the voting section.
- Many of the students who graduate this week may soon join the workforce with little or no idea about Artificial Intelligence (AI), the technological challenges associated with AI, or the impact of AI on their future careers. This is something that we need to think about as a university.

Provost's Report

- Final grades are due December 19 at noon.
- Winter Commencement: Saturday December 9. We have over 550 graduates. There will be two ceremonies, at 9:30am and at 2:00pm, at the ICCU Arena.
<https://www.uidaho.edu/events/commencement/winter>
- Football: we are entering the third round of playoffs. The next game is Saturday, at 7pm, at the Kibbie Dome, against the University of Albany.
- Related to the recent spread pay discussions: we will send a university-wide communication about splitting paychecks into multiple accounts in Banner.

Motion to reconsider the Spread Pay Task Force Recommendations (vote):

- Vice Chair Haltinner apologized for last week's confusion that led to the vote and proceeded to provide clarification.
 - Faculty Senate voted on the recommendation to offer deferred pay as a benefit to all eligible employees. Faculty Senate did not vote on implementation policies or practices, which will come through Senate in the spring.
 - FSL moved quickly to maximize the time available to the 122 faculty currently on the old spread pay system to plan for the pay gap in summer 2024.

- The recommendation is on the UFM agenda as a non-voting item because our constitution does not provide a mechanism for the general faculty to vote on Senate recommendations at UFM. In accordance with FSH 1540 B-2, we wanted to be transparent with the full faculty about Faculty Senate work.
- Since last week, FSL received multiple messages from faculty who are deeply concerned about the implementation process that may result from the recommendation. FSL also learned that some non-senators voted last week for the FSH and UCC items on the agenda, but it's unknown whether non-senators participated in the vote regarding the Spread Pay Task Force recommendation. We confirmed that interest-free loans by the university are not permitted by state law. We also learned about a new option: rather than changing the contract length from 19.5 to 20 pay periods, we can change only the pay schedule to 20 weeks leaving the contract length to 19.5 weeks. In this way, hourly wages, contract length and summer length stay the same. The Provost Office, the Budget Office and ORED have been working hard to identify a better solution, the detailed implementation of which could be ready in January 2024. Any required policy changes will go through Faculty Affairs and Faculty Senate.

Vice Chair Haltinner explained the requirements for and implications of the Motion to Reconsider: it must be made by a member who voted on the prevailing side, it needs a second, who can be any member, it requires the presence of new information, it can be debated, it must be voted on, it requires a majority of the votes cast. If the motion to reconsider passes, last week's vote to support the Spread Pay Task Force recommendation is vacated. If the motion to reconsider does not pass, the recommendation from last week stands, but the task force, in partnership with FAC, will continue to work with the appropriate university bodies on the details of the implementation. The main difference is whether Faculty Senate votes on the recommendation before or after the implementation details have been ironed out. Some senators objected to the motion to reconsider because Robert's Rules of Order allow it only at the same meeting where the original motion was voted on, and because there is no new information to justify it. Others argued that there is new information – the possibility that non-senators may have voted on the original motion should, in itself, be enough to invalidate the vote.

Moved to reconsider (Raney/Barannyk).

Discussion:

People currently on standard pay are very worried about having to wait until summer 2026 for deferred pay. On the other hand, of the 122 employees currently on the legacy spread pay system, some are deeply anxious about the short time available to prepare for the pay gap in summer 2024. On behalf of their constituents, some urged Faculty Senate to reconsider and ultimately defer the implementation by one year. Vice Chair Haltinner reiterated that spread pay is going away in any case, and deferring by one year would give impacted faculty 18 months rather than 6 months to prepare for the pay gap. The university would hold on to the current spread pay system for another year.

There was again disagreement about the presence of new information and whether Robert's Rules of Order permit us to reconsider a motion at the next meeting. FSH 1520 VI – Rules of Order states that *"...Robert's Rules of Order Newly Revised govern all meetings of the university faculty, other faculties, the Faculty Senate..."* and those allow to reconsider a motion at the following meeting. A Senator noted that the reconsideration of the motion will not change anything, since it's only a recommendation.

At this point, Senators were ready to vote on the motion to reconsider the Spread Pay Task Force recommendation. If the motion passes, the original question from last week comes back before the assembly.

Vote: 15/21 yes; 6/21 no. Motion to reconsider passes.

The original motion can now be debated, amended, and voted on.

Discussion:

Chair Gauthier noted that, if the current recommendation of the task force are voted down, it will be important that all impacted groups are represented on the task force that will continue the work.

Motion to amend (Justwan/Mittelsteadt): Assemble a task force where all impacted groups are represented and charge this committee with working out the implementation details.

Discussion:

A debate followed on who the different groups are and whether it would be productive to include additional people on the task force. Senator Mittelsteadt volunteered to join the task force as a faculty impacted by potential changes in summer contracts.

Chair Gauthier suggested an official “heads up” communication to those faculty who would have to go through the pay gap in summer 2024, should that be the path we take. Provost Lawrence agrees that these faculty should be put on the alert but emphasizes that timing is crucial – if we are not going down that path, we shouldn’t put people on notice and then let them know that plans have changed.

Vote to approve the motion on the floor (to refer the matter to a representative committee):

6/20 yes; 14/20 no. Motion fails.

Back to the original motion from last week.

It was further clarified that, if implementation requires policy changes, those will go through FAC and Faculty Senate. Again, timing is extremely important – the implementation date must be very clear in the language of the motion.

Motion to amend with implementation delayed by one year (Justwan/Mittelstaedt).

Discussion:

Senators reiterated their constituents’ concerns, either strongly in favor of or strongly against the amendment.

Vote on the amendment: 12/21 yes; 9/12 no. The Chair already voted; thus, the motion fails for lack of majority.

Motion to call the question (Long/ Murphy).

Vote on motion to call the question (needs 2/3 majority): 19/20 yes; 1/20 no. Motion to call the question passes.

Vice Chair Haltinner displayed the original motion and recalled that, regardless the outcome of the vote, the task force will continue to work on implementation.

Vote on the original motion: 12/21 yes; 9/21 no. Motion passes.

Adjournment:

The agenda not being completed, Chair Gauthier entertained a motion to adjourn. So moved (Long, Raney). The meeting was adjourned at 4:57pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the History Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:05:31 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the 33-credit Math Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:05:53 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

College

Education, Health & Human Sci

Department/Unit:

Curriculum & Instruction

Effective Catalog Year

2024-2025

Program Title

German Teaching Major

Program Credits

45

CIP Code

13.1326 - German Language Teacher Education.

Curriculum:

Basic language courses taken in high school or elsewhere may be evaluated for college equivalences as part of this teaching major and minor. Consult the Department of Modern Languages & Cultures (<https://catalog.uidaho.edu/colleges-related-units/letters-arts-social-sciences/global-studies/>) for policies on earning credit for vertically-related courses.

A. 45-Credit German Teaching Major

| Code | Title | Hours |
|--|--|-----------|
| ENGL 241 | Introduction to the Study of Language | 3 |
| FLEN 324 | Topics in German Literature in Translation | 3 |
| GERM 101 | Elementary German I | 4 |
| GERM 102 | Elementary German II | 4 |
| GERM 201 | Intermediate German I | 4 |
| GERM 202 | Intermediate German II | 4 |
| GERM 301 | German Reading and Writing | 3 |
| GERM 302 | German Listening and Speaking | 3 |
| Select approved Upper Division German Electives ¹ | | 17 |
| Total Hours | | 45 |

| Code | Title | Hours |
|--|--|-------|
| In addition, the following special methods sequence is required for the Secondary Education major: | | |
| EDCI 447 | Second Language Teaching Methods Practicum | 1 |
| EDCI 449/549 | Second Language Teaching Methods | 3 |

1

German electives should include at least one 400-level course, to total 45 credits in the teaching major.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the German Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:09:32 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the 46-credit English Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

| Code | Title | Hours |
|--|--|-------|
| In addition, the following special methods sequence is required for the Secondary Education major: | | |
| EDCI 447 | Second Language Teaching Methods Practicum | 1 |
| EDCI 449/549 | Second Language Teaching Methods | 3 |

1

9 credits must be at 400 level to total 45 credits in the teaching major. A maximum of 3 credits in FLEN 391 Hispanic Film or FLEN 394 Latin American Literature in Translation may be counted toward a teaching major in Spanish.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

No

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Curriculum and Instruction proposes removal of the Spanish Teaching Major. Teacher education students are required to complete either a 45-credit single endorsement or two endorsements of 30- and 20-credits. This change will make the requirement the 20-credit endorsement plus 10 or 25 credits, as applicable. Teacher education students will complete the same number of credits in their discipline, but after the 20 required for the current "teaching minor," they will have the flexibility to select courses with their advisor that best prepare them for the 6-12 classroom.

Reviewer Comments

Sydney Beal (sbeal) (Tue, 14 Nov 2023 23:12:31 GMT): This proposal was submitted as an edit when it should have been submitted as a program discontinuation. Due to this, once the workflow has been completed, the proposal will be resubmitted as a discontinuation with this proposal attached in order to be entered correctly into the CIM and Banner systems (see the Biological Sciences Teaching Major proposal as an example).

Title

Academic Requirements for Graduate Admission concerning letters of recommendation

Request Details

Graduate Council voted on April 19, 2023 to remove the mandatory three letters of recommendation as part of the application and allow the programs to decide how many and what type/format of reference they would like to evaluate their prospective students. They are no longer bound by the static written letters. The minutes from Grad Councils vote and the marked up changes are attached for reference.

The sections in the catalog should read as follows:

Academic Requirements for Graduate Admission

Students who satisfy all criteria listed below will be considered for graduate admission to the University of Idaho:

1. Have a bachelor's degree from a regionally accredited U.S. college or university or recognized international institution. If the degree is not from a regionally accredited institution, the application may be reviewed by the department and by the College of Graduate Studies.

Or Have completed three years of undergraduate study in an international accredited institution which has a Memorandum of Understanding in place with the University of Idaho for a cooperative 3+2 program leading to a graduate degree. Cooperative 3+2 programs may have higher entrance requirements. (see COGS website for a list of 3+2 programs).

2. Have an undergraduate cumulative grade-point average of 3.00 or higher or an undergraduate grade-point average of 3.00 or higher for the last 60 semester credits (or 90 quarter credits),

3. Have maintained at least a 3.00 grade-point average in subsequent academic work if any, and

4. Have met any additional requirements set forth by the department or program which may be required. Please, review the graduate admissions website for specific departmental/program requirements at www.uidaho.edu/admissions/graduate.

5. Have been reviewed and recommended for acceptance by the academic unit administering the program in which the student seeks to enroll. For

individual academic unit admission requirements, please refer to individual department sections of this catalog or consult the Graduate Admissions website at www.uidaho.edu/admissions/graduate.

The College of Graduate Studies requires all applicants to provide a one to two-page Statement of Career Objectives, a curriculum vitae/resume, and transcripts from all colleges/universities attended. Recommendation letters or other type of references to support the application may be required by departments. Please see the individual program or department web page for reference requirements. A list of programs can be found here. <https://www.uidaho.edu/admissions/graduate/graduate-programs>.

Transcripts and Application for Graduate Admission

Students wishing to enter the College of Graduate Studies must submit a University of Idaho application for admission, a one to two page statement of career objectives, a curriculum vitae/resume, and transcripts from all colleges/universities attended. Recommendation letters or other types of references to support the application may be required by departments. Please see the individual program or department web page for reference material requirements. A list of programs can be found here. <https://www.uidaho.edu/admissions/graduate/graduate-programs>

A copy of the official transcript (and English translation for all foreign language documents) for every college and university the applicant attended is acceptable for the application review process. Applicants may upload copies of official transcripts and translations via the online application. Uploaded transcripts must be legible; illegible transcripts will not be processed. COGS recommends scanning at 600 dpi resolution.

Official transcripts of all college work will be required at the point of admission and must be sent directly to the Graduate Admissions Office. Applicants who have already earned a graduate degree from a regionally accredited U.S. institution and are seeking a graduate degree at Idaho will only need to submit official transcripts from the graduate degree granting institution. All documents received as part of the application process become part of the official Graduate Admissions application file.

- I. Minutes from 03/08/2022 (Vote: 10, 0, 1 to approve)

- II. Announcements
 - a. The Dean’s updates: COGS position opening and kudos to Grad Admissions for handling the high volume with a smaller crew.
 - b. There could be a \$1.20 increase for TAs to keep the salaries moving forward but waiting on SBOE April 26 for final confirmation of amount.
 - c. Linda Chen, going on sabbatical, Jeff B. from business is a possible replacement, if necessary, but we will send out an announcement to the deans for replacements for those rolling off 2023. Thanks Dan, Kelly, Linda, Leda/Kerri and Pedram!
 - d. Evan: Asked about the cost per course requirement to be placed in the catalog and whether that is a requirement for COGS. Jerry was going to inquire.
 - e. Strategic Enrollment Plan: Subgroup, Grad Recruitment-GC will be the body to review the Action Planning. Nice cross-section of the university to give feedback as SEP committee. We’ll send out your feedback by the end of the school year.
 - f. New 4+1s and a workshop tomorrow.

- III. Old Business
 - a. Academic requirements language-LOR recommendations-attached. Moved to Vote: 12, 0, 1
 - b. FSH 1700 2.1 revisited after committee review-See attached. Decision regarding senior instructors to serve on Grad Comm, up to dean of COGS. Moved to Vote (9 approved, 0 against, 2 abstentions)

- IV. New Business

Discussion:

 - a. TA Resource allocation: RECOMMENDED CRITERIA AND PROCESS draft review (attached) As UI charges toward R1, with growing PhD numbers, conferrals should continue to grow too, but it takes 5-7 years to increase the conferral rate. UI is going in the right direction.
 Discussion: Metric model for interdisciplinary degrees. Covering the high enrollment courses and labs, two aspects of the model might create inaccuracies in allocations and need. Student metrics go to MP, but not university metrics, they are department/college counted. Also, potential students are not encouraged to apply if no funding is available, so it skews the numbers. How do we capture that? State-funded RA positions in the future are a possibility. Narrative around R1 classification discussed. How is it inclusive of teaching faculty?

- Why R1? How does it affect us? Visibility. Investments surrounding the charge to R1 help all areas and make us more competitive and increasing support for recruitment to increase enrollment will move more students to completion. Programs with high need for TA, don't always have RA opportunities. Currently, positions are just historical allocated. We need to be creative about programs to increase access to more students. Break the mold!
- b. Adding the restriction for 4+1 to get a TA. The program was not intended to support these students on assistantships but to give Idaho residents a tuition break and pathway to a non-thesis MS in one year. Vote for a restriction on teaching assistantships for all 4+1 students. Moved to Vote: (10, 1, 1) Approved to restrict assistantships to 4+1 students.
 - c. UWP representative language should keep UWP representation.
in 1700 ARTICLE VI. GRADUATE COUNCIL, Section 2 and section 2b. [1700 - Bylaws of the Faculty of the College of Graduate Studies \(uidaho.edu\)](http://uidaho.edu)
 - d. Master of Arts in Teaching (M.A.T.) Mathematics (attached). Distinguish the 2 different MAT programs independently and accurately. John 1st, Pedram 2nd. Discussion: 10, 0, 1 approved,
 - e. Low GPA graduate applications: suggestions (example files will be shown at the meeting) Do we need a process for the student and dept to petition Jerry's denial? Evidence that low GPAs finish? Accreditation agency double app process...contingency for summer...waiting for additional coursework...looking for reasons to admit. 2nd level of review? MP Advocacy important. Decision, dept can then appeal or clarification. Puts a process to facilitate better outcome. Suggest in person and written advocacy. Opinion from council is to reconsider case. but upholding standards and integrity is important. Checks and balances are important so we should develop an appeal procedure. Bring back at the next meeting.

Program Title

Kinesiology and Leisure Sciences (MS)

Program Credits

30

CIP Code

31.0301 - Parks, Recreation and Leisure Facilities Management, General.

Curriculum:**Master of Science. Major in Kinesiology and Leisure Sciences.**

The MS Kinesiology and Leisure Sciences (KLS) master's degree is designed to develop advanced knowledge and skills for a diversity of KLS fields. Research and/or authentic professional skills are avenues for student-focused plans of study. Both online and face-to-face learning experience options are available to MS KLS students. The KLS degree has three specializations: Exercise, Sport, and Health Sciences (face-to-face specialization with some online course options); Recreation, Sport, and Tourism Management (available as either an online or hybrid specialization); and Physical Activity and Dance Pedagogy (face-to-face specialization with some online course options).

We prepare advanced KLS professionals to create, disseminate, and evaluate current research in a combination of movement, physical activity, exercise, fitness, recreation, sport and/or health fields.

MS KLS goals are centered on students engaging in inquiry to effectively explore scientific content and authentic problems through a holistic perspective in order to be ethical leaders within the KLS fields.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

Yes

Learning Objectives

1. Apply inquiry skills (e.g., exploring through questions, testing and reflection), techniques (e.g., case study, authentic field experience) and tools to effectively investigate problems and communicate knowledge related to healthy active lifestyles,
2. Analyze wellness through a holistic perspective in relation to healthy active lifestyles, and
3. Evaluate effective leadership, marketing, and/or ethics in working with individuals and/or groups to lead healthy active lifestyles.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The proposed program name change from Movement and Leisure Sciences to Kinesiology and Leisure Sciences was approved by the department faculty to increase marketability of the degree program. The name kinesiology is the key search term that prospective students would utilize to explore graduate programs such as the MS Movement and Leisure Sciences Program. The Leisure Sciences part of the name was kept so that we would continue to align the program with the recreation, sport and tourism management sphere of the degree program. The MS program name change is one of the department's strategies to increase enrollment through better program name recognition for prospective students. The program has capacity to grow in enrollment, which will increase the number of students in the current program courses.

Change Type (Choose all that apply)

- Change curriculum requirements
- Change existing program (major) from face to face to on-line delivery (including program components if applicable)
- Add/Edit Learning Outcomes

Description of Change

Both the delivery modality and curriculum requirements of 127: General Management (MBA) are being modernized to match the current business environment.

1. We are changing this existing program from face-to-face in Coeur d'Alene to online delivery.
2. Change curriculum requirements of existing courses to 3 credits each, moving away from the variable course credit (1-4) delivered in the previous cohort executive model.
3. Change curriculum requirements to 9 core business courses (27 credits) plus 12 credits of interdisciplinary courses (students able to take courses in other colleges and areas.)

52.0201 - Business Administration and Management, General.

Curriculum:**Master of Business Administration. Major in General Management.**

The University of Idaho Master of Business Administration (MBA) is ideal for individuals who want to build their leadership and business skills to advance their careers. The MBA requires 39 credits, consisting of core requirements of 27 credits and 12 credits of interdisciplinary electives.

MBA Core Requirements (27 credits)

| Code | Title | Hours |
|----------|--|-------|
| EMBA 512 | The Economic Context of Business | 3 |
| EMBA 514 | Financial Management | 3 |
| EMBA 520 | Assessing Data to Improve Firm Performance | 3 |
| EMBA 521 | Strategic Management | 3 |
| EMBA 522 | Strategic Marketing | 3 |
| EMBA 524 | Strategic Cost Management | 3 |
| EMBA 525 | Leading in Organizations | 3 |
| EMBA 533 | Entrepreneurial Innovation | 3 |
| EMBA 540 | Supply Chain Strategies and Operations | 3 |

Total Hours

27

Interdisciplinary Electives (12 credits)

| Code | Title | Hours |
|----------|-------------------------------|-------|
| EMBA 501 | Seminar | 1-16 |
| EMBA 502 | Directed Study | 1-16 |
| EMBA 545 | Capstone Integrative Analysis | 1-3 |
| EMBA 599 | Non-thesis Master's Research | 1-3 |

Electives as agreed with Advisor

1-12

Students seeking admission should have completed at least one financial accounting course (or equivalent) at the undergraduate or graduate level.

Courses to total 39 credits for this degree.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

Have learning outcomes changed?

No

Learning Objectives

1. MBA graduates will demonstrate cross-functional understanding in business processes and decisions.
2. MBA graduates will use appropriate tools of analysis to analyze and communicate business problems.
3. MBA graduates will use appropriate tools of analysis to analyze business situations and recommend appropriate action.
4. MBA graduates will experience transformational experiences that foster a better understanding of self, relationships, and global perspectives.
5. MBA graduates will interact effectively and professionally with people of varied backgrounds, abilities, and values.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

127 General Management (MBA) has been taught most recently as an in-person cohort-based program at the Coeur d'Alene campus. The program has not admitted students recently and does not have any outstanding students in the program. Market demands and the business environment in which managers operate have changed. Hence, we seek to update 127 General Management (MBA) to a timely and relevant curriculum and delivery modality. We are changing from face-to-face delivery cohort to online delivery. We are changing from a business-only curriculum in the MBA to an interdisciplinary MBA approach. Thus, we updated nine core courses for the MBA Core Requirements, each at 3 credits, making the MBA Core Requirements 27 credits. This allows for 12 credits to be taken by the students in fields of interest outside and within the College of Business and Economics to expand their knowledge boundaries. We seek to collaborate with other units on campus so that students can experience all areas of master's level course excellence across campus that interest them. We structured the interdisciplinary courses to be 12 credits to encourage MBA students to complete graduate certificates for credentialing and increased career marketability. In the updating of the MBA curriculum and modality changes, we are working with the provost office to transition the MBA from its current 'Self-Support Academic Program Fees' model to an 'Institutional Online Program Fee' model in accordance with Idaho SBOE policy V.R.3.b.i.i.

Reviewer Comments

Eric Stuen (estuen) (Mon, 11 Sep 2023 18:03:57 GMT): Expectations regarding undergraduate degree completion and/or admission into the College of Graduate Studies should be specified.

Eric Stuen (estuen) (Mon, 11 Sep 2023 18:05:08 GMT): Program learning outcomes should be edited to reflect changes to the program.

Stephanie Thomas (slthomas) (Fri, 13 Oct 2023 17:43:32 GMT): Grad Council approves, but "EMBA graduates" in the learning outcomes should be changed to MBA graduates. Can the registrar make that change?

Sydney Beal (sbeal) (Tue, 31 Oct 2023 20:30:18 GMT): Rollback: Roll back pending approval of changes to EMBA 543

Sydney Beal (sbeal) (Thu, 07 Dec 2023 16:25:03 GMT): Replaced EMBA 543 with EMBA 520 per the UCC's request

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. an ability to identify, formulate, and solve advanced semiconductor design problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to advanced semiconductor design concepts and technologies with a range of audiences.
3. an ability to develop and conduct appropriate advanced semiconductor design experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about semiconductor design.

These learning outcomes demonstrate that students who have completed a certificate in advanced semiconductor design have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the advanced semiconductor design industry. The students are well-prepared to pursue further education or employment in the advanced semiconductor design field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certification in advanced semiconductor design will involve regular course evaluations of the course syllabus and student work. This will provide the departments with insight into the students' knowledge in advanced semiconductor design and related fields. The summary of the course evaluation and student work will be shared with an outside entity, specifically a representative from the industry and electrical and computer engineering advisory board. The feedback from the industry partner and industry advisory board help in evaluating the students learning outcome and program component.

How will you ensure that the assessment findings will be used to improve the program?

Course syllabus and student evaluation will be reviewed each semester, and course content will be adjusted as necessary. The annual assessment feedback from the industry partner and department advisory boards will be reviewed by the departments, and the required refinement to the syllabus will be done on an annual basis. An important aspect of these classes is the ability of the students to learn about semiconductor design related topics therefore, the content taught in the class will be evolving on an ongoing basis.

What direct and indirect measures will be used to assess student learning?

Exams, assignments, and class projects will be required for all the relevant classes and graded on a regular basis. In the selected required courses, an oral exam of the students will be required at the end of the class to evaluate student learning.

When will assessment activities occur and at what frequency?

The size and scope of this program dictate that we will collect the assessment data during the courses and the survey data each semester. Every fall semester, the departments and curriculum committees will evaluate the students' assessment, industry partners, and advisory boards feedback and take corrective actions if necessary.

Student Learning Outcomes

Learning Objectives

1. an ability to identify, formulate, and solve advanced semiconductor design problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to advanced semiconductor design concepts and technologies with a range of audiences.
3. an ability to develop and conduct appropriate advanced semiconductor design experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about semiconductor design.

These learning outcomes demonstrate that students who have completed a certificate in advanced semiconductor design have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the advanced semiconductor design industry. The students are well-prepared to pursue further education or employment in the advanced semiconductor design field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The certificate in advanced semiconductor design is designed to provide graduate students with specialized knowledge and skills in the field of advanced semiconductor design. This certificate program is intended to prepare students for careers in the advanced semiconductor design industry or related fields, as well as future graduate studies in the field of microelectronics. The departments currently offer these proposed courses required for the advanced semiconductor design certificate, and these courses already have the required materials needed for the certification. Furthermore, we plan to add extra emphasis to advanced semiconductor design-related topics in the homework assignments, class example problems, and discussion sessions to elucidate design and engineering principles in the advanced semiconductor design and related fields. Therefore, we anticipate that the proposed certificate program will not add additional workload to the departments.

Program Title

Smart Grid Cybersecurity Graduate Academic Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

15

CIP Code

14.1001 - Electrical and Electronics Engineering

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

This is a graduate certificate that includes courses that are regularly taught by their corresponding faculty.

Curriculum:

This academic certificate is offered by the Department of Electrical and Computer Engineering and is supported by the Computer Science Department's cybersecurity graduate program curriculum. Students will develop an understanding of power systems modeling, communication, control and its associated cybersecurity challenges. The offered courses cover theory and practice that help engineers identify and analyze threats and vulnerabilities to digital systems and networks and apply appropriate processes, tools, and mitigation strategies for improving cybersecurity.

All required coursework must be completed with a grade of 'B' or better (O-10-b)

| Code | Title | Hours |
|-------------------------------------|---|--------------|
| ECE 421 | Introduction to Power Systems | 3 |
| ECE 544 | Supervisory Control and Critical Infrastructure Systems | 3 |
| CYB 536 | Advanced Information Assurance Concepts | 3 |
| Select 2 from the following: | | 6 |
| ECE 422 | Power Systems Analysis | |

| | |
|---------|--|
| ECE 469 | Resilient Control of Critical Infrastructure |
| CS 587 | Adversarial Machine Learning |
| CS 543 | Embedded Systems |
| ECE 586 | Industrial Control Systems |

Total Hours**15**

Courses to total 15 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Coeur d'Alene
Moscow
Other

Where?

Online

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. Develop a solid understanding of the cyber vulnerabilities and risks to power systems
2. Students should have the knowledge, skills, and abilities to be able to: (a) Understand organizational and/or cyber-system requirements, architecture, design, and implementation; (b) Describe and analyze the system with appropriate detail; (c) Develop a threat model; (d) Identify potential vulnerabilities; (e) Identify appropriate risk analysis processes and standards; (f) Perform risk analysis and assessment; (g) Identify, evaluate, design, apply, and document security and resiliency enhancements and risk removal or mitigation approaches, tasks, and security controls.
3. Learn how telecommunication systems and new sensors could be used to improve the power system cybersecurity.
4. Learn how to model power systems

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment will use the existing course assessments tools. Exams, homework problems, laboratory work, reports and presentations are required by these courses and will be used to evaluate the learning outcomes of the students.

How will you ensure that the assessment findings will be used to improve the program?

The professor in charge of the certificate will coordinate with the faculty teaching the different courses to adapt and improve their courses if needed.

What direct and indirect measures will be used to assess student learning?

Exams, homework problems, laboratory work, reports and presentations of the different course will be used to assess student learning.

When will assessment activities occur and at what frequency?

The assessment will occur yearly based on the required courses assessments.

Student Learning Outcomes

Learning Objectives

1. Develop a solid understanding of the cyber vulnerabilities and risks to power systems.
2. Students should have the knowledge, skills, and abilities to be able to: (a) Understand organizational and/or cyber-system requirements, architecture, design, and implementation; (b) Describe and analyze the system with appropriate detail; (c) Develop a threat model; (d) Identify potential vulnerabilities; (e) Identify appropriate risk analysis processes and standards; (f) Perform risk analysis and assessment; (g) Identify, evaluate, design, apply, and document security and resiliency enhancements and risk removal or mitigation approaches, tasks, and security controls.
3. Learn how telecommunication systems and new sensors could be used to improve the power system cybersecurity.
4. Learn how to model power systems.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

This proposal will enhance cybersecurity and power systems education at the University of Idaho. Improving the cybersecurity applied to a critical infrastructure such as power systems is becoming crucial with increased automation and renewable generation integration. The certificate will increase collaborative cybersecurity course offerings between the ECE and CS departments. This will enhance efficiency and leverage available means and courses. We expect that the outcome will improve the cybersecurity training of our graduate students for conducting research in our M.S. and Ph.D. programs or starting an industrial or entrepreneurial career. Since the courses are offered online, the proposed certificate will increase online and collaborative offerings to increase the outreach to professionals, and the workforce.

Policy Number & Title:

*Note: If revision or deletion, request original document from ui-policy@uidaho.edu. All changes must be made using "track changes."

Comprehensive Review was Conducted

Originator: Brandi Terwilliger, Director of Human Resources

Policy Sponsor, if different from Originator: Brian Foisy, VP Finance and Administration

Handwritten signature and date: 11.9.22

Reviewed by General Counsel X Yes ___ No Name & Date: Kim Rytter, 12/20/22

- 1. Policy/Procedure Statement: Briefly explain the reason for the proposed addition, revision, and/or deletion. Updated throughout to revise procedures and ensure compliance with export control requirements in international flexwork arrangements. A committee met and developed the recommendations with inclusion from Provost Office, VP Foisy, OIT, Export Controls, International Program Office, etc. Faculty Staff Policy Group also reviewed.
2. Fiscal Impact: What fiscal impact, if any, will this addition, revision, or deletion have? None
3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it. APM70.23
4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy. ASAP as this is having an impact on individuals currently.

UI FACULTY-STAFF HANDBOOK
CHAPTER THREE:
EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

3250

FLEXTIME/FLEXPLACE~~Flexwork~~

LAST REVISION: ~~2022~~January 2023~~09~~

A. A. PURPOSE. This policy establishes the conditions under which employees may be allowed a change in work location or schedule. This policy addresses only discretionary flexwork arrangements; procedures for accommodations of disability are addressed in FSH 6420. The purpose of flexwork is to accommodate the personal needs of employees and/or to enable university departments to provide services for more hours each day. A department may use flexwork when either it would help an employee better accommodate personal needs and where the arrangement would not adversely affect productivity of the employee's department or the ability of the department to provide service for faculty, staff, and students.

B. SCOPE. This policy applies to all University of Idaho employees.

C. DEFINITIONS:

aC-1. Flexwork is a request initiated by the employee for a Flexwork. A change of work location or work schedule from what was assigned that originally assigned and is when the original assignment can be accomplished differently required in order for the employee to perform University business, programs, or purposes.

b. Domestic Flexwork is a flexwork request for a change of work location within the United States.

bC-2. International Flexwork. is a flexwork request for a change of work location to a location outside of the United States. Because work located in U.S. territories requires similar review, it is included in the definition of International Flexwork.
