D. POLICY. Units may use flexwork to provide services for more hours each day or when it would help an employee better accommodate personal needs, if the arrangement would not adversely affect productivity of the employee's unit or the ability of the unit to provide service for employees, students, and/or the public.

BCD-1. CRITERIA CONSIDERATIONS FOR IN AUTHORIZING FLEXTIME OR FLEXPLACE FLEXWORK. Criteria Considerations applied in evaluating requests for flexwork and/or flexplace flexwork shall include, but are not limited to: 1) the effect on productivity of the employee, 2) the ability of co-workers to accomplish their work, and 3) the effect on productivity of the department/unit; 4) the degree to which the accommodation is necessary in order to allow the employee to retain his or her job; and 5) whether the arrangement is expected to be temporary or ongoing.

D-2. INTERNATIONAL FLEXWORK. In some cases, International flexwork includes arrangements may shall be treated as University International Travel as defined by APM 70.23. Employees requesting an International flexplace flexwork arrangement may not take any University-owned equipment with them travel unless they comply with the requirements in APM 70.23.

~~E~~D-3. FLEX HOURS. ~~The flex hours enumerated below apply to employees working in departments which operate on a typical business office schedule. All~~Most university departments units which that provide business or student services are open between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday, with summer hours between 7:30 a.m. and 4:30 p.m. (Pacific Time for Moscow and surrounding areas and Mountain Time for Boise and surrounding areas). Such departments units are expected to be staffed during these hours, except for the noon hour in small departments units. Hours of operation for other departments units are influenced by the services they provide and the needs of ~~faculty, staff, employees~~, students, and the public.

~~E~~D-E. PROCEDURES FOR OBTAINING APPROVAL OF FLEXTIME OR FLEXPLACE FLEXWORK. An employee's ~~flextime-flexwork schedule or flexplace~~ arrangement ~~must be~~ is expected to be individually approved in writing and in advance by the ~~departmental-employee's~~ supervisor and other authorities as identified by guidance maintained on the Human Resources website administrator and approved by the dean or director and/or Vice President/Provost in accordance with procedures of the college or administrative unit university. A flextime ~~f~~flexwork arrangement schedule ~~must be set at the beginning of each semester and remain in effect until the end of the semester can be requested at any time through the established flexwork process. and~~ Approved flexwork arrangements may be renewed. Approved requests will ordinarily have a duration of up to six months. ~~In some situations, approval may be granted for up to one year.-~~

~~E~~D-1. ~~The departmental-administrators~~supervisor and the employee requesting flexwork must determine measures of productivity prior to approval of the flexwork request. The measure of productivity must be approved by the employee's chain of supervision up to Vice President or Provost as identified by guidance maintained on the Human Resources website. The measure of productivity will be incorporated into the flexwork agreement. ~~When work at home is to be incorporated into an approved flextime flexwork arrangement (flexplace), duration (not to exceed six months) of approval for off-site work and measures of productivity will be determined in advance by the departmental administrator and the employee, with the concurrence of the dean or director and/or Vice President/Provost, and incorporated into the flextime/flexplace flexwork agreement.~~

~~a~~E-2. If the flexwork request ~~working at home~~ requires relocation of university equipment, such as a computer and peripheral equipment, the relocated equipment will be inventoried by the unit. ~~Contact and appropriate arrangements made with the~~ Risk Management Office to discuss property coverage and contact ~~the~~ Office of Information Technology regarding computer security. ~~insure it.~~ The ~~departmental-administrators~~supervisor is expected to verify return of the equipment when the ~~flexplace-flexwork~~ arrangement ceases.

~~b~~E-3. If the flexwork ~~request~~ arrangement contemplates work at an alternate location, the ~~e~~employees working at a flexplace ~~must maintain adequate internet connectivity~~ adequately adequate to support security and management software on any assigned technology resources. ~~home must be accessible by telephone (where applicable). When technology support is necessary, the employee may be required to be available during university business hours.~~

~~e~~E-4. Employees granted a flexwork ~~request~~ arrangement for a change of work location ~~working at a flexplace~~ must be available ~~accessible~~ for real-time synchronous communications (e.g., telephone or web-video conference) during designated working hours unless otherwise approved by the ~~department~~unit.

E-5. Employees granted a Flexwork arrangement are responsible for ensuring their workstation design meets supportive ergonomic and human factors guidelines.

Version History

Amended 2023. Updated throughout to revise procedures and ensure compliance with export control requirements in international flexwork arrangements. Comprehensive review.

Amended July 2009. Changed Human Resource Services to Human Resources.

Amended July 2000. Editorial changes to D-1 a.

Amended July 1997. Editorial changes.

Adopted July 1994.

OFFICER EDUCATION COMMITTEE

A. FUNCTION. [See also 1565 G.]

A-1. To be concerned with the academic integrity of the Officer Education Program (OEP).

A-2. To advise the president, the faculty, and the Departments of Aerospace Studies (WSU), Military Science, and Naval Science on academic matters concerning OEP.

A-3. To review and recommend to the University Curriculum Committee courses to be offered by the above-named departments.

A-4. To carefully review and evaluate the academic credentials of proposed OEP instructional appointments and to report these evaluations and recommendations to the vice provost of academic affairs.

A-5. To assist the OEP to integrate effectively within the UI community.

B. STRUCTURE. Heads of the Departments of Aerospace Studies (WSU), Military Science, and Naval Science, three other members of the faculty, (one of whom serves as chair), the Vice Provost for ~~Academic Affairs~~Faculty, or designee (ex officio), and two students (one ROTC and one non-ROTC).

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 17

Approved at Mtg #18
January 23, 2024

Tuesday, January 16, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Tibbals.

Absent: Maas (excused), Hobbs, Miller, Reynolds, Shook

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #16, January 9, 2024, were approved as distributed.

Consent Agenda:

- Sabbatical Leave Committee Recommendations.
Approved by unanimous consent.

Chair's Report:

- Check out the Daily Register for interesting events coming up, such as:
<https://www.kenworthy.org/events-calendar/backcountry-film-festival-2/> and
- <https://www.uidaho.edu/cogs/resources/workshops> (particularly the CIRTl workshop series).
- An important part of today's meeting is a conversation about the optional retirement plan (ORP), which in December 2024 is transitioning to Fidelity as the sole retirement plan provider, replacing TIAA and Corebridge Financial. We appreciate Brandi, Director of HR, visiting us today at short notice, to provide more information about the transition.

Provost's Report:

- Spring semester enrollment has remained stable.
- There are problems with broken pipes due to the frigid weather. We are grateful to Facility for their prompt intervention.
- Vice Provost for Faculty Diane Kelly-Riley announced the next faculty gathering, hosted by CBE in the Albertson Atrium, January 24, 2024, 4:30 – 6:30pm. Please RSVP at <https://www.uidaho.edu/provost/faculty-gathering>

Changes to the Administrative Procedures Manual (non-voting):

- APM 30.18 Change Management – Theresa Amos, Deputy Director, IT Planning and Initiatives, Office of Information Technology.
This policy establishes the mechanism for verifying and approving changes to university managed technology resources. Changes to information systems are required on both a regular and emergency basis to fix issues, add new functionality, address new security and compliance requirements, and improve the user experience. Due to the complexity of modern technology systems, such changes must be carefully reviewed, performed, and vetted as, if done improperly, can cause disruptions, weaken security postures, and cause a loss of data. To address this, as well as assist in the University's compliance requirements, this policy ensures

that: changes are performed in a way to minimize risks to the university; all security and compliance requirements remain enforced consistent with U of I standards and principles of least privilege and functionality; all impactful changes to technology resources are tracked and approved in a timely manner.

Discussion:

In response to a question about the timeline for communicating changes, Teresa Amos will Provide a link to the calendar with dates for the implementation of changes.

- APM 95.24 Vandal Alert Notification System – Lee Espey, Division Operations Officer, DFA Operations, Steve Mills, Director of Parking and Transportation Services.
Comprehensive review to clarify language throughout.
Discussion: none
- APM 45.03 Definitions for Grants, Contracts and Gifts – Sarah Martonick, Director, Office of Sponsored Programs (OSP), Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
While reviewing APM 71.52, the OSP team and the UI Foundation staff determined it should point to APM 45.03 and focused on revisions to APM 45.03. Revisions are minor, with no procedural additions, only clarifications and updates for use of TDX vs. PDF forms.
Discussion:
The Secretary proposed to modify the first sentence in APM 45.03 C-1 to read: *“A sponsored project is the result of an authorized proposal or application submitted by the university that results in an agreement between the university and the sponsor.”*
There was a brief discussion on the difference between a solicited process and a competitive one.
A senator inquired about potential impacts of these revisions, for instance, on workload.
Response: The OSP team has thought very carefully about volume and burden, for this and many other APM sections. They moved to TDX because it provides metrics on volume and a concrete measurement of turnaround time. It takes an average of 5 days for every item coming out of TDX. This is a significant increase, while the team reports spending less time for tracking. On the one hand, they would like to reduce the burden, on the other, they have regulations to comply with. They design their processes around best practices and try to achieve a good balance. Recently, a new person has joined the team, who will work on a mechanism for assessment and feedback to determine where actual measurable gaps are and what infrastructure needs to be added or modified.
The Secretary asked for clarification concerning the university having the obligation to provide a deliverable (APM 45.03 C-1). Response: As the contracted party in all sponsored projects, the university assumes the obligation in the agreement, but delegates it to the PI (see APM 45.06).
- APM 45.04 Notice of Sponsored Projects and Establishment of Budgets – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Comprehensive review is necessary to bring policies up to current requirements for sponsored project regulations, and to clarify Chart V nomenclature (budget vs. fund/index, etc.). Mostly, language revisions to comply with the recommendations from a prior NSF audit.
Discussion:

In response to a question, it was clarified that no changes in VERAS are needed as a consequence of these revisions. What's in VERAS will remain as is.

- APM 45.06 Allowable and Unallowable Sponsored Project Expenditures – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Comprehensive review is necessary to bring policies up to current requirements for sponsored project regulations, and to clarify Chart V nomenclature (budget vs. fund/index, etc.).
Discussion:
This item was briefly discussed together with APM 45.03. There were no further questions.
- APM 45.07 Cost Transfers on Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Like for the previous APM 45, change of nomenclature and clarification.
Discussion: none.

Announcements and Communications

- SUCCESS – Daniel Eveleth, Department of Business, Erin Chapman, School of Family and Consumer Sciences.
Daniel started with a brief introduction. SUCCESS is a task force charged by the President with identifying three initiatives with the objective of increasing our current six-year graduation rate of 61% to 77% (the average for R1 universities). The President's charge focuses on instruction- and curriculum-based initiatives for which there is evidence of success. The task force started with the Boyer Report and came up with six possible topics, see attachment #9. Note that the attached document contains a link to a feedback form for people to provide comments and suggestions. An important part of the feedback the team is looking for are success stories, namely, what is being done in departments/units that is working well. This way, the team can identify U of I strengths to build on and focus on those programs that are best for us. SUCCESS will come back to Faculty Senate later in the semester to discuss more targeted questions, as they may result from the collected feedback.
Discussion:
A senator noted that there are many UG research opportunities at the U of I, but we need more support and more people. The UG Research Office is understaffed and underfunded. Citing from her work with Ubuntu, Vice Chair Haltinner recalls that retention rates for white students are higher than for students of color. Some of her research indicates that a more creative, integrative and robust Gen Ed curriculum might help reduce the gap by addressing student needs with an individualized, holistic approach. Furthermore, with the first-year seminar gone, we must re-envision an appropriate first-year experience. Kristin added that the Diversity Scholar Program from Multicultural Affairs is doing very well – retention rate for students in that program is about 90%.
Back to the discussion of an appropriate first-year experience, a senator wondered whether the team is thinking about something like ISEM 101, or something discipline-specific and housed in a particular unit – in his department, first-year experience courses within the major are very important. Daniel responded that all feedback is welcome and valuable. The discussion later in the spring will be more targeted.
Chair Gauthier said that UG research should be compensated. Also, if available UG researcher positions were posted, it would be great for retention.

A senator reported a rather disappointing response to the many research opportunities she offered to her students in a large introductory math class.

- Vandal Gateway Program (VGP) Update – Annette Folwell, Associate Dean, College of Letter, Arts and Social Sciences, Brian Dulin, Program Coordinator, Vandal Gateway Program, Sean Quinlan, Dean, College of Letter, Arts and Social Sciences.
Sean Quinlan started with a brief introduction to the VGP and the team members. The presentation is attached to these minutes. The following points were addressed: The structure of the program (admission process, cohort nature of the student group, staff and faculty, some demographic data); Academic standing for AY 2022-23 and AY 2023-24; Persistence, Retention, and Awards for AY 2022-23 and AY 2023-24. They are pleased with the success of VGP (e.g. improvement in academic standing), and excited to work with a program that opens doors for students who would otherwise not be able to attend college.

Discussion:

A senator inquired about the consistency of the comparison – the data from AY 2022-23 are being compared with those from one semester of AY 2023-24. Annette Folwell replied that a comparison between data from two full academic years will be possible when the second semester of AY 2023-24 ends. The team would be happy to come back later in the spring.

- Optional Retirement Plan (ORP) – Brandi Terwilliger, Director of Human Resources.
Brandi provided a brief background on the upcoming (December 2024) change from TIAA-CREF to Fidelity as the sole vendor for ORP. This was a state-wide decision from SBOE. See FAQ at <https://boardofed.idaho.gov/resources/optional-retirement-plan-transition-to-fidelity-as-sole-retirement-plan-provider/>
The Idaho State Board of Education (SBOE) Retirement Plan Committee completed a multi-year, comprehensive review of the Idaho ORP. As a result of their review, they approved that Fidelity would become the sole provider of the administrative services for the ORP effective December 2024, replacing both TIAA and Corebridge. This choice will result in increased on-campus presence, and a 25% reduction in the fee to the participant.

Discussion:

A senator asked whether, because of the transition, there will be a lag in time during which our funds are out of the market. Response: We are working to make sure there is no lag. We expect a seamless transition.

In response to another question, Brandi clarified that supplemental plans do not need to be transitioned.

A senator argued that some constituents were angry at the lack of transparency, and because they had no say in the matter and no option. It would be helpful if university communications were more proactive than responsive. Brandi explained that, when this process started, before COVID, there was a lot of discussion about what to do for the best of our employees. The senator's comment about more proactive communication is reasonable. Provost Lawrence added that, in this case, the news was about an improvement for all.

In response to a request, Brandi will check out ratings for TIAA-CREF vs. Fidelity. She will also inquire about bitcoin.

A senator reported that Colorado State transitioned to Fidelity as well. His colleagues are happy with the change.

New Business:

None.

Adjournment:

The agenda being completed, the meeting was adjourned at 4:55pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 16

Tuesday, January 9, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Hobbs, Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Reynolds, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Tibbals.

Absent: Strickland (excused), Hobbs, Miller, Mischel, Reynolds, Rode.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The Secretary noted an error in the reporting of the votes on the motion to amend by postponing the implementation of deferred pay by one year – the vote should be a tie. The minutes of the 2023-24 Meeting #15, December 5, 2023, were approved as corrected.

Chair's Report:

- I wish you all a peaceful and productive 2024.
- Later today, Christopher Nomura will give a presentation about the new Carnegie criteria for university research classifications, R1, R2, or R3. Another upcoming change at the Office of Sponsored Programs is the adoption of a ticketing system, named TDNext system. Please ask your constituents for feedback or suggestions about this change and whether a survey would be helpful.
- Please let your constituents know about saving accounts available to faculty (4.5% interest).
- Other business for Spring 2024 includes:
 - Dependent benefits (including tuition reduction for dependents) task force.
 - Faculty compensation.
 - Changes in admission criteria (GPA and SAT scores).
 - Mental health initiatives.
 - The Artificial Intelligence and Machine Learning Task force plans to organize an exhibit of U of I faculty projects, both research and teaching, using AI and a workshop. This will take place during Spring 2024. We are placing a call for projects to be shown in the exhibit.

Provost's Report:

- Spring semester enrollment is currently up by 3.7% compared to the same time last year. We'll know more when the 10th day numbers become available.
- The legislature convened yesterday. The Governor delivered The State of the State Address focused on his priorities. One of them is the Idaho Launch Program. Recording of the address: https://www.youtube.com/results?search_query=State+of+the+state+address+Idaho
- The Provost gave a brief recap of the deferred pay issue. After the last senate meeting in December 2023, the 122 faculty currently on spread pay were notified of the recommendation. There was strong reaction, and many concerned messages were sent to the President. President Green considered the senate recommendation and decided not to approve the proposed summer 2024 implementation date because, due to the short timeframe, it could potentially

hurt some employees. Delaying to summer 2025 implementation could negatively impact other employees, but there are tools available to mitigate the impact on employees not currently on spread pay. Communication about those tools, which are very similar to spread pay, is forthcoming. Details towards summer 2025 implementation are being worked out.

Discussion:

There was an inquiry into the allegations against the leadership of the women's volleyball team. Is there a statement or additional information on what is being done? Provost Lawrence responded that the university is looking into the matter following appropriate processes. Given the nature of the investigation, the university will not release a statement.

Committee Reports (vote):

- Proposed changes to the University Catalog
Taylor Raney presented items UCC 164 to UCC 333 as a package, because they share identical rationale. In Idaho, a Teacher's Certification requires an endorsement attached to it, either a single 45 credit endorsement or two endorsements with 20 + 30 credits. Presently, the Catalog dictates what courses must be taken beyond the required 20 credits for the current teaching minor. With these changes, students will have the flexibility to select courses with their advisors.
 - UCC 164 Biological Sciences Teaching Major.
 - UCC 245 History Teaching Major 33 credits.
 - UCC 218 English Teaching Major 34 credits.
 - UCC 263 Mathematics Teaching Major 36 credits.
 - UCC 322 Chemistry Teaching Major.
 - UCC 326 Earth Sciences Teaching Major.
 - UCC 335 Geography Teaching Major.
 - UCC 329 English Teaching Major 46 credits.
 - UCC 337 German Teaching Major.
 - UCC 339 History Teaching Major 45 credits.
 - UCC 342 Mathematics Teaching Major 51 credits.
 - UCC 345 Physics Teaching Major.
 - UCC 350 Spanish Teaching Major.
 - UCC 347 Political Science Teaching Major.
 - UCC 333 French Teaching Major.

There were no objections to the suggestion to vote on all the 15 curricular changes listed above as a package.

Discussion: none

Vote: 20/20 in favor. Motion passes.

- UCC 108 Academic Requirements for Graduate Admission concerning letters of recommendation – Jerry McMurtry, Dean, College of Graduate Studies.
Graduate Council voted on April 19, 2023, to remove the mandatory three letters of recommendation as part of the application and allow the programs to decide how many and what type/format of reference they would like to evaluate their prospective students. They are no longer bound by the static written letters.

Discussion: none

Vote: 19/19 in favor. Motion passes.

- UCC 127 General Management (MBA) – Lisa Victoravich, Dean, College of Business and Economics.
This is a “repackaging” of an existing MBA, formerly offered in person in Coeur d'Alene, which became dormant due to COVID. They are now changing this existing program

from face-to-face in Coeur d'Alene to online delivery. Market demands and the business environment in which managers operate have changed. Hence, they seek to update the General Management (MBA) to a timely and relevant curriculum and delivery mode. They are changing from a business-only curriculum to an interdisciplinary MBA approach. This integrated approach, and the fact that all our faculty are in-house, differentiates this MBA from those of our competitors.

Discussion:

In response to a question about the different number of credits for courses in the current catalog, Lisa explained that one of the changes is to assign three credits to all courses. As a follow-up question, the senator asked whether course change proposals are coming through at the same time. Lisa confirmed that core changes will go through UCC and then come to Faculty Senate.

The next question was about program fees: since 12 credits are going to be earned outside the college, will other colleges receive some of those fees? Lisa replied that a lower fee would be paid to those other colleges.

Another follow-up question: Are those program fees? Are they approved by the State Board? Response: in the updating of the MBA curriculum and modality, we are transitioning the MBA from its current 'Self-Support Academic Program Fees' model to an 'Institutional Online Program Fee' model.

Vote: 19/19 in favor. Motion passes.

- UCC 502 Advanced Semiconductor Design Graduate Academic Certificate – Feng Li, Electrical and Computer Engineering.

Feng Li was not present. Dakota Roberson offered to help with questions.

Discussion: none

Vote: 18/19 in favor; 1/19 against. Motion passes.

- UCC 266 Kinesiology and Leisure Sciences (MS) – Philip Scruggs, Department Chair, Movement Sciences.

The proposed program name change from Movement and Leisure Sciences to Kinesiology and Leisure Sciences is to increase marketability of the degree program. The name kinesiology is the key search term prospective students would use to explore graduate programs like the MS Movement and Leisure Sciences Program. The MS program name change is one of the department's strategies to increase enrollment through better program name recognition for prospective students

Discussion: none

Vote: 20/20 in favor. Motion passes.

- UCC 506 Smart Grid Cybersecurity Graduate Academic Certificate – Yacine Chakhchoukh, Electrical and Computer Engineering.

This is a 15-credit graduate certificate. This proposal will enhance cybersecurity and power systems education at the University of Idaho. Improving the cybersecurity applied to critical infrastructures is becoming crucial with increased automation and renewable generation integration. The certificate will increase collaborative cybersecurity course offerings between the ECE and CS departments. Since the courses are offered online, the proposed certificate will increase online and collaborative offerings to increase the outreach to professionals, and the workforce.

Discussion: none

Vote: 21/21 in favor. Motion passes.

- Proposed changes to the Faculty Staff Handbook

- FSH 3250 Flextime/Flexplace – Brandi Terwilliger, Director of Human Resources. Updated throughout to revise procedures and ensure compliance with export control requirements in international flexwork arrangements. The title “flexwork” is chosen as a matter of internal notation.
Discussion: none
Vote: 21/21 in favor. Motion passes.
- FSH 1640.64 Officer Education Committee and FSH 1640.74 Sabbatical Leave Evaluation Committee – Diane Kelly-Riley, Vice Provost for Faculty. Structure revised to replace Vice Provost for Academic Affairs with Vice Provost for Faculty. The Vice Provost for Academic Affairs position no longer exists. Its functions were split into Vice Provost for Faculty and Vice Provost for Academic Initiatives.
Discussion:
Suggestion to check that the same changes are made everywhere in FSH where the old name for the position appears.
Vote: 20/21 in favor; 1/21 against. Motion passes.
- Announcements and Communications
 - R1 Initiative Update – Chris Nomura, Vice President, ORED
Vice President Nomura gave an overview of the new Carnegie criteria for university research classifications (R1, R2, R3). Recently, those moved under the American Council on Education (ACE).
Chris Nomura showed that our R1 Initiative resulted in real improvements since the 2021 Carnegie classifications, with considerable increase in the number of postdoctoral fellows and doctoral research staff, as well as the number of research Ph.Ds. awarded. In 2025, the U of I is expected to qualify as R1 under the new Carnegie criteria, and, after the improvements highlighted above, would qualify as R1 also under the old criteria. Measured against the new (2025) ACE metrics, the U of I reached R1 threshold for the first time in 2023.
The new Carnegie criteria emphasize research expenditures as the single best measure of research (and economic) impact. By this measure, U of I is leading in the state, with more research expenditures than BSU and ISU combined. In summary, we are on a great trajectory.
Discussion:
A senator brought up concerns about possible “unintended consequences” of achieving R1 status: increase in research support staff, both pre- and post-award, must be commensurate. We must be able to hire and retain talent, but presently we see a large turnover of staff. Chris Nomura acknowledged the large turnover, possibly related to salary limitations, and the need to invest in research administration staff. It may be useful to look at F&A funds and sponsors who can help support research administration staff. It may be a slow process, but P3R1 resources can be spent for hiring research staff. It’s a longer-term discussion.

A senator asked Vice President Nomura to elaborate on the positive impacts expected to result from moving to R1 status. Chris Nomura pointed out that federal funds, especially from the NSF, have been allocated for research. A fraction (about 15 or 20%) must go to EPSCoR states, which can submit proposals to programs that are earmarked for EPSCoR. Within those, some larger programs only accept proposals from R1

institutions. Thus, we may be able to apply for opportunities we didn't have before, which means more opportunities for our students.

Another concern raised by senators is the need to adjust salaries to be competitive for hiring at the R1 level – presently, we use a combination of R1 and R2.

In closing, Chris Nomura emphasized that, although we must acknowledge our success, we should also keep in mind that ACE numbers are only a baseline and can change. We'll work very carefully to keep a stable pipeline.

- Update on Faculty CV Revisions: postponed.

New Business:

None

Adjournment:

The agenda being completed, the meeting was adjourned at 4:42pm.

Respectfully Submitted,

Francesca Sammaruca

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.
This policy establishes the mechanism for verifying and approving changes to university managed technology resources.

Changes to information systems are required on both a regular and emergency basis to fix issues, add new functionality, address new security and compliance requirements, and improve the user experience. Due to the complexity of modern technology systems, such changes must be carefully reviewed, performed, and vetted as, if done improperly, can cause disruptions, weaken security postures, and cause a loss of data. To address this, as well as assist in the University's compliance requirements, this policy provides that:

- Changes are performed in a way to minimize risks to the university.
- All security and compliance requirements remain enforced consistent with U of I standards and principles of least privilege and functionality.
- All impactful changes to technology resources are tracked and approved in a timely manner.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

A. Purpose. This policy establishes the mechanism for verifying and approving changes to university managed technology resources.

Changes to information systems are required on both a regular and emergency basis to fix issues, add new functionality, address new security and compliance requirements, and improve the user experience. Due to the complexity of modern technology systems, such changes must be carefully reviewed, performed, and vetted as, if done improperly, can cause disruptions, weaken security postures, and cause a loss of data. To address this, as well as assist in the University's compliance requirements, this policy provides that:

- Changes are performed in a way to minimize risks to the university.
- All security and compliance requirements remain enforced consistent with U of I standards and principles of least privilege and functionality.
- All impactful changes to technology resources are tracked and approved in a timely manner.

B. Scope. This policy applies to any changes to technology resources as defined in [APM 30.12, section C-1](#), that could have a negative effect on services or data that are classified as production or high impact by the Change Advisory Board, system/data owner, or other relevant authority.

The scope of this policy does not supersede approved system security plans, laws, regulations, or contractual change management limitations or requirements.

C. Definitions

C-1. Change Advisory Board (CAB). A group that reviews, approves, and prioritizes changes, either explicitly, or through approved processes, and maintains the standards for changes.

C-2. Change Control Board (CCB). A group of one or more individuals within projects or dedicated technology that is responsible for ensuring changes adhere to standards. Examples include but are not limited to: subject matter experts, managers, or impacted teams.

C-3. Emergency Change. Emergency changes are performed to address unexpected disruptions such as security incidents, application, or server outages that need to be resolved immediately.

C-4. Normal Change. All other changes that are not Emergency or Standard Changes. Examples include, but are not limited to, data migrations and software implementations, network, or system configuration changes. Each change has a predefined scope and action plan.

C-5. Standard Change. Periodical, low-risk and low-impact changes that follow a standard operating procedure approved by the CAB. Each change has a predefined scope and action plan.

C-6. System. A discrete set of resources assembled to store, process, maintain, share, or dispose of data. This includes, but is not limited to, any endpoint devices (desktops, laptops, smart phones, tablets) as well as servers, networks, or third party and cloud services.

D. Policy

D-1. Changes

- a. All changes to Information Technology systems and services must follow a structured process defined or approved by the CAB to ensure appropriate planning, communication, and execution.
- b. Every change requires explicit consideration for the security impact of the change.

- c. Changes that do not meet the requirements set by the CAB or designated CCB for standard or emergency changes must follow the procedure for normal changes.
- d. To ensure emergency changes occur in a timely manner, review and approval of the change occurs after the event during the follow-up activity for the emergency event.

D-2. Change Advisory Board (CAB) membership and responsibilities

- a. The CAB will be made up of representatives designated by the CIO and published in Change Management standards.
- b. The CAB has the following responsibilities:
 - i. Assess, prioritize, authorize, schedule, and communicate changes in a timely manner.
 - ii. Review emergency changes and request follow-ups or additional documentation as required.
 - iii. Appoint CCBs for minor changes, projects, or dedicated technology.
 - iv. Meet regularly to review upcoming changes.
 - v. Propose and maintain standards for changes and change approval that are approved by CIO.
 - vi. Establish and maintain procedures, guidelines, and processes for changes and change approval, including automated processes.
- c. The CAB may require items prior to approval including but not limited to:
 - i. Additional documentation or communication.
 - ii. An appropriate change window adhering to change window guidelines.
 - iii. Delay in schedule to accommodate risks.
 - iv. Additional mitigations implemented either prior to or post change.

D-3. Change Control Board (CCB) responsibilities

- a. CCB have the following responsibilities:
 - i. Review and approve in-scope changes in a timely manner as per the standards defined by the CAB or by self-defined standards approved by the CAB.

- ii. Review emergency changes and request follow-ups or additional documentation as required.
- iii. Designate relevant stakeholders as approvers.

b. CCBs may require items prior to approval per D-2 c.

E. Noncompliance. Noncompliance with this policy may result, depending upon the nature of the noncompliance, in the user's account or access being suspended to U of I technology resources as stated in Section B.3 of APM 30.12 ([Acceptable Use of Technology](#)).

F. Exceptions. Requests for exceptions to this policy may be submitted [through the OIT Support Portal](#). The U of I Chief Information Security Officer will assess the risk and make a recommendation to the U of I Vice President for Information Technology and Chief Information Officer. Exceptions must be reviewed for reauthorization on no less than an annual basis.

G. Contact Information. The OIT Information Security Office (oit-security@uidaho.edu) can assist with questions regarding this policy and related standards. Questions should be submitted through the [OIT Support Portal](#).

95.24 – Vandal Alert Notification System

February 27, 2015

~~Preamble:~~ **A. Purpose.** This ~~procedure was updated in 2015 to~~ policy provides comprehensive guidance for issuing notifications to the University of Idaho community using the Vandal Alert System. -The ~~u~~University's goals are to provide prompt notification of a confirmed situation impacting the university community and to provide instructions for taking action when needed. -These protocols are integrated with and supplement the ~~u~~University's ~~Comprehensive Emergency Management~~ ~~Emergency Operations~~ Plan (~~CEMPEOP~~) and Crisis Communication Plan. -These protocols apply only to the Vandal Alert System; ~~the~~ University of Idaho may use other forms of communication as part of a broader communication strategy.

B. Scope. This policy applies to the Campus Community as defined in C-2.

AC. — Definitions:

AC-1. Vandal Alert System. ~~+~~ -The Office of Public Safety and Security has overall management responsibility for ~~the~~ Vandal Alert ~~System~~. Vandal Alert is an institution-wide, multi-modal (e-mail, text message, etc.) emergency notification system. All ~~u~~University employees and students are encouraged to sign up for Vandal Alert by visiting: ~~Vandal Alert System~~ <https://www.uidaho.edu/dfa/division-operations/ehs/i-safety/vandal-alert>. Contact data/membership in Vandal Alert is updated daily through an automated process to ensure accurate membership. Students and employees are encouraged to update their Vandal Alert contact information through the ~~Vandal-WebMyUI applicatio~~ ~~application.~~ ~~n-~~ ~~Emergency Management (uidaho.edu)~~ ~~MM~~ Members of the greater Moscow community may also be enrolled in Vandal Alert.

AC-2. Campus Community. ~~ty.~~ Campus community means students, faculty, professional personnel, classified staff, volunteers, visitors, and anyone else who is admitted or enrolled in the university, ~~are is~~ participating in programs offered by the university, or who ~~are is~~ employed by, or volunteering at the university.

AC-2. Emergency Notification (Clery Act Requirement). ~~+~~ A communication issued to the campus community triggered by an event currently occurring on or imminently threatening the UI campus. -UI will initiate ~~E~~emergency ~~N~~notification procedures for any significant emergency or dangerous situation representing an immediate threat to the health or safety of the campus community.

AC-3. Timely Warning (Clery Act Requirement). ~~+~~ An alert issued to the campus community when a ~~Clery Crime~~ is reported ~~and which~~ represents a serious or continuing threat to the campus community. ~~Crime reports often do not require immediate notice (an Emergency Notification), but are released once the pertinent information is available, if available if a notice is deemed necessary.~~

AC-4. Adverse Weather Notification. ~~+~~ An alert issued to the campus community when projected or existing severe or adverse weather conditions may impact ~~u~~University operations requiring delays or cancellation of classes or events ~~and/~~ or the closure of a ~~University~~ ~~university~~ facility, site or campus (see APM 95.21, University Closures).

AC-5. Informational Notification. ~~+~~ -A notification issued to the campus community that does not meet the criteria for either an ~~E~~emergency ~~N~~notification or ~~T~~timely ~~W~~warning but may be of significant interest to the campus community.

BD. Policy and Procedure.

BD-1.- Emergency Notification.- In compliance with The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (20 USC § 1092(f)), Emergency Notifications will be broadcast when the University receives a confirmed report from a cognizant authority (i.e. an law enforcement emergency service authority), that a significant emergency or dangerous situation involving an immediate threat to the health or safety of students, faculty, staff or visitors is occurring on campus. -In those instances, the Executive Director of Public Safety or designee will, without delay, and taking into account the safety of the community, determine the content of the notification and broadcast the notification, unless issuing a notification will, in the professional judgment of responsible authorities, compromise efforts to assist a victim or to contain, respond to or otherwise mitigate the emergency. Emergency Notifications will include instructions to the university community for protective action. When the threat no longer exists, an "all clear" alert will be broadcast. -The Executive Director of Public Safety and Security or designee has the authority to broadcast Emergency Notifications to the University community using the Vandal Alert System. When appropriate, Emergency Notifications may be broadcast through other communication methods (web pages, press releases, printed and/or social media, etc.)

BD-2. -Timely Warning. -In compliance with The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (20 USC § 1092(f)), Timely Warnings will be broadcast when a report of murder, sex offense, robbery, aggravated assault, burglary, motor vehicle theft, manslaughter, ~~or~~ arson, or other (Clery Act Crime.s) is received by campus security authorities and, in the judgment of the institution, the crime at issue poses a serious or continuing threat to students and employees.

The Executive Director of Public Safety or designee will broadcast Timely Warnings using the Vandal Alert system in a manner that is timely and will aid in the prevention of similar crimes, unless issuing a warning will, in the professional judgment of responsible authorities, compromise efforts to assist a victim or to contain, respond to or otherwise mitigate the threat.- The intent of a timely warning is to enable people to protect themselves and/or their property. -Timely Warnings will be issued as soon as pertinent information is available. Timely Warnings may also be made for other crimes (non-Clery crimes) that pose a serious or continuing threat to the campus community.- The Executive Director of Public Safety and Security or designee has the authority to broadcast Timely Warnings to the University community. When appropriate, Timely Warnings may be broadcast through other communication methods (web pages, press releases, printed and/or social media, etc.)

BD-3. -Adverse Weather Notification. -Adverse weather notifications will be broadcast when significant severe weather conditions exist that may have an impact on university operations and when the University of Idaho President or designee makes a decision to close or delay opening a UI facility. -The University Emergency Manager monitors weather conditions, participates in the National Weather Service weekly briefing and makes recommendations for taking appropriate actions in the event of a weather-related emergency (see APM 95.21, University Closures). -The UI President or designee has the authority to close or delay opening a UI facility. When a designee makes a decision to close or delay opening a UI facility, they will notify the UI President's office and the Office of Public Safety and Security. -The Executive Director of the Office of Public Safety and Security or designee has the authority to broadcast an Adverse Weather Notification, and to notify the University community of approved closures or delays.

BD-4. -Informational Notification.- Informational Notifications will be broadcast when a reported crime or emergency does not meet the criteria for other alerts, but, in the judgment of the institution, the campus community should be notified about an incident. -Situations that may be appropriate for broadcasting an informational notification include incidents or crimes occurring off campus that may have an impact on student or employee security interests; violent crimes in which the perpetrator or suspect has been apprehended or is known not to be on campus; or incidents that may generate significant interest across the campus community. -The Senior Director of Communications ~~Director of Integrated Communications~~ or designee has the authority to broadcast an Informational Notification.

BD-5. Vandal Alert System Testing. -The University Emergency Manager will test the Vandal Alert System on an annual basis. -Test messages may be broadcast using a single mode or may combine multiple modes of the system. -Test messages will clearly state in the subject line that there is no actual threat or emergency and that the purpose of the notification is to test the system and/or response plans and capabilities.- To the extent possible, system tests will be combined with emergency response drills and will include follow-up assessment and review.

45.03 -- Definitions for Grants, ContractsDetermination of Sponsored Project Versus and Gifts

Last updated 19 August, 2005

A. Purpose. This policy addresses the policy and process for determining the classification between “gifts” and “sponsored projects.”

B. Scope. The policy applies to any external funding agreements in which questions arise over whether the agreement is a gift or a sponsored project (grant, contract, etc.).

General. The university may enter into agreements with external funding agencies in which a question may arise over whether the agreement is a gift or a grant/contract. The following sections differentiate between a gift, grant or contract.

C. Definitions.

B-4C-1. Grant or ContractSponsored Project. A sponsored project grant or contract is a proposal that could result in an agreement based on an authorized proposal or application submitted by the university. The university accepts the awarded funding based on an agreement in writing, and assumes an obligation to provide a deliverable in exchange for such funding. Examples of a deliverable include but are not limited to the following: Pperforming specific research to accomplish, accomplishing a specific objective, ee, providing a service, er producing a product, or committing to a specific line of scholarly or scientific inquiry. Separate accountability and oversight for the funds received is required generally applicable. State and federal financial assistance funds are almost always classified as a sponsored project.

B-2C-2. Gift. A gift can be made in the form of a contribution of money, a legally enforceable pledge cash, check, bank credit card charge, ACH/wire, marketable security, personal or real property or crypto currency. A gift can be based on a proposal or application. The term “gift” may also include s grants made with philanthropic intent. By accepting a gift, the university assumes no liability to provide a deliverable, only the obligation to use the gift for the general purpose(s) stipulated by the donor. Overall, there will be no reporting requirements and there should not be a specific commitment for personnel effort or milestones. However, periodic reporting and a final accounting could be required by the donor without jeopardizing classification as a gift. Usually, there are no separate accountability requirements for each contribution, and the amounts received may be commingled with contributions received for similar purposes.

C-3. Deliverable.: A deliverable is an item of value (tangible or intangible) expressly noted as an exchange item, and resulting from a funded sponsored project.

CD. Information and/or Clarification Policy. Inevitably, there will be situations when the In the event that classification of a grant-sponsored project or gift will be is unclear. When such situations arise, personnel in the Grants and Contracts Office of Sponsored Programs (OSP) @ (208) 885-668951 and , and the Foundation Gift Administration (UIF) -staff (UIF) @ (208) 885-4000 Gift Administration Corporate and Foundation Relations (CFR) Office @ (208) 885-70606796, will jointly decide the proper classification and administration of the award. The decision may include consultation with personnel in the offices of Strategic Corporate Partnerships or Strategic Foundation Partnerships. The unit who that intends to submit the proposal or receive the funding must submit the appropriate determination request in advance to allow OSP and UIF and CFR Strategic Partnerships time to review and jointly determine how to best to classify the proposal or funding.

E. Procedure. The UI has established the following determination procedure for classifying a proposal as a gift or a sponsored project:

E-1. The principal investigator or project director should ~~complete the determination worksheet and email it to CFR and OSP along with a draft proposal~~ submit a ~~determination request ticket for Gift vs Grant Determination to OSP and CFRUIF~~ via the ITS Service Catalog website for Office of Sponsored Programs/OSP Administrative and Technical/Gift vs Grant Determination, ~~which includes a, budget and the guidelines or link to the funder's website.~~

E-2. CFROSP and OSPUIF coordinate the process and are the only entities authorized to make this determination.

E-3. CFROSP or OSPUIF will notify the PI of the decision, and CFRUIF will provide the appropriate IRS 501(c)(3) letter if needed.

- a. If the proposal is determined to be a gift, the PI submits it directly to the funder under the UI Foundation's name and 501(c)(3) status. When the funding arrives, the UI Foundation applies it ~~deposits it into the appropriate gift index~~ designation. Funds will be made available in the appropriate UI gift index via the Foundation's monthly gift budget/reimbursement process.
- b. If it is determined to be a sponsored project, the PI enters the proposal in VERAS and uses the University of Idaho's name and 501(c)(3) status. When the funding notification arrives, OSP creates a separate index and fund for tracking purposes and deposits the monies received into the appropriate sponsored project index.

45.04 -- ~~Notice of Sponsored Projects and Awards and~~ Establishment of Budgets/Financial Setup

January 3, 2012 (rewrite)

A. Purpose. This ~~APM section~~ policy clarifies the process by which an award from an external sponsor is accepted and subsequently set up and budgeted for spending in the University's financial system.

B. Scope. This policy is applicable to all external funding classified as a "sponsored project."

~~A. General.~~ Notices of awards for sponsored projects may be received through various funding vehicles. This APM section clarifies the process by which an award from an external sponsor is accepted and subsequently set up and budgeted into the Banner system.

~~C.B. Definitions:~~

~~CB-1. Notice of Award~~ award. Any of various funding vehicles used by external sponsors to indicate that the sponsor is making a commitment to fund a proposed scope of work. ~~It may take the form of a grant notice requiring no additional signatures; a formal contract and/or agreement requiring signatures of one or more parties; an award letter which may or may not include a check payment in advance; or a purchase order; or any other contractual agreement mechanism which may require the acceptance of a specific set of terms and conditions.~~

~~C-2. Fully Executed.~~ A fully executed award is one in which all parties have indicated their acceptance of the terms and conditions via the signature of the appropriate authorized representative, when such signaturee(s) areis required.

~~DC. Policy.~~ If a unit receives ~~such~~ a notice of award, they should verify ~~that whether~~ the ~~original~~ award notice ~~includes has been received by communication to~~ the Office of Sponsored Programs (OSP), and if not, ~~forward share that information~~ the notice to OSP as quickly as possible. ~~The Director of OSP, or her/his~~ their designated representative, is the only person authorized to sign ~~for on behalf of~~ the University. ~~Principal Investigators (PIs), unit administrators, college deans, and other University staff are not authorized to sign accepting external funding for sponsored projects on the University's behalf.~~

~~ED. Process/Procedures:~~

~~ED-1. Request for Prior R~~ review and/or Approval approval of Award award d ~~Documents.~~ PIs, and as appropriate unit administrators ~~and/or~~ college deans, must review and approve award documents prior to OSP signing the award (if signatures are required). ~~initiating the budget set-up process.~~ Any requested changes to the agreement(s) must be submitted to ~~the~~ OSP. Negotiation of any changes requested are the responsibility of the ~~OSP~~ Contract Review Officer ~~Unit~~ (CROU) ~~for negotiation with the sponsor prior to official~~

acceptance of the award. (Note: Establishment of a budget and spending authority will be delayed until an approved and fully executed agreement is received by ~~the~~ CR&OSP. (See APM 45.05 when an Early Setup is requested)).

E-2. Compliance Protocols. If a sponsored project has indicated that compliance oversight is required, ~~including, but not limited to the use of human subjects, animals, or biohazards,~~ authorization from the relevant compliance oversight committee must be received, when applicable, -prior to financial set up. ~~The ORA review and oversight policy shall apply if appropriate. Examples of areas of compliance oversight include but are not limited to the use of human subjects, animals, or biohazards., if then applicable as determined by ORA review and oversight committee policy, prior to financial setup.~~

ED-32. Budget-Financial sSet-uUp. After the award is fully executed and any required compliance approvals are in place (all required signatures), the following steps will be completed:

- OSP will establish a budget-grant code, and one or more funds and indexes number. ~~This budget number~~ These items -will constitute financial spending authority for the PI to charge the applicable direct expenses associated with to the project for up to the amount currently funded by the sponsor and within the rebudgeting limitations (if any) set by the sponsor.
- Once ~~the budget is~~ financial set up is complete, notification will be sent to the PI(s) and the Departmental Grant Administrator (DGA) with the budget-relevant information and a copy of the award document. ~~Both~~ of these documents should be reviewed carefully when received, and the budget verified for accuracy.

FE. InformationContact iInformation. Any questions regarding notices of sponsored projects should be addressed to the Office of Sponsored Programs at 208-885-6651 or osp@uidaho.edu.

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://sitecore.uidaho.edu/governance/policy>.

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

Update format to match standard APM style, clarify policy and process in the document, add clarity on federal guidance and oversight for participant support costs, use consistent language of other APM’s (DGA, unit administrator, their delegate, etc.).

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

None

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

APM 45.09 and FSH 5100 referenced within but no changes to those needed

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

45.06 Allowable and Unallowable Sponsored Project Expenditures

~~December 2018 (rewrite combined 45.06 & 45.18)~~

A

A. Purpose. The purpose of this policy is to ensure that expenses charged to externally-funded sponsored projects comply with federal, sponsor, state, and university requirements.

B. Scope. This policy applies to any external funding determined as being a sponsored project must follow this guidance.

C. Definitions:

AC-1. Allowable Costs. For a cost to be regarded as an allowable charge to a sponsored project, it must satisfy the four conditions below as per the federal ~~regulation~~requirements outlined in 2 CFR 200 or any such future federal guidance as may become applicable:

a. Reasonable. A cost is considered reasonable if the nature and the amount involved for goods or services acquired or applied reflect the action that a prudent person would have taken under the circumstances prevailing at the time the decision to incur the cost was made ~~(. 2 CFR 200.404).~~

b. Allocable to sponsored agreements. A cost is considered allocable to a particular project if the goods or services involved are chargeable or assignable to the project in accordance with relative benefit received or other equitable relationship. Subject to the foregoing, a cost is considered allocable if:

- it is incurred solely to advance the work under the sponsored agreement;
- it benefits both the sponsored agreement and other work of the institution, in proportions that can be approximated through use of reasonable methods~~;~~
- it is necessary to the overall operation of the institution and is deemed to be assignable in part to sponsored projects ~~(2 CFR 200.405).~~

2 CFR 200.405.

c. Consistently ~~Applied~~applied. Costs must be given consistent treatment by applying them uniformly to both federally-financed and other activities of the institution ~~(. 2 CFR 200.403).~~

d. Conforming to any limitations or exclusions. Costs must conform to any limitation set forth in the federal guidance, or in the sponsored award itself, as to types or amounts of cost items ~~(. 2 CFR 200.403).~~ Certain costs are designated as expressly unallowable.

AC-2. Unallowable Costs. Costs that fail to meet any of the four conditions described above will be treated as unallowable. Questions regarding the allowability of costs should be directed to the Office of Sponsored Programs, (208) 885-6651 or emailed to osp-cost@uidaho.edu.

BD. Policy. The University, as a recipient of sponsored project funding, must comply with all regulations and standards established by the federal government and other sponsoring agencies. The Federal Office of Management and Budget (OMB) is responsible for setting

forth the general principles and practices for federal costing standards associated with federally sponsored project activity.

All sponsored projects are subject to regular review and any expenses charged against sponsored projects must be consistent with federal guidance, University policies and procedures, and sponsor requirements. -The primary responsibility for ensuring that only proper expenditures are charged to sponsored project budgets rests with the Principal Investigator (PI). -The Office of Sponsored Programs (OSP) is responsible for monitoring adherence to all federal, state, and other cost-related restrictions on sponsored projects ~~via the methods detailed in Section D.~~

BD-1. Responsibility for ~~Compliance~~compliance. The general University mandate is that all employees act as responsible stewards of resources and assets under their control (FSH 3170).

a. Principal Investigator (PI). Under UI policy, the PI bears primary responsibility for ensuring the appropriateness or allowability of all costs on sponsored projects. (FSH 5100).

b. ~~A~~Departmental Grant Administrator (GADGA). ~~A Departmental Grant Administrator (DGA)~~ is charged with assisting PIs in reviewing, justifying, charging and tracking costs, and is also responsible for making certain that expenditures are charged against awards in a manner that is consistent with applicable federal regulations, sponsor conditions, and University policies.

c. ~~The Unit Administrator~~Unit administrator. ~~The unit administrator~~ (department chair/head/director) is responsible for implementing procedures to ensure adherence to federal cost principles including allowability, accounting regulations, and University policies. Charges which have been determined to be unallowable to sponsored projects will be apportioned to the sponsoring unit or college for payment. (FSH 5100).

d. ~~College deans and Vice President for Research and Economic Development.~~ Oversight of these procedures lies within the authority of the College Deans or equivalent, for units, and the Vice President for Research and Economic Development, for institutes, or their delegates. Decisions regarding the source(s) of repayment of unallowable costs and any penalties and interest charges shall be made by the Dean and/or the Vice President for Research and Economic Development.

e. ~~Employees.~~ Employees are encouraged to use the confidential hotline, speak to the Ombuds Office, or speak with their direct supervisor, college finance director, chair, director, dean or OSP in cases where there is undue influence to process charges that are unallowable. Employees should note that protections are afforded through federal and University policies to prevent retaliation in such instances. It is a violation of University policy for any employee to engage in retaliatory conduct, see FSH 3810. ~~As public employees, University faculty and staff are responsible for reporting any actions by University employees that are illegal or incompatible with the conscientious management of resources and assets of, or entrusted to, the university.~~ University employees are responsible to report unethical behavior when it is encountered. (FSH 3170).

D-2. Unallowable expenses. OSP reviews expenditures periodically through the life of a sponsored project budget and prior to closeout based on the information in the University's financial system. If through this review it is determined that an unallowable expenditure has been assessed to a project, OSP will contact the responsible departmental grant administrator to either correct the transaction or perform a review of the facts associated with the assessment of the expenditure.

The review will identify who was responsible for the assessment of the expenditure, the circumstances surrounding placement of the unallowable expenditure on a sponsored project budget, and where the expenditure is to be transferred. OSP may be consulted to assist in the review process to ensure allocation of costs is completed in accordance with existing regulations, award conditions, and applicability to the scope of the project. Action, such as a review of policies and procedures, identification of resources available in making cost determinations, and improvement of internal controls, will be taken by the college to ensure unallowable costs are not placed on sponsored projects in the future. Based upon the review, the college will determine the severity of the infraction and the potential for recurrence. Taking into consideration the severity and potential for recurrence, the college will make a recommendation for resolution.

Once a review has been completed, any unallowable expenditure(s) shall be removed from the sponsored project budget and placed on an unrestricted University budget. If an unrestricted University budget is not available, the expenditure(s) will be deducted from the facilities and administrative costs returned annually to the college. Copies of all back-up documentation for the review process and associated transfers must be retained by the college. OSP has access to view these transfers within the university's enterprise applications should the need arise. Any resolution and provision of necessary paperwork will not preclude OSP from conducting a full review of sponsored project activity within the area under review.

This process shall also be used if an unallowable expense is placed on a project and the unallowable expense is identified by persons other than OSP.

If it is determined that the potential for recurrence is high, the Office for Research and Economic Development (ORED), with the concurrence of the college, will require the individual to take or retake training offered by OSP.

If an individual commits the same infraction or fails to comply with responsive actions required, the individual's repeated actions may be referred for review by an ad hoc committee comprising the Associate Vice President for Research and Economic Development, the dean or dean's designee of the individual's college(s), a representative from OSP, a representative of the University controller, and two peers. A representative from HR and internal audit will be included in an advisory capacity. The committee will review the available facts and make recommendations for further investigation or remedial and/or disciplinary action to the appropriate individual(s). **Process/Procedures:** Recommended employee disciplinary action will be made to the individual's supervisor and unit administrator or dean, and any such action shall be at the discretion of the appropriate supervisor and shall proceed in accordance with the employee disciplinary procedures in the applicable University policies. Recommendations for nondisciplinary remedial actions, such as required training or revocation of access to manage sponsored project activity, shall be made to the Vice President for Research and Economic Development. Nothing herein shall limit the authority of an individual's administrative unit or ORED to otherwise impose discipline or

[remedial activities within their existing authority and without referral to the above-described committee.](#)

E. Procedure. Expenditures incurred for sponsored projects typically fall into one of the following classifications: salaries; fringe benefits; temporary hourly employees; travel; operating expenditures; equipment <\$5k; capital outlay >\$5k; ~~subcontracts; >\$5k; subawards; participant support,~~ and tuition remission, fees, stipends and Student Health Insurance Program (SHIP). The following guidelines provide assistance to assure that all charges against sponsored projects are correctly processed.

~~CE-1. Salaries.~~

- For externally-sponsored awards, an individual's rate of pay may not be charged in excess of the institutional base salary rate received for that individual's regular appointment.
- Payroll expenditures and changes to an individual's effort percentage are to be processed in a timely manner through Banner Electronic Personnel Action Forms (EPAFs).
- EPAFs to terminate personnel from sponsored projects ~~must~~**should** be processed prior to the award end date to reduce the necessity for [labor redistributions \(formerly payroll cost transfers\).](#)
- EPAF and any Banner records must accurately reflect the percentage of time individuals are working on a given project and ~~be~~ verified regularly via [Personnel Activity Reports \(PARs\)Banner Effort Reporting](#) as per [APM 45.09](#).
- Payroll and budget reports should be produced and reviewed regularly to ensure that projects are not over budget.
- All leave is to be charged to the appropriate ~~budgets,~~[account\(s\)](#), as it is taken. Terminal leave is paid through a consolidated fringe benefit rate. See ~~CE-2~~. All [salaried](#) employees who are paid in whole or in part from sponsored projects, federal funding, or committed cost share must complete ~~a PAR as per APM 45.09~~[an effort report as per APM 45.09](#).
- For guidelines on Faculty Summer Salary Release, see <https://www.uidaho.edu/provost/faculty/salary-information>

~~CE-2. Fringe Benefits.~~

- **benefits.** The university pays fringe benefits through a consolidated [fringe](#) rate negotiated annually or as required with the Department of Health and Human Services. Rates are assigned based on the employee's position class of faculty, staff, or student. ~~Check the~~ [OSP Budget Office](#) website for current rates.

~~CE-3. Temporary Hourly (TH) employees. Employees.~~

- The guidelines issued above for ~~Salaries~~[salaries](#) are also applicable to TH employees [with the exception of effort reporting](#).

~~CE-4. Travel.~~

- The purpose of travel must be in direct support of project objectives.
- Travel must take place within the time period of the project.

- Reservations or airline tickets cannot be purchased with sponsored project funds if the actual travel occurs before the start date or after the termination date of the project.
- All travel charges must be documented by receipts.
- Allowable travel expense rates must comply with UI travel policy, the terms of the agreement, or agency requirements, if morewhichever is most restrictive.
- All foreign travel must be registered with the International Programs Office before travel is undertaken.
- All foreign air travel on federal funds must comply with the Fly America Act. A link to this Act, and additional information are available on the OSP website.OSP website.

EE-5. Operating ~~Expenditures~~expenditures

- Operating supplies and services must be purchased and received during the time period of the project.
- Operating supplies and services must provide a direct, verifiable benefit to the funded project.
- It is not an acceptable procedure to “stockpile” supplies at the end of a project period. Such stockpiled supplies would not reflect a direct and verifiable connection to the project being funded and may result in an obligation back to the sponsor ~~(2 CFR 200.314).~~

EE-6. Capital ~~Outlay~~outlay

- Capital outlay (CO) is defined as items having a useful life of more than one year and a cost of \$5,000 or more.
- Capital outlay items must be purchased during the time period of the project: and in accordance with Purchasing requirements.
- Capital outlay items must be received with enough time remaining on the project to benefit the project.
- See APM 10.40 Property Inventory and Products for tracking and accountability. ~~[Note: Some agencies place lower dollar limits on items that must be inventoried and insured.]~~
- Transfers into and out of the CO category can affect the F&A allocation on a sponsored project. Budget transfers into or out of the CO category require OSP involvement.

EE-7. ~~Subcontracts~~Subawards and subcontracts. If the University is subawarding or subcontracting a portion of the project work scope, a contractual award document will need to be issued by OSP at the request of the PI or the unit. If at the subaward or subcontract is not included in the original proposal, agency approval will may be required prior to ~~subcontract~~ issuance.

- ~~Subcontract~~Subaward or subcontract costs are split out from the award and budgeted on a separate fundsindex within the overall grant budget.
- All ~~subcontractors~~subrecipient requests for payment (invoices) must be approved by both the PI and OSP prior to being charged against the ~~purchase orders~~subaward or subcontract.
 - Cumulative amountamounts invoiced may not exceed the total amount of the ~~subcontracts~~subrecipient index.
 - Invoices must be reviewed for allowable expenses per the prime contract and PI must certify both that the work is progressing and that expenses are

appropriate. -OSP will review and approve all subaward or subcontract invoices prior to forwarding to Accounts Payable for payment.

~~C-8. Tuition Remission, Fees, Stipends, Scholarships, and Insurance (TFSSI).~~

~~• Tuition remission and fees may be charged for Graduate Assistants only.~~
If Graduate Assistants **E-8. Participant support.** Participant support costs are direct costs for items such as stipends or subsistence allowances, travel allowances, and registration fees paid to or on behalf of participants or trainees (but not employees) in connection with conferences or training projects. Other participant support costs such as incentives, gifts, souvenirs, t-shirts, and memorabilia must be justified in the budget justification as these costs are highly scrutinized.

Speakers and trainers are not typically considered participants, however if the primary purpose is to speak or assist with the management of the conference then these costs can be classified as participant support. For some educational projects, the participants being trained are employees. If the payment is made through a stipend or training allowance method, this can be categorized as participant support costs. To help defray the costs of participating in a conference or training activity, funds may be proposed for payment of stipends, per diem or subsistence allowances, based on the type and duration of the activity. Allowances must be reasonable, in conformance with university policies and the sponsor's terms and conditions. Days must be limited to the attendance of the conference and actual travel time to/from the conference. Per diem and subsistence allowances must be reduced in cases where meals or lodging are provided at no charge or included in the registration fee. Rebudgeting from participant support costs to other budget categories requires prior sponsor approval. CFR 200.308.

E-9. Tuition remission, fees, stipends, scholarships, and insurance (TFSSI).

- ~~• If graduate assistants are receiving a salary or stipend, then tuition remission, if allowed by the sponsor, must be paid from the same sponsored project budget on a proportional basis to the salaries. When tuition remission is not allowed as a direct charge on a sponsored project it must be charged to a different funding source.~~
- ~~• TFSSI expenses must be specified as allowable expenses of the award.~~
- ~~• TFSSI expenses are allowable on formal training grants as a scholarship.~~
- ~~• Tuition remission and fees may be charged for graduate assistants only.~~
- TFSSI expenses are allowed on most ~~other~~ sponsored projects when associated with a ~~Graduate Assistant's~~ graduate assistant's appointment to work on the project. [Note: USDA may restrict the expensing of tuition, fees and insurance to sponsored projects; review your project guidelines or ask OSP if you have questions-].
- Scholarships are not an allowable expense unless specifically approved by the sponsor.

~~D. Office of Sponsored Programs Policy on unallowable expenses:~~

~~**D-1.** OSP reviews expenditures periodically through the life of a sponsored project budget and prior to closeout based on information in the University's financial system. If, through this review, it is determined that an unallowable expenditure has been assessed to a project, OSP will contact the responsible college finance director to either correct the transaction or perform a review of the facts associated with the assessment of the expenditure.~~

- TFSSI expenses are allowable on formal training grants as a scholarship.

~~The review will identify who was responsible for the assessment of the expenditure, the circumstances surrounding placement of the unallowable expenditure on a sponsored project budget, and where the expenditure is to be transferred. OSP may be consulted to assist in the review process to ensure allocation of costs is completed in accordance with existing regulations, award conditions, and applicability to the scope of the project. Action, such as a review of policies and procedures, identification of resources available in making cost determinations, and improvement of internal controls, will be taken by the college to ensure unallowable costs are not placed on sponsored projects in the future. Based upon the review, the college will determine the severity of the infraction and the potential for recurrence. Taking into consideration the severity and potential for recurrence, the college will make a recommendation for resolution.~~

~~Once a review has been completed, any unallowable expenditure(s) shall be removed from the sponsored project budget and placed on an unrestricted University budget. If an unrestricted University budget is not available, the expenditure(s) will be deducted from the facilities and administrative costs returned annually to the college. Copies of all back-up documentation for the review process and associated transfers must be retained by the college and originals forwarded to OSP for retention in the official University file. **(Note, any resolution and provision of necessary paperwork will not preclude OSP from conducting a full review of sponsored project activity within the area under review.)**~~

~~This process shall also be used if an unallowable expense is placed on a project and the unallowable expense is identified by persons other than OSP.~~

~~**D-2.** If it is determined that the potential for recurrence is high, the Office for Research and Economic Development (ORED), with the concurrence of the college, will require the individual to take or retake formal training offered by OSP.~~

~~**D-3.** If an individual commits the same infraction or fails to comply with responsive actions identified through the process in D-1 and D-2, his or her repeated actions may be referred for review by an ad hoc committee comprised of the Associate Vice President for Research and Economic Development, the dean or dean's designee of the individual's college(s), a representative from OSP, a representative of the University controller, and two peers. A representative from HR and internal audit will be included in an advisory capacity. **The committee will review the available facts and make recommendations for further investigation or remedial and/or disciplinary action to the appropriate individual(s).** Recommended employee disciplinary action will be made to the individual's supervisor and unit administrator/dean, and any such action shall be at the discretion of the appropriate supervisor and shall proceed in accordance with the employee disciplinary procedures in the applicable University policies. Recommendations for non-disciplinary remedial actions, such as required training or revocation of access to manage sponsored project activity, shall be made to the Vice President for Research and Economic Development. Nothing herein shall limit the authority of an individual's administrative unit or ORED to otherwise impose discipline or remedial activities within their existing authority and without referral to the above described committee.~~

| **F. Contact ~~Information~~information.** For additional information, please contact the Cost Accounting Unit of the Office of Sponsored Programs at 208-885-6651 or osp-cost@uidaho.edu.

1. Policy/Procedure Statement: Briefly explain the reason for the proposed addition, revision, and/or deletion.

Revisions are necessary to bring policies up to current requirements for sponsored project regulations, and to clarify Chart V nomenclature (budget vs. fund/index, etc.).

2. Fiscal Impact: What fiscal impact, if any, will this addition, revision, or deletion have?

None – no substantive changes.

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

45.07 -- Cost Transfers on Sponsored Projects

January 3, 2012

A. Purpose. ~~The purpose of this policy is to outline the~~ provide guidelines surrounding for the movement of sponsored project posted Banner expenses between indexes/~~funds.~~

B. Scope. This policy applies to all cost transfers and labor redistributions which involve one or more sponsored projects.

CA. Cost transfer dDefinitionsed. A cost transfer is a

~~CA-1. Cost Transfer.~~ Any Banner transaction that moves an expense either from one ~~budget index/fund~~ to another, or from one expense code to another, as a correcting entry to the original posting.

DB. Policy. This policy establishes the proper procedures and internal controls required for cost transfers in general, as well as specifically for sponsored projects. A cost transfer signals to an auditor that ~~something a transaction~~ requiring correction has occurred and that further investigation may be needed. In particular, when a cost transfer is processed onto a sponsored project budget near the project's termination date, an auditor may interpret it to mean that the Principal Investigator (PI) is trying to simply expend the balance remaining in the project budget rather than charging only appropriate project-specific expenses. ~~This policy establishes the proper procedures and internal controls required for cost transfers in general, as well as specifically for sponsored projects.~~

While ideally all expenses are processed and posted to the correct project ~~budget index/fund~~, the University recognizes that errors occur and cost transfers to correct those errors may be necessary. ~~Cost transfers are to be used when an expense is incorrectly processed on one budget index/fund and require the expense needs to be transferred to the correct budget index/fund.~~ Cost transfers may also be used when correcting an expense code used for a particular item ~~of cost to a more appropriate expense code.~~ Cost transfers may not be used to transfer ~~income revenue~~ from one account to another. (Note: The rule code IDG [See APM 75.30] should *only* be used either to record ~~income revenue~~ for a service provided, such as lab testing, or for cost transfers that are internal to the University.)

EE. Process/Procedures. The following guidelines are provided to ensure cost transfers are proper and authorized. ~~The Payroll Cost Transfer form found on the OSP website is only to be used for transferring payroll expenses.~~ All other types of cost transfers should be completed in Banner with adequate explanatory text.

EE-1. Timely Correctionscorrections. The ~~allowability likelihood~~ of a cost transfer onto a sponsored project ~~being approved~~ improves when the error is corrected within a reasonable time period (i.e. within 90 days ~~of the end of the month from~~ when the charge first ~~appeared posted~~). Cost transfers at the end of the project ~~period should be avoided~~ require strong justifications, and ~~in no event will e~~ cost transfers onto a project ~~be allowed~~ in excess of 90 days after ~~the project~~ termination date ~~are allowed only in extenuating circumstances and as approved by OSP.~~

E-G-2. Proper Explanation-explanation Requiredrequired. PIs and ~~Department~~ Grant Administrators (DGAs) are ~~ultimately~~ responsible for ~~fully the justification of justifying~~ the cost transfer. The justification must ~~state address the following~~ in detail: **A)** how the error occurred; **B)** why the transfer is required; and **C)** how the expenditure ~~is of benefited to~~ the project ~~scope of work~~. Statements such as 'to correct error' or 'clerical error' are not sufficient to withstand an audit. Cross-referencing text (cost transfer ~~document~~ number, date, explanation, and name of person entering cost transfer) must be added to the original ~~incorrect posting transaction~~ document ~~on which the error occurred~~ in order to be able to

track the expense's path and to reduce the chances that of the same cost transfer expense being is moved more than once.

CE-3. Required ~~Supporting supporting Documentation~~documentation. All supporting documentation for cost transfers must be maintained ~~in the unit for three years after the termination of the project as per~~ the requirements of the project, but at a minimum for three years from project financial closeout. See APM 45.12.

CE-4. Guidelines for ~~Nonnon-p~~Payroll ~~Cost-cost Transferstransfers~~. All cost transfers onto a sponsored project budget ~~need to should~~ include the following steps:

a.) Prior to initiating a transfer document, review ~~FGIBAVL~~ financial records to ensure that the receiving budget is not overdrawn and that the account category receiving the transferred expense, and any associated F&A, has adequate funds to cover these costs. Account categories with insufficient funds will require a budget transfer, reviewable by OSP, for allowability and determination of whether sponsor approval is required.

b.) Ensure that the expense being transferred is within the project period of the receiving sponsored project, as defined in the Banner form FRAGRNT.

~~**c.)** Cost transfers which will potentially affect F&A, including capital outlay > \$5K may not be transferred without review and approval by OSP. These as these expenditures are audit sensitive, will affect F&A, and may need to be verified as being unallowable.~~

~~**cd.)** Ensure that any transferred expense is an allowable expense on the receiving budget. Refer all allowability questions to the Cost Accounting Unit of OSP.~~

~~**de.)** Prior to transferring any expense, review FOATEXT for the transaction to preclude the transfer of a previously transferred cost. See EC-2, above.~~

CE-5. Labor R redistributions (~~Payroll-payroll Cost-cost Transferstransfers~~). The Banner Labor Redistribution process is used to correct for labor when it has been identifieddetermined that salaries or wages havelabor has been incorrectly expensed on one index/fund and needs to be transferred to another index/fund. Prior to starting the process the following steps should be completed. Payroll cost transfers onto or off of sponsored projects must use the form found on the OSP website and include the following steps:

a) Determine the employment dates involved (multiple pay cycles are allowed) and the amount of salary to be transferred. Verify that all -of the dates fall within the project period.

~~**b) b)**~~ If the change is retroactive and ongoing, complete an EPAF for processing through the normal approval and Banner posting cycle. In the Remarks section of the EPAF, indicate that you have requested a cost transfer for \$xx.xx (amount) from XX/XX/XX to XX/XX/XX (employment dates).

c) If the labor redistribution is for a graduate student, ensure that any tuition remission is appropriately transferred in proportion to the change, if tuition remission is an allowable cost on the project.

~~**d) e)**~~ Complete the Banner Labor Redistribution process Payroll Cost Transfer (PCT) Form and include the following comments:-

- -The grant code(s). should be included in the comments area
- -Justification for how the employee's effort relates to the index/fund the costs are being transferred to.
- -How the error occurred.
- -Any sSpecific internal controls to be implemented to avoid future issues.

- -If request is over 90 days from the original payroll posting, include the extenuating circumstances causing the delay in processing. OSP will normally only allow the movement of effort off a sponsored project to a non-sponsored project that is over 90 days from the original payroll posting date.

~~Questions one and two must be answered. If the PCT is more than 90 days past the end of the month of the posting date of the first pay period, questions three and four must also be answered. Each employee and project director/PI receiving the expense *must* sign and date the PCT form. This signature authority *may not* be delegated.~~

- ~~d) Attach any supporting documentation to the completed PCT form. Examples of supporting documentation include the NWPRES report, the NHIDIST screen, and the PHAHOOR screen for partial pay periods.~~
- ~~e) Send the PCT form with supporting documentation to OSP at mail stop 3020.~~
- ~~f) Ensure the Personnel Activity Report (PARs) [see APM 45.09] agrees with the information included on the cost transfer.~~
- ~~g) Payroll cost transfers cannot be completed online in Banner.~~

CE-6. Cost Transfer-transfer Limitationlimitation. A cost ~~will~~should not be transferred more than once, unless it was disallowed.

DE. Contact Informationinformation. Any questions regarding cost transfers should be addressed to the Office of Sponsored Programs at 208-885-6651 or osp@uidaho.edu.

Improving Student Success Via Revised Curricula and Instruction

To strengthen U of I students' outcomes, President Green has charged a Step-Up Completion: Collaboration, Evidence, Synergies, & Support (SUCCESS) Team to propose initiatives for funding likely to **increase our current 61% six-year graduation rate to 77%**, matching the current average at Research I institutions. Because U of I is enrolling increasing numbers of first-generation and other students from historically marginalized groups, President Green's charge focuses on using evidence-based approaches shown to improve graduation rates ([Bradley, 7.14.21; The Equity/ Excellence Imperative: A 2030 Blueprint for Undergraduate Education at U.S. Research Universities](#)).

To ensure that the final proposal is informed by perspectives from across campus, the SUCCESS Team invites feedback from campus groups over the next few months.

Specifically, the team is charged to build on U of I's existing Strategic Enrollment Plan (SEP) by focusing on evidence-based revisions to curricula and instruction shown to deepen learning and improve academic achievement. The team will propose three broad curricular and instructional student

success initiatives to President Green and Provost Lawrence by mid-May.

The SUCCESS Team invites feedback from campus groups, in two stages.

In **stage 1** (*January/early February*), campus groups are asked to provide feedback on six possible initiatives, each informed by evidence from other institutions. Using campus feedback, the team will narrow to three initiatives and develop possible approaches to pursue each.

In **stage 2** (*late February/early March*), all members of campus will be asked for feedback on the possible approaches.

The Team has worked hard to research and provide references for your consideration. **Your feedback is critical to success, and we appreciate your input** on this important project.

To provide stage 1 feedback, please review the descriptions of **each of the six possible initiative topics below**, then click on this [Feedback Form](#), selecting which of the initiatives you are responding to. Note you can re-enter to submit for each initiative. You'll be asked for your thoughts in response to the following questions for each initiative:

- 1. *What existing relevant strengths at UI could serve as a foundation for this initiative?***
On a scale of 1 to 10 (1 low, 10 high), how extensive and well established are UI's existing relevant strengths?
- 2. *What improvements in students' learning, preparation for upper-division courses, or other outcomes would you expect to result if UI pursued this initiative?***
On a scale of 1 to 10 (1 low, 10 high), how important is it to achieve these improvements?
- 3. *What is potentially interesting or attractive about this initiative?***
On a scale of 1 to 10 (1 low, 10 high), how much would you like to see UI pursue this initiative?
- 4. *What concerns do you have about this initiative and its implementation?***

Revise General Education Curriculum

General education prepares students to connect ideas across disciplines, engage usefully with differing views, recognize how knowledge claims differ across disciplines, adapt to changing work environments, and participate in civic life. Revised general education curricula often streamline general education requirements, use broad themes across disciplines, and scaffold courses' integration with major requirements across four years.

Research: shows (a) integrating and applying knowledge deepens understanding¹ and (b) integrated curricula and learning experiences promote academic success².

Example: [Arizona's General Education Curriculum](#)

Initial Ideas Generated by the SUCCESS Team:

1. Reconsider when and how courses are offered to support students' timely completion.
2. Develop an introduction-to-campus module.
3. Redesign curricula to engage detached students.
4. Add a civic participation requirement.

Expand & Enhance Common Learning Experiences

Common learning experiences, such as first-year seminars and learning communities, offer meaningful curricular and cocurricular experiences to enhance student learning, often using broad themes and varied curricular and co-curricular choices.³

Research: shows common learning experiences (a) improve student success and GPA; (b) are consistently linked to higher retention and graduation rates; and (c) positively impact racially/ethnically minoritized, first-generation, conditionally admitted, and undeclared students⁴⁻¹⁰.

Initial Ideas Generated by the SUCCESS Team:

1. Bridge program to prepare students for a FYE.
2. Various FYE opportunities to introduce general education.
3. Links from FYE to sophomore-, junior-, and senior-year experiences.
4. A culminating experience that builds on students' earlier common intellectual experiences.
5. Support for core cognitive and non-cognitive skills.

Example: [Arizona State's highly rated First-Year Experience \(FYE\) Program](#)

Increase Use of Evidence-Based Teaching Practices

Evidence-based teaching practices, such as active learning, promote higher order thinking and self-directed learning through discussion, case studies, group work, problem solving, writing, sketching, and other instructor-guided activities.

Research: A meta-analysis of 255 studies of STEM courses linked active learning to +6% average exam scores and +12 percentage points in course success rates, with traditional lecture students 1.5 times more likely to fail¹¹. Substantial research has linked success in foundational courses to increases in both retention and graduation rates^{12-17, 22-23}.

Example: [Home • Active Learning and Inductive Teaching • Iowa State University \(iastate.edu\)](https://www.iastate.edu)

Initial Ideas Generated by the SUCCESS Team:

1. Revise promotion and tenure criteria
2. Establish evidence-based, inclusive teaching practices; offer leadership, elevate expertise, and emphasize research on learning & instruction.
3. Ensure faculty have resources needed to pursue evidence-based teaching practices.

Provide More Real-World Learning Opportunities Earlier

Undergraduate (UG) research, internships, community-based learning, and other real-world learning experiences are linked to increased learning, graduation rates, and post-graduation success.

Research: UG research has been linked to +4% to +10% in overall graduation rates and +13% STEM degree completion, with particular benefits for racially/ethnically minoritized and other historically marginalized backgrounds¹⁸⁻²¹.

Example: [Echegoyan et al \(2019\)](#) showed a strong association between completing [UTEP's Freshman Year Research Intensive Sequence](#) and long-term retention for the 1,652 students they studied, 2015-2017 (~63% female, ~86% Hispanic).

Initial Ideas Generated by the SUCCESS Team:

1. Add co-op experiences, problem solving components, career experiences, undergraduate research, and capstone courses or experiences.
2. Strengthen industry connections.
3. Engage community members as co-creators of learning and scholarship.

Streamline Degree Pathways

The open source [Curricular Analytics](#) toolkit enables faculty to quantify curricular complexity, identify opportunities to streamline curricula, and create degree plans that best enable students to achieve timely degree completion. For example, some universities using Curricular Analytics have revised prerequisites or integrated just-in-time modules on key topics, e.g., building instruction in differential equations into engineering courses that require this knowledge.

Research: Preliminary data from a [\\$1.99M Ascendium Foundation grant](#) supporting the use of Curricular Analytics at 30 R1 and R2 institutions suggest that curricular complexity varies by discipline and that, while some complexity is needed to sequence learning, higher complexity typically correlates with lower graduation rates and longer time- to-degree for those who do graduate, with greater impacts on first-generation, Pell-eligible, white, and some minoritized students.

Example: The Curricular Analytics Project is part of a larger trend to use data to create more equitable curricular pathways, e.g., [at UT San Antonio](#).

Initial Ideas Generated by the SUCCESS Team:

1. Examine evidence about where students get slowed or stopped, e.g., when courses needed to progress are offered too infrequently or with too few seats.
2. Accelerate the process and smooth the pathway for transfer students; enter all degree plans into VandalWeb.
3. Consider upgrading our college policy manuals for students. Consider including information on commonly used course substitutions.
4. Consider a “one-stop shop” for students, passports to success, and a humanistic/ not mechanistic approach to genuinely supporting our students throughout their academic career.

Better Support Historically Marginalized Students

Provide intentional support for all students, especially first-generation students, international students, and others from historically marginalized groups.

Research: Founded in 2004, [Excelencia in Education](#) tracks degree completion goals and measures of progress for Latino and all students, replicates and expands practices shown to improve academic achievement, and supports institutions committed to serving Latino students.

Example: *Excelencia's* [Growing What Works Database](#) features 200+ programs supporting Latino students' academic success. Similarly, the [Center for First-Generation Student Success](#) supports colleges and universities to scale programs shown to effectively support first-generation (first-gen) students by providing data and professional development opportunities, promoting research on first-gen persistence and completion, and building a national network. Typically, educational approaches that benefit first-gen and racially/ethnically minoritized students better support all students.

Initial Ideas Generated by the SUCCESS Team:

1. Expand and/or extend the work of UI's [Office of Equity and Diversity](#) and its existing programs.
2. Equip faculty and staff to work effectively with students from first-generation, low-income, and/or high-trauma backgrounds, as well as those from other marginalized groups.
3. Prepare students to request support, course substitutions, etc., when needed and appropriate.
4. Develop online modules and/or other resources to support students who need to brush up on foundational skills.
5. Redesign campus spaces to promote student success.
6. Consider seeking a first-generation designation.
7. Support faculty in designing high-quality courses across delivery modes (face-to-face, online, hybrid).

VANDAL GATEWAY PROGRAM (VGP) ANNUAL REPORT

DEAN SEAN QUINLAN

ANNETTE FOLWELL, ASSOCIATE DEAN

BRIAN DULIN, VGP COORDINATOR

**COLLEGE OF LETTERS, ARTS, AND
SOCIAL SCIENCES**

VANDAL GATEWAY PROGRAM

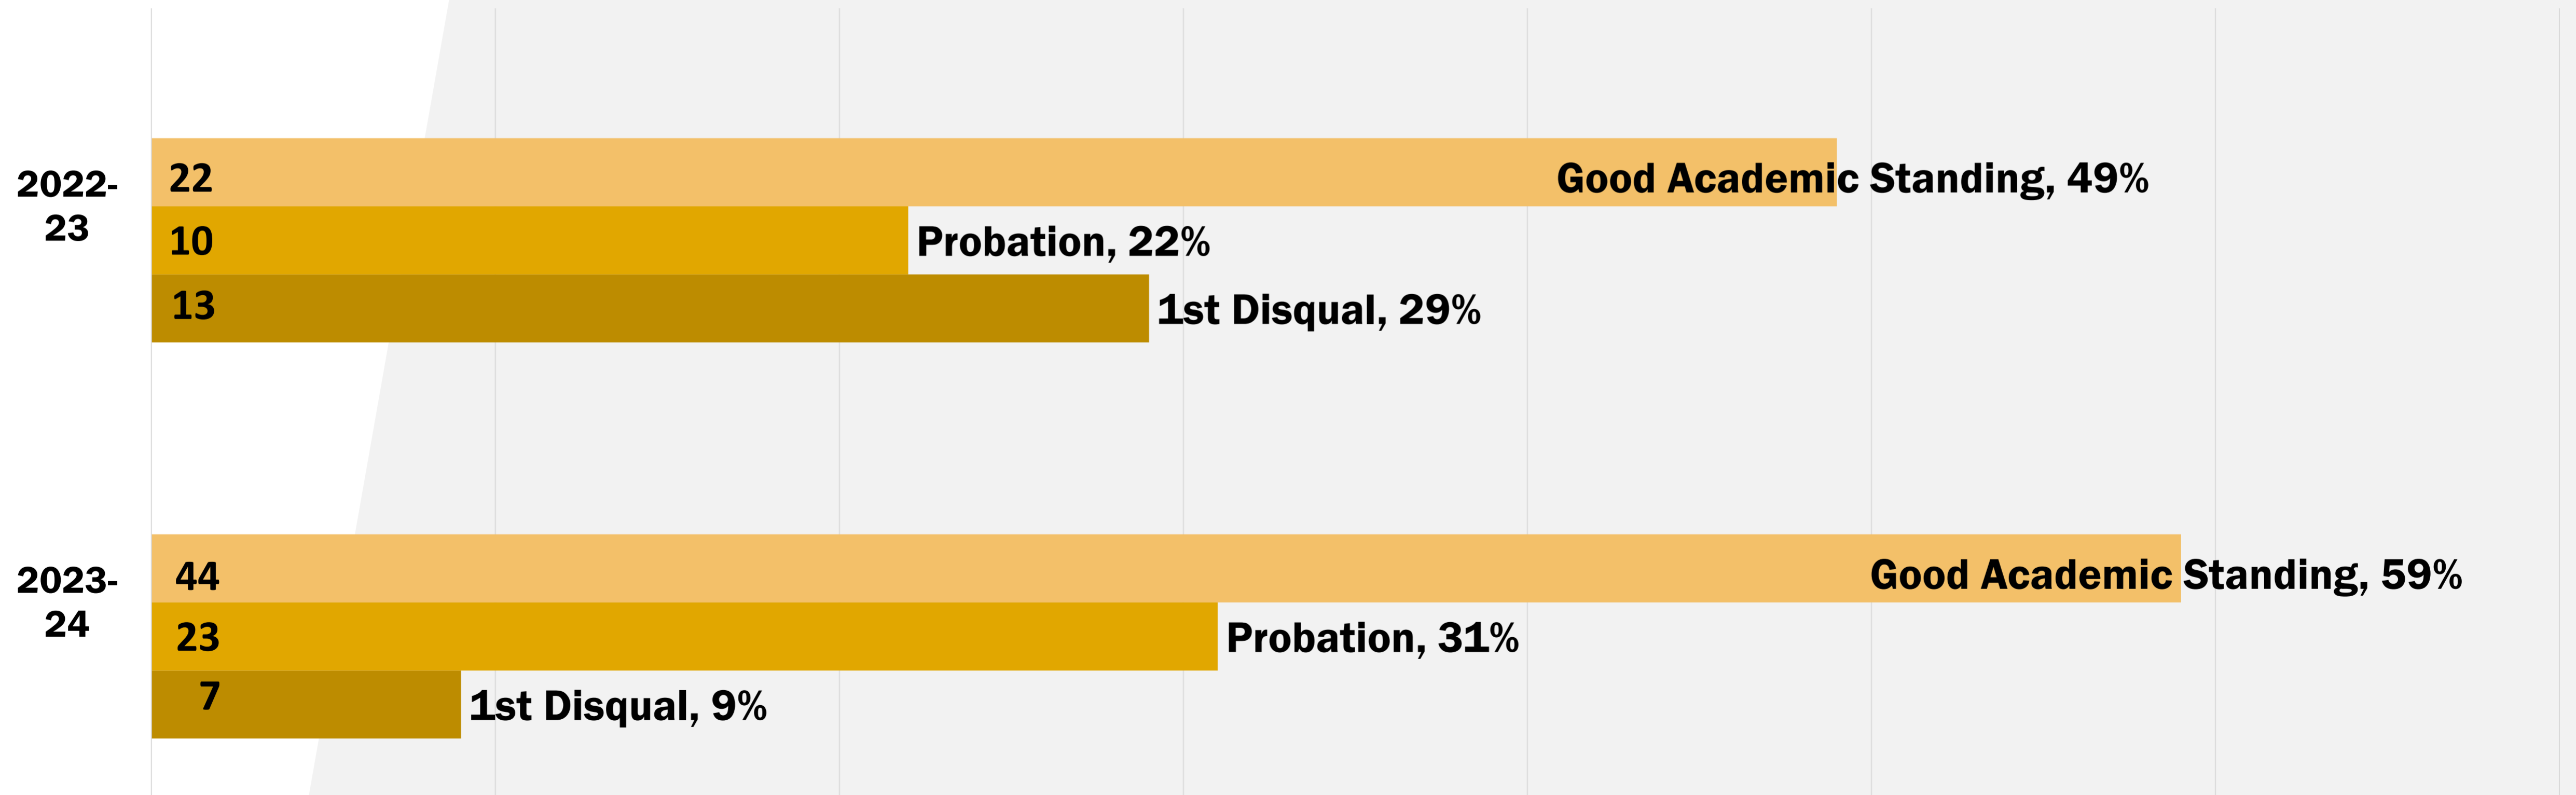

- I Allows students slightly below our usual admissible standards to be directly admitted to UI (2.3-2.59 GPA)
- I For their 1st year, students take General Education courses along with courses in their anticipated major
- I VGP has dedicated staff and faculty that advise, mentor, and teach students
- I After 1st year, VGP student transfer to their chosen major
- I 75% of VGP students served are Idaho residents
- I 48% of VGP students served are first-generation college students

ACADEMIC STANDING

I AY 2022–23: 45 VGP students (47 attended but 2 withdrew)

I AY 2023–24: 77 VGP students (84 attended but 7 withdrew)

PERSISTENCE, RETENTION, AND AWARDS

AY 2022-23:

- 88% persisted from fall to spring and 50% were retained for Fall '23
- 5 additional students returned for the Spring '24 semester (three Fall 22 students did not attend in Fall '23, but returned spring '24 and two spring '24 students did not attend fall '23, but returned spring '24)
- 3 students transferred to other institutions
- 9 students achieved a 3.0 or higher GPA and earned CLASS one-time awards

AY 2023-24:

- 85% persisted from fall to spring
- 2 students transferred to another institution
- 20 students achieved a 3.0 or higher GPA and earned CLASS one-time awards

WINS, LESSONS, AND LOOKING AHEAD

- I All the right pieces are now in place:
 - Direct admissions policy, well-qualified and effective VGP Coordinator hired, and additional faculty and advisor hired
- I Significant improvement in student achievement (10% increase of Good Academic Standing and 20% decrease in 1st DQ)
- I VGP opens doors for students who otherwise could not attend college
 - VGP serves multiple colleges and increases overall UI enrollments
 - Students who transfer from UI, while not ideal, are success stories
- I Financially self-sustaining and remained within original budget
- I Develop a process for VGP students to be considered for **Idaho Opportunity** or **Go Idaho** scholarships after completion of first year

2023 – 2024 Faculty Senate – Pending Approval
Meeting # 18
Tuesday, January 23, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Kenyon (excused), Hobbs, Reynolds

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #17, January 16, 2024, were approved as distributed.

Announcements and Communications, Part 1:

- **Admissions Standards** - Use of Standardized Tests for Admission Decisions – Dean Kahler, Vice Provost, Strategic Enrollment Management.

After reviewing AY 2022-23 admission standards, Vice Provost Kahler presented retention rates by high school (HS) GPA. **The data are attached to these minutes.** From Fall 2015 through Fall 2022, the retention rate with HS GPA of 3 and above has been around 80%, with a slight downward trend (81% in Fall 2015 vs. 77% in Fall 2022). The lack of SAT/ACT scores doesn't appear to change in a significant way the trends that we saw before waiving those scores.

Discussion:

In response to a question, Vice Provost Kahler noted that the HS GPA has been found to be a good predictor of success by other peer universities as well.

A senator cited the New York Times article "The Misguided War on the SAT" (nytimes.com) as an interesting take on the subject.

As for the slight decline in the retention rate of our best students (GPA 3 and up), the reasons can be diverse – sometimes they are non-academic, financial or family related. Additional analysis needs to be done on those trends to get better insight.

A senator is concerned that our current trend of lowering the standards and reducing barriers to entry to move students through may be seen unfavorably from the outside. Vice Provost Kahler responded that many campuses are having similar conversations. Next Monday, there is a meeting (Jean-Marc will be there) with the State Board (SB) staff to discuss our direct admit Idaho program. WSU has already dropped SAT scores from their admission standards. Provost Lawrence added that the SB is strongly committed to access and to educate more Idaho students, as demonstrated by the \$75M invested in the "Launch" initiative.

Provost Lawrence summarized the question before Faculty Senate: If we take no action, the current emergency action will expire and admission standards for Fall 2025 will revert to their pre-COVID status. If the Faculty Senate wants to act, the main question is whether dropping SAT scores caused large differences in retention and completion rates. The data suggests that it didn't. Vice Provost Kahler agrees.

Addressing a question about the current minimum GPA (which is 2.6, same as originally), the Provost noted that, with the current standards, a student with a GPA of 2.6 is directly admitted, whereas, in the former system, a student with a GPA of 2.7 would have not been directly

admitted if they had a low SAT score. So, the main question is: Are those students succeeding or do we need to be more careful with the group at the bottom?

Master Developer P3 Update – The project manager is Toni Broyles, Special Assistant to AVP, Cami McClure, Assistant Vice President, Auxiliary Services.

From campus-wide surveys, the issues that come up most frequently are pay, housing and childcare. With regard to housing, they are at the stage of research and analysis to provide recommendations. They are looking at housing for undergraduate (UG) students, graduate students (GS), married students with children (parenting housing), employees, and sometime in the future, retirees. They did an initial survey last year and one is on-going this year, for UG, GS, faculty and staff. The largest response rate is from employees. They are now pushing for a higher response from undergrad and graduate students. Toni asked to let students know about this feedback opportunity open to the entire campus.

Toni displayed a map showing the location of university housing. The “UG corridor” from Wallace Complex over to the LLCs is where UG, and some GS, predominantly live. Apartment living is on the so-called “South Hill,” the older part built in the 1960s and the newer in the 1990s. Those buildings are old, parking is limited, and so is access to emergency services. Nothing has been decided, as they are at the stage of preliminary design of some reconfiguration. The average age of our buildings is 53 years. As a future R1 university, and to be among the 25 top public residential universities (a priority for President Green), we need suitable on-campus housing. The plan is to keep UG housing where it is, and keep the amenities, such as food services, in the UG corridor. Also, some separation between graduate housing and parenting housing is appropriate. Future plans include a dedicated building for graduate and professional students. The university has recently procured the area where the Wells Fargo ATM used to be and some old railroad land nearby.

Units and departments work hard to bring the best faculty to campus, but when these new faculty come, they may not find suitable housing. It’s important to let them know that new faculty have at least one place to land when they first arrive. As part of their recruiting package, units/departments may consider showing to prospective faculty some of the apartments the university can make available as a landing place.

In summary, they are doing inventory and research analysis across the whole spectrum, from UG to Emeriti who wish to remain in contact with the university but seek a smaller, easy-maintenance residence.

Discussion:

To the question of our capacity, Toni replied that the final survey will provide more information. On the South Hill, in the future there will probably be about 250 beds for graduate and professional students and 150 for parenting housing. The UG sector will require mostly renovation of Wallace, Tower and Elmwood. There, is enough land plus the possible demo of Shoup and McConnecll, that we can expand up to 800 beds if needed. Furthermore, for the planned market rate employee housing, major employers in the area (SEL, Gritman, Pullman Regional) are experiencing similar problems when seeking to hire highly trained personnel who come to town but can’t find proper housing. Should we end up with more university employee housing than needed, renting living space to these local employers could be a source of revenue.

It was pointed out that extension students who come to the Moscow campus for a limited time also need a place to stay, in addition to housing in Southern Idaho. Toni responded that they are also considering setting aside space for visiting lecturers and extension people and for Study Abroad students.

A senator wondered whether establishing a relation with local “Airbnb” could help for short-term visitors. Toni replied that it could be an option (there 1,000 Airbnb in Moscow), but only for short-term living.

For any questions or feedback, reach out to Toni at tonibroyles@uidaho.edu

Chair’s Report:

- We just heard presentations about admissions and housing, which are important factors for the long-term evolution of the university. If the university grows, are we ready for more students? What kind of growth can we accommodate?
- These types of conversations reinforce the role of senate leadership as a place of dialog and shared governance. Please help us make our role more efficient and productive, by providing your feedback.

Provost’s Report:

- 10th day data on Spring semester enrollment will be available next week.
- UI’s legislative presentations begin this week and will take place over the next 1-2 months. This is a different schedule than previous year. Vice Provost for Faculty Diane Kelly-Riley sent a communication to standard pay faculty on 1/19/2024 about tentative deferred pay implementation. Please visit:

<https://www.uidaho.edu/provost/faculty/salary/deferred-pay>

Discussion:

A senator inquired whether deferred pay is a “done deal” as far as Faculty Senate involvement is concerned. The Provost responded that the implementation will likely require changes in FSH/APM and, thus, Senate will be involved. Implementation plans are ongoing and the President supports what’s being done. As a follow-up, the senator suggested making this point clearer on the webpage.

Changes to the Administrative Procedures Manual (non-voting):

- APM 45.09 Effort Reporting and Personnel Activity Reports – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.

Change of our effort reporting system and process needed to be reflected in the APM – from PAR to Effort Reporting, with the use of Banner.

Discussion:

There was a suggestion to clarify the meaning of “Hatch, Smith-Lever” in section B.

- APM 45.10 Facilities and Administrative (Indirect) Rate – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.

Update for consistent format, to clarify statements and applicability for location and type, and change ‘Public Service/Outreach’ to ‘Other Sponsored Activity’ per our last F&A rate agreement.

Discussion: None.

- APM 45.12 Sponsored Project Closeout and Recordkeeping Responsibilities – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.

Reformat to conform to standard APM style, clarify closeout and recordkeeping processes due to shift to electronic record keeping and other system changes. Mostly, changing nomenclature and formatting.

Discussion: None.

- APM 45.15 Subawards and Subcontracts – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.

Clarification of the subaward request and issuance process to include new requirements and processes. No substantial changes in responsibilities, monitoring, or timelines. Adding 2 CFR 200 in place of the A-121 and A-133 references, and formatting to standard APM format.

Discussion: None.

- APM 95.21 University Closures – Shane Keen, Clery Compliance Officer, Public Safety and Security.

Comprehensive review. Language clarified throughout.

Discussion: None.

Announcements and Communications, Part 2:

- FY24 CEC Summary – Kim Salisbury, Associate Vice President, Budget and Planning, DFA Budget and Planning.

Kim displayed a slide showing a summary of FY24 CEC. She went over the breakdown of the Gen Ed budget into various categories – across the board to address inflation, bring salaries up to 80% of target, merit funds, promotion and tenure increments, etc. The table also shows overall increase in salary over FY23; total merit increases; average starting percentage, average increase percentage, and average final percentage of target; number of CEC eligible and CEC non-eligible employees; number of employees receiving merit increases; number of employees brought up to 80% of target; number of eligible employees still below 80% of target.

The slide with the detailed data is attached to these minutes.

Discussion:

Kim explained how the \$600 for across-the-board increases came to be. Working backwards from the total Gen Ed budget, they addressed priorities such as raising salaries to 80% of target, then met other Gen Ed obligations. What was left, in steps of \$100, amounted to \$600 per FTE. Provost Torrey added that this year a percentage increase was recommended, rather than a flat number for all eligible employees.

Clarification was asked about the group of eligible employees still below 80% of the target. This is due to grant funding in a small number of areas.

- Parking – Steve Mills, Director, Parking and Transportation Services.

Availability: One of the aspects that senators wanted to discuss is the reason why in the Greek housing area, (Blake, Taylor, Sweet and 7th), all parking permits are purple or magenta. This is to provide parking to students who bring a car to campus. Some students also use the gravel area west of the Kibbie Dome.

The second question was about the cost and how it is determined: Since 2009, our parking permits have gone up about 40%, which is consistent with the nationwide increase, and less than 72% of the universities that they looked up.

Discussion:

Why not adopt a sliding scale, where the cost of the permit is commensurate to one's salary? Steve does not see this as an equitable solution. The university salary may be only one source of an individual's income. Also, with income-based permit costs, more employees will be able to purchase gold permits, which will create additional problems. Eventually, with this model, parking would become underfunded. Lots are very expensive to maintain.

Why should we pay for parking at all? Most employers provide parking. Vice President Foisy addressed this question. Parking must be a fully self-sustained, auxiliary operation by SB mandate. No Gen Ed funds can go into it.

Moscow is walkable and there is public transportation to campus, but what about people who live outside of Moscow? Are students promised a parking spot if they have a car on campus? Yes, they are, although -- Dean of Students Blaine Eckles added -- it's a challenge. They discourage students from bringing a car to campus.

The presentations on Computing Resources Available for Research, and the Report from the Ubuntu Committee were postponed due to the late hour.

New Business:

None.

Adjournment:

The agenda not being completed, the Chair called for a motion to adjourn. So moved (Tibbals, Mittelstaedt). The meeting was adjourned at 5:02pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

FY24 CEC SUMMARY

Snapshot as of 05.18.2023

| | Staff GenEd | Staff GenEd | Non-Staff Total | Faculty GenEd | Faculty GenEd | Non-Faculty Total | GenEd Total | Non-GenEd Total | Grand Total | Staff % of Total | Faculty % of Total |

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #18

Tuesday, January 23, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #17 January 16, 2024 **Attach. #1**
- III. Announcements and Communications, Part 1
 - Admissions Standards - Use of Standardized Tests for Admission Decisions – Dean Kahler, Vice Provost, Strategic Enrollment Management **Attach. #2**
 - P3 Update – Toni Broyles, Special Assistant to AVP Auxiliary, Cami McClure, Assistant Vice President, Auxiliary Services
- IV. Chair’s Report
- IV. Provost’s Report
- V. Committee Reports (non-voting)
 - APM 45.09 Effort Reporting and Personnel Activity Reports – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs **Attach. #3**
 - APM 45.10 Facilities and Administrative (Indirect) Rate – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs **Attach. #4**
 - APM 45.12 Sponsored Project Closeout and Recordkeeping Responsibilities – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs **Attach. #5**
 - APM 45.15 Subawards and Subcontracts – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs **Attach. #6**
 - APM 95.21 University Closures – Shane Keen, Clery Compliance Officer, Public Safety and Security **Attach. #7**
- VI. Announcements and Communications, Part 2
 - FY24 CEC Summary – Kim Salisbury, Associate Vice President, Budget and Planning, DFA Budget and Planning
 - Parking – Steve Mills, Director, Parking and Transportation Services
 - Computing Resources Available for Research – Lucas Sheneman, Director, Northwest Knowledge Network, Institute for Interdisciplinary Data Science, Joe Leister, HPC Systems Administrator, Institute for Interdisciplinary Data Science
 - Report from the Ubuntu Committee – Aleksandra Hollingshead, Department Chair, Curriculum and Instruction
- VII. New Business

VIII. Adjournment

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 17

Tuesday, January 16, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Tibbals.

Absent: Maas (excused), Hobbs, Miller, Reynolds, Shook

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #16, January 9, 2024, were approved as distributed.

Consent Agenda:

- Sabbatical Leave Committee Recommendations.
Approved by unanimous consent.

Chair's Report:

- Check out the Daily Register for interesting events coming up, such as: <https://www.kenworthy.org/events-calendar/backcountry-film-festival-2/> and
- <https://www.uidaho.edu/cogs/resources/workshops> (particularly the CIRTl workshop series).
- An important part of today's meeting is a conversation about the optional retirement plan (ORP), which in December 2024 is transitioning to Fidelity as the sole retirement plan provider, replacing TIAA and Corebridge Financial. We appreciate Brandi, Director of HR, visiting us today at short notice, to provide more information about the transition.

Provost's Report:

- Spring semester enrollment has remained stable.
- There are problems with broken pipes due to the frigid weather. We are grateful to Facility for their prompt intervention.
- Vice Provost for Faculty Diane Kelly-Riley announced the next faculty gathering, hosted by CBE in the Albertson Atrium, January 24, 2024, 4:30 – 6:30pm. Please RSVP at <https://www.uidaho.edu/provost/faculty-gathering>

Changes to the Administrative Procedures Manual (non-voting):

- APM 30.18 Change Management – Theresa Amos, Deputy Director, IT Planning and Initiatives, Office of Information Technology.
This policy establishes the mechanism for verifying and approving changes to university managed technology resources. Changes to information systems are required on both a regular and emergency basis to fix issues, add new functionality, address new security and compliance requirements, and improve the user experience. Due to the complexity of modern technology systems, such changes must be carefully reviewed, performed, and vetted as, if done improperly, can cause disruptions, weaken security postures, and cause a loss of data. To address this, as well as assist in the University's compliance requirements, this policy ensures

that: changes are performed in a way to minimize risks to the university; all security and compliance requirements remain enforced consistent with U of I standards and principles of least privilege and functionality; all impactful changes to technology resources are tracked and approved in a timely manner.

Discussion:

In response to a question about the timeline for communicating changes, Teresa Amos will Provide a link to the calendar with dates for the implementation of changes.

- APM 95.24 Vandal Alert Notification System – Lee Espey, Division Operations Officer, DFA Operations, Steve Mills, Director of Parking and Transportation Services.
Comprehensive review to clarify language throughout.
Discussion: none
- APM 45.03 Definitions for Grants, Contracts and Gifts – Sarah Martonick, Director, Office of Sponsored Programs (OSP), Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
While reviewing APM 71.52, the OSP team and the UI Foundation staff determined it should point to APM 45.03 and focused on revisions to APM 45.03. Revisions are minor, with no procedural additions, only clarifications and updates for use of TDX vs. PDF forms.
Discussion:
The Secretary proposed to modify the first sentence in APM 45.03 C-1 to read: *“A sponsored project is the result of an authorized proposal or application submitted by the university that results in an agreement between the university and the sponsor.”*
There was a brief discussion on the difference between a solicited process and a competitive one.
A senator inquired about potential impacts of these revisions, for instance, on workload.
Response: The OSP team has thought very carefully about volume and burden, for this and many other APM sections. They moved to TDX because it provides metrics on volume and a concrete measurement of turnaround time. It takes an average of 5 days for every item coming out of TDX. This is a significant increase, while the team reports spending less time for tracking. On the one hand, they would like to reduce the burden, on the other, they have regulations to comply with. They design their processes around best practices and try to achieve a good balance. Recently, a new person has joined the team, who will work on a mechanism for assessment and feedback to determine where actual measurable gaps are and what infrastructure needs to be added or modified.
The Secretary asked for clarification concerning the university having the obligation to provide a deliverable (APM 45.03 C-1). Response: As the contracted party in all sponsored projects, the university assumes the obligation in the agreement, but delegates it to the PI (see APM 45.06).
- APM 45.04 Notice of Sponsored Projects and Establishment of Budgets – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Comprehensive review is necessary to bring policies up to current requirements for sponsored project regulations, and to clarify Chart V nomenclature (budget vs. fund/index, etc.). Mostly, language revisions to comply with the recommendations from a prior NSF audit.
Discussion:

In response to a question, it was clarified that no changes in VERAS are needed as a consequence of these revisions. What's in VERAS will remain as is.

- APM 45.06 Allowable and Unallowable Sponsored Project Expenditures – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Comprehensive review is necessary to bring policies up to current requirements for sponsored project regulations, and to clarify Chart V nomenclature (budget vs. fund/index, etc.).
Discussion:
This item was briefly discussed together with APM 45.03. There were no further questions.
- APM 45.07 Cost Transfers on Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Like for the previous APM 45, change of nomenclature and clarification.
Discussion: none.

Announcements and Communications

- SUCCESS – Daniel Eveleth, Department of Business, Erin Chapman, School of Family and Consumer Sciences.
Daniel started with a brief introduction. SUCCESS is a task force charged by the President with identifying three initiatives with the objective of increasing our current six-year graduation rate of 61% to 77% (the average for R1 universities). The President's charge focuses on instruction- and curriculum-based initiatives for which there is evidence of success. The task force started with the Boyer Report and came up with six possible topics, see attachment #9. Note that the attached document contains a link to a feedback form for people to provide comments and suggestions. An important part of the feedback the team is looking for are success stories, namely, what is being done in departments/units that is working well. This way, the team can identify U of I strengths to build on and focus on those programs that are best for us. SUCCESS will come back to Faculty Senate later in the semester to discuss more targeted questions, as they may result from the collected feedback.
Discussion:
A senator noted that there are many UG research opportunities at the U of I, but we need more support and more people. The UG Research Office is understaffed and underfunded. Citing from her work with Ubuntu, Vice Chair Haltinner recalls that retention rates for white students are higher than for students of color. Some of her research indicates that a more creative, integrative and robust Gen Ed curriculum might help reduce the gap by addressing student needs with an individualized, holistic approach. Furthermore, with the first-year seminar gone, we must re-envision an appropriate first-year experience. Kristin added that the Diversity Scholar Program from Multicultural Affairs is doing very well – retention rate for students in that program is about 90%.
Back to the discussion of an appropriate first-year experience, a senator wondered whether the team is thinking about something like ISEM 101, or something discipline-specific and housed in a particular unit – in his department, first-year experience courses within the major are very important. Daniel responded that all feedback is welcome and valuable. The discussion later in the spring will be more targeted.
Chair Gauthier said that UG research should be compensated. Also, if available UG researcher positions were posted, it would be great for retention.

A senator reported a rather disappointing response to the many research opportunities she offered to her students in a large introductory math class.

- Vandal Gateway Program (VGP) Update – Annette Folwell, Associate Dean, College of Letter, Arts and Social Sciences, Brian Dulin, Program Coordinator, Vandal Gateway Program, Sean Quinlan, Dean, College of Letter, Arts and Social Sciences.
Sean Quinlan started with a brief introduction to the VGP and the team members. The presentation is attached to these minutes. The following points were addressed: The structure of the program (admission process, cohort nature of the student group, staff and faculty, some demographic data); Academic standing for AY 2022-23 and AY 2023-24; Persistence, Retention, and Awards for AY 2022-23 and AY 2023-24. They are pleased with the success of VGP (e.g. improvement in academic standing), and excited to work with a program that opens doors for students who would otherwise not be able to attend college.

Discussion:

A senator inquired about the consistency of the comparison – the data from AY 2022-23 are being compared with those from one semester of AY 2023-24. Annette Folwell replied that a comparison between data from two full academic years will be possible when the second semester of AY 2023-24 ends. The team would be happy to come back later in the spring.

- Optional Retirement Plan (ORP) – Brandi Terwilliger, Director of Human Resources.
Brandi provided a brief background on the upcoming (December 2024) change from TIAA-CREF to Fidelity as the sole vendor for ORP. This was a state-wide decision from SBOE. See FAQ at <https://boardofed.idaho.gov/resources/optional-retirement-plan-transition-to-fidelity-as-sole-retirement-plan-provider/>
The Idaho State Board of Education (SBOE) Retirement Plan Committee completed a multi-year, comprehensive review of the Idaho ORP. As a result of their review, they approved that Fidelity would become the sole provider of the administrative services for the ORP effective December 2024, replacing both TIAA and Corebridge. This choice will result in increased on-campus presence, and a 25% reduction in the fee to the participant.

Discussion:

A senator asked whether, because of the transition, there will be a lag in time during which our funds are out of the market. Response: We are working to make sure there is no lag. We expect a seamless transition.

In response to another question, Brandi clarified that supplemental plans do not need to be transitioned.

A senator argued that some constituents were angry at the lack of transparency, and because they had no say in the matter and no option. It would be helpful if university communications were more proactive than responsive. Brandi explained that, when this process started, before COVID, there was a lot of discussion about what to do for the best of our employees. The senator's comment about more proactive communication is reasonable. Provost Lawrence added that, in this case, the news was about an improvement for all.

In response to a request, Brandi will check out ratings for TIAA-CREF vs. Fidelity. She will also inquire about bitcoin.

A senator reported that Colorado State transitioned to Fidelity as well. His colleagues are happy with the change.

New Business:

None.

Adjournment:

The agenda being completed, the meeting was adjourned at 4:55pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

**University
of Idaho**

VANDAL GATEWAY PROGRAM (VGP) ANNUAL REPORT

DEAN SEAN QUINLAN

ANNETTE FOLWELL, ASSOCIATE DEAN

BRIAN DULIN, VGP COORDINATOR

**COLLEGE OF LETTERS, ARTS, AND
SOCIAL SCIENCES**

VANDAL GATEWAY PROGRAM

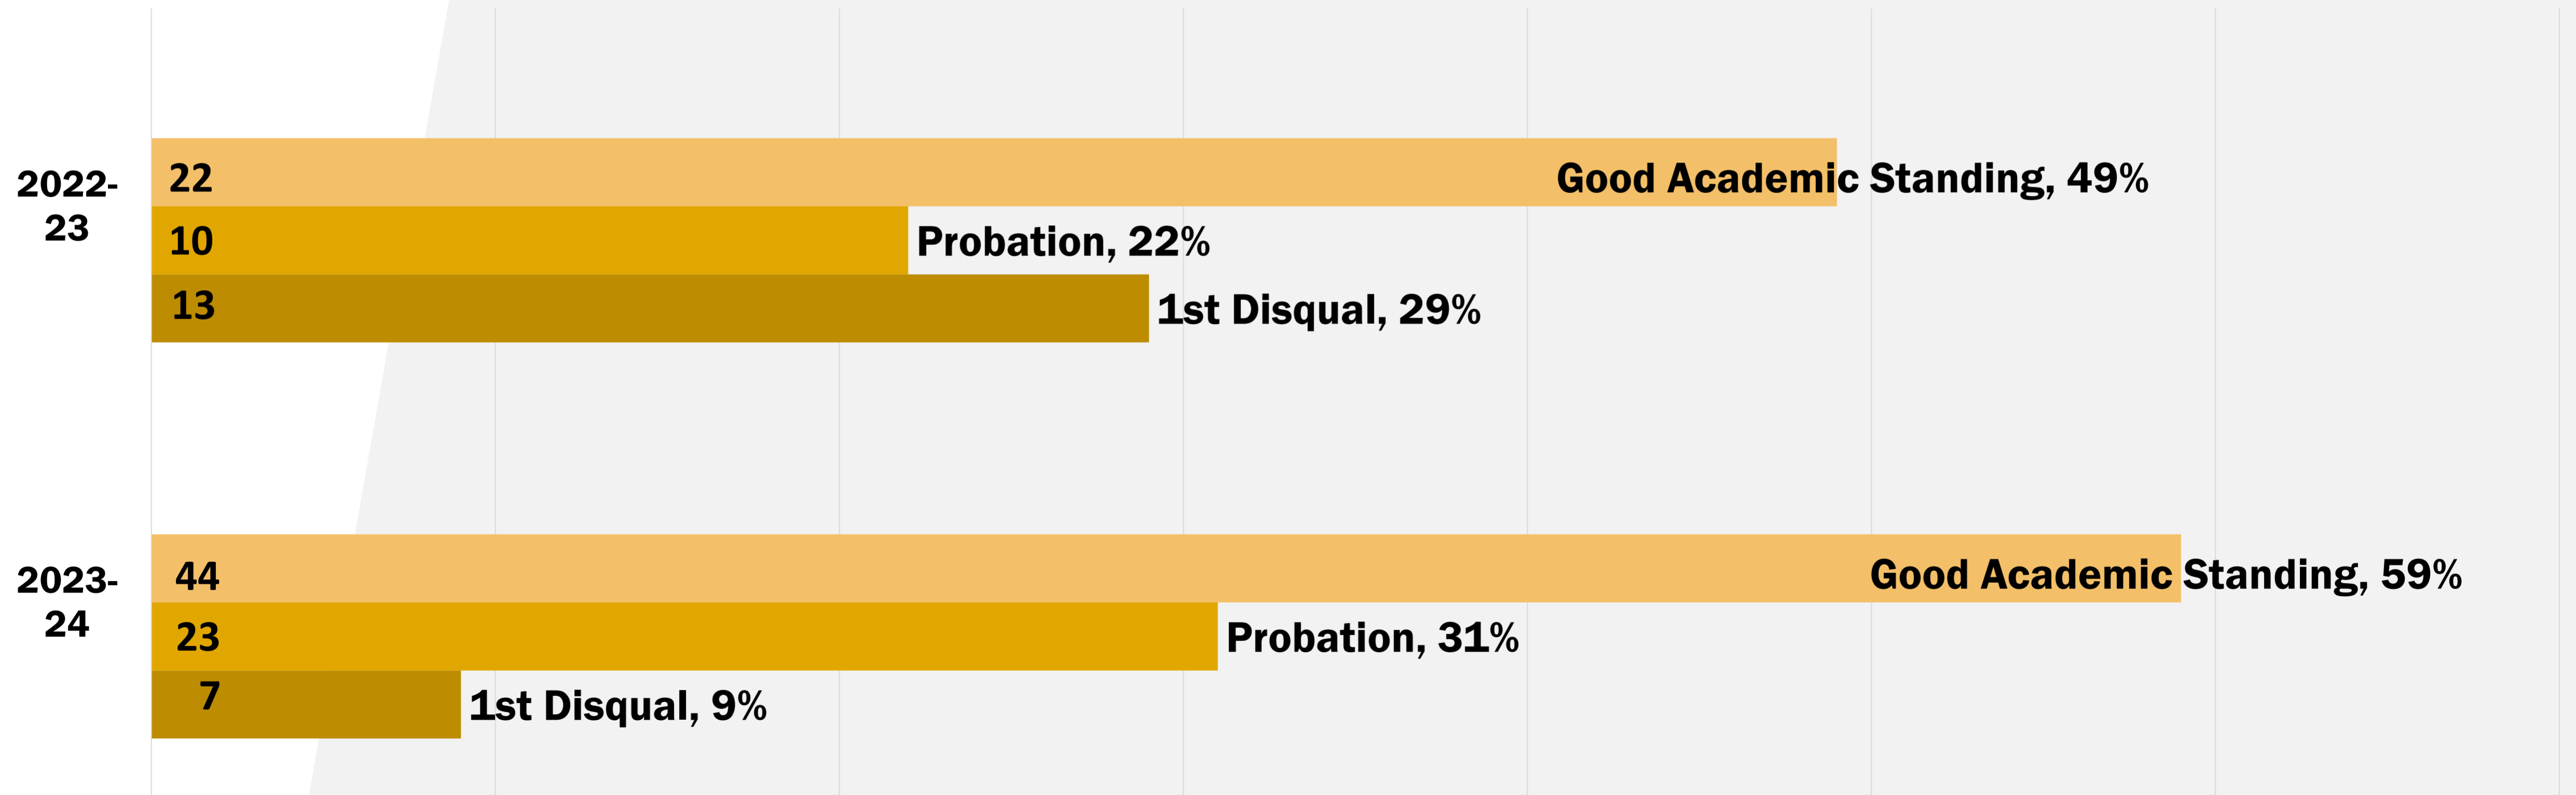

- I Allows students slightly below our usual admissible standards to be directly admitted to UI (2.3-2.59 GPA)
- I For their 1st year, students take General Education courses along with courses in their anticipated major
- I VGP has dedicated staff and faculty that advise, mentor, and teach students
- I After 1st year, VGP student transfer to their chosen major
- I 75% of VGP students served are Idaho residents
- I 48% of VGP students served are first-generation college students

ACADEMIC STANDING

I AY 2022–23: 45 VGP students (47 attended but 2 withdrew)

I AY 2023–24: 77 VGP students (84 attended but 7 withdrew)

PERSISTENCE, RETENTION, AND AWARDS

AY 2022-23:

- 88% persisted from fall to spring and 50% were retained for Fall '23
- 5 additional students returned for the Spring '24 semester (three Fall 22 students did not attend in Fall '23, but returned spring '24 and two spring '24 students did not attend fall '23, but returned spring '24)
- 3 students transferred to other institutions
- 9 students achieved a 3.0 or higher GPA and earned CLASS one-time awards

AY 2023-24:

- 85% persisted from fall to spring
- 2 students transferred to another institution
- 20 students achieved a 3.0 or higher GPA and earned CLASS one-time awards

WINS, LESSONS, AND LOOKING AHEAD

- I All the right pieces are now in place:
 - Direct admissions policy, well-qualified and effective VGP Coordinator hired, and additional faculty and advisor hired
- I Significant improvement in student achievement (10% increase of Good Academic Standing and 20% decrease in 1st DQ)
- I VGP opens doors for students who otherwise could not attend college
 - VGP serves multiple colleges and increases overall UI enrollments
 - Students who transfer from UI, while not ideal, are success stories
- I Financially self-sustaining and remained within original budget
- I Develop a process for VGP students to be considered for **Idaho Opportunity** or **Go Idaho** scholarships after completion of first year

University
of Idaho

UNDERGRADUATE ADMISSION STANDARDS

INSTITUTIONAL RESEARCH

22-23 CATALOG ADMISSION STANDARDS

1. Submit ACT or SAT scores if available. New first-year students entering in 2022 or 2023 who are unable to sit for an ACT or SAT exam due to COVID-19 will automatically be considered for admission if their cumulative unweighted GPA is 2.60-4.00. Those who have cumulative GPAs of 2.30 - 2.59 who are unable to sit for an exam will be admitted through the [Vandal Gateway Program](#). Students in this GPA range are also welcome to appeal through our [Admissions Committee](#). **Every student who has a test score is encouraged to provide it for admission as well as class placement.**
2. Graduate from a regionally accredited high school with a combination of cumulative GPA¹ and test scores² as defined in the following table:

| High School GPA | ACT Composite | SAT Evidence-Based Reading & Writing + Math (SAT taken March 2016 and after) | SAT Critical Reading + Math (SAT taken prior to March 2016) |
|-----------------|----------------|--|---|
| 3.00 - 4.00 | Any test score | Any test score | Any test score |
| 2.60 - 2.99 | Any test score | Any test score | Any test score |
| 2.50 - 2.59 | 17 - 36 | 910-1600 | 830-1600 |
| 2.40 - 2.49 | 19 - 36 | 990-1600 | 910-1600 |
| 2.30 - 2.39 | 21 - 36 | 1070-1600 | 990-1600 |
| 2.20 - 2.29 | 23 - 36 | 1140-1600 | 1070-1600 |

22-23 CATALOG ADMISSION STANDARDS

I Either achieve a 2.6+ High School GPA or obtain a lower GPA with an increasing, sliding scale test score

I The vast majority of incoming new frosh have a 2.6 High School GPA or better

| High School GPA | ACT Composite | SAT Evidence |
|-----------------|----------------|----------------|
| 3.00 - 4.00 | Any test score | Any test score |
| 2.60 - 2.99 | Any test score | Any test score |
| 2.50 - 2.59 | 17 - 36 | 910-1600 |
| 2.40 - 2.49 | 19 - 36 | 990-1600 |
| 2.30 - 2.39 | 21 - 36 | 1070-1600 |
| 2.20 - 2.29 | 23 - 36 | 1140-1600 |

| Fall Term | Frosh Cohort Total | No ACT / SAT | Pct No Test | Had HS GPA 2.6+ | Had 2.6+ (%) |

- 1. Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.
Change of our effort reporting system and process needed to be reflected in the APM – from PAR to Effort Reporting, with the use of Banner.
- 2. Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?
None – we moved to using Banner last year.
- 3. Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.
None
- 4. Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

45.09 -- Effort Reporting and Personnel Activity Reports (PARs)

December 2018 (rewrite) Certifications

A. General Purpose. The University of Idaho (University) is required by federal regulations (2 CFR 200.430) and accounting standards to ensure that the allocation of compensation for all employees accurately reflects the work performed by these individuals in connection with sponsored projects. This document sets forth University policy for the commitment and verification of effort expended by university employees on sponsored projects.

B. Scope. This policy is applicable to all non-temporary employees whose time is charged as a direct cost to sponsored projects, whether as a direct cost or as cost share or is charged to other Federal funds (Hatch, Smith-Lever, etc.). ~~Definitions.~~

C. Definitions: ~~B~~

C-1. Cost Sharing. The portion of the total project costs for a sponsored project that is borne by the University rather than the sponsor. See [APM 45.08](#) for definitions of types of cost share.

BC-2. Effort (also referred to as "actual effort"): ~~the~~The time spent in pursuit of a particular activity and expressed as the percentage of one's University appointment devoted to one or more activities.

BC-3. Effort Reporting. ~~the~~The process ~~through~~by which the University verifies and documents that the effort expended by an employee corresponds with the effort he or she has charged to or contributed to (as cost share) sponsored activity.

BC-4. Institutional Base Salary (IBS). ~~the~~The annual compensation paid by the University to an employee, irrespective of the nature of the activities in which the employee is engaged while fulfilling the requisites of their appointment; e.g. research, instruction, service, and administration. IBS excludes any income that an individual may earn outside of the University or income earned as additional compensation for duties outside of their primary appointment. Note that administrative stipends for Chair, Dean, or other similar roles are included in the IBS definition. The IBS for each faculty member or employee is enumerated in the ~~faculty member's~~ annual salary letter or as an amendment during the appointment period. Charges for work performed on sponsored projects are only allowable at the IBS rate. (See 2 CFR 200.430)

BC-5. Person mMonths. ~~the~~The method typically used in sponsored project applications to express the amount of effort that the Principal Investigators (PIs), other faculty, or key employees devote to a specific project, expressed in terms of time rather than a percentage of one's appointment.

D. Policy. Effort reporting begins at the proposal stage and is ultimately accomplished through review and verification of eEffort rReports.

D-1. ~~C~~-Federal rRequirements. Failure to produce reasonably accurate estimates of effort, or to otherwise comply with federal cost requirements, can result in financial penalties, expenditure disallowances, withholding of future sponsored project awards by an agency, and damage to the reputation of the University. Providing inaccurate estimates of effort, whether knowingly or through carelessness or mismanagement, may be regarded as fraud and may subject the University and the certifying individual to civil proceedings and criminal prosecution.

~~D-2. D. Policy.~~ Effort reporting begins at the proposal stage and is ultimately accomplished through review and verification of Effort Reports.

~~D-1.~~ **Proposal stage.** When preparing proposals for sponsored projects, the primary responsibility for establishing a reasonable estimate of the effort necessary to carry out the project rests with the PI.

a.) In determining the amount of effort that will be devoted to the proposed project, the PI must consider existing effort commitments to other sponsored projects, University duties associated with ~~his or her~~their appointment, and the ability of other key project personnel who are to be involved in the project to make contributions of effort necessary for its success.

b.) In addition to ensuring that ~~the~~ proposed effort commitment conforms to University expectations and policy, the PI must also make certain that it is consistent with the parameters established by the sponsor.

~~Faculty Staff Handbook~~FSH 3120, ~~Faculty Obligations during Period of Appointment~~3120 ~~Faculty Obligations During Period of Appointment;~~ 3140, ~~Performance Expectations for Faculty;~~ FSH 3260, Professional Consulting and Additional Workload, FSH 5600, Financial Disclosure Policy, FSH 5650, Financial Conflicts of Interest in Public Health Service Research, and FSH 6240 Conflicts of Interest and Commitment provide additional information in regards to calculating the appropriate amount of effort to propose on sponsored programs.

c.) While federal agencies may require that proposed effort be expressed in terms of person months, the University requires that employees verify actual effort expended in terms of percentages of effort. -The Office of Sponsored Programs (OSP) will assist with the translation of effort between these two methods.

d.) Calculating effort using a percentage basis fosters employee compliance with effort reporting requirements by encouraging an individual to estimate ~~his or her~~their effort on a given activity as a percentage of ~~his or her~~their total University activities rather than as a fraction of a fixed time-period (such as the forty-hour week). -This process acknowledges that some fluctuation in effort levels is inherent in the conduct of academic activities.

D-23. Award sStage. Once a sponsor makes an award, the provisional effort commitments included in the proposal become mandatory, and the oversight and reporting of effort for faculty and staff associated with the award becomes required.

a.) Because effort reporting is based on payroll records, it is crucial that Electronic Personnel Action Forms (EPAFs) are accurately and expeditiously completed and entered into the payroll distribution system. -Salary allocations associated with a new award must be reviewed and approved by the PI-(s) for the project prior to the entry of this information into EPAFs. -Awards that are close to ending also need to be monitored to ensure EPAFs are completed ~~to~~that remove employees from these projects in a timely manner.

b.) Consistent with committed effort, distributions of salary on sponsored project or cost sharing accounts should coincide with the commencement of actual effort by the employee on the sponsored project.

D-34. Effort Reporting.

a.) Drawing on data from the university payroll distribution system, the **eEffort rReport** allows an individual to review payroll salary allocations, represented as percentages of total effort, and to indicate whether the allocations reasonably correspond to ~~his or her~~ the individual's actual percentage of effort expended on each project or activity.

b.) Semi-annually an **eEffort rReport** will be electronically generated for and made available online to each employee whose compensation was partially or totally charged to or committed as cost sharing to a sponsored project.

c.) Reported effort must be as accurate as possible. -Up to five percent variance above or below the estimated effort for any given project is permitted without requiring modification of salary allocations.

d.) In cases in which actual effort differs from estimated effort by more than ~~five (5)~~ 5 percent or a project or activity is missing from the **eEffort rReport**, the employee shall notify the appropriate Department Grant Administrator that a change may be necessary to realign salary and effort.

e.) Effort **rReports** must be completed within ~~thirty (30)~~ working days of the date they are released to the employee.

1.) If circumstances occur that are outside the university's control (e.g. weather conditions, power loss, etc.) the date for the **eEffort rReport** completion may be adjusted accordingly.

2.) Effort **rReports** must be completed by the individual whose effort is being reported or by a person who has a suitable means of verification (direct and personal knowledge) of the effort expended.

(a) i) ~~PIs and Co-PIs should certify their own effort reports. -PI's, providing they have they have PIs with~~ PIs with direct knowledge, can certify the **eEffort rReports** of the employees working on their sponsored projects, but employees should complete their respective effort reports, if possible. The Principal Investigator listed in the FRAGRNT form in Banner will be responsible for completing effort reports for each graduate assistant working on their grant(s).

(b) ii) Department Grant Administrators, or other administrators, are not presumed to have the requisite means of verification; they may complete effort reports only if they have a written and signed confirmation of effort by an individual with direct knowledge of the activities of the person for whom the report was generated and only when that individual is unavailable to complete the **eEffort rReport**.

(c) iii) If extraordinary conditions preclude a faculty member from completing their **eEffort rReport**, and no written and signed confirmation of effort can be obtained, the faculty member's unit administrator or college dean will determine the best means for verification of effort expended and an appropriate proxy will be entered in the effort report system.

3.) Failure to certify **eEffort rReports** in a timely manner may result in suspension of activity on any or all sponsored projects involved and limit the ability of the noncompliant individual to apply for other sponsored project funding.

Comprehensive review? Yes No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Update for consistent format, to clarify statements and applicability for location and type, and change ‘Public Service/Outreach’ to ‘Other Sponsored Activity’ per our last F&A rate agreement.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None – applicable timeframes and policy remains the same

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

45.10 -- Facilities and Administrative (Indirect) Rate

A. Purpose. The purpose of this policy is to outline the process by which the University determines the applicable indirect (F&A) rate for a sponsored projects.

B. Scope. This policy is applicable to all sponsored project funding.

C. Definitions

C-1. Indirect rate. Facilities and administrative (F&A) costs are those costs incurred for common or joint objectives and which therefore cannot be identified readily and specifically with a particular sponsored project, an instructional activity, or any other institutional activity (2 CFR 200 Appendix III.A.). These costs are real costs borne by the University in support of sponsored projects, and which the University is entitled to collect from sponsors. Due to the difficulty of assigning F&A costs directly, approximately every four years the University negotiates an F&A (also known as "indirect cost" or "overhead") rate with the University's cognizant federal agency, the Department of Health and Human Services (HHS).

C-2. Project types. A project shall be categorized based on a determination of the "best fit" within the project types defined below. The Office of Sponsored Programs (OSP) shall be responsible for the final determination, if the project is difficult to classify.

a. Instruction. The instruction category includes all teaching and training activities that are part of an institution's instructional program. Instruction includes the following activities: 1) credit and noncredit courses; 2) community education programs; 3) academic, vocational, and technical instruction; 4) remedial and tutorial instruction; and 5) regular, special, and extension sessions.

b. Organized research. The organized research category includes the research, development, and research training activities of an institution. Research is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. Development is defined as the systematic use of knowledge and understanding gained from research, directed toward the production of useful materials, devices, systems or methods including design and development of prototypes and processes. Training individuals in research techniques is classified as research when the activity utilizes the same facilities as other research activities and such activities are not included in the instruction function. Organized research includes all research and development activities that are externally sponsored by federal and non-federal agencies and organizations, as well as internally-funded University research that is project-based, proposal-driven, competitive, and separately budgeted and accounted for.

c. Other sponsored activity (including public service/outreach). This category is used for those projects that cannot be assigned to either a) or b). The public service category involves activities that primarily supply a benefit to the public or a specific segment of the public that is external to the institution. Examples of these activities include, but are not limited to, noninstructional community service programs, broadcasting services and cooperative extension services. Included in this category are conferences, institutes, general advisory services, reference bureaus, testing services, radio and television, consulting, and similar noninstructional services to particular sectors of the community.

C-3. Project location. Location is determined by evaluating where the majority of the work will be performed.

a. On-campus projects. Projects where the work is being performed in University-owned, -leased, or -operated facilities.

b. Off-campus projects. A project may be designated as "off-campus" if more than 2/3 of the work occurs at locations other than University-owned, -leased, or -operated facilities and the indirect costs associated with physical plant and library are not considered applicable. An off-campus rate may also be used if a project is conducted in leased space and the lease costs are directly charged to the project (leased space is normally considered to be on-campus). Projects will not be subject to more than one indirect cost rate. If determined to be off-campus, the off-campus rate will apply to the entire project.

c) Agricultural and forestry research stations (experiment stations). These activities are organized research activities with two-thirds or more of activity effort occurring at any of the experiment stations listed at the [Rates, Forms, and Resources Definitions](#) page on the ORED website.

C-4. Administrative. That portion of the F&A rate associated with central, unit, and research administration. This portion of the F&A rate is applicable to all sponsored projects, whether on- or off-campus (see definitions in C-3).

C-5. Facilities. That portion of the F&A rate associated only with on-campus activity (see C-3.a.), such as depreciation, interest, utilities, library, etc.

D. Policy. It is the policy of the University that, absent specific written sponsor limitations, all sponsored projects must budget and include the appropriate F&A expense based on both the type of project (research, instruction, or other sponsored activity) and location where the majority of the work is being done (on- or off-campus). Waivers of F&A may only be granted by the Vice President for Research and Economic Development or their designee. Because F&A waivers essentially shift the cost burden to the rest of the University, they are granted infrequently.

E. Procedure

E-1. F&A cost study. The process for establishing F&A rates begins with the F&A cost study. This process involves analyzing all University expenditures for the purpose of assigning expenditures to either direct or indirect cost pools.

a. Indirect cost pool allocations. Indirect cost pool allocations end up as the numerators of each type of negotiated F&A rate, and include both facilities and administrative costs.

Facilities costs (see C-5) include:

- Building depreciation
- Equipment depreciation
- Capital improvements to buildings and land
- Operations and maintenance of plant
- Non-capitalized interest on capital expenditures
- Library costs

Administrative costs (see C-4) include:

- Unit administration
- Research administration
- Computer use charges
- General university administration
- Staff and spouse educational benefits

b. Direct cost pool allocations. Direct cost pool allocations include all costs that can be identified specifically to a given project or activity, and end up as the denominators (direct bases) for the F&A rate calculation. Examples of costs that are often considered to be direct are salaries and wages, benefits, travel, materials and supplies, etc. By their nature, these costs can be easily and directly assigned to particular projects or activities with a high degree of accuracy. These costs are generally allocated on the basis of Modified Total Direct Costs (MTDC) and by type of project (see C-1 above). MTDC is the total of all direct costs less the following exclusions: equipment over \$5,000, capital expenditures, charges for patient care, tuition remission, rental costs of off-site facilities, participant support, scholarships, and fellowships as well as that portion of each sub-grant and subcontract issued in excess of \$25,000.

(The UI calculates on- and off-campus rates for each of the project types defined in C-1 above).

E-2. F&A space survey. In addition to the cost study, the University must also complete a space survey, which provides the basis for a more accurate allocation of indirect costs to project types. Cost-benefit considerations do not allow for a survey of all of the buildings in the University system. The survey is focused on units that are likely to have the highest amount of space and overhead devoted to research activities. The survey requires unit coordinators to carry out a number of tasks, the goal of which is to determine functional-use (project type) percentages for all rooms being surveyed. The tasks include, but are not limited to, the following:

- Discovering or confirming room occupants.
- Verifying space measurements.
- Walking through unit space in order to interview principal investigators and other room occupants.
- Entering data related to room occupants, functional use percentages and research accounts for rooms having a research component into WebSpace (Space Survey Tool from Maximus).

After an F&A Study is completed, the calculated rates and supporting documentation are submitted to HHS for review and negotiation. The University negotiates "predetermined" F&A cost rates. These rates are final and not subject to upward or downward adjustment for actual costing experience during the multi-year period for which the rates are in effect. By negotiating a stable F&A cost rate in a multi-year agreement the University avoids the disruptions and costs associated with continual audits and annual negotiations. Rates are typically negotiated for four-year periods, but that does not mean that a given project type will have the same rate for all four years.

45.12 – Sponsored Project Closeout and Recordkeeping Responsibilities

December 2018

A. Purpose. To identify the responsibilities and processes for completing sponsored project closeouts.

B. Scope. This policy applies to all sponsored projects.

C. Definition of closeout. Closeout is the process by which all required invoicing and financial accounting and reporting; all technical reporting; and all non-financial/non-technical reporting required by the award is completed.

D. Policy. It is the policy of the University to prepare and submit all required closeout documents within the time-frame specified by the terms and conditions of the award document.

~~**A. General.**~~ To ensure proper award termination procedures, the Office of Sponsored Programs (OSP), the unit, and the principal investigator (PI) have each been designated specific responsibilities. Typical regulatory or contractual requirements for sponsored research projects include final technical reports, invoices, financial reports, patent reports, and property reports, ~~which. These reports~~ are usually required to be submitted within 30 ~~to 90~~ 120 days of the project end date. ~~Because of such the requirements are contractual in nature and delinquent reporting can affect the ability of the University to receive future funding,~~ it is important that closeout activities are finalized in a timely manner. ~~[rev. 12-18]~~

~~**B. Policy.**~~ It is the policy of the University to prepare and submit all required closeout documents within the time ~~period specified by the terms and conditions of the award document.~~ **E. Procedure.** Beginning approximately three (3) months prior to the award termination, OSP will provide units ~~and PIs~~ with notifications that serve as reminders of required actions and responsibilities for timely award closeout. ~~Non-compliance with University required actions may result in disallowed expenses.~~ ~~[rev. 12-18]~~

C. Process/Procedures. Departmental grant administrators (~~DGADGAs~~) and PIs should work together to review and verify the following to OSP ~~via email; that in written form:~~

- ~~That~~ all accrued expenses have posted to Banner;
- ~~That~~ no expenses incurred after the end date have posted to the award; and
- ~~That~~ all expenses are applicable to the project.

Failure to respond to requests for confirmation of expense review will result in the submission by OSP to the sponsor of a final invoice based on what has posted to the Banner accounting system, net ~~any disallowed expense. A list of expenditures that have posted to the project can be viewed via the Banner report FWRITEM.~~ ~~[rev. 12-18]~~ of any disallowed expenses.

EE-1. Revised Circumstances/circumstances. If there are extensions of time ~~required in order to complete the project or increased funding pending, anticipated (i.e. for multi-year projects)~~ the unit shall notify OSP immediately. ~~[rev. 12-18]~~ If extensions of time are being requested from the sponsor, appropriate prior approval processes must be followed. (See APM 45.14).

EE-2. Expense Changeschanges. Information on ~~additional known project~~ expenses that have not yet posted to Banner and ~~need that are requested~~ to be included on the final invoice, must be submitted to the OSP Financial Unit by the due date specified in the "notice to final invoice" emailed ~~at award termination.~~ ~~[rev. 12-18]~~ near award termination. This due date is usually a minimum of 15-30

days prior to the due date for final invoicing or financial reporting to allow for sufficient processing time.

~~EE-3. No Changes-changes Requiredrequired.~~ If there are no corrections, the final invoice and financial report (~~if~~when required) will be prepared from the information available in Banner. The GADGA must verify the accuracy of the Banner numbers to the OSP Financial Unit by the due date specified in the "notice to final invoice" that is emailed at~~near~~ award termination. If there is no response, the invoice and report will be submitted to the granting agency based on the allowable expenses posted into Banner. ~~[ed. 12-18]~~

~~CE-4. Limited Revised-revised Final-final Invoices-invoices and Reportsreports.~~ If revisions are needed after the final invoice has been submitted to the sponsor, ~~OSP~~the Director of OSP or Assistant Director of Sponsored Accounting will evaluate whether to resubmit the final invoice ~~and/or~~ financial report on a case-by-case basis. ~~[rev. 12-18]~~

~~C-5. Closeout Letter and Statement of PI Responsibility.~~ ~~When an award has terminated and all financial reporting has been completed, a "Closeout Letter and Statement of PI Responsibility" is forwarded to the PI, and the DGA. This letter outlines revision is subject to approval by the final financial numbers submitted and indicates any items pending completion.sponsor.~~

~~E-5. Recordkeeping responsibilities.~~ For audit purposes, documents relating to the award must be kept for three (~~3~~) years, or longer if specified by the award terms. ~~The audit files maintained by OSP consist at a minimum of the following items: [ed. 12-18]~~

The audit files maintained by OSP consist at a minimum of the following items:

- Original proposal and any additional supplemental proposals.
- Award notices and any amendments.
- Invoices and financial reports.
- Cost sharing records.
- Compensation confirmation (personnel activity~~effort~~ reports or other mechanism) and payroll cost transfer~~labor redistribution~~ records.
- Property/equipment reports and patent reports.
- ~~Subcontract and service agreement~~Subaward documentation.

In addition, the ~~unit~~PI/Unit is required to maintain the following audit information:

- Technical reports (progress and final).
- Supporting documentation for cost transfers, inventory, and all expenditures.
- Miscellaneous correspondence regarding the project(s).

~~DF. Contact Informationinformation.~~ Any questions regarding closeout procedures for sponsored projects should be addressed to the Office of Sponsored Programs at 208-885-6651 or ~~osp@uidaho.edu. [ed. 12-18]~~osp@uidaho.edu.

45.15 – Subawards and Subcontracts

February 14, 2017

A. General. ~~This section applies to all~~ **Purpose.** A sponsored project ~~subawards or subcontracts which may be issued~~ include programmatic work being done by ~~the University of Idaho (University) to other~~ qualifying institutions for the purpose of completing some portion of the sponsored project work, ~~entities (subrecipients).~~ These subrecipients are responsible for conducting their portion of the work in conformity with the laws, regulations, and terms and conditions that govern the prime award funding to the University. The University, via its faculty and staff, is responsible for monitoring subrecipients for both programmatic and fiscal compliance. To satisfy federal regulations, all subawards and subcontracts issued, regardless of the funding source, must be managed consistently with this section. ~~[rev. 2-12]~~

Note: For

B. Scope. This section applies to all sponsored projects that include subawards and/or subcontracts issued prior to December 26, 2014, by the provisions ~~University of~~ OMB Circular A-133, Audits Idaho to other qualifying institutions for the purpose of ~~States, Local Governments, and Non-Profit Organizations, may apply in lieu of 2 CFR Part 200.~~ ~~[add. 2-17]~~ completing some portion of the work on a sponsored project.

C.

B=Definitions:

BC-1. Subaward/~~Subcontract~~:subcontract. An ~~award~~ agreement provided by a prime award recipient or a pass-through entity to a subrecipient for the purpose of having the subrecipient to carry out part of the ~~Federal award receive by the pass-through entity~~ programmatic work required under the award. For the purposes of this APM section the term "subaward" will be used to refer to both subawards and subcontracts. ~~[rev. 2-12, 2-17]~~

BC-2. Subaward ~~Agreement~~:agreement. A contractual obligation on the part of the subrecipient to perform a portion of the scope of work funded by an outside sponsor. Such agreements not only identify the work to be conducted by the subrecipient, but also provide and establish the applicable laws and regulations, flow-down provisions from the prime award, and any other terms and conditions that the subrecipient must meet. ~~[add. 2-12]~~

BC-3. Subrecipient: ~~A non-Federal.~~ An entity that receives a subaward from a pass-through entity to carry out part of a Federal program sponsored project; but does not include an individual that is a beneficiary of such program. Subrecipients may be educational institutions (domestic or foreign), non-profit organizations, ~~or~~ for-profit organizations, and occasionally Federal agencies. Individuals, including those who are beneficiaries of a subaward, are not considered subrecipients. Per federal regulations, individuals are considered vendors and therefore require a different contract mechanism. For assistance with determining the appropriate contract mechanism for a vendor relationship, contact Purchasing Services. ~~[ren. & ed. 2-12, rev. 2-17]~~

BC-4. Vendor: A dealer, distributor, merchant, or other seller who provides goods or services to many different purchasers within their normal course of business. ~~Goods and services purchased from a vendor may be used in support of a sponsored project, but are not considered a substantive contribution to the programmatic effort.~~ ~~[ren. & ed. 2-12]~~

BC-5. Pass-through Entity: ~~A non-federal~~ entity. An entity that has received funding and that issues a subaward to a subrecipient to carry out a sponsored project. ~~The pass-through entity may be either a primary or a subaward recipient.~~ ~~In functioning as a pass-through entity an institution assumes responsibilities more typically associated with an award sponsor.~~ ~~The University is considered a pass-through entity for each subaward that it issues.~~ ~~[ren. & ed. 2-12, ed. 2-17]~~

ED. Policy. ~~A subaward may be issued by the~~The University, acting as either the prime award recipient or a pass-through entity, may issue a subaward to an eligible subrecipient in support of a sponsored project. The scope of work to be carried out by the subrecipient must involve substantive programmatic effort or decision making that is beyond mere analytical work for hire. It must be of such significance to the project that the collaborator at the subrecipient institution will participate in the preparation of results, publication ~~and/~~ or presentation of the project. In most instances the work will be accomplished by the personnel of the subrecipient, and will use the subrecipients' facilities and resources. (See Section ~~DE~~ for additional clarification on the difference between subcontracts and procurement of services). A written subaward agreement shall be used to formalize the relationship between the University ~~as the prime institution or pass-through entity,~~ and the subrecipient. ~~{add. 2-12, ed. 2-17}~~

ED-1. Federal Requirements. Federal regulations, 2 CFR Part 200 ~~(effective December 26, 2014),~~ identify the "pass-through entity" as the administrative mechanism by which federal funds awarded to one institution may be distributed to another institution as a subaward. 2 CFR Part 200 requires institutions acting as pass-through entities (e.g. issuing subawards) to assume administrative and monitoring obligations similar to those of a federal agency overseeing the activity of a primary recipient ~~[2 CFR Part 200.331].~~ These responsibilities include, but are not limited to: ~~{ren. & ed. 2-12, ed. 2-17}~~

- ~~conducting~~Conducting risk assessments of potential subrecipients;
- ~~advising~~Advising subrecipients of all applicable federal laws and regulations, and all flow-down terms and conditions from the primary award;
- ~~regularly~~Regularly collecting and reviewing subrecipient technical and fiscal performance reports;
- ~~performing~~Performing on-site visits, as deemed necessary;
- ~~analyzing~~Analyzing audit reports as required by 2 CFR 200 and other such audit reports filed by subrecipients; ~~{rev. 2-17}.~~
- ~~evaluating~~Evaluating any corrective actions proposed by subrecipients in response to audit findings;
- ~~assessing~~Assessing and enforcing sanctions for subrecipients in cases involving the inability or unwillingness to undergo required audits or correct ~~non-~~noncompliant activity.

Defects in either the management of the subaward by the subrecipient or of the administration of the subaward by the pass-through entity may subject the pass-through entity to substantial penalties. ~~{ed. 2-12}~~

~~D. Process/Procedures:~~

~~DE. Procedure~~

E-1. Proper Classification of Subawards. A critical first step in the administration of subawards is the proper classification of the transaction as a subaward (as opposed to another type of procurement action such as a service/consulting agreement or a purchase order) at the proposal stage of a project. ~~Incorrect classification may result in the Principal Investigator (PI) having insufficient funds to successfully complete the proposed scope of work. It may also create significant delays in processing the subaward and may, in rare cases, endanger the viability of the project.~~ ~~{ed. 2-12}~~

At the time funding is first requested from a sponsor the PI has primary responsibility for determining the correct classification of costs associated with services provided by third parties. ~~The Office of Sponsored Programs (OSP) should be contacted with any questions regarding proper classifications of transactions.~~ ~~{ed. 2-12} and will determine the final classification when needed.~~

The University uses the characteristics outlined in 2 CFR 200 as a starting point when classifying subawards and other procurement transactions. ~~[ren. & ed. 2-12, 2-17]~~

- a. Subawards.** Some of the factors which may result in the University categorizing funds to be issued to a third party as a subaward, and the third party as a subrecipient include, but are not limited to: ~~[ren. & ed. 2-12]~~
- ~~the~~The programmatic involvement of the third party is identified as a separate scope of work, with a separate budget and separate approval by the third party~~;~~.
 - ~~the~~The third party's performance is measured against the objectives of the sponsored project~~;~~.
 - ~~the~~The third party has responsibility for programmatic decision making~~;~~.
 - ~~the~~The third party assumes responsibility for adherence to any applicable program compliance requirements of the sponsor~~;~~and.
 - ~~the~~The third party will use funds to carry out a sponsored project for the University, as opposed to providing goods or services.
- b. Procurement.** Factors that may result in the University categorizing funds to be issued to a third party as a procurement action, and the third party as a vendor, include, but are not limited to: ~~[ren. & ed. 2-12]~~
- ~~the~~The third party provides the goods or services within its normal business operation~~.~~.
 - ~~the~~The third party provides similar goods or services to many different purchasers~~.~~.
 - ~~the~~The third party operates in a competitive environment~~.~~.
 - ~~the~~The third party provides goods or services that are ancillary to the operation of the sponsored project~~.~~.
 - ~~the~~The third party is not subject to the compliance requirements of the sponsor~~.~~.

DE-2. Proposal of a Subaward.~~[ren. & ed. 2-12]~~

- a. Determination of the Need for a Subaward.** The PI is responsible for ~~deciding~~determining whether a subaward or other procurement action is necessary for the success of a University-sponsored project. The PI, with the guidance of OSP, is also initially responsible for determining which funding mechanism and classification is appropriate for the third-party activity proposed ~~(. See Section DE-1 above).~~~~[ren. & ed. 2-12, rev. 2-17].~~
- b. Selection of a Subrecipient.** Selection of a subrecipient by a PI must be based on ~~his or her~~the PI's assessment that the subrecipient ~~has the ability to can~~ perform the required research successfully. This assessment should address the subrecipient's past performance, technical resources, and financial viability and results of previous audits, as well as the reasonableness of the subrecipient's proposed costs for the work to be conducted under the subaward. ~~[ren. 2-12, rev. 2-17]~~

In order to assist the PI in the evaluation of the proposed subrecipient and to facilitate the proposal process, the University requires the subrecipient to provide the following documents prior to submission of the proposal to the prime sponsor~~;~~, or when the need arises after proposal submission. This list is not ~~a~~-comprehensive ~~list~~ and additional documents may be required of the subrecipient by the University prior to proposal submission ~~and/or~~ subaward issuance. ~~[rev. 2-12, 2-17]~~

- Statement of the scope of work to be undertaken by the subrecipient. This scope of work must be approved by the University PI.

- Budget and budget justification. -This must include the direct and indirect costs of the subrecipient, calculated using the subrecipient's approved F&A and fringe benefit rates, and confirming any committed cost sharing. ~~It is~~ subject to ~~the any~~ limitations of the prime sponsor. The budget provided by the subrecipient must be approved by an individual authorized to contractually commit the institutional resources of the subrecipient.
- Letter of support from the subrecipient's institutional official indicating its commitment to perform the scope of work proposed, assuring the accuracy and reasonableness of the budget and any cost share commitment, and agreeing to enter into a subaward; if the proposal is funded. ~~See the Forms section of the OSP website for the University's Letter of Support form. [ed. 2-12]~~
- All sponsor-required representations, certifications, and assurances of compliance (e.g., Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions, etc.) by the subrecipient institution.
- A subrecipient commitment form ~~documenting may be required to document~~ the subrecipient's eligibility to receive federal funding and compliance with required federal regulations. ~~[add. 2-17]~~
- Additional documentation ~~as~~ required by program sponsor (e.g., certification of cost or pricing data, biosketches of key subrecipient personnel, etc.).

These documents are expected to conform to all sponsor requirements ~~that~~ ~~apply~~ ~~applicable~~ to the University's proposal. - PIs must also ensure that all materials provided by the proposed subrecipient are in the required format. - PIs are encouraged to coordinate with OSP to ensure that the subrecipient materials provided are compliant with University and sponsor guidelines and regulations. - For complex proposals involving multiple subrecipients, each subrecipient must provide the documentation listed above; and each subaward will be evaluated separately, based on the information provided.

The PI must request that the subrecipient submit its proposal documents at least two (2) business days before the PI is required to submit the ~~remainder of the~~ University's proposal to OSP ~~(see D. See E-2-.c.iv.-).~~. This will allow both the PI and OSP sufficient time to review the documents and make any required changes before the proposal is due. ~~[rev. 2-12]~~

c.) Considerations when incorporating the subrecipient proposal into the University proposal. ~~[ren. 2-12]~~

i.) Facilities and ~~Administrative~~ ~~Administrative~~ (F&A) Rates ~~rates~~ ~~for~~ ~~Proposals~~ ~~proposals~~ ~~including~~ ~~Subawards~~ ~~subawards~~. Proposals including subawards include (at least) two types of F&A costs ~~unless F&A is not an allowable cost~~: Subrecipient F&A costs and University F&A costs. A subrecipient is expected to apply its own federally-negotiated F&A rates and direct-cost ~~bases~~ ~~base~~ in the preparation of its budget, unless a lower rate has been authorized by the subrecipient's institutional official or the F&A rate is limited by the prime sponsor. If the subrecipient has a federally-negotiated rate, a copy of the subrecipient's federally-negotiated F&A rate agreement must be ~~submitted prior to proposing the subaward.~~ ~~[ren. & ed. 2-12, rev. 2-17]~~ ~~provided.~~

If a subrecipient does not have a federally-negotiated F&A rate, the University will not allow F&A costs over the ~~deminimus~~ ~~de minimus~~ 10% MTDC rate prescribed in 2 CFR Part 200.414 ~~to be included within the subrecipient's proposal~~, unless a rate can be negotiated between the subrecipient and the University. The Cost Accounting Unit of OSP is responsible for the negotiation of F&A rates with subrecipients who do not have a federally-negotiated rate. ~~[rev. 2-12, 2-17]~~

Any waiver of University F&A costs associated with a subaward requires the prior approval of the Vice President for Research and Economic Development or delegate pursuant to FSH 5100 J-1 and APM 45.10 D-C. ~~{rev. 2-12}~~

ii.) Audit Requirements~~requirements~~ **for Proposals**~~proposals~~ **including Subawards**~~subawards~~. If the proposed subrecipient is subject to 2 CFR 200, it must provide a complete copy of its most recent independent audit used to meet 2 CFR 200 audit requirements, or a link to its audit record at the Federal Audit Clearinghouse, prior to issuance of a subaward. OSP, in accordance with its responsibility for assessing the risk level of the subrecipient, must review the audit and verify that there are no findings that may negatively impact the proposed University award. ~~{ed. 2-17}~~

iii.) Subaward Conflicts~~conflicts~~ **of Interest**~~interest~~. The University must ensure that there are no conflicts of interest involved in awarding funding to the subrecipient, and that any situation that could result in a conflict is reported and managed, if appropriate to do so, consistent with FSH 5600, 5650, 6240, and ~~FSH 3170~~3170. In addition to Conflict of Interest as defined in FSH ~~6240~~6240, Conflict of Interest in relation to subrecipients shall also include situations where i) the University PI has ownership or substantial equity in the subrecipient; or ii) the University PI (or a member of his or her family) will receive individual gain from such an arrangement. Subawards shall not be authorized until a disclosure of the potential conflict of interest is filed and a management plan is approved pursuant to FSH 5600, 5650 and 6240. In certain circumstances, investigators for the subrecipient may also be required to submit disclosures of significant financial interests and comply with ~~University policies on and University application of~~ federal regulations for financial conflict of interest. Subrecipient must also certify that ~~they have~~it has a compliant conflict of interest policy under 2 CFR Part 200.112 and for EPA funding, subrecipient must comply with EPA's Conflict of Interest policy and 2 CFR Part 200.318. ~~{ren. & rev. 2-12, 2-17}~~

iv.) Administrative Review~~review~~ **of Proposal**~~proposal~~: OSP reviews the University proposal and ensures that all items required ~~offrom~~ the subrecipient are included. It may be necessary for OSP to clarify costs or other items with the University PI or the subrecipient. In order to allow adequate time for administrative review, all proposals must be submitted to OSP no less than four ~~(4)~~ business days prior to the sponsoring agency's formal submission deadline. ~~{ren. & ed. 2-12}~~

d.) Inclusion of an Unanticipated Subaward~~unanticipated subaward~~ **after Submission**~~submission~~ **of Proposal**~~proposal~~. In certain ~~cases~~instances, a PI may determine that a subrecipient is necessary to complete the performance of a project ~~for which~~after a proposal has already been submitted ~~or an award received~~. PIs seeking to add a subrecipient to a submitted proposal or awarded project must provide OSP with the information and institutional authorizations normally required of a subaward at the proposal stage. Because such changes to a proposal can affect the scope of work, methodology, ~~and~~or budget for a project, the PI should work through OSP to gain the authorized approval of the sponsor. ~~-See APM 45.14~~. Subawards will not be issued without sponsor approval, unless such approval ~~is~~requirements are expressly waived by the sponsor. ~~{ren. & rev. 2-12, rev. 2-17}~~

DE-3. Issuance of a Subaward~~subaward~~. Upon the receipt of a fully ~~executed~~ prime award from the sponsoring agency, the PI and OSP shall collaborate in the preparation of the subaward ~~agreement~~. ~~{ren. 2-12}~~

a.) Unit Requisition. ~~At the request of the PI, the Unit will prepare a University requisition to encumber the funds, using the expense codes E5171 for funding up to \$25,000, and E5172 for funding greater than \$25,000. This requisition, and the subsequently generated purchase order, will go through the Banner approval process. [ren. & ed. 2-12]~~

b.) Subaward Request Form- initiation. ~~The Subaward Request Formticket, including the relevant attachments, on the OSP website and the approved requisition or purchase order provide OSP with the information necessary for the issuance of a subaward.- The subaward will incorporate the terms and conditions of the prime award, as well as the approved scope of work and budget and any terms and conditions specific to the subaward itself. -If the scope of work and/or budget for the subrecipient changes, that updated information must be provided to OSP. [ren. & rev. 2-12, rev. 2-17]~~

The Subaward Request Formticket may be prepared by the PI or DGA (or delegate) for submission to OSP at any time, but ~~should not be forwarded it is recommended that this is done at accounting (index) setup to OSP for issuance until the completed and approved requisition number can be included. [rev. 2-12] allow the process to begin in a timely manner.~~

eb.) Subaward Reviewreview by the Office of Sponsored Programs. ~~-Once OSP has received the Subaward Request Form and a purchase order has been approved in Bannerticket with the necessary attachments and information, OSP will re-verify that the University is entering into an agreement with a qualified and eligible entity, and assess the "risk level" associated with entering into an agreement. [ren. & rev. 2-12]~~

If a subrecipient is subject to audit under 2 CFR 200, it will generally be considered low risk, unless there are unresolved audit findings that might negatively affect its performance under the subaward. ~~SubawardsSubaward agreements~~ for subrecipients considered to present a moderate or high risk to the University will include terms providing additional scrutiny of the subrecipient over the course of the contract, pursuant to 2 CFR ~~Part~~ 200.331. For subrecipients determined to be "moderate" risk, this may include periodic invoice reviews and annual desk reviews. Subrecipients considered to be "high risk" will be contractually required to provide vendor receipts and payroll reports along with their invoices and may not be allowed to rebudget without prior written approval from the University. Subaward terms for high-risk subrecipients will also oblige the subrecipient to submit to biannual desk reviews to ensure that funds are expended properly, and other compliance obligations are met. If determined to be appropriate, a change in high-risk status may be granted after two years. Invoice reviews and desk audits are conducted by the OSP Cost Accounting Unit. [rev. 2-1, 2-17]

dc.) Special Considerations-considerations. ~~When dealing with foreign institutions, for-profit entities, and small businesses, additional considerations may need to be addressed by the PI and the OSP Contract Review Officer (CROUnit (CRU) (or delegate) during the preparation of a subaward. [ren. & ed. 2-12, rev. 2-17]~~

i.) Foreign Subrecipients-subrecipients. ~~Because some federal statutes, regulations and agency procedures may not apply to foreign subrecipients, special care must be taken to ensure that a subaward with a foreign entity contains all terms and conditions necessary to contractually establish the appropriate obligations of the subrecipient and to provide a mechanism for their enforcement. -As with subawards to domestic entities, any terms and conditions specific to the prime award must be flowed down to the subrecipient.~~

ii.) For-Profit Entities—profit entities. Subawards issued to for-profit entities may include terms and conditions different from, or in addition to, those included in subawards to non-profit entities. Specific cost principles and administrative requirements are necessary when working with for-profit entities. Because some sponsors are prohibited by statute, agency regulations, or organization charter from extending funding support to for-profit entities, the prime recipient of an award may need to obtain the approval of the sponsoring agency prior to any collaboration with a for-profit entity. *[rev. 2-17]* See APM 45.14.

iii.) Small-Business Subrecipients—business subrecipients. Issues involved in subawarding to small businesses are often a hybrid of the issues mentioned above. As for-profit entities, subawards for small businesses must contain terms and conditions flowed down from the prime award. However, these entities may not be familiar with federal requirements and thus may require additional information regarding compliance. [This information can be provided by the PI, DGA, or OSP depending on the specific information requested.](#)

ed.) Subaward Issuance—issuance. After review, OSP will prepare the subaward agreement and forward it to the subrecipient for review and signature by the subrecipient's authorized official. *[ren. & ed. 2-12]*

DE-4. Post-Award Stage—issuance. Once the subaward is in place, the PI and OSP will jointly monitor the activity of the subrecipient to ensure programmatic progress and compliance. -OSP will provide a copy of the executed subaward to the PI and the [Departmental Grants Administrator \(GADGA\)](#) or College Finance Director to facilitate the monitoring process. *[ren. & ed. 2-12, rev. 2-17]*

a.) Programmatic and Other Monitoring—other monitoring by the PI. - The University PI bears primary responsibility for monitoring and evaluating the progress of the subrecipient toward fulfilling the programmatic goals and following any required procedures established by the subaward. -This responsibility requires that the PI: *[ren. & ed. 2-12]*

i.) Maintain regular contact with the subrecipient [in order so as](#) to verify that the terms and conditions of the subaward are being satisfied. - The PI should have a thorough understanding of the prime and subaward terms and conditions to ensure the subrecipient's adherence to the subaward provisions. -OSP will serve as a primary point of reference for the PI regarding questions on terms and conditions, and will collaborate with the PI in answering subrecipient questions related to the terms and conditions, federal regulations, resolution of disputes, and issues related to breach of contract. *[ren. & ed. 2-12]*

ii.) Monitor the substantive progress of the subrecipient by monitoring its progress against the scope of work and any deliverable deadlines included in the subaward. -If programmatic progress is unsatisfactory, or if required technical reports or other deliverables are not produced in a competent and timely manner, the PI must work with OSP to address these issues with the subrecipient, documenting any issues raised and their resolution. -If subrecipient performance continues to be inadequate, the PI must notify OSP, which will formulate remedial actions to be taken by subrecipient or impose sanctions. *[ren. & rev. 2-12]*

iii.) Personally review and approve invoices submitted by the subrecipient, indicating that the quantity and quality of work completed for the period covered by the invoice was acceptable, and that it was performed in accordance with any timetable included in the subaward. -By this approval, the PI also affirms that the expenditures for the subrecipient's portion of the project are reasonable, allowable, and allocable as

defined by 2 CFR Part 200 Subpart E. -Entailed in the review of subrecipient invoices is an evaluation of the subrecipient's effort reporting and cost sharing contribution (if such commitments are included in the subaward) and of its application of the appropriate F&A rate. *[ren. & ed. 2-17]*

Note: If a PI is not able to provide review and approval of the invoice in person, via email, fax, or other means of written communication, the PI may provide a written authorization for a person with firsthand knowledge of the technical performance of the subrecipient to sign during the period of unavailability. -Notwithstanding the above, in the event of extraordinary circumstances, such as a dispute in relation to payment, OSP may sign off on and process an invoice for payment. -In such event, OSP shall verify that payment to the subrecipient is warranted based on performance and factual circumstances. *[ren. & ed. 2-12]*

iv.) Verify that any human subject, animal use, biosafety, or other compliance approvals required by the work performed by the subrecipient are properly secured and maintained for the life of the subaward. -If the subrecipient experiences a lapse in such approvals, the subrecipient is responsible for notifying the University. -If the PI obtains knowledge of such lapse, they must notify OSP immediately. *[ren. & ed. 2-12]*

v.) Ascertain whether the scope of work and/or budget for the subaward must be modified in order to allow additional time, funding, etc. -If the PI determines that alteration of the subaward is required, timely notice must be provided to OSP. *(see D. See E-6, Subaward Modifications)*. *[ren. & ed. 2-12]*.

vi.) Assist OSP in communicating with the subrecipient concerning any questions that may arise during the performance of the subaward and with audit inquiries. *[ren. & ed. 2-12]*

Please see FSH 5100-H on obligations of the PI pertaining to the conduct of research supported by sponsored projects. *[ed. 2-12]*

b.) **Fiscal ~~Monitoring~~-monitoring.** Fiscal monitoring of the subaward is a responsibility shared by the PI, departmental grant or unit administrator *(DGA)*, college or unit finance director, and OSP, with primary responsibility resting with the PI. -Invoices approved and signed by the PI should be submitted to the unit administrator or college finance director for tracking of expenses and cost share. The invoice is then forwarded to OSP for review before being submitted to Accounts Payable. -OSP uses submitted invoices as one means of monitoring compliance with award terms and conditions. *[ren. & rev. 2-12]*

c.) **Compliance ~~Monitoring~~-monitoring.** As a prime recipient and a pass-through entity of federal awards, the University is required to monitor the activities of subrecipients to ensure that their portions of sponsored projects are performed in compliance with federal regulations, 2 CFR 200.501 audit requirements, and the provisions of the award and the subaward. In addition to the ongoing monitoring of subrecipient invoices, OSP regularly reviews subrecipient audit reports and, if necessary, performs desk reviews to ensure compliance. *[ren. & ed. 2-12, ed. 2-17]*

DE-5. Corrective ~~Action Plans~~action plans and ~~Sanctions~~sanctions.

a.) **Corrective ~~Action~~action.** If an audit reveals that the subrecipient is not in compliance with federal regulations, audit regulations, or provisions of the subaward, OSP will issue a management decision on the audit findings. If the subrecipient has already taken steps to correct the finding, this will be so noted in the management

decision. The management decision will state whether a finding is sustained, explain the reasons for the conclusion, and identify both the corrective action to be taken by the subrecipient and the timeframe in which this action must be completed. The subrecipient is responsible for developing and implementing measures to correct all audit findings and must submit the corrective action plan to OSP for use when assessing subrecipient conformance with 2 CFR 200 requirements. OSP will approve the proposed action plan and will modify the plan as it deems necessary to rectify the audit finding. The PI and unit will be informed of subrecipient noncompliance and will be asked to assist in monitoring the implementation of the approved corrective action plan by the subrecipient. (See 2 CFR Part 200). ~~[ren. & ed. 2-12, ed. 2-17]~~

b.) Sanctions. -OSP may impose sanctions on the subrecipient for its failure to: undergo an audit in keeping with 2 CFR 200 requirements and/or special terms and conditions of the subaward agreement; undertake the performance of the subaward with reasonable diligence in adhering to applicable federal and state regulations and subaward terms and conditions; and/or submit or carry out a corrective action plan. Under such circumstances, OSP may withhold payment, withhold or disallow overhead costs, or suspend the subaward until necessary corrective measures are taken by the subrecipient. If resolution of identified issues does not occur within ~~ninety (90.)~~ days, OSP will notify the subrecipient that it has ~~thirty (30)~~ days to comply or it will be considered ~~to be~~ in breach of the subaward agreement and the agreement will be terminated. ~~[ren. & ed. 2-12, ed. 2-17]~~

~~DE-6. Subaward Modifications.~~ modifications. While the terms and conditions of a subaward usually are fixed for the duration of the contract, it may become necessary to modify terms and conditions of the subaward in order to ensure the success of the entire project. ~~Should~~ be it ~~is~~ determined that amendments to the subaward are necessary, the PI must first contact OSP ~~in order~~ to determine whether the University has the authority under the prime award to alter the subaward. - If the University does not have this authority, the PI will need to work with OSP to obtain approval for the proposed subaward modification(s) from the sponsor. -When a modification is required, the PI shall complete and submit a Request for Subaward Amendment ~~Form~~ ticket to OSP. ~~If additional funding is being provided, a Change Order to the existing purchase order must be completed in Banner prior to the modification being completed.~~ -After OSP receives the request form ~~and the change order has been processed in Banner, if required,~~ OSP will prepare an amendment to the subaward, incorporating the approved modifications into the subaward and will send the amendment to the subrecipient. A copy of the subaward amendment will be provided to the unit once it has been fully executed. ~~[ren. & ed. 2-12, ed. 2-17]~~

~~DE-7. Subaward Closeout.~~ closeout. A subaward is considered closed when its performance period has come to an end and all of the conditions of the subaward have been fully met. ~~Before a subaward can be closed out the following tasks must be completed:~~ ~~[ren. & rev. 2-12]~~

- An invoice marked as "final" and certifying that all costs were made in accordance with the subaward conditions must be received within the ~~contract~~ contractual deadline.
- Before signing off on the invoice, the PI must verify that any required technical reports have been completed and obtained and that all provisions of the subaward have been fulfilled.
- Any closeout reports required by the prime sponsor (e.g. invention disclosure, property) must be received.
- Disposition of any equipment purchased under the subaward must be finalized. -A determination must be made on whether this equipment may be vested with the subrecipient, or if title remains with the prime sponsor or the University.

Payment of the final invoice may be withheld until all required documents and deliverables have been received and approved. ~~[ed. 2-12]~~

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

Comprehensive review. Language clarified throughout.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

To be effective immediately upon approval.

95.21 - University Closures

A. Rewrote in October 2017

General Purpose. ~~This policy describes how the University may close its facilities i~~n the event of a reported emergency or a weather-related emergency, or if an emergency situation appears imminent, ~~the Executive Director of Public Safety & Security, or designee, may make a recommendation to the President, or designated senior officer, for taking the appropriate action. The action could include the cancellation of classes and/or the closure of a university facility.~~

B. Scope. This policy ~~covers~~ applies to all University of Idaho ~~all~~ facilities, sites, and campuses ~~located around the State occupied, or used by, University of Idaho (UI) employees.~~

CA. Definition of s

A-1. ~~e~~Essential Personnel personnel. ~~Essential personnel is defined as~~ UI employees designated by unit administrators to be critical to the continuation of key operations and services in the event of a suspension of operations.

A-2 Consideration of Conditions:

A decision to close a university facility may be based on any, or all, of the following ~~conditions~~ factors:

- a. ~~Weather information gathered from official weather reports and forecasts. In most cases, university facilities will not close for winter conditions unless there is a severe weather event or hazardous conditions.~~
- b. ~~Decisions from city, county, regional, and state agencies.~~
- c. ~~Local police and county sheriff's departments surrounding the affected campuses and facilities.~~
- d. ~~Consultation with UI Office of Public Safety and Security (OPSS) and Facilities Services.~~

DB. Policy. When conditions necessitate, a university facility may be closed or its opening delayed. The decision to close or delay opening a university facility is at the discretion of the President, or designee. In the event of a university closure, only designated essential personnel will be allowed to remain on campus, or occupy a closed university facility.

DB-1. Supervisor Jurisdiction jurisdiction. Individual units do not have independent authority to make decisions concerning university-University facility closures, postponements, ~~and~~ or cancellations; however, supervisors do have the authority to approve requests from employees who wish request absence or early release with the use of annual leave or comp time (if applicable) from work due to severe weather conditions. (See FSH 3470.)

DB-2. Administrative Emergency Closure Leave ~~leave~~ **with Paypay**. When the President, or designee, makes a decision to close, cancel classes, or postpone opening any ~~university~~ **University** facility, ~~administrative emergency closure~~ leave for the affected employees (~~non-essential personnel~~) will be determined pursuant to **FSH 3470** and **3710** as applicable.

DB-3. Locations other than Moscow. ~~Subject to the provisions of B-5 herein~~ **At locations other than Moscow**, ~~the~~ location executive officer, or designee, will make a recommendation, to the President, or designee, to close the facility(s). After approval, the executive officer, or designee, will contact **UI Office of Public Safety and Security (OPSS)** **OPSS** and provide information on the nature of the event, affected locations, recommended actions (closure, delayed opening), duration of action, and any other relevant details.

a. Coeur d'Alene (CDA) campus. University of Idaho CDA facilities may be closed due to a North Idaho College (NIC) closure. In the event of a NIC closure, the CDA executive officer or designee will notify the President or designee and OPSS.

b. Idaho Falls (IF) campus. University of Idaho IF facilities may be closed due to an ISU-Idaho Falls (ISU) closure. In the event of an ISU closure, the Idaho Falls executive officer or designee will notify the President or designee and OPSS.

c. Co-located UI offices. University of Idaho offices co-located with federal, state, or county offices may be closed due to a building closure. In the event of a closure, the UI executive officer at the co-located facility or designee will notify the President or designee and OPSS.

DB-4 Consideration of Conditions:

A decision to close a ~~u~~University facility may be based on any, or all, of the following factors:

a. Weather information gathered from official weather reports and forecasts. In most cases, ~~u~~University facilities will not close for winter conditions unless there is a severe weather event or hazardous conditions.

b. Relevant guidance ~~Decisions~~ from city, county, regional, and **federal and state agencies** authorities.

c. Advice from local police and county sheriff's departments surrounding the affected campuses and facilities.

d. Consultation with UI Office of Public Safety and Security (OPSS) and Facilities Services.

Exceptions:

~~**a. Coeur d'Alene (CDA) Campus.** University of Idaho CDA facilities may be closed due to a North Idaho College (NIC) closure. In the event of a NIC closure, the CDA executive officer, or designee, will notify the President, or designee, and PSS.~~

~~**b. Idaho Falls (IF) Campus.** University of IF facilities may be closed due to an ISU Idaho Falls (ISU) closure. In the event of an ISU closure, the Idaho Falls executive officer, or designee, will notify the President, or designee, and PSS.~~

~~**c. Co-located UI Offices.** University of Idaho offices co-located with federal, state, or county offices may be closed due to a building closure. In the event of a closure, the UI executive officer at the co-located facility, or designee, will notify the President, or designee, and PSS.~~

2023 – 2024 Faculty Senate – Pending Approval Approved at Mtg #20
Meeting # 19 Feb. 6, 2024
Tuesday, January 30, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Maas, McKenna, Murphy, Ramirez, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Blevins (excused), Raney (excused), Mittelstaedt (excused), Long.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #18, January 23, 2024, were approved as distributed.

Chair Gauthier proposed to change the order of the agenda, because Aleksandra Hollingshead cannot speak later due to a conflict. The proposal was approved by general consent.

Announcements and Communications:

- Report from the Ubuntu Committee – Aleksandra Hollingshead, Department Chair, Curriculum and Instruction.

Aleksandra is the chair of Ubuntu. Her visit's main purpose is to share information about the 2024 MLK Jr. Art and Writing contest. The deadline for (digital) submission is February 16, 2024, by 5pm. Please share with students in your departments or units. To commemorate the life, work and legacy of Dr. Martin Luther King Jr., University of Idaho undergraduates, graduates and professional students enrolled for the 2024 spring semester at any U of I location are invited to create a written work or piece of art in any medium of their choice about equality and social, racial and ethnic justice. The contact person is Caitlin Cieslik-Miskimen, caitlinc@uidaho.edu. They are working on securing some funds for the student awards.

<https://www.uidaho.edu/student-affairs/ubuntu/mlk-art-and-essay-contest>

She also wanted to share with Senate some concerns about the Ubuntu committee, perhaps to be delegated to the Committee on Committees. The concerns are about structure, fast turnover (length of service), and confusion about attendance expectations. Over 50% of the members are non-voting ex-officio delegates from the different diversity units, which is good. However, because of misunderstanding of attendance expectations, people work in silos. The committee needs better coordination. If the purpose of Ubuntu is to support diversity work focused on students, perhaps we should reconsider the committee structure and establish clear communication channels with the diversity and inclusion staff.

Vice Chair Haltinner noted that the Committee on Committees is in the process of auditing all committees. She reached out to Yolanda Bisbee with some suggestions about the committee make-up.

Responding to a charge from Senate on specific tasks, Ubuntu reached out to the Registrar's Office multiple times to ask that students be allowed to use their preferred names on their diplomas but didn't receive a response. They contacted the Admission Committee about more inclusive statements on the admission page but didn't hear back. They have been looking into more equitable language in position postings and search committee work. These plans are now on hold until the end of the legislative session. One successful area is the committee work with

IPO to provide more clarity in the communication system with international students about scholarships available to them.

Chair's Report:

- Brandi sent responses to some of the questions about the State Board switching from TIAA to Fidelity, namely, Optional Retirement Plan Transition to Fidelity:
 - Rankings: Fidelity is a mutual fund company and does not hold reserves in a general account, so ratings are not applicable.
 - Bitcoin: Fidelity made some announcements about making bitcoin investments available through retirement plans. This will not be an option for the ISBOE plans. Currently the self-directed brokerage is limited to mutual funds and therefore bitcoin is not (and will not be) an option for this plan.
- There was a critique from a senator about the Talking Points (TP). We think that the TP are very important to engage constituents and get immediate feedback about what was heard and discussed during the Faculty Senate meetings. The TP do not replace the minutes. We will put a disclaimer at the bottom of the TP to clarify that they are not intended to replace approved minutes.

The Faculty Secretary followed up. She confirmed that traditionally TP have been a quick and informal way to let constituents know about the current issues senate addresses weekly and to stimulate interest to know more from the supporting documents. Requiring that TP be approved by all senators before going out would defeat their purpose. She encouraged feedback.

Provost's Report:

- U of I was founded January 30, 1889, so it's 135 years old today!
- Tomorrow at 12: 30 in the ISUB Lobby: McNair Research Expo. Check it out if you can, it should be very interesting work.
- 10th day enrollment was measured last week. It indicated an increase of 6.8% over the same point in time last spring. The final number will probably be smaller, because dual credit registration data may have come in earlier than last spring (dual credit timing is different depending on the school district). The final number is expected to be an increase in the range of 3-5%.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 508 Microelectronics Fabrication – Feng Li, Electrical & Computer Engineering, Attach. #2.
The scheduled speaker was not present. Senator Roberson offered to say a few words and answer questions. The courses required for the certificate will provide students with specialized knowledge and skills in microelectronics fabrication and prepare them for careers in the industry.
Vote: 22/22 yes. Motion passes.

Jeff Seegmiller introduced the new medical program to which the following UCC items belong. In the state of Idaho, there is a shortage of medical professionals, poor health care, and a high suicide rate. We rank 50th in the country in the number of mental health professionals and health professionals. They are proposing a novel medical program to meet

critical needs in the state and save lives. Jeff Seegmiller is enthusiastic and grateful to all who have contributed to this important effort.

- UCC 549 Master of Science in Gerontology – Thomas Farrer, Associate Program Director, Medical Education Program (WWAMI), Attach. #3.
Generally, the number of people above 50 years of age is growing; between 2012 and 2030, it is predicted that this population will grow by 33%. We need a workforce to meet the needs of this growing population.
Discussion:
Chair Gauthier asked whether the program is multidisciplinary. Response: Yes, it covers many areas of aging, such as elder care, elder law, etc.
A senator inquired about the teaching power to deliver those classes. Response: Some will be new hires; others will come from WWAMI. Current staff and faculty will be re-directed to the new School of Health and Medical Professions.
A senator asked whether courses that appear to be at the 600 level, such as GERO 6XX, indicate plans to develop a doctoral program. Response: That is not the case.
Vote: 23/24 yes; 1/24 no. Motion passes.
- UCC 551 Direct-Entry Doctor of Nursing Practice-Nurse Anesthesia – Russell Baker, Associate Program Director, Medical Education Program (WWAMI), Attach. #4.
In Idaho, the current nurse population clusters around the largest city in Idaho Public Health Districts, with significant migration of nurses away from Idaho rural communities. Thus, there is a great need to train and prepare CRNAs in Idaho to work in Idaho’s rural communities. The development of an advanced practice entry-to-practice CRNA program in the state will aid in the development of a CRNA workforce to meet the needs of Idahoans.
Vote: 21/21 yes. Motion passes.
- UCC 540 Direct-Entry Master of Science in Nursing – Jeff Seegmiller, Director, Medical Education Program (WWAMI), Attach. #5.
This program is an entry to the medical profession. Applicants don’t need to have a bachelor’s in a nursing field. Currently, no institution in Idaho offers a Direct Entry Master of Science in Nursing. A direct-entry nursing education program addresses unmet needs for a struggling rural workforce.
Vote: 22/22 yes. Motion passes.
- UCC 548 Doctor of Psychology in Clinical Psychology – Thomas Farrer, Associate Program Director, Medical Education Program (WWAMI), Attach. #6.
There is a critical shortage of mental health providers in all Idaho counties. There are only two clinical psychology doctorate programs in Idaho, one at Idaho State University and a second at Northwest Nazarene University. The program at ISU is accredited by the American Psychological Association. However, the program turns away 90-95% of their applicants. Thus, many suitable applicants will have to leave the state to continue seeking a doctoral degree. This program will help meet the needs of Idaho citizens with mental health conditions.
Vote: 22/22 yes. Motion passes.

- UCC 550 Master of Physician Assistant Studies – Russell Baker, Associate Program Director, Medical Education Program (WWAMI), Attach. #7.
Currently, Idaho State University runs the only PA program in the state, which accepts about 10% of the applicants. The pool of applicants who are not accepted has a large portion of Idaho residents. A comparable PA at the University of Utah has similar PA production as ISU and reports a 4% admission rate for the PA program. Thus, more than 90% of applicants are not accepted into either of these programs, while there is strong interest in pursuing a career as a PA.
Vote: 21/21 yes. Motion passes.
- UCC 99 School of Health and Medical Professionals – Jeff Seegmiller, Director, Medical Education Program (WWAMI), Attach. #8.
The School of Health and Medical Professions will be the foundation on which our programs will grow. The school will be housed within the College of Graduate Studies. The bulk of these specific programs are currently not being offered in our state institutions, except for the Physician’s Assistant Program. Proposals for each of these academic programs are included in this School/Program proposal submission.
Vote: 20/20 yes. Motion passes.
- **Proposed changes to the Faculty Staff Handbook**
 - FSH 3440 Compensation of Classified Employees – recalled from the agenda.
- **Changes to the Administrative Procedures Manual (non-voting):**
 - APM 50.51 Request for Job Reclassification – Brandi Terwilliger, Director of Human Resources, Ashley Rodriguez, Senior HR Business Partner, Attach. #10.
Information contained in this item is now maintained on the HR website.
 - APM 45.16 Sponsored Project Payment Management – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs, Attach. #11.
Rewritten to clarify processes to match Chart V (Banner) updates and to update format.
 - APM 45.17 Fixed-Price Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs, Attach. #12.
Updating for current processes in Chart V and new CFR regulations governing fixed-price sponsored funding.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:19pm.

Respectfully Submitted,

Francesca Sammaruca

Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 18

Tuesday, January 23, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Kenyon (excused), Hobbs, Reynolds

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #17, January 16, 2024, were approved as distributed.

Announcements and Communications, Part 1:

- **Admissions Standards** - Use of Standardized Tests for Admission Decisions – Dean Kahler, Vice Provost, Strategic Enrollment Management.

After reviewing AY 2022-23 admission standards, Vice Provost Kahler presented retention rates by high school (HS) GPA. **The data are attached to these minutes.** From Fall 2015 through Fall 2022, the retention rate with HS GPA of 3 and above has been around 80%, with a slight downward trend (81% in Fall 2015 vs. 77% in Fall 2022). The lack of SAT/ACT scores doesn't appear to change in a significant way the trends that we saw before waiving those scores.

Discussion:

In response to a question, Vice Provost Kahler noted that the HS GPA has been found to be a good predictor of success by other peer universities as well.

A senator cited the New York Times article “The Misguided War on the SAT” (nytimes.com) as an interesting take on the subject.

As for the slight decline in the retention rate of our best students (GPA 3 and up), the reasons can be diverse – sometimes they are non-academic, financial or family related. Additional analysis needs to be done on those trends to get better insight.

A senator is concerned that our current trend of lowering the standards and reducing barriers to entry to move students through may be seen unfavorably from the outside. Vice Provost Kahler responded that many campuses are having similar conversations. Next Monday, there is a meeting (Jean-Marc will be there) with the State Board (SB) staff to discuss our direct admit Idaho program. WSU has already dropped SAT scores from their admission standards. Provost Lawrence added that the SB is strongly committed to access and to educate more Idaho students, as demonstrated by the \$75M invested in the “Launch” initiative.

Provost Lawrence summarized the question before Faculty Senate: If we take no action, the current emergency action will expire and admission standards for Fall 2025 will revert to their pre-COVID status. If the Faculty Senate wants to act, the main question is whether dropping SAT scores caused large differences in retention and completion rates. The data suggests that it didn't. Vice Provost Kahler agrees.

Addressing a question about the current minimum GPA (which is 2.6, same as originally), the Provost noted that, with the current standards, a student with a GPA of 2.6 is directly admitted, whereas, in the former system, a student with a GPA of 2.7 would have not been directly

admitted if they had a low SAT score. So, the main question is: Are those students succeeding or do we need to be more careful with the group at the bottom?

P3 Update – Toni Broyles, Special Assistant to AVP Auxiliary, Cami McClure, Assistant Vice President, Auxiliary Services.

From campus-wide surveys, the issues that come up most frequently are pay, housing and childcare. With regard to housing, they are at the stage of research and analysis to provide recommendations. They are looking at housing for undergraduate (UG) students, graduate students (GS), married students with children (parenting housing), employees, and sometime in the future, retirees. They did an initial survey last year and one is on-going this year, for UG, GS, faculty and staff. The largest response rate is from employees. They are now pushing for a higher response. Toni asked to let students know about this feedback opportunity open to the entire campus.

Toni displayed a map showing the location of university housing. The “UG corridor” is where UG, and some GS, predominantly live. Apartment living is on the so-called “South Hill,” the older part built in the 1960s and the newer in the 1990s. Those buildings are old, parking is limited, and so is access to emergency services. Nothing has been decided, as they are at the stage of preliminary design of some reconfiguration. The average age of our buildings is 53 years. As a future R1 university, and to be among the 25 top public residential universities (a priority for President Green), we need suitable on-campus housing. The plan is to keep UG housing where it is, and keep the amenities, such as food services, in the UG corridor. Also, some separation between graduate housing and parenting housing is appropriate. Plans include a dedicated building for graduate and professional students. The university has recently procured the area where the Wells Fargo ATM used to be and some old railroad land nearby.

Units and departments work hard to bring the best faculty to campus, but when these new faculty come, they may not find suitable housing. It’s important to let them know that new faculty have at least one place to land when they first arrive. As part of their recruiting package, units/departments may consider showing to prospective faculty some of the apartments the university can make available as a landing place.

In summary, they are doing inventory and research analysis across the whole spectrum, from UG to Emeriti who wish to remain in contact with the university but seek a smaller, easy-maintenance residence.

Discussion:

To the question of our capacity, Toni replied that the final survey will provide more information. On the South Hill, there are probably 250 beds for graduate and professional students and 150 for parenting housing. The UG sector will require mostly renovation. There, we can add about 800 beds if needed. Furthermore, major employers in the area (SEL, Gritman, Pullman Regional) are experiencing similar problems when seeking to hire highly trained personnel who come to town but can’t find proper housing. Should we end up with more university housing than needed, renting living space to these local employers could be a source of revenue.

It was pointed out that extension students who come to the Moscow campus for a limited time also need a place to stay, in addition to housing in Southern Idaho. Toni responded that they are also considering setting aside space for visiting lecturers and extension people and for Study Abroad students.

A senator wondered whether establishing a relation with local “Airbnb” could help for short-term visitors. Toni replied that it could be an option (there 1,000 Airbnb in Moscow), but only for short-term living.

For any questions or feedback, reach out to Toni at tonibroyles@uidaho.edu

Chair's Report:

- We just heard presentations about admissions and housing, which are important factors for the long-term evolution of the university. If the university grows, are we ready for more students? What kind of growth can we accommodate?
- These types of conversations reinforce the role of senate leadership as a place of dialog and shared governance. Please help us make our role more efficient and productive, by providing your feedback.

Provost's Report:

- 10th day data on Spring semester enrollment will be available next week.
- UI's legislative presentations begin this week and will take place over the next 1-2 months. This is a different schedule than previous year. Vice Provost for Faculty Diane Kelly-Riley sent a communication to standard pay faculty on 1/19/2024 about tentative deferred pay implementation. Please visit:

<https://www.uidaho.edu/provost/faculty/salary/deferred-pay>

Discussion:

A senator inquired whether deferred pay is a “done deal” as far as Faculty Senate involvement is concerned. The Provost responded that the implementation will likely require changes in FSH/APM and, thus, Senate will be involved. Implementation plans are ongoing and the President supports what's being done. As a follow-up, the senator suggested making this point clearer on the webpage.

Changes to the Administrative Procedures Manual (non-voting):

- APM 45.09 Effort Reporting and Personnel Activity Reports – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Change of our effort reporting system and process needed to be reflected in the APM – from PAR to Effort Reporting, with the use of Banner.
Discussion:
There was a suggestion to clarify the meaning of “Hatch, Smith-Lever” in section B.
- APM 45.10 Facilities and Administrative (Indirect) Rate – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Update for consistent format, to clarify statements and applicability for location and type, and change ‘Public Service/Outreach’ to ‘Other Sponsored Activity’ per our last F&A rate agreement.
Discussion: None.
- APM 45.12 Sponsored Project Closeout and Recordkeeping Responsibilities – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.
Reformat to conform to standard APM style, clarify closeout and recordkeeping processes due to shift to electronic record keeping and other system changes. Mostly, changing nomenclature and formatting.
Discussion: None.
- APM 45.15 Subawards and Subcontracts – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs.

Clarification of the subaward request and issuance process to include new requirements and processes. No substantial changes in responsibilities, monitoring, or timelines. Adding 2 CFR 200 in place of the A-121 and A-133 references, and formatting to standard APM format.

Discussion: None.

- APM 95.21 University Closures – Shane Keen, Clery Compliance Officer, Public Safety and Security.

Comprehensive review. Language clarified throughout.

Discussion: None.

Announcements and Communications, Part 2:

- FY24 CEC Summary – Kim Salisbury, Associate Vice President, Budget and Planning, DFA Budget and Planning.

Kim displayed a slide showing a summary of FY24 CEC. She went over the breakdown of the Gen Ed budget into various categories – across the board to address inflation, bring salaries up to 80% of target, merit funds, promotion and tenure increments, etc. The table also shows overall increase in salary over FY23; total merit increases; average starting percentage, average increase percentage, and average final percentage of target; number of CEC eligible and CEC non-eligible employees; number of employees receiving merit increases; number of employees brought up to 80% of target; number of eligible employees still below 80% of target.

The slide with the detailed data is attached to these minutes.

Discussion:

Kim explained how the \$600 for across-the-board increases came to be. Working backwards from the total Gen Ed budget, they addressed priorities such as raising salaries to 80% of target, then met other Gen Ed obligations. What was left, in steps of \$100, amounted to \$600 per FTE. Provost Torrey added that this year a percentage increase was recommended, rather than a flat number for all eligible employees.

Clarification was asked about the group of eligible employees still below 80% of the target. This is due to grant funding in a small number of areas.

- Parking – Steve Mills, Director, Parking and Transportation Services.

Availability: One of the aspects that senators wanted to discuss is the reason why in the Greek housing area, (Blake, Taylor, Sweet and 7th), all parking permits are purple or magenta. This is to provide parking to students who bring a car to campus. Some students also use the gravel area west of the Kibbie Dome.

The second question was about the cost and how it is determined: Since 2009, our parking permits have gone up about 40%, which is consistent with the nationwide increase, and less than 72% of the universities that they looked up.

Discussion:

Why not adopt a sliding scale, where the cost of the permit is commensurate to one's salary? Steve does not see this as an equitable solution. The university salary may be only one source of an individual's income. Also, with income-based permit costs, more employees will be able to purchase gold permits, which will create additional problems. Eventually, with this model, parking would become underfunded. Lots are very expensive to maintain.

Why should we pay for parking at all? Most employers provide parking. Vice President Foisy addressed this question. Parking must be a fully self-sustained, auxiliary operation by SB mandate. No Gen Ed funds can go into it.

Moscow is walkable and there is public transportation to campus, but what about people who live outside of Moscow? Are students promised a parking spot if they have a car on campus?

Yes, they are, although -- Dean of Students Blaine Eckles added -- it's a challenge. They discourage students from bringing a car to campus.

The presentations on Computing Resources Available for Research, and the Report from the Ubuntu Committee were postponed due to the late hour.

New Business:

None.

Adjournment:

The agenda not being completed, the Chair called for a motion to adjourn. So moved (Tibbals, Mittelstaedt). The meeting was adjourned at 5:02pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University
of Idaho

UNDERGRADUATE ADMISSION STANDARDS

INSTITUTIONAL RESEARCH

22-23 CATALOG ADMISSION STANDARDS

1. Submit ACT or SAT scores if available. New first-year students entering in 2022 or 2023 who are unable to sit for an ACT or SAT exam due to COVID-19 will automatically be considered for admission if their cumulative unweighted GPA is 2.60-4.00. Those who have cumulative GPAs of 2.30 - 2.59 who are unable to sit for an exam will be admitted through the [Vandal Gateway Program](#). Students in this GPA range are also welcome to appeal through our [Admissions Committee](#). **Every student who has a test score is encouraged to provide it for admission as well as class placement.**
2. Graduate from a regionally accredited high school with a combination of cumulative GPA¹ and test scores² as defined in the following table:

| High School GPA | ACT Composite | SAT Evidence-Based Reading & Writing + Math (SAT taken March 2016 and after) | SAT Critical Reading + Math (SAT taken prior to March 2016) |
|-----------------|----------------|--|---|
| 3.00 - 4.00 | Any test score | Any test score | Any test score |
| 2.60 - 2.99 | Any test score | Any test score | Any test score |
| 2.50 - 2.59 | 17 - 36 | 910-1600 | 830-1600 |
| 2.40 - 2.49 | 19 - 36 | 990-1600 | 910-1600 |
| 2.30 - 2.39 | 21 - 36 | 1070-1600 | 990-1600 |
| 2.20 - 2.29 | 23 - 36 | 1140-1600 | 1070-1600 |

22-23 CATALOG ADMISSION STANDARDS

I Either achieve a 2.6+ High School GPA or obtain a lower GPA with a increasing, sliding scale test score

I The vast majority of incoming new frosh have a 2.6 High School GPA or better

| High School GPA | ACT Composite | SAT Evidence |
|-----------------|----------------|----------------|
| 3.00 - 4.00 | Any test score | Any test score |
| 2.60 - 2.99 | Any test score | Any test score |
| 2.50 - 2.59 | 17 - 36 | 910-1600 |
| 2.40 - 2.49 | 19 - 36 | 990-1600 |
| 2.30 - 2.39 | 21 - 36 | 1070-1600 |
| 2.20 - 2.29 | 23 - 36 | 1140-1600 |

| Fall Term | Frosh Cohort Total | No ACT / SAT | Pct No Test | Had HS GPA 2.6+ | Had 2.6+ (%) |

Undergraduate

College

Engineering

Department/Unit:

Electrical & Computer Engr

Effective Catalog Year

2024-2025

Program Title

Microelectronics Fabrication

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

12

CIP Code

14.1099 - Electrical, Electronics and Communications Engineering, Other.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Curriculum:

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|--|--|-------|
| ECE 465 | Introduction to Microelectronics Fabrication | 3 |
| Select one of the following: | | 3 |
| ECE 460 | Semiconductor Devices | |
| PHYS 464 | Solid State Physics | |
| Select two from the following (must be different from the core course chosen): | | 6-7 |
| CHE 455 | Surfaces and Colloids | |
| ECE 418 | Introduction to Electronic Packaging | |
| ECE 460 | Semiconductor Devices | |
| ME 458 | Finite Element Applications in Engineering | |

| | |
|----------|---------------------------------------|
| MSE 423 | Corrosion |
| MSE 432 | Fundamentals of Thin Film Fabrication |
| PHYS 411 | Advanced Physics Lab |
| PHYS 443 | Optics |
| PHYS 464 | Solid State Physics |
| STAT 301 | Probability and Statistics |

Total Hours

12-13

Courses to total 12 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. an ability to identify, formulate, and solve microelectronics fabrication problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to microelectronics fabrication concepts and technologies with a range of audiences.
3. an ability to develop and conduct appropriate microelectronic fabrication experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about microelectronics fabrication.

Overall, these learning outcomes demonstrate that students who have completed a certificate in microelectronics fabrication have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the microelectronics fabrication industry. The students are well-prepared to pursue further education or employment in the microelectronics fabrication field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certification in microelectronics fabrication will involve regular course evaluations of the course syllabus and student work. This will provide the departments with insight into the students' knowledge in microelectronics fabrication and/or related fields. The summary of the course evaluation and student work will be shared with an outside entity, specifically a representative from the industry and electrical and computer engineering advisory board. The feedback from the industry partner and industry advisory board help in evaluating the students learning outcome and program component.

How will you ensure that the assessment findings will be used to improve the program?

Course syllabus and student evaluation will be reviewed each semester, and course content will be adjusted as necessary. The annual assessment feedback from the industry partner and department advisory boards will be reviewed by the departments, and the required refinement to the syllabus will be done on an annual basis. An important aspect of these classes is the ability of the students to learn about microelectronics fabrication related topics therefore, the content taught in the class will be evolving on an ongoing basis.

What direct and indirect measures will be used to assess student learning?

Exams, assignments, and/or class projects will be required for all the relevant classes and graded on a regular basis. In the selected required courses, an oral exam of the students will be required at the end of the class to evaluate student learning.

When will assessment activities occur and at what frequency?

The size and scope of this program dictate that we will collect the assessment data during the courses and the survey data each semester. Every fall semester, the departments and curriculum committees will evaluate the students' assessment, industry partners, and advisory boards feedback and take corrective actions if necessary.

Student Learning Outcomes**Learning Objectives**

1. an ability to identify, formulate, and solve microelectronics fabrication problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to microelectronics fabrication concepts and technologies with a range of audiences.
3. an ability to develop and conduct appropriate microelectronic fabrication experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about microelectronics fabrication.

Overall, these learning outcomes demonstrate that students who have completed a certificate in microelectronics fabrication have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the microelectronics fabrication industry. The students are well-prepared to pursue further education or employment in the microelectronics fabrication field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The certificate in microelectronics fabrication is designed to provide students with specialized knowledge and skills in the field of microelectronics fabrication. This certificate program is intended to prepare students for careers in the microelectronics fabrication industry or related fields, as well as future graduate studies in the field of microelectronics fabrication.

The departments currently offer these proposed courses required for the microelectronics fabrication certificate, and these courses already have the required materials needed for the certification. Furthermore, we plan to add extra emphasis to microelectronics fabrication-related topics in the homework assignments, class example problems, and discussion sessions to elucidate design and engineering principles in the microelectronics fabrication and related fields. Therefore, we anticipate that the proposed certificate program will not add additional workload to the departments.

Program Description

Microelectronics Fabrication

This certificate ensures undergraduate senior students know the basic microelectronic device structures and fabrication processes. This certificate is open to undergraduate students in Electrical Engineering, Computer Engineering, Mechanical Engineering, Chemical Engineering, Physics, and other related disciplines.

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form**Describe the financial impact**

Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs associated with the aging population, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future.

The primary beneficiaries, if this program request is granted, are the individuals and communities who will be served by these future gerontologists. Thus, the impact could encompass all of Idaho.

Curriculum:

1. Required:

- a. GERO 5xx: Theoretic foundations and introduction to gerontology: Examines historical developments of the field of gerontology from a multidisciplinary perspective and how gerontology fits into the health and social service landscape. Introduction to theories and critical issues of aging.
- b. GERO 5xx: Research methods in Gerontology: research, data analysis, research report. Subject matter will include ethics, sampling, reliability and validity, hypothesis testing, study designs, dissemination of research findings, and critical appraisal of research, with a central requirement of designing and writing a study proposal.
- c. GERO 6xx: Biological aspects of Aging: Theory and science of senescence and longevity, focusing on normal aging versus pathological changes to health status in the aging processes.
- d. GERO 6xx: Mental and Cognitive health in aging: Covers the complex topic of psychological health in aging, evidence-based interventions (first half of term) as well as cognitive aging and dementia (second half of term).
- e. GERO 6xx: Health promotion and preventative care in aging: Founded on principles of health education and promotion, the course covers evidence-based factors that reduce age-related injuries and illnesses and how to promote behavioral change, focusing on maximizing quality of life.
- f. GERO 6xx: Diversity and ethics in aging: This course covers a wide range of topics related to culture and diversity, focusing on social determinants of health, health culture in aging, historical factors that have shaped culture and diversity in the aging US population, and covers rights and safety of vulnerable populations (ADA law and other elder law principles).
- g. GERO 6xx: Integrative Capstone: Requires a faculty sponsor to direct a capstone project. This may include a service-based project, program development or review, research experience, and another field experience as appropriate and approved by the faculty sponsor. Students will demonstrate the integration of gerontology content from didactics.

2. Electives:

- a. GERO 6xx: Community-Engagement and Leisure Arts in Aging: Interdisciplinary approaches to recreational therapy and leisure accessibility in aging and how engagement promotes physical and mental health in aging.
- b. GERO 6xx: The Business of Geriatric Care Management: Reviews business and ethical fundamentals of geriatric care management across multiple levels of care, from independent living communities to intensive long-term care models.
- c. GERO 6xx: Program Development and Evaluation for Aging: Examine components of successful program development, implementation science, identification of and involvement of stakeholders, fundraising, grant writing, and the processes of evaluation program outcomes.
- d. Rural Health and Aging: Survey course of the application of healthy aging and health intervention limitations in rural settings.
- e. Seminar on Aging in the Arts: How aging is accurately and inaccurately depicted in media and arts.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Learning outcomes are structured based on the Academy for Gerontology in Higher Education (AGHE) expected competencies in gerontology. These profession-wide competencies are expected of all graduates and are partially demonstrated via:

- Coursework: Students will obtain a grade of B or higher.
- Other didactics: Capstone Project in gerontology

The AGHE offers competencies for graduate-level education in gerontology in three categories. These include the following:

1. Category 1 - Core competencies (expected of all programs)
 - a. Frameworks for understanding human aging (e.g., developmental perspectives).
 - b. Biological aspects of aging.
 - c. Psychological aspects of aging.
 - d. Social aspects of aging.
 - e. The humanities and aging
 - f. Research and Critical Thinking.
2. Category 2 - Interactional Competencies (should be broadly represented):
 - a. Attitudes and perspectives: Developing a gerontological perspective
 - b. Ethics and Professional Standards
 - c. Communication with and on behalf of older persons.
 - d. Interdisciplinary and community collaboration
3. Category 3 – Contextual Competencies Across Fields of Gerontology
 - a. Well-being, health and mental health.
 - b. Social Health
 - c. Program/service development
 - d. Arts and Humanities
 - e. Business and finances
 - f. Policy
 - g. Research, application, and evaluation

Based on these competencies, student learning outcomes will include the following:

- Students will be able to identify and explain developmental perspectives associated with aging.
- Students will be able to compare and contrast biological and psychosocial aspects of aging and apply this knowledge in health and human service settings to have a positive impact on the health of older adults.
- Develop comprehensive and meaningful concepts, definitions, and measures for well-being of older adults.
- Students will be able to critically analyze ethical and professional standards in gerontology.
- Students will demonstrate effective communication skills through their interactions with older adults and they will demonstrate knowledge of community resources related to the health and well-being of older adults.
- Develop a gerontological perspective through knowledge and self-reflection as achieved through class discussions and group assignments.
- Students will demonstrate the ability to collaborate with others to promote integrated approaches to aging. Achieved via class work, group projects, and capstone projects.
- Students will promote quality of life among older adults. They will also promote older individual's strengths to maximize well-being, health, and mental health, including promoting engagement in the arts and the community.
- Students will demonstrate knowledge of the science of gerontology via class work on research methods and via writing projects that require integration of empirical literature. The capstone project may include a research project.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

To evaluate how well students are achieving the intended learning outcomes, the following assessment processes will be employed:

1. Examinations and Quizzes: Regular assessments will include written examinations and quizzes to evaluate knowledge acquisition and critical thinking skills.
2. Clinical Skills Assessment: Clinical skills will be assessed through direct observation, practical examinations, and skills checklists during clinical rotations.
3. Case Studies and Care Plans: Students will complete case studies and care plans to demonstrate their ability to apply theoretical knowledge to real-world patient care scenarios.
4. Reflective Journals and Portfolios: Students will maintain reflective journals and e-portfolios, providing insights into their personal and professional growth.
5. Peer and Self-Assessment: Peer evaluations and self-assessment will be incorporated for group projects and personal reflection on skills development.

How will you ensure that the assessment findings will be used to improve the program?

1. Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
2. Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
3. Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
4. Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

What direct and indirect measures will be used to assess student learning?

Direct measures include examinations, skills assessments, case studies, and practical evaluations. Indirect measures include student surveys, feedback from instructors, and analysis of retention and graduation rates.

When will assessment activities occur and at what frequency?

Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- Clinical skills assessments and evaluations will be conducted during clinical rotations.
- Case studies, care plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

Learning outcomes are structured based on the Academy for Gerontology in Higher Education (AGHE) expected competencies in gerontology.

These profession-wide competencies are expected of all graduates and are partially demonstrated via:

- Coursework: Students will obtain a grade of B or higher.
- Other didactics: Capstone Project in gerontology

The AGHE offers competencies for graduate-level education in gerontology in three categories. These include the following:

1. Category 1 - Core competencies (expected of all programs)
 - a. Frameworks for understanding human aging (e.g., developmental perspectives).
 - b. Biological aspects of aging.
 - c. Psychological aspects of aging.
 - d. Social aspects of aging.
 - e. The humanities and aging
 - f. Research and Critical Thinking.
2. Category 2 - Interactional Competencies (should be broadly represented):
 - a. Attitudes and perspectives: Developing a gerontological perspective
 - b. Ethics and Professional Standards
 - c. Communication with and on behalf of older persons.
 - d. Interdisciplinary and community collaboration
3. Category 3 – Contextual Competencies Across Fields of Gerontology
 - a. Well-being, health and mental health.
 - b. Social Health
 - c. Program/service development

- d. Arts and Humanities
- e. Business and finances
- f. Policy
- g. Research, application, and evaluation

Based on these competencies, student learning outcomes will include the following:

- Students will be able to identify and explain developmental perspectives associated with aging.
- Students will be able to compare and contrast biological and psychosocial aspects of aging and apply this knowledge in health and human service settings to have a positive impact on the health of older adults.
- Develop comprehensive and meaningful concepts, definitions, and measures for the well-being of older adults.
- Students will be able to critically analyze ethical and professional standards in gerontology.
- Students will demonstrate effective communication skills through their interactions with older adults and they will demonstrate knowledge of community resources related to the health and well-being of older adults.
- Develop a gerontological perspective through knowledge and self-reflection as achieved through class discussions and group assignments.
- Students will demonstrate the ability to collaborate with others to promote integrated approaches to aging. Achieved via class work, group projects, and capstone projects.
- Students will promote quality of life among older adults. They will also promote older individual's strengths to maximize well-being, health, and mental health, including promoting engagement in the arts and the community.
- Students will demonstrate knowledge of the science of gerontology via class work on research methods and via writing projects that require integration of empirical literature. The capstone project may include a research project.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

What is the financial impact of the request?

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

The direct-entry Doctor of Nursing Practice -Nurse Anesthesia (DNP-NA) is a newly proposed graduate program designed to prepare students to become Certified Registered Nurse Anesthetists (CRNAs). The DNP-NA program is an independent program and will be housed in the College of Graduate Studies at the University of Idaho. A School of Health and Medical Professions is currently being created and processed to eventually house these health care programs, under the College of Graduate Studies. Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future. The primary beneficiaries, if this program request is granted, are the individuals and communities who will be served by these future healthcare providers. Thus, the impact could encompass all of Idaho.

Curriculum:

See Attached SBOE Document

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Learning Objectives:

- o Integrate the chemistry and pharmacology of anesthesia and adjunct drugs and discuss pharmacokinetics and pharmacodynamics of the drugs.
- o Recognize chemical structures of anesthesia and adjunct drugs and make lateral applications based upon drug profiles and kinetics.
- o Discuss the normal physiology and anatomy of the central nervous system, respiratory system, cardiac/circulatory system, renal system, endocrine system, and digestive system.
- o Identify and explain the pathophysiologic conditions that occur in systems and make application in the administration of anesthesia.
- o Discuss the special considerations, anatomical and physiologic difference in neonates, infants, and children and apply the information in the administration of anesthesia to infants and children.
- o Discuss the normal physiologic changes of pregnancy, the physiologic changes in disease/high risk states in pregnancy and apply the information in the administration of anesthesia to the parturient for delivery and surgical conditions not resulting in delivery.
- o Explain the pathophysiology of common congenital heart diseases, coronary artery disease, and adult valvular heart disease.
- o Develop anesthesia care plans and administer anesthesia for open heart procedures, closed heart procedures, and anesthesia for the cardiac patient having noncardiac surgery, applying physiological and pharmacological principles.
- o Identify the special considerations, physiologic and pharmacologic profile changes of the geriatric (chronologic or physiologic) patient.
- o Identify the anatomy necessary to safely administer regional anesthesia (lumbar epidural, subarachnoid, IV regional and limited peripheral nerve blocks).
- o Develop care plans for regional anesthesia and combined general and regional anesthesia applying physiological and pharmacological principles.
- o Design and conduct a research project and implement Capstone projects.

- o Analyze and discuss the various components of organizational leadership including leadership styles, communication, planning, staffing, budgeting and evaluation.
- o Analyze and critique a variety of ethical issues related to anesthesia and the medical setting.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Student success in achieving the intended learning outcomes of the program will be monitored throughout the program's didactic and clinical phases. The program's faculty and clinical preceptors will evaluate students through a variety of assessment tools, including but not limited to multiple choice examinations, collaborative group projects, objective structured clinical examinations (OSCEs), and clinical performance evaluations.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be used in compliance with external program accreditation requirements to ensure program-self-study and improvement is occurring regularly. Student board exam performance and external accreditation requirements will be assessed annually to examine program performance.

What direct and indirect measures will be used to assess student learning?

- o Examinations and Quizzes
- o Clinical Skills Assessment
- o Case Studies and Care Plans
- o Reflective Journals and Portfolios.
- o Preceptor, Peer, and Self-Assessment
- o Board Examination

When will assessment activities occur and at what frequency?

- o Assessment findings will be used for continuous program improvement through the following mechanisms:
- o Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
- o Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
- o Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
- o Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.
- o Assessment Activity Timing (assessment activities will occur throughout the program at various frequencies):
- o Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- o Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- o Clinical skills assessments and evaluations will be conducted during clinical rotations.
- o Case studies, care plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

- Learning Objectives:
 - Integrate the chemistry and pharmacology of anesthesia and adjunct drugs and discuss pharmacokinetics and pharmacodynamics of the drugs.
 - Recognize chemical structures of anesthesia and adjunct drugs and make lateral applications based upon drug profiles and kinetics.
 - Discuss the normal physiology and anatomy of the central nervous system, respiratory system, cardiac/circulatory system, renal system, endocrine system, and digestive system.
 - Identify and explain the pathophysiologic conditions that occur in systems and make application in the administration of anesthesia.
 - Discuss the special considerations, anatomical and physiologic difference in neonates, infants, and children and apply the information in the administration of anesthesia to infants and children.
 - Discuss the normal physiologic changes of pregnancy, the physiologic changes in disease/high risk states in pregnancy and apply the information in the administration of anesthesia to the parturient for delivery and surgical conditions not resulting in delivery.
 - Explain the pathophysiology of common congenital heart diseases, coronary artery disease, and adult valvular heart disease.

- Develop care plans for regional anesthesia and combined general and regional anesthesia applying physiological and pharmacological principles.
- Design and conduct a research project and implement Capstone projects.
- Analyze and discuss the various components of organizational leadership including leadership styles, communication, planning, staffing, budgeting and evaluation.
- Analyze and critique a variety of ethical issues related to anesthesia and the medical setting.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Certified Registered Nurse Anesthetists is a growing field, ranked as the #8 in best-paying jobs, #10 in healthcare jobs, #12 in STEM jobs, and #25 in overall jobs by US News and World Report. The Bureau of Labor Statistics estimates the 2022-2032 job outlook to increase by 38% for advanced nursing degrees, much faster than average, which includes faster than national average increases for advanced practice CRNAs. Specifically, North Idaho projections are for a 27.5% increase for CRNAs by 2030, with similar job growth expectations for the rest of Idaho. The Idaho Department of Labor projects 60 new CRNA openings per year in Idaho over this timeframe.

In Idaho's current situation, the nurse population clusters around the largest city in Idaho Public Health Districts, with significant migration of nurses away from Idaho rural communities to either the one large town in their district or to the Treasure Valley (Boise/Meridian/Nampa), with the largest migration to Ada and Canyon counties over the past several years. Further, self-reported data from Idaho CRNAs indicates that nearly 25% of CRNAs work part-time, which necessitates a greater number of CRNAs to meet the needs of our state, and it is expected that nearly 20% of Idaho CRNA workforce will retire (i.e., 55 or older) in the next 10 years. The migration of nurses away from rural communities, lack of CRNAs, and overall healthcare provider shortages in Idaho exacerbates the need for an increase in CRNAs in Idaho. This can be seen in self-report data that indicates that nearly 25% of Idaho CRNAs report that CRNAs are the only anesthesia providers in their community, and that some communities only have one CRNA as the sole anesthesia provider available in a rural community.

Thus, there is a great need to train and prepare CRNAs in Idaho to work in Idaho's rural communities. Currently, there are no other CRNA programs in Idaho (the closest CRNA program is at Gonzaga University); thus, 100% of Idaho CRNAs received their education outside of Idaho (84% at master's degree level). With only one reported doctoral trained CRNA in Idaho, and the upcoming shift to required doctoral preparation for entry-level CRNAs in 2025, it is important for Idaho to develop an advanced practice entry-to-practice CRNA program in Idaho. The development of an advanced practice entry-to-practice CRNA program in Idaho will aid in the development of a CRNA workforce to meet the needs of Idahoans.

School of Health and Medical Professions

Program Resource Requirements.

- Indicate all resources needed including the planned FTE enrollment, projected revenues, and estimated expenditures for the first **four** fiscal years of
- Include reallocation of existing personnel and resources and anticipated or requested new resources.
- Second and third year estimates should be in constant dollars.
- Amounts should reconcile subsequent pages where budget explanations are provided.
- If the program is contract related, explain the fiscal sources and the year-to-year commitment from the contracting agency(ies) or party(ies).
- Provide an explanation of the fiscal impact of any proposed discontinuance to include impacts to faculty (i.e., salary savings, re-assignments).

I. PLANNED STUDENT ENROLLMENT

| | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | | <u>FY 29</u> | |
|-------------------------|--------------|-----------|--------------|-----------|--------------|---------|--------------|-----------|
| | FTE | Headcount | FTE | Headcount | FTE | Headcou | FTE | Headcount |
| A. New enrollments | | 10 | | 15 | | 20 | | 20 |
| B. Shifting enrollments | | | | | | | | |
| Total Enrollment | 0 | 10 | 0 | 25 | 0 | 45 | 0 | 55 |

II. REVENUE

| | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | | <u>FY 29</u> | |
|--|--------------|--------------|----------------|--------------|----------------|----------|----------------|----------|
| | On-going | One-time | On-going | One-time | On-going | One-time | On-going | One-time |
| 1. New Appropriated Funding Request | | | | | | | | |
| 2. Institution Funds | \$422,600.00 | \$250,000.00 | | \$250,000.00 | | | | |
| 3. Federal | | | | | | | | |
| 4. New Tuition Revenues from Increased Enrollments | \$400,000.00 | | \$1,000,000.00 | | \$4,500,000.00 | | \$5,500,000.00 | |
| 5. Student Fees | | | | | | | | |
| 6. Other (i.e., Gifts) | | | | | | | | |
| Total Revenue | \$822,600 | \$250,000 | \$1,000,000 | \$250,000 | \$4,500,000 | \$0 | \$5,500,000.00 | \$0 |

Ongoing is defined as ongoing operating budget for the program which will become part of the base.

One-time is defined as one-time funding in a fiscal year and not part of the base.

Will this request have a fiscal impact of \$250K or greater?

Yes

Academic Level

Graduate

College

Graduate Studies

Department/Unit:

Graduate Studies

Effective Catalog Year

2025-2026

Program Title

Direct-Entry Master of Science in Nursing

Degree Type

Major

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

67

Attach Program Change

SBOE Academic_Degree_and_Certificate_Full-Proposal_Form MSN (1).pdf

CIP Code

51.1601 - Nursing/Registered Nurse (RN, ASN, BSN, MSN).

Will the program be Self-Support?

No

Will the program have a Professional Fee?

Yes

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

Yes

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

The MSN program is going to be housed in the College of Graduate Studies at the University of Idaho. A School of Health and Medical Professions is currently being created and processed to eventually house these health care programs, under the College of Graduate Studies.

Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future.

The primary beneficiaries, if this program request is granted, are the individuals and communities who will be served by these future Nurses. Thus, the impact could encompass all of Idaho.

Curriculum:

See attached Direct-Entry Masters of Science in Nursing Proposal

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Other

Where?

Geographical region including Idaho during the clinical rotations.

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

See the attached document: The Essentials: Competencies for Nursing Education 2021.

The Competencies for nursing education include competencies and student learning outcomes required for successful program accreditation by the Commission on the Collegiate Nursing Education (CCNE)

These learning outcomes also prepare students for the national board examination for nursing practice (National Council Licensure Examination).

Intended Learning Outcomes for the Nursing Program Component:

1. Knowledge Acquisition and Application: Upon completion of the program component, students will demonstrate a comprehensive understanding of core nursing concepts, theories, and evidence-based practices. They will be able to apply this knowledge to solve complex healthcare challenges.

2. **Clinical Competence:** Students will develop clinical competence in patient care, including assessment, planning, implementation, and evaluation of nursing interventions. They will be capable of delivering safe and effective nursing care across diverse healthcare settings.

3. **Critical Thinking and Problem-Solving:** Graduates will possess strong critical thinking skills, enabling them to analyze clinical situations, identify potential problems, and make informed decisions to optimize patient outcomes.

4. **Communication and Interpersonal Skills:** Students will exhibit effective communication and interpersonal skills, fostering therapeutic relationships with patients, families, and the healthcare team.

5. **Professionalism and Ethical Practice:** Graduates will uphold the highest standards of professionalism and ethics, adhering to legal and ethical guidelines while demonstrating cultural competence, empathy, and respect for patient autonomy.

6. **Leadership and Collaboration:** Students will acquire leadership and collaboration skills, enabling them to work effectively within interdisciplinary healthcare teams, advocate for patients, and contribute to improving healthcare systems.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

To evaluate how well students are achieving the intended learning outcomes, the following assessment processes will be employed:

1. **Examinations and Quizzes:** Regular assessments will include written examinations and quizzes to evaluate knowledge acquisition and critical thinking skills.

2. **Clinical Skills Assessment:** Clinical skills will be assessed through direct observation, practical examinations, and skills checklists during clinical rotations.

3. **Case Studies and Care Plans:** Students will complete case studies and care plans to demonstrate their ability to apply theoretical knowledge to real-world patient care scenarios.

4. **Reflective Journals and Portfolios:** Students will maintain reflective journals and e-portfolios, providing insights into their personal and professional growth.

5. **Peer and Self-Assessment:** Peer evaluations and self-assessment will be incorporated for group projects and personal reflection on skills development.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be used for continuous program improvement through the following mechanisms:

1. **Faculty Meetings:** Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.

2. **Curriculum Review:** Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.

3. **Faculty Development:** Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.

4. **Feedback Loops:** Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

What direct and indirect measures will be used to assess student learning?

Direct measures include examinations, skills assessments, case studies, and practical evaluations. Indirect measures include student surveys, feedback from clinical preceptors, and analysis of retention and graduation rates.

When will assessment activities occur and at what frequency?

Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- Clinical skills assessments and evaluations will be conducted during clinical rotations.
- Case studies, care plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

See the attached document: The Essentials: Competencies for Nursing Education 2021.

The Competencies for nursing education include competencies and student learning outcomes required for successful program accreditation by the Commission on the Collegiate Nursing Education (CCNE)

These learning outcomes also prepare students for the national board examination for nursing practice (National Council Licensure Examination).

Intended Learning Outcomes for the Nursing Program Component:

1. Knowledge Acquisition and Application: Upon completion of the program component, students will demonstrate a comprehensive understanding of core nursing concepts, theories, and evidence-based practices. They will be able to apply this knowledge to solve complex healthcare challenges.
2. Clinical Competence: Students will develop clinical competence in patient care, including assessment, planning, implementation, and evaluation of nursing interventions. They will be capable of delivering safe and effective nursing care across diverse healthcare settings.
3. Critical Thinking and Problem-Solving: Graduates will possess strong critical thinking skills, enabling them to analyze clinical situations, identify potential problems, and make informed decisions to optimize patient outcomes.
4. Communication and Interpersonal Skills: Students will exhibit effective communication and interpersonal skills, fostering therapeutic relationships with patients, families, and the healthcare team.
5. Professionalism and Ethical Practice: Graduates will uphold the highest standards of professionalism and ethics, adhering to legal and ethical guidelines while demonstrating cultural competence, empathy, and respect for patient autonomy.
6. Leadership and Collaboration: Students will acquire leadership and collaboration skills, enabling them to work effectively within interdisciplinary healthcare teams, advocate for patients, and contribute to improving healthcare systems.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Justification:

Rural areas struggle to find adequate numbers of nurses and data shows that there has been a profound urban shift in practicing registered nurses. In 2005, 17% of registered nurses worked in rural areas, but that number dropped to 14.4% by 2018. In 2005, 16.4% of nurses worked in rural hospitals, but in 2018, that figure dropped to 13.4%. The percentage of registered nurses working at rural critical access hospitals in 2018 was 38.5%, but the Covid-19 pandemic accelerated retirement of many older nurses and rural facilities with tight budgets could not compete with better funded urban healthcare centers and the rural nursing workforce dropped even further. Although efforts to train and recruit more nurses are ongoing and projections show enough new nurses to replace retiring baby boomer registered nurses, the replacement distribution is expected to be uneven with urban locales attracting more new nurses than rural regions (National Academies Press, 2021).

Research shows that graduate-level direct-entry nursing students demonstrate discipline and independent learning skills that transfer well to nursing and outperform younger nursing students. With an average age of 26, direct-entry graduate students are motivated, engaged learners who demonstrate emotional maturity well-suited for healthcare employment (Everrett et al., 2013). With calls for educational leadership that meets actual needs by delivering innovative educational programs that harness technology to transform curricular offerings (Thompson, 2016), a direct-entry nursing education program addresses unmet needs for both an able student population and a struggling rural workforce.

Currently, no institution in Idaho offers a Direct Entry Master of Science in Nursing (MSN) and there are only 41 programs of this type in the nation. Idaho students who have already obtained a bachelor's degree in a non-nursing field, must complete a second bachelor's degree, or leave the state if they want to enter the nursing profession. This is an inefficient use of human resources and an obstacle that keeps many nontraditional students from entering the nursing field. The proposed Direct Entry (aka Entry to Practice) MSN program fills this educational gap for Idaho. The proposed MSN Direct Entry program is a full-time accelerated nursing program that prepares students of all academic backgrounds who have a degree in a field other than nursing to become practicing nurses. Upon graduation, students will be prepared to take the nursing licensure exam NCLEX-RN to be licensed as an RN.

Prerequisites include: a bachelor's degree in a non-nursing field with GPA of 3.0 or higher, anatomy with lab (3-4 credits), microbiology (3-4 credits), nutrition (2-3 credits), physiology with lab (3-4 credits), statistics (3 credits). A 3+2 program option will also be available through the University of Idaho in the future for students who want to change their career trajectory before the end of their baccalaureate education.

Mode of Delivery:

1. Campus-based curricula
2. Hybrid-online

4-semester program with three foundational elements:

1. Nursing foundational theory courses. Hybrid-online or on-campus.
2. Nursing skills practicum and simulation. On-site requirement.
3. Nursing clinical rotations. Healthcare facilities. Travel required.

Proposed Curriculum:

The Direct Entry MSN Nursing Curriculum is an accelerated program that requires 67 credit hours of training. Coursework is designed to build knowledge and skills in a stepwise manner in context of patient care. Hybrid mode of course delivery with in-person and online didactic instruction followed by in-person skills labs and clinical immersion experiences.

The department of medical education will add required nursing faculty to accommodate the added workload for nursing. As capacity grows the nursing program will be part of a new department of health professions within a new college of health and medical professions. The workload for nursing operations will be part of expectations within the program.

School of Health and Medical Professions

Proposed Nursing Degree: Master of Science in Nursing (MSN)

Justification:

Rural areas struggle to find adequate numbers of nurses and data shows that there has been a profound urban shift in practicing registered nurses. In 2005, 17% of registered nurses worked in rural areas, but that number dropped to 14.4% by 2018. In 2005, 16.4% of nurses worked in rural hospitals, but in 2018, that figure dropped to 13.4%. The percentage of registered nurses working at rural critical access hospitals in 2018 was 38.5%, but the Covid-19 pandemic accelerated the retirement of many older nurses, and rural facilities with tight budgets could not compete with better funded urban healthcare centers and the rural nursing workforce dropped even further. Although efforts to train and recruit more nurses are ongoing and projections show enough new nurses to replace retiring baby boomer registered nurses, the replacement distribution is expected to be uneven with urban locales attracting more new nurses than rural regions (National Academies Press, 2021).

Research shows that graduate-level direct-entry nursing students demonstrate discipline and independent learning skills that transfer well to nursing and outperform younger nursing students. With an average age of 26, direct-entry graduate students are motivated, engaged learners who demonstrate emotional maturity well-suited for healthcare employment (Everrett et al., 2013). With calls for educational leadership that meets actual needs by delivering innovative educational programs that harness technology to transform curricular offerings (Thompson, 2016), a direct-entry nursing education program addresses unmet needs for both an able student population and a struggling rural workforce.

Currently, no institution in Idaho offers a Direct Entry Master of Science in Nursing (MSN) and there are only 41 programs of this type in the nation. Idaho students who have already obtained a bachelor's degree in a non-nursing field, must complete a second bachelor's degree, or leave the state if they want to enter the nursing profession. This is an inefficient use of human resources and an obstacle that keeps many nontraditional students from entering the nursing field. The proposed Direct Entry (aka Entry to Practice) MSN program fills this educational gap for Idaho. The proposed MSN Direct Entry program is a full-time accelerated nursing program that prepares students of all academic backgrounds who have a degree in a field other than nursing to become practicing nurses. Upon graduation, students will be prepared to take the nursing licensure exam NCLEX-RN to be licensed as an RN.

Prerequisites include a bachelor's degree in a non-nursing field with GPA of 3.0 or higher, anatomy with lab (3-4 credits), microbiology (3-4 credits), nutrition (2-3 credits), physiology with lab (3-4 credits), statistics (3 credits). A 3+2 program option will also be available through the University of Idaho in the future for students who want to change their career trajectory before the end of their baccalaureate education.

Mode of Delivery:

1. Campus-based curricula
2. Hybrid-online

4-semester program with three foundational elements:

1. Nursing foundational theory courses. Hybrid-online or on-campus.
2. Nursing skills practicum and simulation. On-site requirement.
3. Nursing clinical rotations. Healthcare facilities. Travel required.

Proposed Curriculum:

The Direct Entry MSN Nursing Curriculum is an accelerated program that requires 67 credit hours of training. Coursework is designed to build knowledge and skills in a stepwise manner in the context of patient care. Hybrid mode of course delivery with in-person and online didactic instruction followed by in-person skills labs and clinical immersion experiences.

Semester One

| Course | Description | Credits |
|---------------|--|---------|
| MSN 506 | Foundations of Nursing Practice | 3 |
| MSN 507 | Health Assessment | 2 |
| MSN 508 | Health Assessment lab | 1 |
| MSN 509 | Pathophysiology | 3 |
| MSN 510 | Integrated Clinical Management 1: concepts and interventions to promote mental health | 3 |
| MSN 511 | Integrated Clinical Management 1: concepts and interventions to promote mental health clinical | 2 |
| MSN 512 | Pharmacotherapeutics | 3 |
| Total credits | | 17 |

Semester Two

| Course | Description | Credits |
|---------------|--|---------|
| MSN 513 | Nursing Fundamentals and Professional Practices | 3 |
| MSN 514 | Theoretical Foundations for Nursing Practice | 3 |
| MSN 515 | Integrated Clinical Management 2: adult and gerontological chronic health alterations | 3 |
| MSN 516 | Integrated Clinical Management 2: adult and Gerontological Chronic Health Alterations clinical | 2 |
| MSN 517 | Ethics, Policy, and Health Care Advocacy | 3 |
| MSN 518 | Health Promotion and Risk Reduction Across the Lifespan | 3 |
| Total credits | | 17 |

Semester Three

| Course | Description | Credits |
|---------------|--|----------------|
| MSN 519 | Healthcare Research and Evidence-based Practice | 3 |
| MSN 520 | Interprofessional Collaboration and Population Health | 3 |
| MSN 521 | Quality and Patient Safety in Health Care | 3 |
| MSN 522 | Integrated Clinical Management 3: adult and gerontological acute health alterations | 3 |
| MSN 523 | Integrated Clinical Management 3: adult and Gerontological Acute Health Alterations clinical | 2 |
| MSN 524 | Informatics, Technology, and Professional Issues | 3 |
| Total credits | | 17 |

Semester Four

| Course | Description | Credits |
|---------------|---|----------------|
| MSN 525 | Healthcare Organizational and Systems Leadership | 3 |
| MSN 526 | Integrated Clinical Management 4: Pediatric, Obstetric, and Women's Health | 3 |
| MSN 527 | Integrated Clinical Management 4: Pediatric, Obstetric, and Women's Health clinical | 2 |
| MSN 528 | Professional Nursing Practice Capstone Experience | 5 |
| MSN 529 | Emerging Topics and Transition to Nursing Practice | 3 |
| Total credits | | 16 |

COURSE DESCRIPTIONS

Semester One

| Course | Description | Credits |
|---------|--|---------|
| MSN 506 | Foundations of Nursing Practice This foundational course introduces students to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication, and activities of daily living. Students will develop the knowledge, skills and attitudes required for safe, high quality, culturally sensitive, person-centered care across the lifespan. Students will also develop beginning competency in fundamental psychomotor and technological skills used by nurses in various health care settings to promote patient health and independence. | 3 |
| MSN 507 | Health Assessment This course prepares students to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Students will acquire the knowledge and understanding needed to perform, interpret, and communicate a health history using motivational interviewing, identifying obvious deviations from normal in adult, elderly, and pediatric populations. | 2 |
| MSN 508 | Health Assessment lab Utilizing a systems approach, basic physical assessment skills will be mastered. Identification and interpretation of abnormalities in the physical exam are emphasized. This course's aim is to provide students with the critical thinking skills needed for the beginning nursing student to perform appropriate health assessments in context of patient history, status, and physical exam data. | 1 |
| MSN 509 | Pathophysiology* In this course, students learn pathophysiological processes that contribute to different disease states across the lifespan and human responses to those processes. Students will explore authentic case studies to learn to make selective clinical decisions using current, reliable sources of pathophysiology information. | 3 |
| MSN 510 | Integrated Clinical Management 1: concepts and interventions to promote mental health This course explores the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Students will gain understanding of mental health issues secondary to physical or psychiatric illness, trauma, or loss. | 3 |

| | | |
|---------|--|---|
| MSN 511 | <p>Integrated Clinical Management 1: concepts and interventions to promote mental health clinical</p> <p>This clinical nursing course will help students gain experience in caring for patients with psychological illnesses. Students will develop beginning competencies in providing nursing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma, or loss.</p> | 2 |
| MSN 512 | <p>Pharmacotherapeutics</p> <p>Principles of pharmacology will be discussed, including pharmacokinetics, pharmacodynamics, and toxicities. Major drug classifications, pharmacologic agents used to treat common disease states, and prototype drugs are presented. Discussion will include medication safety issues, nursing management of drug therapy including maximizing therapeutic effects, minimizing adverse effects, and patient and family education. These concepts will be reviewed in relation to patient case scenarios.</p> | 3 |

Semester Two

| Course | Description | Credits |
|---------|--|---------|
| MSN 513 | <p>Nursing Fundamentals and Professional Practices</p> <p>This course introduces students to the theories and principles that form the foundation for professional nursing practice. The theoretical foundation of caring and culture care is introduced. The fundamental concepts basic to nursing such as health and wellness, nursing process, therapeutic communication, and holistic health are examined. Historical, legal, professional, cultural, economic, and social factors that influence nursing and health care delivery are studied.</p> | 3 |
| MSN 514 | <p>Integrated Clinical Management 2: adult and gerontological chronic health alterations</p> <p>This course explores the biological, psychological, cultural, societal, and environmental factors that affect the development of chronic illnesses. Students will gain an understanding of integrated treatment approaches including behavior change, pharmacologic agents, physical therapy, and other approaches to improve outcomes for patients with chronic health alterations.</p> | 3 |
| MSN 515 | <p>Integrated Clinical Management 2: adult and Gerontological Chronic Health Alterations clinical</p> | 2 |

| | | |
|---------|--|---|
| | <p>This clinical nursing course introduces students to concepts central to the effective management of a variety of common chronic illnesses and disabling conditions in a variety of different settings. Students will practice using motivational interviewing techniques to conduct an in-depth health assessment of individuals with chronic conditions that is person-centered and both developmentally and culturally appropriate. They will also learn how to partner with individuals, their families and other health professionals to manage chronic conditions and make desired changes in health behavior to reduce long-term risks.</p> | |
| MSN 516 | <p>Theoretical Foundations for Nursing Practice This course focuses on the philosophical and theoretical bases underlying concepts and operations inherent to nursing. Synthesis of theories from behavioral, natural, social, applied sciences, and nursing is emphasized. Investigation of the intersections between system science and organizational science will be explored. Students will analyze clinical problems integrating ethical concepts, nursing, and scientific theories and incorporate prevention, intervention, and health promotion strategies to create solutions.</p> | 3 |
| MSN 517 | <p>Ethics, Policy, and Health Care Advocacy* In this course, students will explore ethical frameworks for policy and patient care, explore policy making processes, examine effects of policy on practice, explore relationship between advocacy and policy change, and analyze how policy influences financing of health care, practice, and health outcomes.</p> | 3 |
| MSN 518 | <p>Health Promotion and Risk Reduction Across the Lifespan This course integrates clinical prevention and population health concepts to develop patient-centered culturally responsive strategies to promote prevention and intervention services to individuals, families, communities, and clinical populations. Students will synthesize global and social determinants of health using principles of genetics, genomics, biostatistics, and epidemiology to design and implement clinical prevention and intervention initiatives.</p> | 3 |

Semester Three

| Course | Description | Credits |
|---------|---|---------|
| MSN 519 | <p>Healthcare Research and Evidence-based Practice*</p> <p>In this course, students will integrate theory, evidence, clinical judgment, research, and advocacy in becoming scholarly clinicians. Students will utilize multiple resources to evaluate evidence to inform patient care and utilize data to inform point-of-care decisions.</p> | 3 |
| MSN 520 | <p>Interprofessional Collaboration and Population Health*</p> <p>Improving population health in a complex delivery system requires interprofessional collaboration. Scopes of practice within healthcare teams may overlap, necessitating effective communication, team building, and conflict management skills. Theoretical and applied frameworks for group dynamics, patient-centered care, and leadership will also be explored.</p> | 3 |
| MSN 521 | <p>Quality and Patient Safety in Health Care*</p> <p>This interactive course explores quality improvement, research processes, knowledge of healthcare systems, and innovative corrective measures as it relates to safe, effective nursing practice. Evidence-based strategies for building cultures of quality and safety within complex healthcare delivery systems will be explored. Strategies for data management, analysis of errors, and personnel management to reduce fatigue and burnout will also be explored.</p> | 3 |
| MSN 522 | <p>Integrated Clinical Management 3: adult and gerontological acute and complex health alterations</p> <p>This theoretical course prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Building on previous coursework, this course will focus on building a comprehensive understanding of factors related to acute and complex physiological alterations.</p> | 3 |
| MSN 523 | <p>Integrated Clinical Management 3: adult and gerontological acute and complex health alterations clinical</p> <p>This clinical course uses a wide variety of experiential learning activities including simulation, role play and case studies to facilitate the integration of key concepts presented throughout the curriculum. Concepts include communication, person-centered care, ethical decision making, end-of-life decisions, culturally</p> | 2 |

| | | |
|---------|---|---|
| | appropriate care, quality and safety, social justice, and professionalism. | |
| MSN 524 | <p>Informatics, Technology, and Professional Issues</p> <p>This interprofessional course on technology and innovations in health care will incorporate a multidisciplinary approach including nursing, medicine, social and behavioral sciences, as well as information technology and engineering perspectives to stimulate new thinking in the practice, process, and delivery of health care. The goal of the course is to stimulate thinking about new processes, technologies and strategies designed to improve overall health outcomes.</p> | 3 |

Semester Four

| Course | Description | Credits |
|---------|--|---------|
| MSN 525 | <p>Healthcare Organizational and Systems Leadership</p> <p>This course explores philosophical and theoretical perspectives of leadership using contemporary approaches and strategies to make data-driven decisions using an ethical framework to promote quality patient care. Focus is placed on specific challenges in health care and leadership at various levels (e.g., unit, organizational, and policy levels), as well as in a variety of organizational settings and environments. Interprofessional communication, teamwork, delegation, supervision, conflict resolution, healthcare finance, and supply chain management will be explored through a combination of individual projects, small and large group discussions, individual reflection, and case studies to explore the complexity of leadership styles in both extraordinarily successful and less successful leaders.</p> | 3 |
| MSN 526 | <p>Integrated Clinical Management 4: Pediatric, Obstetric, and Women's Health</p> <p>This course will introduce students to theory and application of evidence-based care for special populations including pediatric, obstetric, and women's health patients. In this nursing specialty course, students will develop a comprehensive understanding of the physiologic, psycho-social, legal, and ethical considerations impacting the nurse's role in caring for these populations. Students will learn about advanced physiologic principles of genetic screening modalities, including first and second trimester screening and testing for Down's syndrome and open neural tube defects. Students will review physiologic principles underlying screening modalities for fetal well-being during pregnancy and the birth process. Ethical considerations, legal and risk management issues for the nurse in clinical practice will be reviewed. Current practice</p> | 3 |

| | | |
|---------|---|---|
| | <p>guidelines from key professional organizations (AWHOHH, ACNM, ACOG, NICHD) will be introduced and analyzed from an evidence-based perspective.</p> | |
| MSN 527 | <p>Integrated Clinical Management 4: Pediatric, Obstetric, and Women’s Health clinical</p> <p>This clinical course will provide introductory experience in a variety of settings with specialty practice for pediatric, obstetric, and gynecologic patients. Case-studies and simulation will be used to include key concepts in quality and safety, including patient advocacy, teamwork and interprofessional communication. Neonatal resuscitation will be introduced with practical application.</p> | 2 |
| MSN 528 | <p>Professional Nursing Practice Capstone Experience</p> <p>This practicum experience is designed to facilitate transition to professional practice. Students are placed in a healthcare setting with a preceptor with expertise in that area. Most student placements are on adult acute care units, however, there may be limited opportunities for specialty preceptorships including pediatrics, OB, critical care, community/ambulatory care, public health, rural health, and mental health. Emphasis is on the synthesis of previous and concurrent learning, development of independence in nursing practice, skill in clinical decision-making and application of nursing, leadership, and management skills.</p> | 5 |
| MSN 529 | <p>Emerging Topics and Transition to Nursing Practice</p> <p>This course is designed to facilitate the transition from nursing student to professional nurse. Course concepts include ethical comportment, professional values of social justice, autonomy, advocacy, altruism, human dignity and integrity, current events, and issues within the profession, and NCLEX preparation. Students will be required to pass a mastery exit examination.</p> | 3 |

The Essentials: Core Competencies for Professional Nursing Education

Introduction

Since 1986, the American Association of Colleges of Nursing (AACN) has published the *Essentials* series that provides the educational framework for the preparation of nurses at four-year colleges and universities. In the past, three versions of Essentials were published: *The Essentials of Baccalaureate Education for Professional Nursing Practice*, last published in 2008; *The Essentials of Master's Education in Nursing*, last published in 2011; and *The Essentials of Doctoral Education for Advanced Nursing Practice*, last published in 2006. Each of these documents has provided specific guidance for the development and revision of nursing curricula at a specific degree level. Given changes in higher education, learner expectations, and the rapidly evolving healthcare system outlined in AACN's *Vision for Academic Nursing* (2019), new thinking and new approaches to nursing education are needed to prepare the nursing workforce of the future.

The Essentials: Core Competencies for Professional Nursing Education provides a framework for preparing individuals as members of the discipline of nursing, reflecting expectations across the trajectory of nursing education and applied experience. In this document competencies for professional nursing practice are made explicit. These *Essentials* introduce 10 domains that represent the essence of professional nursing practice and the expected competencies for each domain (see page 26). The domains and competencies exemplify the uniqueness of nursing as a profession and reflect the diversity of practice settings yet share common language that is understandable across healthcare professions and by employers, learners, faculty, and the public. The competencies accompanying each domain are designed to be applicable across four spheres of care (disease prevention/promotion of health and wellbeing, chronic disease care, regenerative or restorative care, and hospice/palliative/supportive care), across the lifespan, and with diverse patient populations. While the domains and competencies are identical for both entry and advanced levels of education, the sub-competencies build from entry into professional nursing practice to advanced levels of knowledge and practice. The intent is that any curricular model should lead to the ability of the learner to achieve the competencies. The *Essentials* also feature eight concepts that are central to professional nursing practice and are integrated within and across the domains and competencies.

Because this document has been shared with practice partners and with other nursing colleagues, the *Essentials* serve to bridge the gap between education and practice. The core competencies are informed by the expanse of higher education, nursing education, nursing as a discipline, and a breadth of knowledge. The core competencies also are informed by the lived experiences of those deeply entrenched in various areas where nurses practice and the synthesis of knowledge and action intersect. The collective understanding allows all nurses to have a shared vision; promotes open discourse and exchange about nursing practice; and expresses a unified voice that represents the nursing profession.

This introduction provides an overview of the evolution of nursing as a discipline, critical aspects of the profession that serve as a framework, and sufficient depth to inform nursing education across the educational trajectory (entry into practice through advanced education).

Specific citations throughout provide immediate access to pertinent references that substantiate relevancy.

Foundational Elements

The Essentials: Core Competencies for Professional Nursing Education has been built on the strong foundation of nursing as a discipline, the foundation of a liberal education, and principles of competency-based education.

Nursing as a Discipline

The *Essentials*, as the framework for preparing nursing's future workforce, intentionally reflect and integrate nursing as a discipline. The emergence of nursing as a discipline had its earliest roots in Florence Nightingale's thoughts about the nature of nursing. Believing nursing to be both a science and an art, she conceptualized the whole patient (mind, body, and spirit) as the center of nursing's focus. The influence of the environment on an individual's health and recovery was of utmost importance. The concepts of health, healing, well-being, and the interconnectedness with the multidimensional environment also were noted in her work. Although Nightingale did not use the word "caring" explicitly, the concept of care and a commitment to others were evident through her actions (Dunphy, 2015). In the same era of Florence Nightingale, nurse pioneer Mary Seacole was devoted to healing the wounded during the Crimean war.

Following Nightingale, the nursing profession underwent a period of disorganization and confusion as it began to define itself as a distinct scientific discipline. Early nursing leaders (including Mary Eliza Mahoney, Effie Taylor, Annie Goodrich, Agatha Hodgins, Esther Lucille Brown, and Loretta Ford) sought to define the functions of the nurse (Gunn, 1991; Keeling, Hehman, & Kirchgessner, 2017). Other leaders devoted their efforts to addressing discrimination, advancing policies, and creating a collective voice for the profession. It would be difficult to gain an understanding of this period of the profession's development without considering the work of Lavinia Dock, Estelle Osborne, Mary Elizabeth Carnegie, Ildaura Murillo-Rohde, and many other fearless champions.

Contemporary nursing as it is practiced today began to take shape as a discipline in the 1970s and 1980s. Leaders of this era shared the belief that the discipline of nursing was the study of the well-being patterning of human behavior and the constant interaction with the environment, including relationships with others, health, and the nurse (Rogers, 1970; Donaldson & Crowley, 1978; Fawcett, 1984; Chinn & Kramer 1983, 2018; Chinn, 2019; Roy & Jones, 2007). The concept of caring also was described as the defining attribute of the nursing discipline (Leininger, 1978; Watson, 1985). Newman (1991) spoke to the need to sharpen the focus of the discipline of nursing to better define its social relevance and the nature of its service. Newman, Smith, Pharris, and Jones (2008) affirmed caring as the focus of the discipline, suggesting that relationships were the unifying construct. Smith and Parker (2010) later posited that relationships were built on partnership, presence, and shared meaning.

In a historical analysis of literature on the discipline of nursing, five concepts emerged as defining the discipline: human wholeness; health; healing and well-being; environment-health relationship; and caring. When practicing from a holistic perspective, nurses understand the

dynamic, ongoing body-brain-mind-spirit interactions of the person, between and among individuals, groups, communities, and the environment (Smith, 2019, pp. 9-12). Smith purports that if nursing is to retain its status as a discipline, the explicit disciplinary knowledge must be an integral part of all levels of nursing. Nursing has its own science, and this body of knowledge is foundational for the next generation (Smith, 2019, p.13).

Why consider the past in a document that strives to shape the future? The historical roots of the profession help its members understand how the past has answered complex questions and shapes vital discipline concepts, traditions, policies, and even relationships. D'Antonio, et. al (2010) also emphasize the disciplinary insights gained by considering the different histories that challenge the dominant and accepted historical narrative. Undoubtedly, many experts have contributed to the development of the discipline as it exists today. While the work of early and current theorists is extensive, Green (2018) notes that none have been accepted as completely defining the nature of nursing as a discipline. No doubt, nursing as a discipline will continue to evolve as society and health care evolves.

Advancing the Discipline of Nursing

The continued development of nursing as a unique discipline requires an intentional approach. Jairath et. al (2018) stated that any further development of the discipline should have the capacity to directly transform the patient's health experience. A new social order may be necessary in which scientists, theorists, and practitioners work together to address questions related to the interplay of big data and nursing theory. Nursing graduates, particularly at the advanced nursing practice level, must be well-prepared to think ethically, conceptually, and theoretically to better inform nursing care. Students must not only be introduced to the knowledge and values of the discipline, but they must be guided to practice from a disciplinary perspective – by seeing patients through the lens of wholeness and interconnectedness with family and community; appreciating how the social, political, and economic environment influences health; attending to what is most important to well-being; developing a caring-healing relationship; and honoring personal dignity, choice, and meaning. Smith and McCarthy (2010) spoke to the need to provide a foundation for practitioners in the knowledge of the discipline. Without this knowledge, the persistent challenge of differentiating nursing and the professional levels of practice will continue.

Knowledge of the discipline grows in graduate education, as students apply and generate nursing knowledge in their advanced nursing roles or develop and test theories as researchers. Nursing practice should be guided by a nursing perspective while functioning within an interdisciplinary arena. To appropriately educate the next generation of nurses, disciplinary knowledge must be leveled to reflect the competencies or roles expected at each level.

The Value of a Liberal Education

In higher education, every academic discipline is grounded in a unique body of knowledge that distinguishes that discipline. Through the study of the humanities, social sciences, and natural sciences, students develop the capacity to engage in socially valued work and civic leadership in society. Liberal education exposes students to a broad worldview, multiple disciplines, and ways of knowing through specific coursework; however, the richness of perspective and knowledge is woven throughout the nursing curriculum as these are integral to the full scope of nursing

practice (Hermann, 2004). Successful integration of liberal and nursing education provides graduates with knowledge of human cultures, including spiritual beliefs, as well as the physical and natural worlds supporting an approach to practice. The study of history, critical race theories, critical theories of nursing, critical digital studies, planetary health and climate science, politics, public policies, policy formation, fine arts, literature, languages, and the behavioral, biological, and natural sciences are key to the understanding of one's self and others, civil readiness, and engagement and forms the basis for clinical reasoning and subsequent clinical judgments.

A liberal education creates the foundation for intellectual and practical abilities within the context of nursing practice as well as for engagement with the larger community, locally and globally. A hallmark of liberal education is the development of a personal value-system that includes the ability to act ethically regardless of the situation and where students are encouraged to define meaningful personal and professional goals with a commitment to integrity, equity, and social justice. Liberally educated graduates are well prepared to integrate knowledge, skills, and values from the arts, sciences, and humanities to provide safe, quality care; advocate for patients, families, communities, and populations; and promote health equity and social justice. Equally important, nursing education needs to ensure an understanding of the intersection of bias, structural racism, and social determinants with healthcare inequities and promote a call to action.

Competency-Based Education

Competency-based education is a process whereby students are held accountable to the mastery of competencies deemed critical for an area of study. Competency-based education is inherently anchored to the outputs of an educational experience versus the inputs of the educational environment and system. Students are the center of the learning experience, and performance expectations are clearly delineated along all pathways of education and practice. Across the health professions, curriculum, course work, and practice experiences are designed to promote responsible learning and assure the development of competencies that are reliably demonstrated and transferable across settings. By consistently assessing their own performance, students develop the ability to reflect on their own progress towards the achievement of learning goals and the ongoing attainment of competencies required for practice.

Advances in learning approaches and technologies, understanding of evolving student learning styles and preferences, and the move to outcome-driven education and assessment all point to a transition to competency-based education. This learning approach is linked to explicitly defined performance expectations, based on observable behavior, and requires frequent assessment using diverse methodologies and formats. Designed in this fashion, competency-based education produces learning and behavior that endures, since it encourages conscious connections between knowledge and action. Learners who put knowledge into action grasp the interrelatedness of their learning with both theoretical perspectives and the world of their professional work. Achieving a specific competency gives meaning to the theoretical and assists in understanding and taking on a professional identity.

Further, today's students increasingly are taking responsibility for their own learning and, varied as they are in age and experience, respond to active learning strategies. Active learning involves

making an action out of knowledge—using knowledge to reflect, analyze, judge, resolve, discover, interact, and create. Active learning requires clear information regarding what is to be learned, including guided practice in using that information to achieve a competency. It also requires regular assessment of progress towards mastery of the competency and frequent feedback on successes and areas needing development. Additionally, students must learn how to assess their own performances to develop the skill of continual self-reflection in their own practice.

Stakeholders (employers, students, and the public) expect all nursing graduates to exit their education programs with defined and observable skills and knowledge. Employers desire assurance that graduates have expected competencies—the ability “to know” and also “to do” based on current knowledge. Moving to a competency-based model fosters intentionality of learning by defining domains, associated competencies, and performance indicators for those competencies. Currently, there is wide variability in graduate capabilities. Therefore, there is a need for consistency enabled by a competency-based approach to nursing education.

A standard set of definitions frame competency-based education in the health professions and was adopted for these *Essentials*. Adoption of common definitions allows multiple stakeholders involved in health education and practice to share much of the same language. These definitions are included in the glossary (p. 59).

Nursing Education for the 21st Century

In addition to the foundational elements on which the *Essentials* has been developed, other factors have served as design influencers. What does the nursing workforce need to look like for the future, and how do nursing education programs prepare graduates to be “work ready”? Nursing education for the 21st century ought to reflect a number of contemporary trends and values and address several issues to shape the future workforce, including diversity, equity, and inclusion; four spheres of care (including an enhanced focus on primary care); systems-based practice; informatics and technology; academic-practice partnerships; and career-long learning.

Diversity, Equity, and Inclusion

Shifting U.S. population demographics, health workforce shortages, and persistent health inequities necessitate the preparation of nurses able to address systemic racism and pervasive inequities in health care. The existing inequitable distribution of the nursing workforce across the United States, particularly in underserved urban and rural areas, impacts access to healthcare services across the continuum from health promotion and disease prevention, to chronic disease management, to restorative and supportive care. Diversity, equity, and inclusion—as a value—supports nursing workforce development to prepare graduates who contribute to the improvement of access and care quality for underrepresented and medically underserved populations (AACN, 2019). Diversity, equity, and inclusion require intentionality, an institutional structure of social justice, and individually concerted efforts. The integration of diversity, equity, and inclusion in this *Essentials* document moves away from an isolated focus on these critical concepts. Instead, these concepts, defined in competencies, are fully represented and deeply integrated throughout the domains and expected in learning experiences across curricula.

Making nursing education equitable and inclusive requires actively combating structural racism, discrimination, systemic inequity, exclusion, and bias. Holistic admission reviews are recommended to enhance the admission of a more diverse student population to the profession (AACN, 2020). Additionally, an equitable and inclusive learning environment will support the recruitment, retention, and graduation of nursing students from disadvantaged and diverse backgrounds. Diverse and inclusive environments allow examination of any implicit or explicit biases, which can undermine efforts to enhance diversity, equity, and inclusion. When diversity is integrated within inclusive educational environments with equitable systems in place, biases are examined, assumptions are challenged, critical conversations are engaged, perspectives are broadened, civil readiness and engagement are enhanced, and socialization occurs. These environments recognize the value of and need for diversity, equity, and inclusion to achieve excellence in teaching, learning, research, scholarship, service, and practice.

Academic nursing must address structural racism, systemic inequity, and discrimination in how nurses are prepared. Nurse educators are called to critically evaluate policies, processes, curricula, and structures for homogeneity, classism, color-blindness, and non-inclusive environments. Evidence-based, institution-wide approaches focused on equity in student learning and catalyzing culture shifts in the academy are fundamental to eliminating structural racism in higher education (Barber et al., 2020). Only through deconstructive processes can academic nursing prepare graduates who provide high quality, equitable, and culturally competent health care.

Finally, nurses should learn to engage in ongoing personal development towards understanding their own conscious and unconscious biases. Then, acting as stewards of the profession, they can fulfill their responsibility to influence both nursing and societal attitudes and behaviors toward eradicating structural/systemic racism and discrimination and promoting social justice.

Four Spheres of Care

Historically, nursing education has emphasized clinical education in acute care. Looking at current and future needs, it is becoming increasingly evident that the future of healthcare delivery will occur within four spheres of care: 1) disease prevention/promotion of health and well-being, which includes the promotion of physical and mental health in all patients as well as management of minor acute and intermittent care needs of generally healthy patients; 2) chronic disease care, which includes management of chronic diseases and prevention of negative sequelae; 3) regenerative or restorative care, which includes critical/trauma care, complex acute care, acute exacerbations of chronic conditions, and treatment of physiologically unstable patients that generally requires care in a mega-acute care institution; and 4) hospice/palliative/supportive care, which includes end-of-life care as well as palliative and supportive care for individuals requiring extended care, those with complex, chronic disease states, or those requiring rehabilitative care (Lipstein et al., 2016; AACN, 2019).

Entry-level professional nursing education ensures that graduates demonstrate competencies through practice experiences with individuals, families, communities, and populations across the lifespan and within each of these four spheres of care. The workforce of the future needs to attract and retain registered nurses who choose to practice in diverse settings, including community settings to sustain the nation's health. Expanding primary care into communities will enable our healthcare delivery systems to achieve the Quadruple Aim of improving patient

experiences (quality and satisfaction), improving the health of populations, decreasing per capita costs of health care, and improving care team well-being (Bowles et al., 2018). It is time for nursing education to refocus and move beyond some long-held beliefs such as: primary care content is not important because it is not on the national licensing exam for registered nurses; students only value those skills required in acute care settings; and faculty preceptors only have limited community-based experiences. Recommendations from the Josiah Macy Foundation Conference (2016) on expanding the use of registered nursing in primary care provides a call to education and practice to place more value on primary care as a career choice, effectively changing the culture of nursing and health care. A collaborative effort between academic and practice leaders is needed to ensure this culture change and educate primary care practitioners about the value of the registered nurse role.

Systems-Based Practice

Integrated healthcare systems that require coordination across settings as well as across the lifespan of diverse individuals and populations are emerging. Healthcare systems are revising strategic goals and reorganizing services to move more care from the most expensive venues – inpatient facilities and emergency departments – to primary care and community settings. Consequently, nurse employment settings also are shifting, creating a change in workforce distribution and the requisite knowledge and skills necessary to provide care in those settings. Knowledge differentiating equity and equality in healthcare systems and systems-based practice is essential. Nurses in the future are needed to lead initiatives to address structural racism, systemic inequity, and discrimination. Equitable healthcare better serves the needs of all individuals, populations, and communities.

Importantly, an understanding of how local, national, and global structures, systems, politics, and rules and regulations contribute to the health outcomes of individual patients, populations, and communities will support students in developing agility and advocacy skills. Factors such as structural racism, cost containment, resource allocation, and interdisciplinary collaboration are considered and implemented to ensure the delivery of high quality, equitable, and safe patient care (Plack et al., 2018).

Informatics and Technology

Informatics increasingly has been a focus in nursing education, correlating with the advancement in sophistication and reach of information technologies, the use of technology to support healthcare processes and clinical thinking, and the ability of informatics and technology to positively impact patient outcomes. Health information technology is required for person-centered service across the continuum and requires consistency in user input, proper process, and quality management. While different specialty roles in nursing may require varying depth and breadth of informatics competency, basic informatics competencies are foundational to all nursing practice. Much work will be required to achieve full integration of core information and communication technologies competencies into nursing curricula.

Engagement and Experience

The future consumers of health care are changing. They are transitioning from passive participants in medically focused acute care environments to engaged participants of healthcare services. They actively participate in managing not only their chronic illnesses but also acute

care exacerbations with an increasing focus on prevention and wellness. Thus, nurses need an understanding of consumer engagement and experience across all settings as an essential component of person-centered, quality care.

In today's society, many people seek information and use technology to help make informed decisions about their health. Nurses seek to help patients determine what information to use and how to use it. Individuals want to know about their options when it comes to healthcare services, which extends to using websites to provide information on provider quality and performance, comparing prices for common procedures, and reviewing the effectiveness of treatments and care approaches (Adler-Milstein & Sinaiko, 2019). Gaffney (2015) stated that as consumers shoulder more of the financial responsibility for their health care, they became more educated about available options. Studies have shown that patients who are engaged in decision-making regarding their care have better outcomes and lower costs (Gaffney, 2015).

Meaningful practice experiences in health care start with the individual who is actively engaged in the journey throughout the continuum of care. Each interaction between the recipient of care and the nurse or healthcare provider creates an experience. Practice experience is defined as "the sum of all interactions, shaped by an organization's culture that influence patient perceptions across the continuum of care." (Wolf, Niederhauser, Marshburn, & LaVela, 2014, p. 8). Within that interactive experience, the attitudes and the behaviors of the nurse matter a great deal. Nurses are identified as one of the most trusted professionals in the United States. Mutual trust is foundational to an interactive and ongoing relationship that will enhance a positive experience of care. Those with positive experiences of care often have better outcomes.

Individual engagement has been described as "the blockbuster drug of the 21st century" (Dentzer, 2013). Who better to engage individuals in their care than nurses? Nursing practice has focused consistently on individual care and ongoing communication with family members and care providers. Sherman points to the fact that effective individual/family involvement leads to safer and higher quality care. In addition, individual/patient engagement can be directly correlated with increased reimbursement to hospitals based on achieving health outcomes. Nurses in all settings and across the continuum of care contribute to creating a culture that supports full engagement of individuals in their care and in the development of policies, which will provide guidance to the improvement of individual engagement (Sherman, 2014).

Academic-Practice Partnerships

Partnerships and collaborative team-based care are the cornerstones of safe, effective care whether it be for individuals, families, communities, or populations. Academic-practice partnerships serve to recruit and retain nurses and to support the practice and academic enterprise in relation to mutual research, leadership development, and a shared commitment to redesign practice environments. Such partnerships also have the potential to facilitate the ability of nurses to achieve educational and career advancement, prepare nurses of the future to practice and lead, provide mechanisms for career-long learning, and provide a structure for transition to practice programs. Successful academic-practice partnerships are predicated on respect, relationship, reciprocity, and co-design.

The 2016 report *Advancing Healthcare Transformation: A New Era for Academic Nursing* identified a path for achieving enhanced partnerships between nursing schools and academic

health centers with the goals of achieving improved healthcare outcomes, fostering new models for innovation, and advancing integrated systems of health care. While focused primarily on academic health centers, the recommendations apply to partnerships between non-academic health centers and schools of nursing as well. The recommendations include enhancing the clinical practice of academic nursing; partnering in the preparation of the nurses of the future; collaborating to develop workforce plans in partnership with the health system; integrating academic nursing into population health initiatives; partnering in the implementation of Accountable Care; and partnering for optimal patient care and healthcare delivery (AACN, 2016).

Career-Long Learning

Current trends in higher education focus on supplemental methods of awarding credit and recognition for additional learning which has implications for career-long learning. Emerging educational methods should be considered as possible additions in the development of curriculum pathways in contemporary nursing education. For example, the use of e-portfolios, which may be used to record competency achievement and educational milestones and continued throughout one's career, can be used to document personal development plans, badges, certifications, employment appraisals, and reflections on clinical events to establish meaning from various encounters.

Awarding of micro-credentials or badges by academic institutions also is becoming popular. Badges recognize incremental learning in visible ways and can support career development (Educause, 2018). Stackable credentials can be accumulated over time and facilitate one's professional development along a career trajectory (Department of Labor, 2015). Open access courses represent another way to learn a variety of skills or subject matter. All of these are important considerations in basic and advanced nursing education.

Domains and Concepts

Domains for Nursing

Domains are broad distinguishable areas of competence that, when considered in the aggregate, constitute a descriptive framework for the practice of nursing. These *Essentials* include 10 domains that were adapted from the interprofessional work initiated by Englander (2013) and tailored to reflect the discipline of nursing.

This document delineates the domains that are essential to nursing practice, including how these are defined, what competencies should be expected for each domain at each level of nursing, and how those domains and competencies both distinguish nursing and relate to other health professions. Each domain has a descriptor (or working definition) and a contextual statement. The contextual statement (presented in the Domain, Competency, Sub-Competency Table found beginning on page 26) provides a framing for what the domain represents in the context of nursing practice – thus providing an explanation for how the competencies within the domain should be interpreted. The domain designations, descriptors, and contextual statements may evolve over time to reflect future changes in healthcare and nursing practice. Although the domains are presented as discrete entities, the expert practice of nursing requires integration of most of the domains in every practice situation or patient encounter, thus they provide a robust framework for competency-based education. The domains and descriptors used in the *Essentials* are listed below.

- *Domain 1: Knowledge for Nursing Practice*
Descriptor: Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.
- *Domain 2: Person-Centered Care*
Descriptor: Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.
- *Domain 3: Population Health*
Descriptor: Population health spans the healthcare delivery continuum from public health prevention to disease management of populations and describes collaborative activities with both traditional and non-traditional partnerships from affected communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes.
- *Domain 4: Scholarship for Nursing Discipline*
Descriptor: The generation, synthesis, translation, application, and dissemination of nursing knowledge to improve health and transform health care.

- *Domain 5: Quality and Safety*
Descriptor: Employment of established and emerging principles of safety and improvement science. Quality and safety, as core values of nursing practice, enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.
- *Domain 6: Interprofessional Partnerships*
Descriptor: Intentional collaboration across professions and with care team members, patients, families, communities, and other stakeholders to optimize care, enhance the healthcare experience, and strengthen outcomes.
- *Domain 7: Systems-Based Practice*
Descriptor: Responding to and leading within complex systems of health care. Nurses effectively and proactively coordinate resources to provide safe, quality, equitable care to diverse populations.
- *Domain 8: Informatics and Healthcare Technologies*
Descriptor: Information and communication technologies and informatics processes are used to provide care, gather data, form information to drive decision making, and support professionals as they expand knowledge and wisdom for practice. Informatics processes and technologies are used to manage and improve the delivery of safe, high-quality, and efficient healthcare services in accordance with best practice and professional and regulatory standards.
- *Domain 9: Professionalism*
Descriptor: Formation and cultivation of a sustainable professional nursing identity, accountability, perspective, collaborative disposition, and comportment that reflects nursing's characteristics and values.
- *Domain 10: Personal, Professional, and Leadership Development*
Descriptor: Participation in activities and self-reflection that foster personal health, resilience, and well-being, lifelong learning, and support the acquisition of nursing expertise and assertion of leadership.

Concepts for Nursing Practice

In addition to domains, there are featured concepts associated with professional nursing practice that are integrated within the *Essentials*. A concept is an organizing idea or a mental abstraction that represents important areas of knowledge. A common understanding of each concept is achieved through characteristics and attributes. Many disciplines, like nursing, have numerous concepts. The featured concepts are well-represented in the nursing literature and thus also are found throughout the *Essentials* and verified through a crosswalk analysis. Specifically, the featured concepts are found in the introduction, across the domains (within domain descriptors and contextual statements), and within the competencies and sub-competencies. Although not every concept is found within every domain, each concept is represented in most domains – and all domains have multiple concepts represented.

The featured concepts found within the *Essentials* are not of ‘lesser importance’ than a domain. Each of these concepts serves as a core component of knowledge, facts, and skills across multiple situations and contexts within nursing practice. Each concept functions as a hub for transferable knowledge, thus enhancing learning when learners make cognitive links to other information through mental constructs. The integration of concepts within the competencies and sub-competencies is essential for the application throughout the educational experience. As an example, can you imagine delivering person-centered care without also considering diversity, equity, and inclusion? Can you imagine having a conversation about population health without considering ethics and health policy? These concepts truly are interrelated and interwoven within the domains and competencies, serving as a foundation to students’ learning. The featured concepts are:

- *Clinical Judgment*

As one of the key attributes of professional nursing, clinical judgment refers to the process by which nurses make decisions based on nursing knowledge (evidence, theories, ways/patterns of knowing), other disciplinary knowledge, critical thinking, and clinical reasoning (Manetti, 2019). This process is used to understand and interpret information in the delivery of care. Clinical decision making based on clinical judgment is directly related to care outcomes.

- *Communication*

Communication, informed by nursing and other theories, is a central component in all areas of nursing practice. Communication is defined as an exchange of information, thoughts, and feelings through a variety of mechanisms. The definition encompasses the various ways people interact with each other, including verbal, written, behavioral, body language, touch, and emotion. Communication also includes intentionality, mutuality, partnerships, trust, and presence. Effective communication between nurses and individuals and between nurses and other health professionals is necessary for the delivery of high quality, individualized nursing care. With increasing frequency, communication is delivered through technological modalities. Communication also is a core component of team-based, interprofessional care and closely interrelated with the concept Social Determinants of Health (described below).

- *Compassionate Care*

As an essential principle of person-centered care, compassionate care refers to the way nurses relate to others as human beings and involves “noticing another person’s vulnerability, experiencing an emotional reaction to this, and acting in some way with them in a way that is meaningful for people” (Murray & Tuqiri, 2020). Compassionate care is interrelated with other concepts such as caring, empathy, and respect and is also closely associated with patient satisfaction.

- *Diversity, Equity, and Inclusion*

Collectively, diversity, equity, and inclusion (DEI) refers to a broad range of individual, population, and social constructs and is adapted in the *Essentials* as one of the most visible concepts. Although these are collectively considered a concept, differentiation of each conceptual element leads to enhanced understanding.

Diversity references a broad range of individual, population, and social characteristics, including but not limited to age; sex; race; ethnicity; sexual orientation; gender identity; family structures; geographic locations; national origin; immigrants and refugees; language; any impairment that substantially limits a major life activity; religious beliefs; and socioeconomic status. Inclusion represents environmental and organizational cultures in which faculty, students, staff, and administrators with diverse characteristics thrive. Inclusive environments require intentionality and embrace differences, not merely tolerate them (AACN, 2017; Bloomberg, 2019). Everyone works to ensure the perspectives and experiences of others are invited, welcomed, acknowledged, and respected in inclusive environments. Equity is the ability to recognize the differences in the resources or knowledge needed to allow individuals to fully participate in society, including access to higher education, with the goal of overcoming obstacles to ensure fairness (Kranich, 2001). To have equitable systems, all people should be treated fairly, unhampered by artificial barriers, stereotypes, or prejudices (Cooper, 2016). Two related concepts that fit within DEI include structural racism and social justice. (See the glossary for definitions of structural racism and social justice.)

- *Ethics*

Core to professional nursing practice, ethics refers to principles that guide a person's behavior. Ethics is closely tied to moral philosophy involving the study of or examination of morality through a variety of different approaches (Tubbs, 2009). There are commonly accepted principles in bioethics that include autonomy, beneficence, non-maleficence, and justice (ANA 2015; ACNM, 2015; AANA, 2018; ICN, 2012). The study of ethics as it relates to nursing practice has led to the exploration of other relevant concepts, including moral distress, moral hazard, moral community, and moral or critical resilience.

- *Evidence-Based Practice*

The delivery of optimal health care requires the integration of current evidence and clinical expertise with individual and family preferences. Evidence-based practice is a problem-solving approach to the delivery of health care that integrates best evidence from studies and patient care data with clinician expertise and patient preferences and values (Melnyk, Fineout-Overhold, Stillwell, & Williamson, 2010). In addition there is a need to consider those scientific studies that ask: whose perspectives are solicited, who creates the evidence, how is that evidence created, what questions remain unanswered, and what harm may be created? Answers to these questions are paramount to incorporating meaningful, culturally safe, evidence-based practice (Nursing Mutual Aid, 2020).

- *Health Policy*

Health policy involves goal directed decision-making about health that is the result of an authorized public decision-making process (Keller & Ridenour, 2021). Nurses play critical roles in advocating for policy that impacts patients and the profession, especially when speaking with a united voice on issues that affect nursing practice and health outcomes. Nurses can have a profound influence on health policy by becoming engaged in the policy process on many levels, which includes interpreting, evaluating, and leading policy change.

- *Social Determinants of Health*

Determinants of health, a broader term, include personal, social, economic, and environmental factors that impact health. Social determinants of health, a primary component of determinants of health “are the conditions in the environment where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality of life outcomes and risks.”

The social determinants of health contribute to wide health disparities and inequities in areas such as economic stability, education quality and access, healthcare quality and access, neighborhood and built environment, and social and community context (Healthy People, 2030). Nursing practices such as assessment, health promotion, access to care, and patient teaching support improvements in health outcomes. The social determinants of health are closely interrelated with the concepts of diversity, equity, and inclusion, health policy, and communication.

Competencies and Sub-Competencies

The competencies identified in this *Essentials* document provide a bridge between the current and future needs of practice and the requisite education to prepare a competent practitioner. Competence develops over time, is progressive, and reflects the impact of internal and external factors and experiences of the student. Internal factors include education, experience, knowledge, and professional orientation, among others. External forces include the complexity of the learning experience and professional autonomy. While knowledge is essential to the development of competence, it does not in and of itself validate competence (Currier, 2019). Rather, learners progress to successive levels of competence by demonstrating achievement of expectations across the span of their education and practice experience. Students are successful when they meet and sustain measurable competence at each level of performance expectation and are able to transfer their competence across different practice experiences and settings (Josiah Macy Foundation, 2017).

All competencies, organized within the 10 domains, are broad in scope and cross all levels and areas of nursing practice. The competency is intentionally written as a short statement; therefore, it is necessary to be familiar with the contextual statement within the parent domain to fully understand the competency. In other words, the competency is interpreted as a component within the domain. It also should be noted that there is intentional overlap of competencies in several domains to account for differences in the competency or sub-competency context in different domains.

Each competency statement has multiple sub-competencies written at two levels to reflect learner expectations for entry-level and advanced nursing education. These sub-competencies are designed to ‘paint a picture’ of how the competency is achieved at each level. The sub-competencies are designed to be understandable, observable, and measurable by learner, faculty, and future employers. Competencies mature over time and become more sophisticated with ongoing practice.

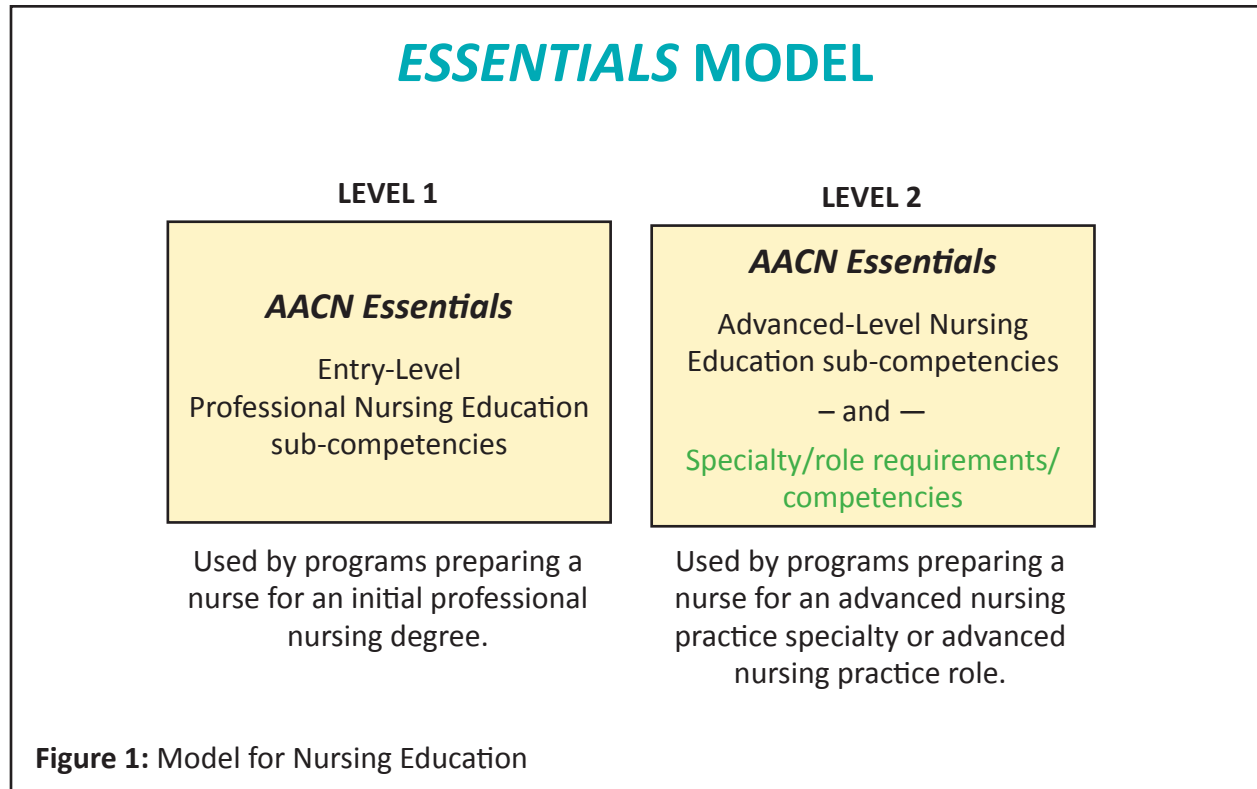

A New Model for Nursing Education

These *Essentials* represents a new direction for nursing education, influenced by AACN's *Vision for Academic Nursing* (AACN, 2019), setting in place a new model for preparing professional nurses, which includes a transition to competency-based education. This model provides the structure across education programs and provides a mechanism to adapt to future changes within nursing education.

Currently, multiple educational programs and degree pathways exist that prepare nurses for similar roles. As an example, there are several types of programs and degrees that prepare students to become a registered nurse, and there are multiple education programs and paths to prepare a nurse practitioner (NP) and multiple types of NP certification. These multiple program options confuse external stakeholders as well as those within our own discipline regarding differences between an academic degree and a role – as if the academic degree signifies a specific nursing role. The new model is an intentional departure from the previous versions of the *Essentials* that were aligned to an academic degree. Thus, a primary intent of the *Essentials* is to create more consistency in graduate outcomes, influenced by the robustness of the learning experiences and demonstration of competencies. By emphasizing the attainment of competencies within an academic program, employers will have a clear expectation of knowledge and skill sets of nursing graduates.

Two levels of sub-competencies reflect the educational stages of nurses as they enter professional practice and as they return to school to advance their education (see Figure 1). The first level sub-competencies set the foundation for nurses entering professional practice. These level one (entry-level) competencies are used within curricula for prelicensure preparation as well as professional nursing degree completion pathways for nurses with initial preparation at the associate degree or diploma level. Although learning experiences may vary across individual programs, they provide an opportunity for learners to demonstrate attainment of competencies in multiple and authentic contexts over time (not a “one and done”/checklist approach).

The second level sub-competencies build and expand the competence of the nurse seeking advanced education in nursing and broadens the breadth of experiences in context and complexity as compared to graduates of entry-level programs. Advanced nursing education affords the student the opportunity to focus on an advanced nursing practice specialty or advanced nursing practice role. Level 2 sub-competencies form the foundation for all advanced education, and as conceptualized, apply to all advanced nursing practice specialties and advanced nursing practice roles. Referencing Thorne's use of “nursing's angle of vision” reinforces the importance of nurses using the unique knowledge and insight of the profession to inform any practice role and to impact the challenges in health care. Competencies designated for an advanced nursing practice specialty (informatics, administration/practice leadership, public health/population health, health policy) or an advanced practice nursing role (certified nurse practitioner, certified nurse-midwife, certified clinical nurse specialist, certified registered nurse anesthetist) are integrated with and complement the *Essentials* competencies.

These *Essentials* represent an opportunity for a future characterized by greater clarity as it relates to expectations of graduates and a more disciplined approach to nursing education. Competencies are used within the academic program as core expectations, thus setting a common standard. Additional elements within a degree plan will allow schools to differentiate degree paths using the same sub-competencies and to distinguish themselves in alignment with various institutional missions. This model adapts to the current state of nursing education, and perhaps more importantly, provides a path for an evolving trajectory for nursing education. Over time, higher education, stakeholder demands, nursing regulatory standards, and economics are among the many forces that will drive the direction and pace of change for nursing education in the future. This model has been designed to adapt to such future changes, not only for the degrees offered, but also for recognized areas of emphasis at the advanced education level by coupling with specialty competencies and/or certification standards.

The *Essentials* do not apply directly to the preparation of nurse researchers in a PhD (or other nursing research-focused) program. However, the second-level sub-competencies could be used by PhD programs to guide core courses for doctoral nursing, particularly for programs offering baccalaureate to PhD degrees. Additionally, for nursing programs offering both DNP and PhD degrees and/or PhD to DNP or DNP to PhD options, the second-level core sub-competencies could form the basis for shared core courses between the two doctoral degree programs – representing efficiencies in program delivery as well as for more seamless pathways from one degree to the other.

Implementing the *Essentials*: Considerations for Curriculum

The domains, competencies, and concepts presented in the *Essentials* provide the platform for curriculum design and program assessment with an intent to produce consistency in outcomes expected of graduates. Although these are major elements incorporated within a curriculum for learning and assessment, they are not to be interpreted as representing the curriculum in its entirety. In other words, it is not intended for courses within nursing curricula to mirror the 10 domains and eight concepts. Instead, the elements used as the *Essentials* framework (domains, concepts, and competencies) should be integrated throughout and across the curriculum. A scaffolded approach ensures students interface with competencies in multiple contexts and with increasing complexity. Nursing programs have a great deal of flexibility in the development and design of curricula, thus preserving the ability of nursing programs to be unique or innovative.

Outcomes, when referred to as student learning outcomes, describe the desired outcomes of the graduate at the completion of the program. The student learning outcomes will reflect attainment of all competencies in addition to any relevant specialty/role competencies and other identified expectations. Course design within curricula reflect the expectations of student learning with clear linkage from course objectives/competencies from within and across courses to end of program student learning outcomes, written as course learning outcomes or course competencies. For this reason, course outcomes should link to the *Essentials* competencies and concepts. Intentional teaching strategies are designed and incorporated throughout the curriculum in multiple contexts and with increasing complexity to provide students multiple opportunities for learning and demonstrating competencies. For the foreseeable future, minimum requirements for practicum experiences are deemed important to provide consistent and quality preparation at both the entry- and advanced-levels for professional nursing practice.

Competencies are assessed as the learner progresses throughout the program; therefore, a robust program assessment plan is needed to measure students' achievement of competencies by the end of the program. Some programs may wish to create "progression indicators" at specified points within a program of study to track learners' achievement of competencies. To demonstrate the integration of competencies across multiple domains with increasing complexity, performance assessments should be integrated in the curriculum throughout the program of study. As such, assessments are performance based and serve as both a learning experience and an evaluation tool. Performance assessment is a multidimensional process, integral to learning, that involves observation and judgment of each student's performance on the basis of explicit criteria, with feedback to the student for improving learning and competency.

In the previous section, the *Essentials Model* featuring two levels of professional nursing education (entry and advanced) was introduced. While the domains, competencies, and concepts are identical for both entry and advanced levels of education, *sub-competencies* are used to differentiate expectations for entry (Level 1) and advanced (Level 2) professional nursing education (see Figure 1). These two levels of sub-competencies reflect the educational stages of nurses—as they enter professional nursing practice and as they advance their education—regardless of the program of study they are completing to advance their education. The following sections detail the expectations for curricula at each of these two levels.

Entry-Level Professional Nursing Education

Programs preparing nurses to enter professional nursing practice (either through prelicensure preparation or through a degree completion pathway for nurses with initial preparation with an associate or diploma degree) use Level 1 sub-competencies within the curriculum. Entry-level professional nursing programs prepare graduates as a generalist for practice across the lifespan and with diverse populations and in four spheres of practice.

Entry-Level Professional Nursing Degree Options

Pre-licensure Programs

Entry-Level Professional Nursing Education sub-competencies (Level 1) are applied across any curriculum preparing for entry to professional nursing practice. Content learned within prerequisite courses is incorporated into the learning and assessment of the sub-competencies as applicable, and attainment of sub-competencies are applied within prerequisite courses. This does not mean that every sub-competency and concept is applied in every course, but it does mean that sub-competencies are not addressed in one course and then disregarded for the remainder of the program. Outcome measures include evidence of attainment of Level 1 sub-competencies, pass rates on the NCLEX-RN® (for traditional and accelerated tracks), and other institutional requirements.

Post-Licensure Degree Programs

Level 1 core sub-competencies also are used in post-licensure or degree completion, first professional programs. Because learners in these programs are already licensed registered nurses, the Level 1 sub-competencies build on knowledge and skills acquired in their initial nursing education program. Verification of prior competency achievement in some domains may result in a shorter timeframe needed to prepare learners in these programs.

All learners in entry-level professional nursing education programs (pre-licensure and post-licensure [degree-completion] programs) will engage in direct patient care learning activities in all four spheres of care and across the lifespan.

Spheres of Care and Entry-Level Professional Nursing Education

All entry-level professional nurses need knowledge and proficiencies to practice across a variety of settings. Accordingly, curricula for entry-level professional nursing education prepare the learner for generalist practice across the lifespan and with diverse populations, focusing on four spheres of care: promotion of health and well-being/disease prevention; chronic disease care; regenerative or restorative care; and hospice/palliative/supportive care (AACN, 2019; Lipstein et al., 2016; Figure 2). Didactic, simulated, laboratory, and clinical learning experiences prepare nurses to practice in these diverse settings. Level 1 sub-competencies apply across the spheres of care, requiring learners to

Figure 2: Four Spheres of Care

demonstrate competencies in multiple contexts and settings. Demonstration of the Level 1 sub-competencies by the end of the program will enable the new professional nurse to practice as a generalist in any setting with diverse populations and with all ages.

Although all students will have learning experiences across all four spheres of care, entry-level professional programs could create opportunities for students to gain additional education (through immersion experiences, electives, badges, or certificates) in any of the four spheres. Such a path would allow a graduate to have a defined area of emphasis (if desired) upon graduation, and/or to attain a documented area of emphasis in a post-entry level program certificate option.

Clinical Expectations

Entry-level professional nursing education programs provide rich and varied opportunities for practice experiences (both direct and indirect care experiences) across the four spheres of care, designed to assist the graduate to achieve Level 1 sub-competencies upon completion of the program. Theoretical learning becomes a reality as students are coached to make cognitive connections between the cases or situations presented in the classroom, simulation, or laboratory and in actual practice settings. Clinical experiences also assist the graduate to develop proficiency in cognitive, psychomotor, and affective learning. Clinical experiences are essential for students to care for a variety of individuals, families, groups, and populations across the lifespan and across the four spheres of care. Clinical learning provides opportunities for a student to enhance the provision of care and gain the skills needed to be an effective member of an interprofessional team; thus, interprofessional experiences in a variety of practice settings are essential.

Graduates of all types of entry-level professional nursing education programs need sufficient practice experiences (both direct and indirect care experiences) to demonstrate end-of-program learning outcomes inclusive of all Level 1 sub-competencies. *All learners in entry-level professional nursing education programs (pre-licensure and post-licensure [degree-completion] programs) will engage in direct patient care learning activities in all four spheres of care and across the life span and provide clear evidence of student (Level 1) competency achievement.*

Clinical Sites

Nursing programs are responsible for ensuring clinical placements are safe, supportive, and conducive for learning by individual students or groups of students. The program is responsible for providing sufficient and appropriate clinical sites/placements for students to demonstrate attainment of Level 1 sub-competencies. The program faculty assesses clinical sites to determine that, on the aggregate, clinical experiences provide students learning opportunities to foster interprofessional team practice and to provide care within the four spheres of care and with care recipients from diverse backgrounds and cultures, from different genders and age groups and with different religious and spiritual practices, including those who may be considered most vulnerable. Programs are responsible for informing clinical educators or preceptors about the specific learning that is expected and occurring in didactic and laboratory settings and provide appropriate learning opportunities across settings to reinforce learning as well as demonstrate achievement of competencies (Level 1 sub-competencies) across the 10 *Essentials* domains.

Simulation

Simulation experiences represent an important component of clinical education, serving as a valuable augmentation to direct and indirect care within healthcare settings. Laboratory and simulation experiences provide an effective, safe environment for learning and demonstrating competencies. However, care experiences with actual individuals or groups continue to be the most important component of clinical education. A landmark study conducted by the National Council of State Boards of Nursing concluded that for pre-licensure students “substituting high-quality simulation experiences for up to half of traditional clinical hours produces comparable end-of-program educational outcomes” (Hayden et al., 2014, p. S3). Simulation cannot substitute for all direct care practice experiences in any one sphere or for any one age group. Also, simulation learning experiences should align with best practice standards such as those developed by the International Nursing Association for Clinical Simulation and Learning (INACSL) or the Society for Simulation in Healthcare (SSH). The use of simulation in the curriculum as a replacement of direct patient clinical/practice hours or experiences is also determined by requirements of regulatory entities (i.e., licensing and accrediting bodies).

Practice Synthesis Experience/Immersion

Development of competency attainment is facilitated through use of focused and sustained practice experiences. Immersion experiences provide the learner with the opportunity to integrate the Level 1 sub-competencies. Entry-level professional nursing programs (pre-and post-licensure) must develop immersion or synthesis experiences that allow students to integrate learning and gain experience that facilitates transition into practice. Such experiences provide opportunities to enact principles of the nursing discipline and for building clinical reasoning, management of care, and assessment of clinical outcomes. These opportunities increase the student’s self-confidence, professional identity, and sense of belonging within the profession. Immersion experiences also allow students to integrate previous learning and demonstrate competencies in more complex situations and contexts. Immersion experiences may afford the student an opportunity to focus on a population of interest and clinical role. The immersion experience may occur towards the end of the program as a culminating synthesis experience; and/or there may be one or more immersion experiences at various points in a curriculum. The key is to provide for a concentrated practice experience that approximates professional practice expectations (Fowler et al., 2018; Tratnack et al., 2011).

Advanced-Level Nursing Education

Nursing programs preparing nurses to advance their education beyond entry-level professional nursing practice will incorporate advanced-level nursing education (Level 2) sub-competencies. Advanced-level nursing education programs (degree granting and advanced nursing practice post-graduate certificate programs) intentionally build on Level 1 sub-competencies. Although Level 2 sub-competencies have been written with doctoral education in mind, the actual differentiator for the degree attained does not lie within the sub-competencies themselves, but rather the degree/program requirements – such as the DNP project (described below), role/specialty requirements, and other requirements set by the faculty and institution. While it is not expected that every sub-competency and concept will be applied in every course, sub-competencies are not to be isolated in one or two courses and then disregarded for the rest of the program.

Advanced-level nursing education programs prepare graduates for practice in an advanced nursing practice specialty (informatics, administration/practice leadership, public health/population health, health policy) or an advanced practice nursing role (certified nurse practitioner, certified nurse-midwife, certified clinical nurse specialist, certified registered nurse anesthetist). Advanced-level nursing education programs focus on providing specialty knowledge for graduates to enact specific advanced practice nursing roles or assume advanced nursing specialty practice within the healthcare system. For this reason, specialty competencies, defined by nationally recognized, specialty organizations, represent a major component of advanced-level nursing education programs. Specialty competencies complement and build upon the Level 2 sub-competencies. All graduates of an advanced nursing education program are prepared and eligible for national, advanced nursing practice specialty certification or advanced nursing practice role certification when available. It is noteworthy that specialties evolve over time and new specialties may emerge.

All DNP programs (post-baccalaureate and post-master's) demonstrate that graduates attain and integrate Level 2 sub-competencies and competencies for at least one advanced nursing practice specialty or advanced nursing practice role.

Individuals should seek to advance disciplinary expertise in a chosen nursing specialty or advanced nursing practice role. This expertise is critical to advancing the profession, to expand the influence of the profession for the transformation of health care, and to ensure an informed disciplinary perspective for teaching in the discipline. Advancing education in nursing with the emphasis on teaching and learning alone does not fulfill the achievement of disciplinary expertise. Excellence as an educator is achieved by the collective enterprise for faculty teaching and learning afforded by institutions and applied to discipline-specific teaching.

Advanced Level Practicum Experiences

Advanced-level nursing education programs provide rich and varied opportunities for practice experiences (both direct and indirect care experiences) to prepare graduates with the Level 2 sub-competencies as well as applicable advanced nursing practice specialty/advanced nursing practice role competencies and requirements. Practice experiences build on Level 1 sub-competency achievement and are designed to assist the graduate to achieve Level 2 sub-competencies and applicable specialty competencies upon completion of the program. Practice experiences are required to integrate didactic learning, promote innovative thinking, and test new potential solutions to clinical practice or system issues. Therefore, the development of new skills and practice expectations can be facilitated through use of creative learning opportunities in diverse settings.

All graduates of advanced-level nursing education programs have structured, faculty-designed practice experiences, which may include precepted experiences with faculty oversight and/or experiences with direct faculty supervision. The program is responsible for providing sufficient and appropriate clinical sites/placements for students to demonstrate attainment of Level 2 sub-competencies and applicable specialty competencies. Clinical/practice learning experiences may be accomplished through diverse methodologies, including simulation and virtual technology, and assist the graduate to develop greater proficiency in these competencies, including cognitive, psychomotor, and affective competencies. Use of simulation should align with specialty requirements.

All advanced education practicum experiences must have faculty oversight and be verified and documented as a component of a formal course or plan of study. Programs provide practice placements that are safe, supportive, and conducive for learning. The nursing program faculty determine and assess practice sites to ensure that the site supports student learning with the intended population or scope of practice. Faculty, students, and preceptors must be well informed about the specific competencies that are integrated in the didactic, laboratory, and practice experiences and the method(s) to assess the achievement of the competencies.

Competency Attainment and Practice Experiences

All learners in advanced nursing education programs engage in practice learning activities (both direct and indirect care experiences). Graduates of all advanced nursing education programs need sufficient clinical/practice experiences to demonstrate end-of-program student outcomes, Level 2 sub-competencies, and competencies required by applicable national, specialty organizations and/or for national advanced nursing practice specialty or advanced nursing practice role certification. Programs document clear evidence of competency achievement.

Advanced Education Clinical/Practice Hours

The application of competency-based education to prepare advanced nursing professionals inherently calls to question the role of more traditional time-based requirements. In this *Essentials* model, there is an emphasis on ensuring that all nurses pursuing advanced education attain Level 2 sub-competencies as well as competencies required for an advanced nursing practice specialty or advanced nursing practice role being pursued. The number of required practice (direct and indirect care) hours vary based on advanced specialty/role requirements. These *Essentials* represent a commitment that required hours prepare a consistent product in terms of breadth of preparation and quality to reinforce confidence in our graduates by nursing practice colleagues, other health professionals, and consumers.

Some learners will achieve select competency outcomes more quickly than others. “One and done,” however, does not demonstrate the progressive and consistent nature of competency attainment and the assessment necessary in nursing professional education. Repetition plays a role in reinforcing previously acquired knowledge, skills, values, and attitudes. Repetition also allows for intentional and unintentional complexities and context nuances to be introduced, thus building on minimum competency thresholds. Given the paucity of evidence to support specific experience quantities, case numbers, or hourly requirements that should be achieved, a minimum threshold of hours of practice engagement remains necessary at this time.

The specific clinical/practice experiences and number of practice hours and/or credit hours required depends on these *Essentials*, advanced nursing practice specialty and advanced nursing practice role requirements, and regulatory standards for specialty certifications and licensure. The program must include adequate experiences (in terms of time, diversity, depth, and breadth) to allow attainment and demonstration of all relevant competencies (Level 2 sub-competencies and applicable specialty/role competencies and other requirements) and successful transition to practice demonstrated through program outcomes. The number of in-person practice hours will vary based on student needs and curriculum design. ***Participation in a minimum of 500 practice hours in the discipline of nursing, post entry-level education, and attainment of Level 1 sub-competencies is required for demonstration of the advanced***

level sub-competencies. Some students may require more. These practice hours also provide a foundation for the additional time-based requirements set by specialty organizations or external licensing/certifying bodies, which will require additional practice time for preparation in advanced nursing specialties or advanced nursing practice roles. Hours of practice do not necessarily need to be delineated by competency type (*Essentials* or specialty/role). Some, but not all, Level 2 sub-competencies and/or specialty/role competencies may be demonstrated and assessed concurrently. It is expected that faculty create clinical/practice learning experiences that provide for active learning, repetition, interprofessional engagement, and successive levels of difficulty. As the strength of evidence to support valid and reliable assessment techniques builds, the role of practice experiences and number of hours (e.g., time-based requirements) may evolve in the future.

Immersion Practicum Experiences

Development of competency attainment is facilitated through use of focused and sustained practice experiences. Immersion experiences, expected in advanced nursing education programs, provide the learner with the opportunity to integrate the advanced level sub-competencies and applicable specialty competencies. An immersion also provides an opportunity for the learner to focus on a population of interest, an advanced nursing role, or specialty area of study. Placement of integrated or immersion experiences may vary and depend upon the program's design, curriculum, and specialty requirements.

Simulation

Simulation experiences represent an important component of clinical/practice education, serving as a valuable augmentation to direct clinical care or practice within healthcare settings. Laboratory and simulation experiences provide an effective, safe environment for learning and demonstrating competencies, particularly high-risk and low-frequency experiences. However, practice experiences in actual practice settings continue to represent the most important component of nursing practice education and are required in advanced nursing programs for the learning and demonstration of the Level 2 sub-competencies and integration of specialty competencies. Simulation learning experiences align with best practice standards such as those developed by the International Nursing Association for Clinical Simulation and Learning (INACSL) or the Society for Simulation in Healthcare (SSH). The use of simulation in the curriculum as a replacement of direct patient clinical/practice hours or experiences is also determined by requirements of national specialty education, certification entities, and regulatory entities.

Practice experiences may include simulated experiences for the attainment of a portion of the Level 2 sub-competencies, particularly for experiences that are high risk and low frequency or may not be available to all students, and in accordance with requirements set forth by specialty organizations and/or licensing/certifying bodies. Regardless of the design of the experiences, programs are expected to document attainment of these sub-competencies through varied and comprehensive assessment methods across the curriculum.

DNP Scholarly Project/Product

There are many past, present, and projected healthcare dilemmas that call for healthcare transformation. Nurses, as members of the healthcare team, are expected to assume a prominent role in addressing these dilemmas. Nurses cannot be expected to significantly

impact healthcare transformation unless their educational preparation provides them with opportunities to learn and employ scholarship, leadership, and teamwork skills to advance practice. *A scholarly work that aims to improve clinical practice, therefore, is required of students completing a practice doctorate in nursing.* Collaboration with practice partners whenever possible will maximize the impact of the student experience.

The scholarly work may take on various final forms depending on the academic institution's requirements and the student's area (specialty or role) of study/practice. Key elements of the scholarly work include problem identification; a search, analysis, and synthesis of the literature and evidence; translating evidence to construct a strategy or method to address a problem; designing a plan for implementation and actual implementation when possible, and an evaluation of the outcomes, process, and/or experience. Faculty may identify additional elements deemed necessary to meet the expected outcomes of the curriculum. Programs are encouraged to support innovation in the design and dissemination of the final project without reducing the substantive nature of the work. A literature review that lacks applicability to affect a practice improvement or the other elements identified above would not constitute a scholarly work that aligns with this *Essentials* model. Similarly, a portfolio may be used as a tool to enhance the development and presentation of a project but may not be the sole deliverable product of the student's scholarly work.

The scholarly work should not be a separate disaggregated part of the plan of study. Instead, faculty should consider how the development of the scholarly work is integrated throughout the curriculum, allowing for dissemination of the results prior to program completion. The intent is that this scholarly work reflects the longitudinal attainment of advanced level sub-competencies, going across the curriculum and allowing for the evolution of ideas. There also is a need to ensure an understanding by the student of the connection between the scholarly work and application to future practice. This will promote integration of advanced nursing education competencies into future practice.

Dissemination methods for the scholarly work are determined by the student in consultation with the faculty and may include a variety of methods. Dissemination may include a final written product that is presented to a defined group of stakeholders, such as members of the practice and/or university community or participants at a local, state, or national professional meeting. Other possible examples of dissemination include poster presentations, a manuscript under review and/or submission for publication, an educational presentation, or a podcast.

Faculty with appropriate specialty and academic credentials are involved in the planning, formation, and evaluation of the student's scholarly work. In some instances, additional experts/mentors/ partners/facilitators can be formal or informal collaborators and provide intermittent or limited support throughout the project phases as needed. Evaluation of the student's scholarly work may include a combination of methods, including faculty, expert, and/or peer evaluation. Programs tailor scholarly work evaluation and approval processes per institution's, the program's, and/or appropriate committee's requirements. Evaluation of the final DNP project is the responsibility of the faculty.

In summary:

- These program requirements do not modify any additional requirements for any advanced specialty or role preparation, including the requirement for all Advanced Practice Registered Nurse (APRNs) education to include three graduate-level courses delineated in *The Consensus Model for APRN Regulation: Licensure, Accreditation, Certification, and Education* (2006; see glossary).
- All graduates of an advanced-level nursing education program are prepared for practice in an advanced nursing specialty (informatics, administration/practice leadership, public health/population health, or health policy) or for an advanced nursing practice role (nurse practitioner, certified nurse-midwife, certified clinical nurse specialist, certified registered nurse anesthetist).
- All DNP students will complete a scholarly project/product, which will be evaluated by faculty; DNP students will demonstrate the attainment and integration of the Level 1 sub-competencies, Level 2 sub-competencies, and advanced specialty/role competencies into practice.

Domains, Competencies, and Sub-Competencies for Entry-level Professional Nursing Education and Advanced-level Nursing Education

Domain 1: Knowledge for Nursing Practice

Descriptor: Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.

Contextual Statement: Knowledge for Nursing Practice provides the context for understanding nursing as a scientific discipline. The lens of nursing, informed by nursing history, knowledge, and science, reflects nursing’s desire to incorporate multiple perspectives into nursing practice, leading to nursing’s unique way of knowing and caring.

Preparation in both liberal arts and sciences and professional nursing coursework provides graduates with the essential abilities to function as independent, intellectually curious, socially responsible, competent practitioners (Tobbell, 2018). A liberal education creates the foundation for the development of intellectual and practical abilities within the context of nursing. Further, liberal education is the key to understanding self and others; contributes to safe, quality care; and informs the development of clinical judgment.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|---|---|
| 1.1 Demonstrate an understanding of the discipline of nursing’s distinct perspective and where shared perspectives exist with other disciplines | |
| 1.1a Identify concepts, derived from theories from nursing and other disciplines, which distinguish the practice of nursing. | 1.1e Translate evidence from nursing science as well as other sciences into practice. |
| 1.1b Apply knowledge of nursing science that develops a foundation for nursing practice. | 1.1f Demonstrate the application of nursing science to practice. |
| 1.1c Understand the historical foundation of nursing as the relationship developed between the individual and nurse. | 1.1g Integrate an understanding of nursing history in advancing nursing’s influence in health care. |
| 1.1d Articulate nursing’s distinct perspective to practice. | |
| 1.2 Apply theory and research-based knowledge from nursing, the arts, humanities, and other sciences. | |
| 1.2a Apply or employ knowledge from nursing science as well as the natural, physical, and social sciences to build an understanding of the human experience and nursing practice. | 1.2f Synthesize knowledge from nursing and other disciplines to inform education, practice, and research. |

| | |
|---|---|
| 1.2b Demonstrate intellectual curiosity. | 1.2g Apply a systematic and defensible approach to nursing practice decisions. |
| 1.2c Demonstrate social responsibility as a global citizen who fosters the attainment of health equity for all. | 1.2h Employ ethical decision making to assess, intervene, and evaluate nursing care. |
| 1.2d Examine influence of personal values in decision making for nursing practice. | 1.2i Demonstrate socially responsible leadership. |
| 1.2e Demonstrate ethical decision making. | 1.2j Translate theories from nursing and other disciplines to practice. |
| 1.3 Demonstrate clinical judgment founded on a broad knowledge base. | |
| 1.3a Demonstrate clinical reasoning. | 1.3d Integrate foundational and advanced specialty knowledge into clinical reasoning. |
| 1.3b Integrate nursing knowledge (theories, multiple ways of knowing, evidence) and knowledge from other disciplines and inquiry to inform clinical judgment. | 1.3e Synthesize current and emerging evidence to influence practice. |
| 1.3c Incorporate knowledge from nursing and other disciplines to support clinical judgment. | 1.3f Analyze decision models from nursing and other knowledge domains to improve clinical judgment. |

Domain 2: Person-Centered Care

Descriptor: Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.

Contextual Statement: Person-centered care is the core purpose of nursing as a discipline. This purpose intertwines with any functional area of nursing practice, from the point of care where the hands of those that give and receive care meet, to the point of systems-level nursing leadership. Foundational to person-centered care is respect for diversity, differences, preferences, values, needs, resources, and the determinants of health unique to the individual. The person is a full partner and the source of control in team-based care. Person-centered care requires the intentional presence of the nurse seeking to know the totality of the individual’s lived experiences and connections to others (family, important others, community). As a scientific and practice discipline, nurses employ a relational lens that fosters mutuality, active participation, and individual empowerment. This focus is foundational to educational preparation from entry to advanced levels irrespective of practice areas.

With an emphasis on diversity, equity, and inclusion, person-centered care is based on best evidence and clinical judgment in the planning and delivery of care across time, spheres of care, and developmental levels. Contributing to or making diagnoses is one essential aspect of nursing practice and critical to an informed plan of care and improving outcomes of care (Olson et al., 2019). Diagnoses at the system-level are equally as relevant, affecting operations that impact care for individuals. Person-centered care results in shared meaning with the healthcare team, recipient of care, and the healthcare system, thus creating humanization of wellness and healing from birth to death.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|---|---|
| 2.1 Engage with the individual in establishing a caring relationship. | |
| 2.1a Demonstrate qualities of empathy. | 2.1d Promote caring relationships to effect positive outcomes. |
| 2.1b Demonstrate compassionate care. | 2.1e Foster caring relationships. |
| 2.1c Establish mutual respect with the individual and family. | |
| 2.2 Communicate effectively with individuals. | |
| 2.2a Demonstrate relationship-centered care. | 2.2g Demonstrate advanced communication skills and techniques using a variety of modalities with diverse audiences. |
| 2.2b Consider individual beliefs, values, and personalized information in communications. | 2.2h Design evidence-based, person-centered engagement materials. |

| | |
|---|--|
| 2.2c Use a variety of communication modes appropriate for the context. | 2.2i Apply individualized information, such as genetic/genomic, pharmacogenetic, and environmental exposure information in the delivery of personalized health care. |
| 2.2d Demonstrate the ability to conduct sensitive or difficult conversations. | 2.2j Facilitate difficult conversations and disclosure of sensitive information. |
| 2.2e Use evidence-based patient teaching materials, considering health literacy, vision, hearing, and cultural sensitivity. | |
| 2.2f Demonstrate emotional intelligence in communications. | |
| 2.3 Integrate assessment skills in practice. | |
| 2.3a Create an environment during assessment that promotes a dynamic interactive experience. | 2.3h Demonstrate that one's practice is informed by a comprehensive assessment appropriate to the functional area of advanced nursing practice. |
| 2.3b Obtain a complete and accurate history in a systematic manner. | |
| 2.3c Perform a clinically relevant, holistic health assessment. | |
| 2.3d Perform point of care screening/diagnostic testing (e.g. blood glucose, PO2, EKG). | |
| 2.3e Distinguish between normal and abnormal health findings. | |
| 2.3f Apply nursing knowledge to gain a holistic perspective of the person, family, community, and population. | |
| 2.3g Communicate findings of a comprehensive assessment. | |
| 2.4 Diagnose actual or potential health problems and needs. | |
| 2.4a Synthesize assessment data in the context of the individual's current preferences, situation, and experience. | 2.4f Employ context driven, advanced reasoning to the diagnostic and decision-making process. |
| 2.4b Create a list of problems/health concerns. | 2.4g Integrate advanced scientific knowledge to guide decision making. |
| 2.4c Prioritize problems/health concerns. | |

| | |
|--|--|
| 2.4d Understand and apply the results of social screening, psychological testing, laboratory data, imaging studies, and other diagnostic tests in actions and plans of care. | |
| 2.4e Contribute as a team member to the formation and improvement of diagnoses. | |
| 2.5 Develop a plan of care. | |
| 2.5a Engage the individual and the team in plan development. | 2.5h Lead and collaborate with an interprofessional team to develop a comprehensive plan of care. |
| 2.5b Organize care based on mutual health goals. | 2.5i Prioritize risk mitigation strategies to prevent or reduce adverse outcomes. |
| 2.5c Prioritize care based on best evidence. | 2.5j Develop evidence-based interventions to improve outcomes and safety. |
| 2.5d Incorporate evidence-based intervention to improve outcomes and safety. | 2.5k Incorporate innovations into practice when evidence is not available. |
| 2.5e Anticipate outcomes of care (expected, unexpected, and potentially adverse). | |
| 2.5f Demonstrate rationale for plan. | |
| 2.5g Address individuals' experiences and perspectives in designing plans of care. | |
| 2.6 Demonstrate accountability for care delivery. | |
| 2.6a Implement individualized plan of care using established protocols. | 2.6e Model best care practices to the team. |
| 2.6b Communicate care delivery through multiple modalities. | 2.6f Monitor aggregate metrics to assure accountability for care outcomes. |
| 2.6c Delegate appropriately to team members. | 2.6g Promote delivery of care that supports practice at the full scope of education. |
| 2.6d Monitor the implementation of the plan of care. | 2.6h Contribute to the development of policies and processes that promote transparency and accountability. |
| | 2.6i Apply current and emerging evidence to the development of care guidelines/tools. |
| | 2.6j Ensure accountability throughout transitions of care across the health continuum. |

| | |
|---|---|
| 2.7 Evaluate outcomes of care. | |
| 2.7a Reassess the individual to evaluate health outcomes/goals. | 2.7d Analyze data to identify gaps and inequities in care and monitor trends in outcomes. |
| 2.7b Modify plan of care as needed. | 2.7e Monitor epidemiological and system-level aggregate data to determine healthcare outcomes and trends. |
| 2.7c Recognize the need for modifications to standard practice. | 2.7f Synthesize outcome data to inform evidence-based practice, guidelines, and policies. |
| 2.8 Promote self-care management. | |
| 2.8a Assist the individual to engage in self-care management. | 2.8f Develop strategies that promote self-care management. |
| 2.8b Employ individualized educational strategies based on learning theories, methodologies, and health literacy. | 2.8g Incorporate the use of current and emerging technologies to support self-care management. |
| 2.8c Educate individuals and families regarding self-care for health promotion, illness prevention, and illness management. | 2.8h Employ counseling techniques, including motivational interviewing, to advance wellness and self-care management. |
| 2.8d Respect individuals and families' self-determination in their healthcare decisions. | 2.8i Evaluate adequacy of resources available to support self-care management. |
| 2.8e Identify personal, system, and community resources available to support self-care management. | 2.8j Foster partnerships with community organizations to support self-care management. |
| 2.9 Provide care coordination. | |
| 2.9a Facilitate continuity of care based on assessment of assets and needs. | 2.9f Evaluate communication pathways among providers and others across settings, systems, and communities. |
| 2.9b Communicate with relevant stakeholders across health systems. | 2.9g Develop strategies to optimize care coordination and transitions of care. |
| 2.9c Promote collaboration by clarifying responsibilities among individual, family, and team members. | 2.9h Guide the coordination of care across health systems. |
| 2.9d Recognize when additional expertise and knowledge is needed to manage the patient. | 2.9i Analyze system-level and public policy influence on care coordination. |
| 2.9e Provide coordination of care of individuals and families in collaboration with care team. | 2.9j Participate in system-level change to improve care coordination across settings. |

Domain 3: Population Health

Descriptor: Population health spans the healthcare delivery continuum from public health prevention to disease management of populations and describes collaborative activities with both traditional and non-traditional partnerships from affected communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes. (Kindig & Stoddart, 2003; Kindig, 2007; Swartout & Bishop, 2017; CDC, 2020).

Contextual Statement: A population is a discrete group that the nurse and others care for across settings at local, regional, national, and global levels. Population health spans the healthcare delivery continuum, including public health, acute care, ambulatory care, and long-term care. Population health also encompasses collaborative activities among stakeholders – all relevant individuals and organizations involved in care, including patients and communities themselves - for the improvement of a population’s health status. The purpose of these collaborative activities, including development of interventions and policies, is to strive towards health equity and improved health for all. Diversity, equity, inclusion, and ethics must be emphasized and valued. Accountability for outcomes is shared by all, since outcomes arise from multiple factors that influence the health of a defined group. Population health includes population management through systems thinking, including health promotion and illness prevention, to achieve population health goals (Storfjell, Wehtle, Winslow, & Saunders, 2017). Nurses play a critical role in advocating for, developing, and implementing policies that impact population health globally and locally. In addition, nurses respond to crises and provide care during emergencies, disasters, epidemics, or pandemics. They play an essential role in system preparedness and ethical response initiatives. Although each type of public health emergency will likely require a unique set of competencies, preparedness for responding begins with a population health perspective and a particular focus on surveillance, prevention, and containment of factors contributing to the emergency.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|--|--|
| 3.1 Manage population health. | |
| 3.1a Define a target population including its functional and problem-solving capabilities (anywhere in the continuum of care). | 3.1j Assess the efficacy of a system’s capability to serve a target sub-population’s healthcare needs. |
| 3.1b Assess population health data. | 3.1k Analyze primary and secondary population health data for multiple populations against relevant benchmarks. |
| 3.1c Assess the priorities of the community and/or the affected clinical population. | 3.1l Use established or evolving methods to determine population-focused priorities for care. |
| 3.1d Compare and contrast local, regional, national, and global benchmarks to identify health patterns across populations. | 3.1m Develop a collaborative approach with relevant stakeholders to address population healthcare needs, including evaluation methods. |

| | |
|--|--|
| 3.1e Apply an understanding of the public health system and its interfaces with clinical health care in addressing population health needs. | 3.1n Collaborate with appropriate stakeholders to implement a sociocultural and linguistically responsive intervention plan. |
| 3.1f Develop an action plan to meet an identified need(s), including evaluation methods. | |
| 3.1g Participate in the implementation of sociocultural and linguistically responsive interventions. | |
| 3.1h Describe general principles and practices for the clinical management of populations across the age continuum. | |
| 3.1i Identify ethical principles to protect the health and safety of diverse populations. | |
| 3.2 Engage in effective partnerships. | |
| 3.2a Engage with other health professionals to address population health issues. | 3.2d Ascertain collaborative opportunities for individuals and organizations to improve population health. |
| 3.2b Demonstrate effective collaboration and mutual accountability with relevant stakeholders. | 3.2e Challenge biases and barriers that impact population health outcomes. |
| 3.2c Use culturally and linguistically responsive communication strategies. | 3.2f Evaluate the effectiveness of partnerships for achieving health equity. |
| | 3.2g Lead partnerships to improve population health outcomes. |
| | 3.2h Assess preparation and readiness of partners to organize during natural and manmade disasters. |
| 3.3 Consider the socioeconomic impact of the delivery of health care. | |
| 3.3a Describe access and equity implications of proposed intervention(s). | 3.3c Analyze cost-benefits of selected population-based interventions. |
| 3.3b Prioritize patient-focused and/or community action plans that are safe, effective, and efficient in the context of available resources. | 3.3d Collaborate with partners to secure and leverage resources necessary for effective, sustainable interventions. |
| | 3.3e Advocate for interventions that maximize cost-effective, accessible, and equitable resources for populations. |
| | 3.3f Incorporate ethical principles in resource allocation in achieving equitable health. |

| 3.4 Advance equitable population health policy. | |
|---|---|
| 3.4a Describe policy development processes. | 3.4f Identify opportunities to influence the policy process. |
| 3.4b Describe the impact of policies on population outcomes, including social justice and health equity. | 3.4g Design comprehensive advocacy strategies to support the policy process. |
| 3.4c Identify best evidence to support policy development. | 3.4h Engage in strategies to influence policy change. |
| 3.4d Propose modifications to or development of policy based on population findings. | 3.4i Contribute to policy development at the system, local, regional, or national levels. |
| 3.4e Develop an awareness of the interconnectedness of population health across borders. | 3.4j Assess the impact of policy changes. |
| | 3.4k Evaluate the ability of policy to address disparities and inequities within segments of the population. |
| | 3.4l Evaluate the risks to population health associated with globalization. |
| 3.5 Demonstrate advocacy strategies. | |
| 3.5a Articulate a need for change. | 3.5f Appraise advocacy priorities for a population. |
| 3.5b Describe the intent of the proposed change. | 3.5g Strategize with an interdisciplinary group and others to develop effective advocacy approaches. |
| 3.5c Define stakeholders, including members of the community and/or clinical populations, and their level of influence. | 3.5h Engage in relationship-building activities with stakeholders at any level of influence, including system, local, state, national, and/or global. |
| 3.5d Implement messaging strategies appropriate to audience and stakeholders. | 3.5i Demonstrate leadership skills to promote advocacy efforts that include principles of social justice, diversity, equity, and inclusion. |
| 3.5e Evaluate the effectiveness of advocacy actions. | |
| 3.6 Advance preparedness to protect population health during disasters and public health emergencies. | |
| 3.6a Identify changes in conditions that might indicate a disaster or public health emergency. | 3.6f Collaboratively initiate rapid response activities to protect population health. |

| | |
|---|---|
| 3.6b Understand the impact of climate change on environmental and population health. | 3.6g Participate in ethical decision making that includes diversity, equity, and inclusion in advanced preparedness to protect populations. |
| 3.6c Describe the health and safety hazards of disasters and public health emergencies. | 3.6h Collaborate with interdisciplinary teams to lead preparedness and mitigation efforts to protect population health with attention to the most vulnerable populations. |
| 3.6d Describe the overarching principles and methods regarding personal safety measures, including personal protective equipment (PPE). | 3.6i Coordinate the implementation of evidence-based infection control measures and proper use of personal protective equipment. |
| 3.6e Implement infection control measures and proper use of personal protective equipment. | 3.6j Contribute to system-level planning, decision making, and evaluation for disasters and public health emergencies. |

Domain 4: Scholarship for the Nursing Discipline

Descriptor: The generation, synthesis, translation, application, and dissemination of nursing knowledge to improve health and transform health care (AACN, 2018).

Contextual Statement: Nursing scholarship informs science, enhances clinical practice, influences policy, and impacts best practices for educating nurses as clinicians, scholars, and leaders. Scholarship is inclusive of discovery, application, integration, and teaching. While not all inclusive, the scholarship of discovery includes primary empirical research, analysis of large data sets, theory development, and methodological studies. The scholarship of practice interprets, draws together, applies, and brings new insight to original research (Boyer, 1990; AACN 2018).

Knowledge of the basic principles of the research process, including the ability to critique research and determine its applicability to nursing’s body of knowledge, is critical. Ethical comportment in the conduct and dissemination of research and advocacy for human subjects are essential components of nursing’s role in the process of improving health and health care. Whereas the research process is the generation of new knowledge, evidence-based practice (EBP) is the process for the application, translation, and implementation of best evidence into clinical decision-making. While evidence may emerge from research, EBP extends beyond just data to include patient preferences and values as well as clinical expertise. Nurses, as innovators and leaders within the interprofessional team, use the uniqueness of nursing in nurse-patient relationships to provide optimal care and address health inequities, structural racism, and systemic inequity.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|--|---|
| 4.1 Advance the scholarship of nursing. | |
| 4.1a Demonstrate an understanding of different approaches to scholarly practice. | 4.1h Apply and critically evaluate advanced knowledge in a defined area of nursing practice. |
| 4.1b Demonstrate application of different levels of evidence. | 4.1i Engage in scholarship to advance health. |
| 4.1c Apply theoretical framework(s)/models in practice. | 4.1j Discern appropriate applications of quality improvement, research, and evaluation methodologies. |
| 4.1d Demonstrate an understanding of basic elements of the research process. | 4.1k Collaborate to advance one’s scholarship. |
| 4.1e Participate in scholarly inquiry as a team member. | 4.1l Disseminate one’s scholarship to diverse audiences using a variety of approaches or modalities. |
| 4.1f Evaluate research. | 4.1m Advocate within the interprofessional team and with other stakeholders for the contributions of nursing scholarship. |
| 4.1g Communicate scholarly findings. | |

| 4.2 Integrate best evidence into nursing practice. | |
|--|---|
| 4.2a Evaluate clinical practice to generate questions to improve nursing care. | 4.2f Use diverse sources of evidence to inform practice. |
| 4.2b Evaluate appropriateness and strength of the evidence. | 4.2g Lead the translation of evidence into practice. |
| 4.2c Use best evidence in practice. | 4.2h Address opportunities for innovation and changes in practice. |
| 4.2d Participate in the implementation of a practice change to improve nursing care. | 4.2i Collaborate in the development of new/revised policy or regulation in the light of new evidence. |
| 4.2e Participate in the evaluation of outcomes and their implications for practice. | 4.2j Articulate inconsistencies between practice policies and best evidence. |
| | 4.2k Evaluate outcomes and impact of new practices based on the evidence. |
| 4.3 Promote the ethical conduct of scholarly activities. | |
| 4.3a Explain the rationale for ethical research guidelines, including Institutional Review Board (IRB) guidelines. | 4.3e Identify and mitigate potential risks and areas of ethical concern in the conduct of scholarly activities. |
| 4.3b Demonstrate ethical behaviors in scholarly projects including quality improvement and EBP initiatives. | 4.3f Apply IRB guidelines throughout the scholarship process. |
| 4.3c Advocate for the protection of participants in the conduct of scholarly initiatives. | 4.3g Ensure the protection of participants in the conduct of scholarship. |
| 4.3d Recognize the impact of equity issues in research. | 4.3h Implement processes that support ethical conduct in practice and scholarship. |
| | 4.3i Apply ethical principles to the dissemination of nursing scholarship. |

Domain 5: Quality and Safety

Descriptor: Employment of established and emerging principles of safety and improvement science. Quality and safety, as core values of nursing practice, enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.

Contextual Statement: Provision of safe, quality care necessitates knowing and using established and emerging principles of safety science in care delivery. Quality and safety encompass provider and recipient safety and the recognition of synergy between the two. Quality or safety challenges are viewed primarily as the result of system failures, as opposed to the errors of an individual. In an environment fostering quality and safety, caregivers are empowered and encouraged to promote safety and take appropriate action to prevent and report adverse events and near misses. Fundamental to the provision of safe, quality care, providers of care adopt, integrate, and disseminate current practice guidelines and evidence-based interventions.

Safety is inclusive of attending to work environment hazards, such as violence, burnout, ergonomics, and chemical and biological agents; there is a synergistic relationship between employee safety and patient safety. A safe and just environment minimizes risk to both recipients and providers of care. It requires a shared commitment *to create and maintain* a physically, psychologically, secure, and just environment. Safety demands an obligation to remain non-punitive in detecting, reporting, and analyzing errors, possible exposures, and near misses when they occur.

Quality and safety are interdependent, as safety is a necessary attribute of quality care. For quality health care to exist, care must be safe, effective, timely, efficient, equitable, and person-centered. Quality care is the extent to which care services improve desired health outcomes and are consistent with patient preferences and current professional knowledge (IOM, 2001). Additionally, quality care includes collaborative engagement with the recipient of care in assuming responsibility for health promotion and illness treatment behaviors. Quality care both improves desired health outcomes, and prevents harm (IOM, 2001). Addressing contributors and barriers to quality and safety, at both individual and system levels, are necessary. Essentially, everyone in health care is responsible for quality care and patient safety. Nurses are uniquely positioned to lead or co-lead teams that address the improvement of quality and safety because of their knowledge and ethical code (ANA Code of Ethics, 2015). Increasing complexity of care has contributed to continued gaps in healthcare safety.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|--|--|
| 5.1 Apply quality improvement principles in care delivery. | |
| 5.1a Recognize nursing’s essential role in improving healthcare quality and safety. | 5.1i Establish and incorporate data driven benchmarks to monitor system performance. |
| 5.1b Identify sources and applications of national safety and quality standards to guide nursing practice. | 5.1j Use national safety resources to lead team-based change initiatives. |

| | |
|--|--|
| 5.1c Implement standardized, evidence-based processes for care delivery. | 5.1k Integrate outcome metrics to inform change and policy recommendations. |
| 5.1d Interpret benchmark and unit outcome data to inform individual and microsystem practice. | 5.1l Collaborate in analyzing organizational process improvement initiatives. |
| 5.1e Compare quality improvement methods in the delivery of patient care. | 5.1m Lead the development of a business plan for quality improvement initiatives. |
| 5.1f Identify strategies to improve outcomes of patient care in practice. | 5.1n Advocate for change related to financial policies that impact the relationship between economics and quality care delivery. |
| 5.1g Participate in the implementation of a practice change. | 5.1o Advance quality improvement practices through dissemination of outcomes. |
| 5.1h Develop a plan for monitoring quality improvement change. | |
| 5.2 Contribute to a culture of patient safety. | |
| 5.2a Describe the factors that create a culture of safety. | 5.2g Evaluate the alignment of system data and comparative patient safety benchmarks. |
| 5.2b Articulate the nurse’s role within an interprofessional team in promoting safety and preventing errors and near misses. | 5.2h Lead analysis of actual errors, near misses, and potential situations that would impact safety. |
| 5.2c Examine basic safety design principles to reduce risk of harm. | 5.2i Design evidence-based interventions to mitigate risk. |
| 5.2d Assume accountability for reporting unsafe conditions, near misses, and errors to reduce harm. | 5.2j Evaluate emergency preparedness system-level plans to protect safety. |
| 5.2e Describe processes used in understanding causes of error. | |
| 5.2f Use national patient safety resources, initiatives, and regulations at the point of care. | |

| 5.3 Contribute to a culture of provider and work environment safety. | |
|---|--|
| 5.3a Identify actual and potential level of risks to providers within the workplace. | 5.3e Advocate for structures, policies, and processes that promote a culture of safety and prevent workplace risks and injury. |
| 5.3b Recognize how to prevent workplace violence and injury. | 5.3f Foster a just culture reflecting civility and respect. |
| 5.3c Promote policies for prevention of violence and risk mitigation. | 5.3g Create a safe and transparent culture for reporting incidents. |
| 5.3d Recognize one's role in sustaining a just culture reflecting civility and respect. | 5.3h Role model and lead well-being and resiliency for self and team. |

Domain 6: Interprofessional Partnerships

Descriptor: Intentional collaboration across professions and with care team members, patients, families, communities, and other stakeholders to optimize care, enhance the healthcare experience, and strengthen outcomes.

Contextual Statement: Professional partnerships that include interprofessional, intraprofessional, and paraprofessional partnerships, build on a consistent demonstration of core professional values (altruism, excellence, caring, ethics, respect, communication, and shared accountability) in the provision of team-based, person-centered care. Nursing knowledge and expertise uniquely contributes to the intentional work within teams and in concert with patient, family, and community preferences and goals. Interprofessional partnerships require a coordinated, integrated, and collaborative implementation of the unique knowledge, beliefs, and skills of the full team for the end purpose of optimized care delivery. Effective collaboration requires an understanding of team dynamics and an ability to work effectively in care-oriented teams. Leadership of the team varies depending on needs of the individual, community, population, and context of care.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|---|---|
| 6.1 Communicate in a manner that facilitates a partnership approach to quality care delivery. | |
| 6.1a Communicate the nurse’s roles and responsibilities clearly. | 6.1g Evaluate effectiveness of interprofessional communication tools and techniques to support and improve the efficacy of team-based interactions. |
| 6.1b Use various communication tools and techniques effectively. | 6.1h Facilitate improvements in interprofessional communications of individual information (e.g. EHR). |
| 6.1c Elicit the perspectives of team members to inform person-centered care decision making. | 6.1i Role model respect for diversity, equity, and inclusion in team-based communications. |
| 6.1d Articulate impact of diversity, equity, and inclusion on team-based communications. | 6.1j Communicate nursing’s unique disciplinary knowledge to strengthen interprofessional partnerships. |
| 6.1e Communicate individual information in a professional, accurate, and timely manner. | 6.1k Provide expert consultation for other members of the healthcare team in one’s area of practice. |
| 6.1f Communicate as informed by legal, regulatory, and policy guidelines. | 6.1l Demonstrate capacity to resolve interprofessional conflict. |
| 6.2 Perform effectively in different team roles, using principles and values of team dynamics. | |
| 6.2a Apply principles of team dynamics, including team roles, to facilitate effective team functioning. | 6.2g Integrate evidence-based strategies and processes to improve team effectiveness and outcomes. |

| | |
|---|---|
| 6.2b Delegate work to team members based on their roles and competency. | 6.2h Evaluate the impact of team dynamics and performance on desired outcomes. |
| 6.2c Engage in the work of the team as appropriate to one's scope of practice and competency. | 6.2i Reflect on how one's role and expertise influences team performance. |
| 6.2d Recognize how one's uniqueness (as a person and a nurse) contributes to effective interprofessional working relationships. | 6.2j Foster positive team dynamics to strengthen desired outcomes. |
| 6.2e Apply principles of team leadership and management. performance to improve quality and assure safety. | |
| 6.2f Evaluate performance of individual and team to improve quality and promote safety. | |
| 6.3 Use knowledge of nursing and other professions to address healthcare needs. | |
| 6.3a Integrate the roles and responsibilities of healthcare professionals through interprofessional collaborative practice. | 6.3d Direct interprofessional activities and initiatives. |
| 6.3b Leverage roles and abilities of team members to optimize care. | |
| 6.3c Communicate with team members to clarify responsibilities in executing plan of care. | |
| 6.4 Work with other professions to maintain a climate of mutual learning, respect, and shared values. | |
| 6.4a Demonstrate an awareness of one's biases and how they may affect mutual respect and communication with team members. | 6.4e Practice self-assessment to mitigate conscious and implicit biases toward other team members. |
| 6.4b Demonstrate respect for the perspectives and experiences of other professions. | 6.4f Foster an environment that supports the constructive sharing of multiple perspectives and enhances interprofessional learning. |
| 6.4c Engage in constructive communication to facilitate conflict management. | 6.4g Integrate diversity, equity, and inclusion into team practices. |
| 6.4d Collaborate with interprofessional team members to establish mutual healthcare goals for individuals, communities, or populations. | 6.4h Manage disagreements, conflicts, and challenging conversations among team members. |
| | 6.4i Promote an environment that advances interprofessional learning. |

Domain 7: Systems-Based Practice

Descriptor: Responding to and leading within complex systems of health care. Nurses effectively and proactively coordinate resources to provide safe, quality, and equitable care to diverse populations.

Contextual Statement: Using evidence-based methodologies, nurses lead innovative solutions to address complex health problems and ensure optimal care. Understanding of systems-based practice is foundational to the delivery of quality care and incorporates key concepts of organizational structure, including relationships among macro-, meso-, and microsystems across healthcare settings. Knowledge of financial and payment models relative to reimbursement and healthcare costs is essential. In addition, the impact of local, regional, national, and global structures, systems, and regulations on individuals and diverse populations must be considered when evaluating patient outcomes. As change agents and leaders, nurses possess the intellectual capacity to be agile in response to continually evolving healthcare systems, to address structural racism and other forms of discrimination, and to advocate for the needs of diverse populations. Systems-based practice is predicated on an ethical practice environment where professional and organizational values are aligned, and structures and processes enable ethical practice by all members of the institution.

Integrated healthcare systems are highly complex, and gaps or failures in service and delivery can cause ineffective, harmful outcomes. These outcomes also span individual through global networks. Cognitive shifting from focused to big picture is a crucial skill set. Similarly, the ability for nurses to predict change, employ improvement strategies, and exercise fiscal prudence are critical skills. System awareness, innovation, and design also are needed to address such issues as structural racism and systemic inequity.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|---|--|
| 7.1 Apply knowledge of systems to work effectively across the continuum of care. | |
| 7.1a Describe organizational structure, mission, vision, philosophy, and values. | 7.1e Participate in organizational strategic planning. |
| 7.1b Explain the relationships of macrosystems, mesosystems, and microsystems. | 7.1f Participate in system-wide initiatives that improve care delivery and/or outcomes. |
| 7.1c Differentiate between various healthcare delivery environments across the continuum of care. | 7.1g Analyze system-wide processes to optimize outcomes. |
| 7.1d Recognize internal and external system processes that impact care coordination and transition of care. | 7.1h Design policies to impact health equity and structural racism within systems, communities, and populations. |
| 7.2 Incorporate consideration of cost-effectiveness of care. | |
| 7.2a Describe the financial and payment models of health care. | 7.2g Analyze relevant internal and external factors that drive healthcare costs and reimbursement. |

| | |
|---|---|
| 7.2b Recognize the impact of health disparities and social determinants of health on care outcomes. | 7.2h Design practices that enhance value, access, quality, and cost-effectiveness. |
| 7.2c Describe the impact of healthcare cost and payment models on the delivery, access, and quality of care. | 7.2i Advocate for healthcare economic policies and regulations to enhance value, quality, and cost-effectiveness. |
| 7.2d Explain the relationship of policy, regulatory requirements, and economics on care outcomes. | 7.2j Formulate, document, and disseminate the return on investment for improvement initiatives collaboratively with an interdisciplinary team. |
| 7.2e Incorporate considerations of efficiency, value, and cost in providing care. | 7.2k Recommend system-wide strategies that improve cost- effectiveness considering structure, leadership, and workforce needs. |
| 7.2f Identify the impact of differing system structures, leadership, and workforce needs on care outcomes. | 7.2l Evaluate health policies based on an ethical framework considering cost-effectiveness, health equity, and care outcomes. |
| 7.3 Optimize system effectiveness through application of innovation and evidence-based practice. | |
| 7.3a Demonstrate a systematic approach for decision-making. | 7.3e Apply innovative and evidence-based strategies focusing on system preparedness and capabilities. |
| 7.3b Use reported performance metrics to compare/monitor outcomes. | 7.3f Design system improvement strategies based on performance data and metrics. |
| 7.3c Participate in evaluating system effectiveness. | 7.3g Manage change to sustain system effectiveness. |
| 7.3d Recognize internal and external system processes and structures that perpetuate racism and other forms of discrimination within health care. | 7.3h Design system improvement strategies that address internal and external system processes and structures that perpetuate structural racism and other forms of discrimination in healthcare systems. |

Domain 8: Informatics and Healthcare Technologies

Descriptor: Information and communication technologies and informatics processes are used to provide care, gather data, form information to drive decision making, and support professionals as they expand knowledge and wisdom for practice. Informatics processes and technologies are used to manage and improve the delivery of safe, high-quality, and efficient healthcare services in accordance with best practice and professional and regulatory standards.

Contextual Statement: Healthcare professionals interact with patients, families, communities, and populations in technology-rich environments. Nurses, as essential members of the healthcare team, use information and communication technologies and informatics tools in their direct and indirect care roles. The technologies, the locations in which they are used, the users interacting with the technology, the communication occurring, and the work being done all impact the data collected, information formed, decisions made, and the knowledge generated. Additionally, the utilization of information and communication technologies in healthcare settings changes how people, processes, and policies interact. Using these tools in the provision of care has both short- and long-term consequences for the quality of care, efficiency of communications, and connections between team members, patients, and consumers. It is essential that nurses at all levels understand their role and the value of their input in health information technology analysis, planning, implementation, and evaluation. With the prevalence of patient-focused health information technologies, all nurses have a responsibility to advocate for equitable access and assist patients and consumers to optimally use these tools to engage in care, improve health, and manage health conditions.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|--|---|
| 8.1 Describe the various information and communication technology tools used in the care of patients, communities, and populations. | |
| 8.1a Identify the variety of information and communication technologies used in care settings. | 8.1g Identify best evidence and practices for the application of information and communication technologies to support care. |
| 8.1b Identify the basic concepts of electronic health, mobile health, and telehealth systems for enabling patient care. | 8.1h Evaluate the unintended consequences of information and communication technologies on care processes, communications, and information flow across care settings. |
| 8.1c Effectively use electronic communication tools. | 8.1i Propose a plan to influence the selection and implementation of new information and communication technologies. |
| 8.1d Describe the appropriate use of multimedia applications in health care. | 8.1j Explore the fiscal impact of information and communication technologies on health care. |
| 8.1e Demonstrate best practice use of social networking applications. | 8.1k Identify the impact of information and communication technologies on workflow processes and healthcare outcomes. |

| | |
|---|---|
| 8.1f Explain the importance of nursing engagement in the planning and selection of healthcare technologies. | |
| 8.2 Use information and communication technology to gather data, create information, and generate knowledge. | |
| 8.2a Enter accurate data when chronicling care. | 8.2f Generate information and knowledge from health information technology databases. |
| 8.2b Explain how data entered on one patient impacts public and population health data. | 8.2g Evaluate the use of communication technology to improve consumer health information literacy. |
| 8.2c Use appropriate data when planning care. | 8.2h Use standardized data to evaluate decision-making and outcomes across all systems levels. |
| 8.2d Demonstrate the appropriate use of health information literacy assessments and improvement strategies. | 8.2i Clarify how the collection of standardized data advances the practice, understanding, and value of nursing and supports care. |
| 8.2e Describe the importance of standardized nursing data to reflect the unique contribution of nursing practice. | 8.2j Interpret primary and secondary data and other information to support care. |
| 8.3 Use information and communication technologies and informatics processes to deliver safe nursing care to diverse populations in a variety of settings. | |
| 8.3a Demonstrate appropriate use of information and communication technologies. | 8.3g Evaluate the use of information and communication technology to address needs, gaps, and inefficiencies in care. |
| 8.3b Evaluate how decision support tools impact clinical judgment and safe patient care. | 8.3h Formulate a plan to influence decision-making processes for selecting, implementing, and evaluating support tools. |
| 8.3c Use information and communication technology in a manner that supports the nurse-patient relationship. | 8.3i Appraise the role of information and communication technologies in engaging the patient and supporting the nurse-patient relationship. |
| 8.3d Examine how emerging technologies influence healthcare delivery and clinical decision making. | 8.3j Evaluate the potential uses and impact of emerging technologies in health care. |
| 8.3e Identify impact of information and communication technology on quality and safety of care. | 8.3k Pose strategies to reduce inequities in digital access to data and information. |

| | |
|--|--|
| <p>8.3f Identify the importance of reporting system processes and functional issues (error messages, mis-directions, device malfunctions, etc.) according to organizational policies and procedures.</p> | |
| <p>8.4 Use information and communication technology to support documentation of care and communication among providers, patients, and all system levels.</p> | |
| <p>8.4a Explain the role of communication technology in enhancing clinical information flows.</p> | <p>8.4e Assess best practices for the use of advanced information and communication technologies to support patient and team communications.</p> |
| <p>8.4b Describe how information and communication technology tools support patient and team communications.</p> | <p>8.4f Employ electronic health, mobile health, and telehealth systems to enable quality, ethical, and efficient patient care.</p> |
| <p>8.4c Identify the basic concepts of electronic health, mobile health, and telehealth systems in enabling patient care.</p> | <p>8.4g Evaluate the impact of health information exchange, interoperability, and integration to support patient-centered care.</p> |
| <p>8.4d Explain the impact of health information exchange, interoperability, and integration on health care.</p> | |
| <p>8.5 Use information and communication technologies in accordance with ethical, legal, professional, and regulatory standards, and workplace policies in the delivery of care.</p> | |
| <p>8.5a Identify common risks associated with using information and communication technology.</p> | <p>8.5g Apply risk mitigation and security strategies to reduce misuse of information and communication technology.</p> |
| <p>8.5b Demonstrate ethical use of social networking applications.</p> | <p>8.5h Assess potential ethical and legal issues associated with the use of information and communication technology.</p> |
| <p>8.5c Comply with legal and regulatory requirements while using communication and information technologies.</p> | <p>8.5i Recommend strategies to protect health information when using communication and information technology.</p> |
| <p>8.5d Educate patients on their rights to access, review, and correct personal data and medical records.</p> | <p>8.5j Promote patient engagement with their personal health data.</p> |
| <p>8.5e Discuss how clinical judgment and critical thinking must prevail in the presence of information and communication technologies.</p> | <p>8.5k Advocate for policies and regulations that support the appropriate use of technologies impacting health care.</p> |
| <p>8.5f Deliver care using remote technology.</p> | <p>8.5l Analyze the impact of federal and state policies and regulation on health data and technology in care settings.</p> |

Domain 9: Professionalism

Descriptor: Formation and cultivation of a sustainable professional identity, including accountability, perspective, collaborative disposition, and comportment, that reflects nursing’s characteristics and values.

Contextual Statement: Professionalism encompasses the development of a nursing identity embracing the values of integrity, altruism, inclusivity, compassion, courage, humility, advocacy, caring, autonomy, humanity, and social justice. Professional identity formation necessitates the development of emotional intelligence to promote social good, engage in social justice, and demonstrate ethical comportment, moral courage, and assertiveness in decision making and actions. Nursing professionalism is a continuous process of socialization that requires the nurse to give back to the profession through the mentorship and development of others.

Professional identity, influenced by one’s personal identity and unique background, is formed throughout one’s education and career. Nursing identity flourishes through engagement and reflection in multiple experiences that is defined by differing perspectives and voices. As a result, nurses embrace the history, characteristics, and values of the discipline and think, act, and feel like a nurse. Professional identity formation is not a linear process but rather one that responds to challenges and matures through professional experiences as one develops confidence as a nurse.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|--|---|
| 9.1 Demonstrate an ethical comportment in one’s practice reflective of nursing’s mission to society. | |
| 9.1a Apply principles of professional nursing ethics and human rights in patient care and professional situations. | 9.1h Analyze current policies and practices in the context of an ethical framework. |
| 9.1b Reflect on one’s actions and their consequences. | 9.1i Model ethical behaviors in practice and leadership roles. |
| 9.1c Demonstrate ethical behaviors in practice. | 9.1j Suggest solutions when unethical behaviors are observed. |
| 9.1d Change behavior based on self and situational awareness. | 9.1k Assume accountability for working to resolve ethical dilemmas. |
| 9.1e Report unethical behaviors when observed. | |
| 9.1f Safeguard privacy, confidentiality, and autonomy in all interactions. | |
| 9.1g Advocate for the individual’s right to self-determination. | |

| 9.2 Employ participatory approach to nursing care. | |
|---|--|
| 9.2a Employ the use of intentional presence to facilitate shared meaning of the experience between nurse and recipient of care. | 9.2h Foster opportunities for intentional presence in practice. |
| 9.2b Facilitate health and healing through compassionate caring. | 9.2i Identify innovative and evidence-based practices that promote person-centered care. |
| 9.2c Demonstrate empathy to the individual's life experience. | 9.2j Advocate for practices that advance diversity, equity, and inclusion. |
| 9.2d Advocate for practices that advance diversity, equity, and inclusion. | 9.2k Model professional expectations for therapeutic relationships. |
| 9.2e Demonstrate cultural sensitivity and humility in practice. | 9.2l Facilitate communication that promotes a participatory approach. |
| 9.2f Apply principles of therapeutic relationships and professional boundaries. | |
| 9.2g Communicate in a professional manner. | |
| 9.3 Demonstrate accountability to the individual, society, and the profession. | |
| 9.3a Engage in advocacy that promotes the best interest of the individual, community, and profession. | 9.3i Advocate for nursing's professional responsibility for ensuring optimal care outcomes |
| 9.3b Demonstrate the moral courage to report concerns related to actual or potential hazards and/or errors. | 9.3j Demonstrate leadership skills when participating in professional activities and/or organizations. |
| 9.3c Demonstrate professional and personal honesty and integrity. | 9.3k Address actual or potential hazards and/or errors. |
| 9.3d Take responsibility for one's roles, decisions, obligations, actions, and care outcomes. | 9.3l Foster a practice environment that promotes accountability for care outcomes. |
| 9.3e Engage in professional activities and/or organizations. | 9.3m Advocate for policies/practices that promote social justice and health equity. |
| 9.3f Demonstrate adherence to a culture of civility. | 9.3n Foster strategies that promote a culture of civility across a variety of settings. |
| 9.3g Advocate for social justice and health equity, including addressing the health of vulnerable populations. | 9.3o Lead in the development of opportunities for professional and interprofessional activities. |
| 9.3h Engage in peer evaluation. | |

| 9.4 Comply with relevant laws, policies, and regulations. | |
|--|--|
| 9.4a Advocate for policies that promote health and prevent harm. | 9.4d Advocate for polices that enable nurses to practice to the full extent of their education. |
| 9.4b Adhere to the registered nurse scope and standards of practice. | 9.4e Assess the interaction between regulatory agency requirements and quality, fiscal, and value-based indicators. |
| 9.4c Adhere to regulatory requirements and workplace policies consistent with one's educational preparation. | 9.4f Evaluate the effect of legal and regulatory policies on nursing practice and healthcare outcomes. |
| | 9.4g Analyze efforts to change legal and regulatory policies that improve nursing practice and health outcomes. |
| | 9.4h Participate in the implementation of policies and regulations to improve the professional practice environment and healthcare outcomes. |
| 9.5 Demonstrate the professional identity of nursing. | |
| 9.5a Describe nursing's professional identity and contributions to the healthcare team. | 9.5f Articulate nursing's unique professional identity to other interprofessional team members and the public. |
| 9.5b Demonstrate the core values of professional nursing identity. | 9.5g Evaluate practice environment to ensure that nursing core values are demonstrated. |
| 9.5c Demonstrate sensitivity to the values of others. | 9.5h Identify opportunities to lead with moral courage to influence team decision-making. |
| 9.5d Demonstrate ethical comportment and moral courage in decision making and actions. | 9.5i Engage in professional organizations that reflect nursing's values and identity. |
| 9.5e Demonstrate emotional intelligence. | |
| 9.6 Integrate diversity, equity, and inclusion as core to one's professional identity. | |
| 9.6a Demonstrate respect for diverse individual differences and diverse communities and populations | 9.6d Model respect for diversity, equity, and inclusion for all team members. |
| 9.6b Demonstrate awareness of personal and professional values and conscious and unconscious biases. | 9.6e Critique one's personal and professional practices in the context of nursing's core values. |

| | |
|--|---|
| 9.6c Integrate core principles of social justice and human rights into practice. | 9.6f Analyze the impact of structural and cultural influences on nursing's professional identity. |
| | 9.6g Ensure that care provided by self and others is reflective of nursing's core values. |
| | 9.6h Structure the practice environment to facilitate care that is culturally and linguistically appropriate. |
| | 9.6i Ensure self and others are accountable in upholding moral, legal, and humanistic principles related to health. |

Domain 10: Personal, Professional, and Leadership Development

Descriptor: Participation in activities and self-reflection that foster personal health, resilience, and well-being; contribute to lifelong learning; and support the acquisition of nursing expertise and the assertion of leadership.

Contextual Statement: Competency in personal, professional, and leadership development encompasses three areas: 1) development of the nurse as an individual who is resilient, agile, and capable of adapting to ambiguity and change; 2) development of the nurse as a professional responsible for lifelong learning and ongoing self-reflection; and 3) development of the nurse as a leader proficient in asserting control, influence, and power in professional and personal contexts, which includes advocacy for patients and the nursing profession as leaders within the healthcare arena. Development of these dimensions requires a commitment to personal growth, sustained expansion of professional knowledge and expertise, and determined leadership practice in a variety of contexts.

Graduates must develop attributes and skills critical to the viability of the profession and practice environments. The aim is to promote diversity and retention in the profession, self-awareness, avoidance of stress-induced emotional and mental exhaustion, and re-direction of energy from negative perceptions to positive influence through leadership opportunities.

| Entry-Level Professional Nursing Education | Advanced-Level Nursing Education |
|---|--|
| 10.1 Demonstrate a commitment to personal health and well-being. | |
| 10.1a Demonstrate healthy, self-care behaviors that promote wellness and resiliency. | 10.1c Contribute to an environment that promotes self-care, personal health, and well-being. |
| 10.1b Manage conflict between personal and professional responsibilities. | 10.1d Evaluate the workplace environment to determine level of health and well-being. |
| 10.2 Demonstrate a spirit of inquiry that fosters flexibility and professional maturity. | |
| 10.2a Engage in guided and spontaneous reflection of one's practice. | 10.2g Demonstrate cognitive flexibility in managing change within complex environments. |
| 10.2b Integrate comprehensive feedback to improve performance. | 10.2h Mentor others in the development of their professional growth and accountability. |
| 10.2c Commit to personal and professional development. | 10.2i Foster activities that support a culture of lifelong learning. |
| 10.2d Expand personal knowledge to inform clinical judgment. | 10.2j Expand leadership skills through professional service. |
| 10.2e Identify role models and mentors to support professional growth. | |

| | |
|---|---|
| 10.2f Participate in ongoing activities that embrace principles of diversity, equity, inclusion, and anti-discrimination. | |
| 10.3 Develop capacity for leadership. | |
| 10.3a Compare and contrast leadership principles and theories. | 10.3j Provide leadership to advance the nursing profession. |
| 10.3b Formulate a personal leadership style. | 10.3k Influence intentional change guided by leadership principles and theories. |
| 10.3c Demonstrate leadership behaviors in professional situations. | 10.3l Evaluate the outcomes of intentional change. |
| 10.3d Demonstrate self-efficacy consistent with one's professional development. | 10.3m Evaluate strategies/methods for peer review. |
| 10.3e Use appropriate resources when dealing with ambiguity. | 10.3n Participate in the evaluation of other members of the care team. |
| 10.3f Modify one's own leadership behaviors based on guided self-reflection. | 10.3o Demonstrate leadership skills in times of uncertainty and crisis. |
| 10.3g Demonstrate self-awareness of one's own implicit biases and their relationship to one's culture and environment. | 10.3p Advocate for the promotion of social justice and eradication of structural racism and systematic inequity in nursing and society. |
| 10.3h Communicate a consistent image of the nurse as a leader. | 10.3q Advocate for the nursing profession in a manner that is consistent, positive, relevant, accurate, and distinctive. |
| 10.3i Recognize the importance of nursing's contributions as leaders in practice and policy issues. | |

Glossary

Accountability: Obligation or willingness to accept responsibility or to account for one's actions.

Advanced nursing practice role: One of the four Advanced Practice Registered Nurse (APRN) roles – certified registered nurse anesthetist, certified nurse-midwife, certified clinical nurse specialist, and certified nurse practitioner.

Advanced nursing practice specialty: See Specialty.

Advanced Practice Registered Nurse (APRN): Designation given to one of four nursing roles: certified registered nurse anesthetists, certified nurse-midwives, certified clinical nurse specialists, and certified nurse practitioners. An APRN is a nurse who has 1.) completed an accredited graduate-level education program preparing him/her for one of the four recognized APRN roles; 2.) passed a national certification examination that measures APRN role and population-focused competencies and who maintains continued competence as evidenced by recertification in the role and population through the national certification program; 3.) acquired advanced clinical knowledge and skills preparing him/her to provide direct care to patients, as well as a component of indirect care; 4.) built on the competencies of registered nurses by demonstrating a greater depth and breadth of knowledge, a greater synthesis of data, increased complexity of skills and interventions, and greater role autonomy; 5.) been educationally prepared to assume responsibility and accountability for health promotion and/or maintenance as well as the assessment, diagnosis, and management of patient problems, which includes the use and prescription of pharmacologic and non-pharmacologic interventions; 6.) clinical experience of sufficient depth and breadth to reflect the intended license; and 7.) obtained a license to practice in one of the four APRN roles (APRN Consensus Work Group & NCSBN APRN Advisory Committee, 2008).

APRN Core: APRN education programs include at a minimum, three separate comprehensive graduate-level courses in: Advanced physiology and pathophysiology, which includes general principles that apply across the lifespan; Advanced health assessment, which includes assessment of all human systems, advanced assessment techniques, concepts and approaches; and Advanced pharmacology, which includes pharmacodynamics, pharmacokinetics and pharmacotherapeutics of all broad categories of agents (APRN Consensus Work Group & NCSBN APRN Advisory Committee, 2008).

Advocacy: The act or process of supporting a cause or proposal: the act or process of advocating. Advocacy is a pillar of nursing. Nurses instinctively advocate for their patients, in their workplaces, and in their communities; but legislative and political advocacy is equally important to advancing patient care.

Analytic approach: Any method based on breaking down a complex process into its parts so as to better understand the whole.

Authentic or intentional presence: Being fully present in the moment This extends to possessing an awareness of when you drift and how to intentionally bring yourself back to the interaction (Altman, 2014).

Care: A focused attention on, and when possible, engagement with a patient to determine a person’s particular needs and the use of clinical judgment to meet those needs (Grace, 2018).

Care outcomes: Harris (1991) defined outcomes as the end points of care, substantial changes in the health condition of a patient, and changes in patient behavior caused by medical interventions. Given these definitions, outcomes related to clinical practice are any change that resulted from health care.

Caring relationship: Caring constitutes the essence of what it is to be human, having a profound effect on well-being and recovery, being at ease, and being healed. When hospitality is received, patients feel a connection, they begin to trust, and their healing begins.

Clinical immersion: A brief, structured, intense nursing practicum where the entire focus is in a particular clinical setting without the distraction of other academic classes (Tratnack, et al., 2011).

Clinical judgment: The skill of recognizing cues regarding a clinical situation, generating and weighing hypotheses, taking action, and evaluating outcomes for the purpose of arriving at a satisfactory clinical outcome. Clinical judgment is the observed outcome of two unobserved underlying mental processes, critical thinking and decision making (NCSBN, 2018).

Clinical reasoning: Thought processes that allow healthcare providers to arrive at a conclusion.

Cognitive flexibility: A critical executive function involving the ability to adapt behaviors in response to changes in the environment. Cognitive flexibility generally refers to the ability to adapt flexibly to a constantly changing environment.

Complex systems: Systems whose behavior is intrinsically difficult to model due to the dependencies, competitions, relationships, or other types of interactions between their parts or between a given system and its environment. Complex systems have distinct properties that arise from these relationships, such as nonlinearity, emergence, spontaneous order, adaptation, and feedback loops, among others.

Competence: The array of abilities (knowledge, skills, and attitudes) across multiple domains or aspects of performance in a certain context. Competence is multi-dimensional and dynamic (Frank, Snell, Cate, et al., 2010).

Competency: An observable ability of a health professional, integrating multiple components such as knowledge, skills, values, and attitudes. Since competencies are observable, they can be measured and assessed to ensure their acquisition (Frank, Snell, Cate, et al., 2010).

Competency framework: An organized and structured representation of a set of interrelated and purposeful competencies (Englander et al., 2013, p. 1089).

Competency list: The delineation of the specific competencies within a competency framework (Englander, et al., 2013, p.1089).

Concepts: A concept is an organizing idea or mental construct represented by common attributes. Rodgers (1989, p. 332) describes concepts as “an abstraction that is expressed in some form.”

Core values: In nursing, core nursing values include human dignity, integrity, autonomy, altruism, and social justice.

Core disciplinary knowledge: The intellectual structures within which the discipline delineates its unique focus of vision and social mandate. AACN has identified core disciplinary knowledge as having three components: historic and philosophic foundations to the development of nursing knowledge; existing and evolving substantive nursing knowledge; and methods and processes of theory/knowledge development (AACN, 2002, p. 289).

Cost effectiveness: A way to examine both the costs and health outcomes of one or more interventions; it compares one intervention to another (or the status quo) by estimating how much it costs to gain a unit of a health outcome, like a life year gained or a death prevented.

Critical thinking: The skill of using logic and reasoning to identify the strengths and weaknesses of alternative healthcare solutions, conclusions, or approaches to clinical or practice problems.

Cultural awareness: The deliberate self-examination and in-depth exploration of one's biases, stereotypes, prejudices, assumptions, and "isms" that one holds regarding individuals and groups who are different from them (Campinha-Bacote, 1998).

Cultural competence: The ability to effectively work within the client's cultural context. Structural competence is recognition of the economic and political conditions that produce health inequalities in the first place. It is the ability to understand how institutions, markets, or healthcare delivery systems shape symptom presentations and to mobilize for correction of health and wealth inequalities in society (Drevdahl, 2018; Metzl et al., 2018; Metzl et al., 2020).

Cultural and linguistic competence: A set of congruent behaviors, attitudes, and policies that come together in a system, agency, or among professionals that enables effective work in cross-cultural situations. 'Culture' refers to integrated patterns of human behavior that include the language, thoughts, communications, actions, customs, beliefs, values, and institutions of racial, ethnic, religious, or social groups. 'Competence' implies having the capacity to function effectively as an individual and an organization within the context of the cultural beliefs, behaviors, and needs presented by consumers and their communities (Cross et al., 1989). Cultural competence is a developmental process that evolves over an extended period.

Culturally sensitive: "The ability to be appropriately responsive to the attitudes, feelings, or circumstances of groups of people that share a common and distinctive racial, national, religious, linguistic, or cultural heritage" (DHHS, OMH, 2001, p. 131).

Cultural humility: A lifelong process of self-reflection and self-critique whereby the individual not only learns about another's culture, but also examines her/his own beliefs and cultural identities.

Determinants of health: The range of personal, social, economic, and environmental factors that interrelate to determine individual and population health. These factors include policymaking, social factors, health services, individual behaviors, and biology and genetics. Determinants of health reach beyond the boundaries of traditional health care and public health sectors. Sectors such as education, housing, transportation, agriculture, and environment can be important allies in improving population health (*Healthy People 2020*).

Diagnose: To identify the nature of an illness or other problem by examination of the symptoms.

Diversity: A broad range of individual, population, and social characteristics, including but not limited to age; sex; race; ethnicity; sexual orientation; gender identity; family structures; geographic locations; national origin; immigrants and refugees; language; any impairment that substantially limits a major life activity; religious beliefs; and socioeconomic status. Inclusion represents environmental and organizational cultures in which faculty, students, staff, and administrators with diverse characteristics thrive. Inclusive environments require intentionality and embrace differences, not merely tolerate them. Everyone works to ensure the perspectives and experiences of others are invited, welcomed, acknowledged, and respected in inclusive environments.

Domains of competence: Broad distinguishable areas of competence that in the aggregate constitute a general descriptive framework for a profession (Englander et al., 2013, p. 1089).

Emotional intelligence: The ability to perceive, appraise and express emotion, access and process emotional information, generate feelings, understand emotional knowledge and regulate emotions for emotional and intellectual growth (Mayer, et al, 1997, p. 10). Emotional intelligence, like academic intelligence, can be learned, increases with age, and is predictive of how emotional processing contributes to success in life (Mayer et al., 2004).

Equity: The ability to recognize the differences in the resources or knowledge needed to allow individuals to fully participate in society, including access to higher education, with the goal of overcoming obstacles to ensure fairness (Kranich, 2001). To have equitable systems, all people should be treated fairly, unhampered by artificial barriers, stereotypes, or prejudices (Cooper, 2016).

Ethical comportment: The way in which nurses embody the ability to relate to others respectfully and responsively (Benner, 2009). Ethical comportment consists of four critical attributes: 1) embodiment, 2) skilled relational know-how, 3) caring, and 4) salience (Hardin, 2018).

Ethical competence: The ability to recognize an ethical situation/issue (awareness/sensitivity), the ability to determine a justifiable action (reflection/decision-making), and have the motivation, knowledge, and skills to implement a decision (comportment and action) (ANA Scope & Standards, 2021).

Evidence-based practice: A conscientious, problem-solving approach to clinical practice that incorporates the best evidence from well-designed studies, patient values and preferences, and a clinician's expertise in making decisions regarding a patient's care. Being knowledgeable about evidence-based practice and levels of evidence is important for clinicians to be confident about how much emphasis they should place on a study, report, practice alert or practice guideline when making decisions about a patient's care.

Explicit biases: Conscious positive or negative feelings and/or thoughts about groups or identity characteristics. Because these attitudes are explicit in nature, they are espoused openly, through overt and deliberate thoughts and actions (Harrison et al., 2019; Wilson et al., 2000)

Family: An individual’s closest support structure that is inclusive of birth family, single parent families, blended families, families with stepparents, and families with homosexual parents to name a few. The concept of the contemporary family has evolved into a fluid ideology that is constantly shifting and changing throughout society.

Health disparities: “A particular type of health difference that is closely linked with economic, social, or environmental disadvantage. Health disparities adversely affect groups of people who have systematically experienced greater social or economic obstacles to health based on their racial or ethnic group, religion, socioeconomic status, gender, age, or mental health; cognitive, sensory, or physical disability; sexual orientation or gender identity; geographic location; or other characteristics historically linked to discrimination or exclusion” (US Department of Health and Human Services (2010).

Health equity: When every person has an opportunity to attain his or her full health potential” and no one is “disadvantaged from achieving this potential because of social position or other socially determined circumstances (National Academies of Sciences, Engineering, and Medicine, 2017). Health inequities are reflected in differences in length of life; quality of life; rates of disease, disability, and death; severity of disease; and access to treatment.

Health inequity: The distribution and allocation of power and resources differentially, which manifest in unequal social, economic, and environmental conditions (National Academies of Sciences, Engineering, and Medicine, 2017).

Health Information Technology (HIT): The electronic systems healthcare professionals and patients use to store, share, and analyze health information. HIT consists of many types of applications such as Electronic Health Records, personal health records, electronic prescribing, mobile applications, social networks, monitors, wearables, nanotechnology, genomics, and robotics (Office of the National Coordinator for Health Information Technology [ONC], 2018).

Healthcare team: The collective of individuals who contribute to the care and treatment of an individual, family, group, or population.

Healthy lifestyle: A way of living that lowers the risk of being seriously ill or dying early. Scientific studies have identified certain types of behavior that contribute to the development of noncommunicable diseases and early death. Health is not only just about avoiding disease. It involves physical, mental and social wellbeing.

Holistic admissions review: An admissions strategy that assesses an applicant’s unique experiences alongside traditional measures of academic achievement, such as grades and test scores. This process is used to help schools consider a broad range of factors reflecting the applicant’s academic readiness, contribution to the incoming class, and potential for success both in school and later as a professional.

Holistic nursing: “All nursing practice that has healing the whole person as its goal” (American Holistic Nurses’ Association, 1998).

Implicit and unconscious biases: The tendency to process information based on unconscious associations and feelings, even when these are contrary to one’s conscious or declared beliefs. They are automatically activated and may occur unconsciously (Metzl et al., 2018, 2020; Van Ryn et al. 2011).

Inclusive environments: Environmental and organizational cultures in which faculty, students, staff, and administrators with diverse characteristics thrive. Inclusive environments require intentionality and embrace differences, not merely tolerate them. Everyone works to ensure the perspectives and experiences of others are invited, welcomed, acknowledged, and respected.

Inequities: Characterized by a lack of equity, injustice, unfairness.

Informatics: The intersection between the work of stakeholders across the health and healthcare delivery system who seek to improve outcomes, lower costs, increase safety and promote the use of high-quality services. It is frequently confused with data science, big data, health information management and data analytics, informatics is the overarching field of study that pulls all these subdomains into one discipline focused on improving health and healthcare. Emerging topics like artificial intelligence and machine learning are incorporating in the field of informatics (AMIA, 2021).

Information and Communications Technologies (ICT): Technologies that provide access to information through telecommunications, including the internet, telephones, cell phones, wireless signals, networks, satellite systems, telehealth/telenursing, and video conferencing.

Innovation: A great idea to develop and deliver new or improved health policies, systems, products and technologies, and services and delivery methods that improve people’s health (WHO Health Innovation Group, 2021).

Integration: An experience designed to provide the student with an opportunity to synthesize the knowledge and skills acquired during previous and current coursework and learning experiences.

Intentional change theory: The essential components and processes of desirable, sustainable change in one’s behavior, thoughts, feelings, and perceptions. The “change” maybe in a person’s actions, habits, competencies, or aspirations as well as in the way one feels in certain situations or around certain people. The change may impact how one looks at events at work or in life. The change is “desired” in that person wishes it so or would like to occur and is “sustainable” in that it endures and lasts a relatively long time (Boyatzis, 2006).

Interdisciplinary: Refers to a group of healthcare providers with various areas of expertise who work together toward the goals of their clients.

Interoperability: The ability of different information systems, devices, and applications (systems) to access, exchange, integrate, and cooperatively use data in a coordinated manner, within and across organizational, regional, and national boundaries to provide timely and seamless portability of information and optimize the health of individuals and populations globally. Health data exchange architectures, application interfaces, and standards enable data to be accessed and shared appropriately and securely across the complete spectrum of care, within all applicable settings and with relevant stakeholders, including the individual.

Interprofessional: Engagement involving two or more professions or professionals.

Interprofessional team: The cooperation, coordination, and collaboration expected among members of different professions in delivering patient-centered care collectively.

Just culture: Balances the need for an open and honest reporting environment with a quality learning environment and culture. All individuals within this environment are held responsible for the quality of their choices. Just culture requires a change in focus from errors and outcomes to system design and management of the behavioral choices of all employees.

Lifelong learning: The provision or use of both formal and informal learning opportunities throughout one's life to foster the continuous development and improvement of the knowledge and skills needed for employment and personal fulfillment.

Macrosystem: The highest system level represents the whole of the organization and is led by senior leaders such as the CEO, chief operations officer (COO), chief nursing officer (CNO), and chief information officer (CIO) and is guided by a board of trustees (Nelson, et al., 2007).

Managing disease: To improve the health of persons with chronic conditions and reduce associated costs from avoidable complications by identifying and treating chronic conditions more quickly and more effectively, thus slowing the progression of diseases.

Mesosystem: The interrelated units and clinical leadership that provide care to certain populations (McKinley et al., 2008).

Microsystem: Small, functional frontline units that provide the most health care to most people (Nelson et al., 2007, p.3). A clinical microsystem is a small group of people who work together on a regular basis to provide care to discrete subpopulations of patients. These units have clinical and business aims, linked processes, and a shared information environment, and focus on producing performance outcomes. Microsystems are complex adaptive systems, and as such they must do the primary work associated with core aims, meet the needs of internal staff, and maintain themselves over time as clinical units (Nelson, et al., 2002).

Mitigation: The action of reducing the severity, seriousness, or painfulness of something.

Mobile health (mHealth): The use of mobile and wireless technologies to support the achievement of health objectives. The expanding use of mobile health is driven rapid advances in mobile technologies and applications, a rise in new opportunities for the integration of mobile health into existing eHealth services, and the continued growth in coverage of mobile cellular networks.

Moral courage: The willingness of individuals to take hold of, and fully support, ethical responsibilities essential to professional values (Day, 2007). This highly esteemed trait is displayed by individuals, who, despite adversity and personal risk, decide to act upon their ethical values to help others during difficult ethical dilemmas. Moral courage entails doing the right thing, even when others choose less ethical behavior, which may include taking no action at all (Lachman, 2009; 2007a; 2007b; Sekerka & Bagozzi, 2007).

Moral ethical behaviors: Prevailing standards of behavior used to judge right and wrong.

Nurse sensitive indicators: Reflect three aspects of nursing care: structure, process, and outcomes. Structural indicators include the supply of nursing staff, the skill level of nursing staff, and the education and certification levels of nursing staff. Process indicators measure methods of patient assessment and nursing interventions. Nursing job satisfaction is also considered a process indicator. Outcome indicators reflect patient outcomes that depend on the quantity or quality of nursing care (e.g., pressure ulcers and falls).

Nursing informatics: The specialty that integrates nursing science with multiple information and analytical sciences to identify, define, manage, and communicate data, information, knowledge, and wisdom in nursing practice (HIMSS, 2021).

Participatory approach: Calls for involving stakeholders, particularly the participants in a program or those affected by a given policy, in specific aspects of the evaluation process. The approach covers a wide range of different types of participation, and stakeholders can be involved at any stage of the impact evaluation process, including its design, data collection, analysis, reporting, and managing a study.

Partnerships: Close cooperation between parties having specified and joint rights and responsibilities.

Patient: The recipient of a healthcare service or intervention at the individual, family, community, or aggregate level. Patients may function in independent, interdependent, or dependent roles, and may seek or receive nursing interventions related to disease prevention, health promotion, or health maintenance, as well as illness and end-of-life care (AACN, 2006).

Person-Centered Care: “Empowering people to take charge of their own health rather than being passive recipients of services” (WHO, 2021). This care strategy is based on the belief that patient views, input, and experiences can help improve overall health outcomes.

Point of Care: Where care is delivered, including in diverse settings where individuals live, learn, work, play, and worship.

Population: A collection of individuals who have one or more personal or environmental characteristics in common.

Practice: Any form of nursing intervention that influences healthcare outcomes for individuals or populations, including the direct care of individual patients, management of care for individuals and populations, administration of nursing and healthcare organizations, and the development and implementation of health policy (AACN, 2004). Practice includes both direct and indirect care experiences (defined below).

Direct Care/Indirect Care:

- Direct care refers to a professional encounter between a nurse and an actual individual or family, either face to face or virtual, that is intended to achieve specific health goals or achieve selected health outcomes. Direct care may be provided in a wide range of settings, including acute and critical care, long term care, home health, community-based settings, and telehealth. (AACN, 2004, 2006; Suby, 2009; Upenieks, Akhavan, Kotlerman et al., 2007).

- Indirect care refers to nursing decisions, actions, or interventions that are provided through or on behalf of individuals, families, or groups. These decisions or interventions create the conditions under which nursing care or selfcare may occur. Nurses might use administrative decisions, population or aggregate health planning, or policy development to affect health outcomes in this way. Nurses who function in administrative capacities are responsible for direct care provided by other nurses. Their administrative decisions create the conditions under which direct care is provided. Public health nurses organize care for populations or aggregates to create the conditions under which improved health outcomes are more likely to occur. Health policies create broad scale conditions for delivery of nursing and health care (AACN, 2004, 2006; Suby, 2009; Upenieks et al., 2007).

Preparedness: The readiness of the nation’s medical and public health infrastructure to respond to and recover from disasters and public health emergencies. Preparedness requires collaboration with hospitals, healthcare coalitions, biotech firms, community members, state, local, tribal, and territorial governments, and other partners across the country to improve readiness and response capabilities.

Primary and secondary data: Primary data is collected by an investigator for a specific purpose. Secondary data is collected by someone else for another purpose (but being utilized by the investigator for another purpose).

Profession: An occupation (e.g., nursing, medicine, law, teaching) that is not mechanical or agricultural and requires special education.

Professional agility: The power to move quickly and easily; the ability to think and draw conclusions quickly drawing on intellectual acuity.

Professional development: Taking purposeful action to engage in structured activities to advance career development, education, leadership, program management, and/or compliance initiatives.

Professional identity: The representation of self, achieved in stages over time during which the characteristics, values, and norms of a profession are internalized, resulting in an individual thinking, acting, and feeling like a member of the profession (Cruess et al., 2014).

Quality Improvement (QI): A process that uses data to monitor the outcomes of care processes. QI uses improvement methods to design and test changes to continuously improve the quality and safety of health care systems (Cronenwett et al., 2007).

Resilience: The ability to survive and thrive in the face of adversity. Resilience can be developed and internalized as a measure to improve retention and reduce burnout. Building positive relationships, maintaining positivity, developing emotional insight, creating work-life balance, and reflecting on successes and challenges are effective strategies for resilience building.

Response and recovery in an emergency/disaster: Identifying resources and expertise in advance and planning how these can be used in a disaster. Preparedness, however, is only one phase of emergency management. There are four phases of emergency management: mitigation, preparedness, response, and recovery.

Responsibility: The state or fact of being responsible, answerable, or accountable for something within one's power, control, or management.

Return on investment (ROI): A performance measure used to evaluate the efficiency of an investment or compare the efficiency of a number of different investments. ROI seeks to directly measure the amount of return on a particular investment, relative to the investment's cost. To calculate ROI, the benefit (or return) of an investment is divided by the cost of the investment. The result is expressed as a percentage or a ratio.

Risk assessment: A process to identify potential hazards and analyze what could happen if a hazard occurs. To assess risk, organizations often consider possible scenarios that could unfold and what the potential impacts may be.

Scholarship: The generation, synthesis, translation, application, and dissemination of knowledge that aims to improve health and transform health care. Scholarship is the communication of knowledge generated through multiple forms of inquiry that inform clinical practice, nursing education, policy, and healthcare delivery. Scholarship is inclusive of discovery, integration, application, and teaching (Boyer, 1990). The hallmark attribute of scholarship is the cumulative impact of the scholar's work on the field of nursing and health care.

Self-care: The act of attending to one's physical or mental health, generally without medical or other professional consultation.

Self-management: The management of or by oneself; the taking of responsibility for one's own behavior and well-being.

Service: is the action of helping or doing work for someone.

Simulation: A technique that creates a situation or environment to allow persons to experience a representation of a real event for the purpose of practice, learning, evaluation, testing, or to gain understanding of systems or human actions (AHRQ, 2020).

Social Determinants of Health: See Determinants of Health

Social Justice: The expectation that everyone deserves equal economic, political, and social rights and opportunities. Equity, access, participation, and human rights are four principles of social justice including to ensure fair distribution of available resources across society, to ensure all people have access to goods and services regardless of age, gender, race, ethnicity etc.; to enable people to participate in decisions that affect their lives, and to protect individual liberties to information about circumstances and decisions affecting them and to appeal decisions believed to be unfair (Morgaine, 2014; Nemetchek, 2019).

Social Responsibility: An ethical theory in which individuals are accountable for fulfilling their civic duty, and the actions of an individual must benefit the whole of society. This typically involves a balance between economic growth and the welfare of society and the environment. (Pachchamama Alliance, 2021)

Specialty: The pursuit, area of study, or skill to which someone has devoted much time and effort and in which they are expert. Nursing specialization involves focusing on nursing practice in an identified specific area within the discipline of professional nursing. A defined specialty scope of practice statement and standards of professional practice, with accompanying competencies, are unique to each nursing specialty. These documents help assure continued understanding and recognition of nursing's diverse professional contributions (Finnell, et al, 2015).

- **Advanced nursing practice specialties:** Currently, advanced nursing practice specialties include informatics, administration/practice leadership, public health/population health, and health policy. Specialties may evolve over time to address future healthcare needs.

Spheres of Care: Encompass the healthcare needs of individuals, families, populations, and the care/services required to address these needs and promote desired health outcomes. In this document, four spheres of care are delineated 1) disease prevention/promotion of health and well-being, which includes the promotion of physical and mental health in all patients as well as management of minor acute and intermittent care needs of generally healthy patients; 2) chronic disease care, which includes management of chronic diseases and prevention of negative sequelae; 3) regenerative or restorative care, which includes critical/trauma care, complex acute care, acute exacerbations of chronic conditions, and treatment of physiologically unstable patients that generally requires care in a mega-acute care institution; and, 4) hospice/palliative/supportive care which includes end-of-life care as well as palliative and supportive care for individuals requiring extended care or those with complex, chronic disease states or those requiring rehabilitative care (Lipstein, et al, 2016; AACN, 2019).

Standardized data: The process of ensuring that one data set can be compared to other data sets. In statistics, standardized data is the process of putting different variables on the same scale. This process allows one to compare scores between different types of variables.

Stress management: A range of strategies to help one better deal with stress and difficulty (adversity). Managing stress can help an individual lead a more balanced, healthier life. Stress is an automatic physical, mental and emotional response to a challenging event. Stress management approaches include learning skills such as problem-solving, prioritizing tasks, and time management to enhance the ability to cope with adversity.

Structural racism: A complex system of conferring social benefits in some groups and imposing burdens on others resulting in segregation, poverty, and denial of opportunity for people of color. Structural racism comprises cultural beliefs, historical legacies, and institutions, policies within and among public and private organizations that interweave to create drastic racial disparities in life outcomes (Wiecek, 2011).

Support care: Treatment given to prevent, control, or relieve complications and side effects and to improve the patient's comfort and quality of life.

System decision: A computerized program used to support determinations, judgments, and courses of action in an organization or a business. A system decision sifts through and analyzes massive amounts of data, compiling comprehensive information that can be used to solve problems and in decision-making.

Systemic inequity: A condition where one category of people is attributed an unequal status in relation to other categories of people. This relationship is perpetuated and reinforced by a confluence of unequal relations in roles, functions, decisions, rights, and opportunities.

Systemic racism (also known as institutionalized racism): Terms similar to structural racism which focuses more on the historical, cultural and social psychological aspects of the currently racialized society. The term institutional racism may be used to differentiate “access to the goods, services, and opportunities of society by race. Institutionalized racism is normative, sometimes legalized, and often manifests as inherited disadvantage. It is structural, having been codified in our institutions of custom, practice, and law, so there is no identifiable perpetrator. Institutionalized racism is often evident as inaction in the face of need” (Jones, 2000).

Systems: A set of elements or components working together as parts of a mechanism or an interconnecting network.

Systems-based practice: An analytic tool and a way of viewing the world, which can make caregiving and change efforts more successful. The focus is on understanding the interdependencies of a system or series of systems and the changes identified to improve care that can be made and measured in the system.

Team-based care: The provision of health services to individuals, families, and/or their communities by at least two health providers who work collaboratively with patients and their caregivers—to the extent preferred by each patient—to accomplish shared goals within and across settings to achieve coordinated, high-quality care (Naylor, 2010; NAM, 2012; AANP, 2020).

Telehealth systems: The use of a technology-based virtual platform to deliver various aspects of health information, prevention, monitoring, and medical care.

Translation: The process of turning observations in the laboratory, clinic, and community into interventions that improve the health of individuals and the public — from diagnostics and therapeutics to medical procedures and behavioral changes.

Translational science: The field of investigation focused on understanding the scientific and operational principles underlying each step of the translational process. Translational scientists are innovative and collaborative, searching for ways to break down barriers in the translation process and ultimately deliver more treatments to more patients more quickly.

Wellness and well-being: A state of being marked by emotional stability (e.g., coping effectively with life and creating satisfying relationships) and physical health (e.g., recognizing the need for physical activity, healthy foods, and sleep).

Effective Catalog Year

2025-2026

Program Title

Doctor of Psychology in Clinical Psychology

Degree Type

Major

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

120-125

Attach Program Change

PsyD_Budget-Proposal-Form_final_9-16-2021-1 (1).xlsx
SBOE_App_PsyD_Academic_Degree_and_Certificate_Full-Proposal_Form.pdf

CIP Code

42.2801 - Clinical Psychology.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

Yes

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Discribe the financial impact

The Idaho WWAMI Medical Education program, in collaboration with the UI Counseling & Mental Health Center (CMHC) and the UI Psychology and Communication Department, proposes the development of a Doctor of Psychology program (PsyD) in clinical

psychology. As such, the new program is a shared endeavor. It will not replace any existing programs. This is a substantive change, with a new program offering, requiring the addition of clinical faculty and additional courses not currently offered at the University of Idaho.

The PsyD Program will be housed in the College of Graduate Studies at the University of Idaho. A School of Health and medical Professions is currently being created and processed to eventually house this and other health care programs, under the College of Graduate Studies.

Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future.

The primary beneficiaries, if this program request is granted, are the individuals and communities who will be served by these future Nurses. Thus, the impact could encompass all of Idaho.

Curriculum:

See attached SBOE Full Proposal Form

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Intended learning outcomes for PsyD clinical psychology graduates are detailed in the accreditation requirements for the American Psychological Association. The curriculum will be based on profession-wide competencies as outlined by the APA, which include the following: I. Research; II. Ethical and Legal Standards; III. Individual and Cultural Diversity; IV. Professional Values, Attitudes, and Behaviors; V. Communication and Interpersonal Skills; VI. Assessment; VII. Intervention; VIII. Supervision; IX. Consultation and Interprofessional/Interdisciplinary Skills.

These profession-wide competencies are expected of all graduates and are partially demonstrated via the following learning outcomes:

- I. Research: Successful completion of coursework related to methods and statistics, as well as completion of the dissertation, participation in faculty-supervised research, and completion of a manuscript to be submitted for possible publication in a peer-reviewed journal.
- II. Ethical and Legal Standards: Successful completion of coursework related to ethics and legal standards, demonstration of ethical practice in practicum and as assessed by faculty supervisor.
- III. Individual and Cultural Diversity: Successful completion of coursework related to culture and diversity, as well as by designing and implementing culturally sensitive interventions based on the unique needs and perspectives of their patient/client for whom they are providing assessment or therapy while demonstrating evidence-based practice under the supervision of a licensed psychologist.
- IV. Professional Values, Attitudes, and Behaviors: Outcomes for this area of competencies will be demonstrated by the successful completion of practicum, supervision, and case conferences.
- V. Communication and Interpersonal Skills: The student will demonstrate effective active listening, empathetic responses, and clear communication in therapeutic interactions with clients, and via supervision and obtaining feedback from supervisors.
- VI. Assessment: Successful completion of coursework related to Assessment, as well as completion of practicum and supervision. Next, they will successfully complete their comprehensive examination on assessment. They will also demonstrate competence in assessment via the one-year APA-accredited clinical internship, which is required for graduation.
- VII. Intervention: Successful completion of coursework related to Intervention, as well as completion of practicum and supervision. Next, they will successfully complete their comprehensive examination on therapy and intervention. They will also demonstrate competence in intervention via the one-year APA-accredited clinical internship, which is required for graduation.

VIII. Supervision: Learning outcomes are based on the completion of a supervised practicum. Additionally, students in their 3rd and 4th years of training will have the opportunity to provide mentored supervision to 1st and 2nd year students (i.e., “supervised supervision”).

IX. Consultation and Interprofessional/Interdisciplinary Skills: Students will actively participate in interdisciplinary case conferences, contributing meaningful insights and recommendations, and receiving positive evaluations from colleagues and supervisors for their contributions.

These profession-wide competencies are expected of all graduates and are partially demonstrated via:

- Coursework: Students will obtain a grade of B or higher.
- Other didactics: attendance and participation in case conferences and other periodic seminars.
- Successful completion of supervised clinical practica (therapy and assessment experiences).
- Completion of dissertation
- Completion of comprehensive examinations
- Completion of a one-year APA accredited clinical internship (APA requirement).

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

To evaluate how well students are achieving the intended learning outcomes, the following assessment processes will be employed:

1. Examinations and Quizzes: Regular assessments will include written examinations and quizzes to evaluate knowledge acquisition and critical thinking skills.
2. Clinical Skills Assessment: Clinical skills will be assessed through direct observation, practical examinations, and skills checklists during clinical rotations.
3. Case Studies and Care Plans: Students will complete case studies and care plans to demonstrate their ability to apply theoretical knowledge to real-world patient care scenarios.
4. Reflective Journals and Portfolios: Students will maintain reflective journals and e-portfolios, providing insights into their personal and professional growth.
5. Peer and Self-Assessment: Peer evaluations and self-assessment will be incorporated for group projects and personal reflection on skills development.

How will you ensure that the assessment findings will be used to improve the program?

1. Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
2. Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
3. Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
4. Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

Assessment Activity Timing:

Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- Clinical skills assessments and evaluations will be conducted during clinical rotations.
- Case studies, care plans, and projects will be assigned periodically.

What direct and indirect measures will be used to assess student learning?

Direct measures include examinations, skills assessments, case studies, and practical evaluations. Indirect measures include student surveys, feedback from instructors, and analysis of retention and graduation rates.

When will assessment activities occur and at what frequency?

Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations, term projects, reflection essays) will occur at the end of relevant courses and following at the end of each year. Alumni and industry surveys will be completed two years following graduation.
- Case studies, teaching plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

Intended learning outcomes for PsyD clinical psychology graduates are detailed in the accreditation requirements for the American Psychological Association (APA). The curriculum will be based on profession-wide competencies as outlined by the APA, which

include the following: I. Research; II. Ethical and Legal Standards; III. Individual and Cultural Diversity; IV. Professional Values, Attitudes, and Behaviors; V. Communication and Interpersonal Skills; VI. Assessment; VII. Intervention; VIII. Supervision; IX. Consultation and Interprofessional/Interdisciplinary Skills.

These profession-wide competencies are expected of all graduates and are partially demonstrated via the following learning outcomes:

- I. Research: Successful completion of coursework related to methods and statistics, as well as completion of the dissertation, participation in faculty-supervised research, and completion of a manuscript to be submitted for possible publication in a peer-reviewed journal.
- II. Ethical and Legal Standards: Successful completion of coursework related to ethics and legal standards, demonstration of ethical practice in practicum and as assessed by faculty supervisor.
- III. Individual and Cultural Diversity: Successful completion of coursework related to culture and diversity, as well as by designing and implementing culturally sensitive interventions based on the unique needs and perspectives of their patient/client for whom they are providing assessment or therapy while demonstrating evidence-based practice under the supervision of a licensed psychologist.
- IV. Professional Values, Attitudes, and Behaviors: Outcomes for this area of competencies will be demonstrated by the successful completion of practicum, supervision, and case conferences.
- V. Communication and Interpersonal Skills: The student will demonstrate effective active listening, empathetic responses, and clear communication in therapeutic interactions with clients, and via supervision and obtaining feedback from supervisors.
- VI. Assessment: Successful completion of coursework related to Assessment, as well as completion of practicum and supervision. Next, they will successfully complete their comprehensive examination on assessment. They will also demonstrate competence in assessment via the one-year APA-accredited clinical internship, which is required for graduation.
- VII. Intervention: Successful completion of coursework related to Intervention, as well as completion of practicum and supervision. Next, they will successfully complete their comprehensive examination on therapy and intervention. They will also demonstrate competence in intervention via the one-year APA-accredited clinical internship, which is required for graduation.
- VIII. Supervision: Learning outcomes are based on the completion of a supervised practicum. Additionally, students in their 3rd and 4th years of training will have the opportunity to provide mentored supervision to 1st and 2nd year students (i.e., "supervised supervision").
- IX. Consultation and Interprofessional/Interdisciplinary Skills: Students will actively participate in interdisciplinary case conferences, contributing meaningful insights and recommendations, and receiving positive evaluations from colleagues and supervisors for their contributions.

Other general learning outcomes expected of students:

- Coursework: Students will obtain a grade of B or higher.
- Other didactics: attendance and participation in case conferences and other periodic seminars.
- Successful completion of supervised clinical practica (therapy and assessment experiences).
- Completion of a dissertation
- Completion of comprehensive examinations
- Completion of a one-year APA-accredited clinical internship (APA requirement).

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Introduction

According to the Idaho Behavioral Health Alliance¹, there is a critical shortage of mental health providers in Idaho and there are not enough providers to meet the needs of Idaho citizens with mental health conditions. Fewer than half of Idahoans with mental health conditions receive appropriate care. Idaho is also the second highest in the nation for suicide and has a high rate of accidental deaths associated with substance abuse.

The Idaho Behavioral Health Alliance also suggests that Idaho has spent significant funding on developing crisis management rather than having continuous adequate health care. In other words, individuals with mental health difficulties are only being treated through crisis management rather than having continuous adequate health care between crises. Having health care only at the point of crisis rather than adequate health care between crises leads to poor health management over time and expense of healthcare costs. According to the Idaho Behavioral Health Alliance, "half of all claims submitted to the state catastrophic fund in 2018 involved a mental health diagnosis." This organization also suggests that one of the strategies to improve mental health healthcare in Idaho is to "implement policy to bolster behavioral health workforce and encourage retention, especially in rural areas..."

Current State of Behavioral Healthcare in Idaho

Mental health providers support people from early childhood through cognitive decline and other conditions associated with aging. Idaho currently lacks mental health resources to support the existing and growing needs of the state. The entire state of Idaho (100% of counties) is a mental health shortage area (HSPA) according to the Idaho Department of Health & Welfare². Additionally, Idaho has the lowest number of psychiatrists per capita, lowest number of child and adolescent psychiatrists, lowest number of geriatric psychiatrists and no addiction psychiatrists. Considering overall mental health care needs more broadly including providers such as clinical psychologists, Mental Health America³ (MHA 2023 report) ranks Idaho 44th out of 51 (including D.C.) in adult care, 47th in youth care, while ranking 48th in the prevalence of mental illness. Across all the metrics assessed by MHA, Idaho ranks 47th, indicating an imbalance between the prevalence of mental illness in the state and access to care. The same 2023 MHA report

revealed that 51% of adults in the state receive no treatment for mental illness and 32% have unmet mental health needs (Idaho ranked 41st in the nation). 47% of Idaho's youth with a major depressive episode do not receive mental health services. Lastly, Idaho ranks 34th in mental health workforce availability. These dire statistics are further enumerated by the Kaiser Family Foundation (KFF) data on mental health needs in Idaho6.

This general lack of behavioral health workforce has an economic impact on residents and improving access and mental health care in Idaho will have a positive impact on the economy as job numbers increase in mental health and as health care costs decline with better health care coverage for mental health needs.

Current Supply and Demand for Psychologists in Idaho

Idaho currently has a foundation that can be built upon to address these deficiencies by developing a PsyD program at the University of Idaho. The University of Idaho currently has a strong undergraduate psychology program with over 500 students, the school's largest major. Additionally, there are currently only two clinical psychology doctorate programs in Idaho, one longstanding program housed at Idaho State University and a second relatively new program at Northwest Nazarene University (NNU). Given that NNU's program is new and housed in a private institution, data from NNU are not enumerated here. ISU's program is accredited by the American Psychological Association (APA). However, this university turns away 90-95% of their applicants. From 2017 – 2022, there were a total of 585 applicants to ISU's program, but only 34 enrolled in the program, which is 5.8% enrollment from the applicant pool. In other words, in the past 6 application cycles at ISU, 551 individual applications were turned away. While some of these applicants may not be an adequate fit for a clinical psychology role, many of them likely are. If they continue their pursuit of obtaining a doctoral degree, they will ultimately have to leave the state to do so.

Similarly, there are very few APA-accredited clinical psychology doctoral programs regionally.

 Wyoming: 1
 Alaska: 1
 New Mexico: 1
 Utah: 2
 Arizona: 3
 Washington: 4
 Oregon: 4
 Colorado: 5

Additionally, the Idaho Business for Education (IBE) reported that in August 2022, there were over 9,000 healthcare job vacancies in Idaho, with mental health being an important sector5 (e.g., on average, we have one school counselor for every 400 students).

Plan

The University of Idaho will develop a new Doctor of Psychology (PsyD) in Clinical Psychology to help fill the mental and behavioral health needs in Idaho. While the clinical degree will be housed in WWAMI, it will be in partnership with the UI Counseling and Mental Health Center (CMHC; formerly the Counseling and Testing) and the Psychology and Communication Department.

This partnership is currently supported by the following:

1. Dr. Jeff Seegmiller, Regional Dean and Director, WWAMI
2. Dr. Thomas J. Farrer, Associate Program Director, WWAMI
3. Dr. Benjamin Barton, Professor and Department Chair, Psychology and Communication Department.
4. Dr. Sean Quinlan, Dean, College of Letters, Arts and Social Sciences (CLASS)
5. Dr. Traci Craig, Professor and Associate Dean for Research and Faculty Affairs for CLASS
6. Dr. Greg Lambeth, Executive Director, UI Counseling & Mental Health Center (CMHC)
7. Dr. Martha Kitzrow, Training Director of APA-accredited internship, UI Counseling & Mental Health Center (CMHC)

Program Description #548

The Doctor of Psychology (PsyD) program in Clinical Psychology offers comprehensive instruction in assessment and diagnosis, evidence-based intervention and therapy techniques, professionalism, and ethics, with a practitioner-scholar framework. With a lifespan and generalist series of courses and mentored clinical experiences, students will be well-prepared to obtain licensure and independently practice clinical psychology.

Attach Program Change

SBOE_Academic_Degree_and_Certificate_Full-Proposal_Form_PA.pdf

CIP Code

51.0912 - Physician Assistant.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

Yes

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

Yes

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Discribe the financial impact

The WWAMI Medical Education Program has recently submitted a request for Fiscal Year 2025 to the State of Idaho for educational support to create a new School of Health and Medical Professions (SHAMP). Under this will be the Direct Entry Master of Physician Assistant Studies degree. Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing

healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future. The primary beneficiaries, if this program request is granted, are the individuals and communities who will be served by these future healthcare providers.

Curriculum:

See Attached SBOE Document

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

The Physician Assistant program's learning outcomes and expectations are based on the Competencies for the Physician Assistant Profession as developed jointly by the National Commission on Accreditation of Physician Assistants (NCCPA), the American Academy of Physician Assistants (AAPA), the Accreditation Review Commission for Education of the Physician Assistant (ARC-PA), and the Physician Assistant Education Association (PAEA).

Our graduates will demonstrate entry-level proficiency as PAs in the following program-defined learning outcomes:

Medical Knowledge for Practice

Demonstrate knowledge about established and evolving biomedical and clinical sciences and the application of this knowledge to patient care. PAs should be able to:

Demonstrate investigative and critical thinking in clinical situations.

Access and interpret current and credible sources of medical information.

Apply principles of epidemiology to identify health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for individuals and populations.

Differentiate among acute, chronic, and emergent disease states.

Apply principles of clinical sciences to diagnose disease and utilize therapeutic decision-making, clinical problem-solving, and other evidence-based practice skills.

Adhere to standards of care, and to relevant laws, policies, and regulations that govern the delivery of care in the United States.

Consider cost-effectiveness when allocating resources for individual patients or population-based care.

Work effectively and efficiently in various healthcare delivery settings and systems relevant to the PA's clinical specialty.

Identify and address social determinants that affect access to care and deliver high-quality care in a value-based system.

Participate in surveillance of community resources to determine if they are adequate to sustain and improve health.

Utilize technological advancements that decrease costs, improve quality, and increase access to sustain and improve healthcare.

Interpersonal and Communication Skills

Demonstrate interpersonal and communication skills (verbal, nonverbal, written, and electronic) that result in the effective exchange of information and collaboration with patients, their families, and health professionals. PAs should be able to:

Establish meaningful therapeutic relationships with patients and families to ensure that patients' values and preferences are addressed and that needs and goals are met to deliver patient-centered care.

Provide effective, equitable, understandable, respectful, quality, and culturally competent care that is responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

Accurately and adequately document information regarding care for medical, legal, quality, and financial purposes.

Demonstrate sensitivity, honesty, and compassion in all conversations.

Demonstrate emotional resilience, stability, adaptability, flexibility, and tolerance of ambiguity.

Recognize communication barriers and provide solutions.

Patient-centered Care

Provide person-centered care that includes patient- and setting-specific assessment, evaluation, and management and healthcare that is evidence-based, supports patient safety, and advances in health equity. PAs should be able to:

Accumulate accurate and essential information about patients through history-taking, physical examination, and diagnostic testing.

Develop, implement, and monitor effectiveness of patient management plans.

Maintain proficiency to perform safely all medical, diagnostic, and surgical procedures considered essential for primary care.

Counsel, education, and empower patients and their families to participate in their care and enable shared decision-making.

Refer patients appropriately, ensure continuity of care throughout transitions between providers or settings and follow-up on patient progress and outcomes.

Provide health care service to patients, families, and communities to prevent health problems and to maintain health.

Professionalism

Adhere to the standards of care in the role of the PA in the health care team.

Demonstrate responsiveness to patient needs that supersedes self-interest.

Demonstrate a high level of responsibility, ethical practice, and adherence to legal and regulatory requirements.

Demonstrate sensitivity to a diverse patient population by identifying the socio-cultural, familial, psychological, economic, environmental, and spiritual factors impacting health care and health care delivery; and responding to these factors by planning and advocating the appropriate course of action at both the individual and the community level.

Practice-based Learning and Improvement

Demonstrate the ability to learn and implement quality improvement practices by engaging in critical analysis of one's own practice experience, the medical literature, and other information resources of the purpose of self-evaluation, lifelong learning, and practice management. PAs should be able to:

Use practice performance data and metrics to identify areas for improvement.

Critically evaluate the medical literature in order to use current practice guidelines and apply the principles of evidence-based medicine to patient care.

Society and Population Health

Recognize and understand the influences of the ecosystem of person, family, population, environment, and policy on health of patients and integrate knowledge of these determinants of health into patient care decisions. PAs should be able to:

Apply principles of social-behavioral sciences by assessing the impact of psychosocial and cultural influences on health, disease, care seeking, and compliance.

Improve the health of patient populations through recognition of the influences of genetic, socioeconomic, environmental, and other determinants on the health of the individual and the community.

Demonstrate accountability, responsibility, and leadership for removing barriers to health.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Student success in achieving the intended learning outcomes of the program will be monitored throughout the program's didactic and clinical phases. The program's faculty and clinical preceptors will evaluate students through a variety of assessment tools, including but not limited to multiple-choice examinations, collaborative group projects, objective structured clinical examinations (OSCEs), and clinical performance evaluations.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be used in compliance with external program accreditation requirements to ensure program-self-study and improvement is occurring regularly. Student board exam performance and external accreditation requirements will be assessed annually to examine program performance

What direct and indirect measures will be used to assess student learning?

Examinations and Quizzes

Clinical Skills Assessment

Case Studies and Care Plans

Reflective Journals and Portfolios.

Preceptor, Peer, and Self-Assessment

Board Examinations

When will assessment activities occur and at what frequency?

Assessment findings will be used for continuous program improvement through the following mechanisms:

Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.

Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.

Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.

Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

Assessment Activity Timing (assessment activities will occur throughout the program at various frequencies):

Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.

Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.

Clinical skills assessments and evaluations will be conducted during clinical rotations.

Case studies, care plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

Our graduates will demonstrate entry-level proficiency as PAs in the following program-defined outcomes:

Medical Knowledge for Practice

- Demonstrate knowledge about established and evolving biomedical and clinical sciences and the application of this knowledge to patient care. PAs should be able to:
- Demonstrate investigative and critical thinking in clinical situations.
- Access and interpret current and credible sources of medical information.
- Apply principles of epidemiology to identify health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for individuals and populations.
- Differentiate among acute, chronic, and emergent disease states.
- Apply principles of clinical sciences to diagnose disease and utilize therapeutic decision-making, clinical problem-solving, and other evidence-based practice skills.
- Adhere to standards of care, and to relevant laws, policies, and regulations that govern the delivery of care in the United States.
- Consider cost-effectiveness when allocating resources for individual patients or population-based care.
- Work effectively and efficiently in various health care delivery settings and systems relevant to the PA's clinical specialty.
- Identify and address social determinants that affect access to care and deliver high quality care in a value-based system.
- Participate in surveillance of community resources to determine if they are adequate to sustain and improve health.
- Utilize technological advancements that decrease costs, improve quality, and increase access to sustain and improve healthcare.

Interpersonal and Communication Skills

- Demonstrate interpersonal and communication skills (verbal, nonverbal, written, and electronic) that result in the effective exchange of information and collaboration with patients, their families, and health professionals. PAs should be able to:
- Establish meaningful therapeutic relationships with patients and families to ensure that patients' values and preferences are addressed and that needs and goals are met to deliver patient-centered care.
- Provide effective, equitable, understandable, respectful, quality, and culturally competent care that is responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.
- Accurately and adequately document information regarding care for medical, legal, quality, and financial purposes.
- Demonstrate sensitivity, honesty, and compassion in all conversations.
- Demonstrate emotional resilience, stability, adaptability, flexibility, and tolerance of ambiguity.
- Recognize communication barriers and provide solutions.

Patient-centered Care

- Provide person-centered care that includes patient- and setting-specific assessment, evaluation, and management and healthcare that is evidence-based, supports patient safety, and advances in health equity. PAs should be able to:
- Accumulate accurate and essential information about patients through history-taking, physical examination, and diagnostic testing.
- Develop, implement, and monitor effectiveness of patient management plans.
- Maintain proficiency to perform safely all medical, diagnostic, and surgical procedures considered essential for primary care.
- Counsel, education, and empower patients and their families to participate in their care and enable shared decision-making.
- Refer patients appropriately, ensure continuity of care throughout transitions between providers or settings and follow-up on patient progress and outcomes.
- Provide health care service to patients, families, and communities to prevent health problems and to maintain health.

Professionalism

- Adhere to the standards of care in the role of the PA in the health care team.
- Demonstrate responsiveness to patient needs that supersedes self-interest.
- Demonstrate a high level of responsibility, ethical practice, and adherence to legal and regulatory requirements.
- Demonstrate sensitivity to a diverse patient population by identifying the socio-cultural, familial, psychological, economic, environmental, and spiritual factors impacting health care and health care delivery; and responding to these factors by planning and advocating the appropriate course of action at both the individual and the community level.

Practice-based Learning and Improvement

- Demonstrate the ability to learn and implement quality improvement practices by engaging in critical analysis of one's own practice experience, the medical literature, and other information resources of the purpose of self-evaluation, lifelong learning, and practice management. PAs should be able to:
- Use practice performance data and metrics to identify areas for improvement.
- Critically evaluate the medical literature in order to use current practice guidelines and apply the principles of evidence-based medicine to patient care.

Society and Population Health

- Recognize and understand the influences of the ecosystem of person, family, population, environment, and policy on health of patients and integrate knowledge of these determinants of health into patient care decisions. PAs should be able to:
- Apply principles of social-behavioral sciences by assessing the impact of psychosocial and cultural influences on health, disease, care seeking, and compliance.
- Improve the health of patient populations through recognition of the influences of genetic, socioeconomic, environmental, and other determinants on the health of the individual and the community.
- Demonstrate accountability, responsibility, and leadership for removing barriers to health.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Rationale:

Idaho has been one of the fastest growing states for 5 consecutive years: our population increased by 11.1% since 2016 and is expected to grow 10.5% between 2021 and 2026. The population increase in Idaho substantially outpaced the national growth rate of 1.8% by 13.5%. Additionally, Idaho's percentage of the population over the age of 65 has grown from 15% (2015) to 16% (2021). The rapid population growth and increased percentage of an aging population further burden a struggling healthcare system, exacerbating the industry need for expansion of healthcare services in Idaho.

Idaho is facing a severe healthcare workforce crisis; for example, in June of 2022, Idaho had 9,000 health care jobs that could not be filled. While a shortage of healthcare professionals is not unique to Idaho, the worsening shortages nationwide, and Idaho population increases has resulted in a need for more healthcare professionals and a decrease in the per capita healthcare provider ratio. This change in our population and a decrease in the healthcare provider ratio justifies seeking new solutions to increase the number of health care professionals who will care for the people of Idaho.

Currently, Idaho ranks at the bottom of all the states for number of practicing physicians per capita. The Idaho Department of Health and Welfare data indicates 98% of the state has a shortage of primary care physicians and 100% of the state has a shortage of mental health professionals. Further, 41% of Idaho physicians are age 55 or older, with higher populations of older physicians in Idaho's rural communities. Physician assistants can fill these gaps in the Idaho healthcare system, especially in rural communities; thus, our state has an immediate need and rising demand for physician assistants. The increasing shortage of health care professionals is an Idaho issue that needs to be addressed by higher education institutions within the state.

Certified Physician Assistants/Associates (PA-Cs) are essential members of the healthcare workforce and play a crucial role in expanding access to quality healthcare for Idaho's most rural communities. PAs are qualified to work in just about every area of clinical medicine, from family medicine to surgical specialties. The three top specialties for PAs are family medicine (30.6%), emergency medicine (14.8%), and urgent care (10.1%). This versatility allows for PAs to be employed wherever a physician might be employed; by educating more PAs in Idaho, we can serve Idaho citizens with healthcare who may not receive it otherwise due to the physician shortage.

The PA program at UI will serve baccalaureate prepared students from a variety of backgrounds who may enroll directly after completion of their undergraduate degree or as is often the case, after working in another health care field for a variable length of time. Our goal is to find qualified Idaho residents for at least two-thirds of the available seats in the program. We intend to attract individuals who want to serve their communities as providers of quality health care with an emphasis on evidence-based medicine. To that end, we will make a concerted effort to attract and accept a diverse student body to create a student-centered educational environment that engages individuals to become compassionate, competent physician assistants who possess the clinical skills to contribute positively to the dynamic health care needs of rural and underserved Idaho communities.

The Idaho Department of Labor predicts a 23% growth rate for PA positions in Idaho through 2030. Currently, Idaho State University runs the only PA program in the state, with cohorts enrolled in three locations: Pocatello, Meridian, and Caldwell. It is a distance learning model that leverages the talents of faculty at all locations to serve students. Seventy-two students are admitted each year (out of ~650 to 900 applications), and the applicant pool of students not accepted has a large portion of Idaho residents (e.g., the ISU applicant 'alternate list' has been made up 40% or more Idaho residents in 3 of the past 4 years). A comparable PA program at

the University of Utah has similar PA production (i.e., 60-68 students per cohort out of ~2500 applicants; self-reports a 3% admission rate for the PA program). In short, more than 90% of applicants are not accepted to either of these programs and the regional admissions data supports a great student desire to pursue a career as a PA that is not being met. Further, there is a great demand for PA graduates in the healthcare system. The student and healthcare system demand are greater than ISU can meet, and establishing a program at UI allows for students to be trained and prepared to meet the needs of northern Idaho and our rural communities (e.g., not training students in the Treasure Valley who are likely to remain in the Treasure Valley for clinical practice). The U of I's expansion into PA education, especially since our program will focus on recruitment from – and training in – Northern Idaho is needed for our students and our state.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any:

University of Idaho PA Curriculum Draft: Didactic Year

First Semester (18 credits):

1. Anatomy (4 credits):
 - a. This course provides students with exposure to human anatomy. Students will learn the structure of the human body through active participation in the classroom, interactive software programs, and in the planning, dissection, and presentation of findings in the laboratory setting. Students will apply this foundational, anatomical knowledge to diseases and disorders in humans.
2. Physiology (2 credits separate or part of anatomy)
 - a. The basic concepts and principles that are essential to comprehending the fundamental mechanisms of human physiology at the cellular, tissue and organ levels and the requirements for the maintenance of homeostatic control. This course lays the foundation for understanding the underlying principles of the etiology, management, and prevention of human disease processes.
3. Foundations of Medical Science (4 credits)
 - a. This course provides students with exposure to the basic sciences related to the practice of medicine. Students will learn select topics in physiology, microbiology, pharmacology, laboratory studies, infectious disease and immunology and be introduced to diagnostic imaging (e.g., point of care ultrasound, magnetic resonance imaging). Students will apply this foundational, science knowledge to diseases and disorders in humans.
4. Introduction to Patient Care (5 credits)
 - a. This course provides students with the tools to conduct a comprehensive medical interview and introduces skills to assist in performing a physical examination to support patient evaluation and management. Students will learn effective methods for obtaining and documenting historical information, developing communication skills with patients and health care providers, and providing patient counseling. Further, students will learn critical thinking skills, physical examination techniques, and interpretation and documentation of medical findings. Students will learn through lectures, case discussions, laboratory sessions and patient simulations, and small group discussions.
5. Introduction to Epidemiology & Biostatistics (2 credits)
 - a. This course provides students with exposure to the basic concepts of descriptive and analytic epidemiology. Students will learn to read and interpret medical literature as it relates to disease frequency, probability, study design, sample size, hypothesis testing, test significance, measures of data quality and bias, multivariate models, survival analysis, and causality for the practice of evidence-based medicine. Students will develop these skills through lectures, journal article discussions, assignments, readings, and projects.
6. Humanism & Ethics in Health Care (1 credit)
 - a. This course is designed to provide an exposure to ethical principles and practice in healthcare, while also service as a foundation for PA students to appreciate and apply humanism in health and healthcare in their professional practice. Topics covered in this course include ethical theories, the history and future of humanism in medicine, medicalization and over diagnosis, the science of empathy, and the intersection of marginalization, otherness and cultural competency. Students will engage with multiple learning modalities such as articles, videos, interactive group activities, and short written reflections and quizzes.

Second Semester (18 credits):

1. Patient Assessment and Diagnosis I (5 credits)
 - a. The first class in a series that provides preparation on history-taking, physical examination techniques, counseling, documentation and presenting clinical information, the practical application of these clinical skills, along with the essentials of ordering, interpreting, and performing diagnostic studies used in the screening, diagnosis, management, and monitoring of common diseases. Emphasis is placed on acquiring the skills, knowledge and sensitivity needed to communicate and intervene effectively in a wide variety of patient encounters. Teaching methods include lectures, small group demonstrations and hands-on laboratory and practice sessions as well as clinical assignments to examine and/or interview standardized patients and patients in hospital, and outpatient settings. Students also access standardized patients in a controlled setting. Audiovisuals and asynchronous learning are also used. The topics of this course will be sequenced with the other content areas (e.g., clinical medicine, pharmacology) in the curriculum.
2. Clinical Medicine I (5 credits)
 - a. The first course of a sequence of courses to explore the essentials of diagnosis and management of the most common clinical problems seen by primary care practitioners using an organ systems and life stages approach. Clinical information is presented in lectures, small group learning experiences, modules, and practicums. Content covered in this course is correlated with preceding courses on physiology, anatomy, and basic medical science to build upon and develop a learner's foundational understanding of pathophysiology and related mechanisms of health and disease. This course supports the development of clinical reasoning and problem-solving skills applied to inform preventative, emergent, chronic, and rehabilitative care. Patient cases are used in modules, practicums, and small group settings to enhance readings and lectures. These core courses serve as the foundation of clinical medicine and most other courses are organized and built around the curricular content provided.
3. Pharmacology I (2 credits)
 - a. The essentials of basic pharmacological principles and disease process therapeutics. Topics for this course are sequenced with Clinical Medicine I, II and III (PHYASST 220, 221, 222) and are provided in lecture format.
4. Foundations in Community and Social Medicine (2 credits)
 - a. This course provides students with an understanding of the social, economic, and environmental factors that impact the health of populations and communities. Students will learn about social determinants of health, implicit bias and how to engage patients as upstanders for patient and community health.
5. Evidence-based Medicine I (1 credit)
 - a. A lecture and seminar course that provides a practical approach to making sound medical decisions based on current evidence in medical literature. Through a series of didactic presentations, group exercises, and reading, students will learn the basic principles of evidence-based medicine. Basic skills in using MEDLINE and other medical databases will be emphasized and practiced. Research principles, research ethics, and basic statistical review are introduced.
6. Practice and the Health System I (1 credit)
 - a. Provide an overview of the U.S. health care system with a focus on the PA profession. An interprofessional faculty will provide lectures and lead conversations on various aspects of PA practice and the health care system, including topics such as: the history of the PA profession, population health, health disparities, and health policy. The first part of the course sequence (PHS 1) will focus on sociocultural influences on health, wellness, and health care.
7. Complementary Medicine and Nutrition (2 credits)
 - a. This course provides an overview of the importance of and role of the human lifestyle in healthcare, and the principles for maintaining good health through nutrition, sleep, exercise, stress, risky behavior reduction, and social connection. It will address the health hazards associated with dietary deficiencies including obesity, fad dieting, food contamination, and diet management of selected diseases. It will address the use of therapeutic lifestyle interventions as a primary modality to both prevent and treat chronic diseases including, but not limited to, cardiovascular disease, type 2 diabetes, and obesity.

Third Semester (18 credits):

1. Patient Assessment and Diagnosis II (5 credits)
 - a. The second class in a series that provides preparation on history-taking, physical examination techniques, counseling, documentation and presenting clinical information, the practical application of these clinical skills, along with the essentials of ordering, interpreting, and performing diagnostic studies used in the screening, diagnosis, management, and monitoring of common diseases. Emphasis is placed on acquiring the skills, knowledge and sensitivity needed to communicate and intervene effectively in a wide variety of patient encounters. Teaching methods include lectures, small group demonstrations and hands-on laboratory and practice sessions as well as clinical assignments to examine and/or interview standardized patients and patients in hospital, and outpatient settings. Students also access standardized patients in a controlled setting. Audiovisuals and asynchronous learning are also used. The topics of this course will be sequenced with the other content areas (e.g., clinical medicine, pharmacology) in the curriculum.
2. Clinical Medicine II (5 credits)
 - a. The second course of a sequence of courses to explore the essentials of diagnosis and management of the most common clinical problems seen by primary care practitioners using an organ systems and life stages approach. Clinical information is presented in lectures, small group learning experiences, modules, and practicums. Content covered in this course is correlated with preceding courses on physiology, anatomy, and basic medical science to build upon and develop a learner's foundational understanding of pathophysiology and related mechanisms of health and disease. This course supports the development of clinical reasoning and problem-solving skills applied to inform preventative, emergent, chronic, and rehabilitative care. Patient cases are used in modules, practicums, and small group settings to enhance readings and lectures. These core courses serve as the foundation of clinical medicine and most other courses are organized and built around the curricular content provided.
3. Pharmacology II (2 credits)
 - a. The essentials of basic pharmacological principles and disease process therapeutics. Topics for this course are sequenced with Clinical Medicine I, II and III (PHYASST 220, 221, 222) and are provided in lecture format.
4. Evidence-based Medicine II (1 credit)
 - a. A lecture and seminar course that provides a practical approach to making sound medical decisions on the basis of current evidence in the medical literature. Through a series of didactic presentations, group exercises, and reading, students will learn the basic principles of evidence-based medicine. Basic skills in using MEDLINE and other medical databases will be emphasized and practiced. Research principles, research ethics, and basic statistical review are introduced.
5. Practice and the Health System II (1 credit)
 - a. Provide an overview of the U.S. health care system with a focus on the PA profession. An interprofessional faculty will provide lectures and lead conversations on various aspects of PA practice and the health care system, including topics such as: the history of the PA profession, population health, health disparities, and health policy. The second portion of the course sequence (PHS II) will continue discussion of the PA professional role, including interactions in the health care system and health policy, and practical application of content in professional settings.
6. Fundamentals of Surgery II (3 credits)
 - a. The course focuses on the basic surgical concepts needed for the PA to function in primary care settings as well as major surgical areas. The course emphasizes surgical concepts, topics and surgical technique. A substantial part of this course consists of essential hands-on laboratory exercises emphasizing surgical skills required in a primary care setting.
7. Electrocardiography (ECG) and Life Support Procedures and Skills (1 credit)
 - a. This course provides the basics for learning to interpret normal ECG tracings and applying those principles to interpret the ECG tracings of common cardiac disease. This course will also introduce the principles of advanced life support utilized in medical and surgical emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the clinician in developing the skills required to stabilize patients with life threatening conditions. Includes certification in Basic (BLS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS), and Advanced Trauma Life Support (ATLS).

Fourth Semester (18 credits):

1. Patient Assessment and Diagnosis III (5 credits)
 - a. The third class in a series that provides preparation on history-taking, physical examination techniques, counseling, documentation and presenting clinical information, the practical application of these clinical skills, along with the essentials of ordering, interpreting, and performing diagnostic studies used in the screening, diagnosis, management, and monitoring of common diseases. Emphasis is placed on acquiring the skills, knowledge and sensitivity needed to communicate and intervene effectively in a wide variety of patient encounters. Teaching methods include lectures, small group demonstrations and hands-on laboratory and practice sessions as well as clinical assignments to examine and/or interview standardized patients and patients in hospital, and outpatient settings. Students also access standardized patients in a controlled setting. Audiovisuals and asynchronous learning are also used. The topics of this course will be sequenced with the other content areas (e.g., clinical medicine, pharmacology) in the curriculum.
2. Clinical Medicine III (5 credits)
 - a. The third course of a sequence of courses to explore the essentials of diagnosis and management of the most common clinical problems seen by primary care practitioners using an organ systems and life stages approach. Clinical information is presented in lectures, small group learning experiences, modules, and practicums. Content covered in this course is correlated with preceding courses on physiology, anatomy, and basic medical science to build upon and develop a learner's foundational understanding of pathophysiology and related mechanisms of health and disease. This course supports the development of clinical reasoning and problem-solving skills applied to inform preventative, emergent, chronic, and rehabilitative care. Patient cases are used in modules, practicums, and small group settings to enhance readings and lectures. These core courses serve as the foundation of clinical medicine and most other courses are organized and built around the curricular content provided.
3. Pharmacology III (2 credits)
 - a. The essentials of basic pharmacological principles and disease process therapeutics. Topics for this course are sequenced with Clinical Medicine I, II and III (PHYASST 220, 221, 222) and are provided in lecture format.
4. Evidence-based Medicine III (3 credits):
 - a. During this course PA students complete an evidence-based review paper on a clinical question of interest. Students will present their findings to faculty and student colleagues.
5. Practice and the Health System III (1 credit):
 - a. The Practice & the Health System courses (PHS I, II, and III) provide an overview of the U.S. health care system with a focus on the PA profession. PHS III is the culmination of the course sequence. An interprofessional faculty approach provides lectures and leads discussions on various aspects of PA practice and the health care system, including topics such as: transition to professional practice, social and cultural determinants of health, medical billing and coding, advanced clinical medicine, licensure and certification, medication-assisted therapy training (MAT), professional ethics, team skills and communication, leadership development, and prescription writing/medication errors. The program's final summative evaluation is part of this course, which also serves as preparation for the PA National Certifying Examination (PANCE).
6. The Pathway to Patient Care (2 credits)
 - a. This two-week course provides physician assistant students with preparation to begin the clinical year rotations. Topics covered include preceptor expectations, self-care, electronic medical records access, professionalism and formative and summative assessment of readiness to enter the clinical training environment.

University of Idaho PA Curriculum Draft: Clinical Year (36 credits)

1. General Surgery (4 credits)
 - a. This required 4-week clinical clerkship provides the student with exposure to the principles and practices of general surgery. Emphasis is placed on the management of patients who present with surgical issues. The students will participate in the pre-operative evaluation of patients, including history taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. They will assist in the operating room, learn to write pre and post-operative notes, care for the post-operative patient, and report to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. They will develop an understanding of how to function as part of the surgical team, develop effective communication with the patient, the healthcare team, and the patient's family.
2. Emergency Medicine (4 credits)
 - a. This required 4-week clinical clerkship provides the student with exposure to the principles and practice of emergency medicine. Emphasis is placed on caring for patients presenting to the emergency department. Students will participate in the assessment of patient acuity, disease state, and appropriate management within the setting of the emergency department. They will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and bedside procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.
3. Obstetrics and Gynecology (4 credits)
 - a. This required 4-week clinical clerkship provides students with exposure to the principles and practice of obstetrics and gynecology, including health maintenance and screening. Emphasis is placed on caring for female patients across their life span, including menarche, family planning, childbearing years, perimenopause, menopause, and post-menopause. Students will learn how to recognize and treat sexually transmitted diseases, ovarian, breast, and uterine cancer, and evaluate and treat common ambulatory gynecologic problems. Students will learn prenatal counseling and care and may have exposure to labor and delivery. They will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. They will develop an understanding of how to function as part of the medical team, improve effective communication with the patient, the healthcare team, and the patient's family.
4. Pediatrics (4 credits)
 - a. This required 4-week clinical clerkship provides the student with exposure to the principles and practice of pediatric medicine in the ambulatory setting. Students will gain experience caring for neonates, infants, children, and adolescents, providing parental education and guidance, recognizing the appropriate milestone, preventing illness, injury, and accidents, and providing care unique to the pediatric patient. Students will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. They will develop an understanding of how to function as part of the medical team, improve effective communication with the patient, the healthcare team, and the patient's family.
5. Internal Medicine (4 credits)
 - a. This required 4-week clinical clerkship provides students with exposure to the principles and practice of internal medicine. Emphasis is placed on caring for the acutely and chronically ill adult patient who requires hospitalization. Students will participate in admission history taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in

inpatient rounds; provide patient presentations to clinical team members, and perform bedside procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.

6. Family Medicine (4 credits)

- a. This required 4-week clinical clerkship provides the student with exposure to the principles and practice of family medicine. Emphasis is placed on disease prevention and health maintenance in adults and children. The students will develop an increased understanding of the social, economic, and environmental factors related to caring for the patient and extended family. They will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.

7. Primary Care Directive (4 credits)

- a. This required 4-week clinical clerkship provides students with further exposure to the principles and practice of Primary Care. Emphasis is placed on caring for patients with general medical problems in the outpatient or the inpatient setting. Students will participate in taking medical histories, physical examination, assessment and formulation of a plan and problem list, ordering, and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in rounds; provide patient presentations to clinical team members and perform procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.

8. Clinical Elective I (4 credits)

- a. These elective 4-week clinical clerkships provide the student with the opportunity to gain additional experience in one of the core clerkship areas or to supplement the foundational core clerkships with specialty disciplines in medicine and surgery. Emphasis is placed on the management of patients within the specialty discipline. Students will utilize these electives to better understand how a primary care provider should manage a patient presenting with a disease/condition prior to specialty referral and upon follow up. They will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.

9. Clinical Elective II (4 credits)

- a. These elective 4-week clinical clerkships provide the student with the opportunity to gain additional experience in one of the core clerkship areas or to supplement the foundational core clerkships with specialty disciplines in medicine and surgery. Emphasis is placed on the management of patients within the specialty discipline. Students will utilize these electives to better understand how a primary care provider should manage a patient presenting with a disease/condition prior to specialty referral and upon follow up. They will participate in history-taking, physical examination, assessment and formulation of a plan and problem list, ordering and interpreting diagnostic tests, proper medical documentation, and reporting to the healthcare team as appropriate for the clerkship. During this clerkship, students may additionally participate in inpatient rounds, provide patient presentations to clinical team members, and perform bedside procedures. Students will develop an understanding of how to function as part of the medical team, develop effective communication with the patient, the healthcare team, and the patient's family.

Program Description:

The Master of Physician Assistant Studies is an entry-level program designed to empower aspiring healthcare professionals to become physician assistants (PAs). PAs are adept and compassionate healthcare providers who collaborate closely with physicians to deliver comprehensive patient care services. Within this program, students will acquire the essential skills to take complete medical histories, perform thorough physical examinations, interpret diagnostic studies, including laboratory tests and x-rays, and make informed diagnoses and treatment decisions. By doing so, our graduates contribute significantly to enhancing healthcare accessibility for underserved communities, both in urban and rural settings.

Program Resource Requirements.

- Indicate all resources needed including the planned FTE enrollment, projected revenues, and estimated expenditures for the firstfour fiscal years of the
- Include reallocation of existing personnel and resources and anticipated or requested new resources.
- Second and third year estimates should be in constant dollars.
- Amounts should reconcile subsequent pages where budget explanations are provided.
- If the program is contract related, explain the fiscal sources and the year-to-year commitment from the contracting agency(ies) or party(ies).
- Provide an explanation of the fiscal impact of any proposed discontinuance to include impacts to faculty (i.e., salary savings, re-assignments).

I. PLANNED STUDENT ENROLLMENT

| | <u>FY 25</u> | | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | |
|-------------------------|--------------|-----------|--------------|-----------|--------------|-----------|--------------|-----------|
| | FTE | Headcount | FTE | Headcount | FTE | Headcount | FTE | Headcount |
| A. New enrollments | | 20 | | 25 | | 30 | | 35 |
| B. Shifting enrollments | | | | | | | | |
| Total Enrollment | 0 | 20 | 0 | 45 | 0 | 55 | 0 | 65 |

II. REVENUE

| | <u>FY 25</u> | | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | |
|--|----------------|--------------|----------------|----------|----------------|----------|----------------|----------|
| | On-going | One-time | On-going | One-time | On-going | One-time | On-going | One-time |
| 1. New Appropriated Funding Reques | \$507,600.00 | \$500,000.00 | \$507,600.00 | | \$507,600.00 | | \$507,600.00 | |
| 2. Institution Funds | | | | | | | | |

Reviewer Comments

Linda Lundgren (lindalundgren) (Thu, 19 Oct 2023 23:49:06 GMT): Per Jeff Seegmiller, updated Instructional_Admin form to shows Fall 2025 as implementation date.

Linda Lundgren (lindalundgren) (Wed, 08 Nov 2023 23:13:43 GMT): Rollback: Per email from Whitney Vincent on 11/8/23, at Marlane Martonick's request, Linda Lundgren asking rolled #99, College of Health and Medical Professions proposal. The college is no longer asking for a new college at this time but rather a new School of Health and Medical Professions so rolled back for verbiage to be revised on all proposals. Let me know if you have any questions, Thank you! Whitney WHITNEY VINCENT Academic Coordinator Idaho WWAMI Medical Education Program 208-885-1686 (O) 208-885-7910 (F) 121 W. Sweet Ave, Office 147 Moscow, ID 83844

|--------------------------------------|---|
| Date of Proposal Submission: | 09/26/2023 |
| Institution Submitting Proposal: | University of Idaho |
| Name of School, School, or Division: | The School of Health and Medical Professions |
| Name of Department(s) or Area(s): | Department of Medicine, Department of Clinical Medicine, Department of Nursing |
| Title of Proposed Unit | School of Health and Medical Professions |
| Proposed Implementation Date: | FY26 (Fall of 2025) |

Indicate whether this request is either of the following:

New Administrative Unit

New Instructional Unit

Jeffrey G. Seemiller, Ed.D.  10/9/23

 Dean Date

Christopher Nomura, VP for Research

 Vice President for Research (as applicable) Date

Jerry McMurtry, Dean, College of Grad Studies

 Graduate Dean (as applicable) Date

Patty Sanchez, OSBE Program Manager

 OSBE Program Manager/IDCTE Director, Program Services Date

Brian Foisy, VP for Finance and Administration

 FVP/Chief Fiscal Officer Date

Jenn Thompson, Chief Policy/Govt. Affairs Officer

 State Administrator, IDCTE Date

Torrey Lawrence, Provost/Exec. Vice President

 Provost/VP for Instruction Date

Patrick Coulson, Chief Financial Officer

 Chief Financial Officer, OSBE Date

Scott Green, President

 President Date

T.J. Bliss, Chief Academic Officer

 Chief Academic Officer, OSBE Date

Matt Freeman, Executive Director

SBOE/Executive Director or Designee Approval Date

1. What are the goals and objectives for the new unit?

As a unit of the University of Idaho, we intend to establish the School of Health and Medical Professions (SHAMP) which will provide the citizens of the State of Idaho an opportunity to fill a critical workforce shortage in healthcare. Idaho's population has been growing at an exceptional rate for five consecutive years, surpassing the national growth rate by a substantial margin. The mission of SHAMP is to improve the health of the people of Idaho by developing a robust academic health care delivery system that will educate and set forth a skilled workforce of healthcare professionals to attack this critical healthcare shortage.

To fulfill our mission, the following goals and objectives are set forth:

- To create educational opportunities to train the citizens of the State of Idaho in healthcare professions which will in turn expand and strengthen the healthcare services in Idaho.
- Expand health care academic programs to address the critical workforce shortage.
- Addressing Idaho's rural health care needs which often face the brunt of workforce shortages.
- Developing academic programs to help train and retain healthcare professionals, ensuring that even the most remote areas receive adequate medical and mental health services.
- Meeting the needs of the future which shows a continual population growth both in Idaho and nationally. This underscores the importance of establishing healthcare academic programs now to meet future workforce needs and reduce reliance on out-of-state recruitment.
- To build the school upon the highest quality, basic, applied, and clinical research available at the University of Idaho.

2. What is the relationship of the unit to the university's mission and priorities? Is the unit involved in instruction and if so, to what extent?

The mission of the University of Idaho is to shape the future through innovative thinking, community engagement and transformative education. The School of Health and Medical Professions stands firm in this mission by providing educational offerings that will transform the lives of our students through engaged learning and self-reflection. Our teaching and learning will include graduate, professional and continuing education offered through face-to-face instruction, technology-enabled delivery and hands-on experience. Our educational programs will strive for excellence and will be enriched by the knowledge, collaboration, diversity and creativity of our faculty, students and staff. The programs listed below have been identified as areas of workforce development to help meet the needs of the healthcare shortage.

The School of Health and Medical Professions will be the foundation on which our programs will grow. The school will be located within the College of Graduate Studies. Please note that the bulk of these specific programs are currently not being offered in our state institutions, except for the Physician's Assistant Program. Program Proposals for each of these academic programs are included in this School/Program proposal submission.

Doctorate Psychology (PsyD) program

The entire state of Idaho is a mental health shortage area and Idaho has the lowest number of psychiatrists per capita. Considering overall mental health care, Mental Health America ranks Idaho 49th out of 51 (including D.C.) in adult care, 45th in youth care, while ranking 50th (second highest) in the prevalence of mental illness (19% average). The University of Idaho has a foundation of faculty and facilities that can be leveraged to develop a doctorate in this clinical psychology program that will address deficiencies in mental health care. Once implemented,

graduates will be able to focus on mental health needs related to early childhood development, adolescent, and young adult care needs, such as suicide prevention, substance use disorder and mental health counseling, and geriatric care.

Direct-Entry Master of Science in Nursing (MSN)

The University of Idaho has a foundation of faculty and facilities that can be leveraged to develop a Master of Science in Nursing (MSN). The MSN prepares the graduate for a position as a Registered Nurse, as well as a leadership role in varied settings such as hospitals, health department, clinics, among other practice areas.

Doctorate - Anatomical Science Education (DAS)

Expert knowledge of the anatomical sciences is central to diagnosis and treatment of disease and as such in-depth coursework in this area has long been the foundation of health sciences curricula. Despite this, health sciences programs nationwide are facing an increasing shortage of highly trained anatomy educators. The Doctoral of Anatomical Sciences program is designed to train individuals to become fully qualified educators in all of the anatomical disciplines and conduct educational scholarly research for promotion and tenure.

Master of Science, Gerontology

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration, and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers.

Certified Registered Nurse Anesthetist (CRNA) Doctorate

The practice of anesthesia is a recognized specialty in nursing. Considered an essential role to the health care workforce, nurse anesthetists provide anesthesia and related care before and after surgical, therapeutic, diagnostic, and obstetrical procedures. They also provide pain management and emergency services such as airway management.

Physician Assistant (PA) - Masters

Working interdependently with physicians, PAs (Physician Assistant) provide diagnostic and therapeutic patient care in virtually all medical specialties and settings. They take patient histories, perform physical examinations, order laboratory and diagnostic studies, prescribe medications, and develop patient treatment plans. Their job descriptions are as diverse as those of their supervising physicians, and include clinical practice, patient education, team leadership, medical education, health administration, and research.

3. What is the demand for the unit's services? What population will the unit serve?

Idaho's population has been growing at an exceptional rate for five consecutive years, surpassing the national growth rate by a substantial margin.

This population surge has strained the state's healthcare system, underscoring the necessity for expanding healthcare services within Idaho. For example, Idaho ranks at the bottom among all states in terms of practicing physicians per capita. Moreover, a significant percentage of the state's physicians are approaching retirement age, further exacerbating the shortage.

Furthermore, it is quite evident that we simply do not have enough health care workers to take care of us and the situation could get worse if we do not act. The Idaho Business for Education

sponsored a Health Care Summit in June of 2022 to address the workers' healthcare crisis. In the report, they explored why we have a crisis, how it affects our health care professionals and their patients, and it recommends specific ways our leaders can help solve it. One of the chief ways to solve this crisis is ramping up educational opportunities for the citizens in the State of Idaho. Please see following white paper from the Idaho Business for Education: <http://idahobe.org/wp-content/uploads/2022/08/HEALTH-CARE-SUMMIT-WHITE-PAPER-3.0.pdf>

Healthcare jobs in Idaho are projected to be the fastest growing professions this decade, with nearly 10,000 new jobs being projected, according to the Idaho Department of Labor. The population that the new School will serve encompasses a broad demographic from the classroom to the bedside, by training a healthcare workforce who will in turn provide essential healthcare services to the people of Idaho.

Based on this important need, we propose to create the School of Health and Medical Professions at the University of Idaho which will provide the citizens of the State of Idaho an opportunity to fill this critical workforce shortage. The school will include three new departments and six new programs, along with existing programs such as the WWAMI Medical Education program and the Athletic Training program. The areas of justification include the following:

- **Critical Workforce Shortage:** Idaho's healthcare workforce shortage poses a significant threat to public health and access to quality care. Expanding healthcare academic programs is essential to address this urgent need.
- **Enhancing Access to Care:** Building on the success of the WWAMI medical program and partnerships, this budget request will allow the University of Idaho to initiate new healthcare programs within the School of Health and Medical Professions.
- **Addressing Rural Healthcare Needs:** Rural communities often face the brunt of workforce shortages. Developing academic programs will help train and retain healthcare professionals, ensuring that even the most remote areas receive adequate medical and mental health services.
- **Future Demand:** Projected growth in demand for healthcare professionals, both in Idaho and nationally, underscores the importance of establishing healthcare academic programs now to meet future workforce needs and reduce reliance on out-of-state recruitment.

4. Describe the proposed unit's organizational structure.

The new School of Health and Medical Professions located within the College of Graduate Studies will be supported by the many excellent administrative and academic units at the University of Idaho main campus (Financial Services, Human Resources, Risk Management, Facilities Management, and Business & Administrative services). The Dean for the School of Health and Medical Professions provides leadership to the Administration and Business Affairs division, which includes an executive assistant, support staff in finance, marketing and strategic initiatives, and laboratory management. The dean will oversee five academic and business divisions. We are currently proposing the new school and six new programs under three departments (Department of Medicine, Department of Clinical Medicine and the Department of Nursing). Our Idaho WWAMI Medical Education program is also included in this organizational structure and is under the Department of Medicine.

- 1) Department of Medicine
 - a) WWAMI Medical Education Program
 - b) Doctorate of Anatomical Sciences
 - c) Masters of Science – Gerontology

- 2) Department of Clinical Medicine
 - a) Doctorate of Psychology
 - b) Physician Assistant
 - c) Athletic Training

- 3) Department of Nursing
 - a) Masters of Science – Nursing
 - b) Doctorate, Certified Registered Nurse Anesthetist

We are working closely with the College of Education, Health and Human Sciences to transition their Athletic Training Programs into the new School as shown on the following organizational chart. In addition, our future strategic plan is to improve healthcare for all on-campus students and create “Vandal Health” which will provide hands-on experience and training for our students in these healthcare programs. Note: Please see attached organizational chart.

5. What targets have been set to assess the proposed unit’s success in achieving objectives?

GOAL 1: A WELL, EDUCATED CITIZENRY – Continuously improve access to health and medical education for individuals of all backgrounds, ages, abilities, and economic means.

GOAL 2: CRITICAL THINKING AND INNOVATION - SHAMP will provide an environment for the development of innovative ideas, and practical and theoretical knowledge to foster the development of healthcare workers (psychologists, gerontologists, physician assistants, nurses, anatomists, and future physicians) who contribute to the health and wellbeing of Idaho’s people and communities.

GOAL 3: Effective and Efficient Delivery Systems – Deliver health and medical education, training, research, and service in a manner which makes efficient use of resources and contributes to the successful completion of our health and medical education program goals for Idaho.

6. Briefly describe the processes that will demonstrate the quality of the unit.

1. Set School and program performance measures as a series of goals to meet over time.
2. Define goals and objectives of the school and its programs and evaluate.
3. Report and use the evaluation findings to improve the school, programs, and its courses.
4. Each program will have an assessment process to be used for continuous program improvement through the following mechanisms:

- To evaluate how well students are achieving the intended learning outcomes, the following assessment processes will be employed:
- Examinations and Quizzes: Regular assessments will include written examinations and quizzes to evaluate knowledge acquisition and critical thinking skills.
- Clinical Skills Assessment: Clinical skills will be assessed through direct observation, practical examinations, and skills checklists during clinical rotations.
- Case Studies and Care Plans: Students will complete case studies and care plans to demonstrate their ability to apply theoretical knowledge to real-world patient care scenarios.
- Reflective Journals and Portfolios: Students will maintain reflective journals and e-portfolios, providing insights into their personal and professional growth.
- Peer and Self-Assessment: Peer evaluations and self-assessment will be incorporated for group projects and personal reflection on skills development.

Assessment findings will be used for continuous program improvement through the following mechanisms:

- Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
- Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
- Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
- Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

Assessment Activity Timing - Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- Clinical skills assessments and evaluations will be conducted during clinical rotations.
- Case studies, care plans, and projects will be assigned periodically.

7. Indicate the number of students, businesses, industries, and/or other clients to be served by this unit. Include a description of faculty participation and student involvement in the unit if applicable.

| Entering Enrollment | Program/Degree Title |
|---------------------|---|
| 15 | Direct Entry - Masters Degree, Nursing (MSN) |
| 20 | Doctorate – Anatomical Science Education (DAS) - Self Support |
| 20 | Masters of Science – Gerontology – Self Support |
| 10 | Certified Registered Nurse Anesthetist (CRNA) - Self Support |

| 20 | Physician Assistant | |
|---|--------------------------------|-----------------------|
| 15 | Doctorate of Psychology (PsyD) | |
| Academic Personnel | | Description |
| 11 | Fulltime Faculty | |
| 4.5 | Parttime Faculty | |
| 7 | Administration and Staff | |
| Hospital/Clinic Training Sites | | Location |
| Gritman Medical Center and Medical Clinics | | Moscow, Idaho |
| St. Joseph Regional Medical Center | | Lewiston, Idaho |
| Tri State Hospital and Medical Clinics | | Clarkston, Washington |
| Whitman Hospital and Medical Clinics | | Colfax, Washington |
| Pullman Regional Hospital and Medical Clinics | | Pullman, Washington |
| Kootenai Medical Center | | Coeur d'Alene, Idaho |
| Bonner General Health | | Sandpoint, Idaho |
| North Idaho Acute Care Hospital | | Post Falls, Idaho |

8. Financial Impact: Using the **budget template**, provide a narrative budget summarizing the needs and requirements for implementing the new unit.

The WWAMI Medical Education Program has recently submitted a request for Fiscal Year 2025 to the State of Idaho for educational support to create a new School of Health and Medical Professions (SHAMP). Based on feedback from policy makers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future. The budget summary is as follows:

Positions will be full-time, and part-time and most will be benefit eligible.

Healthcare Workforce – this request for the new School includes the programs that will require State support (Doctorate in Psychology, Physician Assistant, along with state support for the new School which includes Associate Dean of Curriculum, Associate Dean of Clinical Curriculum, Associate Dean of Admissions and Assessment, as well as department chairs and program coordinators. (Requesting 3.5 FTP; \$539,200 total General Fund PC funding with benefits). In addition to the state support, SHAMP will match the FTE and salary for a total personnel cost of \$946,700 (includes fringe benefits) for 7.0 FTE.

All personnel costs are based on market data and costs for comparable positions as per the University of Idaho's Market-based Compensation model.

The budget included in this proposal not only includes the budget request for FTE, salary and benefits that were submitted to the State of Idaho for FY25. It is necessary to include various expenditures to support the School and its programs. Therefore, the budget for this proposal includes \$100,000 in operating expenditures, as well as a one-time request for \$200,000 in capital outlay for equipment costs. The total amount for the FY25 budget is \$1,046,700.00. Each following year includes a 5% inflation added to the budget for all expenditures.

Current staff and faculty will be re-directed. Faculty and staff within WWAMI will be redirected to the new School of Health and Medical Professions. Please see the organizational chart under supportive documentation.

In conclusion, the primary beneficiaries, if this request is granted, are the individuals and communities who will be served by future PAs or Nurses, Clinical Psychologists and other graduates of the new School of Health and Medical Professions. Thus, the impact could encompass all of Idaho.

School of Health and Medical Professions

Program Resource Requirements.

- Indicate all resources needed including the planned FTE enrollment, projected revenues, and estimated expenditures for the first **four** fiscal years of
- Include reallocation of existing personnel and resources and anticipated or requested new resources.
- Second and third year estimates should be in constant dollars.
- Amounts should reconcile subsequent pages where budget explanations are provided.
- If the program is contract related, explain the fiscal sources and the year-to-year commitment from the contracting agency(ies) or party(ies).
- Provide an explanation of the fiscal impact of any proposed discontinuance to include impacts to faculty (i.e., salary savings, re-assignments).

A. GENERAL POLICY:

A-1. The University of Idaho seeks to provide a high level of responsive service in meeting the needs of students, faculty and staff and the general public. To accomplish this mission, it is the policy of the University of Idaho to provide a total compensation system that attracts and retains employees. Recognizing and rewarding employees for performance in the achievement of service delivery goals and objectives through a market-based salary model is thea foundation of this system. This policy addresses only the salary component of the university's total compensation system as it relates to staff employees; it does not address other components. Other factors that are part of total compensation system such as health insurance and retirement plans are not the subject of this policy.

A-2. Compensation practices should be consistent throughout the university, yet flexible to adapt to specific needs. To this end, employees are compensated from according to a base pay salary structure schedule based on market salary data and weighted factors for 1) education beyond the minimum required for the position, 2) prior experience directly related substantively similar to the position, 3) time -in -service, and 4) time -in -responsibility. Together with market salary data, (These weighted factors produce a target salary. Flexibility is provided through supervisory oversight regarding employee performance and budget constraints. Actual salary may differ from target salary due to performance or budget constraints. that provides pay grades with open ranges.

A-3. The University of Idaho seeks to pay competitive job market average salaries and intends that classified employees with at least satisfactory performance evaluations of "meets/exceeds requirements" should expect to advance according to the base pay salary structure within the salary range for the pay grade assigned to a classification. [rev. 7-03]

A-4. Advancement within the base pay salary structure will be predicated on satisfactory performance performance evaluations of "meets/exceeds requirements" salary range shall be based on performance criteria, as recorded assessed in the annual performance evaluation process, and the ability to achieve the goals and objectives of the particular position. [rev. 7-03]

B. AUTHORITY FOR ESTABLISHING COMPENSATION POLICY FOR UNIVERSITY OF IDAHO CLASSIFIED EMPLOYEES.

Salary and wage increases for University of Idaho classified employees are made in conformity with state legislation. An annual plan is established by the president in accordance with guidelines issued by the Board of Regents, RGP V.B.1. Initial appointments, promotions, classifications, and pay grades compensation, and other matters related to classified employees, are the responsibility of the president or designee. Oversight of the University of Idaho staff personnel system is within the administrative area of the Division of Finance and Administration, which reports to the financial vice president Vice President for Finance and Administration. [rev. 7-03]

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3440: Compensation of Classified Employees

C. ADMINISTRATION OF THE UNIVERSITY OF IDAHO COMPENSATION PLAN. The ~~assistant vice president senior for Human Resources (HR) executive~~ is responsible for maintaining the compensation plan for UI classified employees in conformity with Board of Regents' policy. No classified employee is to be paid at a rate that is not within the salary range for the class, except as noted in C-5 below. The current base pay salary structure schedule will be maintained by the HR office. For information on the base pay salary structure, see the APM 50.40 and the Information is available from the HR office of Human Resources website. ~~(rev. 7-02, 7-03, 12-04, ed. 7-08, 6-09)~~

C-1. The classification and pay grade factors of the base pay structure will be maintained through coordination and of classified positions are established by Employment Services in consultation with the department administrator and are subject to the with approval of the dean, director, or vice president. The base pay factors include:

~~a. Market Rate. The market rate is determined from a review of the duties, responsibilities, and qualifications for the position. It is assigned by HR in consultation with the management of the position. Market rates are based on salary data published annually by the Bureau of Labor Statistics (BLS) and the College and University Professional Association (CUA).~~

~~1. The market rate may include the addition of a discount or premium of the actual average rate when a specific match between the position and market data cannot be found; to create career ladders around a single market rate; or to create a basis for internal equity between similar but different positions. The discount or premium is referred to as "relative value."~~

~~b. Target Compa Ratio (CR%). The target CR% is determined by five factors that, when multiplied by the market rate, will determine an employee's target salary.~~

~~1. Minimum CR%. The minimum CR% for staff positions is 80% of the determined market rate. The minimum CR% may be increased when the salary data indicates that entry level salaries for a specific rate is higher than 80%. Such an increase is reviewable every year.~~

~~2. Education beyond the minimum requirement. When an employee has received an academic degree beyond that which is required an additional 2% will be added to the minimum CR%. This education credit may only be assigned for the first degree beyond the required degree.~~

~~3. Prior Experience. An employee's prior experience prior to the current hire date in the same or substantially similar position as the position currently held will add an additional 1% per year to the minimum CR% though the accumulated total CR% may not exceed 100%.~~

~~4. Time in Service (TIS). Counted from the current hire date maintained in the personnel database, an additional 1% per year will be added to the accumulated target CR% up to 100%. After the 100% total is reached, TIS years will continue to be counted at an additional .5% per year.~~

~~5. Time in Responsibility (TIR). Counted from the date assigned to the position maintained in the personnel database, an additional 1% per year will be added to the accumulated target CR% up to 100%. After the 100% total is reached, TIR years will continue to be counted at an additional .5% per year.~~

~~6. The maximum target CR% is 120%.~~

~~c. Target Salary. The target salary is the result of the application of the above mentioned factors. While the target salary represents the most equitable result of our salary determination process, there is no guarantee that employee's will be paid the target salary. There may be budget limitations or performance factors that prevent us from reaching the target salary. Target salaries will be the primary basis for salary decisions.~~

~~(rev. 7-02, 7-03)~~

C-2. The entrance salary for new appointees in any class ~~employees~~ is ordinarily set between the minimum rate and the calculated target salary for the individual employee ~~market~~ for that class. In unusual circumstances, and when supported by acceptable reasons, appointment at a higher rate may be authorized by the respective vice president or

Formatted: Indent: Left: 0.25"

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3440: Compensation of Classified Employees

~~provost, director of employment services and the dean or director. Otherwise, all new appointments are made within the entrance salary range. [rev. 7-02, 7-03]~~

~~C-3. When an employee is reinstated in a previously held position or transferred to another position in the same classification, he or she is generally paid at the same salary. Salary adjustments may be agreed upon by the employee, the department administrator, and the director of employment services. [rev. 7-02, 7-03]~~

~~C-4. The pay grade market rate of a classified position may be changed upon review of the duties and responsibilities of the position. This action may be initiated by Human Resources, the supervisor, or the manager or management team responsible for the work unit by any of the following actions:~~

- ~~a. "Reallocation." A change of an entire class of positions from the current pay grade in the compensation schedule to another pay grade of either higher or lower entrance salary.~~
- ~~b. "Reclassification." A change of a single position from the current class to another class to properly reflect the duties and responsibilities assigned to that position.~~
- ~~c. "Refactoring." A change in the number of Hay Points assigned to a class or position.~~

Formatted: Indent: Left: -0.25"

~~C-5. When a market rate is decreased for a particular class or position is reallocated or reclassified to a lower pay grade, the salaries of incumbent employees who are being paid at a rate higher than the target salary maximum provided in the new grade will not be reduced as a result of the reallocation or reclassification. However, the salaries of such employees will generally be held constant and not be increased thereafter so long as they exceed that maximum rate target salary. At the discretion of the dean or director respective vice president or provost and in consultation with the assistant vice president senior HR executive for human resources, exemplary performance by such employees may be recognized through a bonus adjustment to salary, effective for one fiscal year only or an increase based on performance. An employee whose position receives a new market rate has been reallocated or reclassified is not required to complete a new six-month probationary period. [rev. 7-02]~~

~~C-6. When a particular class or position is reallocated to a higher pay grade receives an increased market rate resulting in a new target salary, the employee will receive a salary equivalent to or higher than his or her current hourly rate. An employee whose position has been reallocated is not required to complete a new six-month probationary period be considered for a salary increase adjustment. Supervisors must also consider internal equity and funding availability in such cases.~~

~~C-7. When the position of an employee is reclassified to a higher pay grade, the employee will be assigned a salary in the range of the higher grade that provides a salary increase of not less than five percent. Salary increases outside of the annual salary adjustment cycle must have dean or vice president level approval. The reclassified employee is not required to complete a new six-month probationary period. The employee's department unit is responsible for providing the funding necessary for the required requested salary increase. [ed. 7-02, rev. 7-03, 12-04]~~

~~C-8. When an employee applies and is selected for a new position in a higher pay grade, he or she may negotiate the starting pay within the pay grade for the new position [see C-2 above]. Each promoted employee must successfully complete a six-month probationary period in his or her for the new position unless the employee was previously certified in that classification. (For the effect of demotion on salary see 3360 C 4; for the effect on salary of a recommendation for a merit increase in the previously held position, see B-3.) [rev. 7-03, rev. 12-04]~~

Formatted: Indent: Left: 0"

D. IN-GRADE SALARY INCREASES.

~~D-1. In-grade advancement Salary increases are not a vested right. While employees should expect to advance within their assigned pay range in salary based upon acceptable satisfactory performance and increases in the target salary, advancement is within the discretion of the university. Such advancements are considered as a part of the overall UI budget-setting process and are effective at the beginning of the fiscal year. An employee may advance within the salary range only if certified as meeting the satisfactory service requirements on a written documented~~

UI FACULTY-STAFF HANDBOOK
Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF
Section 3440: Compensation of Classified Employees

~~performance evaluation on file in HR and approved for the purpose by the president or the president's designee. Normally, an employee receives only one salary increase per year for satisfactory service. [See also 3380 E.]~~

~~D-2. Employees who are in probationary status may be recommended for merit increases at the discretion of the department unit administrator and with the approval of the dean or director; however, merit increases which have been authorized for employees in probationary status are not effective or awarded until the probationary period has been satisfactorily completed. [ed. 7-02]~~

~~**DE. ANNUAL SALARY INCREASES.** Salary increases are not a right. While employees should expect to advance in salary based upon satisfactory performance and increases in the target salary, advancement is within the discretion of the University. Such advancements are considered as a part of the overall UI budget-setting process and are effective at the beginning of the fiscal year. An employee may advance within the salary range only if certified as meeting the satisfactory service requirements on a documented performance evaluation on file in HR and approved for the purpose by the president or the president's designee. Normally, an employee receives only one salary increase per year for satisfactory performance service. [See also 3380 E.]~~

Changes in employee compensation (CEC) are considered annually by the legislature. Salary adjustments reflecting some or all of the following factors may be approved and implemented in accordance with guidelines for UI classified salary adjustments issued annually by the president:

~~**DE-1.** Changes in the cost of living;~~

~~**DE-2.** Fluctuations in the market cost of different types of labor, which are reflected in payline adjustments reallocating some classifications to different pay grades to the position market rates and employee target salaries;~~

~~**DE-3.** Equity; and, Changes to target salaries as a result of updated market rates. The use of updated market rates and resulting target salaries;~~

~~**DE-34.** Merit increases based on individual employee performance as documented by written the performance evaluation on file in HR and.~~

~~**D-54a.** Classified employees who are in their hiring probationary status may be recommended for merit increases at the discretion of the unit administrator and with the approval of the dean or director. [ed. 7-02].~~

~~**FE. COMPENSATION FOR NIGHT WORK.** A full-time classified employee whose work schedule requires at least 50 percent of his or her the scheduled working hours during a given pay period to be performed between the hours of 7 p.m. and 4 a.m. is paid an additional shift differential of 5 percent of the employee's hourly rate. The department unit administrator or designee submits an Electronic "Personnel Action Form" to effect the additional payment. [ed. 7-02, 7-03]~~

~~**GF. ADDITIONAL PAY FOR CLASSIFIED STAFF FOR SECONDARY WORK ASSIGNMENTS.**~~

~~**GF-1. Classified staff additional appointments.** A member of the eClassified staff must be paid overtime for any work that results in the employee working over 40 hours per week, including a secondary work assignment that is not within his/her the current job description and is outside the scope of his/her the primary appointment and classification. The secondary work assignment must be performed on a temporary basis beyond the regularly scheduled work week, and be limited in scope (for example, if a senior programmer teaches a special course on a one-time basis; or if an administrative support staff provides assistance one weekend with a special research project in another unit or college). Per federal law, the classified employees must be paid at least 1.5 times his or her their regular hourly rate for each hour that is worked over 40 hours per week. The secondary hiring authority may not offer compensatory time in lieu of cash payment of overtime. The secondary hiring authority is responsible for tracking the hours the employee has worked and~~

coordinating with the primary hiring authority for processing the employee's pay via a timesheet, in PHAHOOR. If the employee's wage for the secondary work assignment is set at more than time and a half, the employee should be paid via a Temporary Help — PERSI eligible (T)IP appointment. If the employee is less than full time, contact all Employment Services at 885-3638728 for additional information. *[add. 12-04, ren. & ed. 7-08]*

H
GF.2. – Exempt staff. The president or designee can authorize payments in addition to regular salary and these must be reported to the regents in a semi-annual report. See RGP II.C.4., RGP II.F.2., RGP II.G.2. Deans and other administrative officers are responsible for ensuring that required approvals have been granted for employees receiving additional compensation for service that is not part of the employee's position description. See the HR website for additional compensation procedures.

Gf.3. -Staff (Temporarily working at a higher market rate, e—Supervisors may request a temporary salary increase in pay for classified staff, or additional compensation for exempt staff temporarily performing duties at a higher level than their current permanent position. See the HR website for pay at a higher market rate procedures.

HGHI. QUESTIONS ABOUT SALARY EQUITY. An employee who believes that his or their compensation is not equitable first should first consult with his or their supervisor, and then with the department-unit administrator and senior HR executive, and/or the director of employment services. In certain situations, the employee also has recourse through the Director of Human Rights, Access and Inclusion Office of Civil Rights and Investigation, the Ombuds-office or to through the grievance procedure for staff employees. [See 3210 A and 3860 A.] *[ed. 7-02, 12-04, 7-08, 6-09, rev. 7-03, ren. 7-08]*

JH. VOLUNTARY SALARY REDUCTIONS. As our compensation efforts are pointed toward providing market-based and equitable salary rates, individual requests to reduce one's salary or to reject an increased salary adjustment based on the individual's target salary are discouraged. Reductions for salaries paid at less than 100% of the employee's target salary will not be considered. Should employees whose salaries exceed their target salary request a salary reduction, make such a request, they must provide a clearly stated reason and the reduction must be approved by the President. The approved salary will not fall below 100% of the target salary.

Version History

Amended 2024. Extensively revised to align with current practices.

Amended July 2021. Editorial changes.

Amended July 2009. Editorial changes to C and H.

Amended July 2008. The policy was revised to remove reference to classified exempt no longer used at the university.

Amended January 2005. Section G was rewritten to create sections G & H, and H became section I.

Amended July 2003. Revised A-3, A-4, B, C, C-1, C-2, C-3, C-7, C-8, and H. Editorial changes to F.

50.51—Requests for Job Reclassifications

Last updated November 7, 2006

A. General. The classification of a position determines the pay grade to which it is assigned. UI, and other state agencies, follow the Hay System when analyzing the duties of non-faculty positions to determine the classification. Classification decisions are not based on an employee's job performance or on a comparison to the work that other employees perform. At UI, classification reviews are performed in Employment Services in Human Resources (HR). Reclassification decisions may be appealed. Procedures for requesting a reclassification appear in section C-1, procedures for appealing reclassifications appear in C-2.

The reclassification process is for classified (CL) employees only. For exempt (EX) employees, the promotion process found in the Faculty Staff Handbook 3370 should be followed. *[ed. 11-06]*

B. Process. The classification analyst will perform a job analysis to determine the appropriate classification at the time the position is established, or subsequently when an approved request is received in HR. Reasons for reclassification may include: a significant change in job responsibilities and tasks either requiring higher level knowledge, skills and abilities (upward reclassification), a significant change in job responsibilities and tasks requiring the same level of knowledge, skills and abilities but a change in title (lateral reclassification), or a significant change in job responsibilities and tasks requiring a lower level knowledge, skills and abilities (downward reclassification. Note: The downward reclassification is not tied to job performance. See APM 50.21 for information regarding demotion of Classified employees.) The employee must be performing the new duties for six months or more prior to the submission of the reclassification paperwork. The division or unit submitting a request for reclassification provides the funds for any necessary salary increase that results from the review. Implementation of reclassifications is normally effective at the beginning of the fiscal year. Departments may implement changes retroactively to the date following the six-month period the incumbent has been performing within the new classification. Classification decisions may be appealed. *[rev. 11-06]*

C. Procedure:

C-1. Procedure for requesting job reclassification. The following procedures should be followed in requesting a job reclassification for university employees:

- i) **Obtain Reclassification Packet.** After the employee has been performing the new duties for at least six months, obtain the reclassification packet from the HR website: <http://www.hr.uidaho.edu/default.aspx?pid=5632> or call HR at (208) 885-3611 for directions.
- ii) **Complete Job Description.** Complete a results-oriented job description on the form provided and attach a copy of the previous job description on file, together with an organization chart showing where the position fits in the department or administrative unit. The job description may be sent for review prior to submission of the reclassification, however, additional changes may be requested upon review of the reclassification questionnaire. *[rev. 11-06]*
- iii) **Complete Questionnaire.** Complete the Position Review Reclassification Questionnaire.
- iv) **Obtain Authorizing Signatures and Submit Completed Packet.** Obtain the required signatures of the supervisor, dean or director, and appropriate provost or vice president. Submit to Employment Services the entire packet of material for reclassification evaluation. Materials in this packet should include:
 - a) Proposed new results-oriented job description.
 - b) Copy of the previous job description.
 - c) Organization chart.
 - d) Position Review Reclassification Questionnaire.

e) Completed signature sheet with appropriate sign-offs indicating the source of funds (budget number) from which the upgrade would be funded.

v) **Email Revised Job Description.** E-mail an electronic copy of the new results-oriented job description (see iv. a) to Employment Services at melissad@uidaho.edu. [~~ed. 11-06~~]

vi) **Desk Audit.** A classification analyst from Employment Services may conduct a desk audit of the position by meeting in person or over the telephone with the incumbent to review the reclassification questionnaire and job description. The analyst may also meet in person or over the telephone with the supervisor to obtain additional information and confirm concurrence with responses provided by the incumbent.

vii) **Calculation of Hay Points.** A comprehensive analysis of the position is completed and the position is Hay point factored by the analyst to determine job value based on the knowledge, problem solving, accountability and working conditions of the position.

viii) **Written Recommendation.** A written recommendation is sent to the dean or director of the unit with copies to the supervisor, Affirmative Action Coordinator, and incumbent attached for appropriate distribution. [~~ed. 11-06~~]

ix) **Action by Department.** Within 30 days of receiving the reclassification recommendations from Employment Services, the dean or director has the responsibility to take one of the following courses of action. Allowing the employee to continue working out of classification is not an acceptable option.

a) Make the decision to implement the recommendation; or

b) Return the recommendation to the analyst in Employment Services asking which duties should be pulled in order to sustain the current title and pay grade; or

c) Determine which duties should be added to be able to upgrade the position; or

d) Return the recommendations to the analyst in Employment Services to consider a different classification.

Once approval of funds to support the position reclassification is received from the appropriate provost/vice president, the department will need to initiate a Personnel Action Form (EPAF) on the University Banner HR system to start the new rate on the Sunday of a new pay period, and **forward the new signed job description to HR for the incumbent's personnel file.**

C-2. **Procedure for appealing a reclassification.**

i) **Notice of Appeal.** If after having a follow up meeting with the classification analyst, the supervisor and the employee do not agree with the final classification decision made by HR, then the classification appeal process can be initiated. Appeals of Employment Services classification decisions are submitted directly to the vice president of finance and administration. A *Notice of Appeal* form must be filed with the vice president for finance and administration, with a copy to the Classified Position Appeals Board (CPAB) chair, within thirty calendar days of the date the notice of the Employment Services decision was received by the supervisor and by the affected employee.

ii) **Hearing Schedule.** The vice president for finance and administration will notify the director of Employment Services that a *Notice of Appeal* form has been received and that an advisory opinion is being requested from the CPAB. The vice president will request that Employment Services supply seven copies of available documentation to the CPAB chair within 10 working days. CPAB will schedule a hearing at the earliest time convenient for all parties.

iii) **Hearing.** The director of Employment Services, the classification analyst, the employee, and his or her supervisor will be notified of the date, time, and place of the hearing by the CPAB chair. The hearing will proceed as follows: the analyst from Employment Services will present the basis for the recommendation that was made; the employee or supervisor, or both, will present

reasons for disagreement; the classification analyst will be given time for closing comments as will the employee and the supervisor. The board may ask questions for further clarification after the presentations. The board will then meet in closed session for deliberation and to develop a recommendation to be submitted to the vice president.

iv) **Decision.** The CPAB will forward its recommendation to the vice president for finance and administration. The vice president will review the recommendation, make a decision, and notify the employee, the employee's supervisor, the director of employment services, the classification analyst and the CPAB chair of the final decision.

D. **Information.** Information regarding position classification procedures, requests for reclassifications, and appeals of classifications may be obtained from Human Resources, (208) 885-3611 or employment@uidaho.edu.

45.16 -- Sponsored Project Payment Management

A. Purpose. To define the general policy for submitting requests to sponsored for payments and the associated internal controls.

B. Scope. This policy applies to all sponsored projects where payments must be requested from the sponsor.

C. Definitions

C-1. Cost reimbursable. Any projects whereby the agreement specifies that payment will be made after costs have been incurred as outlined in the agreement's terms and conditions.

C-2. Scheduled pay. Any projects where the agreement terms specify that the sponsor will be invoiced or make automatic payments based on scheduled amounts. Such projects may or may not be fixed price.

Unless otherwise specified in a grant or contract agreement, all payments are requested on a cost-reimbursable basis.

D. Policy

D-1. Individuals authorized to request sponsored project payment. The Authorized Organizational Representative (AOR), the supervisor of the OSP Financial Unit, and the employees of that unit are the only individuals authorized to request sponsored project payments on behalf of the university.

D-2. Timeliness of payment requests. The following schedule will be used for requesting payments on cost-reimbursable sponsored projects:

- a. **Letters of credit.** Biweekly coinciding with the payroll cycle, and at the end of each calendar quarter.
- b. **Other cost reimbursable.** Monthly or quarterly as per internal policies on minimum billing, or as otherwise delineated by the agreement terms.
- c. **Fixed-price scheduled billing.** The Financial Unit staff will run the Financial Unit Due Date report by event code LS% for the following month and send invoices to the sponsor by the deadline listed in the report. At the end of each month the Financial Unit staff will run the Fixed-Price Setup report and audit for any missed billing. The Financial Unit supervisor will run this report periodically to check for completeness of the billing and inform staff of any missed billing.

E. Procedure. To ensure timeliness, accuracy, and allowability of payment requests, the following internal control procedures are to be used:

E-1. Report of unbilled charges and undistributed cash. Prior to issuing an invoice a report of unbilled charges and undistributed cash must be run to ensure that the amount of the payment request matches the total of the unbilled charges, net of any prior overpayments.

E-2. Letter-of-credit drawdowns. Each letter of credit payment request shall be done by different individuals on a rotating schedule and the draws will be reconciled periodically by the Financial Unit supervisor.

F. Contact information. For additional information please contact osp-billing@uidaho.edu, osp@uidaho.edu or 208-885-6651.

45.17 Fixed-Price ~~Contracts/Grants~~Sponsored Projects

~~Created April 11, 2008~~

A. Purpose. This document states University policy on, and provides associated procedures for, the actions to be taken upon the completion of externally funded fixed-price ~~contracts/grants~~sponsored projects, especially when such ~~contracts/grants~~sponsored projects are concluded with a residual cash balance.

B. Scope. This policy applies to all fixed-price sponsored projects.

CB. Definitions:

CB-1. Fixed-pPrice ~~Contract/Grant~~Sponsored Pproject. A fixed-price ~~contract/grants~~sponsored project (also known as a firm-fixed-price, firm-price, ~~or fee-for-service~~fixed-price contract/grant) requires a recipient to perform the work necessary to produce deliverables (i.e., services or property) as specified in the ~~contract/grant~~agreement for an established dollar amount and, usually, withinby a defined time frame. Under such an ~~agreement~~-~~contract/grant~~, the fundingprice is not subject to adjustment on the basis of the recipient's actual expenditures ~~cost~~-~~experience~~ in performing the ~~contract/grants~~sponsored project, and-payment for performance of the ~~contract/grants~~sponsored project remains constant despite the actual costs associated with the work ~~that might be~~ required to fulfill the terms of the ~~contract/grant~~agreement, including any overages or underages.

CB-2. Residual fFunds. Residual funds are the monies remaining at the completion of a ~~fixed-price sponsored~~ project-~~contract/grant~~, after all costs incurred in performing the work and fulfilling the deliverables in the agreement ~~contract/grant~~ have been paid and all ~~external funding has~~payments have been received.

CB-3. Significant rResidual fFund bBalance (or sSignificant bBalance). A significant residual fund balance is defined by the University as residual funds equal to or greater than ~~ten (10) percent~~ 10% of the total ~~contract/grants~~sponsored project price.

DC. ~~REQUIREMENTS OF FIXED-PRICE CONTRACTS/GRANTS~~Policy:

DC-1. -When to use a fFixed-pPrice ~~Contract/Grant~~agreement. ~~The~~-A fixed-price ~~contract/grant~~agreement mechanism offers benefits to both project sponsors and Principal Investigators (PIs). Because the final cost of a product or service provided under a fixed-price ~~contract/grants~~sponsored project is established and accepted prior to the performance of the ~~contract/grants~~sponsored project, a project sponsor is relieved of the risk that its cost for the deliverable(s) identified in the ~~contract/grant~~agreement may exceed its expectations and budget. ~~Principal Investigators~~PIs, as recipients of a fixed-price ~~contract/grants~~sponsored project, perform under a minimal administrative burden, which is delimited primarily by the periodic reporting on progress toward any defined benchmarks. In most circumstances, if the costs incurred to complete the project are less than the price paid by the sponsor for the performance of the ~~contract/grant, agreement~~, the recipient institution retains the difference. In cases where a sponsor imposes a restriction on residual funds, the University will be obligated to comply with the terms and conditions in the fixed-price agreement.

ED-2. -Considerations for aAll fFixed-pPrice ~~Contracts/Grants~~sSponsored pProjects

a. Compensation. The University must ensure that it is properly compensated for all allowable direct and indirect costs incurred under a fixed-price

~~contract/grant agreement~~, but due to the University's status as a non-profit entity it must-should also avoid generating a residual balance. Entering into a fixed-price ~~contract/grant agreement~~ for deliverables intended for the direct benefit or use of the sponsor may also make the University appear to have an unfair competitive advantage over for-profit businesses providing the same or a similar product or service at a higher cost.

b. Unrelated Business Income Tax (UBIT) ~~r~~Review. ~~+~~ -If the University receives funds for work that is regularly undertaken for the benefit of a sponsor and that is not consistent with the research, education, other sponsored activity, instruction, or public service missions of the University as a non-profit institution, the Internal Revenue Service may declare these funds to be unrelated trade or business income and, therefore, subject to unrelated business income tax. ~~The~~ Office of Sponsored Programs (OSP) shall consult with Business and Accounting Services regarding any agreement that has UBIT potential.

c. Federal ~~r~~Requirements. ~~+~~ -The University must ensure observance of the terms and conditions of the ~~contracts/grants sponsored projects;~~ must adhere to and consistently apply established cost principles and accounting standards; ~~and~~ and ~~must~~ fulfill its obligations under federal and state compliance and audit regulations. ~~(2 CFR Part 200 Subpart E – Cost Principles and 2 CFR Part 200 Subpart F – Audit Requirements.) (See OMB Circular A-21).~~ Among the laws that inform University contracting policy is the Anti-Kickback Act of 1986. Consistent with this statute, the University prohibits any employee from soliciting, accepting, or attempting to accept a kickback—money, fee, commission, credit, gift, gratuity, thing of value, or compensation of any kind which is provided, directly or indirectly, for the purpose of improperly obtaining or rewarding favorable treatment in relation to a sponsored project contract/grant involving federal funds. ~~(See Anti-Kickback Act of 1986).~~

Compensation principles established by the federal government require that salary on sponsored programs be expressed in relation to the entirety of an individual's professional effort. ~~(2 CFR 200.430.) (See OMB Circular A-21).~~ The University demonstrates its conformance to these compensation principles, ensuring that compensation for sponsored programs accurately reflects the effort expended, by requiring the periodic verification of effort for ~~anyone~~ all non-temporary help employees with salary directly charged or cost shared to externally funded sponsored programs. ~~(See APM 45.09, Effort Commitment and Reporting).~~ The University, therefore, requires that faculty or staff report effort on a fixed-price ~~contract/grants sponsored project;~~ when if they have salary charged or committed as cost sharing to it. If no salary is charged or cost shared to the fixed-price ~~contract/grants sponsored project,~~ the effort put toward the performance the ~~grant/contracts sponsored project must be included in the report,~~ as is voluntary uncommitted cost sharing, in as part of the calculation of the total activities in which an employee has engaged in (and is compensated for) as part of ~~his or her~~ their ~~University~~ university appointment.

d. Tracking of ~~e~~Expenditures. ~~+~~ The University must document project expenditures under a fixed-price ~~contract/grants sponsored project~~ in order to show that sponsor funds have been used as specified by the ~~contract/grant agreement~~ and that costs are fully and properly expensed. If unable to adequately demonstrate during the course of an audit that sponsor funds were used in the manner allowed by the ~~contract/grant agreement~~ and applicable policies and regulations, project costs may be disallowed and the University required to return them to the sponsor. Repeated audit findings related to fixed-price

~~contracts/grants sponsored projects~~ may compromise the ability of the University to enter into these agreements with state and federal agencies.

E.D. Review and Approval of Fixed-Price Contracts/grants Procedure

E-1. Pre-Award Review and Approval. All ~~contract/grants sponsored project~~ proposals, including proposals for fixed-price ~~contracts/grants sponsored projects~~, must be presented by the Principal Investigator to the Office of Sponsored Programs for review of the proposal materials, terms and conditions, and assessment of the proposed project budget and scope of work prior to submission to the sponsor. The project budget should take into account all direct and indirect costs associated with the performance of the project and should include sufficient detail to make accurate accounting practicable. The ~~contract/grant agreement~~ must be approved and signed by the individual with signature authority for such documents ~~under APM Section 60.20~~.

E-2. Closeout of Fixed-Price Agreements- Closeout of fixed-price agreements. Upon completion of the work to be performed under a fixed-price contract/grant, the ~~Principal Investigator PI~~ must provide the following information to the Office of Sponsored Programs:

- Substantiation that all work required under the contract/grant has been completed
- Confirmation that no outstanding expense items remain open or in question with the sponsor and that all allocable and allowable costs have been charged to the project funding
- Certification that all required deliverables and reports have been provided to and accepted by the sponsor

The final account balance will be determined only after the final payment from the sponsor has been received, all salaries and outstanding invoices have been paid, and all F&A costs have been recovered by the University.

E-3F. Contract/grant Closeout with Residual Funds. In the event that the ~~Principal Investigator PI~~ completes the required work for less than the ~~contract/grant agreement~~ price, the ~~Principal Investigator PI~~ may request that the project account be closed and ~~that~~ the residual funds be distributed to the College or non-academic unit in which ~~she or he the PI~~ is a faculty member. These residual funds are considered deferred revenue of the University, and F&A costs and unrelated business income tax (if applicable) will be assessed against them prior to their distribution. ~~The remaining funds will then be disbursed in accordance with the University procedure for the distribution of earned F&A.~~ The sponsored project account will be closed only after the transfer of the residual funds. A College-unit receiving such funds may use them for any permissible use in support of the research, education, or public service missions of the University.

If there is significant residual fund balance, at the completion of work for the contract/grants sponsored project (i.e., an amount greater than or equal to ~~ten (10) percent~~ 10% of the ~~contract/grants sponsored project~~ price), ~~at the completion of work for the contract/grant~~, the ~~Principal Investigator PI~~ must provide a written explanation for the substantial discrepancy between the ~~cost expenses needed~~ to perform the ~~contract/grants sponsored project~~ and the costing that led to the contract/grants sponsored project price. This explanation should be supplied by the ~~Principal Investigator PI~~ to the Office of Sponsored Programs, which will use it along with the information that the ~~Principal Investigator PI~~ is required to provide upon closeout of the agreement (section under E. Closeout of Fixed-Price Agreements E-2) as the basis for an audit of the project.

Residual funds will be distributed to the college or non-academic unit College of the Principal Investigator PI upon the satisfactory conclusion of the audit and by per the distribution allocation as approved of the Vice President for Research, ~~or the Vice President for Research~~ or their designee.

2023 – 2024 Faculty Senate – Pending Approval Approved at Mtg #21
Meeting # 20 Feb. 13, 2024

Tuesday, February 6, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.
Absent: Strickland (excused), Maas (excused), Rode, Mischel

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #19, January 30, 2024, were approved as distributed.

Chair's Report:

I would like to share a few notes about admissions. As we all know, the criteria for admissions are the prerogative of the faculty. The State Board of Education plans to draft a proposal. U of I and BSU are on the so called "list of 8." Our task is to make recommendations about admission criteria by the end of February, a tight timeline. This is an important item of the Faculty Senate Spring agenda. We will reach out to the admissions committee.

To provide a brief history, since Covid, we have operated under an emergency action, by which direct admission is based on a GPA of 2.6 and ACT/SAT are not required. This needs to be revised. We can change the GPA threshold or leave it as is. We can change the admission criteria by requiring both GPA and SAT/ACT, or GPA and ISAT.

From what I heard at the meeting with SBOE, this is a summary of the advantages and disadvantages of each criteria.

- Regarding GPA, it is the most consistent metric, and many agree that it's the best indicator of future student success. GPA is not reported consistently by all schools in the state, making it less rigorous.
- Regarding SAT, some universities have dropped the requirements for standardized exams.
- Regarding ISAT, ISAT is specific to Idaho and not possible for out of state students who cannot take ISAT and who may take the SAT/ACT.

One option is to keep admission standards as they have been since the emergency action – GPA only – and possibly adjust the threshold. If an applicant has a lower GPA, we could require a combined GPA and SAT and additional material. Please send your feedback and questions (e.g. how do you want to proceed? Shall we come up with a proposal next week? Others?)

Discussion:

A senator clarified that the authority to make matriculation decisions is with UCC, not the admission committee. Chair Gauthier agrees but argues that input from the admission committee is helpful. Another senator proposes keeping ACT/SAT scores optional, but using them when needed, for instance, in scholarship decisions.

An internal study on SAT scores was done at Dartmouth, where SAT is now reinstated, and reported in the New York Times, "A Top College Reinstates the SAT" (nytimes.com). A senator gave a brief summary. They analyzed their SAT numbers in relation to admissions and compared to the status when they did not have SAT scores due to COVID. They found that, because of the way they process SAT scores, not requiring the SAT actually puts underserved student populations at a disadvantage. The key point is how they use the SAT information – they compare SAT scores to the overall SAT

performance in their local schools, as opposed to a global average. The senator suggests searching for this data (where SAT scores are localized to specific schools). Do we use such data in admissions? Does the situation described in the article bare any resemblance to our admission process? Chair Gauthier thinks this is an interesting point to explore.

Vice Chair Kristin recalled that last week, Dean Kahler said that, from the analysis done here, specific to our university, they did not see a clear impact of SAT on U of I students in terms of retention. It was also emphasized that the New York Times article is about admissions, not retention.

A senator asked whether dropping the SAT requirement would in some way negatively impact our targeted intervention and retention strategies. We have many offices on campus whose job and mission are to make sure that struggling students are identified early and provide the necessary resources. Perhaps the SAT could provide an additional piece of information that could be helpful for early identification. Chair Gauthier said that he asked the same question at the SBOE meeting. Using SAT scores in this way seems to be part of the direction they want to go.

Referring to the article mentioned earlier, Provost Lawrence agreed with a previous comment that the article is about admissions, not retention, whereas our conversation with Dean Kahler was about retention. In relation to the Dartmouth case, we should ask ourselves whether we are bringing in students who do not have a high probability of success, which can be measured with retention data – but it’s still an admission decision, and their institution uses a much more selective process.

The Provost brought up the ISAT (Idaho Standards Achievement Test), now required in the state. ISAT is new and measures different parameters. Having no experience with this tool, we need to be sure we use it correctly and understand the meaning of the outcome scores. Furthermore, it’s only for Idaho students, which adds another level of complexity to the process for out of state students. Other senators echoed the Provost’s point regarding the New York Times article.

Provost’s Report:

- University Excellence Awards. Deadline for nomination: Friday, February 9.
<https://www.uidaho.edu/governance/faculty-staff/>
- There is significant delay with the federal government reporting FAFSA information, which is seriously impacting our financial aid process, especially problematic for new students. This delay is going to change our recruiting landscape for the next 6 to 9 months. Our Financial Aid Office is working to serve students in new ways.
Discussion: None.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 518 Semiconductor Design Undergraduate Certificate – Feng Li, Electrical & Computer Engineering, Attach. #2.
The certificate in semiconductor design is designed to provide undergraduate students with specialized knowledge and skills in the field of semiconductor design. This certificate program is intended to prepare students for careers in the semiconductor design industry or related fields, as well as future graduate studies in the field of semiconductor design. The departments currently offer these proposed courses required for the semiconductor design certificate, and these courses already have the required materials needed for the certification.
Vote: 20/20 yes. Motion passes.
 - UCC 503 Advanced Microelectronics Fabrication Graduate Academic Certificate – Feng Li, Electrical and Computer Engineering Attach. #3.

The certificate in advanced microelectronics fabrication is designed to provide graduate students with specialized knowledge and skills in it. This certificate program is intended to prepare students for careers in the advanced microelectronics fabrication industry or related fields, as well as future graduate studies in the field of advanced microelectronics fabrication. The departments currently offer these proposed courses required for the advanced microelectronics fabrication certificate, and these courses already have the required materials needed for the certification.

In response to a question about the delivery mode, Feng Li said that several options are available, depending on the class.

Vote: 19/19 yes. Motion passes.

- UCC 524 High-Speed Circuits and Systems Graduate Academic Certificate – Ata Zadehgo, Electrical and Computer Engineering Attach. #4.

The high-speed circuits and systems certificate is tailored to equip graduate students with the expertise needed to apply signal/power integrity and electromagnetic compatibility engineering principles to high-speed circuits and systems. This program aims to prime students for careers in the high-speed circuits and systems sector or analogous domains, as well as further graduate studies in high-speed circuits and systems. The department is already offering the stipulated courses for the high-speed circuits and systems certificate, and these courses are equipped with the necessary materials for certification.

Vote: 20/20 yes. Motion passes.

- UCC 546 Biomedical Engineering Undergraduate Certificate – Nathan Schiele, Chemical and Biological Engineering Attach. #5

Biomedical engineering professions are rapidly growing, and there is a critical need to train the next generation of biomedical engineers. Undergraduate student interest in biomedical engineering is high with an average of 70% of incoming biological engineering undergraduate students expressing interest in biomedical engineering and/or medical professions. No curricular changes nor additional teaching load is being proposed for this certificate. This 12-credit Biomedical Engineering Certificate is developed based on the courses already routinely offered in the BE program, College of Engineering and across campus. Assessments will occur as part of the BE program's annual review and University accreditation.

Vote: 20/20 yes. Motion passes.

- UCC 527 Cybersecurity PhD – Terence Soule, Department Chair, Computer Science Attach. #6

There is a major unmet need for cybersecurity professionals. These professionals help businesses protect their assets from cyber criminals. Untrained individuals spend more time and effort, and therefore more corporate resources, developing less than ideal solutions. A trained cybersecurity professional will be able to get the work done with less effort and fewer resources. Furthermore, our economy and critical infrastructures are today very dependent on digital and computer-based systems. Adequately protecting such systems is of paramount and essential importance, and a likely prerequisite for a healthy economy in the State of Idaho and the Nation. As noted above additional faculty and IT support will be needed to manage the added workload, particularly as it applies to increased graduate student mentoring, increased research, and the concurrent need for additional IT support for cybersecurity labs.

Vote: 20/21 yes; 1/21 no. Motion passes.

- **Changes to the Administrative Procedures Manual (non-voting):**

- APM 45.08 Cost Sharing (“Match”) on Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs.
No presenter available.

Announcements and Communications:

- Computing Resources Available for Research – Luke Sheneman, Director, Northwest Knowledge Network, Institute for Interdisciplinary Data Science, Joe Leister, HPC Systems Administrator, Institute for Interdisciplinary Data Science.

Luke explained how their team help enable and support research. He introduced the Collaborative Computing Center (C3+3), a statewide collaboration of the Idaho Universities and the Idaho National Laboratory (INL) to develop a regional educational and research system within the framework of statewide high-performance computing (HPC).

The core of the presentation was about the impressive features and capabilities of the Falcon supercomputer. They are recruiting users and offer Falcon workshops. For more information, visit <https://www.c3plus3.org>

The slides of the presentation can be downloaded from:

<https://www.northwestknowledge.net/cloud/index.php/s/glZ6m5z2asiSAqE>

Discussion:

It was suggested to advertise the workshops broadly. This incredible computing power can be a helpful recruiting tool for hiring.

In response to questions, Luke explained how to request a Falcon account. At the workshops, research computing experts show you how to log in, transfer data, submit jobs etc. Tutorials are also available on the webpage. It is a Linux environment. Obtaining an account requires a short quiz related to security. Students can request an account with the approval of their advisors.

For help with Falcon: help@c3plus3.org

- University of Phoenix Survey Taskforce – Kristin Haltinner, Vice Chair Faculty Senate Attach. #8
Kristin thanked the members of the task force. She went over the executive summary, and some of the most frequent themes that emerged from the survey. There are 130 pages of qualitative data, not yet coded. She suggested focusing the discussion on the best way to use and share this information. [Discussion starts]. For instance, one could identify common concerns people have and work with the Provost's office to mitigate them. Some of the concerns could be actual, rather than perceived risks, and those should be addressed and resolved. Some of the most frequently raised concerns are about possible U of I liability in lawsuits against the University of Phoenix, and possible damage to the U of I reputation. Provost Lawrence was asked to give a brief summary of the affiliation's current status. Provost Lawrence: The lawsuit filed by the Attorney General against the SBOE was resolved in favor of SBOE. There could be an appeal. Accreditation is under review. All other aspects of the bonding process are moving forward. The transaction could close in late spring, but it's not definite. As for liabilities, they stay with 4 3 Education, a 501 C3 organization. The university is contemplating taking on some liability, but nothing has been finalized yet.
Dean of Students Blaine Eckles congratulated Faculty Senate for this effort. It seems most respondents are in favor of the affiliation. This should be part of the communication that goes out.
Kristin mentioned another concern identified from the data. Employees were divided on whether the degree of involvement in the decision was consistent with shared governance. Kristin encouraged everyone to reach out with questions and feedback.

New Business:

Senator Long was contacted last fall by the UBFC chair about the faculty role at the committee. Apparently, the chair was told that, within the new budget model, there isn't much room for faculty input. Senator Long and the UBFC chair met with FSL who then met with the Provost and the Vice Provost for Faculty to convey the complaint. Recently, the new chair of UBFC contacted Senator Long again because they had received no response.

The Secretary responded: FSL did meet with university leadership mid-October to raise the concern. In the meantime, the Committee on Committees had decided to undertake an audit of those committees whose chairs had reported (via a survey) problems with the scope, function, or structure of their committees, similarly to the UBFC case, and bring recommendations to Faculty Senate.

Adjournment:

The agenda being completed, the Chair called for a motion to adjourn. The meeting was adjourned at 4:44pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #20

Tuesday, February 6, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #19 January 30, 2024 **Attach. #1**

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 19

Tuesday, January 30, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Maas, McKenna, Murphy, Ramirez, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Blevins (excused), Raney (excused), Mittelstaedt (excused), Long.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #18, January 23, 2024, were approved as distributed.

Chair Gauthier proposed to change the order of the agenda, because Aleksandra Hollingshead cannot speak later due to a conflict. The proposal was approved by general consent.

Announcements and Communications:

- Report from the Ubuntu Committee – Aleksandra Hollingshead, Department Chair, Curriculum and Instruction.

Aleksandra is the chair of Ubuntu. Her visit's main purpose is to share information about the 2024 MLK Jr. Art and Writing contest. The deadline for (digital) submission is February 16, 2024, by 5pm. Please share with students in your departments or units. To commemorate the life, work and legacy of Dr. Martin Luther King Jr., University of Idaho undergraduates, graduates and professional students enrolled for the 2024 spring semester at any U of I location are invited to create a written work or piece of art in any medium of their choice about equality and social, racial and ethnic justice. The contact person is Caitlin Cieslik-Miskimen, caitlinc@uidaho.edu. They are working on securing some funds for the student awards.

<https://www.uidaho.edu/student-affairs/ubuntu/mlk-art-and-essay-contest>

She also wanted to share with Senate some concerns about the Ubuntu committee, perhaps to be delegated to the Committee on Committees. The concerns are about structure, fast turnover (length of service), and confusion about attendance expectations. Over 50% of the members are non-voting ex-officio delegates from the different diversity units, which is good. However, because of misunderstanding of attendance expectations, people work in silos. The committee needs better coordination. If the purpose of Ubuntu is to support diversity work focused on students, perhaps we should reconsider the committee structure and establish clear communication channels with the diversity and inclusion staff.

Vice Chair Haltinner noted that the Committee on Committees is in the process of auditing all committees. She reached out to Yolanda Bisbee with some suggestions about the committee make-up.

Responding to a charge from Senate on specific tasks, Ubuntu reached out to the Registrar's Office multiple times to ask that students be allowed to use their preferred names on their diplomas but didn't receive a response. They contacted the Admission Committee about more inclusive statements on the admission page but didn't hear back. They have been looking into more equitable language in position postings and search committee work. These plans are now on hold until the end of the legislative session. One successful area is the committee work with

IPO to provide more clarity in the communication system with international students about scholarships available to them.

Chair's Report:

- Brandi sent responses to some of the questions about the State Board switching from TIAA to Fidelity, namely, Optional Retirement Plan Transition to Fidelity:
 - Rankings: Fidelity is a mutual fund company and does not hold reserves in a general account, so ratings are not applicable.
 - Bitcoin: Fidelity made some announcements about making bitcoin investments available through retirement plans. This will not be an option for the ISBOE plans. Currently the self-directed brokerage is limited to mutual funds and therefore bitcoin is not (and will not be) an option for this plan.
- There was a critique from a senator about the Talking Points (TP). We think that the TP are very important to engage constituents and get immediate feedback about what was heard and discussed during the Faculty Senate meetings. The TP do not replace the minutes. We will put a disclaimer at the bottom of the TP to clarify that they are not intended to replace approved minutes.

The Faculty Secretary followed up. She confirmed that traditionally TP have been a quick and informal way to let constituents know about the current issues senate addresses weekly and to stimulate interest to know more from the supporting documents. Requiring that TP be approved by all senators before going out would defeat their purpose. She encouraged feedback.

Provost's Report:

- U of I was founded January 30, 1889, so it's 135 years old today!
- Tomorrow at 12: 30 in the ISUB Lobby: McNair Research Expo. Check it out if you can, it should be very interesting work.
- 10th day enrollment was measured last week. It indicated an increase of 6.8% over the same point in time last spring. The final number will probably be smaller, because dual credit registration data may have come in earlier than last spring (dual credit timing is different depending on the school district). The final number is expected to be an increase in the range of 3-5%.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 508 Microelectronics Fabrication – Feng Li, Electrical & Computer Engineering, Attach. #2.
The scheduled speaker was not present. Senator Roberson offered to say a few words and answer questions. The courses required for the certificate will provide students with specialized knowledge and skills in microelectronics fabrication and prepare them for careers in the industry.
Vote: 22/22 yes. Motion passes.

Jeff Seegmiller introduced the new medical program to which the following UCC items belong. In the state of Idaho, there is a shortage of medical professionals, poor health care, and a high suicide rate. We rank 50th in the country in the number of mental health professionals and health professionals. They are proposing a novel medical program to meet

critical needs in the state and save lives. Jeff Seegmiller is enthusiastic and grateful to all who have contributed to this important effort.

- UCC 549 Master of Science in Gerontology – Thomas Farrer, Associate Program Director, Medical Education Program (WWAMI), Attach. #3.
Generally, the number of people above 50 years of age is growing; between 2012 and 2030, it is predicted that this population will grow by 33%. We need a workforce to meet the needs of this growing population.
Discussion:
Chair Gauthier asked whether the program is multidisciplinary. Response: Yes, it covers many areas of aging, such as elder care, elder law, etc.
A senator inquired about the teaching power to deliver those classes. Response: Some will be new hires; others will come from WWAMI. Current staff and faculty will be re-directed to the new School of Health and Medical Professions.
A senator asked whether courses that appear to be at the 600 level, such as GERO 6XX, indicate plans to develop a doctoral program. Response: That is not the case.
Vote: 23/24 yes; 1/24 no. Motion passes.
- UCC 551 Direct-Entry Doctor of Nursing Practice-Nurse Anesthesia – Russell Baker, Associate Program Director, Medical Education Program (WWAMI), Attach. #4.
In Idaho, the current nurse population clusters around the largest city in Idaho Public Health Districts, with significant migration of nurses away from Idaho rural communities. Thus, there is a great need to train and prepare CRNAs in Idaho to work in Idaho’s rural communities. The development of an advanced practice entry-to-practice CRNA program in the state will aid in the development of a CRNA workforce to meet the needs of Idahoans.
Vote: 21/21 yes. Motion passes.
- UCC 540 Direct-Entry Master of Science in Nursing – Jeff Seegmiller, Director, Medical Education Program (WWAMI), Attach. #5.
This program is an entry to the medical profession. Applicants don’t need to have a bachelor’s in a nursing field. Currently, no institution in Idaho offers a Direct Entry Master of Science in Nursing. A direct-entry nursing education program addresses unmet needs for a struggling rural workforce.
Vote: 22/22 yes. Motion passes.
- UCC 548 Doctor of Psychology in Clinical Psychology – Thomas Farrer, Associate Program Director, Medical Education Program (WWAMI), Attach. #6.
There is a critical shortage of mental health providers in all Idaho counties. There are only two clinical psychology doctorate programs in Idaho, one at Idaho State University and a second at Northwest Nazarene University. The program at ISU is accredited by the American Psychological Association. However, the program turns away 90-95% of their applicants. Thus, many suitable applicants will have to leave the state to continue seeking a doctoral degree. This program will help meet the needs of Idaho citizens with mental health conditions.
Vote: 22/22 yes. Motion passes.

- UCC 550 Master of Physician Assistant Studies – Russell Baker, Associate Program Director, Medical Education Program (WWAMI), Attach. #7.
Currently, Idaho State University runs the only PA program in the state, which accepts about 10% of the applicants. The pool of applicants who are not accepted has a large portion of Idaho residents. A comparable PA at the University of Utah has similar PA production as ISU and reports a 4% admission rate for the PA program. Thus, more than 90% of applicants are not accepted into either of these programs, while there is strong interest in pursuing a career as a PA.
Vote: 21/21 yes. Motion passes.
- UCC 99 School of Health and Medical Professionals – Jeff Seegmiller, Director, Medical Education Program (WWAMI), Attach. #8.
The School of Health and Medical Professions will be the foundation on which our programs will grow. The school will be housed within the College of Graduate Studies. The bulk of these specific programs are currently not being offered in our state institutions, except for the Physician’s Assistant Program. Proposals for each of these academic programs are included in this School/Program proposal submission.
Vote: 20/20 yes. Motion passes.
- **Proposed changes to the Faculty Staff Handbook**
 - FSH 3440 Compensation of Classified Employees – recalled from the agenda.
- **Changes to the Administrative Procedures Manual (non-voting):**
 - APM 50.51 Request for Job Reclassification – Brandi Terwilliger, Director of Human Resources, Ashley Rodriguez, Senior HR Business Partner, Attach. #10.
Information contained in this item is now maintained on the HR website.
 - APM 45.16 Sponsored Project Payment Management – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs, Attach. #11.
Rewritten to clarify processes to match Chart V (Banner) updates and to update format.
 - APM 45.17 Fixed-Price Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs, Office of Research Assurances, Heather Clark, Accounting Manager II, Office of Sponsored Programs, Attach. #12.
Updating for current processes in Chart V and new CFR regulations governing fixed-price sponsored funding.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:19pm.

Respectfully Submitted,

Francesca Sammaruca

Secretary of the University Faculty & Secretary to Faculty Senate

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Curriculum:

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|-------------|----------------------------------|--------------|
| ECE 410 | Microelectronics II | 3 |
| ECE 415 | Analog Integrated Circuit Design | 3 |
| ECE 445 | Introduction to VLSI Design | 3 |
| ECE 460 | Semiconductor Devices | 3 |

Total Hours**12**

Courses to total 12 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. an ability to identify, formulate, and solve semiconductor design problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to semiconductor design concepts and technologies with a range of audiences.
3. an ability to develop and conduct appropriate semiconductor design experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about semiconductor design.

These learning outcomes demonstrate that students who have completed a certificate in semiconductor design have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the semiconductor design industry. The students are well-prepared to pursue further education or employment in the semiconductor design field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certification in semiconductor design will involve regular course evaluations of the course syllabus and student work. This will provide the departments with insight into the students' knowledge in semiconductor design and/or related fields. The summary of the course evaluation and student work will be shared with an outside entity, specifically a representative from the industry and electrical and computer engineering advisory board. The feedback from the industry partner and industry advisory board help in evaluating the students learning outcome and program component.

How will you ensure that the assessment findings will be used to improve the program?

Course syllabus and student evaluation will be reviewed each semester, and course content will be adjusted as necessary. The annual assessment feedback from the industry partner and department advisory boards will be reviewed by the departments, and the required refinement to the syllabus will be done on an annual basis. An important aspect of these classes is the ability of the students to learn about semiconductor design related topics therefore, the content taught in the class will be evolving on an ongoing basis.

What direct and indirect measures will be used to assess student learning?

Exams, assignments, and class projects will be required for all the relevant classes and graded on a regular basis. In the selected required courses, an oral exam of the students will be required at the end of the class to evaluate student learning.

When will assessment activities occur and at what frequency?

The size and scope of this program dictate that we will collect the assessment data during the courses and the survey data each semester. Every fall semester, the departments and curriculum committees will evaluate the students' assessment, industry partners, and advisory boards feedback and take corrective actions if necessary.

Student Learning Outcomes

Learning Objectives

1. an ability to identify, formulate, and solve semiconductor design problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to semiconductor design concepts and technologies with a range of audiences.

3. an ability to develop and conduct appropriate semiconductor design experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about semiconductor design.

These learning outcomes demonstrate that students who have completed a certificate in semiconductor design have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the semiconductor design industry. The students are well-prepared to pursue further education or employment in the semiconductor design field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The certificate in semiconductor design is designed to provide undergraduate students with specialized knowledge and skills in the field of semiconductor design. This certificate program is intended to prepare students for careers in the semiconductor design industry or related fields, as well as future graduate studies in the field of semiconductor design. The departments currently offer these proposed courses required for the semiconductor design certificate, and these courses already have the required materials needed for the certification. Furthermore, we plan to add extra emphasis to semiconductor design-related topics in the homework assignments, class example problems, and discussion sessions to elucidate design and engineering principles in the semiconductor design and related fields. Therefore, we anticipate that the proposed certificate program will not add additional workload to the departments.

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. an ability to identify, formulate, and solve advanced microelectronics fabrication problems by applying principles of engineering, science, and mathematics.
2. an ability to communicate effectively on topics related to advanced microelectronics fabrication concepts and technologies with a range of audience.

3. an ability to develop and conduct appropriate advanced microelectronic fabrication experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about microelectronics fabrication.

Overall, these learning outcomes demonstrate that students who have completed a certificate in advanced microelectronics fabrication have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the advanced microelectronics fabrication industry. The students are well-prepared to pursue further education or employment in the advanced microelectronics fabrication field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certification in advanced microelectronics fabrication will involve regular course evaluations of the course syllabus and student work. This will provide the departments with insight into the students' knowledge in advanced microelectronics fabrication and/or related fields. The summary of the course evaluation and student work will be shared with an outside entity, specifically a representative from the industry and electrical and computer engineering advisory board. The feedback from the industry partner and industry advisory board help in evaluating the students learning outcome and program component.

How will you ensure that the assessment findings will be used to improve the program?

Course syllabus and student evaluation will be reviewed each semester, and course content will be adjusted as necessary. The annual assessment feedback from the industry partner and department advisory boards will be reviewed by the departments, and the required refinement to the syllabus will be done on an annual basis. An important aspect of these classes is the ability of the students to learn about advanced microelectronics fabrication related topics therefore, the content taught in the class will be evolving on an ongoing basis.

What direct and indirect measures will be used to assess student learning?

Exams, assignments, and/or class projects will be required for all the relevant classes and graded on a regular basis. In the selected required courses, an oral exam of the students will be required at the end of the class to evaluate student learning.

When will assessment activities occur and at what frequency?

The size and scope of this program dictate that we will collect the assessment data during the courses and the survey data each semester. Every fall semester, the departments and curriculum committees will evaluate the students' assessment, industry partners, and advisory boards feedback and take corrective actions if necessary.

Student Learning Outcomes

Learning Objectives

1. An ability to identify, formulate, and solve advanced microelectronics fabrication problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively on topics related to advanced microelectronics fabrication concepts and technologies with a range of audience.
3. An ability to develop and conduct appropriate advanced microelectronic fabrication experimentation, analyze and interpret data, and use engineering judgment to draw conclusions about microelectronics fabrication.

Overall, these learning outcomes demonstrate that students who have completed a certificate in advanced microelectronics fabrication have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the advanced microelectronics fabrication industry. The students are well-prepared to pursue further education or employment in the advanced microelectronics fabrication field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The certificate in advanced microelectronics fabrication is designed to provide graduate students with specialized knowledge and skills in the field of advanced microelectronics fabrication. This certificate program is intended to prepare students for careers in the advanced microelectronics fabrication industry or related fields, as well as future graduate studies in the field of advanced microelectronics fabrication.

The departments currently offer these proposed courses required for the advanced microelectronics fabrication certificate, and these courses already have the required materials needed for the certification. Furthermore, we plan to add extra emphasis to advanced microelectronics fabrication-related topics in the homework assignments, class example problems, and discussion sessions to elucidate design and engineering principles in the advanced microelectronics fabrication and related fields. Therefore, we anticipate that the proposed certificate program will not add additional workload to the departments.

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Curriculum:

Students who obtain this certificate will learn the principles of signal/power integrity (SPI) and electromagnetic compatibility (EMC) engineering, and apply them to the analysis, design, and optimization of high-speed circuits and systems.

All required coursework must be completed with a grade of B or better (O-10-b (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|--------------------------------|---|-----------|
| ECE 530 | Advanced Electromagnetic Theory I | 3 |
| ECE 533 | Antenna Theory | 3 |
| Select two from the following: | | 6 |
| ECE 539 | Advanced Topics in Electromagnetics | |
| ECE 515 | Analog Integrated Circuit Design | |
| ECE 517 | Mixed Signal IC Design | |
| ECE 518 | Introduction to Electronic Packaging | |
| ECE 524 | Transients in Power Systems | |
| ECE 528 | Understanding Power Quality | |
| ECE 529 | Utility Applications of Power Electronics | |
| ECE 588 | Advanced Frequency-Domain Control | |
| Total Hours | | 12 |

Courses total 12 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. The capability to recognize, articulate, and resolve problems related to high-speed circuits and systems by leveraging principles from engineering, science, and mathematics.
2. Proficiency in communicating about HSCS concepts and technologies to diverse audiences effectively.
3. Expertise in designing and executing relevant high-speed circuits and systems experiments, analyzing the data, and employing engineering discernment to derive conclusions concerning high-speed circuits and systems.

These learning outcomes underscore that students completing the high-speed circuits and systems certificate have gained the requisite knowledge, competencies, and aptitudes essential for success in various sectors of the high-speed circuits and systems industry. Such students are aptly prepared to advance in further educational pursuits or to embark on careers in the high-speed circuits and systems domain.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the high-speed circuits and systems certification will include routine evaluations of the course syllabus and student submissions. This will offer the department a clear understanding of the students' proficiency in high-speed circuits and systems and associated fields. Summaries of these evaluations, along with samples of student work, will be presented to external stakeholders, notably a representative from the industry and the Electrical and Computer Engineering Advisory Board. Feedback from these industry affiliates will be instrumental in assessing student learning outcomes and refining the program's components.

How will you ensure that the assessment findings will be used to improve the program?

Each semester, the course syllabus and student evaluations will be scrutinized, with course content being modified as needed. The department will annually review feedback from industry partners and advisory boards, leading to subsequent syllabus adjustments. A crucial element of these courses is the students' capacity to grasp topics related to high-speed circuits and systems. Consequently, the content imparted within these classes will naturally evolve over time.

What direct and indirect measures will be used to assess student learning?

Examinations, assignments, and class projects will be mandatory for all pertinent courses and will be graded consistently. For specific core courses, students will undergo an oral examination at the course's conclusion to assess their learning.

When will assessment activities occur and at what frequency?

Given the scale and breadth of this program, we will gather assessment data throughout the courses and collect survey data each semester. Every fall, the department and curriculum committees will review feedback from student assessments, industry partners, and the advisory board, implementing corrective measures as necessary.

Student Learning Outcomes**Learning Objectives**

1. The capability to recognize, articulate, and resolve problems related to high-speed circuits and systems by leveraging principles from engineering, science, and mathematics.
2. Proficiency in communicating about HSCS concepts and technologies to diverse audiences effectively.
3. Expertise in designing and executing relevant high-speed circuits and systems experiments, analyzing the data, and employing engineering discernment to derive conclusions concerning high-speed circuits and systems.

These learning outcomes underscore that students completing the high-speed circuits and systems certificate have gained the requisite knowledge, competencies, and aptitudes essential for success in various sectors of the high-speed circuits and systems industry. Such students are aptly prepared to advance in further educational pursuits or to embark on careers in the high-speed circuits and systems domain.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The high-speed circuits and systems certificate is tailored to equip graduate students with the expertise needed to apply signal/power integrity and electromagnetic compatibility engineering principles to high-speed circuits and systems. This program aims to prime students for careers in the high-speed circuits and systems sector or analogous domains, as well as further graduate studies in high-speed circuits and systems. The department is already offering the stipulated courses for the high-speed circuits and systems certificate, and these courses are equipped with the necessary materials for certification. In addition, we intend to accentuate high-speed circuits and systems-specific subjects in homework tasks, classroom examples, and discussion sessions to highlight design and engineering tenets in high-speed circuits and systems and its associated fields. Consequently, we expect that the introduction of this certificate program will not impose any additional burden on the department.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

The following Student Outcomes will be applied specifically to assess the Biomedical Engineering Certificate.

(1) an ability to identify, formulate, and solve complex biomedical engineering problems by applying principles of engineering, science, and mathematics.

(2) an ability to communicate effectively with a range of audiences.

(3) an ability to recognize ethical and professional responsibilities in biomedical engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

(4) an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

By meeting these Student outcomes, student who complete a Biomedical Engineering Certificate will have a fundamental knowledge in biomedical engineering and be prepared to contribute to the field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Assessment activities include: 1) an evaluation of course outcome data (exams, grades, etc) as a part of our University accreditation progress, 2) Exit surveys of all Biomedical Engineering Certificate awardees at the time of graduation, and 3) Biomedical Engineering Certificate awardee post-graduation tracking.

How will you ensure that the assessment findings will be used to improve the program?

Continuous improvement is critical to the biological engineering program and those processes will be used to improve the Biomedical Engineering Certificate. Student Outcomes (as measured by specific course outcomes and exit surveys) will be reviewed annually and

shared with the biomedical engineering-focused course instructors. Corrective actions will be suggested when Student Outcomes are not achieved. We will “close the loop” by comparing the following years outcomes to prior scores to determine if the deficiencies have been addressed. Also, to improve the program, required certificate course offerings will be reviewed annually to determine if a course should be removed or a new course should be included.

What direct and indirect measures will be used to assess student learning?

Direct measures include assessments in the Biomedical Engineering Certificate-specified courses (homework assignments, exams, assignments, projects, and final course grades). Direct measures will also include an exit survey to be completed by all students that obtain the Biomedical Engineering Certificate. The survey will include a self-assessment of progress toward the learning outcomes as well as post-graduate destination in a biomedical-related field (e.g., graduate school, medical school, biotech industry, etc). Indirect measures will be tracking certificate awardees post-graduation using UI survey data and LinkedIn to determine longer-term biomedical engineering career outcomes.

When will assessment activities occur and at what frequency?

Data from the Biomedical Engineering Certificate required courses are collected each semester they are offered and evaluated against the Student Outcomes. Required courses are reviewed annually. Exit surveys will be administered to all Biomedical Engineering Certificate awardees at the time of graduation. Survey data will be reviewed each semester and graduates will be tracked annually to determine longer-term biomedical engineering career outcomes.

Student Learning Outcomes

Learning Objectives

The following Student Outcomes will be applied specifically to assess the Biomedical Engineering Certificate.

- (1) an ability to identify, formulate, and solve complex biomedical engineering problems by applying principles of engineering, science, and mathematics.
- (2) an ability to communicate effectively with a range of audiences.
- (3) an ability to recognize ethical and professional responsibilities in biomedical engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- (4) an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

By meeting these Student outcomes, students who complete a Biomedical Engineering Certificate will have a fundamental knowledge in biomedical engineering and be prepared to contribute to the field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Biomedical engineering professions are rapidly growing, and there is a critical need to train the next generation of biomedical engineers. The U.S. Bureau of Labor Statistics (BLS) projects biomedical engineering employment to grow by 5% from 2022 to 2032, which is faster than average for all occupations. The BLS projects 1,200 job openings for biomedical engineers each year, over the next decade. (<https://www.bls.gov/ooh/architecture-and-engineering/biomedical-engineers.htm>). Furthermore, undergraduate student interest in biomedical engineering is high with an average of 70% of incoming biological engineering undergraduate students expressing interest in biomedical engineering and/or medical professions. While many recent biological engineering graduates are in biomedical engineering industries, we anticipate that a biomedical engineering certificate will make this degree track even more attractive to potential students as well as support the growing industry need. This certificate also helps to highlight the currently offered biomedical engineering-focused courses at University of Idaho and counteracts the biomedical engineering minor and certificate that is offered in the Department of Mechanical and Biomedical Engineering at Boise State University.

No curricular changes nor additional teaching load is being proposed for this certificate. This 12-credit Biomedical Engineering Certificate is developed based on the courses already routinely offered in the BE program, College of Engineering and across campus. Assessments will occur as part of the BE program’s annual review and University accreditation. Thus, there is no additional workload.

546 Program Description:

Biomedical Engineering certificate is a set of biological engineering courses focused to integrate engineering principles with biological and medical sciences to drive innovation in healthcare. Students gain expertise in areas like biomaterials, medical imaging, and biomechanics taking elective courses with hands-on activities. The certificate holders are prepared to lead advancements in healthcare by integrating engineering and biology to create solutions that enhance quality of life. By choosing from list of approved courses, students will be better prepared to pursue in areas such as tissue engineering, biomaterials, bio-mechatronics, biomimicry, medical image processing, prosthesis, computer vision, genetic engineering, and designing new drugs.

Financial Information

What is the financial impact of the request?

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

The program will require hiring several new tenure track faculty members and one clinical faculty member, primarily to mentor the additional PhD students, but also to support additional specialized, topics courses in specific research areas. The program will require two additional IT staff members to support additional secure computing systems required for expanded research programs. The program will require larger video-conference classrooms to accommodate larger class sizes on all three campuses (Moscow, Coeur d'Alene, and Idaho Falls). The program will require additional TAs to recruit and support graduate students - the majority of graduate funding will be from research grants, but for recruiting and funding gaps a minimal number of funded TAs are needed. The full budget form is attached.

Curriculum:

Students will learn the foundations of cybersecurity theory and application as well as the interaction between the two. By understanding the extent and limitation of current knowledge in cybersecurity, the graduate will learn to understand what issues are important and why. Students will acquire the methodological skills to resolve important open problems and tackle challenging new projects. Students will learn to present problems and solutions both orally and in writing. For examples of active research areas, please visit the Computer Science Department's website (<https://www.uidaho.edu/engr/departments/cs/>).

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Coeur d'Alene
Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Graduates of the program will have an ability to:

1. Ability to clearly present, in oral form, research results and the broader implications of that research for both the field of cybersecurity and for society.
2. Ability to clearly present, in written form, research results and the broader implications of that research for both the field of cybersecurity and for society.
3. Ability to do original research in cybersecurity and to appropriately and accurately analyze the results.
4. An in-depth knowledge of cybersecurity and the ability to apply that knowledge, integrating and building upon the foundation provided by a relevant undergraduate degree.
5. Demonstrate an understanding of the broader implications of research for cybersecurity and for society.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

There are three main methods by which student outcomes are assessed, divided into direct and indirect measures:

1. Student Work from: CYB536 Advanced Information Assurance, CYB540 Network Security, and CYB520 Computer and Network Forensics. Direct measure of knowledge of content material and skills.
2. Student Work from: CYB501 Cybersecurity Seminar. Direct measure of knowledge of the societal impact of cybersecurity and professional ethics.
3. Rubrics completed by each students' major professor and committee members at the time of their project presentation or thesis defense.
4. Publication and related research activities of each student,

Each of these measures are described in more detail below. Faculty review and discussion of these measures is a critical part of the overall assessment process and faculty input is included in the analysis of the measures. Faculty review takes place during department meetings in the spring semester and during the department retreat every fall.

Student Work

Faculty select representative material from the courses, potentially including assignments, projects, quizzes, exams, presentations, etc., with which to assess the student outcomes.

Committee Rubrics

A rubric is completed by each student's major professor and committee at both the proposal defense and the final dissertation defense. The rubric consists of five categories each of which is marked as either:

- Exceeds Requirements (4)
- Meets Requirements (3)
- Partially Meets Requirements (2)
- Does Not Meet Requirements (1)

The categories are:

U of I Outcome: Learn and Integrate, Students work shows an in-depth knowledge of the degree subject matter.

U of I Outcome: Think and Create, Student has demonstrated the ability to do original research and to appropriately and accurately analyze the results.

U of I Outcome: Communicate, Written Communication: has produced a clear, meaningful document.

Oral Communication: has produced a clear, meaningful presentation and responded well to questions.

U of I Outcome: Clarify purpose and perspective; Citizenship, Student has demonstrated an understanding of the broader implications of that research for both the field and society.

Finally, the measures of student obtainment of the outcomes are discussed during faculty meetings in the spring as the data become available – direct measure of student performance in class is normally measured in the fall classes. In addition, the entire curriculum is reviewed both in the spring as part of the meeting with the department's Industrial Advisory Board and in the fall as part of the department's annual retreat.

How will you ensure that the assessment findings will be used to improve the program?

As noted above, the measures of student obtainment of the outcomes will be discussed during faculty meetings in the spring as the data become available – direct measure of student performance in class is normally measured in the fall classes. In addition, the entire curriculum is reviewed both in the spring as part of the meeting with the department's Industrial Advisory Board and in the fall as part of the department's annual retreat.

What direct and indirect measures will be used to assess student learning?

As noted above, the direct measures are:

1. Student Work from: CYB536 Advanced Information Assurance, CYB540 Network Security, and CYB520 Computer and Network Forensics. Direct measure of knowledge of content material and skills.
2. Student Work from: CYB501 Cybersecurity Seminar. Direct measure of knowledge of the societal impact of cybersecurity and professional ethics.

The indirect measures are:

3. Rubrics completed by each students' major professor and committee members at the time of their project presentation or thesis defense.
4. Publication and related research activities of each student.

When will assessment activities occur and at what frequency?

Assessment activities will occur every semester. The assessment data based on student coursework is collected when the courses are taught. The assessment data based on committee rubrics and student research accomplishments are collected at the time of the proposal defense and the final defense. The curriculum, in the context of the assessment data, is reviewed during the fall department retreat, by the faculty and Industrial Advisory Board (IAB) during the IAB meeting in the spring, and by the faculty at several points in the spring semester during faculty meetings - particularly in the context of determining the following year's courses.

Student Learning Outcomes

Learning Objectives

Within a few years of graduation graduates of the program will be advancing in their chosen career path and benefiting society by:

1. identifying, formulating, and solving cybersecurity problems through application of their knowledge of cybersecurity, mathematics, computer science, and the scientific method in their chosen career path, and will be continuing to expand their awareness of the role of cybersecurity in multiple disciplines;
2. equip students with the skills and knowledge to conduct in-depth analysis of sophisticated cyber threats, develop novel threat detection techniques, and design effective mitigation strategies, including modeling, designing, implementing and verifying cybersecurity systems to meet specified requirements, security parameters, and real-world constraints;
3. communicating effectively with team members, constituents, and/or the public;
4. continuing the process of life-long learning by further extending their knowledge and professional capabilities;
5. contributing to society through active engagement with professional societies, schools, civic organizations or other community activities;

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

There is a major unmet need for cybersecurity professionals. These professionals help businesses protect their assets from cyber criminals. Untrained individuals spend more time and effort, and therefore more corporate resources, developing less than ideal solutions. A trained cybersecurity professional will be able to get the work done with less effort and fewer resources. Furthermore, our

economy and critical infrastructures are today very dependent on digital and computer-based systems. Adequately protecting such systems is of paramount and essential importance, and a likely a prerequisite, for a healthy economy in the State of Idaho and the Nation.

The educational pressure created by this unmet need is strongly felt on the UI campus. UI introduced a BS in Cybersecurity three years ago, in Fall 2020; it now has 119 majors. We introduced the MS in Cybersecurity, two years ago, in Fall 2021, it now has 12 majors. Additionally of the 42 Ph.D. and 24 MS students pursuing CS degrees roughly half are working on cybersecurity research projects. This rapid growth is driven by the enormous need for cybersecurity professionals of all levels, which this degree would help to fill. Thus, there is a clear need that we are in an ideal position to full.

Additionally, the proposed program will strengthen several existing programs. The BS and MS programs in Cybersecurity will be improved by the addition of more faculty with expertise in cybersecurity. It will improve the diversity of courses available, increase opportunities for undergraduate research, and expand the existing cybersecurity ecosystem at UI. Having a PhD program in cybersecurity will further increase the attractiveness of the BS and MS programs in both cybersecurity and CS by creating a pathway to a cybersecurity PhD, thereby helping to grow enrollment.

The increased breadth of research will improve cross campus collaborations, allowing the cybersecurity faculty to better support and integrate with other disciplines that include cybersecurity aspects such as business, law, and political science. Overall, the synergies created by the program will improve the quality and productivity of existing programs.

As noted above additional faculty and IT support will be need to manage the added workload, particularly as it applies to increased graduate student mentoring, increased research, and the concurrent need for additional IT support for cybersecurity labs.

Reviewer Comments

Linda Lundgren (lindalundgren) (Wed, 04 Oct 2023 00:24:05 GMT): 10/3/23: Program description uploaded.

Mary Stout (mstout) (Thu, 05 Oct 2023 01:16:57 GMT): 10/4/23 Mary Stout removed IDF from CIM location which is consistent with uploaded proposal. Not offering in IDF at this time due to III.Z. of SBOE.

Theodore Unzicker (tunzicker) (Tue, 28 Nov 2023 18:33:28 GMT): Proposal still lists Idaho Falls as a location degree if offered. However, Mary Stouts comments indicate it should have been removed. Waiting for clarification from Terry and Mary.

Sydney Beal (sbeal) (Tue, 30 Jan 2024 22:38:31 GMT): Added program description with the first three sentences removed and edited electives line per UCC 1-29-24 meeting

Program Description for Cybersecurity PhD

A graduate degree in cybersecurity from UI prepares a student for a lifetime of discovery. It enables the graduate to advance the state of the art in cybersecurity, not merely to keep up with it. The graduate program develops the student's critical thinking, investigatory, and expository skills. The student will learn the foundations of cybersecurity theory and application as well as the interaction between the two. By understanding the extent and limitation of current knowledge in cybersecurity, the graduate will learn to understand what issues are important and why. Students will acquire the methodological skills to resolve important open problems and tackle challenging new projects. Students will learn to present problems and solutions both orally and in writing. For examples of active research areas, please visit the Computer Science Department's website.

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://www.uidaho.edu/governance/policy>

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Faculty Staff Handbook (FSH)

Addition Revision* Deletion* Interim Minor Amendment
Policy Number & Title:

Administrative Procedures Manual (APM) 45.08

Addition Revision* Deletion* Interim Minor Amendment
Policy Number & Title: **APM 45.08 COST SHARING ("MATCH") ON SPONSORED PROJECTS**

*Note: If revision or deletion, request original document from ui-policy@uidaho.edu. All changes must be made using "track changes."

Originator: Sarah Martonick

Policy Sponsor, if different from Originator: Chris Nomura, VPRED

Reviewed by General Counsel Yes No Name & Date: Manisha Wilson, 6/30/23

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

This policy is being updated to reflect new compliance requirements and accounting standards that govern sponsored funding, primarily from 2 CFR 200, but also the University changes from Chart 9 to Chart V fund-based accounting and the use of Banner to manage cost share companion accounts.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

APM Chapter 45

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

To be effective as soon as practical.

45.08 -- Cost Sharing ("Match") on Sponsored Projects

December 2018

A. ~~General Purpose.~~ ~~Identifying university policies on~~ This policy regulates offering, providing, and reporting on cost sharing.

B. Scope. This policy covers all proposals where cost share towards project expenses is being offered by the University, as well as any sponsored project awards with cost share completion and reporting requirements. ~~Some sponsored projects require the University and/or third parties to contribute a portion of the project costs. Such contributions are known as "cost sharing" or "match." The requirement for cost sharing or matching funds is an indication that contributions beyond those provided by the sponsor are necessary to fulfill the objectives of the project. Once included in a proposal and confirmed in its corresponding award document, cost share becomes a binding obligation of the University and must be contributed towards the fulfillment of the project.~~

CB. Definitions:

C-1. Cost sShare. ~~When a sponsored project includes University and/or third parties contributing a portion of the project costs, such contributions are known as "cost share" or "match." The requirement for cost sharing or matching funds is an indication that funding beyond that provided by the sponsor is necessary to be able to fulfill the objectives of the project. Once included in a proposal and confirmed in its corresponding award document, cost share becomes a binding obligation of the University and must be provided towards the fulfillment of the project. There are three types of cost share:~~

B-1-a. Mandatory cCost sShare. e ~~That~~ ~~portion of the University contribution to a sponsored project which is required by the terms of the project, typically noted in the Request for Proposal (RFP) or Funding Opportunity Announcement (FOA) or similar document.~~ ~~Any mandatory cost share must be included in the proposal in order for the proposal to receive consideration by the sponsor.~~

B-2-b. Voluntary cCommitted cCost sShare. : ~~Resources that are committed and budgeted for in a sponsored agreement, but that would are not be required by the sponsor in order for a proposal to be considered. Although not required by the sponsor, this cost share is a binding commitment and is tracked by the University. [rev. 3-13]~~

B-3-c. Voluntary uUncommitted cCost sShare. : ~~The voluntary contribution of institutional resources, including faculty effort, that is over and above the mandatory or voluntary committed cost share. Such cost sharing is not required by the sponsor as a condition of the award and is not quantified in the project budget or other proposal application (proposal) form(s, but) but is expended by the University. An example of voluntary uncommitted cost share is "The University of Idaho project director -will have direct oversight on the project. provide lab space to conduct this research". This is listed in the proposal, but since there is no quantified amount listed, it is not tracked by the University. [rev. 3-13]~~

DE. Policy. ~~Due to the effect of cost sharing on the Facilities and Administration (F&A) rate, it is the position of the Office for Research and Economic Development (ORED) that wW~~ ~~hen cost sharing is required by the agency, only the minimum cost share necessary to satisfy the requirement may will be offered to the sponsoring agency. Requests to offer more than the minimum cost share required by a sponsor must be authorized by the unit administrator, college dean and the VP for Research and Economic Development or delegatesignee. Voluntary committed cost share is generally prohibited. Only in rare circumstances will voluntary committed cost share be authorized, and such authorizations must be provided by the unit administrator, college dean and the VP for Research and Economic Development.~~

Note that Federal funding sources and other sponsored projects (Fund Type 22) generally ~~cannot~~ may not be used for cost sharing or matching purposes. This includes all Smith-Lever, Hatch, or other federal funds appropriated to the University. The Office of Sponsored Programs (OSP) will provide notification of any required cost sharing at the start of a project and with any subsequent funding authorizations. *fed. 12-18*

ED. Process/Procedures:

ED-1. Allowable/unallowable expenses. If cost share has been approved on a project, the following ~~guidelines-requirements~~ apply to what are allowable and ~~unnon~~-allowable expenses for cost share purposes. Note that in order to be ~~used-provided~~ as cost share, any such expenses must ~~occur~~ be incurred during the project period.

a.) Items unallowable as direct costs. An expense must be allowable as a direct cost to the project if it is to be used as cost share. One common exception is when the agency stipulates that indirect costs are unallowable but that any all or a portion or all of the unrecovered indirect costs may be used as cost share. Unrecovered indirect costs are the indirect costs that are not chargeable to an award due to sponsor limitations on the indirect rate.

b.) Equipment and office space. Existing equipment and office space on any University-owned or ~~leased~~ property is part of the University's indirect cost rate calculation, and ~~cannot~~ may not be used as cost share.

PIs should be aware that when preparing proposals for sponsored agreements they cannot commit the use of ~~U~~University-owned or government-owned equipment as cost share. They can, however, characterize the equipment as "available for the performance of the project at no direct cost to the project."

Proposals which include the acquisition of special-purpose equipment as a direct cost may include an offer of ~~University~~University funds to pay for all or part of the cost of such equipment. These proposals may be for equipment or instrumentation grants, where the purpose of the grant is to buy equipment and the University is required to share the cost with the sponsor, or research-oriented sponsored projects where the purpose of equipment required for the research is an allowable expense included in the award. Note that the purchase and acquisition must occur during the period of performance. The portion of the purchase price paid by the University must be charged directly to a cost sharing ~~account~~ index in support of the award.

c.) Waiver of indirect costs on cost-shared items. The indirect costs associated with other cost-shared items may be used as matching ~~funds, if~~ funds if indirect costs are allowed by the granting agency.

d.) Employee salaries. If an employee's salary has been committed as cost share on a project, their salaries must be charged to the cost share index for the project and they must complete a periodic are required to complete ~~e~~Effort ~~r~~Reports to verify the actual effort working on the project. ~~s~~See APM 45.09. *fed. 3-13, rev. 12-18*

e.) Third-party cost share allowances. At the proposal stage an itemized letter of commitment signed by an authorized organizational representative is required if any portion of the cost share is being funded by a third party (or parties). After the fact documentation will be required from each third party if the project is awarded. Such documentation must certify that the cost share in the letter of commitment was provided to support the project and that none of the cost share was paid out of federal funds. I

This documentation must be signed by someone ~~in~~ at the appropriate level of authority ~~at~~ in the ~~third-party~~ third-party organization. *[rev. 3-13]*

~~ED-2. Reports Provided by OSP.~~ ~~OSP prepares and will provide on request the following reports concerning cost sharing requirements: The Argos Cost Share Report (Finance, Production, Departmental Financial Reporting, Sponsored Programs Reports, Cost Share Report)~~ is the official cost share report location.

~~a)~~ ~~Cost Sharing Report: Available for each budget project with a cost sharing commitment. This report lists the detailed cost share expenses reported to OSP to date and is provided to each unit at least once a semester and when changes occur.~~

~~b)~~ ~~Cost Sharing Report by College: Lists both active and terminated accounts with cost share commitments. Details the matching amount required, the accumulated amount matched, and the balance remaining to match. Sent upon request.~~

~~c)~~ ~~Termination Report: Details the unmet cost share commitment. This report is sent to the unit at the close date of the project.~~

~~ED-3. Unit Responsibilities.~~ ~~The PI and unit should regularly review the cost-share indexes to make sure they are meeting their cost share obligation in a timely manner. ing reports, and notify OSP immediately if discrepancies exist. If operating expenses, temporary employee pay, and/or travel expenses are being used as match, the unit must provide OSP with the expense document numbers, dates, and budget(s) those expenditures were charged to on a regular basis. If the entire obligated cost share is not submitted by the PI and unit 15 days prior to the date the final financial report is due to the sponsor, the amount of direct expenditures allowed on the sponsored project must be reduced. The unit must transfer expenses off the sponsored project so that the cost share submitted meets the required proportion to the direct expenses as obligated in the award document. [rev. 3-13]~~

~~FE. Contact Information.~~ Further questions regarding cost sharing should be addressed to the Office of Sponsored Programs, (208) 885-6651 or osp@uidaho.edu. FAQs on cost sharing and other sponsored programs can also be found on the [OSP website](#).

UNIVERSITY OF PHOENIX SURVEY RESULTS

In Fall of 2023, Faculty Senate formed a task force to develop a survey to assess employee sentiments regarding the University of Idaho/University of Phoenix Affiliation. The survey was sent via email to all UI employees in late November of 2023 and remained open for two weeks. Reminders were sent out in the UI Daily Register to encourage completion. 723 employees responded to the survey: 367 identified as staff members, 244 as faculty, and 122 chose not to indicate their status.

In what follows we share findings from each of the survey questions in turn and present the overall results, results divided by employee type, and results separated by self-reported level of knowledge about the affiliation.

We also share examples of the most common themes we identified in the qualitative data. A full list of qualitative responses, with identifying information removed, is available upon request (contact khaltinner@uidaho.edu). Note: there are over 130 pages of qualitative data. What we present here is not exhaustive, but simply examples of common themes.

****Note on this version**** Please recognize this is a draft. It includes data from the quantitative questions and the following qualitative questions.

Based on my understanding of the Constitution of University Faculty, APM 60.21, the role of staff, and the role of shared governance at the University of Idaho, I believe that university employees were appropriately involved in the decision to affiliate with the University of Phoenix as determined by existing University of Idaho policies.

I believe the University of Phoenix affiliation will impact my unit in the following ways:
What information or explanation would be helpful to you in understanding the implications of the University of Phoenix affiliation for your unit?

The University of Idaho's affiliation with the University of Phoenix will provide support for the University of Idaho as we approach the projected decreases in enrollment based on demographic shifts (i.e., the "enrollment cliff").

Based on my current understanding, I believe the University of Idaho's affiliation with the University of Phoenix might have a positive impact on the University of Idaho.

Based on my current understanding, I believe the University of Idaho's affiliation with the University of Phoenix might have a negative impact on the University of Idaho.

The FAQ was helpful in answering my questions about the affiliation.

We continue to code and analyze the qualitative data from the following questions and will return to Faculty Senate with these additional findings.

What recommendations do you have for improving the FAQ?

I see the following as potential concerns of this affiliation (please specify if selected)

I see the following as potential benefits of this affiliation (please specify if selected)

Moving forward, on which topics related to the affiliation would you like to give input?

What else would you like to share with Faculty Senate about your thoughts regarding the University of Idaho and University of Phoenix affiliation?

What remaining questions do you have about the University of Phoenix affiliation?

DRAFT

EXECUTIVE SUMMARY

Respondents were slightly more supportive of the affiliation between the University of Phoenix and the University of Idaho than unsupportive (52% vs. 23% opposed and 25% unsure or neutral). Staff-identified respondents support the initiative more than faculty (61% vs. 50%). People with higher levels of self-reported knowledge about the affiliation support it more than people with lower levels of self-reported knowledge (66% vs. 33%).

45% of faculty-identified respondents generally felt that there should have been greater engagement with employees in the decision-making process than there was (33% perceived adequate involvement, 35% were neutral or unsure). 55% of staff-identified respondents generally indicated they thought the engagement was sufficient (27% disagreed, 39% were neutral or unsure).

46% of respondents anticipate an impact on their unit (ranging from things like an increased in access to resources and potential enrollment increases to concerns about the impact of any financial risk or reputational risk to UI) and would like greater discussion and information regarding the nature of this impact.

Respondents also anticipate an impact on the university (53% positive, 31% negative). These range from positive (financial gain, protection during an anticipated enrollment cliff, etc.) to negative (UI's reputation, UI's financial risk, etc.).

52% of respondents felt the FAQ was helpful, 12% disagreed, 36% were unsure or neutral.

The most common questions employees continue to have are regarding a) the anticipated timeline, b) the use of this proposed new source of funds, c) any anticipated impact on their specific programs, d) any anticipated impact on duplicated programs, e) the financial and reputational risks to UI and relevant solutions.

KNOWLEDGE

Two questions were asked to assess the understanding survey-takers had with regards to the affiliation:

In your opinion, how knowledgeable are you about the University of Phoenix and its programs?

In your opinion, how knowledgeable are you about the details of the affiliation with the University of Phoenix?

Roughly 46% of respondents self-report being knowledgeable about the University of Phoenix and its employees (3% unsure/no response; 51% not knowledgeable). In contrast, 61% of respondents report being knowledgeable to some degree about the affiliation (2% unsure/no response; 36% not knowledgeable).

Of the respondents that identified as faculty, 43% reported being fairly knowledgeable and 8% very knowledgeable about the University of Phoenix and its programs, while 37% of respondents identifying as staff reported being fairly knowledgeable and 7% very knowledgeable in this area. With regards to the affiliation itself, 50% of faculty-identified respondents reported being fairly knowledgeable/14% very knowledgeable and 52% of staff-identified respondents reported being fairly knowledgeable/10% very knowledgeable.

DEGREE OF SUPPORT

Overall support for the affiliation between the University of Idaho and the University of Phoenix was measured with the following survey question:

To what degree do you support the University of Idaho affiliation with the University of Phoenix?

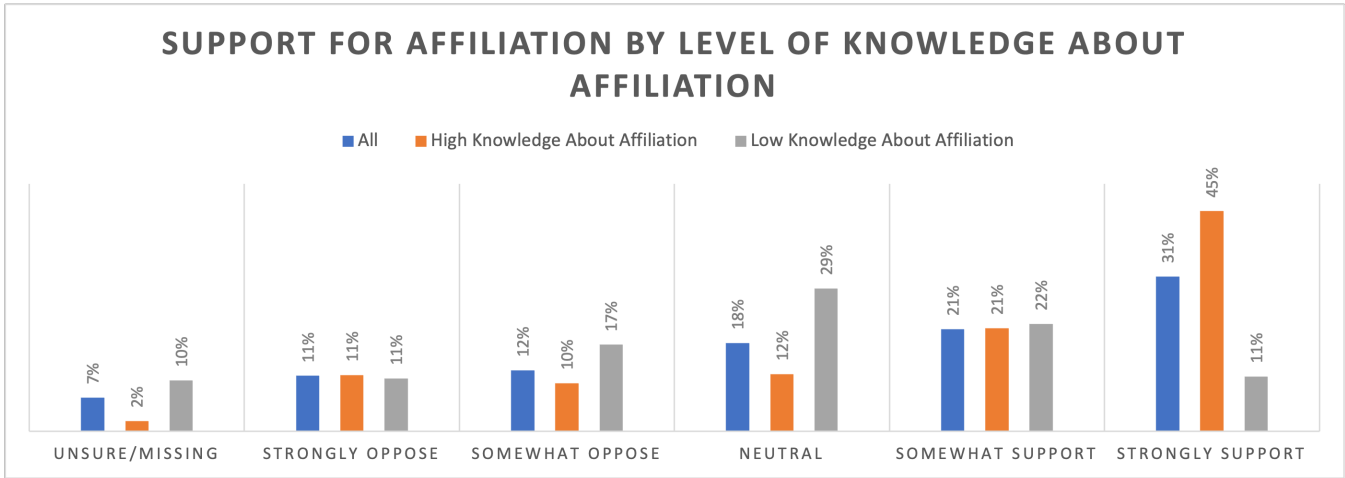

More respondents support the affiliation than oppose it. Results show that 52% of all surveyed employees either somewhat or strongly support the affiliation while 23% of respondents either strongly or somewhat oppose. When considering employee type, staff support the affiliation more than faculty (61% vs. 50%).

Across employee type, 61% of respondents identified as staff support the affiliation overall, while 50% of identified faculty expressing support for the affiliation. Sixteen percent of identified staff reported opposing the affiliation overall (23% neutral or unsure), and 33% of identified faculty reported opposing the affiliation (18% neutral or unsure).

Across self-reported knowledge level, 46% of respondents with a high level of reported knowledge support the affiliation, 21% oppose the affiliation, and 14% are neutral or unsure. Of respondents with a low level of knowledge about the affiliation, 33% support the affiliation, 28% oppose the affiliation, and 39% are unsure or neutral about the affiliation.

DRAFT

EMPLOYEE INVOLVEMENT IN DECISION

Quantitative Information

Overall sentiment regarding respondents' sentiments on the topic of employee involvement in the decision to affiliate was measured with the following survey question:

Based on my understanding of the Constitution of University Faculty, APM 60.21, the role of staff, and the role of shared governance at the University of Idaho, I believe that university employees were appropriately involved in the decision to affiliate with the University of Phoenix as determined by existing University of Idaho policies.

Constitution of University Faculty:
<https://www.uidaho.edu/governance/policy/policies/fsh/1/1520>

Administrative Procedures Manual (APM 60.21):
<https://www.uidaho.edu/governance/policy/policies/apm/60/21>

Staff Council: Council <https://www.uidaho.edu/governance/policy/policies/fsh/1/1800>

Shared Governance: <https://www.uidaho.edu/governance>

[Mark your answer, provide details in the text boxes if desired.]

Overall, respondents were divided in whether university employees were appropriately involved with the decision to affiliate with the University of Phoenix. Of recorded responses, 36% of all respondents disagreed (either somewhat or strongly) with this statement, 30% agreed (either somewhat or strongly), and 35% of respondents were either “unsure” or “neutral” in their opinion.

Of identified faculty, 45% of respondents disagreed that there was adequate involvement from employees and 33% agreed that there was adequate involvement. Of identified staff, 27% disagreed that employees were adequately involved, 55% agreed that employees were adequately involved, and 39% reported as being neutral or unsure about adequate involvement.

UI EMPLOYEES ADEQUATELY INVOLVED IN DECISION

Qualitative Information

Nuanced information regarding respondent's perspectives regarding employee involvement in the affiliation decision were assessed using fill in text boxes and the same question as above.

In reviewing the qualitative responses regarding employee involvement of the process, we identified 12 themes (see textbox) that varied based on the degree to which the respondent agreed with the question above. Here we present the two most common theme amongst each group of respondents.

12 Identified Themes:

Theme 1: We weren't involved

Theme 2: We should have been involved – general

Theme 2a: We should have been involved – policy

Theme 2b: We should have been involved – values/culture

Theme 3: We were lied to/this undermined trust

Theme 4: Nothing could have been done differently

Theme 5: There are ethical concerns with this process

Theme 6: Communication/ involvement was sufficient

Theme 7: Employees shouldn't be involved

Theme 7a: Employees shouldn't be involved, but...

Theme 8: Problem with the question/unclear response

Theme 9: Employees need more information to be involved

Theme 10: Apathy

Theme 11: I'm not sure/need more information

Theme 12: I trust President Green/the administration

Among participants who responded “**strongly disagree**,” the most common theme included statements that affirmed a lack of employee involvement.

- Most people were not aware until after a purchase agreement was already done.
- We've only been recipients, not participants.

The second most common theme included arguments that university policy dictates employees should have been involved in the process:

- Based on the faculty's responsibility to assist in major budgetary decisions and university reorganizations, per FSH 1520.4.10 & 1520.4.12, I don't think we faculty were appropriately involved in the decision to affiliate with U Phoenix, since to my knowledge we were not involved in the decision at all!

- The Constitution states the following: “the university faculty advises and assists the president and the regents in establishing, reorganizing, or discontinuing major academic and administrative units of the university, such as colleges, schools, intracollege divisions, departments, and similar functional organizations.” (Section 12. Organization of the University) Even if UPhoenix is not a part of UI Idaho, UI Idaho's proposed affiliation with UPhoenix seems sufficiently "major" to have warranted much better involvement of the faculty throughout the process.

As with the group who responded “strongly disagree,” the most common responses amongst those who “**somewhat disagree**” included statements affirming the absence of employee involvement:

- It was presented as kind of as "alright, this is happening".
- We heard about it once it seemed like it was a done deal.

The second most common response among those who “somewhat disagree” included a sense that they had been deceived in some way or that their trust had been undermined:

- As most UI employees had zero knowledge of the acquisition until it was published in the news, it seems suspicious.
- I understand that administration can make decisions that does not align with faculty and staff input, or without input altogether. Due to this being a Non-Disclosure agreement, it really limited involvement and seemed to provide a reason to distrust administration; what other decisions will be made behind closed doors without input, what else will be through an NDA?

Among participants who responded “**neutral**,” the most common theme was a sense that they needed more information to have a clear opinion:

- I don't know enough to have an opinion. I was surprised by the announcement as we hadn't heard anything previously, but understand that it likely needed to be kept quieter to stop another party from trying to step in and offer more than we were for the deal.
- I don't have enough information to make a full opinion on this. If there were other bidders in the process, then the actions make sense. If UI was the sole bidder then the university should of been more open earlier on

The second most popular theme amongst those who responded “**neutral**” included the perception that faculty shouldn't have been involved or were sufficiently involved:

- I think if higher admin wants to do something, it doesn't matter much what anyone else at the institution thinks.
- I don't feel that lower-level staff employees like myself were considered or consulted. That said, I'm not sure that decisions on this level need my input.

Among participants who “**somewhat agree**” that employees were adequately involved, the most common themes included statements that faculty were not involved and a perception that they shouldn't have been involved.

- It really was a done deal by the time we heard about it.

- The announcements indicated 'we are' rather than 'we are contemplating' which feels like the decision was made prior to seeking input
- My understanding of shared governance is it doesn't extend to decisions like these. What comes next is absolutely subject to shared governance protocols.
- It was a business deal and as such needed to be conducted prior to informing the public

Finally, among participants who “**strongly agreed**” that employees were adequately involved, the most common themes included a sense that employees shouldn’t have been involved:

- Its [sic] an affiliation with a private organization, so it shouldn't have been publically [sic] debated.
- We have positions at the university with different responsibilities. The role of administrators is to ensure we remain solvent and have a place to come to work. As faculty, I have no business telling them how to run the financial side of the institution. With the impending enrollment cliff, I view this affiliation as a smart business decision.

The second most common theme was an expression that communication on the affiliation was sufficient:

- The engagement has been extensive once the affiliation was announced. We are fortunate to have leaders that are taking control of the institutions [sic] future and diversifying revenues in a time of uncertain state funding.
- I think the administration did a great job in discussing and sharing information about the affiliation really, the decision is in the hands of the executive leadership. I think President Green has done his utmost to engage all stakeholders, internal and external, with the arrangement.

ENVISIONED IMPACT ON UNITS

Quantitative Data

Overall sentiment regarding respondents' perspectives on the ways their unit will be impacted by the affiliation were assessed with the following question:

Based on my current understanding, I believe that the affiliation with the University of Phoenix will impact my unit.

Respondents generally agreed with the statement that the affiliation would impact their units: 46% somewhat or strongly agreed, 43 percent were unsure or neutral, and 11% either somewhat or strongly disagreed. This is especially true of faculty, 54% of identified faculty somewhat or strongly agree that their unit will be impacted by the affiliation. Of identified staff, 44% somewhat or strongly agree that their unit will be impacted, and 52% report being unsure or neutral about envisioned impacts on their units.

The majority of respondents with high self-reported knowledge about the affiliation were more likely to either somewhat or strongly agree that the affiliation would impact their unit (52%), with 36% reporting being unsure or neutral about potential impacts. Of respondents with low-reported knowledge about the affiliation, 39% agreed that there would be some impact on their unit, 14% disagreed that there would be any impact, and 49% reported as being unsure or neutral about potential impacts on their unit.

Qualitative Data

There were a vast number of responses indicating participant's sense of the impact of the affiliation on their unit. These were assessed with the following question:

I believe the University of Phoenix affiliation will impact my unit in the following ways:

Here we present the three most commonly expressed hopes and three most commonly expressed concerns.

The most common hope was the potential for access to improved technology and online course tools:

- I am hoping it improves our online resources.
- Improve our ability to offer online courses that are more interactive and improve the level resources we have for strategic investments.

The second and third most common hopes each had 23 responses. One was the sense that the affiliation would have a positive impact on revenue and resources:

- positive impact of new funding for curriculum, faculty and instructors
- Positively -- more financial resources and opportunities for students

The third was the perspective that the affiliation could increase enrollment and outreach opportunities:

Identified Themes:

Theme 1: Positive, general

- Theme 1a: Positive, technology/online resources/teaching*
- Theme 1b: Positive, other services/hopes*
- Theme 1c: Positive, revenue/resources*
- Theme 1d: Positive, shared knowledge/collaboration*
- Theme 1e: Positive, increased enrollment/outreach*
- Theme 1f: Positive, multiple aspects*
- Theme 1g: Positive, other*

Theme 2: Unclear responses given the question

Theme 3: Negative, general

- Theme 3a: Negative, quality/course offerings*
- Theme 3b: Negative, financial (university and individuals)*
- Theme 3c: Negative, reputation*
- Theme 3d: Negative, multiple factors*
- Theme 3e: Negative, increased workload/time demands*
- Theme 3f: Negative, decreased enrollment/difficulty recruiting*
- Theme 3g: Negative, replaced/lower salaries/pressures on faculty/faculty recruitment*
- Theme 3h: Negative, other*

Theme 4: Neutral/unclear tone

Theme 5: Not sure

Theme 6: No or minimal impact

Theme 7: Questions

- It may increase enrollment in online degree programs already in place and recruitment of U of Phoenix students to enroll in U of Idaho online degree programs
- feeder program for new students; allowing students to complete general requirements before moving to campus

Among the concerns expressed, the most popular themes included the risk of injury to UI's reputation:

- It lends our good reputation to a school that has earned its poor reputation through improper activities and subpar student support.
- the bad reputation of the University of Phoenix will negatively impact the imago of the UI as a land grant state institution [sic]

This was followed by an expression of concerns regarding workload and time demands of employees.

- Increased expectations regarding faculty workload, further bloating of administrative positions.
- By draining the time and attention of the president, provost and other top administrators, less attention has been paid to needs and concerns of colleges and departments. Going forward, the time to oversee the acquisition (note that the three trustees of Four Three Education are UI officials) will further divert their time and attention.

The third most common expressed concern was the potential impact for redundant programs.

- Duplication of services, not cost effective. I don't believe the two universities will operate individually long term.
- I fear this is a thinly veiled plot to increasingly farm out course instruction to even lower paid adjuncts and to increasingly offer all courses in a predominantly online/virtual format. This will impact my unit through the loss of dedicated, fairly paid, on-site colleagues with a reasonable teaching load and scholarship activity

ENVISIONED IMPACT ON UNIVERSITY

ENROLLMENT CLIFF – QUANTITATIVE DATA

One of the common discussion points regarding the affiliation was the way it could protect the University of Idaho in the event of a predicted “enrollment cliff.” To assess the extent to which employees shared that perspective, we offered the following question:

The University of Idaho’s affiliation with the University of Phoenix will provide support for the University of Idaho as we approach the projected decreases in enrollment based on demographic shifts (i.e., the “enrollment cliff”).

The majority of respondents somewhat or strongly agreed that the affiliation will protect UI from the enrollment cliff (51%) than to not (17%), with 31% of respondents being unsure or neutral. Staff expressed greater agreement that the affiliation will protect UI from the enrollment cliff than faculty, with 59% of identified staff agreeing and 54 percent of identified faculty agreeing.

Respondents with high knowledge of the affiliation felt that it would protect UI from the enrollment cliff more than those with low knowledge (64% vs. 34%), but 47% of respondents with low-reported knowledge were either unsure or neutral if the affiliation would protect the UI from an enrollment cliff.

ENROLLMENT CLIFF – QUALITATIVE DATA

Nuanced details regarding respondent’s perspectives of employee involvement in the affiliation decision were assessed using fill in text boxes and the same question as above. Sixteen themes were identified and can be seen in the text box.

Among participants who responded “**strongly disagree**,” the two most common themes had the same number of responses. The first expresses a sense that the risks of affiliation are too high:

- Let the enrollment cliff happen. Partnering with a shady, for-profit school involved in recent lawsuits which involved students having their loans from them outright forgiven. It's a bad deal and liability.
- So we're buying a previously dysfunctional framework based upon getting student loan money from non-qualified borrowers, to run an actual university's online presense? [sic] This is lazy. Please hire staff to build and stop with the cost cutting

The second indicated a belief that there are other solutions to the enrollment cliff that come with lower risks:

- This is less of a risk for Idaho than places on the east coast. We are overresponding. Also, based on empirical data, moving to more hybrid classes seems like a better option. It's what students want.
- Green and UI officials have not been specific about when the U of I will reach "the cliff" and the potential impact on enrollment; UI officials have not described in details other strategies for maintaining a stable enrollment WITHOUT buying University of Phoenix. Specifically, what is/was our recruiting and retention strategy for 2025-2030, absent University of Phoenix's acquisition?

Among participants who responded “**somewhat disagree**,” the most common theme reflected a sense that the University of Phoenix is not a good choice for affiliation if the goal is to avoid negative effects of the enrollment cliff:

- How is UPhoenix immune from the cliff?
- Where's the evidence of this? how can a business that's failing provide financial support? especially if, technically, UofP is independent from UI?

The second most common theme is the perspective that, given the message that the affiliation is not supposed to impact UI, then it would also not protect us from the enrollment cliff:

Identified Themes:

- Theme 1: Fears about enrollment cliff are unjustified or overdone*
- Theme 2: Affiliation will lead to a decrease in enrollment*
- Theme 3: There are other solutions to consider*
- Theme 4: The affiliation comes with risks (financial and otherwise)*
- Theme 5: The University of Phoenix is not a good bet*
- Theme 6: The affiliation is not supposed to impact UI*
- Theme 7: Fear of the enrollment cliff is being used to justify this*
- Theme 8: It won't help*
- Theme 9: Need more information*
- Theme 10: It might help*
- Theme 11: It should/will help*
- Theme 12: There are other things we should focus on*
- Theme 13: Questions*
- Theme 14: Neutral Comments*
- Theme 15: This will expand our student base*
- Theme 16: Positive, other*

- There is such an emphasis on stating that the two institutions are separate, that I'm not sure it will help. If it is not a merger, how are we gaining any benefit from Phoenix's programs?
- It is not clear how this helps us cope with the enrollment cliff while we are two separate institutions.

Among participants who responded “**neutral,**” the only theme that had multiple respondents was the perspective that we need more information to assess this question:

- Don't feel like I've been given enough information to determine this. It's been presented as a "trust us" statement. I'd like to see some real, thorough, independent analysis.
- I'd like to see statistics backing up or contradicting this statement.

Among participants who responded “**somewhat agree,**” the theme with the most responses is the perspective that the affiliation might help in this circumstance:

- Possibly. At the very least, it's a logical assumption to make.
- It depends on what the partnership looks like and the outcomes.

The second most common response is the sense that we should focus on other aspects of UI to prepare for a potential enrollment cliff:

- I think the complement to enrollment cliff is a bonus; as the land grant university, we should ALREADY be strategizing about lifelong learning, workforce needs, etc
- I think UI is in a strong position regarding [sic] the supposed enrollment cliff. UI might be able to learn from distance learning techniques & tools UoPX employs to reach out to more non-traditional students.

Among participants who responded “**strongly agree,**” the most common theme expressed as the perspective that it should/would help:

- Any business leader understands diversification is the key to success.
- The affiliation is a fantastic diversification strategy for the University of Idaho.

The second most common theme was the perspective that this would increase the student base:

- I've been saying for years that we need to break into the online learning market to reach new students.
- People need education that can be accessed while working full time to support themselves & their families

POSITIVE OR NEGATIVE IMPACT – QUANTITATIVE DATA

The majority of respondents generally agree that the affiliation will have a positive impact on UI (53% agree), and this is true across identified employee type. Of identified faculty, 52% agree that the

affiliation will have a positive impact on the UI, and 64% of identified staff agree that there will be a positive impact.

The majority of respondents with high self-reported levels of knowledge of the affiliation agree that the affiliation will have a positive impact on UI (66%), and while only 36% of employees with low self-reported levels of knowledge agree that the affiliation will have a positive impact on UI.

When asked if the affiliation will have a negative impact on UI, 31% of total respondents agreed with this statement, 40% disagreed with this statement, and 29% were either unsure or neutral. Across employee type, 27% of self-identified staff agreed that there would be a negative impact on UI, 48% disagreed, and 27% were either unsure or neutral. Of self-identified faculty, 33% agreed that the affiliation would negatively impact UI, 40% disagreed, and 29% were either unsure or neutral¹.

Of respondents with high levels of self-reported knowledge, 50% disagree that the affiliation will have a negative impact on UI, 29% agree that the affiliation will have a negative impact, and 21% report to be unsure or neutral. Of respondents with low self-reported knowledge, 25% disagree that the affiliation will have negative impacts on UI overall, 36% agree that the affiliation will have a negative impact on UI, and 40% report being unsure or neutral about potential negative impacts on UI.

¹ Note: people who did not disclose their employment status had lower levels of disagreement, which is why the overall employee percent is lower than either staff or faculty independently.

POSITIVE OR NEGATIVE IMPACT – QUALITATIVE DATA

To get a sense of the nuanced thinking on the impact of the affiliation on UI, we included opportunities to add qualitative data to the question:

Based on my current understanding, I believe the University of Idaho's affiliation with the University of Phoenix might have a positive impact on the University of Idaho.

Here, we identified 12 unique themes (see textbox). that varied based on the degree to which the respondent agreed with the question above. Below, we present the most common themes amongst each group of respondents.

Amongst participants who responded “**strongly disagree**,” the most common theme included statements that suggested that the affiliation will harm the University of Idaho's reputation.

- The affiliation will likely damage the university's reputation.
- University of Phoenix has a terrible reputation. There is no reason why we should align ourselves with their awful reputation.

Next, the second most common theme focused on the potential financial risks to the University of Idaho.

- I have no doubt that overall it will be a financial suck.... because of lawsuits from people who have gotten or will get screwed over by Phoenix.
- I believe we will end up burdened by the ongoing lawsuits and consumer protection class action lawsuits against the University of Phoenix.

Amongst participants who “**somewhat disagree**” that the affiliation might have a positive impact on the University of Idaho, the most common theme, again, pointed to perceived reputational effects.

- University of Phoenix has a terrible reputation, it will only soil our reputation.
- I think it will hurt UI's reputation.

The second most common concern within the group of “**somewhat disagree**” was that the benefits of the affiliation are unclear.

- Communication on the impacts are vague at best. Everything is about what ‘it's not’ or ‘myths’.
- Perhaps this affiliation between UI and UoP could come out good for UI, but in the absence of any definitive plan or even broad vision for what to do with UoP, it is impossible to answer this

12 Identified Themes:

Theme 1: The affiliation affects U of I's reputation negatively

Theme 2: The affiliation poses financial risks for U of I

Theme 3: The affiliation will reduce quality of education at U of I

Theme 4: The affiliation has no tangible benefits.

Theme 5: Unclear affiliation-effects / it depends on future decisions.

Theme 6: There are benefits and drawbacks to the affiliation.

Theme 6a: The benefits and drawbacks are roughly equal

Theme 6b: The benefits likely outweigh the drawbacks

Theme 7: There are potential benefits for units on campus.

Theme 8 There are potential benefits for U of I.

Theme 8a: Financial Benefits

Theme 8b: General Benefits

Theme 9: The affiliation allows U of I to adapt to a changing higher ed landscape.

Theme 10: The affiliation will allow U of I to reach different student populations.

Theme 11: I trust President Green/the administration

Theme 12: Unclear responses given the question prompt

question. The promises I have seen remind me of those who try to recruit people to multi-level marketing schemes with lots of vague promises and little in the way of facts.

Focusing on subjects who answered “**neutral**”, the most common expressed concern was that the effects of the affiliation will ultimately depend on decision to be made in the future. These sentiments are captured in the following statements.

- Depends on how we manage it, but I'm not seeing a lot of details about how we plan to manage it.
- Right now, the only positive thing I see is the direct fiscal payout benefit. The other benefits are completely unclear without knowing the plan for integration of the two universities.

Among respondents who “**somewhat agreed**” that the affiliation might have a positive impact on the University of Idaho, the most commonly expressed considerations are the financial benefits to the university and the idea that the affiliation would allow U of I to adapt to a changing landscape in higher education.

- I can see that there might be some financial benefits. If it brings in revenue
- Additional revenue streams if invested in things besides students will likely bring future benefits.
- Higher ed is changing, and has been for decades. This may be a good opportunity to actively adapt.
- The future is online and they have great tools and knowledge to share with U of I

Lastly, respondents who “**strongly agreed**” that the affiliation will have positive effects on the University of Idaho primarily emphasized the idea that the agreement would help our institution to reach different student populations.

- It'll have a great impact in elevating our name and providing greater opportunities for distance learners. It's a highly strategic move in order to situate ourselves in light of the coming demographic crises. We see universities closing all across the country and deep cuts getting implemented, particularly in the fine arts, humanities, and social sciences. The affiliation is the key to survival.
- They do a much better job appealing to non traditional students. UI has natural barriers to improving on that. The affiliation works well as a complement.

To continue our analysis of the nuanced thinking on the impact of the affiliation on UI, we further included opportunities to add qualitative data to the question:

Based on my current understanding, I believe the University of Idaho's affiliation with the University of Phoenix might have a negative impact on the University of Idaho.

Here, we identified 12 unique themes (see textbox). that varied based on the degree to which the respondent agreed with the question above. Below, we present the most common themes amongst each group of respondents.

Amongst participants who responded “**strongly disagree**,” there were only five responses. In general, they reflect support for the affiliation broadly speaking:

- The President has been business sense and I think that they have taken a caution and thoughtful approach to this opportunity.
- Risks have been addressed through the due diligence process. The greater risk is to not change.

Amongst participants who responded “**somewhat disagree**,” the most common theme was the perspective that it's just not possible to really know what impact the affiliation will have on the University of Idaho:

- Hard to predict the future but on net it seems likely to have a positive impact.
- Nothing's guaranteed, you know?

The second most popular response reflected concerns about the impact of the affiliation on the reputation of the University of Idaho:

- There are reputational risks, but I think if executed well those risks will not have an impact on the UI's standing. I do also wonder if the affiliation will have any impact on our mission to achieve R1 Status.
- Unsure of how the former reputation of Phoenix might affect UofI, but in general this seems like a good affiliation

Amongst participants who responded “**neutral**,” the most common theme indicated a sense that participants needed more information to have a firm opinion:

- I don't know enough to make this assumption

12 Identified Themes:

- Theme 1: The affiliation affects U of I's reputation negatively*
- Theme 2: The affiliation poses financial risks for U of I*
- Theme 3: The affiliation will reduce quality of education at U of I*
- Theme 4: The affiliation has no tangible benefits.*
- Theme 5: Unclear affiliation-effects / it depends on future decisions.*
- Theme 6: There are benefits and drawbacks to the affiliation.*
 - Theme 6a: The benefits and drawbacks are roughly equal*
 - Theme 6b: The benefits likely outweigh the drawbacks*
- Theme 7: There are potential benefits for units on campus.*
- Theme 8: There are potential benefits for U of I.*
 - Theme 8a: Financial Benefits*
 - Theme 8b: General Benefits*
- Theme 9: The affiliation allows U of I to adapt to a changing higher ed landscape.*
- Theme 10: The affiliation will allow U of I to reach different student populations.*
- Theme 11: I trust President Green/the administration*
- Theme 12: Unclear responses given the question prompt*

- who knows yet

The second most common theme indicated concerns about the potentially negative impacts of the affiliation on UI:

- This is a possibility. See previous answer re the University of Phoenix's reputation. It may be the most well known "brand", but many people who know it don't see it in a positive light. U of I could suffer because of that.
- There is ongoing discussion about whether UI will be "on the hook" financially for past UOP issues, so that is a concern. Also concerned that UI might benefit from an enrollment and fiscal perspective but that the funds from those increases does not get passed on to the people and programs who are actually teaching the courses and are expected to do more with less.

Among participants who responded **“somewhat agree,”** the most frequently expressed theme was a sense that the University of Phoenix’ reputation will hurt the University of Idaho

- U Phoenix has a reputation for sponsoring some courses that are of questionable academic standards and some course authors who are not very academically qualified
- It has a history of exploiting students. How deeply is this practice embedded in the institution's core? How will the nonprofit organized to oversee/run it, be held accountable? How much of a distraction to UI leadership will this purchase present, the UI has many pressing issues that need attention and commitment?

The second most frequently expressed theme was a sense that there will be other negative impacts on UI:

- I think its going to lead to more students not having any real connection to UI or Moscow and its going to lead to more in person classes and staff being replaced for cheaper online alternatives leading to decreased enrollment, detriment to the campus community, leaving UI an artificial facade of an institution.
- What will happen to those faculty members who teach similar material online? It could be a brutal but black-and-white cost saving measure to eliminate positions from U of I

Finally, amongst participants who responded **“strongly agree,”** the most commonly mentioned concern was the harm the University of Phoenix’s reputation would cause to UI:

- University of Phoenix has a poor reputation for its predatory recruiting and admissions practices, especially for active-duty military, veterans, persons of diverse backgrounds and women. To say that the offenses happened in the past under different management does not recognize that many U of Phoenix administrators pre-2020 remain with the company.
- I believe it will destroy the university's reputation [sic] to be affiliated [sic] with a previously for profit institution with an lengthy track record of inappropriate actions.

The second most common theme indicates a perspective that the affiliation will cause economic harm to the University of Idaho:

- The possibility that this deal could be financially ruinous--even if remote--should be enough to prevent us from pursuing this deal.
- I don't understand how we are protected from the financial risk and the numbers (which change frequently) don't add up for me. Hundreds of millions of outlay for 10 million in revenue per year just doesn't make sense to me.

DRAFT

FAQ FEEDBACK

In general, respondents found the FAQ published by UI Administration helpful: 52% of employees somewhat or strongly agreed that FAQ was helpful, 12% disagreed, and 36% responded as unsure or neutral. Among identified staff, 60% agreed that the FAQ was helpful, 8% disagreed that the FAQ was helpful, and 31% responded as either unsure or neutral. Among identified faculty, 51% agreed the FAQ was helpful, 18% disagreed, and 32% responded as unsure or neutral.

Across self-reported knowledge levels, responses regarding how helpful the FAQ was were mixed. Respondents with high self-reported knowledge generally agreed that the FAQ was helpful in understanding the affiliation agreement (65%), 9% disagreed, and 26% reported to be neutral or unsure. However, 50% of respondents with self-reported low levels of knowledge indicated they were unsure or neutral about the FAQ, 33% agreed the FAQ was helpful, and 16% disagreed the FAQ was helpful in their understanding of the affiliation.

QUESTIONS

The list of questions posed by employees is long, and only some of this qualitative data is thus coded. However, there were some common themes that emerged:

- Respondents are interested in knowing exactly how the predicted increased revenue will be allocated/used
 - Financial data regarding how the payments from University of Phoenix and/or dividends from the business venture will be allocated to different areas of campus
 - Will it enable the university to provide salary raises that at a minimum keep up with cost of living. As it hasn't been the situation for many years
 - It may still be early, but it would be great to hear from U of I leadership about investment plans for the funds from University of Phoenix agreement. It is a very exciting opportunity for the University.
 - I would like to know how the many millions of anticipated revenue will be used to improve employee salaries. If compensation is not commensurate with the local cost of living, we cannot hope to sustain the world-class education that UofI professes to uphold. Let us not forget about the people while in pursuit of profits.
- Respondents are interested in specific conversations about the potential impact on their respective units.
 - Its potential effects on my unit, pro and con.
 - Perhaps insight from the Provost regarding how [my college] will/could benefit from UoP. How we as a school may help promote UoP and explore integration with their students -if any.
 - Detailed explanations of the impact per unit
 - More directly relevant information provided to units and a chance for specific departments to engage in a question and answer format.
- Respondents also seek knowledge regarding a timeline for the process:
 - When do we start? This is exciting. This is an amazing opportunity. When do we start!
- Respondents express concern and a need for more information regarding the future of duplicated programs:
 - Be very explicit about duplicated programs. What might happen to those?
- Respondents also seek greater clarification and information regarding the potential financial risk and liability to UI.
 - Clarification of the party fiscally responsible for any deficits. Pres. Green continually states that UI does not own UOPX- but clearly UI bears financial responsibility if the venture fails. So the loophole of saying UI "isn't the purchaser" or "doesn't own it"

- becomes irrelevant. Regardless of the legal status, if UI bears fiscal responsibility for possible debts, the official designation is moot. What matters is the financial bottom line.
- I don't believe that we have received an honest disclosure of future plans for how the two [sic] entities will interact. Also, *when* the U of I becomes liable for UOPX's court settlements, I am concerned that support programs like mine will be cut.

SUGGESTIONS FOR FUTURE COMMUNICATION

Respondents also offered several suggestions for how future communication could be improved and/or approached.

Three of the most common themes/requests included:

- **Unit-level discussions with or without the provost or unit-specific information.**
 - Make communications personal to each unit/college/department.
 - Meeting between provost Lawrence and [my unit] faculty at a future faculty meeting
- **Communication with greater levels of specific detail.**
 - More clear communication and more details
 - Details that would help understand the implications.

Approved at Mtg #22
Feb. 20, 2024

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 21

Tuesday, February 13, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals.

Absent: Miller

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #20, February 6, 2024, were approved as distributed.

Chair's Report:

- Admission criteria: a proposal is forthcoming and will go through the appropriate process as mandated by FSH 4120 for permanent catalog changes. We are asked by the State Board to deliver a senate-approved proposal before the end of the month, if possible, thus, the timeline is tight. A meeting about admission standards in the state will take place in Boise on February 27.
- The Artificial Intelligence plus Machine Learning, AI+ML Exhibition will be in the Reflections Gallery, in the ISUB building, from Monday April 1st to Saturday April 13. The exhibition covers a selection of current AI projects from faculty and students at the U of I. There will be around 20 posters and interactive media on several monitors. The list of topics includes image analysis, computer vision with ML, generative AI, expertise and assessment, Chat GPT tutorials, animation with diffusion and machine learning, text to 3D scene. Please let your units know that they can submit via email to vtd@uidaho.edu. The deadline 03/17/2024.

Discussion:

A senator asked for clarification about the February 27th meeting. Who is attending this meeting? Do we know what kind of proposal is forthcoming? When will we see that proposal?
Chair Gauthier's response: The meeting in Boise is a meeting of the board to decide what would work for a U of I, Boise State University and other institutions. So, it's not a decision meeting. It's more like a collegial discussion. Provost Lawrence: all 8 institutions should present admissions criteria by which they can be admitted through the state's direct admission letters. We must get those criteria to them rather soon, which is why we are under some pressure. Of course, this must tie into our new admissions criteria in the catalog, should we change them. We are gathering all the relevant information, so we can have a more informed conversation about the various options. Going into the ISAT test, some people feel very strongly that it's a great indicator of college success, but we need more information and ISAT data. So, we're still assembling all the pieces. And then, we can bring proposed admission standards forward through the process that Jean-Marc mentioned. If we decide on a change, it will be a permanent catalog change to be pursued by the processes outlined in FSH.

A senator argued that UCC has jurisdiction over the admission standards, but UCC has heard nothing about this. And if there's a proposal to change permanently our admission standards, it's not happening, and shouldn't happen, by next week. It should maybe happen a year from now, unless you just really want to short circuit the faculty governance process and rush something through without us being able to consider it. That's totally unfair and it's not following the process. If there's some other emergency, then it's understandable. Provost Lawrence's response: Our plan is to follow the process and go to UCC first. Senator: So, we're trying to have a proposal to discuss in a week. UCC should do a thorough reading and discuss it and then make a recommendation to bring to this body. Chair Gauthier: We were hoping to have all elements by this week. Senator: I don't see how it can be implemented this coming academic year. There's no way to go through a fair process. The Secretary noted that, while going through UCC is important and it's what we will do, FSH 1520 Constitution of the University Faculty gives to the faculty the responsibility to establish admission standards.

Question from another senator: What is the best way to deliver comments from constituents about admission standards? Should we bring them to senate or send them to the leadership?

Chair Gauthier's response: Please keep FSL in the loop about any feedback you receive.

Provost's Report:

- Three-minute Thesis Competitions. This is a statewide competition where our students give a three-minute presentation on their research. UI students received first place, second place, and third place. One of our very own, Abbey Rode, who is our GPSA representative at senate, won first place. She will go on to the regional competition as our state representative. Congratulations, Abbey!
- The next faculty gathering is two weeks, Tuesday, February 27th. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurtry. Please spread the word.
- NWCCU, the U of I's accreditor, agreed with our assertion that the affiliation with the University of Phoenix is not a substantive change and requires no approval or further action by the commission. See today's memo from President Green.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 537 Bioethics Undergraduate Certificate – Aleta Quinn, Department of Politics and Philosophy.
The certificate has the purpose of demonstrating competence with conceptual issues and scientific reasoning and also ethical issues that arise and scientific practice specifically with respect to the life sciences.
No questions.
Vote: 21/21 yes. Motion passes.
- **Proposed Changes to the Administrative Procedures Manual (non-voting):**
 - APM 50.35 Compensation Guidelines for Exempt Employees (Deletion) – Ashley Rodriguez, Senior HR Business Partner, Human Resources.

We are proposing to delete this APM, because the information contained in this item is now maintained on the Human Resources website.
No questions.

Announcements and Communications:

- Information on First Aid Training and Stations on Campus – Beau Babcock, Occupational Safety Technician.

Beau is an occupational safety specialist with Environmental Health and Safety (EHS). He talked about safety resources at the university. For more information, visit <https://www.uidaho.edu/dfa/division-operations/ehs>. There, one can find detailed description of [first aid](#).

Reach out to Beau at safety@uidaho.edu for any questions on high-quality first aid kits. First aid kits are a departmental responsibility to purchase and upkeep.

EHS also manages the Automatic External Defibrillator (AED) program as an integral part of the university's commitment to safety. They maintain a Moscow [AED map](#) and list. We have approximately 80 AED in total and probably about 70 on the main campus. We do have quite a few on our extensions as well.

For information on all safety training, follow the link to <https://www.uidaho.edu/dfa/division-operations/ehs/safety-training>

Beau is the only instructor now. He tries to offer at least one CPR class per month. Just email Beau or follow the links. He can help you sign up and register for the class or arrange for a special class just for your group.

Discussion:

Senators made very useful suggestions, such as including the floor number on the maps, which would facilitate locating the first aid kit or the AED.

Senator: Is it possible to take a refresher course in First Aid? Beau: Unfortunately upon further discussion with leadership EHS cannot offer CPR training to those who do not need the CPR certification. EHS needs a department index number before you can register for CPR training. If you do not need a CPR card, you can just sit in the class. Since we have a limit of 8 people per class, priority is given to those who need a CPR card, but you can join the next class. The same applies to cases when the department cannot pay for the class.

Senator: The 911 operator asks for the precise location of the emergency. Most of us know building names but not street addresses. Will this cause a delay in the emergency response? Beau suggested giving the 911 operator as much information as possible on the location, although they should be able to identify the building's location from its name. A senator suggested placing the building postal address on the AED device, which was received as a great suggestion.

- First Gen Forward Designation – Brooke Blevins, Dean, College of Education, Health and Human Sciences

The number of first generation (First Gen) students continues to increase on our campus (currently, about 50% of our students are First Gen). To help us think more comprehensively about how we serve First Gen. Students, we have begun an initiative to be part of the First Gen Scholars Network, which is part of NASPA and comes from the Center for First Generation Student Success. Alongside Dean Kahler, Jenny LeBeau, the Office of the Dean of Students, our Center for Multicultural Affairs, our Center for Disabilities Access Resources, and several other

institutional partners, the College of Education, Health, and Human Sciences is embarking on submitting a proposal to have us recognized as part of the First Gen Scholars Network. They hope to find a faculty member who would partner with us in the initial proposal stage, which is a data gathering phase. They want to make sure they have faculty representation.

Some of the benefits: it's free of charge for us. The institution must be a member of NASPA and celebrate First Gen Students' Day, both of which requirements we already meet.

This is a free opportunity to network with other institutions serving First Gen students in our State. BSU is a member of this network, and so is LCSC. As a member of this network, BSU is a step ahead of us. We shouldn't be left behind in the state of Idaho. As we're thinking about how we improve graduation and retention rates, this is going to play a pivotal role in how we can better serve our First Gen Students.

We'll receive public identification as a member of the network; we will be listed on the Center's website and will connect with a team of folks who are heavily involved in research and practice around first generation student success; we will have the opportunity to participate in professional development; We'll be able to work together to craft institutional mission and vision, particularly around First Gen student success.

We will set goals and monitor progress. They are gathering data and planning how to best analyze it.

Discussion:

There was a reminder that a faculty member who's had the experience of being a First Gen Student is preferable.

- Slate Presentation – Dean Kahler, Vice Provost Strategic Enrollment Management and Brenda White, Slate Strategy Director

Slate is a tool to communicate with prospective graduate and undergraduate students and is useful in many more applications. Our contract with VandalStar is about to expire. Slate is already available and would replace Vandal Star, which costs us \$159K per year. It has not yet been discontinued; we want the faculty to participate in this dialogue. Functions that we can easily move from Vandal Star, to mention a few, are appointment scheduling, setting flags and reporting capabilities.

Discussion:

The Secretary said that this may be a welcome change, since many faculty have been unhappy with VandalStar, to her knowledge.

What features are improved by Slate over Vandal Star? Response: Besides the saving aspect, Slate is flexible and customizable. Vandal Star is very limited and is not a communication tool.

With Slate, users can build portals.

A senator agreed that Vandal Star was not everyone's favorite. However, when we make a change, we must learn a new system, which will also present problems.

There are no additional software costs.

Are there any other costs? Response: There will be training costs and such. Slate may even eliminate the need for other software.

Some senators remained concerned about another switch. Chair Gauthier noted that a huge number of people use Slate, so we can easily get feedback about the system. Vice Provost Dean Kahler confirmed that this is currently the most popular tool. Most important, it's customizable, meaning that users can change what they don't like into something that fits their needs.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:30pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #21

Tuesday, February 13, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 20

Tuesday, February 6, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Strickland (excused), Maas (excused), Rode, Mischel

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #19, January 30, 2024, were approved as distributed.

Chair's Report:

I would like to share a few notes about admissions. As we all know, the criteria for admissions are the prerogative of the faculty. The State Board of Education plans to draft a proposal. U of I and BSU are on the so called "list of 8." Our task is to make recommendations about admission criteria by the end of February, a tight timeline. This is an important item of the Faculty Senate Spring agenda. We will reach out to the admissions committee.

To provide a brief history, since Covid, we have operated under an emergency action, by which direct admission is based on a GPA of 2.6 and ACT/SAT are not required. This needs to be revised. We can change the GPA threshold or leave it as is. We can change the admission criteria by requiring both GPA and SAT/ACT, or GPA and ISAT.

From what I heard at the meeting with SBOE, this is a summary of the advantages and disadvantages of each criteria.

- Regarding GPA, it is the most consistent metric, and many agree that it's the best indicator of future student success. GPA is not reported consistently by all schools in the state, making it less rigorous.
- Regarding SAT, some universities have dropped the requirements for standardized exams.
- Regarding ISAT, ISAT is specific to Idaho and not possible for out of state students who cannot take ISAT and who may take the SAT/ACT.

One option is to keep admission standards as they have been since the emergency action – GPA only – and possibly adjust the threshold. If an applicant has a lower GPA, we could require a combined GPA and SAT and additional material. Please send your feedback and questions (e.g. how do you want to proceed? Shall we come up with a proposal next week? Others?)

Discussion:

A senator clarified that the authority to make matriculation decisions is with UCC, not the admission committee. Chair Gauthier agrees but argues that input from the admission committee is helpful. Another senator proposes keeping ACT/SAT scores optional, but using them when needed, for instance, in scholarship decisions.

An internal study on SAT scores was done at Dartmouth, where SAT is now reinstated, and reported in the New York Times, "*A Top College Reinstates the SAT*" (nytimes.com). A senator gave a brief summary. They analyzed their SAT numbers in relation to admissions and compared to the status when they did not have SAT scores due to COVID. They found that, because of the way they process SAT scores, not requiring the SAT actually puts underserved student populations at a disadvantage. The key point is how they use the SAT information – they compare SAT scores to the overall SAT

performance in their local schools, as opposed to a global average. The senator suggests searching for this data (where SAT scores are localized to specific schools). Do we use such data in admissions? Does the situation described in the article bare any resemblance to our admission process? Chair Gauthier thinks this is an interesting point to explore.

Vice Chair Kristin recalled that last week, Dean Kahler said that, from the analysis done here, specific to our university, they did not see a clear impact of SAT on U of I students in terms of retention. It was also emphasized that the New York Times article is about admissions, not retention.

A senator asked whether dropping the SAT requirement would in some way negatively impact our targeted intervention and retention strategies. We have many offices on campus whose job and mission are to make sure that struggling students are identified early and provide the necessary resources. Perhaps the SAT could provide an additional piece of information that could be helpful for early identification. Chair Gauthier said that he asked the same question at the SBOE meeting. Using SAT scores in this way seems to be part of the direction they want to go.

Referring to the article mentioned earlier, Provost Lawrence agreed with a previous comment that the article is about admissions, not retention, whereas our conversation with Dean Kahler was about retention. In relation to the Dartmouth case, we should ask ourselves whether we are bringing in students who do not have a high probability of success, which can be measured with retention data – but it’s still an admission decision, and their institution uses a much more selective process.

The Provost brought up the ISAT (Idaho Standards Achievement Test), now required in the state. ISAT is new and measures different parameters. Having no experience with this tool, we need to be sure we use it correctly and understand the meaning of the outcome scores. Furthermore, it’s only for Idaho students, which adds another level of complexity to the process for out of state students. Other senators echoed the Provost’s point regarding the New York Times article.

Provost’s Report:

- University Excellence Awards. Deadline for nomination: Friday, February 9.
<https://www.uidaho.edu/governance/faculty-staff/>
- There is significant delay with the federal government reporting FAFSA information, which is seriously impacting our financial aid process, especially problematic for new students. This delay is going to change our recruiting landscape for the next 6 to 9 months. Our Financial Aid Office is working to serve students in new ways.
Discussion: None.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 518 Semiconductor Design Undergraduate Certificate – Feng Li, Electrical & Computer Engineering, Attach. #2.
The certificate in semiconductor design is designed to provide undergraduate students with specialized knowledge and skills in the field of semiconductor design. This certificate program is intended to prepare students for careers in the semiconductor design industry or related fields, as well as future graduate studies in the field of semiconductor design. The departments currently offer these proposed courses required for the semiconductor design certificate, and these courses already have the required materials needed for the certification.
Vote: 20/20 yes. Motion passes.
 - UCC 503 Advanced Microelectronics Fabrication Graduate Academic Certificate – Feng Li, Electrical and Computer Engineering Attach. #3.

The certificate in advanced microelectronics fabrication is designed to provide graduate students with specialized knowledge and skills in it. This certificate program is intended to prepare students for careers in the advanced microelectronics fabrication industry or related fields, as well as future graduate studies in the field of advanced microelectronics fabrication. The departments currently offer these proposed courses required for the advanced microelectronics fabrication certificate, and these courses already have the required materials needed for the certification.

In response to a question about the delivery mode, Feng Li said that several options are available, depending on the class.

Vote: 19/19 yes. Motion passes.

- UCC 524 High-Speed Circuits and Systems Graduate Academic Certificate – Ata Zadehgo, Electrical and Computer Engineering Attach. #4.

The high-speed circuits and systems certificate is tailored to equip graduate students with the expertise needed to apply signal/power integrity and electromagnetic compatibility engineering principles to high-speed circuits and systems. This program aims to prime students for careers in the high-speed circuits and systems sector or analogous domains, as well as further graduate studies in high-speed circuits and systems. The department is already offering the stipulated courses for the high-speed circuits and systems certificate, and these courses are equipped with the necessary materials for certification.

Vote: 20/20 yes. Motion passes.

- UCC 546 Biomedical Engineering Undergraduate Certificate – Nathan Schiele, Chemical and Biological Engineering Attach. #5

Biomedical engineering professions are rapidly growing, and there is a critical need to train the next generation of biomedical engineers. Undergraduate student interest in biomedical engineering is high with an average of 70% of incoming biological engineering undergraduate students expressing interest in biomedical engineering and/or medical professions. No curricular changes nor additional teaching load is being proposed for this certificate. This 12-credit Biomedical Engineering Certificate is developed based on the courses already routinely offered in the BE program, College of Engineering and across campus. Assessments will occur as part of the BE program's annual review and University accreditation.

Vote: 20/20 yes. Motion passes.

- UCC 527 Cybersecurity PhD – Terence Soule, Department Chair, Computer Science Attach. #6

There is a major unmet need for cybersecurity professionals. These professionals help businesses protect their assets from cyber criminals. Untrained individuals spend more time and effort, and therefore more corporate resources, developing less than ideal solutions. A trained cybersecurity professional will be able to get the work done with less effort and fewer resources. Furthermore, our economy and critical infrastructures are today very dependent on digital and computer-based systems. Adequately protecting such systems is of paramount and essential importance, and a likely prerequisite for a healthy economy in the State of Idaho and the Nation. As noted above additional faculty and IT support will be needed to manage the added workload, particularly as it applies to increased graduate student mentoring, increased research, and the concurrent need for additional IT support for cybersecurity labs.

Vote: 20/21 yes; 1/21 no. Motion passes.

- **Changes to the Administrative Procedures Manual (non-voting):**

- APM 45.08 Cost Sharing (“Match”) on Sponsored Projects – Sarah Martonick, Director, Office of Sponsored Programs.
No presenter available.

Announcements and Communications:

- Computing Resources Available for Research – Luke Sheneman, Director, Northwest Knowledge Network, Institute for Interdisciplinary Data Science, Joe Leister, HPC Systems Administrator, Institute for Interdisciplinary Data Science.

Luke explained how their team help enable and support research. He introduced the Collaborative Computing Center (C3+3), a statewide collaboration of the Idaho Universities and the Idaho National Laboratory (INL) to develop a regional educational and research system within the framework of statewide high-performance computing (HPC).

The core of the presentation was about the impressive features and capabilities of the Falcon supercomputer. They are recruiting users and offer Falcon workshops. For more information, visit <https://www.c3plus3.org>

The slides of the presentation can be downloaded from:

<https://www.northwestknowledge.net/cloud/index.php/s/glZ6m5z2asiSAqE>

Discussion:

It was suggested to advertise the workshops broadly. This incredible computing power can be a helpful recruiting tool for hiring.

In response to questions, Luke explained how to request a Falcon account. At the workshops, research computing experts show you how to log in, transfer data, submit jobs etc. Tutorials are also available on the webpage. It is a Linux environment. Obtaining an account requires a short quiz related to security. Students can request an account with the approval of their advisors.

For help with Falcon: help@c3plus3.org

- University of Phoenix Survey Taskforce – Kristin Haltinner, Vice Chair Faculty Senate Attach. #8
Kristin thanked the members of the task force. She went over the executive summary, and some of the most frequent themes that emerged from the survey. There are 130 pages of qualitative data, not yet coded. She suggested focusing the discussion on the best way to use and share this information. [Discussion starts]. For instance, one could identify common concerns people have and work with the Provost's office to mitigate them. Some of the concerns could be actual, rather than perceived risks, and those should be addressed and resolved. Some of the most frequently raised concerns are about possible U of I liability in lawsuits against the University of Phoenix, and possible damage to the U of I reputation. Provost Lawrence was asked to give a brief summary of the affiliation's current status. Provost Lawrence: The lawsuit filed by the Attorney General against the SBOE was resolved in favor of SBOE. There could be an appeal. Accreditation is under review. All other aspects of the bonding process are moving forward. The transaction could close in late spring, but it's not definite. As for liabilities, they stay with 4 3 Education, a 501 C3 organization. The university is contemplating taking on some liability, but nothing has been finalized yet.
Dean of Students Blaine Eckles congratulated Faculty Senate for this effort. It seems most respondents are in favor of the affiliation. This should be part of the communication that goes out.
Kristin mentioned another concern identified from the data. Employees were divided on whether the degree of involvement in the decision was consistent with shared governance. Kristin encouraged everyone to reach out with questions and feedback.

New Business:

Senator Long was contacted last fall by the UBFC chair about the faculty role at the committee. Apparently, the chair was told that, within the new budget model, there isn't much room for faculty input. Senator Long and the UBFC chair met with FSL who then met with the Provost and the Vice Provost for Faculty to convey the complaint. Recently, the new chair of UBFC contacted Senator Long again because they had received no response.

The Secretary responded: FSL did meet with university leadership mid-October to raise the concern. In the meantime, the Committee on Committees had decided to undertake an audit of those committees whose chairs had reported (via a survey) problems with the scope, function, or structure of their committees, similarly to the UBFC case, and bring recommendations to Faculty Senate.

Adjournment:

The agenda being completed, the Chair called for a motion to adjourn. The meeting was adjourned at 4:44pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Program Title

Bioethics Undergraduate Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

12

CIP Code

38.0104 - Applied and Professional Ethics.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

Courses are already taught regularly. There is no financial impact of the request.

Curriculum:

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|-----------------------------------|--|-------|
| PHIL 103 | Introduction to Ethics | 3 |
| Three credits from the following: | | 3 |
| AVS 109 | The Science of Animals that Serve Humanity | |
| AVS 110 | Science of Animal Husbandry | |

| | | |
|-----------------------------------|---|---|
| BIOL 114 | Organisms and Environments | |
| BIOL 115 | Cells and the Evolution of Life | |
| BIOL 310 | Genetics | |
| ENVS 101 | Introduction to Environmental Science | |
| FOR 235 | Society and Natural Resources | |
| MVSC 201 | Physical Activity, Wellness & Behavior Change for Healthy Active Lifestyles | |
| NRS 125 | Introduction to Conservation and Natural Resources | |
| NRS 235 | Society and Natural Resources | |
| PSYC 101 | Introduction to Psychology | |
| PSYC 218 | Introduction to Research in the Behavioral Sciences | |
| Three credits from the following: | | 3 |
| PHIL 361 | Professional Ethics | |
| PHIL 450 | Ethics in Science | |
| PHIL 452 | Environmental Philosophy | |
| Three credits from the following: | | 3 |
| PHIL 209 | Mind and Madness | |
| PHIL 351 | Philosophy of Science | |
| PHIL 417 | Philosophy of Biology | |

Total Hours 12

Courses to total 12 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Students will be able to analyze the ethical dimensions of legal, political, and societal decision-making with respect to biosciences.

Students will be able to analyze ethical dilemmas in the practice of science using philosophical theories and principles.

Students will be able to analyze conceptual and theoretical debates in the biosciences.

Students will be able to critically evaluate core texts and arguments in the field of bioethics.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The Philosophy Curriculum Committee will evaluate the program once per year, by discussing the structure and results of a signature assignment (an assignment with more than one program learning outcome). The Committee will recommend changes to instructors.

How will you ensure that the assessment findings will be used to improve the program?

The Philosophy Curriculum Committee will meet each year to assess the Bioethics Certificate program, recommend changes to instructors, and discuss implementation and results of prior recommendations.

What direct and indirect measures will be used to assess student learning?

Direct measure: Signature assignment.

When will assessment activities occur and at what frequency?

Once per year, via a meeting of the Philosophy Curriculum Committee.

Student Learning Outcomes

Learning Objectives

Students will be able to analyze the ethical dimensions of legal, political, and societal decision-making with respect to biosciences.

Students will be able to analyze ethical dilemmas in the practice of science using philosophical theories and principles.

Students will be able to analyze conceptual and theoretical debates in the biosciences.

Students will be able to critically evaluate core texts and arguments in the field of bioethics.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The curricular requirements reflect four components central to the contemporary discipline of bioethics (the study of ethical issues in the biosciences):

1. Basic understanding of a bioscience. Options are in the disciplines of biology (including animal & veterinary sciences), exercise & movement science, the environmental sciences (including forestry, natural resources and society), and psychology.
2. Introduction to philosophical ethics.
3. An advanced ethics course, applying ethical principles and theories to a bioscience.
4. A philosophy of science course, analyzing conceptual and theoretical challenges with respect to the conduct of science. PHIL 209 is a course on the philosophy of psychology.

There are no new courses. The certificate complements adjustments to the Bioethics Minor. It is anticipated that the Bioethics Certificate will be attractive to students pursuing degrees in a range of life science disciplines, as well as to professionals not enrolled in degree programs.

537 Program Description

Bioethics addresses moral, social and political issues in the life sciences. The bioethics certificate prepares students for difficult decision-making both as potential producers and consumers of science and medicine. Coursework includes training in basic and more advanced ethics, and the structure of scientific research and theory, including the appropriate role of values in science.

Comprehensive review? Yes No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.

Information contained in this item is now maintained on the Human Resources website.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

50.35—Compensation Guidelines for Exempt Positions

Last updated November 7, 2006

A. **General.** Upon request, Employment Services in Human Resources assists administrators in establishing appropriate salaries for exempt positions by working with departments to suggest appropriate titles and create or update effective, results-oriented job descriptions and by analyzing duties of a position and comparing those duties with similar positions at comparable universities. Employment Services also assists in reviewing vacant positions to ensure that each appointment that is submitted for Board of Regents approval meets the criteria for exempt employment status and ensures that the university is in compliance with federal and state regulations. *[ed. 11-06]*

A-1. **Evaluation Criteria.** Criteria used for this review and analysis include applicable provisions of the federal Fair Labor Standards Act (FLSA), the Americans with Disabilities Act of 1990, and state of Idaho codes.

B. **Process.** Administrators desiring assistance in establishing or reviewing salaries for exempt positions should contact Employment Services at (208) 885-3611. *[ed. 11-06]*

C. **Procedure.**

C-1. Procedures for Initiating Review.

i) **Departmental Action.** The departmental administrator provides the classification and compensation analyst with an electronic copy of a draft job description. The information should include an approximate percentage of time needed to accomplish each element, notations by each element designating whether it is essential or marginal, and minimum and desirable qualifications needed to successfully perform the position duties *[See 50.55]*.

ii) **Employment Services Response.** Based on the results anticipated and the duties described in the draft job description, Employment Services will consult with peer institutions' data and refer to salary surveys. The analyst will also perform Hay point factoring (Idaho's job evaluation system) for the position. A salary range, including a minimum, market, and maximum rate of pay is then recommended to the hiring administrator. If the position does not comply with state or federal law as an exempt position, alternative courses of action will be recommended to the hiring administrator.

iii) **Exception.** University initiated review. Exempt positions may be reviewed at any time upon the written request of a departmental administrator which bears the written approval of the appropriate dean, vice president, or the provost, or when Employment Services has received information that the position may not comply with federal laws or regents policies regarding exempt employment. *[ed. 11-06]*

C-2. Actions following Review

— i) **Actions Relating to FLSA Requirements.**

a) **Positions subject to FLSA Wage and Hour Requirements.** If the Employment Services review determines that the position is subject to the wage and hour requirements of the FLSA, the administrator will be advised that the position needs to be converted to classified status. (This is necessary because the FLSA requires payment of overtime compensation at the time-and-a-half rate for hours worked over 40 hours in a workweek whereas persons in exempt positions are not eligible to earn overtime compensation.) To correct this situation and comply with FLSA requirements, the conversion to classified status must occur the following pay period and it is necessary to track hours worked each week. *[ed. 11-06]*

(1) In some situations, it is possible that all overtime worked during the prior three years would be payable or banked at the time-and-a-half rate if requirements of the FLSA had applied to the duties of the position during that time.

~~b) Positions not subject to FLSA Wage and Hour Requirements. If the Employment Services review confirms that the position is not subject to FLSA wage and hour requirements, the position will remain exempt. [rev. 11-06]~~

~~ii) Salary Adjustments:~~

~~a) Exempt Positions Converted to Classified Positions. If the exempt position is to be converted to a classified position, the conversion and salary adjustment (if any) must occur at the beginning of the first pay period after approval in writing by the dean or vice president. The salary must be within the range of the classified pay grade to which the position is assigned. [ed. 11-06]~~

~~b) Exempt Positions Not Converted to Classified Positions. Because exempt employees work on annual contracts wherein the annual salary has been agreed to in advance by both the employer and employee, absent a written statement explaining compelling justification, salary increases are offered to exempt employees only at the beginning of the next contract period (assuming the employee is re-appointed). Compelling justification warranting a salary increase during the contract period could include, but is not limited to, reasons such as: [ed. 11-06]~~

~~(1) A finding by the affirmative action officer that the salary is inequitable on the basis of protected status;~~

~~(2) Determination by Employment Services that the salary is below the minimum salary prescribed by Idaho code for exempt employees. [ed. 11-06]~~

~~(3) Temporary assignment of additional duties on a short term basis.~~

~~(4) Verification that, because of constraints on external support salary sources, the employee's annual salary increase occurs on a date other than at the beginning of the University fiscal year.~~

~~(5) Significant additional responsibilities.~~

~~c) All Salary Adjustments for Exempt Positions Require Regents Approval. Pursuant to Idaho State Board of Education Governing Policies and Procedures Section II, D, 3, any mid-year salary adjustments for exempt employees require regents approval. [ed. 11-06]~~

D. Information. Any questions regarding compensation guidelines for exempt positions should be addressed to Employment Services at (208) 885-3611. [ed. 11-06]

2023 – 2024 Faculty Senate – Pending ApprovalMeeting # 22

Tuesday, February 20, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals.

Absent: Miller

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #21, February 13, 2024, were approved as distributed.

Chair's Report: None. Chair Gauthier will use this time for the New Business part of the meeting.

Provost's Report:

- The next faculty gathering is two weeks from today, Tuesday, February 27th. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurtry. Please [RSVP](#).
- We don't have an education week in the Legislature as we've had in the past. Next week, U of I is going to be at both the Education Committees and JFAC. And we're seeing a lot more interest in what's happening in Boise right now. Just a reminder – that university resources are not to be used for political activity. Sometimes people, accidentally and with good intentions, may give the impression that they are speaking on behalf of the University or use their university email address. You are welcome to reach out to your representatives and legislators, but you should do that on a personal account such as Gmail. I just wanted to remind people as we get into the busier part of the session.

Discussion:

A senator saw a report that Moody's is evaluating our credit ratings based on the purchase of the University of Phoenix and asked the Provost for comments. Provost Lawrence responded that the question is best addressed to our financial team. It's complex, and beyond his area of expertise, but he will follow up. From the beginning there has been discussion and analysis of the impact of the acquisition on U of I's credit rating. It's been minimal but some different opinions came out recently which we don't agree with. The Provost will check with Brian Foisy and come back to this question.

Back to the issue of political activities, a senator added some comments. It's their understanding that we are allowed to identify ourselves as faculty at the University of Idaho, but we must say that we are acting/speaking as an individual, not as a university representative. Provost Lawrence: Reporting your job title or role is different than speaking on behalf of the institution. But sometimes people don't make it very clear whether it's one or the other. Thanks for clarifying, but it really does get confusing and can be misinterpreted. It's probably better to err on the side of caution, and just be a citizen of the State.

Vice Chair Haltinner inquired about an article in the Daily News, which reports that U of I minimized the risks of the purchase, saying that losses will be limited to \$10M per year. She asked whether they are referring to risks taken by “Four Three Education” and not the University of Idaho. Provost Lawrence has not seen the article. He will review it and come back to this question.

Committee Reports (voting):

- **Proposed changes to the University Catalog**

- UCC 239 Geology (BS) – Renee Love, Earth and Spatial Sciences, Attach. #2.
Our BS in Geology was revamped last year to include two new options (Energy Resiliency and Sustainable Mining). In doing this, the physical geology option was deleted and students in our department need it if they do not want to choose one of the other focus areas. This option is essential for professional licensing in Geology.
Discussion: None.
Vote: 20/20 yes. Motion passes.
- UCC 525 Graphic Design Undergraduate Certificate – Stacy Isenbarger, Art and Design, Attach. #3.
We have several students who have come to the college of art and architecture to take a suite of classes because they're excited about graphic design. But we don't have a minor in that area or a certificate. We see this as an opportunity to attract students who are coming in as professionals in other fields, or students who are coming to us from other areas of campus. They take these courses and have that certificate to showcase on their resume.
Discussion: None.
Vote: 21/21 yes. Motion passes.
- UCC 542 Indigenous Research and Education Graduate Certificate – Philip Stevens, Culture, Society and Justice Attach. #4.
This is a graduate certificate in indigenous research and education. This proposal is in response to the desire within Indigenous communities and other invested communities for an interdisciplinary research graduate certificate. We are working with Natural Resources and Education.
Discussion: None
Vote: 21/21 yes. Motion passes.
- UCC 110 B-4 Regulation Edit – Lindsey Brown, University Registrar, Attach. #5.
We would like to add additional language to the B-4 regulation titled "Registration for Courses Without Completion of Prerequisites" (see specific language in the attached document). This change clarifies the regulation in regard to allowing faculty to drop students who do not (or no longer) meet prerequisites for a course. It includes a time frame that this may be processed and communicated to the student. (It was clarified that the revisions as shown on the last page of the attachment are the ones being proposed.)
Discussion:
Some senators asked for clarification about the process. Lindsey responded that academic departments run reports of students who no longer meet course prerequisites and then send the list to her office to drop the students. There are new capabilities supposed to come out this summer for our student information systems that may make

this process more automated. Then, we would run it as a part of our end of term processing.

Senator: I understand that the purpose is to capture situations where students are taking a class in one semester that would meet the prerequisite for a next semester class they want to register for. If they fail that class, they no longer meet the prerequisite. Lindsey: Yes. It has been a longstanding practice. Now, we are codifying it in policy.

In response to another question, Lindsey clarified that the faculty can wave prerequisites. If they do wave it, then, of course, the student wouldn't get dropped.

Senator: How does this actually work? Students don't even have grades three days prior to the next semester in the spring. How do they know, unless somebody notifies them that they're about to fail? Lindsey: Generally, in between spring and fall we have plenty of time. However, in between fall and spring, time can be tight. That's when a quick turnaround is necessary, so that the students have adequate time to find an alternative course and maintain their full-time status. We want to make sure that they are adequately informed and set up for success. Although there's generally enough time in between fall and spring, my office is still working on some of those reports during the closure.

Vote: 22/23 yes. Motion passes.

New Business:

- Update on Admission Criteria – Chair Gauthier. (The slides are attached to these minutes.)
Brief background: Two of the state institutions, BSU and U of I, send to prospective students a “letter of 8” or a “letter of 6.” In the first case, they are notified that they can attend any of the 8 public institutions in the state. In the second case, they are not admitted into either BSU or U of I, but they can attend any of the other 6 institutions.
Summary of the options for admission criteria: We could decide to set a new GPA threshold; or to leave it as it is presently. We can also require a combination of GPA and standardized test scores. (Note from a senator: We're under an emergency action. So, the actual admission criteria (temporarily changed by the emergency action) include the GPA and a standardized test. If we do nothing when the emergency action expires, we go back to requiring the GPA and some standardized test.)

Chair Gauthier proceeded to share data on the differences between ISAT and SAT outcomes. The data is from 2019, because of all that happened afterwards. Such comparison is very difficult given the different nature of the tests and the populations who took them. Instead, Chair Gauthier has prepared some visual comparisons by gender, race, and socioeconomic status for each of the indicators under consideration – ISAT (ELA and Math), SAT, GPA. The comparisons indicate that we don't know enough about those elements to determine a final answer. Still, some trends can be seen. Looking, for example, at the comparison by race, we can see some very strong differences that are, to some extent, mitigated in the SAT outcomes by race. Comparing the outcomes of ISAT ELA and ISAT Math by race suggests that combining those with the GPA may be a reasonable approach.

Discussion:

Senator: Do we have data to compare SAT scores within schools as opposed to across Idaho?

Chair Gauthier: I'm still unclear as to whether we have access to that data.

Senator: Some of our constituents would like to have SAT/ACT scores available, even if optional. They're helpful to some departments. Another question: do your graphs indicate that looking at

the GPA only is misleading? They are too high. Chair Gauthier: Yes, there is clearly grade inflation that favors a particular population.

Senator: Did the data go through some form of statistical analysis to check whether differences are statistically significant? Chair Gauthier: No. The data is limited. I think this is the first year where the data has been more rigorous than in the past.

Senator: There was an article in the Daily News about Washington determining that there's a significant amount of grade inflation. The graph you showed seems pretty good evidence of grade inflation benefiting a particular population. Do you have a similar graph, on the same scale, comparing GPA and SAT or GPA and ISAT? Chair Gauthier: Unfortunately, I don't, but I can ask.

Senator: Aren't we supposed to have a recommendation by next week? Chair Gauthier explained that the timeline has changed. First, UCC will make their recommendation at the beginning of March, which will then come to Senate. Senator's follow-up comment: UCC should look at things we've looked at in the past, like success rate of students admitted at different GPA levels and different SAT levels. I think it's our responsibility to the students to make sure they're going to succeed when they get here.

Senator: You just presented test scores and GPA for students who graduated from Idaho high schools in spring of 2019. Do you know if in 2019 students were still required to take the SAT/ACT? I know they're required to take the ISAT. Do we have any information about what year they completed the ISAT versus the ACT or SAT? The point of the question is that ISAT is taken in the junior year, and, typically, so are ACT and SAT. But they can repeat that test. I'm just trying to figure out how these elements are comparable. Chair Gauthier: The people from the 2019 data took the tenth grade ISAT in the 2016-2017 school year and graduated in the 2018-2019 school year. I don't know if they repeated the test. Senator's follow-up comment: If we're looking at a standardized test taken in tenth grade, two years prior to high school graduation, I'm not sure that those are accurately measuring what a student is able to do when they are preparing to enter our first-year courses on campus. Chair Gauthier: I think the people from ISAT mentioned that it was a test for tenth grade, not a test for entering, but they were trying to show that it doesn't make a big difference. Senator: Many times, we talk about admission scores also being used as placement scores so that a certain score on SAT/ACT or ISAT presumably would help place students into the first-year courses that they are most qualified for. As somebody who used to work with first year writing students, I am concerned with the timing of completion of standardized tests, especially if we are going to continue collecting ISAT scores from students in tenth grade, and potentially use them for admissions and placement. Chair Gauthier: The data also shows that the GPA alone is not a fair indicator. There are large differences among GPAs from different places. Also, the choice of courses that go into the GPA can change from one place to the other. It's hard to deal with such limited data.

Provost: I just confirmed with my colleague in the State Board Office that the ISAT is moved to eleventh grade, so that it could be used for the purpose of college admissions. But it will be a number of years before we see enough data from 11th grade results. So one element of this big decision about admissions is ISAT. And of course, we still have SAT/ACT and GPA.

Senator: I am still confused about what decisions are actually being made. On the one hand, it sounds like the State Board is making a decision, on the other, it sounds like we are making an independent decision. Provost: We determine our admission criteria. Our bylaws, as you all know, say the faculty determine admission criteria, and we'll go through the proper process. But we must fold our criteria into the state "direct admit" system, which could be complicated by another test that's completely different, the ISAT. We need to learn more about ISAT. Jean-Marc is going to a meeting next week for further discussion about how the ISAT is being used in the

state. Hearing more about that will be very useful before we make a final recommendation. The statewide direct admit can really help us by communicating to students accurately if they get into the U of I. There's also value in us being aligned with Boise State. We need to do what's best for us, but it would be nice if we aligned, so we don't have a "letter of 6" and a "letter of 7" with U of I on its own. I don't know exactly how things will play out with the state discussion.

Senator: To recap, we must decide what our admission standards are for our own purposes. At the same time, there's some kind of deadline where that decision gets communicated to the state so it can be folded into the direct admit process. Provost: I don't think we want to be on an island. It will have to be in coordination with others, which is part of these meetings that Jean-Marc is going to. Chair Gauthier: The minimum GPA is also problematic. A GPA of 2.6 is not very discerning – almost everybody could get into the U of I – whereas a GPA of 3 would really separate two different groups. But I think we need to look at the problems one by one.

Senator: Do you know when these letters are sent to students? I assume, probably before the application season. Provost: We can't wait until then. Our own admission materials are printed in late spring and start being used at events such as Envision Idaho. So we have an internal deadline by which we really need to do this, and we need to do it rather soon. This statewide conversation originally gave us a deadline of next week, but that was extended because we need more discussion, and we don't even have all the information about ISAT.

Senator: Does the communication to admitted students go to students and to colleges and universities? Provost: It goes to students about the four-year institutions and the four two-year schools. That's where we get the 8. We have four community colleges and four universities and colleges.

Secretary: Do you know if anybody feels that a test for a particular state is not a good idea?

Chair Gauthier: Yes, that's another component of the discussions. It's complicated, because those tests are run by companies who are trying to sell the test.

Senator: In response to that, it's part of a consortium including a number of states. The assessment consortium is nationally known. I'm not concerned with it as a valid measure.

Provost: My understanding is that all standardized tests are run by companies. But the ISAT is designed around the Idaho learning objectives and that's how it's tailored for different states. So, they have similar methodology. But some of the content itself aligns with what the State is trying to teach, which may or may not align exactly with SAT/ACT.

Secretary: That's what concerns me, what the State is trying to teach. I don't think what you learn in English, History, Biology, Algebra etc. should be state dependent. I'm probably over concerned.

Provost: In summary, if the University of Idaho chooses to use ISAT somehow in admissions, that would only be possible for in-state students. For example, Washington students are not going to have those scores, so that's something we'll have to deal with.

- FSH 2300 Student Code of Conduct and Resolution Process – Senator Steve Shook. Steve will go over the UCC meeting from about two weeks ago, concerning FSH 2300 and changes to the General Catalog. UCC received the request to edit General Catalog policies F-1 and O. 2. The part of the policy of concern for F-1 says that a grade of incomplete is assigned as a temporary grade during the pendency of a conduct resolution process under FSH 2300 Student Code of Conduct and Resolution Process. In O-2, one reads that “Consequences for academic dishonesty may be imposed by the course instructor subject to the requirements of FSH 2300.” So, F-1 and O-2 point back to FSH 2300, approved by Faculty Senate and at the UFM last fall. So it's active right now. Relevant policies UCC looked at:

FSH 2300.F-9.a. Instructors may issue an academic outcome separate from any outcome that Dean of students may impose if under the code, there is a finding of responsibility for academic dishonesty/conduct. If there's no finding of responsibility for academic dishonesty/misconduct, the policies below apply:

FSH 2300.F-9.b.10. "The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student."

FSH 2300.F-9.b.11. "In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of 'incomplete' until the process is complete." UCC decided to table the request mostly because of two concerns. One is an academic freedom issue and the other one is an existing policy issue. One of the basic tenets of academic freedom is that faculty can determine, without any outside influence, what the student evaluation will be for any course that the faculty member is teaching. This is actually already codified in our policy and the General Catalog. There is FSH 1640.02.C-4 and C-5, which sets the Academic Hearing Board stipulated procedures. These policies recognize the relationship between academic freedom and grades and contemplate issues arising from grades resulting from academic dishonesty. Similar comments apply to General Catalog Policy E-6, which says that the assignment of grades and correction grades are the sole prerogative of the instructor, which goes against FSH 2300, stating that a faculty member cannot assign a grade until they get the decision back from the Dean of students. At UCC, we believe this is a violation of academic freedom and FSH 1640. They Academic Hearing Board (AHB) cannot change a grade or require that it be changed. That's largely due to E. 6 in the General Catalog. It may order that the grade it considers appropriate also be recorded on the student's academic records. Policies E. 5 or C. 5 state that it's within the purview of the Hearing board to hear an appeal against the grade imposed by instructors as a result of academic misconduct.

Discussion:

A senator recalls a policy by which a faculty member cannot change grade once it's been made final unless there's been a procedural or computational error. Steve: There is, along with a time window associated with that. And there's another issue with I believe it's You know, if you give them an incomplete grade, a student has the ability to drop a course and never get a grade if they can still drop the course, and the faculty member has no ability to assign an academic grade. Follow-up question: So even within the one-year period, would this this scenario you're putting forward here this. You think this would fit within the ability of a faculty member to change the grade under E-6? Steve: I believe it does.

Secretary: I think it would fit into procedural errors, but we need to look at that.

Blaine Eckles: Basically, what we're trying to do is assert the due process rights for students that may be found in violation of the code of conduct. Our advice here is not to come to a conclusion. Faculty do have the right to grade a student on the merits of whatever work they do, but they don't have a right to make the determination. Students have the right to an appeal process. We can easily continue to work on the language, and I know Cari is working on that. We have had situations where faculty members have assigned a grade to a student, but they were never notified about the rights to appeal. We're trying to make sure this kind of situation is addressed. Steve, you point out an excellent point, which I want to make sure we address. We don't want students that have engaged in academic dishonesty and violated our code to get out of a penalty that a faculty member assigns by withdrawing from the course. I've actually reinstated students previously, when they've tried to use that loophole. Those are some things we need to continue working through. But we absolutely need to make sure the due process

rights of students are protected, because we're legally bound to do that. So we can absolutely continue working on that language. We are not far from a converging point.

Lindsay Brown: as we look at revising this language, currently the catalog is silent as to whether a student can withdraw even with the dishonesty grade. It is something that we run into quite frequently, and I would love to see it addressed.

Blaine Eckles: It's complex. Which is why we want to make the policy as clear as possible. We're happy to continue working on the language that respects the academic freedom of our faculty in the assignment of grades, but also understand the due process rights for our students under the student code of conduct.

Steven: How would Faculty Senate leadership like UCC to proceed? I'm assuming working with Cari and Blaine on these policies and with Lindsey about dropping out of a course to avoid disciplinary actions under FSH 2300.

Provost: Do you have an idea what you want changed, or is that up for further discussion?

Steve: I think it's up for further discussion. I shared a lot with Cari already and with FSL. It's probably going to come from the DoS office through UCC.

Blaine Eckles: We're happy to continue working. And I agree with Lindsay. We want to see a change to the policy that basically reinstates students so that they cannot avoid the appropriate outcome or penalty.

There was some additional discussion on the importance of reporting instances of academic dishonesty to the Dean of Students.

- **Space for the Healing Garden.**
A senator reported concerns from constituents about the location chosen for the Healing Garden, between PEB and the Ed Building. Was there an in-depth analysis of how that space is used? Furthermore, they think that the location, in between two buildings looking down at it, is not a private space suitable for a place of reflection. Dean of Students Blaine Eckles, chair of the Healing Garden committee, explained that the committee selected that site after considering several options. An in-depth analysis of how the space is used was not conducted and is not typical in the construction of any building. Another senator suggested posting a note in the Daily Register to let people know that the stakes are up in the location and invite them to send any comments to the Dean of Students.
- **FSH 1520 Faculty Senate Bylaws. Number of senators per College – Vice Chair Haltinner.**
This concerns the current policy regarding the makeup of Senate. The language confused me for a while, so I wanted to run by you all an idea to simplify it. Currently, the policy states that *“each college, except for COGS, elects one Senator for each 50 or a major fraction thereof, full time equivalent faculty members in the college provided, however, that each college has at least one senator.”* This is how I understand the current policy: when we have 0 to 76 full time equivalent seats in a college, we get one seat at Senate, and then from there up, it's one more for each additional group of 50. What if we just use that 50 across the board, so that one seat is 0 to 49, 50 to 99 is 2 seats, and so on. Note, though, that this change would impact the representation. She wanted to run this by the senate for feedback.
Discussion:
Generally, senators seemed interested in continuing the conversation. Although the current language is accurate, more clarity would be helpful. One part of this proposal is just to clarify the current language. There were no objections to this. But adding additional seats is a much more significant step, to be considered very carefully.
Some senators thought that, with more people, it may be harder to find consensus.

The Provost was concerned that, the more people we have, the harder it is to fill those positions for some colleges. It has been difficult to fill the current number of roles, so additional senators also take people out of other committee service. We should consider how much service capacity we have.

Vice Chair Haltinner: I wonder if there is a good reason to go up to 76 for that second rep, and only increments of 50 after that. That seems odd. The Provost doesn't know the background on that.

For the next meeting, Vice Chair Haltinner will map how the college representation would change, should the policy be revised as suggested.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:54pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 21

Tuesday, February 13, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals.

Absent: Miller

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #20, February 6, 2024, were approved as distributed.

Chair's Report:

- Admission criteria: a proposal is forthcoming and will go through the appropriate process as mandated by FSH 4120 for permanent catalog changes. We are asked by the State Board to deliver a senate-approved proposal before the end of the month, if possible, thus, the timeline is tight. A meeting about admission standards in the state will take place in Boise on February 27.
- The Artificial Intelligence plus Machine Learning, AI+ML Exhibition will be in the Reflections Gallery, in the ISUB building, from Monday April 1st to Saturday April 13. The exhibition covers a selection of current AI projects from faculty and students at the U of I. There will be around 20 posters and interactive media on several monitors. The list of topics includes image analysis, computer vision with ML, generative AI, expertise and assessment, Chat GPT tutorials, animation with diffusion and machine learning, text to 3D scene. Please let your units know that they can submit via email to vtd@uidaho.edu. The deadline 03/17/2024.

Discussion:

A senator asked for clarification about the February 27th meeting. Who is attending this meeting? Do we know what kind of proposal is forthcoming? When will we see that proposal? **Chair Gauthier's response:** The meeting in Boise is a meeting of the board to decide what would work for a U of I, Boise State University and other institutions. So, it's not a decision meeting. It's more like a collegial discussion. **Provost Lawrence:** all 8 institutions should present admissions criteria by which they can be admitted through the state's direct admission letters. We must get those criteria to them rather soon, which is why we are under some pressure. Of course, this must tie into our new admissions criteria in the catalog, should we change them. We are gathering all the relevant information, so we can have a more informed conversation about the various options. Going into the ISAT test, some people feel very strongly that it's a great indicator of college success, but we need more information and ISAT data. So, we're still assembling all the pieces. And then, we can bring proposed admission standards forward through the process that Jean-Marc mentioned. If we decide on a change, it will be a permanent catalog change to be pursued by the processes outlined in FSH.

A senator argued that UCC has jurisdiction over the admission standards, but UCC has heard nothing about this. And if there's a proposal to change permanently our admission standards, it's not happening, and shouldn't happen, by next week. It should maybe happen a year from now, unless you just really want to short circuit the faculty governance process and rush something through without us being able to consider it. That's totally unfair and it's not following the process. If there's some other emergency, then it's understandable. Provost Lawrence's response: Our plan is to follow the process and go to UCC first. Senator: So, we're trying to have a proposal to discuss in a week. UCC should do a thorough reading and discuss it and then make a recommendation to bring to this body. Chair Gauthier: We were hoping to have all elements by this week. Senator: I don't see how it can be implemented this coming academic year. There's no way to go through a fair process. The Secretary noted that, while going through UCC is important and it's what we will do, FSH 1520 Constitution of the University Faculty gives to the faculty the responsibility to establish admission standards.

Question from another senator: What is the best way to deliver comments from constituents about admission standards? Should we bring them to senate or send them to the leadership?

Chair Gauthier's response: Please keep FSL in the loop about any feedback you receive.

Provost's Report:

- Three-minute Thesis Competitions. This is a statewide competition where our students give a three-minute presentation on their research. UI students received first place, second place, and third place. One of our very own, Abbey Rode, who is our GPSA representative at senate, won first place. She will go on to the regional competition as our state representative. Congratulations, Abbey!
- The next faculty gathering is two weeks, Tuesday, February 27th. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurtry. Please spread the word.
- NWCCU, the U of I's accreditor, agreed with our assertion that the affiliation with the University of Phoenix is not a substantive change and requires no approval or further action by the commission. See today's memo from President Green.

Committee Reports (voting):

- **Proposed changes to the University Catalog**
 - UCC 537 Bioethics Undergraduate Certificate – Aleta Quinn, Department of Politics and Philosophy.
The certificate has the purpose of demonstrating competence with conceptual issues and scientific reasoning and also ethical issues that arise and scientific practice specifically with respect to the life sciences.
No questions.
Vote: 21/21 yes. Motion passes.
- **Proposed Changes to the Administrative Procedures Manual (non-voting):**
 - APM 50.35 Compensation Guidelines for Exempt Employees (Deletion) – Ashley Rodriguez, Senior HR Business Partner, Human Resources.

We are proposing to delete this APM, because the information contained in this item is now maintained on the Human Resources website.
No questions.

Announcements and Communications:

- Information on First Aid Training and Stations on Campus – Beau Babcock, Occupational Safety Technician.

Beau is an occupational safety specialist with Environmental Health and Safety (EHS). He talked about safety resources at the university. For more information, visit <https://www.uidaho.edu/dfa/division-operations/ehs>. There, one can find detailed description of [first aid](#).

Reach out to Beau at safety@uidaho.edu for any questions on high-quality first aid kits. First aid kits are a departmental responsibility to purchase and upkeep.

EHS also manages the Automatic External Defibrillator (AED) program as an integral part of the university's commitment to safety. They maintain a Moscow [AED map](#) and list. We have approximately 80 AED in total and probably about 70 on the main campus. We do have quite a few on our extensions as well.

For information on all safety training, follow the link to <https://www.uidaho.edu/dfa/division-operations/ehs/safety-training>

Beau is the only instructor now. He tries to offer at least one CPR class per month. Just email Beau or follow the links. He can help you sign up and register for the class or arrange for a special class just for your group.

Discussion:

Senators made very useful suggestions, such as including the floor number on the maps, which would facilitate locating the first aid kit or the AED.

Senator: Is it possible to take a refresher course in First Aid? Beau: Unfortunately upon further discussion with leadership EHS cannot offer CPR training to those who do not need the CPR certification. EHS needs a department index number before you can register for CPR training. If you do not need a CPR card, you can just sit in the class. Since we have a limit of 8 people per class, priority is given to those who need a CPR card, but you can join the next class. The same applies to cases when the department cannot pay for the class.

Senator: The 911 operator asks for the precise location of the emergency. Most of us know building names but not street addresses. Will this cause a delay in the emergency response? Beau suggested giving the 911 operator as much information as possible on the location, although they should be able to identify the building's location from its name. A senator suggested placing the building postal address on the AED device, which was received as a great suggestion.

- First Gen Forward Designation – Brooke Blevins, Dean, College of Education, Health and Human Sciences

The number of first generation (First Gen) students continues to increase on our campus (currently, about 50% of our students are First Gen). To help us think more comprehensively about how we serve First Gen. Students, we have begun an initiative to be part of the First Gen Scholars Network, which is part of NASPA and comes from the Center for First Generation Student Success. Alongside Dean Kahler, Jenny LeBeau, the Office of the Dean of Students, our Center for Multicultural Affairs, our Center for Disabilities Access Resources, and several other

institutional partners, the College of Education, Health, and Human Sciences is embarking on submitting a proposal to have us recognized as part of the First Gen Scholars Network. They hope to find a faculty member who would partner with us in the initial proposal stage, which is a data gathering phase. They want to make sure they have faculty representation.

Some of the benefits: it's free of charge for us. The institution must be a member of NASPA and celebrate First Gen Students' Day, both of which requirements we already meet.

This is a free opportunity to network with other institutions serving First Gen students in our State. BSU is a member of this network, and so is LCSC. As a member of this network, BSU is a step ahead of us. We shouldn't be left behind in the state of Idaho. As we're thinking about how we improve graduation and retention rates, this is going to play a pivotal role in how we can better serve our First Gen Students.

We'll receive public identification as a member of the network; we will be listed on the Center's website and will connect with a team of folks who are heavily involved in research and practice around first generation student success; we will have the opportunity to participate in professional development; We'll be able to work together to craft institutional mission and vision, particularly around First Gen student success.

We will set goals and monitor progress. They are gathering data and planning how to best analyze it.

Discussion:

There was a reminder that a faculty member who's had the experience of being a First Gen Student is preferable.

- Slate Presentation – Dean Kahler, Vice Provost Strategic Enrollment Management and Brenda White, Slate Strategy Director

Slate is a tool to communicate with prospective graduate and undergraduate students and is useful in many more applications. Our contract with VandalStar is about to expire. Slate is already available and would replace Vandal Star, which costs us \$159K per year. It has not yet been discontinued; we want the faculty to participate in this dialogue. Functions that we can easily move from Vandal Star, to mention a few, are appointment scheduling, setting flags and reporting capabilities.

Discussion:

The Secretary said that this may be a welcome change, since many faculty have been unhappy with VandalStar, to her knowledge.

What features are improved by Slate over Vandal Star? Response: Besides the saving aspect, Slate is flexible and customizable. Vandal Star is very limited and is not a communication tool.

With Slate, users can build portals.

A senator agreed that Vandal Star was not everyone's favorite. However, when we make a change, we must learn a new system, which will also present problems.

There are no additional software costs.

Are there any other costs? Response: There will be training costs and such. Slate may even eliminate the need for other software.

Some senators remained concerned about another switch. Chair Gauthier noted that a huge number of people use Slate, so we can easily get feedback about the system. Vice Provost Dean Kahler confirmed that this is currently the most popular tool. Most important, it's customizable, meaning that users can change what they don't like into something that fits their needs.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:30pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Description of Change

Our BS in Geology was revamped last year to include two new options (Energy Resiliency and Sustainable Mining). In doing this, the physical geology option was deleted and students in our department need it if they do not want to choose one of the other focus areas.

Will this request have a fiscal impact of \$250K or greater?

No

The degree map is a guide for the timely completion of your curricular requirements. Your academic advisor or department may be contacted for assistance in interpreting this map. This map is not reflective of your academic history or transcript and it is not official notification of completion of degree or certificate requirements. Please contact the Registrar's Office regarding your official degree/certificate completion status.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

Have learning outcomes changed?

Yes

Learning Objectives

Graduates will demonstrate fundamental content knowledge about geologic time, Earth materials and structure, and Earth systems and processes.

Graduates will be proficient in discipline-specific skills including field methods, laboratory methods, mapping and geospatial analysis, experimentation and data analysis, application of principles from other fields to the solution of geological problems, and specific technical skills appropriate to their intended careers.

Graduates will solve geologic problems using their skills in spatial reasoning, temporal reasoning, systematic thinking, and data collection and analysis.

Graduates will be able to design and carry out a project, collaborate with others, and communicate their work and their results to varying audiences.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Our BS in Geology was revamped last year to include two new options (Energy Resiliency and Sustainable Mining). In doing this, the physical geology option was deleted and students in our department need it if they do not want to choose one of the other focus areas. This option is essential for professional licensing in Geology.

Learning Outcomes Template - BS Geological Sciences 2019-2020.docx

Reviewer Comments

Rebecca Frost (rfrost) (Wed, 07 Feb 2024 19:55:10 GMT): Adjusted Option selection as per R Love 2/7/24 to allow a credit range for requirements to 36-38 for Physical Geography option. Adjusted study plan to reflect elective areas and bring degree map total to 120 credits.

Sydney Beal (sbeal) (Fri, 09 Feb 2024 18:49:42 GMT): Replaced MSE 201 with ENGR 215 per subject/number course change

Sydney Beal (sbeal) (Tue, 13 Feb 2024 18:55:39 GMT): Missing learning outcomes added per UCC 2/12/24 meeting

Key: 239

Learning Outcomes System Template

NOTE: The purpose of this form is to avoid any loss of data from a system time out or other event. **Please type your assessment plan/report into this template first.** Then cut and paste it into the assessment system. If for some reason your information is not saved, please send this completed template to assessment@uidaho.edu to have it manually entered by our staff. (You can add more rows to the table if you have more learning outcomes, or leave rows blank if you have fewer.)

Program Name:

B.S Geological Sciences

Name and email of person completing this form:

Leslie Baker lbaker@uidaho.edu

What did your program learn from this assessment activity and how has it influenced the curriculum, teaching and/or assessment process?

Overall, most of our students are performing well in challenging lab- and field-based courses, and are successfully integrating the content from different classes and acquiring appropriate habits of mind for geologists. This is in agreement with informal reporting from employers who hire our students for summer internships and permanent positions.

Instructors are tweaking their exam practices in hopes of improving how well those assessments really reflect students' knowledge and skills. Instructors are also incrementally improving rubrics for better transparency in grading and better communication to students about course expectations.

The courses used in this assessment are all taught by early-career faculty (all pre-tenure, including two first-year faculty). The information from this activity will help them in refining their newly developed courses. Faculty with several years' experience have shared their materials and practices, such as example assignments and rubrics, with newer faculty in order to assist them.

Our faculty have recently completed a correlation matrix relating knowledge and skills taught in all our classes to content domains tested on the National Association of State Boards of Geology's Fundamentals of Geology examination. This process examined our curriculum to ensure that we were teaching all the necessary content for the learning outcomes below. This does not directly affect the results of this assessment process, but it is still important; this assessment process examines whether our students are learning the content we are teaching, but the correlation matrix examines whether that content is what our students need to know as future professional earth scientists. Initial analysis indicates that our program is satisfactory in most respects, but we will be using the matrix to guide future decisions on curriculum.

| Learning Outcome | Tools and Procedures | Benchmarks | Findings | Changes |
|---|--|--|---|--|
| <p>Graduates receiving a B.S. in Geological Sciences will demonstrate fundamental content knowledge about geologic time, Earth materials and structure, and Earth systems and processes.</p> | <p>Direct Measures</p> <p>Program assessment questions on class final exams for GEOL 324 Sedimentology and Stratigraphy, GEOL 326 Igneous and Metamorphic Petrology, GEOL 345 Structural Geology, and GEOL 422 Principles of Geophysics. At least one fall and one spring course will be assessed each year.</p> | <p>Performance Target</p> <p>Undergraduate geology majors will receive scores above 80% on the assessment questions.</p> | <p>Direct Findings</p> <p>Geol 324: The class average score for these questions was 80% This average is somewhat lower than previous years.</p> <p>Geol 422: Out of ten majors, nine scored above 80% on these questions, with an average score of 89%. One student scored a 76, and one student received an incomplete and has not yet taken the final exam.</p> | <p>Geol 324: For AY 2019-2020, switching exam structure to two short exams (lower score dropped) plus final exam, to improve student knowledge retention.</p> <p>Geol 422: In AY 2018-2019, changed final exam format to take-home, to reduce text anxiety and reliance on memorization, and allow students to focus on demonstrating what they know. This appears to have improved overall exam performance. In AY 2019-2020, mid-term exam format will also be changed to take-home.</p> |

| Learning Outcome | Tools and Procedures | Benchmarks | Findings | Changes |
| Graduates receiving a B.S. in Geological Sciences will solve geologic problems using their skills in spatial reasoning, temporal reasoning, systematic thinking, and data collection and analysis. | Direct Measures Final project results for GEOL 490, Field Geology II. This capstone course integrates knowledge from all previous geology classes. It requires students to use their discipline-specific technical skills, make observations, and analyze and interpret their data. | Performance Target Students will score at least 80% overall on the elements evaluated by the rubric to evaluate the scientific quality of the final map project product and writeup. This rubric includes categories for quality of field notes, lithologic descriptions, geologic history, maps, and cross sections. | Direct Findings Three students were enrolled in Geol 490 in Summer 2018. All three performed extremely well on all metrics of scientific quality. Final course grades were two A's and one B, so this benchmark was met by all members of this very small class. | Instructorship of this class is changing in Summer 2019, but main class practices are not expected to change significantly. The 2019 class will be larger and will be a more statistically significant sampling of our overall student population. |

| Learning Outcome | Tools and Procedures | Benchmarks | Findings | Changes |
| Graduates receiving a B.S. in Geological Sciences will be able to design and carry out a project, collaborate with others, and communicate their work and their results to varying audiences. | Direct Measures GEOL 490 Field Geology II field mapping project scores. Students work in pairs or groups (this is required in the field for safety purposes) and collaborate on planning, data collection, and interpretation. Students write their own project reports with analysis of their data. | <u>Performance Target</u> Students will score at least 80% overall on the elements evaluated by the rubric to evaluate the project design, collaboration, and communication aspects of the final mapping project and writeup. | Direct Findings This small class worked as a single group in the field. Their final mapping project was well designed and collaborative work was carried out effectively. The final reports were very good, with the exception that some students' draftsmanship of their maps and cross sections was not up to professional standards. | Basic draftsmanship, and standards of drafting map figures, will be emphasized more in future classes. We will examine where this skill can be developed in earlier classes, such as the Geol 290 Field Methods class, or the Geol 345 Structural Geology lab. |
| Aligns with University Learning Outcomes: (Move the circle over the outcome desired) Learn and Integrate <u>Think and Create</u> <u>Communicate</u> <u>Clarify Purpose and Perspective</u> <u>Practice Citizenship</u> | Indirect Measures | <u>Stretch Target</u> | Indirect Findings | |

Will this request have a fiscal impact of \$250K or greater?

No

Academic Level

Undergraduate

College

Art & Architecture

Department/Unit:

Art & Design

Effective Catalog Year

2024-2025

Program Title

Graphic Design Undergraduate Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

12

CIP Code

50.0409 - Graphic Design.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Discribe the financial impact

The certificate has been developed with existing courses. There is no financial impact.

Curriculum:

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

COURSE NAME: ART 271 INTRODUCTION TO INTERACTION DESIGN

Meeting Days and Times:

Semester Offered:

INSTRUCTOR: Dave Gottwald and/or Graduate Teaching Assistant with industry experience and practicum.

Catalog Description

Creative problem solving with emphasis on User Experience (UX) and User Interaction (UI) design practices for mobile devices. Exercises and projects assigned include project proposal, product identity, design personas, user personas, development of user interfaces, documentation of product user flows, and live prototyping. Design process, prototyping, and industry standard software will be used. Two 3-hour studios per week and assigned work.

Learning Outcomes

- Introduction to User Experience (UX) and User Interaction (UI) design fundamentals including research, sketching, fidelity, iteration, prototyping, and documentation.
- Understanding of the unique properties and constraints of 2D layout within the mobile device screen space.
- Exploration of interface design for mobile devices using existing design systems by customizing and redesigning existing assets.
- Development of product persona and app identity.
- Development of proto user personas based on interviews.
- Documentation of app user flows and writing a basic use case.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Conception and design of visual communications and systems involving various integrations of the elements of professional practice. Understanding and use of basic visual communication principles and processes. Ability to incorporate research and findings regarding people and contexts into communication design decision-making. Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills.

COURSE REQUIREMENTS

7 Projects – Use design process to investigate alternate solutions to visual problems involving typography and letterforms towards refined final projects.

Participation – Contribution during critiques, documentation process, willingness to share suggestions with your peers and incorporate peer and instructor feedback into your own work.

Total Hours**12****Courses to total 12 credits for this certificate**

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Students will gain:

- Ability to conceive and design visual communications and systems.
- Ability to read text and image for implicit and explicit messages.
- Ability to use the design process and design thinking.
- Understanding of how to incorporate research and findings regarding people and contexts into decision-making.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Each of the three upper division studio options has a portfolio requirement. The final studio will function like a capstone experience for the certificate. The portfolio will tell the most of the story regarding the achievement of learning outcomes for the program. The portfolio of projects is the primary artifact for assessment. Secondary artifacts include prompt-driven reflective writings with each project. Assessment of each portfolio will cover the learning outcomes for the program.

How will you ensure that the assessment findings will be used to improve the program?

The quality of portfolios will demonstrate which skills are being developed and synthesized by our students. We will use our assessment findings of their project work to adjust the briefs given in each studio course and refine our introduction of the software skills required to successfully complete those projects. This may include advising students to take additional courses to better support their efforts.

What direct and indirect measures will be used to assess student learning?

Portfolios, critical writing, and exams will provide direct measures. Oral reflection (during critiques) and written reflections will provide indirect measures.

When will assessment activities occur and at what frequency?

Interim and final critiques will be conducted at the end of each studio project with a range of as few as two (more complex upper division work), and up to six projects per studio. Written reflections will be prompted at the conclusion of each formal critique. History/theory courses will have three or more options for assessment activities including quizzes, projects and essays, and exams.

Student Learning Outcomes

Learning Objectives

Students will gain:

- Ability to conceive and design visual communications and systems.
- Ability to read text and image for implicit and explicit messages.
- Ability to use the design process and design thinking.
- Understanding of how to incorporate research and findings regarding people and contexts into decision-making.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

By offering this certificate we help the other programs reduce the need to stand up similar courses and allow for a way to recognize this concentrated coursework that leads to competence in graphic design. Primary audiences include non-majors, adjacent majors, continuing education for those in the workplace, and other non-traditional students. A future version of this certificate might include online/asynchronous options.

Reviewer Comments

Linda Lundgren (lindalundgren) (Fri, 06 Oct 2023 23:53:55 GMT): 10/6/23: Program description attached. Answer to self-support changed to no.

Linda Lundgren (lindalundgren) (Sat, 07 Oct 2023 01:53:16 GMT): Rollback: Rolling back to dept. Both boxes of the student learning outcomes need to match.

Rebecca Frost (rfrost) (Thu, 21 Dec 2023 20:16:08 GMT): Curriculum edited to catalog standards.

Key: 525

COURSE NAME: ART 221, INTRODUCTION TO GRAPHIC DESIGN

Meeting Days and Times:

Semester Offered: Fall

INSTRUCTOR: Delphine Keim and/or Graduate Teaching Assistant with industry experience and practicum

Course Overview

(Catalog Description) Creative problem solving with emphasis on two dimensional solutions to formal and conceptual design problems; fundamental design principles are reiterated and developed into visual communication using word and image. Design process, prototyping and industry standard software will be used. Recommended Preparation: Working knowledge of digital design software or ART 216 (strongly recommended). Two 3-hour studios per week and assigned work.

LEARNING Outcomes

- Students will be introduced to simplified communication design problems and consider strategies used by designers to address similar design problems.
- Students will translate skills gained in foundation courses into working with type and image. Students will communicate the nature of their work in informal and formal critiques and reflections, written assignments, and presentations.
- In their research for creative work and written assignments, students will learn about how designers worldwide are addressing design problems and connect the research to their own design interests.
- Participation in the studio culture will help individuals cultivate a variety of leadership skills as well as independent drive. The studio is a microcosm of opportunities to apply principles of ethical leadership collaborative engagement and socially responsible behavior. As students develop and reflect upon their projects in class, they realize their interdependence with respect to the studio and critique culture they establish. Students learn to invest in and respect one another for their creative activity. Students along with faculty hold each other accountable for showing respect and commitment to a diversity of collective and independent goals.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: understanding and use of basic visual communication principles and processes, the ability to conceive and to design visual communications and systems involving various integrations of the elements of professional practice and understanding of and the ability to use technology.

COURSE REQUIREMENTS

4 Projects – Use design process to investigate alternate solutions to visual problems towards refined final projects.

Peer Assessment – Written feedback given to students in small groups with instructor input.

Written Reflection – Demonstrates awareness of strengths and weaknesses to solution for the past assignment.

Participation – Contribution during critiques, documentation of design process, willingness to share suggestions with your peers.

525: Graphic Design Certificate Program Description

The Graphic Design Certificate is a concentrated area of study that develops visual design competency through coursework in three areas: history/theory, lower-division design studios, and culminating in an upper-division design studio. With this certificate students develop portfolios demonstrating competency in graphic design relevant to many professional settings.

525 Program Description:

The Graphic Design Certificate is a concentrated area of study that develops visual design competency through coursework in three areas: history/theory, lower-division design studios, and culminating in an upper-division design studio. With this certificate students develop portfolios demonstrating competency in graphic design relevant to many professional settings.

COURSE NAME: ART 205 VISUAL CULTURE

Meeting Days and Times:

Semester Offered:

INSTRUCTOR: Staff

Catalog Description

An introduction to the interdisciplinary approaches in art history, visual studies, film and media studies, sociology, and the general field of cultural studies that constitute the field of visual culture. Visual Culture addresses the societal, cultural, economic, aesthetic, and political dimensions and provocations of images and the visual in our contemporary world. This course offers a broad introduction to the most important critical and theoretical methods for the analysis, critique, and evaluation of visual culture.

Learning Outcomes

- Broad overview of what constitutes visual culture and how that context varies from region to region and people to people around the world.
- Understanding of the distinction between micro- and macro- levels of visual artifacts.
- Examination of the intersections between different kinds of visual artifacts.
- Understanding of the distinction and overlap between visual and material culture.
- Examination of how visual culture and the artifacts produced by societies varies and evolves over time, from early civilizations to the present.
- Acquisition of a critical vocabulary of visual culture and its varied products.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills.

COURSE REQUIREMENTS

Projects / Responses – Students have the option of responding to given prompts by creating a visual work or writing a short research paper.

Exams – Multiple-choice assessment drawn from questions submitted by students.

Participation – Contribution to in-class discussion.

COURSE NAME: ART 213 HISTORY AND THEORY OF MODERN DESIGN

Meeting Days and Times:

Semester Offered:

INSTRUCTOR: Staff

Catalog Description

Study, analysis, and critique of design history and theory from Industrial Revolution to the present. Historical and theoretical analysis of the emergence of the industrial, product, graphic, and interaction/experience design professions and the relationship between design products, corporations, and global communities. Throughout the course we will critically examine and address the theoretical and practical aspects of contemporary design. Topics considered include: industrialization and modernism; design and propaganda; design and the modernist avant-garde; design and nationalism; the politics and economics of global design movements; and design and advertising.

Learning Outcomes

- Exploration of the history and theory of modernist design from the 18th to the late 20th Century.
- Discussion of such critical topics as the sources of modernism, graphic design's role in propaganda, the Avant-garde and its relationship to popular culture, multinational corporations and global economics, the politics and economics of design, and a comparison of contemporary design cultures.
- Review of the intersections and cross-fertilization between art and design in global context with an exploration of Modernist design in non-European settings: China, Japan, Latin America, the Middle East, and the Indian subcontinent.
- Examination of products, furniture, packaging, advertising, typography, and examples of graphic and industrial design through the lens of historical development and impact.
- Examination of the theoretical dimensions of modernism.
- Acquisition of a critical vocabulary of contemporary design.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills.

COURSE REQUIREMENTS

Online Discussion – Students are provided with readings and videos to review on their own and then engage in asynchronous online discussion posts.

Projects / Responses – Students have the option of responding to given prompts by creating a visual work or writing a short research paper.

Final Project – Students have the option of creating a final visual work or writing a final paper.

Participation – Contribution to in-class discussion.

COURSE NAME: ART 373 INTERACTION / EXPERIENTIAL DESIGN: STUDIO

Meeting Days and Times:

Semester Offered:

INSTRUCTOR: Dave Gottwald

Catalog Description

User Experience (UX) and User Interaction (UI) problem solving at an advanced level. In addition to design and development, strategies for client interaction, project presentation and production preparation are practiced. Two 3-hour studios per week and assigned work.

Learning Outcomes

- Advanced problem solving leveraging prior understanding of User Experience (UX) and User Interaction (UI) design fundamentals.
- Advanced testing and documentation.
- Development of User Experience Use Cases and how to properly tell the story of a use case in one's professional portfolio.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Conception and design of visual communications and systems involving various integrations of the elements of professional practice. Acquisition of collaborative skills and the ability to work effectively in interdisciplinary or multidisciplinary teams to solve complex problems. Understanding and use of basic visual communication principles and processes. Ability to incorporate research and findings regarding people and contexts into communication design decision-making. Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills. Experience in applying design knowledge and skills beyond the classroom.

COURSE REQUIREMENTS

Various Projects – Project work varies from term to term. Past assignments have included cohesive multimedia design solutions spanning spaces and screens using established intellectual properties (IP) in a fictionalized setting, and service learning (client work) for the University of Idaho Office of Information Technology (OIT).

Participation – Group presentations, collaboration and ideation with outside stakeholders, documentation of process, willingness to share suggestions with your peers and incorporate peer, instructor, and stakeholder feedback into your own work.

COURSE NAME: ART 222 INTRODUCTION TO TYPOGRAPHY

Meeting Days and Times:

Semester Offered: Spring

INSTRUCTOR: Dave Gottwald and/or Graduate Teaching Assistant with industry experience and practicum.

Catalog Description

Visual communication design with emphasis on typography, letterforms, and typographic syntax. Ideas are developed into thoughtful visual communication through the exploration of typographic conventions and the use of type as image. Introduction to history and theory of typography. Working knowledge of digital design software or ART 216 (strongly recommended). Two 3-hour studios per week and assigned work.

Learning Outcomes

- Introduction to the fundamentals of typographic communication using a combination of Adobe Photoshop, Adobe Illustrator, Adobe InDesign, and Adobe Acrobat.
- In-depth exploration of the design fundamentals of 2D composition, combining text and image across a variety of standard formats with a strong focus on professional typesetting skills from posters to multi-page documents. Students also learn about the expressive nature of typography and explore how type can function as image.
- Develop the ability to think, write, and speak about typography critically and fluently.
- Participation in the studio culture will help individuals cultivate a variety of leadership skills as well as independent drive. The studio is a microcosm of opportunities to apply principles of ethical leadership collaborative engagement and socially responsible behavior. As students develop and reflect upon their projects in class they realize their interdependence with respect to the studio and critique culture they establish. Students learn to invest in and respect one another for their creative activity. Students along with faculty hold each other accountable for demonstrating respect and commitment to a diversity of collective and independent goals.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Solve communication problems, describe and respond to the audiences and contexts which communication solutions must address, create and develop visual form in response to communication problems, understanding of tools and technology.

COURSE REQUIREMENTS

7 Projects – Use design process to investigate alternate solutions to visual problems involving typography and letterforms towards refined final projects.

Participation – Contribution during critiques, documentation process, willingness to share suggestions with your peers and incorporate peer and instructor feedback into your own work.

COURSE NAME: ART 321, GRAPHIC DESIGN CONCEPTS

Meeting Days and Times:

Semester Offered: Fall

INSTRUCTOR: Delphine Keim

Course Overview Advanced design problems that center on individual development and the exploration of contemporary design issues. The conceptual potential of words and images is emphasized. Individual and group work. Two 3-hour studios per week and assigned work.

LEARNING Outcomes

To reinforce a design process that:

- Values a broad preliminary exploration of ideas.
- Allows the designer to think critically about content.
- Gives the designer an opportunity to incorporate critical input.
- Concludes with a well-researched, well-conceived final project.

To gain a deep understanding of:

- The use of a unifying concept.
- What makes communication compelling.
- Visual communication that is appropriate for a given audience.
- The use of formal design principles with a strong concept.
- For portfolios to demonstrate the knowledge gained in the course.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Conception and design of visual communications and systems involving various integrations of the elements of professional practice. Acquisition of collaborative skills and the ability to work effectively in interdisciplinary or multidisciplinary teams to solve complex problems. Understanding and use of basic visual communication principles and processes. Ability to incorporate research and findings regarding people and contexts into communication design decision-making. Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills. Experience in applying design knowledge and skills beyond the classroom.

COURSE REQUIREMENTS

This work should leverage every facet of your ability as a designer. Projects have been devised to help students generate work that demonstrates sound visual design, showcases conceptual ability, and is executed in a highly refined and professional manner.

Assignments include:

- 3 individual projects (highly refined, portfolio-ready work)
- 3 exercises (less realized work where the focus is on design thinking)
- group work (systems thinking, teamwork)
- participation and reflection with each assignment; you will be assessing each other with respect to participation in group work
- a final portfolio with work that has been revised after the critiques

Participation – Group presentations, collaboration and ideation with outside stakeholders, documentation of process, willingness to share suggestions with your peers and incorporate peer, instructor, and stakeholder feedback into your own work.

COURSE NAME: ART 322, GRAPHIC DESIGN STUDIO

Meeting Days and Times:

Semester Offered: Spring

INSTRUCTOR: Delphine Keim

Course Overview

Visual communication design and problem solving in the community environment; strategies for client interaction, project presentation and production preparation are practiced. Two 3-hour studios per week and assigned work.

LEARNING Outcomes

This course will allow you to apply design and problem-solving skills to real world assignments.

You will:

- develop your conceptual, compositional, and technical abilities
- develop your ability to communicate, interact and present to clients
- learn about designing in a community context
- develop your visual and verbal presentation skills
- focus on your individual development and point of view as a designer

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Conception and design of visual communications and systems involving various integrations of the elements of professional practice. Acquisition of collaborative skills and the ability to work effectively in interdisciplinary or multidisciplinary teams to solve complex problems. Understanding and use of basic visual communication principles and processes. Ability to incorporate research and findings regarding people and contexts into communication design decision-making. Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills. Experience in applying design knowledge and skills beyond the classroom.

COURSE REQUIREMENTS

Projects You will complete about 4 projects over the semester. Because these are stakeholder driven projects, they will have real-world deadlines for which we will work out production schedules as a class.

Writing You will be required to provide written project briefs, conceptual synopses, and project reflections as evidence that you are fully considering your design process as well as synthesizing information gained in the undertaking of projects.

Presentations This semester you will be presenting your work to clients. This is different from discussions with peers in critique. We will focus on how to discuss the features of your design based on the stakeholder's priorities.

Critiques Work will be reviewed prior to client meetings. Your contribution during critiques is a part of your participation grade.

COURSE NAME: ART 323 HISTORY OF TYPOGRAPHY

Meeting Days and Times:

Semester Offered: Spring

INSTRUCTOR: Dave Gottwald

Catalog Description

History and Theory of Typography: Historical and theoretical survey of typography and graphic technologies from the invention of writing to the present. The course begins with the study of writing before the printing press and continues detailing the origin of European typography and design for printing through the Industrial Revolution and the invention of photography. The study of typography in the modernist era follows, including close examination of Bauhaus and Neue Typographie, the Swiss Neue Graphik and subsequent developments in America and abroad. A detailed study of the practical, historical, and theoretical implications of digital typography will conclude the course.

Learning Outcomes

- Understanding of how the design of Roman letterforms has evolved from before the printing press to the digital age.
- Intimate familiarity with how changes in technology affect typeface design and application, and how this evolution is inseparable from the practices of publishing, printing, and visual and graphic design.
- Production of visual works that express the visual literacy of specific time periods in the history of Roman letterforms.
- Ability to identify key typefaces by era, classification, and name.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills.

COURSE REQUIREMENTS

7 Projects / Responses – Students have the option of producing a written response to a prompt, or a visual response in the form of a poster. Non-majors tend to take the written option. Poster designs must draw from a list of provocations and must typographically represent the sensibilities and visual literacy of the time period each is commenting on.

14 Typeface Tracings – Students must complete weekly typeface alphabet tracings, one in pencil and one in ink, of typeface samples that represent each era of study.

Midterm + Final Project – A single visual essay project divided into two parts. Students must find a set number of typographic samples from a list of categories spanning all eras of study, photograph them, and conduct basic research including classification and, if possible, designer, date, and typeface family name.

Participation – Contribution to discussion and critiques, willingness to share suggestions with your peers and incorporate peer and instructor feedback into your own work.

COURSE NAME: ART 370 INTERACTION / EXPERIENTIAL DESIGN: CONCEPTS

Meeting Days and Times:

Semester Offered:

INSTRUCTOR: Dave Gottwald

Catalog Description

Advanced design problems that center on individual development and the exploration of contemporary design issues surrounding user, visitor, and guest experiences. The conceptual potential of placemaking using both mobile and tablet devices within the built environment is emphasized, as is prototyping, testing, and revision. Individual and group work. Two 3-hour studios per week and assigned work.

Learning Outcomes

- More advanced survey of User Experience (UX) and User Interaction (UI) design fundamentals including research, iteration, prototyping, revision, and documentation.
- Testing of live app prototypes with users and making design revision decisions based on that testing.
- Core understanding of the differences between users (digital technology), visitors (didactic contexts such as galleries and cultural institutions), and guests (hospitality contexts such as dining, retail, and recreation).
- Exploration of the interactive interplay between spaces and environments and devices and screens.
- Working in team(s) as well as with external stakeholders.

ACCREDITATION CRITERIA This class meets the following NASAD Performance Criteria in whole or in part: Conception and design of visual communications and systems involving various integrations of the elements of professional practice. Acquisition of collaborative skills and the ability to work effectively in interdisciplinary or multidisciplinary teams to solve complex problems. Understanding and use of basic visual communication principles and processes. Ability to incorporate research and findings regarding people and contexts into communication design decision-making. Understanding of and the ability to use technology. Understanding of and ability to use basic research and analysis procedures and skills. Experience in applying design knowledge and skills beyond the classroom.

COURSE REQUIREMENTS

Various Projects – Project work varies from term to term. Past assignments have included app design for mobile, tablet, and web; exhibit design for art galleries and cultural institutions, and service learning (client work) for the University of Idaho Office of Information Technology (OIT).

Participation – Group presentations, collaboration and ideation with outside stakeholders, documentation of process, willingness to share suggestions with your peers and incorporate peer, instructor, and stakeholder feedback into your own work.

Department/Unit:

American Indian Studies

Effective Catalog Year

2024-2025

Program Title

Indigenous Research and Education Graduate Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

13

CIP Code

45.0201 - Anthropology.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

The new certificate will produce new tuition and fees.

Curriculum:

All required coursework must be completed with a grade of B or better (O-10-b (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|---|---|-----------|
| ANTH 580 | Course ANTH 580 Not Found | 1 |
| ANTH 581 | Course ANTH 581 Not Found | 2 |
| ED 592 | Decolonizing, Indigenous, and Action-Based Research Methods | 3 |
| NRS 598 | Internship | 1 |
| 6 credits of electives chosen in consultation with a faculty advisor. | | 6 |
| Total Hours | | 13 |

Courses to total 13 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. Students will be able to navigate the academic institution in ways that affirm Indigenous peoples' goals and priorities while recognizing the ways the institutionalized educational systems has not been designed around these goals and priorities.
2. Students will understand the various ways that Indigenous STEM is practiced in communities, and how these relate to their own research and education.
3. Students will be able to examine how learning has happened in Indigenous communities and will be able to compare these with learning as presented in academic institutions.
4. Students will be able to explain principles of ethical partnering with Tribal communities and the ways that these are put into practice in their own research.
5. Students will analyze tribal sovereignty as a bedrock for addressing complex issues of sustainable community development in the US.
6. Students will design research that engages methodologies grounded of Indigenous epistemologies, ontologies and axiologies and scholarship in the field of Indigenous research.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

This new academic certificate will be part of the yearly assessment process of the university. Signature assignments will be embedded in courses. Students' performance on signature assignments will be used to determine the percentages of students who failed to meet, meet, or exceed expectations articulated in the program learning outcomes.

How will you ensure that the assessment findings will be used to improve the program?

Assessment findings will be reviewed during the annual assessment cycle and used to refine course signature assignments and course materials and content.

What direct and indirect measures will be used to assess student learning?

Signature assignments embedded in courses will serve as direct measures. Indirect measures will include consultations with local tribal representatives and invested parties.

When will assessment activities occur and at what frequency?

All learning outcomes will be assessed during a two year cycle (3 per year).

Student Learning Outcomes

Learning Objectives

1. Students will be able to navigate the academic institution in ways that affirm Indigenous peoples' goals and priorities while recognizing the ways the institutionalized educational systems has not been designed around these goals and priorities.
2. Students will understand the various ways that Indigenous STEM is practiced in communities, and how these relate to their own research and education.
3. Students will be able to examine how learning has happened in Indigenous communities and will be able to compare these with learning as presented in academic institutions.
4. Students will be able to explain principles of ethical partnering with Tribal communities and the ways that these are put into practice in their own research.
5. Students will analyze tribal sovereignty as a bedrock for addressing complex issues of sustainable community development in the US.
6. Students will design research that engages methodologies grounded of Indigenous epistemologies, ontologies and axiologies and scholarship in the field of Indigenous research.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Certificate in Indigenous Research and Education (CIRE) is foundational to the University of Idaho land-grant mission and seeks to enhance relational accountability between the university and Indigenous lands, people, and Knowledge Systems within the state of Idaho and the region. There is a desire within Indigenous communities and other invested communities to support transformative teaching and research that furthers partnerships with Tribes and Tribal-State nation building in higher education. Tribal leaders and representatives of the 11 MOU Tribe's serving on the President's Native American Advisory Committee note the need for increased graduate preparation to build capacity among both Tribal and non-Tribal citizens to develop an integrated understanding and application of Native American law, educational philosophies, and integrated natural resource management. This call is driven by a need to have research informed by Indigenous and relational methodologies in assessing and addressing contemporary social and environmental challenges.

The creation of ANTH 580; 581 and NRS 5xx and 598 will be a compilation of individual courses already being offered. ED 592 is an established class already being offered. No additional workload is expected.

Request Type

Add/Drop/Change an academic regulation

Effective Catalog Year

2024-2025

Title

B-4 Regulation Edit

Request Details

We would like to add additional language to the B-4 regulation titled "Registration for Courses Without Completion of Prerequisites" (see specific language in the attached document).

This change clarifies the regulation in regards to allowing faculty to drop students who do not (or no longer) meet prerequisites for a course. It includes a time frame that this may be processed and communicated to the student.

Reviewer Comments

Brenda Helbling (brendah) (Fri, 02 Feb 2024 17:39:19 GMT): Edits in second document discussed with Lindsey Brown. 2.2.24 BRH

Key: 110

B-4. Registration for Courses Without Completion of Prerequisites

Students who have not completed the prerequisites to a course for which they are otherwise eligible may register for the course with the instructor's approval.

Students who no longer meet course prerequisites may be dropped from the course no later than three business days prior to the first day of classes for the semester. Students must be notified of any subsequent changes in registration due to not meeting prerequisites.

B-4. Registration for Courses Without Completion of Prerequisites

Students who have not completed the prerequisites to a course for which they are otherwise eligible may register for the course with the instructor's approval.

When not waived, sStudents who ~~no longer~~ do not successfully complete a ~~meet~~ course prerequisite(s) in a prior semester, may be dropped from the course no later than three business days prior to the first day of classes for the semester. Students must be notified of any subsequent changes in registration due to not meeting prerequisites.

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 23

Tuesday, February 27, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals, Buchen.

Absent: Lawrence (excused), Miller.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #22, February 20, 2024, were approved as distributed.

Chair's Report:

- After meeting with Boise State University and the Idaho State Board of Education admissions change workgroup, we received more data and some answers to your questions. See attached slide. Dave Paul (UCC) requested more data before the next UCC meeting. FSL will review the information and data tomorrow at our Wednesday meeting and prepare a packet including the latest data from Wes. All the information we gather will go to UCC and their recommendation will come to Faculty Senate.

Provost's Report, delivered by Vice Provost for Faculty Diane Kelly-Riley:

- The next faculty gathering is today, from 4:30 to 6:30. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurry. The next will be on March 21, 2024, Vandal Ballroom, hosted by COS. <https://www.uidaho.edu/provost/faculty-gathering>
- Midterm grades are due March 11.
- Discussion: With reference to Senate Bill 1357, a senator asked if there is any insight on what the implications for us can be, such as the university inability to provide training in diversity and inclusion. Vice Provost Kelly-Riley concurs that the bill is concerning. Nothing is definite yet. She will share the question with the Provost, who may be in a better position to address it. Of course, anyone, acting as a private citizen, can contact their legislators to express their concerns. Faculty Senate is very concerned about the potential impact of this bill.

Suggestion: invite Yolanda Bisbee to visit with Faculty Senate.

There were inquiries concerning a recent article on Idaho Ed News, see link below, <https://www.idahoednews.org/top-news/u-of-i-funnels-7-3-million-of-phoenix-consulting-to-greens-former-employer/>, and a request for updates on the lawmakers' resolution to sue the University of Idaho to stop the University of Phoenix purchase, see link below, <https://idahocapitalsun.com/2024/02/15/idaho-legislators-threaten-lawsuit-to-stop-university-of-phoenix-purchase/>. Vice Provost Kelly-Riley will inform Provost Lawrence of these questions.

There was a reminder that both LC and U of I are on the JFAC agenda tomorrow, at 7:00am MT.

Announcements and Communications:

- Language regarding Faculty Senate membership, FSH 1520 – Kristin Haltinner, Vice Chair of Faculty Senate, Attach #2.

Kristin led a discussion on possible revisions of FSH 1520 Constitution of the University Faculty Article V, Section 2. The question is whether we should clarify and/or modify the current language “...*The faculty of each college, except the College of Graduate Studies, elects one senator for each 50, or major fraction thereof, full-time-equivalent faculty members in the college, provided, however, that each college faculty elects at least one senator...*” This means that every college has one senator, and one more for every additional 50 FTE faculty in the college. Kristen considered several scenarios (see Attach.2). All options, other than keeping the current policy, impact the membership, namely, some colleges would lose or gain senate representatives.

Discussion:

A senator asked whether there is a need for a change, and, if so, what the reasons are. Other senators noted that the current policy disadvantages small colleges regarding the addition of a second senator. On the other hand, it was also acknowledged that it may be hard to fill new seats from small colleges, who have less service capacity, without additional workload for the college delegates.

A senator demonstrated that the current language gives most stability of senate membership with respect to changes in the number of faculty in the colleges.

Ultimately, there was consensus that no substantive changes should be made, although the current language could be clarified.

- Committee on Committees Update – Kristin Haltinner, Vice Chair of Faculty Senate.
Review of Committee Audit. Members of the Committee on Committees are looking into selected committees which may need revisions/repurposing:
 - FSH 1640.20 University Budget & Finance Committee. Revisit roles under the new budget model.
 - FSH 1640.43 Faculty Appeals Hearing Board. Procedures, scope of the board.
 - FSH 1640.58 Ubuntu. Simplify membership – too many non-voting members who seldom attend.
 - FSH 1640.81 University Staff Compensation Committee. Large workload.
 - FSH 1640.10 Americans with Disabilities Act Advisory Committee. Unfilled seats. There are ideas but no money. Reinstatement of the budget for this committee?
 - FSH 1640.36 Dismissal Hearing Committee. Heavy emotional load, summer meetings not anticipated in FSH 1640.36.
 - FSH 1640.77 Scientific Misconduct Committee. The workload became large last year, possibly because of a note in the Daily Register.
 - FSH 1640.06 Administrative Hearing Board. Lack of gender diversity since a long time.Other updates:
 - Adding one non-voting seat from the VGP team on the Admission Committee.
 - Committee preference survey. Appointments will be made in March.
 - Sustainability Certificate. Last Fall, Faculty Senate appointed the existing interdisciplinary faculty-led committee as an *ad-hoc* program committee to serve as the ‘relevant unit and college’ authorized to submit curricular proposals per FSH 4120-E.

This committee is empowered to propose the UG Academic Certificate in Sustainability to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum. They are now seeking approval to turn the *ad hoc* committee into a permanent university-level committee.

- As a reminder, the Secretary points to recently revised FSH 1620 University-Level Committees, in particular FSH 1620 E-13 “ *Prepare a succinct year-end report for submission to the Faculty Senate in care of the Office of the Faculty Secretary for distribution as needed. The report must contain: number and approximate frequency of the committee meetings; committee goals; committee accomplishments...*”

New Business:

- OIT changes:
 - New online software approval ticketing process. Suggestion: invite Teresa Amos or Dan Ewart to clarify.
 - MyUI will soon replace VandalWeb. Suggestion: invite Dan Ewart for updates.

- Generally, fees for membership in professional organizations are not reimbursed by the university. Why so and are there exceptions?

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:40pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

YEAR 2019

Meeting # 22

Tuesday, February 20, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Torrey Lawrence (w/o vote), Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals.

Absent: Miller

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #21, February 13, 2024, were approved as distributed.

Chair's Report: None. Chair Gauthier will use this time for the New Business part of the meeting.

Provost's Report:

- The next faculty gathering is two weeks from today, Tuesday, February 27th. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurtry. Please [RSVP](#).
- We don't have an education week in the Legislature as we've had in the past. Next week, U of I is going to be at both the Education Committees and JFAC. And we're seeing a lot more interest in what's happening in Boise right now. Just a reminder – that university resources are not to be used for political activity. Sometimes people, accidentally and with good intentions, may give the impression that they are speaking on behalf of the University or use their university email address. You are welcome to reach out to your representatives and legislators, but you should do that on a personal account such as Gmail. I just wanted to remind people as we get into the busier part of the session.

Discussion:

A senator saw a report that Moody's is evaluating our credit ratings based on the purchase of the University of Phoenix and asked the Provost for comments. Provost Lawrence responded that the question is best addressed to our financial team. It's complex, and beyond his area of expertise, but he will follow up. From the beginning there has been discussion and analysis of the impact of the acquisition on U of I's credit rating. It's been minimal but some different opinions came out recently which we don't agree with. The Provost will check with Brian Foisy and come back to this question.

Back to the issue of political activities, a senator added some comments. It's their understanding that we are allowed to identify ourselves as faculty at the University of Idaho, but we must say that we are acting/speaking as an individual, not as a university representative. Provost Lawrence: Reporting your job title or role is different than speaking on behalf of the institution. But sometimes people don't make it very clear whether it's one or the other. Thanks for clarifying, but it really does get confusing and can be misinterpreted. It's probably better to err on the side of caution, and just be a citizen of the State.

Vice Chair Haltinner inquired about an article in the Daily News, which reports that U of I minimized the risks of the purchase, saying that losses will be limited to \$10M per year. She asked whether they are referring to risks taken by “Four Three Education” and not the University of Idaho. Provost Lawrence has not seen the article. He will review it and come back to this question.

Committee Reports (voting):

- **Proposed changes to the University Catalog**

- UCC 239 Geology (BS) – Renee Love, Earth and Spatial Sciences, Attach. #2.
Our BS in Geology was revamped last year to include two new options (Energy Resiliency and Sustainable Mining). In doing this, the physical geology option was deleted and students in our department need it if they do not want to choose one of the other focus areas. This option is essential for professional licensing in Geology.
Discussion: None.
Vote: 20/20 yes. Motion passes.
- UCC 525 Graphic Design Undergraduate Certificate – Stacy Isenbarger, Art and Design, Attach. #3.
We have several students who have come to the college of art and architecture to take a suite of classes because they're excited about graphic design. But we don't have a minor in that area or a certificate. We see this as an opportunity to attract students who are coming in as professionals in other fields, or students who are coming to us from other areas of campus. They take these courses and have that certificate to showcase on their resume.
Discussion: None.
Vote: 21/21 yes. Motion passes.
- UCC 542 Indigenous Research and Education Graduate Certificate – Philip Stevens, Culture, Society and Justice Attach. #4.
This is a graduate certificate in indigenous research and education. This proposal is in response to the desire within Indigenous communities and other invested communities for an interdisciplinary research graduate certificate. We are working with Natural Resources and Education.
Discussion: None
Vote: 21/21 yes. Motion passes.
- UCC 110 B-4 Regulation Edit – Lindsey Brown, University Registrar, Attach. #5.
We would like to add additional language to the B-4 regulation titled "Registration for Courses Without Completion of Prerequisites" (see specific language in the attached document). This change clarifies the regulation in regard to allowing faculty to drop students who do not (or no longer) meet prerequisites for a course. It includes a time frame that this may be processed and communicated to the student. (It was clarified that the revisions as shown on the last page of the attachment are the ones being proposed.)
Discussion:
Some senators asked for clarification about the process. Lindsey responded that academic departments run reports of students who no longer meet course prerequisites and then send the list to her office to drop the students. There are new capabilities supposed to come out this summer for our student information systems that may make

this process more automated. Then, we would run it as a part of our end of term processing.

Senator: I understand that the purpose is to capture situations where students are taking a class in one semester that would meet the prerequisite for a next semester class they want to register for. If they fail that class, they no longer meet the prerequisite. Lindsey: Yes. It has been a longstanding practice. Now, we are codifying it in policy.

In response to another question, Lindsey clarified that the faculty can wave prerequisites. If they do wave it, then, of course, the student wouldn't get dropped.

Senator: How does this actually work? Students don't even have grades three days prior to the next semester in the spring. How do they know, unless somebody notifies them that they're about to fail? Lindsey: Generally, in between spring and fall we have plenty of time. However, in between fall and spring, time can be tight. That's when a quick turnaround is necessary, so that the students have adequate time to find an alternative course and maintain their full-time status. We want to make sure that they are adequately informed and set up for success. Although there's generally enough time in between fall and spring, my office is still working on some of those reports during the closure.

Vote: 22/23 yes. Motion passes.

New Business:

- Update on Admission Criteria – Chair Gauthier. (The slides are attached to these minutes.)
Brief background: Two of the state institutions, BSU and U of I, send to prospective students a “letter of 8” or a “letter of 6.” In the first case, they are notified that they can attend any of the 8 public institutions in the state. In the second case, they are not admitted into either BSU or U of I, but they can attend any of the other 6 institutions.
Summary of the options for admission criteria: We could decide to set a new GPA threshold; or to leave it as it is presently. We can also require a combination of GPA and standardized test scores. (Note from a senator: We're under an emergency action. So, the actual admission criteria (temporarily changed by the emergency action) include the GPA and a standardized test. If we do nothing when the emergency action expires, we go back to requiring the GPA and some standardized test.)

Chair Gauthier proceeded to share data on the differences between ISAT and SAT outcomes. The data is from 2019, because of all that happened afterwards. Such comparison is very difficult given the different nature of the tests and the populations who took them. Instead, Chair Gauthier has prepared some visual comparisons by gender, race, and socioeconomic status for each of the indicators under consideration – ISAT (ELA and Math), SAT, GPA. The comparisons indicate that we don't know enough about those elements to determine a final answer. Still, some trends can be seen. Looking, for example, at the comparison by race, we can see some very strong differences that are, to some extent, mitigated in the SAT outcomes by race. Comparing the outcomes of ISAT ELA and ISAT Math by race suggests that combining those with the GPA may be a reasonable approach.

Discussion:

Senator: Do we have data to compare SAT scores within schools as opposed to across Idaho?

Chair Gauthier: I'm still unclear as to whether we have access to that data.

Senator: Some of our constituents would like to have SAT/ACT scores available, even if optional. They're helpful to some departments. Another question: do your graphs indicate that looking at

the GPA only is misleading? They are too high. Chair Gauthier: Yes, there is clearly grade inflation that favors a particular population.

Senator: Did the data go through some form of statistical analysis to check whether differences are statistically significant? Chair Gauthier: No. The data is limited. I think this is the first year where the data has been more rigorous than in the past.

Senator: There was an article in the Daily News about Washington determining that there's a significant amount of grade inflation. The graph you showed seems pretty good evidence of grade inflation benefiting a particular population. Do you have a similar graph, on the same scale, comparing GPA and SAT or GPA and ISAT? Chair Gauthier: Unfortunately, I don't, but I can ask.

Senator: Aren't we supposed to have a recommendation by next week? Chair Gauthier explained that the timeline has changed. First, UCC will make their recommendation at the beginning of March, which will then come to Senate. Senator's follow-up comment: UCC should look at things we've looked at in the past, like success rate of students admitted at different GPA levels and different SAT levels. I think it's our responsibility to the students to make sure they're going to succeed when they get here.

Senator: You just presented test scores and GPA for students who graduated from Idaho high schools in spring of 2019. Do you know if in 2019 students were still required to take the SAT/ACT? I know they're required to take the ISAT. Do we have any information about what year they completed the ISAT versus the ACT or SAT? The point of the question is that ISAT is taken in the junior year, and, typically, so are ACT and SAT. But they can repeat that test. I'm just trying to figure out how these elements are comparable. Chair Gauthier: The people from the 2019 data took the tenth grade ISAT in the 2016-2017 school year and graduated in the 2018-2019 school year. I don't know if they repeated the test. Senator's follow-up comment: If we're looking at a standardized test taken in tenth grade, two years prior to high school graduation, I'm not sure that those are accurately measuring what a student is able to do when they are preparing to enter our first-year courses on campus. Chair Gauthier: I think the people from ISAT mentioned that it was a test for tenth grade, not a test for entering, but they were trying to show that it doesn't make a big difference. Senator: Many times, we talk about admission scores also being used as placement scores so that a certain score on SAT/ACT or ISAT presumably would help place students into the first-year courses that they are most qualified for. As somebody who used to work with first year writing students, I am concerned with the timing of completion of standardized tests, especially if we are going to continue collecting ISAT scores from students in tenth grade, and potentially use them for admissions and placement. Chair Gauthier: The data also shows that the GPA alone is not a fair indicator. There are large differences among GPAs from different places. Also, the choice of courses that go into the GPA can change from one place to the other. It's hard to deal with such limited data.

Provost: I just confirmed with my colleague in the State Board Office that the ISAT is moved to eleventh grade, so that it could be used for the purpose of college admissions. But it will be a number of years before we see enough data from 11th grade results. So one element of this big decision about admissions is ISAT. And of course, we still have SAT/ACT and GPA.

Senator: I am still confused about what decisions are actually being made. On the one hand, it sounds like the State Board is making a decision, on the other, it sounds like we are making an independent decision. Provost: We determine our admission criteria. Our bylaws, as you all know, say the faculty determine admission criteria, and we'll go through the proper process. But we must fold our criteria into the state "direct admit" system, which could be complicated by another test that's completely different, the ISAT. We need to learn more about ISAT. Jean-Marc is going to a meeting next week for further discussion about how the ISAT is being used in the

state. Hearing more about that will be very useful before we make a final recommendation. The statewide direct admit can really help us by communicating to students accurately if they get into the U of I. There's also value in us being aligned with Boise State. We need to do what's best for us, but it would be nice if we aligned, so we don't have a "letter of 6" and a "letter of 7" with U of I on its own. I don't know exactly how things will play out with the state discussion.

Senator: To recap, we must decide what our admission standards are for our own purposes. At the same time, there's some kind of deadline where that decision gets communicated to the state so it can be folded into the direct admit process. Provost: I don't think we want to be on an island. It will have to be in coordination with others, which is part of these meetings that Jean-Marc is going to. Chair Gauthier: The minimum GPA is also problematic. A GPA of 2.6 is not very discerning – almost everybody could get into the U of I – whereas a GPA of 3 would really separate two different groups. But I think we need to look at the problems one by one.

Senator: Do you know when these letters are sent to students? I assume, probably before the application season. Provost: We can't wait until then. Our own admission materials are printed in late spring and start being used at events such as Envision Idaho. So we have an internal deadline by which we really need to do this, and we need to do it rather soon. This statewide conversation originally gave us a deadline of next week, but that was extended because we need more discussion, and we don't even have all the information about ISAT.

Senator: Does the communication to admitted students go to students and to colleges and universities? Provost: It goes to students about the four-year institutions and the four two-year schools. That's where we get the 8. We have four community colleges and four universities and colleges.

Secretary: Do you know if anybody feels that a test for a particular state is not a good idea?

Chair Gauthier: Yes, that's another component of the discussions. It's complicated, because those tests are run by companies who are trying to sell the test.

Senator: In response to that, it's part of a consortium including a number of states. The assessment consortium is nationally known. I'm not concerned with it as a valid measure.

Provost: My understanding is that all standardized tests are run by companies. But the ISAT is designed around the Idaho learning objectives and that's how it's tailored for different states. So, they have similar methodology. But some of the content itself aligns with what the State is trying to teach, which may or may not align exactly with SAT/ACT.

Secretary: That's what concerns me, what the State is trying to teach. I don't think what you learn in English, History, Biology, Algebra etc. should be state dependent. I'm probably over concerned.

Provost: In summary, if the University of Idaho chooses to use ISAT somehow in admissions, that would only be possible for in-state students. For example, Washington students are not going to have those scores, so that's something we'll have to deal with.

- FSH 2300 Student Code of Conduct and Resolution Process – Senator Steve Shook. Steve will go over the UCC meeting from about two weeks ago, concerning FSH 2300 and changes to the General Catalog. UCC received the request to edit General Catalog policies F-1 and O. 2. The part of the policy of concern for F-1 says that a grade of incomplete is assigned as a temporary grade during the pendency of a conduct resolution process under FSH 2300 Student Code of Conduct and Resolution Process. In O-2, one reads that “Consequences for academic dishonesty may be imposed by the course instructor subject to the requirements of FSH 2300.” So, F-1 and O-2 point back to FSH 2300, approved by Faculty Senate and at the UFM last fall. So it's active right now. Relevant policies UCC looked at:

FSH 2300.F-9.a. Instructors may issue an academic outcome separate from any outcome that Dean of students may impose if under the code, there is a finding of responsibility for academic dishonesty/conduct. If there's no finding of responsibility for academic dishonesty/misconduct, the policies below apply:

FSH 2300.F-9.b.10. "The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student."

FSH 2300.F-9.b.11. "In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of 'incomplete' until the process is complete." UCC decided to table the request mostly because of two concerns. One is an academic freedom issue and the other one is an existing policy issue. One of the basic tenets of academic freedom is that faculty can determine, without any outside influence, what the student evaluation will be for any course that the faculty member is teaching. This is actually already codified in our policy and the General Catalog. There is FSH 1640.02.C-4 and C-5, which sets the Academic Hearing Board stipulated procedures. These policies recognize the relationship between academic freedom and grades and contemplate issues arising from grades resulting from academic dishonesty. Similar comments apply to General Catalog Policy E-6, which says that the assignment of grades and correction grades are the sole prerogative of the instructor, which goes against FSH 2300, stating that a faculty member cannot assign a grade until they get the decision back from the Dean of students. At UCC, we believe this is a violation of academic freedom and FSH 1640. They Academic Hearing Board (AHB) cannot change a grade or require that it be changed. That's largely due to E. 6 in the General Catalog. It may order that the grade it considers appropriate also be recorded on the student's academic records. Policies E. 5 or C. 5 state that it's within the purview of the Hearing board to hear an appeal against the grade imposed by instructors as a result of academic misconduct.

Discussion:

A senator recalls a policy by which a faculty member cannot change grade once it's been made final unless there's been a procedural or computational error. Steve: There is, along with a time window associated with that. And there's another issue with I believe it's You know, if you give them an incomplete grade, a student has the ability to drop a course and never get a grade if they can still drop the course, and the faculty member has no ability to assign an academic grade. Follow-up question: So even within the one-year period, would this this scenario you're putting forward here this. You think this would fit within the ability of a faculty member to change the grade under E-6? Steve: I believe it does.

Secretary: I think it would fit into procedural errors, but we need to look at that.

Blaine Eckles: Basically, what we're trying to do is assert the due process rights for students that may be found in violation of the code of conduct. Our advice here is not to come to a conclusion. Faculty do have the right to grade a student on the merits of whatever work they do, but they don't have a right to make the determination. Students have the right to an appeal process. We can easily continue to work on the language, and I know Cari is working on that. We have had situations where faculty members have assigned a grade to a student, but they were never notified about the rights to appeal. We're trying to make sure this kind of situation is addressed. Steve, you point out an excellent point, which I want to make sure we address. We don't want students that have engaged in academic dishonesty and violated our code to get out of a penalty that a faculty member assigns by withdrawing from the course. I've actually reinstated students previously, when they've tried to use that loophole. Those are some things we need to continue working through. But we absolutely need to make sure the due process

rights of students are protected, because we're legally bound to do that. So we can absolutely continue working on that language. We are not far from a converging point.

Lindsay Brown: as we look at revising this language, currently the catalog is silent as to whether a student can withdraw even with the dishonesty grade. It is something that we run into quite frequently, and I would love to see it addressed.

Blaine Eckles: It's complex. Which is why we want to make the policy as clear as possible. We're happy to continue working on the language that respects the academic freedom of our faculty in the assignment of grades, but also understand the due process rights for our students under the student code of conduct.

Steven: How would Faculty Senate leadership like UCC to proceed? I'm assuming working with Cari and Blaine on these policies and with Lindsey about dropping out of a course to avoid disciplinary actions under FSH 2300.

Provost: Do you have an idea what you want changed, or is that up for further discussion?

Steve: I think it's up for further discussion. I shared a lot with Cari already and with FSL. It's probably going to come from the DoS office through UCC.

Blaine Eckles: We're happy to continue working. And I agree with Lindsay. We want to see a change to the policy that basically reinstates students so that they cannot avoid the appropriate outcome or penalty.

There was some additional discussion on the importance of reporting instances of academic dishonesty to the Dean of Students.

- **Space for the Healing Garden.**
A senator reported concerns from constituents about the location chosen for the Healing Garden, between PEB and the Ed Building. Was there an in-depth analysis of how that space is used? Furthermore, they think that the location, in between two buildings looking down at it, is not a private space suitable for a place of reflection. Dean of Students Blaine Eckles, chair of the Healing Garden committee, explained that the committee selected that site after considering several options. An in-depth analysis of how the space is used was not conducted and is not typical in the construction of any building. Another senator suggested posting a note in the Daily Register to let people know that the stakes are up in the location and invite them to send any comments to the Dean of Students.
- **FSH 1520 Faculty Senate Bylaws. Number of senators per College – Vice Chair Haltinner.**
This concerns the current policy regarding the makeup of Senate. The language confused me for a while, so I wanted to run by you all an idea to simplify it. Currently, the policy states that *“each college, except for COGS, elects one Senator for each 50 or a major fraction thereof, full time equivalent faculty members in the college provided, however, that each college has at least one senator.”* This is how I understand the current policy: when we have 0 to 76 full time equivalent seats in a college, we get one seat at Senate, and then from there up, it's one more for each additional group of 50. What if we just use that 50 across the board, so that one seat is 0 to 49, 50 to 99 is 2 seats, and so on. Note, though, that this change would impact the representation. She wanted to run this by the senate for feedback.
Discussion:
Generally, senators seemed interested in continuing the conversation. Although the current language is accurate, more clarity would be helpful. One part of this proposal is just to clarify the current language. There were no objections to this. But adding additional seats is a much more significant step, to be considered very carefully.
Some senators thought that, with more people, it may be harder to find consensus.

The Provost was concerned that, the more people we have, the harder it is to fill those positions for some colleges. It has been difficult to fill the current number of roles, so additional senators also take people out of other committee service. We should consider how much service capacity we have.

Vice Chair Haltinner: I wonder if there is a good reason to go up to 76 for that second rep, and only increments of 50 after that. That seems odd. The Provost doesn't know the background on that.

For the next meeting, Vice Chair Haltinner will map how the college representation would change, should the policy be revised as suggested.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:54pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

Admissions

ISAT & SAT - Reference year 2019

Eligibility requirements are dependent upon the admissions requirements of Boise State University and the University of Idaho. These two institutions mark the difference between the “Letter of 8” and “Letter of 6” groups. Students receiving a “Letter of 8” can be admitted into any of Idaho’s public institutions while those receiving the “Letter of 6” are not admitted into either Boise State University or University of Idaho.

1. We can decide about a new GPA threshold

or

2. We could leave the GPA threshold similar to what we have.

or

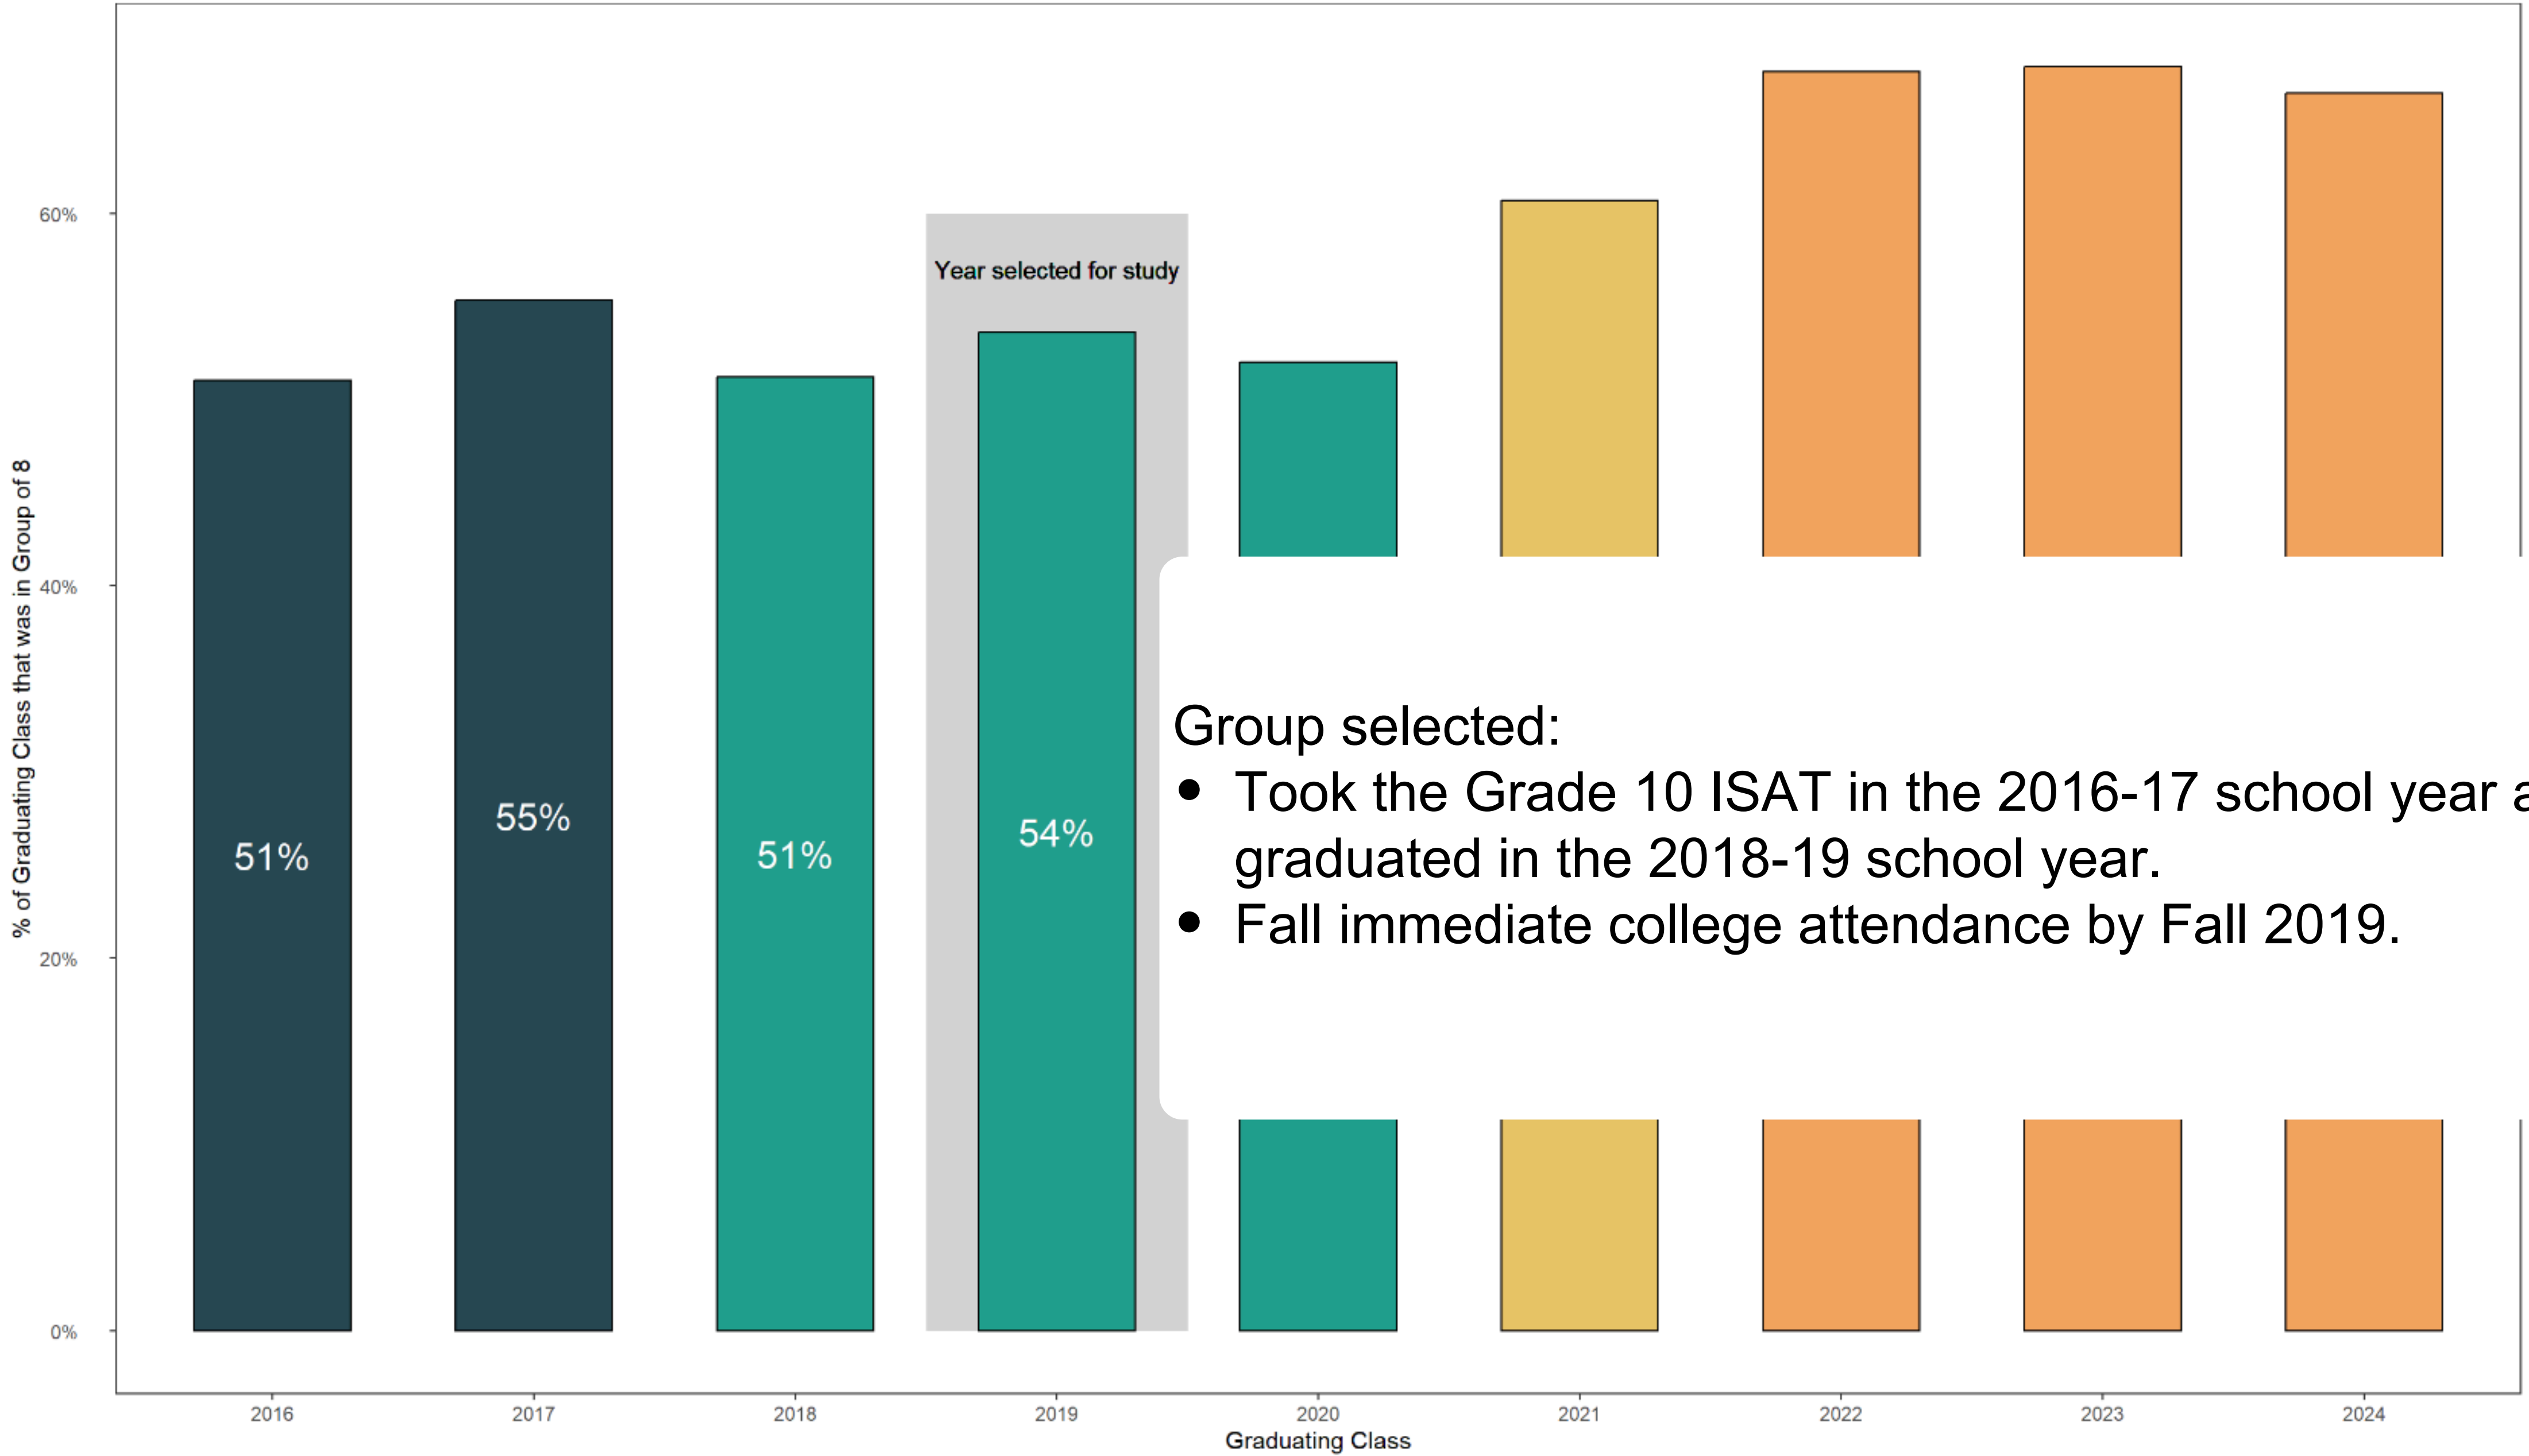

3. We can change the admission criteria by requiring both GPA and SAT/ACT, or GPA and ISAT.

Group of 8 Requirements (GPA \geq 3.0 or SAT*GPA \geq 2835) No Test Requirement (GPA \geq 3.0 or SAT*GPA \geq 2835) + (SAT or ACT Score Required) GPA \geq 2.8 No Test Requirement GPA \geq 2.6 No Test Requirement

Group of 8 Requirements

- (GPA \geq 3.0 or SAT*GPA \geq 2835) No Test Requirement
- (GPA \geq 3.0 or SAT*GPA \geq 2835) + (SAT or ACT Score Required)
- GPA \geq 2.8 No Test Requirement
- GPA \geq 2.6 No Test Requirement

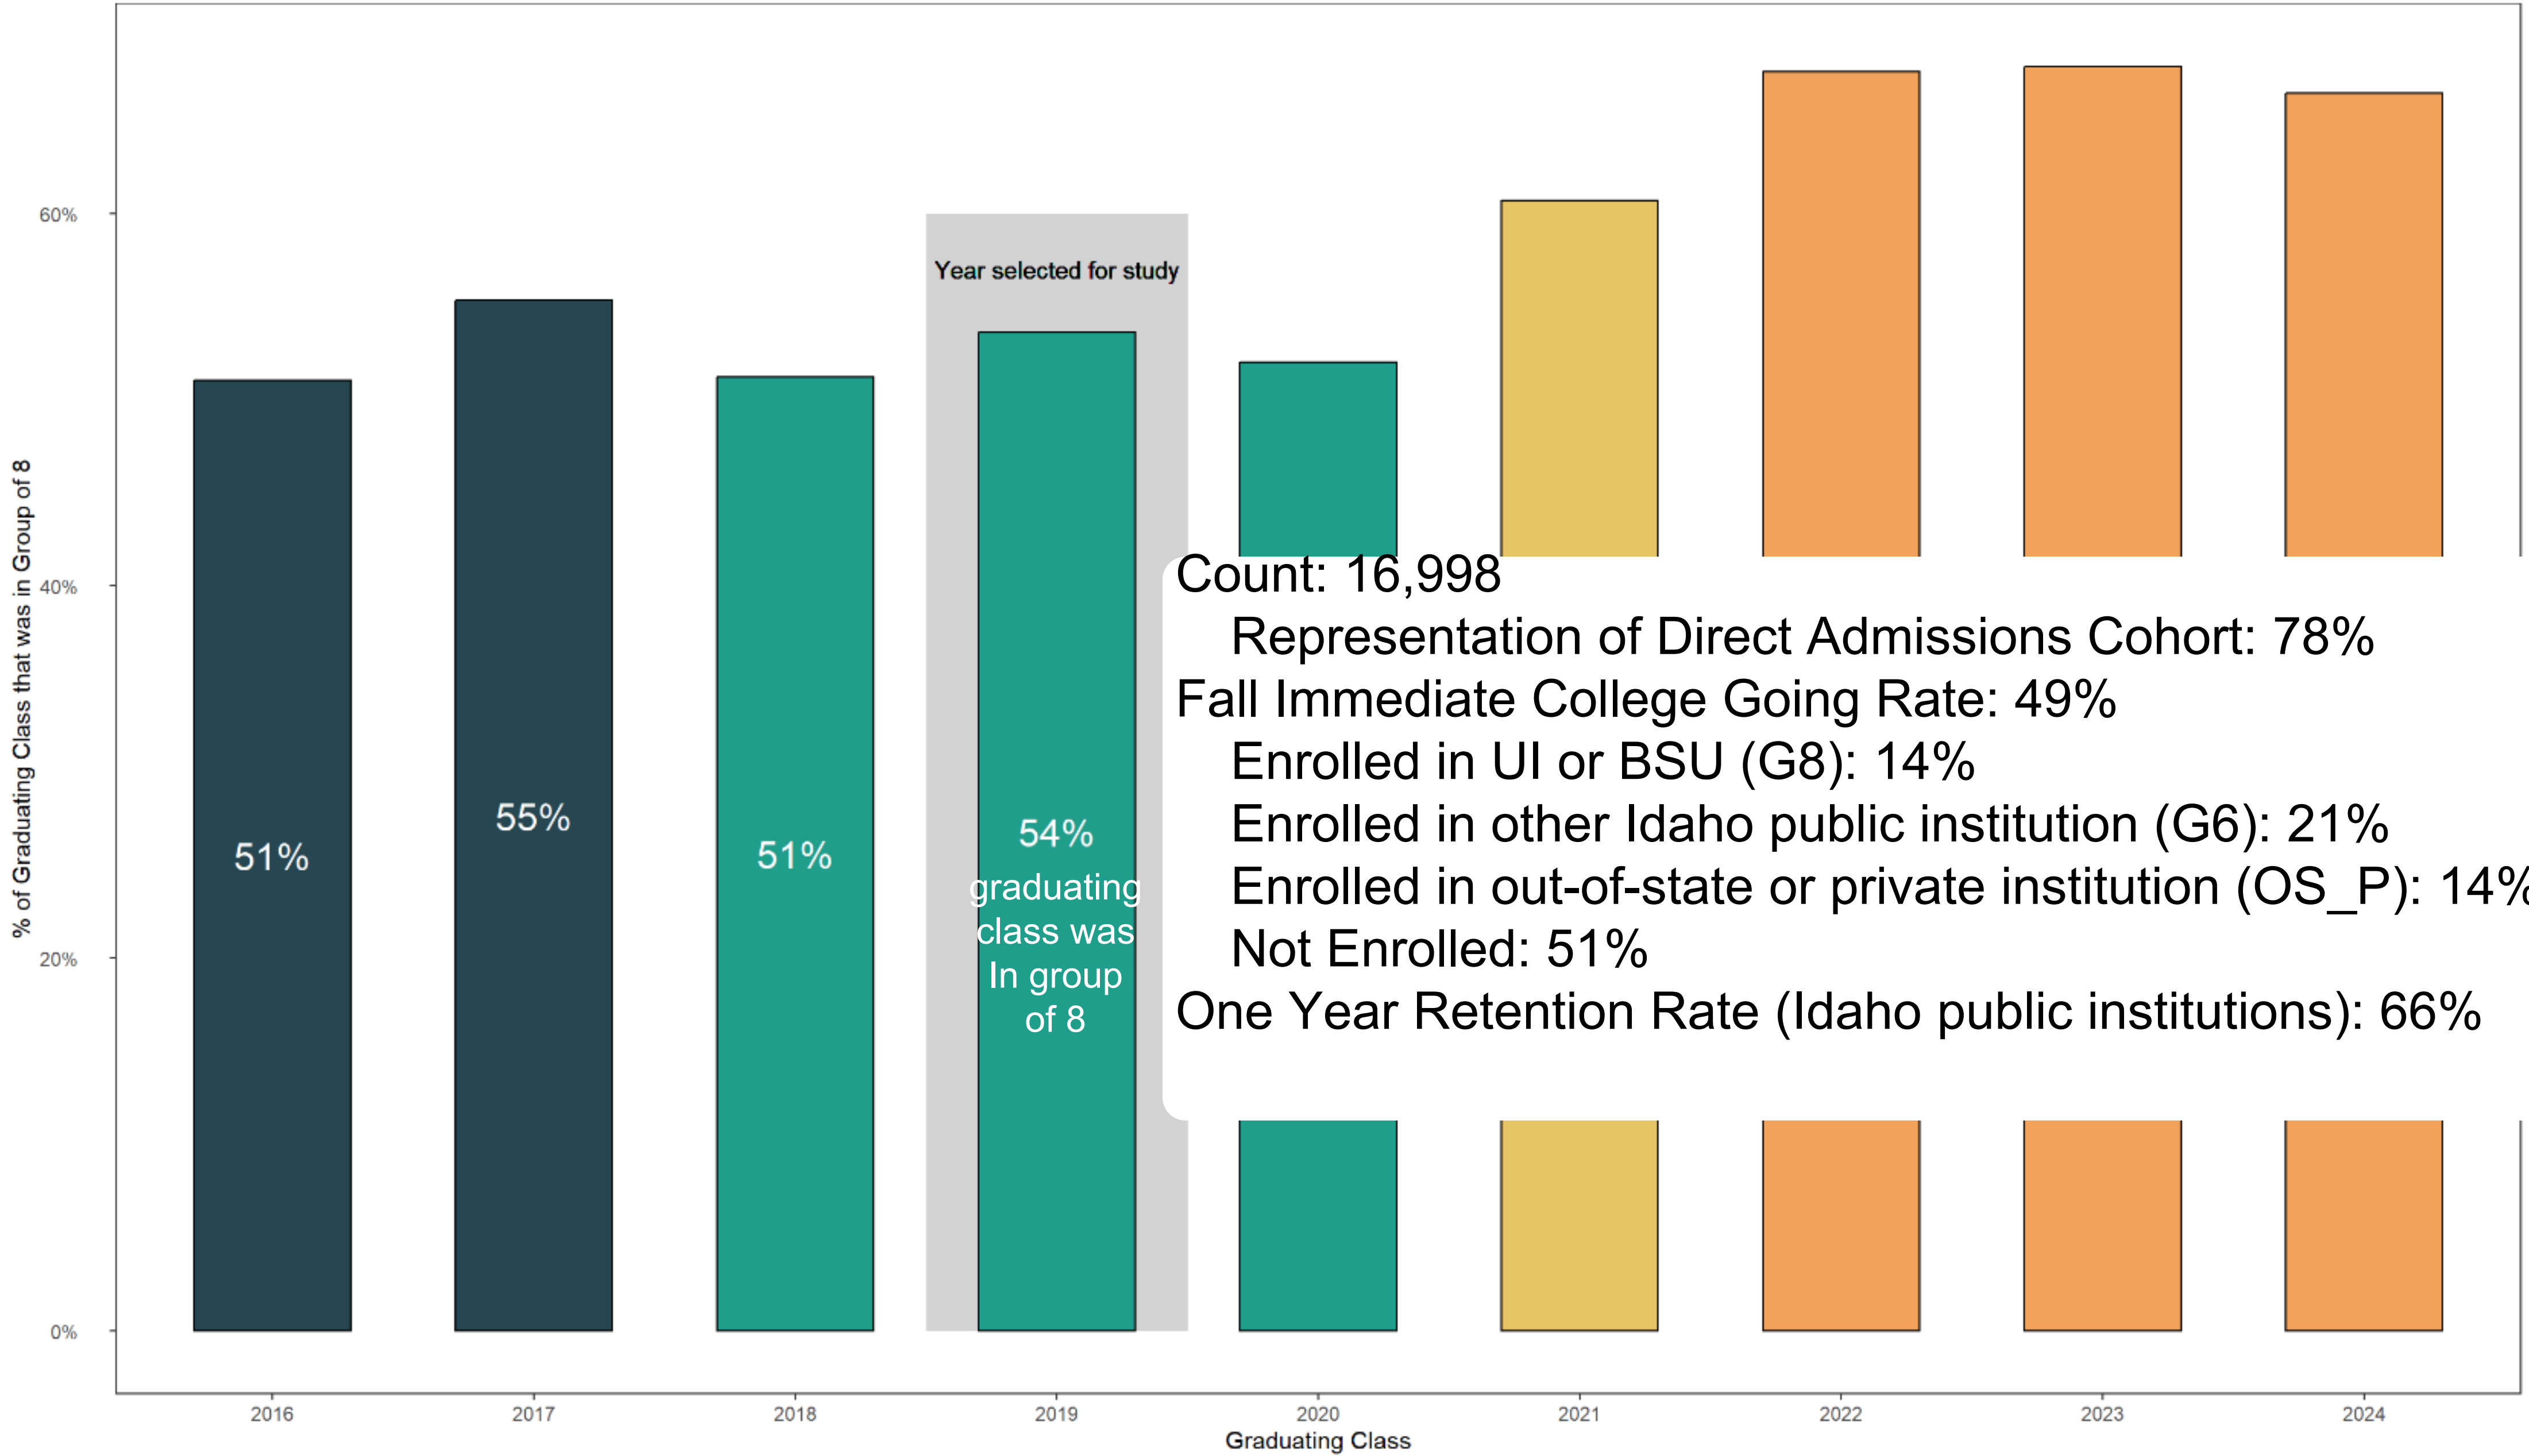

Group selected:

- Took the Grade 10 ISAT in the 2016-17 school year and graduated in the 2018-19 school year.
- Fall immediate college attendance by Fall 2019.

Group of 8 Requirements

- (GPA >= 3.0 or SAT*GPA >= 2835) No Test Requirement
- (GPA >= 3.0 or SAT*GPA >= 2835) + (SAT or ACT Score Required)
- GPA >= 2.8 No Test Requirement
- GPA >= 2.6 No Test Requirement

Count: 16,998
 Representation of Direct Admissions Cohort: 78%
 Fall Immediate College Going Rate: 49%
 Enrolled in UI or BSU (G8): 14%
 Enrolled in other Idaho public institution (G6): 21%
 Enrolled in out-of-state or private institution (OS_P): 14%
 Not Enrolled: 51%
 One Year Retention Rate (Idaho public institutions): 66%

FSH 2300 – STUDENT CODE OF CONDUCT AND RESOLUTION PROCESS

Faculty approved complete rewrite of FSH 2300

- Faculty Senate - November 28, 2023
- University Faculty Meeting – December 6, 2023

University Curriculum Committee

- Agenda item UCC-24-053, February 5, 2024: Request to edit *General Catalog* policies F-1 and O-2 to bring consistency with new FSH 2300.
- UCC24-053 was tabled by UCC.

F-1. Assigning of “Incomplete Grades”

A grade of "Incomplete" is assigned only when the student has been in attendance and has done passing work up to a time within three weeks of the close of the semester, or within one week of the close of the summer session, **or as a temporary grade during the pendency of a conduct resolution process under FSH 2300 Student Code of Conduct and Resolution Process. Except when assigned under FSH 2300**, it may be assigned only upon agreement of the student and course instructor when extenuating circumstances make it impossible for the student to complete course requirements on time. (Extenuating circumstances include serious illness, car accidents, death of a family member, etc. It does not include lateness due to procrastination, the student’s desire to do extra work to raise their grade, allowing a student to retake the course, etc.) Graduate students on probation, see College of Graduate Studies section on Probation, Disqualification, and Reinstatement. If a grade of "Incomplete" is submitted, the instructor will assign a reversion grade in the event the missing work is not completed or at the end of the FSH 2300 conduct resolution process, as applicable. The instructor must also specify to the student the conditions and requirements for completing the deficient work.

O-2. Academic Performance

Instructors and students are responsible for maintaining academic standards and integrity in their classes. Consequences for academic dishonesty may be imposed by the course instructor **subject to the requirements of FSH 2300 Student Code of Conduct and Resolution Process**. Such academic consequences may include but cannot exceed a grade of "F" in the course. If the student deems the grade unfair, they may appeal through the appropriate departmental administrator and college dean, and finally to the Academic Hearing Board.

In addition to the academic consequences, **students who are found to have violated the Student Code of Conduct may also be subject to other outcomes, as described in FSH 2300.**

Changes to *General Catalog* policies F-1 and O-2 point back to FSH 2300.F-9. (Supplemental process and standards applying to allegations of academic dishonesty)

FSH 2300.F-9.a. “.... Instructors may issue an academic outcome separate from any outcome that the DOS may impose if under the Code there is a finding of responsibility for academic dishonesty/misconduct.”

FSH 2300.F-9.b.10. “The instructor will not issue an academic outcome until after the conclusion of the resolution process, including any responses, and after the decision is communicated to the student.”

FSH 2900.F-9.b.11. “In situations where grades need to be submitted and the process is not yet complete, the instructor will enter a grade of ‘incomplete’ until the process is complete.”

UCC’s decision to table the request to change in *General Catalog* policies F-1 and O-2 was based on academic freedom and existing policy.

Academic Freedom

“... the possibility that an instructor’s grade will be changed implicates academic freedom, and faculty, because of their training, disciplinary expertise, and classroom experience, are uniquely qualified to determine how academic freedom is best practiced and protected.” – American Association of University Professors (AAUP)

Existing Policy

***General Catalog* policy E-6 and FSH 1640.02.C-4 and C-5.** (Academic Hearing Board) recognize the relationship between academic freedom and grades and contemplate issues arising from grades resulting from academic dishonesty.

General Catalog policy E-6. “The assignment of grades and corrections of grades are the sole prerogative of the instructor and are reported by the instructor directly to the Registrar's Office via the U of I Faculty Web.”

FSH 1640.02.C-4. “Although AHB cannot change a grade or require that it be changed, it may order that the grade it considers appropriate also be recorded on the student’s academic records.”

FSH 1640.02.C-5. “It is within the purview of the AHB to hear an appeal of a grade imposed by an instructor as a result of academic misconduct, e.g., cheating or plagiarism. Such a grade constitutes an evaluation and is not to be construed as a penalty.”

Example disregarding new FSH 2300 policy and following old policy

1. Instructor enters a grade of “F” to John Doe due to academic dishonesty, consistent with grade policy in instructor’s syllabus.
2. Instructor reports the incidence of Doe’s academic dishonesty to the Office of the Dean of Students (DOS).
3. DOS adjudicates Doe’s case and finds that Doe did not commit an act of academic dishonesty.
4. DOS contacts instructor concerning their finding and requests that instructor reconsider Doe’s grade.
5. Instructor can either [a] change Doe’s grade through a grade revision (*General Catalog* Regulation E-6) or [b] not change Doe’s grade.
6. If Doe’s grade is not changed consistent with the DOS finding, then Doe has the right to appeal the grade instructor entered for the course to the Academic Hearing Board (FSH 1640.A-1.02.)
7. According to FSH 1640.A-1.02.C-4, “Although AHB cannot change a grade or require that it be changed, it may order that the grade it considers appropriate also be recorded on the student’s academic record.”

Grade submitted should be consistent with instructor’s syllabus policy and should not be awarded arbitrarily or capriciously.

**FSH 1520: Constitution of the University Faculty
Article V, Section 2 - Information for Discussion**

For reference (and to allow you to make sure I didn't make any mistakes), this is the current FTE per college and faculty at large/current representation on Senate:

2023 – 2024 Faculty Senate – ~~Pending Approval~~
Meeting # 24

Approved at Mtg #25
March 19, 2024

Tuesday, March 5, 2024, 3:30 pm – 5:00 pm
Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Long, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammaruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Kenyon (excused), Strickland (excused)

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #23, February 27, 2024, were approved with the addition of new ASUI representative Alivia Buchen to the list of members present on 02/27/2024.

Chair's Report:

- About the admissions criteria, yesterday UCC voted to return to our pre-Covid admissions standards. I just wanted to say that we have a large spectrum of students in Idaho, and we need to offer them a variety of options. ISAT is a new test that we need to take it in consideration.

Provost's Report:

- Midterm grades are due March 11. This is a great chance to reach out to students who need extra help.
- Comments on the article found at <https://www.idahoednews.org/top-news/u-of-i-funnels-7-3-million-of-phoenix-consulting-to-greens-former-employer/>
Provost Lawrence read a statement from President Green categorically denying any conflict of interest in the hiring of the Hogan Lovells firm. He has been gone from the firm for several years and has no financial interests in it. The firm was hired for its expertise in regulatory services and outstanding reputation. They are the best of the best. In fact, the Chief Justice of the United States Supreme Court, John Roberts, was a partner at Hogan Lovells. Knowing that our state and our university deserves the best due diligence available, our University Counsel Kent Nelson hired Hogan Lovells for this work. The article seems an attack to discredit President Green and the university.
- Comments on legislative actions regarding the University of Phoenix affiliation, see <https://idahocapitalsun.com/2024/02/15/idaho-legislators-threaten-lawsuit-to-stop-university-of-phoenix-purchase/>.

On Thursday and Friday, the House State Affairs Committee had two hearings. On Thursday they did ask us some questions, but on Friday they relied primarily on the viewpoints of the opposite side, and only asked us one question in an hour and a half of presentations. House Concurrent Resolution 25 can be summarized in four main points (see "Let It Be Resolved..." section): Asking the State Board of Education to reconsider their May 18, 2023 decision; Asking the State Board to reconsider the affiliation until they can be more involved; Asking the State Board and the university to fully cooperate with the legislature about the affiliation. We've answered questions and participated in hundreds of meetings with legislators. So, we feel like we've cooperated from the start. The final point of the bill is that it authorizes the speaker and pro temp to act as an agent of the legislature if there were to be any legal action. The coverage on this point has

been a little confusing. The purpose of this part of the resolution is not to take legal action but to authorize two individuals to act should it be needed. Resolution 25 passed the House today with a vote of 49 in favor and 21 against and goes to Senate next. We continue to have conversations with legislators daily about all of this.

- A couple of other things from last week's meetings. Senate Bill 1357 (like the legislation in Texas and Florida), could remove all DEI staff and programming from universities. It's currently not past the legislature, and we don't know if it will reach the floor in either chamber. The university is concerned and we've made those concerns known.

Addressing a question placed in the chat, the Provost said that it's not clear who stands to benefit from blocking the University of Phoenix acquisition. A lot of these questions are not necessarily judging the affiliation itself, but really the power and the authority around.

As private individuals, you can address your legislators with opinions and concerns about all these legislative measures.

There are two other topics regarding legislature. One is around remote work. We don't know if it will pass, but we'll know soon, as we're entering the final month or so of the legislative season. They're hoping to adjourn before the end of March. The other one is CEC. It was very encouraging to see that the Education committee wanted to understand how only half of an approved standard CEC goes to fund the universities, and they were very interested in learning more about fully funding it.

Discussion:

A senator expressed deep concern about President Green's decision to hire Hogan Lovells having turned into a big PR problem, at a time when our opponents are trying to make waves. President Green should have been aware of the consequences, even if only based on perceptions. The president, not GC, bears the responsibility for these decisions. Furthermore, the massive redaction of documents signals no transparency. The Provost responded that there was awareness, but the decision was driven by the reality that this firm is one of the best. As for redacted documents, some confidential information is protected by law. We are following the law. (This point was supported and elaborated on by a senator with legal training.)

Chair Gauthier asked whether there is a back-up plan should the Phoenix transaction fail. The Provost responded that many discussions are going on. They will continue to address concerns as they become known to them.

Another senator brought up the financial piece of the deal that would result into expenses of \$10M per year for the U of I. They are wondering how much the university is pouring into a deal which may not even happen, and if it does happen, our payout is at least a year in the future. While debates are still going on, it would help to talk about the financial piece. Provost Lawrence responded: Concerning the upfront costs we've already invested, any business transaction requires costs. We've had a massive team of experts because we felt it was important to fully vet this. It is a large amount of money. Part of the closing transaction details may include reimbursement of transaction costs. As for our 10-million-dollar revenue piece, we don't have to wait a year, because it's included in the closing costs being finalized. As with any business, there is a risk of getting into it, should one decide to walk away. But we're committed to this transaction and so are the university of Phoenix and the sellers. He encouraged everybody to look at the big picture. A lot has been invested because it was worthy of that for our own safety, and to mitigate risks as much as possible.

Vice Chair Haltinner suggested to keep in mind the broader issue of transparency, besides the PR problems. She is very reassured to hear that the money will be reimbursed in closing. She asked Provost Lawrence to confirm that, should the deal not close, the money already invested is lost. The Provost confirmed.

A senator argued that the perception of nepotism may be likely, if President Green has friends among his previous business associates. Another senator, who watched the JFAC meeting, was puzzled by some of the narrative and reactions, because the Phoenix deal and the role of JFAC are separated.

Next, the discussion focused on the possible impact of current controversial issues on other appropriation decisions from the legislature. Senators are worried about possible repercussions on next year's appropriation decisions. Provost Lawrence: It's very hard to predict what JFAC or any legislative body is going to do. SBOE and U of I have fully cooperated with the legislators since May. We will respond to their needs and requests as they come in.

Committee Reports (voting):

- Proposed changes to the Faculty Staff Handbook:
 - FSH 1640.08 Admissions Committee – Kristin Haltinner, Vice Chair of Faculty Senate, Attach. #2
The Vandal Gateway Program requests inclusion on the Admissions Committee as a nonvoting member. Like the other nonvoting members on the committee, the Vandal Gateway Program director has important insights into the types of support offered at UI for people requesting admissions appeals. This proposal is coming from the Committee on Committees.
Discussion:
A senator noted that VGP is currently a pilot program, and thus this addition may have to be removed if the program isn't continued. It should be clear that this action doesn't make VGP more likely to be approved.
A senator proposed to amend by adding "or designee" next to "the director of the Vandal Gateway Program."
A senator asked whether we could approve it for one year only. Policy Coordinator Diana Whitney replied that there is no mechanism to change a policy for just one year.
Motion to amend (Tibbles, Mittelsteadt) adding "or designee" next to "the director of the Vandal Gateway Program."
Vote on the amendment: 21/22 yes; 1/22 no.
Vote on amended motion: 19/22 yes; 3/22 no. Motion passes.
 - FSH 2700 Student Evaluation of Teaching – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences and Chair, Faculty Affairs Committee, Attach #3.
Alistair Smith gave a brief background on these revisions to FSH 2700. They involved a multi-year Senate Taskforce that included representatives from ASUI leadership and input from the Faculty Affairs Committee and the University Teaching Committee and were focused on reducing bias and discrimination associated with the questions that are counted towards candidate's student course evaluation summaries used in the tenure and promotion processes. Revisions align FSH 2700 with changes already approved under FSH 1565 C.1.a that reframed evaluations to, instead, feedback on teaching effectiveness. Smith commented that the name of the policy should reflect the change to FSH 2700 Student Feedback on Teaching Effectiveness. The format of the policy was updated to align it with the rest of the FSH, namely by adding purpose, scope, policy, and procedure sections. Revisions also included clarifying when mid-semester formative feedback occurs, and how the data can be used. Revisions also introduced an appeals mechanism for instructors to

challenge inclusion of feedback in their records. As part of the revisions process, a new standard form for mid-semester formative feedback was created (it did not exist previously) and a revised standard form for end-of-semester formative feedback was developed. Finally, a mechanism to support instructors not meeting teaching effectiveness expectations was introduced.

Discussion:

In response to a question, Smith confirmed that instructors can still include additional questions.

Another senator argued that completing the course valuations should be a requirement for the students. Smith said that the committee discussed it but decided against it.

There is a preamble to explain the scope, but more information should be given to the students before making it mandatory. Some additional discussion followed about the pros and cons of mandatory evaluations. It may be something to consider in the near future, to increase the response rate and a more realistic distribution of positive and negative comments.

The discussion moved to FSH 2700 Form D-3 (mid-term formative feedback) and D-4 (end-of-the-semester feedback). Some senators asked for clarification on the questions that are or are not required for the purpose of P&T and annual evaluation, and the N/A option if students feel the question is not relevant to their course. Smith pointed to the instructions at the top of the forms. Only the five questions marked with an asterisk count for P&T and annual evaluations. The others are purely formative.

A senator asked about the second question in the Teaching Delivery part of form D-4, that refers to the course applied learning components. Although it's just formative, they worry that this item might influence students in a negative direction, even if the course is not supposed to have applied learning components. From survey design theory, a particular question in the survey will influence what comes before and what comes after. Smith noted that the present order can be rearranged. They are not proposing an order. The task force consulted with experts in the social sciences and law faculty, as well as experts on gender bias issues. Narrative is encouraged where students can provide constructive feedback. And again, if hate speech or insulting comments appear in the narrative, the instructor has the right to ask to have those tossed. If the chair, dean and the vice provost for faculty deny the request, they can appeal to the FHAB. The task force included an appeal mechanism because many international faculty have had nasty evaluations that remain in their permanent records. It was time to improve this process. As for the order in which the questions are presented, when this goes into Anthology, those with the asterisk may come first, followed by the formative feedback. The senator had also some concern about assignments being the main theme in the course content part of form D-4.

Many agreed that, overall, this proposal is a huge step forward.

Vice Chair Haltinner pointed to the second question on "Syllabus and Course Expectations." She is not comfortable with the wording "... was easy to access and coherently organized." Access is mostly about technology. If a system fails, that will reflect poorly on the instructor. Furthermore, "coherently organized" means something different to different people. Smith responded that the five starred questions were selected by FAC, but Senate is welcome to make changes.

Erin Chapman gave some additional background on how the questions were chosen. She agreed that there could be some subjectivity in assessing what's coherently organized.

Another senator echoed the concern about technology being an issue. If something doesn't work, the instructor would be held accountable. Also, in the first sentence of FSH 2700 D-3, the word "will" implies that the formative mid-semester feedback is required.

A senator asked whether it is possible to integrate this survey with Canvas. Can we give some form of reward, such as a few extra points, to the students who submit feedback? Smith replied that every instructor already has that ability.

There was a request for clarification about dropping the "neutral" category from the possible choices for the starred questions. Smith confirmed that it was removed and explained that the reason for the removal is that under the old format, the neutral answer reflected a score of 3.0, which equated to not meeting expectations, which was not the intent of a neutral response. Smith explained that in the new forms, where N/A is allowed, as per the proposed revision to FSH 2700, those responses are no longer recorded. Smit also, clarified that N/A will not be an option for the asterix questions.

Proposed amendments (Mittelsteadt, Maas):

In the first sentence of FSH 2700 D-3, replace "will" with the word "may." Under "Syllabus and Course Expectations" in the end-of-semester evaluations, the question that says "The course syllabus was easy to access and coherently organized" shall be removed from consideration as one of the five questions (thereby reducing the number of questions to 4) used in tenure, promotion and evaluation.

Vote on the amendments: 17/19 yes; 2/19 no.

Vote on the amended motion: 16/19 yes; 3/19 no. Motion carries.

- FSH 3500 Promotion and Tenure – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences and Chair, Faculty Affairs Committee Attach. #4
Revision to add a reference to FSH 2700 regarding the questions in student feedback on teaching that can be counted toward a candidate's student course evaluation summaries used in the tenure and promotion processes.
No questions.
Vote: 19/19 yes.

Announcements and Communications:

- Online Software Approval Ticketing Process – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology.

A senator inquired about the recent change from OIT that requires preapproval to get reimbursed through Chrome River for the purchase of some common software. What is the thought process for doing that?

Teresa didn't have background to prep with, so she is not able to give any specifics on this question. She will look into the matter and report to senate at a later time.

This conversation will continue when Teresa returns to senate, along with the one on the transition to MyUI.

Additional discussion:

A senator reported submitting a ticket 20 days earlier for a well-established software called CMA, Comprehensive Meta Analysis, developed by NIH and used by many federal agencies. It's needed for two Ph.D. students for their Prelim Exam. They have eight weeks to complete the exercise. This senator is very concerned about the timeline. They may have to readjust the Ph.D.

Prelims schedule, which will create additional complications. Teresa will investigate this specific ticket and communicate to the senator what she finds out.

- A senator reported comments from several faculty about the recent satisfaction survey from OIT. The space to provide commentary is insufficient, about 60 words. Teresa replied that Dan Ewart was aware of that feedback and has resolved the problem with institutional research.
- Women's Leadership Conference – Laurel Meyer, Education Abroad Advisor/Marketing Coordinator, International Programs Office.
Laurel Meyer is one of the planning co-chairs for the Women's Leadership Conference, and the Athena co-president for staff. After a five-year hiatus, the Women's Leadership Conference is returning to campus on April 2. The registration link went live today on the conference website, <https://www.uidaho.edu/diversity/edu/womens-center/events/womens-leadership-conference>. Please share this opportunity with all your colleagues. It is a full-day event, and it is free. It's a joint conference between the University of Idaho and Washington State University. Most of the seats are reserved for either members of U of I or WSU, but there are some limited seats available for community members as well. We're not necessarily inviting students to attend, but if there's a student who's motivated and would like to attend, they're welcome to register. But that's not our target audience. Over the next couple of days, the website will be updated with the full schedule. For any questions, please contact Laurel Meyer at laurelm@uidaho.edu.

New Business:

None.

There will be no meeting next week (spring break).

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 5:03pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #24

Tuesday, March 5, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #23 February 27, 2024 **Attach. #1**
- III. Chair's Report
- IV. Provost's Report
 - Discuss Idaho Ed news article about Hogan Lovells
 - Discuss Idaho Sun article about UofPhx Acquisition
- V. Committee Reports (voting)
 - Proposed changes to the Faculty Staff Handbook
 - FSH 1640.08 Admissions Committee – Kristin Haltinner, Vice Chair of Faculty Senate **Attach. #2**
 - FSH 2700 Student Evaluation of Teaching – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach #3**
 - FSH 3500 Promotion and Tenure – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #4**
- VI. Announcements and Communication
 - Online Software Approval Ticketing Process – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology
 - MyUI Delay/Change – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology
 - Women's Leadership Conference – Laurel Meyer, Education Abroad Advisor/Marketing Coordinator, International Programs Office
- VII. New Business
- VIII. Adjournment

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 23

Tuesday, February 27, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Long, Maas, McKenna, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Strickland, Tibbals.

Absent: Lawrence (excused), Miller.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #22, February 20, 2024, were approved as distributed.

Chair's Report:

- After meeting with Boise State University and the Idaho State Board of Education admissions change workgroup, we received more data and some answers to your questions. See attached slide. Dave Paul (UCC) requested more data before the next UCC meeting. FSL will review the information and data tomorrow at our Wednesday meeting and prepare a packet including the latest data from Wes. All the information we gather will go to UCC and their recommendation will come to Faculty Senate.

Provost's Report, delivered by Vice Provost for Faculty Diane Kelly-Riley:

- The next faculty gathering is today, from 4:30 to 6:30. It will be at the ICCU Arena in the alumni room, hosted by the College of Graduate Studies, and Dean Jerry McMurry. The next will be on March 21, 2024, Vandal Ballroom, hosted by COS. <https://www.uidaho.edu/provost/faculty-gathering>
- Midterm grades are due March 11.
- Discussion: With reference to Senate Bill 1357, a senator asked if there is any insight on what the implications for us can be, such as the university inability to provide training in diversity and inclusion. Vice Provost Kelly-Riley concurs that the bill is concerning. Nothing is definite yet. She will share the question with the Provost, who may be in a better position to address it. Of course, anyone, acting as a private citizen, can contact their legislators to express their concerns. Faculty Senate is very concerned about the potential impact of this bill.

Suggestion: invite Yolanda Bisbee to visit with Faculty Senate.

There were inquiries concerning a recent article on Idaho Ed News, see link below, <https://www.idahoednews.org/top-news/u-of-i-funnels-7-3-million-of-phoenix-consulting-to-greens-former-employer/>, and a request for updates on the lawmakers' resolution to sue the University of Idaho to stop the University of Phoenix purchase, see link below, <https://idahocapitalsun.com/2024/02/15/idaho-legislators-threaten-lawsuit-to-stop-university-of-phoenix-purchase/>. Vice Provost Kelly-Riley will inform Provost Lawrence of these questions.

There was a reminder that both LC and U of I are on the JFAC agenda tomorrow, at 7:00am MT.

Announcements and Communications:

- Language regarding Faculty Senate membership, FSH 1520 – Kristin Haltinner, Vice Chair of Faculty Senate, Attach #2.

Kristin led a discussion on possible revisions of FSH 1520 Constitution of the University Faculty Article V, Section 2. The question is whether we should clarify and/or modify the current language “...*The faculty of each college, except the College of Graduate Studies, elects one senator for each 50, or major fraction thereof, full-time-equivalent faculty members in the college, provided, however, that each college faculty elects at least one senator...*” This means that every college has one senator, and one more for every additional 50 FTE faculty in the college. Kristen considered several scenarios (see Attach.2). All options, other than keeping the current policy, impact the membership, namely, some colleges would lose or gain senate representatives.

Discussion:

A senator asked whether there is a need for a change, and, if so, what the reasons are. Other senators noted that the current policy disadvantages small colleges regarding the addition of a second senator. On the other hand, it was also acknowledged that it may be hard to fill new seats from small colleges, who have less service capacity, without additional workload for the college delegates.

A senator demonstrated that the current language gives most stability of senate membership with respect to changes in the number of faculty in the colleges.

Ultimately, there was consensus that no substantive changes should be made, although the current language could be clarified.

- Committee on Committees Update – Kristin Haltinner, Vice Chair of Faculty Senate.
Review of Committee Audit. Members of the Committee on Committees are looking into selected committees which may need revisions/repurposing:
 - FSH 1640.20 University Budget & Finance Committee. Revisit roles under the new budget model.
 - FSH 1640.43 Faculty Appeals Hearing Board. Procedures, scope of the board.
 - FSH 1640.58 Ubuntu. Simplify membership – too many non-voting members who seldom attend.
 - FSH 1640.81 University Staff Compensation Committee. Large workload.
 - FSH 1640.10 Americans with Disabilities Act Advisory Committee. Unfilled seats. There are ideas but no money. Reinstatement the budget for this committee?
 - FSH 1640.36 Dismissal Hearing Committee. Heavy emotional load, summer meetings not anticipated in FSH 1640.36.
 - FSH 1640.77 Scientific Misconduct Committee. The workload became large last year, possibly because of a note in the Daily Register.
 - FSH 1640.06 Administrative Hearing Board. Lack of gender diversity since a long time.

Other updates:

- Adding one non-voting seat from the VGP team on the Admission Committee.
- Committee preference survey. Appointments will be made in March.
- Sustainability Certificate. Last Fall, Faculty Senate appointed the existing interdisciplinary faculty-led committee as an *ad-hoc* program committee to serve as the ‘relevant unit and college’ authorized to submit curricular proposals per FSH 4120-E. This committee is empowered to propose the UG Academic Certificate in Sustainability

to the University Curriculum Committee as a University-Wide Program, and to set its initial curriculum. They are now seeking approval to turn the *ad hoc* committee into a permanent university-level committee.

- As a reminder, the Secretary points to recently revised FSH 1620 University-Level Committees, in particular FSH 1620 E-13 “ *Prepare a succinct year-end report for submission to the Faculty Senate in care of the Office of the Faculty Secretary for distribution as needed. The report must contain: number and approximate frequency of the committee meetings; committee goals; committee accomplishments...*”

New Business:

- OIT changes:
 - New online software approval ticketing process. Suggestion: invite Teresa Amos or Dan Ewart to clarify.
 - MyUI will soon replace VandalWeb. Suggestion: invite Dan Ewart for updates.

- Generally, fees for membership in professional organizations are not reimbursed by the university. Why so and are there exceptions?

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:40pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

YEAR 2019

Cohort = 22000 students

% of student that qualify for the letter of 8

ISAT 3/3 = 34%

ISAT 3/3 or GPA 3.0 = 64%

ISAT 3/3 and GPA 3.0 = 30%

ISAT 3/2 and GPA 2.8 = 66%

ISAT 3/3 and GPA 2.8 = 32%

ISAT 3/3 or GPA 2.8 = 72%

Class of 2021 - GPA 2.8 = 61%

1. Policy/Procedure Statement: Briefly explain the reason for the proposed addition, revision, and/or deletion.

The Vandal Gateway Program requests inclusion on the Admissions Committee as a nonvoting member. Like the other nonvoting members on the committee, the Vandal Gateway Program director has important insights into the types of support offered at UI for people requesting admissions appeals.

The Admissions Committee chair ran this by the committee and it was supported.

2. Fiscal Impact: What fiscal impact, if any, will this addition, revision, or deletion have?

None

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

Section 1640: Committee Directory

1640.08

ADMISSIONS COMMITTEE

A. FUNCTION. To act on applications for admission to UI in the cases of undergraduate applicants who do not meet minimum requirements for admission but who request a review. The Admissions Committee also evaluates and acts on applications of undergraduate students to special UI programs requiring minimum qualifications lower than those for regular admission to the University of Idaho. The Admissions Committee also hears appeals from disenrollment when that disenrollment is the result of the presentation of incomplete or false information on initial application as an undergraduate at UI. Decisions of this committee may be appealed as stated in [FSH 2500](#). (Similar applications for admission to the College of Graduate Studies are acted on by the Graduate Council, and its decisions may be appealed as stated in [FSH 2500](#); those for admission to the College of Law are acted on by that college's Committee on Admissions, and its decisions may be appealed, in order, to the full faculty of the college and, when they consent to hear the appeal, to the president of the university and the regents.)

A-1. This committee traditionally meets during the summer.

B. STRUCTURE. Five members of the faculty, director of counseling and testing center or designee, chair of Ubuntu or designee, a member of the American Language and Culture Program faculty, and the following without vote: director of admissions (or designee), -a Student Support Services designee, a representative from the Office of Multicultural Affairs, a professional advisor, [the director of the Vandal Gateway Program](#), and up to two representatives from student support programs. To assure a quorum, alternates for the faculty positions are appointed by the chair of the Admissions Committee from a list of those who have previously served on the Committee. †

Comprehensive review? Yes No

1. Policy/Procedure Statement: Briefly explain the reason for the proposed change.

Revision of FSH 2700 Student Evaluations of Teaching. Revisions to FSH 2700, which involved a multi-year Senate Taskforce that included representatives from ASUI leadership and input from the Faculty Affairs Committee and the University Teaching Committee, were focused on reducing bias and discrimination associated with the questions that are counted towards candidate’s student course evaluation summaries used in the tenure and promotion processes.

Revision aligns FSH 2700 with changes already approved under FSH 1565 C.1.a that reframed evaluations to instead feedback on teaching effectiveness. The format of the policy was updated to align it with the rest of the FSH, namely by adding purpose, scope, policy, and procedure sections. Revisions also included clarifying when mid-semester formative feedback occurs, and how the data can be used. Revisions also introduced an appeals mechanism for instructors to challenge inclusion of feedback in their records. As part of the revisions process, a new standard form for mid-semester formative feedback was created (it did not exist previously) and a revised standard form for end-of-semester formative feedback was developed. Finally, a mechanism to support instructors not meeting teaching effectiveness expectations was introduced.

2. Fiscal Impact: What fiscal impact, if any, will this change have?

Minimal. Will require updating forms in anthology.

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 3500 Promotion and Tenure

- 4. Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

CHAPTER TWO:

STUDENT AFFAIRS POLICIES

2700

STUDENT EVALUATION OF TEACHING

OWNER:

Vice Provost for Academic Initiatives
Dean Panttaja
panttaja@uidaho.edu

LAST REVISION: July 2008

CONTENTS:

A. Purpose

B. Scope

BC. Policies Policy and Procedures

D. Procedure

A. PURPOSE. Student ~~evaluation of feedback on~~ teaching has two divergent purposes. First, student ~~evaluations~~ feedback assists individual instructors in improving ~~their own teaching course design, delivery, assessment, and expectations~~ ("instructor," as used in this section, refers to any teaching member of the faculty or staff, including graduate teaching assistants). Second, ~~they student feedback~~ assists academic administrators in counseling instructors about their teaching and ~~they are the feedback is~~ carefully weighed as a factor in ~~judging-evaluating~~ the teaching component in tenure, promotion, and salary determinations. ~~To achieve the first of these purposes instructors are urged to provide their students mechanisms for evaluation throughout the academic term. To assist academic administrators in evaluation, the following policy and procedures have been adopted.~~

B. SCOPE. This policy applies to all instructors and students at the University of Idaho.

BC. POLICIES AND PROCEDURES.

B-1. All students will have the opportunity to evaluate each of their instructors in all sections of all courses during every academic term.

D. PROCEDURE

D-1. The Office of the Provost is responsible for oversight of the administration of the feedback process, except for feedback in the College of Law and the WWAMI Regional Medical Education Program, which will be administered by those programs.

D-2. Standard university forms for anonymous mid-term formative feedback (D-3) and end-of-semester feedback (D-4), as approved by the faculty, will be used by all instructors in all of their classes, except in the College of Law and the WWAMI Regional Medical Education Program, which will use evaluative devices tailored to their needs. The student evaluation summary referred to in FSH 3500 D-2 c shall comprise the questions denoted by an asterisk in form D-4.

D-3. Mid-term formative feedback on teaching will take place during the three-week period centered on the mid-term week of the academic term or the proportion thereof for courses of less than a semester duration. The feedback will be made available to faculty two weeks after mid-terms to encourage student input for faculty seeking to improve teaching. The data generated through the mid-term formative evaluation process shall be for evaluative use by the faculty member. The data are not considered part of the faculty member's record and are not to be used in any evaluation of the faculty member, unless included in the record at the discretion of the faculty member.

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2700: Student Evaluation of Teaching
July 2008

D-4. End-of-term feedback on teaching shall take place during the last three weeks of the academic term (excluding final exam week) or the proportion thereof for courses of less than a semester duration.

D-5. All student feedback on teaching will be provided to the instructor, irrespective of response rates or class size (excluding courses where only a single student is enrolled).

D-6. The Office of the Provost shall see that a database is maintained of end-of-term feedback for at least the last five academic years. The data shall be made available to colleges and academic units as needed, and the numerical summaries of an instructor's end-of-term feedback shall be made available to students or other members of the university community upon request.

D-7. The Office of the Provost, in conjunction with the University Teaching Committee, will review the student feedback on teaching forms and processes at least every five years.

D-8. Student feedback on teaching must comply with all university policy, including FSH 2300 Student Code of Conduct. Instructors may submit to their dean requests for the exclusion of individual student feedback on teaching that violates university policy from materials used in annual evaluations and for promotion and tenure consideration. The decision of the dean is appealable to the Vice Provost for Faculty and then through the policies and procedures in FSH 3840.

D-9. Instructors who receive feedback on teaching effectiveness that fails to meet unit expectations will be referred by the unit chair to the Center for Excellence in Teaching and Learning to receive faculty development support and to design a strategy for improving their teaching.

D-10. Student feedback reported as not-applicable (N/A) on the standard university forms will not be included in annual evaluations and in the evaluation of the teaching component used in tenure, promotion, and salary determinations.

E. RELATED INFORMATION

E-1. Form D-3

E-2. Form D-4

~~B-2. The standard university form, as approved by the faculty, will be used by all instructors in all of their classes, except in the College of Law which will use an evaluative device which it has tailored to its needs.~~

~~B-3. The Office of Academic Affairs has the responsibility of oversight in the administration of the evaluations, except those in the College of Law.~~

~~B-4. The evaluation shall take place during the last three weeks of the academic term (excluding final exam week) or the proportion thereof for courses of less than a semester duration.~~

~~B-5. Instructors will be able to view the student responses for their courses after final grades have been submitted.~~

~~B-6. A system for mid-term formative evaluation of instruction will be available to encourage student input for faculty seeking to improve teaching. The electronic data generated through the formative evaluation process shall be for evaluative use by the faculty member. The data are not considered part of the faculty member's record, and are not to be used in an evaluation of the faculty member by another, unless included in the record at the discretion of the faculty member.~~

UI FACULTY-STAFF HANDBOOK
Chapter II: STUDENT AFFAIRS POLICIES
Section 2700: Student Evaluation of Teaching
July 2008

~~B-7. The Office of Academic Affairs shall see that a database of evaluation results for at least the last five academic years is maintained. These results shall be made available to colleges and academic units as needed, and the numerical summaries of an instructor's evaluations shall be made available to students or other members of the university community upon request.~~

~~B-8. The Office of Academic Affairs, in conjunction with the Teaching and Advising Committee, will review the student evaluation of teaching forms and processes periodically, at least every five years.~~

Version History

Amended July 2008. The on-line process was evaluated which resulted in minor policy language changes and removal of section C dealing with implementation of the on-line system. This made the original Handbook section obsolete, and thus it was completely revised.

Amended July 2002. Following a period of testing in 2001, a paperless web-based evaluation system was given formal approval in 2002.

Amended July 1992. Edits were made to reflect the removal of student evaluations to the Office of Academic Affairs.

Adopted 1979.

FSH 2700 Forms

Student feedback on an academic course and learning environment

1. ~~How often did you attend class or online learning environment? (Circle one)~~

~~Less than 60%~~

~~60%+~~

~~70%+~~

~~80%+~~

~~90%+~~

2. ~~How many hours per week did you do work for this course? (Circle one)~~

~~Less than 2 hours~~

~~2+ hrs.~~

~~4+ hrs.~~

~~6+ hrs.~~

~~8+ hrs.~~

Please use the following scale to answer questions 3, 4, and 5.

SD—strongly disagree; D—disagree; N—neutral; A—agree; SA—strongly agree

3. ~~The instructor expressed clear expectations for learning outcomes in this course.~~

4. ~~Overall, the content and organization of this course contributed to your understanding of this subject.~~

5. ~~Overall, the instructor's delivery and efforts contributed to your understanding of the course material.~~

6. ~~The instructor was helpful to me outside of class or online learning environment. (Circle one)~~

~~No~~

~~Yes~~

~~N/A (I did not seek help from the instructor outside of class)~~

Comments:

~~7. What were some positive aspects of the course that supported learning?~~

Comments:

~~8. What aspects and/or content of the course that could be improved to better support learning?~~

Comments:

FSH 2700 Form – D3 (mid-term formative feedback)
Student feedback on an academic course and learning environment

Purpose: We need your feedback to help provide the instructors with information that may improve the course for the remainder of this semester. This information is only shared with the instructor and is not used as part of their permanent teaching record. Please remember that instructors can include faculty, staff, and graduate teaching assistants. This questionnaire should take approximately 5 minutes to complete.

Instructions:

- In terms of the following categories, please rate your agreement with each statement.
- If the question is not relevant to the course (e.g., the course has no labs, or has no written assignments) or you have no feelings about the question, please select N/A.
- Feedback must be free of hate speech and discrimination.
- Several questions are appropriate for all courses and will not have the N/A option.
- Narrative feedback must comply with all university policy, including FSH 2300 Student Code of Conduct.

| Mid-Semester Formative Feedback | N/A | Strongly Disagree | Somewhat Disagree | Somewhat Agree | Strongly Agree |
|---|-----|-------------------|-------------------|----------------|----------------|
| The course materials are delivered in a manner that is easy to follow and understand. | | | | | |
| The course materials are easy to access. | | | | | |
| The course assignments are useful for a better understanding of the topic. | | | | | |
| The course labs reinforce the course content. | | | | | |
| The instructor organizes and manages the class sessions well. | | | | | |
| The instructor provides useful feedback to me on my coursework. | | | | | |
| The instructor gives grades that are consistent with course rubrics and class expectations. | | | | | |
| The instructor provides opportunities for students to ask and answer questions related to the content. | | | | | |
| Narrative: As you reflect on the course up to this point, what things are working well for you? | | | | | |
| Narrative: As you reflect on the course up to this point, what things are not working well for you? | | | | | |

FSH 2700 Form – D4 (end-of-semester feedback)
Student feedback on an academic course and learning environment

Purpose: We need your feedback on this assessment for two reasons. First, instructors rely on your answers to improve their teaching. Instructors can include faculty, staff, and graduate teaching assistants. Second, your responses are used to guide instructors' annual performance evaluations and in evaluating the teaching component in tenure, promotion, and salary determinations. This questionnaire should take approximately 15 minutes to complete.

Instructions:

- In terms of the following categories, please rate your agreement with each statement.
- If the question is not relevant to the course (e.g., the course has no labs, or has no written assignments) or you have no feelings about the question, please select N/A.
- Several questions are appropriate for all courses and will not have the N/A option.
- Narrative feedback must comply with all university policy, including FSH 2300 Student Code of Conduct.

| Teaching Delivery | N/A | Strongly Disagree | Somewhat Disagree | Somewhat Agree | Strongly Agree |
|--|------------|--------------------------|--------------------------|-----------------------|-----------------------|
| The instructor's delivery and management of the class sessions contributed to your understanding of the course material. * | | | | | |
| The instructor organized the course's applied learning components (e.g., labs, studios, field trips) well. | | | | | |
| The instructor provided opportunities for students to ask and answer questions. | | | | | |
| The instructor provided opportunities for students to engage with the subject matter in a variety of ways (e.g., group discussions, group projects). | | | | | |
| The instructor provided useful feedback to me on my coursework. * | | | | | |
| The instructor gave grades that were consistent with course rubrics and class expectations. | | | | | |
| Narrative: If you have additional constructive feedback you wish to share with the instructor to improve the teaching delivery, please enter additional details here. | | | | | |

| Course Content | N/A | Strongly Disagree | Somewhat Disagree | Somewhat Agree | Strongly Agree |
|--|-----|-------------------|-------------------|----------------|----------------|
| The course materials were delivered in a manner that was easy to follow and understand. | | | | | |
| The course materials were easy to access. | | | | | |
| The course assignments were useful in better understanding the course content. * | | | | | |
| The course time (classrooms, labs, fieldtrips, etc.,) reinforced the course content. | | | | | |
| The quantity of material in the course was appropriate to its credit hour load. | | | | | |
| The course (classroom, labs, fieldtrips, etc.) content was current and up-to-date. | | | | | |
| <p>Narrative: If you have additional constructive feedback you wish to share with the instructor to improve the course content, please enter additional details here.</p> | | | | | |

| Syllabus and Course Expectations | N/A | Strongly Disagree | Somewhat Disagree | Somewhat Agree | Strongly Agree |
|--|-----|-------------------|-------------------|----------------|----------------|
| The course syllabus and expectations were consistent throughout the course. | | | | | |
| The course syllabus was easy to access and coherently organized. * | | | | | |
| The instructor provided updates to changes in the course schedule or expectations. | | | | | |
| The grading expectations of assignments and assessments were clearly explained. * | | | | | |
| The course policies, including late work and academic honesty, were clearly explained. | | | | | |
| Written assignments included a grading rubric or other instructions that clearly explained the expectations. | | | | | |
| <p>Narrative: If you have additional constructive feedback you wish to share with the instructor to improve the syllabus and course expectations, please enter additional details here.</p> | | | | | |

| Student Experience | N/A | Strongly Disagree | Somewhat Disagree | Somewhat Agree | Strongly Agree |
|--|-----|-------------------|-------------------|----------------|----------------|
| I spent enough time on this course each week and came to class prepared to participate during in-class activities. | | | | | |
| I was consistently prepared for assignments, projects, and exams. | | | | | |
| I have put in adequate effort to advance my learning. | | | | | |
| I was positively challenged. | | | | | |
| The instructor was supportive of my success. | | | | | |
| The instructor addressed and/or acted on the mid-term student feedback on teaching. | | | | | |
| The instructor tried to create an inclusive and respectful learning environment. | | | | | |
| <p>Narrative: If you have additional constructive feedback you wish to share with the instructor to improve the student experience, please enter additional details here.</p> | | | | | |

Revision to add a reference to FSH 2700 regarding the questions in student feedback on teaching that can be counted toward a candidate's student course evaluation summaries used in the tenure and promotion processes.

2. Fiscal Impact: What fiscal impact, if any, will this change have?

None.

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

FSH 2700 Student Evaluations of Teaching

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

July 1

**FSH 3500
PROMOTION AND TENURE**

A. INTRODUCTION. FSH 3500 contains all official University promotion and tenure procedure and supersedes any promotion or tenure procedure contained in college or unit bylaws.

A-1. Definitions.

a. Academic Administrator. “Academic administrator” means the president, provost, vice provosts, deans, associate deans, and department chairs/directors of academic units, and vice president for research, and shall not include persons occupying other administrative positions. (RGP II.G.6.i.i.)

b. Board. “Board” refers to the State Board of Education and Board of Regents of the University of Idaho.

c. Faculty Member. “Faculty member” means any member of the university faculty who holds one of the following ranks: instructor, senior instructor, assistant professor, associate professor, or professor.

d. Period under Review. The “period under review” includes all years since appointment to the candidate’s current rank.

e. Unit. “Unit” means a school, division, department, or program (i.e., the first organizational unit below the college level), but the College of Law, WWAMI, Library, and the Counseling and Testing Center shall be considered to be units. For Extension educators, the unit shall be the Extension district.

f. Unit Administrator. The “unit administrator” is the administrator of the unit that holds faculty member’s appointment. In the case of an interdisciplinary appointment, the administrator of the unit that holds the majority of the appointment shall be considered the unit administrator.

g. University. “University” and “UI” refer to the University of Idaho.

A-2. Faculty Promotion.

a. Purpose. Academic rank represents and rewards the individual’s performance as a scholar, teacher, and faculty member. Promotion to a higher rank is not automatic but is a decision made on an individual basis subject to university, college, and unit criteria.

b. Criteria. Promotion to a rank requires the candidate to meet the requirements for that rank. Promotion is awarded only to candidates who effectively perform in the responsibility areas contained in FSH 1565 C as specified in the candidate’s position description, and who meet university, college and unit criteria for promotion. Decisions are based on thorough and uniform evaluation of the candidate’s performance and granted only when there is reasonable assurance, based on performance, that the candidate will continue to meet the criteria for promotion. The faculty of each college and unit shall establish in their bylaws substantive promotion criteria for all types of faculty existing within that college or unit (e.g. regular faculty, clinical faculty, research faculty, etc.), consistent with university requirements. The criteria shall include a statement regarding the role of interdisciplinary activity and shall be included in college or unit bylaws (see FSH 1590).

c. Non-Tenure Track Faculty Promotion. Non-tenure track positions at the assistant and associate professor level are eligible for promotion to the next rank. Full-time instructors are eligible for promotion

to senior instructor. Senior instructor is not a rank from which a faculty member may be promoted (FSH 1565 D-1.b).

A-3. Faculty Tenure.

a. Purpose. Tenure is intended to protect academic freedom in order to maintain a free and open intellectual atmosphere. The justification for tenure lies in the need for protection from improper influences from either outside or inside the university. Tenure strengthens UI's ability to attract and retain superior teachers and scholars as members of the faculty. UI's tenure policy improves the quality of the faculty by requiring that each faculty member's performance be carefully scrutinized before tenure is granted.

b. General Provisions. Tenure is a condition of presumed continuing employment accorded to a faculty member, usually after a probationary period, on the basis of an evaluation and recommendation by a unit committee and administrator, a college committee and dean, a university committee, the provost, and the president. Prior to the award of tenure, employment beyond the annual term of appointment may not be legally presumed (RGP II.G.1.b). After tenure has been awarded, the faculty member's service can be terminated only for adequate cause, the burden of proof resting with UI (FSH 3910), except under conditions of financial exigency as declared by the board (FSH 3970), in situations where extreme shifts of enrollment have eliminated the justification for a position, or where the board has authorized elimination or substantial reduction in an academic program (RGP II.G.6.a).

c. Criteria. Tenure is granted only to full-time faculty members (RGP II.G.6.a) who demonstrate that they have made and will continue to make significant contributions in their disciplines through effective performance in the responsibility areas contained in FSH 1565 C as specified in their position description and consistent with university, college and unit criteria. The faculty of each college and unit shall establish substantive tenure criteria consistent with the university requirements for tenure. The criteria shall include a statement regarding the role of interdisciplinary activity and shall be included in college or unit bylaws (see FSH 1590).

d. Tenurable Ranks. The tenurable ranks are assistant professor, associate professor, and professor. Research professors, extension faculty, psychologists, and licensed psychologists can be either tenure track or non-tenure track. See FSH 1565.

A-4. Consideration of Promotion or Tenure Alone. The procedures in this policy apply to all cases including applications for only tenure or only promotion. As used in this policy, "promotion or tenure" means promotion or tenure or both.

B. GENERAL PROVISIONS.

B-1. Delegation. The provost may delegate any of their responsibilities in this policy to a designee.

B-2. Provost's Administrative Guidance. The process of promotion and tenure is administered by the provost. The provost shall publish guidance necessary for the administration of the promotion and tenure system that is consistent with the *Faculty Staff Handbook (FSH)* and the *Regents of the University of Idaho Governing Policies and Procedures (RGP)*. This guidance shall be mandatory. The provost's administrative guidance shall include:

- a. Deadlines for the promotion and tenure process;
- b. The forms required to document the promotion and tenure process (e.g. dossier submission form, unit voting forms, etc.);
- c. Procedures for requesting early consideration for promotion;
- d. Requirements for curriculum vitae;

e. Requirements regarding the submission of promotion and tenure dossiers including format, order of materials, page limits for materials, etc.;

f. Requirements for the selection of external reviews for scholarly work;

g. The timing of appointments and relative representation of faculty on the university promotion & tenure committee pursuant to section G-1 herein; and

h. Other matters necessary to ensure the appropriate administration of the promotion and tenure process.

B-3. Committee Problem Resolution. If the unit administrator or the college dean is not able to fill membership on a committee required under this policy, the provost, in consultation with the dean, shall appoint an appropriate faculty member to fill any opening in order to comply with the requirements of this policy. If the provost takes such action under this provision, documentation of the action shall be maintained by the provost.

B-4. Procedural Error Remediation. In the event of a procedural error, the provost shall confer with the dean, unit administrator, and candidate and the parties shall attempt to come to an agreement that resolves the error. Following this process, the provost shall decide the resolution of the procedural error and communicate the decision to the candidate in writing. If the candidate agrees to the resolution in writing, he or she may not later object to the resolution. If the candidate does not agree to the resolution in writing, he or she retains the right to appeal the final institutional decision based on that procedural ground (see H-3 herein). These procedural rules are intended to guide the orderly and fair administration of the promotion and tenure process and should be followed carefully, but a promotion or tenure denial may not be set aside merely because there was a procedural error unless the procedural error materially impacted the outcome.

B-5. Confidentiality. Except as specifically provided herein or in the provost's administrative guidance, all materials generated in consideration of candidates for promotion or tenure shall not be disclosed to the candidate or to persons having no role in the administration of promotion and tenure policy unless required by law or approved by the provost. Faculty participating in tenure or promotion cases must maintain confidentiality regarding all aspects of the procedure. This prohibition applies not only during the promotion or tenure process but also indefinitely into the future.

B-6. Recusal.

a. Disclosure required. Prior to consideration of candidates, each committee member shall disclose in writing to the other committee members the nature and extent of any relevant relationships and working arrangements with each candidate who will be considered by the committee.

b. Recusal due to conflict of interest. A committee member with a conflict of interest as defined in this policy shall recuse themselves from consideration of each candidate with whom they have a conflict of interest.

c. Conflict of interest defined. For purposes of this policy, conflict of interest means:

- i. The committee member has a "relationship" with the candidate as defined by FSH 6241 Nepotism, or
- ii. The committee member has a conflict of interest as defined by FSH 6240 Conflicts of Interest or Commitment.

d. Objection; disqualification; final decision. Objection to a committee member's participation based on conflict of interest as defined by this policy or on other grounds may be raised by the candidate, any member of the committee, by the chair of the candidate's unit, or by the dean of the candidate's college, and shall be communicated to the provost. If an objection is raised and the committee member refuses to recuse themselves, the dean of the candidate's college shall decide whether the committee member shall be disqualified from participation, unless the dean is the party raising the objection, in which case the provost shall decide. The decision of the dean or provost, as applicable, is final.

e. Recusal on other grounds. A committee member shall recuse themselves from consideration of a candidate if the committee member subjectively determines that they cannot fairly evaluate that candidate's performance as required by University policy.

C. SCHEDULE FOR PROMOTION AND TENURE CONSIDERATION.

C-1. Promotion.

a. Timing of Promotion. A faculty member shall apply and be considered for promotion according to the schedule below.

1. Instructors. Full-time instructors shall be considered for promotion to senior instructor during their sixth year of continuous, full-time service as an instructor. Part-time instructors are not eligible for promotion.

2. Tenure Track Assistant Professors. Assistant professors who are on a tenure track shall be considered for promotion at the same time that they are considered for tenure and shall be promoted if they receive tenure (C-2.a herein).

3. Non-Tenure Track Assistant Professors Assistant professors who are not on a tenure track shall be considered for promotion during their sixth full year as an assistant professor.

4. Tenure Track and Non-Tenure Track Associate Professors. Faculty may be considered for promotion during their sixth full year of service, or thereafter, as an associate professor.

b. Early Consideration for Promotion. A faculty member may be considered for promotion at an earlier time than permitted by this policy with the approval of the dean. The process for requesting early consideration for promotion shall be set forth in the provost's administrative guidance pursuant to B-2 herein.

c. Reconsideration for Promotion. When a faculty member has been considered for promotion and not promoted, he or she may apply and be considered again during their third full year of service or later after denial of promotion unless earlier consideration is approved in writing by the dean.

C-2. Tenure.

a. Timing of Tenure. A faculty member shall apply and be considered by the university for tenure during the sixth full year of probationary service. Consideration at that time is mandatory (RGP II.G.6.b.ii.). If an associate or full professor is not appointed with tenure, they are considered for tenure during the fifth full year of service. Satisfactory service in any tenurable rank may be used to fulfill the probationary period.

b. Early Consideration for Tenure. A faculty member may be considered for tenure at an earlier time than permitted by this policy (RGP II.G.6.d.iv.1), with the approval of the provost. The process for requesting early consideration for tenure shall be set forth in the provost's administrative guidance pursuant to section B-2 herein.

C-3. Special Circumstances.

a. Late Appointments. When the appointment begins after the eighth week of the start of the academic year (for academic year appointments) or after the eighth week of the fiscal year (for fiscal year appointments) then the timeline for promotion and tenure consideration begins the following year.

b. Transfer between Units.

1. Approval Process. When a faculty member transfers to another unit within UI, the transfer must be approved by the provost in consultation with the units and college dean(s).

2. Impact on Time to Promotion and Tenure. The extent to which service in the first unit counts toward promotion or tenure in the new unit must be communicated to the faculty member in writing by the provost at the time of the transfer. (RGP II.G.6.1.ii.)

3. Tenure Status. Tenure status does not change when a tenured faculty member transfers from one unit to another within UI.

c. Effect of Lapse in Service. A non-tenured faculty member who has left the institution and is subsequently reappointed after a lapse of not more than three (3) years may have their prior service counted toward eligibility for the award of tenure. Eligibility for the award of tenure must be clarified in writing before reappointment. A tenured faculty member who has left the institution and is subsequently reappointed after a lapse of not more than three (3) years must have tenure status clarified in writing by the president before appointment. The faculty member may be reappointed with tenure, or may be required to serve additional years before being reviewed for tenure status. (RGP II.G.6.1.i)

d. Credit toward Promotion or Tenure at Time of Appointment. Credit toward promotion or tenure may be granted at the time of appointment with the approval of the provost. Such credit must be documented in the letter offering the candidate employment at UI. Where credit toward promotion or tenure is approved, all evidence of success in the faculty member's areas of responsibility having arisen during the years for which credit is given shall be included in the candidate's dossier and must be considered in evaluating whether the candidate has demonstrated success in the applicable areas of responsibility. Credit toward promotion and tenure may be granted under the following circumstances:

1. After review of the candidate's qualifications, the faculty in the unit vote that the candidate meets UI criteria for the rank to be offered, and
2. The candidate has demonstrated outstanding performance of responsibilities relevant to the position for which the person is being appointed through service at another institution, or has made substantial contributions to their field of specialization, and
3. The candidate must complete one full year of employment at UI prior to applying for promotion or tenure.

e. Appointment with Tenure. Appointment with tenure may be offered under the following circumstances:

1. The candidate has attained tenure at another college or university, and
2. After review of the candidate's qualifications, the faculty in the unit vote that the candidate meets UI criteria for tenure and the rank to be offered, and
3. The candidate has demonstrated performance of responsibilities relevant to the position for which the person is being appointed.

f. Administrative Appointment.

1. The role of an administrator is not tenurable.
2. A faculty member who serves as an academic administrator retains membership in their academic department and their academic rank and tenure. (RGP II.G.6.i.ii) The faculty member may resume duties in their academic department when the administrative responsibilities end. (RGP II.G.6.i.iv)

3. A candidate may be initially appointed as an associate or full professor with tenure with the approval of the president. (RGP II.G.6.i.iii) If an administrative appointment carries academic rank, evaluation for tenure is conducted by the unit in which the rank is held.

g. Unit Administrator under Review for Promotion or Tenure. If the unit administrator is scheduled to be evaluated for promotion or tenure, the dean shall fulfill all the responsibilities under this policy normally fulfilled by the unit administrator.

C-4. Extensions.

a. Childbirth or Adoption: A faculty member who becomes the parent of a child by birth or adoption, may request an automatic one-year extension of the timeline for promotion or tenure or both. (RGP II.G.6.d.iv.2.)

b. Other Circumstances: An extension of the timeline for promotion or tenure or both may be granted in other exceptional circumstances (RGP II.G.6.d.iv.2) that may impede a faculty member's progress toward achieving promotion or tenure, including but not limited to significant responsibilities with respect to elder or dependent care, child care, custody, disability or chronic illness, problems beyond the faculty member's control relating to their research or scholarly activities, or such other reasons deemed by the provost to be exceptional and likely to impede the faculty member's progress.

c. Third-Year Review. In the event that an extension is requested and granted before the third-year review, the review is also automatically delayed for one year.

d. Length of Extension. In most cases, extension of the time to tenure or promotion shall be for one year; however, longer extensions may be granted upon a showing of need by the faculty member. Multiple extension requests may be granted.

e. Option to Shorten Extension. A faculty member may choose to be considered for promotion or tenure on their original timeline, even if an extension has been granted.

f. Procedure for Requesting an Extension:

1. The faculty member must request the extension from the provost in writing by March 15 of the calendar year in which the review process begins, as set forth in the provost's administrative guidance (B-2 herein). The written request must include appropriate documentation of the childbirth, adoption, or other exceptional circumstance.

2. Except to obtain necessary consultative assistance on medical or legal issues, only the provost shall have access to documentation pertaining to a request related to disability or chronic illness. The provost shall, in their discretion, determine if consultation with the dean or unit administrator is appropriate.

3. The approval decision shall be made without regard to whether or not the faculty member takes a leave related to the same circumstances presented for the extension.

4. The provost shall notify the faculty member, unit administrator, and dean of the action taken. The candidate may choose to provide information regarding the extension in their Personal Statement of Accomplishment; otherwise, no information regarding the extension shall be included in the candidate's dossier, unless such information already exists in the materials to be provided by the unit administrator, as detailed in D-2. If such information already exists in the D-2 materials, the candidate may choose to have that information redacted. Committee and administrator reports shall not mention the extended timeline.

g. Effect of Extension. No additional productivity is expected when a faculty member extends the timeline for promotion or tenure. For example, if a tenure decision would customarily take place in the sixth year, and it is extended to the seventh year, the standard of productivity would remain the same as for a tenure decision made in the sixth year.

D. PROMOTION AND TENURE DOSSIER. All materials provided by the candidate and by the unit administrator shall be compiled together into a single dossier in the manner prescribed by the provost's administrative guidance (B-2 herein).

D-1. Materials to be Provided by the Candidate. The candidate shall submit the following materials:

a. Current Curriculum Vitae. The curriculum vitae shall be in the required UI format.

b. Candidate Statements. This section is limited to eight pages with an optional one-page COVID impact statement for a maximum of nine pages.

1. Context Statement. The Context Statement is written by the candidate and describes the candidate's academic unit and the candidate's responsibilities within their unit as established in the position description. It is intended to inform reviewers about the candidate's academic environment so that reviewers may consider the similarities and differences between their own academic unit and that of the candidate. The context statement should also describe the expectations placed on the candidate by interdisciplinary programs or research centers, the requirements of joint appointments or other special circumstances. If applicable, the candidate shall indicate their choice of unit criteria for promotion and tenure under which to be evaluated, pursuant to D-2.a.2.

2. Personal Statement of Accomplishment. The Personal Statement of Accomplishment is written by the candidate and interprets their record of accomplishment relevant to the responsibilities in their position description and the criteria for promotion or tenure, but should not duplicate other materials in the dossier. The statement may explain and analyze materials submitted and include a philosophical vision as it relates to the broader impact of accomplishments. The statement should explain the nature of the candidate's activities so that others will understand them fully for purposes of assessment. The format and method of presentation is a matter of candidate choice.

3. COVID Impact Statement (Optional) In one page, the candidate may describe the effects of the pandemic on their work activities and outcomes during the period of review. Candidates may describe such effects across the four areas of consideration: teaching; scholarship and creative activity; outreach and extension; and university service and leadership.

c. Evidence of Accomplishment. The candidate may provide evidence of accomplishment for each area of responsibility in the position description. Evidence may include examples of scholarly work; evidence of teaching effectiveness as provided in FSH 1565 C-1.a. (note that student course evaluations, and, if applicable, peer evaluations are provided by the unit administrator; see D-2.c.); letters of support, etc. Evidence of Accomplishment shall not include additional narrative regarding promotion or tenure. This section has no page limit.

D-2. Materials Provided by the Unit Administrator. The unit administrator shall provide to the candidate items a-d below, in the format prescribed by the provost's administrative guidance (B-2 herein), at least five business days prior to the beginning of the semester in which the promotion or tenure review is scheduled to begin. After the dossier has been finalized, as described in D-3.c, the unit administrator shall add the external peer review letters described in D-2.e and forward the dossier for the first level of review.

a. Bylaw Sections. College and unit bylaw sections that cover the following areas:

1. Annual review process and annual performance criteria.

2. Criteria for promotion and tenure. If criteria change during the period under review, the candidate shall choose the version of the criteria by which he or she will be evaluated. If a candidate does not select a version, the version in effect at the time of submission shall be used.

b. Position Descriptions and Annual Evaluations. Copies of the candidate's position description(s) (FSH 3050) and annual evaluations (FSH 3320) for the period under review.

c. Teaching Effectiveness. If teaching is included in the candidate's position descriptions, copies of all of the candidate's student course evaluation summaries (RGP II.G.6.e) as described in FSH 2700 D-2 for the period under review, and peer evaluations of teaching for the period under review, as prescribed by the provost's administrative guidance (B-2 herein).

d. Prior Reports. Copies of any third-year review committee reports and periodic review reports made during the period under review, along with the associated unit administrator's and dean's reports (as applicable) and any responses by the candidate to the reports.

e. External Peer Reviews. The unit administrator shall obtain three to five external reviews of the candidate's performance in the area of scholarly and creative activity, as defined by FSH 1565 C-2. External review shall not be conducted for faculty undergoing third-year review or for nontenure track candidates for promotion with an average of 5% or less responsibility for scholarship or creative activity in their position description during the review period. In the case of tenurable and tenured faculty in Extension, the external review shall focus on the candidate's performance in the areas of scholarship and creative activity and outreach and extension. All review letters received shall be included in the dossier.

1. Qualifications of Reviewers. External reviewers shall be tenured faculty members who have expertise in areas closely related to the candidate's expertise. If the review is to be in support of promotion, each reviewer shall be at, or above, the rank the candidate is seeking. Because reviewers are asked to provide independent and objective review, reviewers shall not have a personal or professional relationship with the candidate that could prevent an unbiased assessment.

2. Selection. The reviewers to be solicited shall be chosen by the unit administrator, but at least two reviewers shall come from a list of at least eight qualified reviewers provided by the candidate in writing to the unit administrator by the deadline provided in B-2 herein. If the unit administrator cannot obtain letters from two reviewers on the candidate's list, the unit administrator shall ask the candidate to identify further potential reviewers. The candidate may also provide the unit administrator with the names of up to two individuals who shall be excluded from consideration as an external reviewer. If the candidate fails to submit either list, the unit administrator shall select reviewers without that input from the candidate. These lists shall not be included in the dossier but shall be kept on record by the unit administrator.

3. Request Letters to the External Reviewers. The letters of request to the reviewers shall be based on a template provided by the provost.

4. Materials Provided to the External Reviewers. The unit administrator shall provide only the candidate's CV, position descriptions for the period under review, candidate statements from D-1.b herein, up to four examples of the candidate's scholarly and creative activity chosen by the candidate, and the sections of college and unit bylaws setting forth criteria for promotion or tenure. In the case of tenure-line faculty appointments with extension, the four examples shall include the candidate's scholarly and creative activity and extension and outreach work chosen by the candidate. The unit administrator shall not provide the complete dossier or any additional materials to external peer reviewers.

5. Criteria for External Review.

a) The review shall be limited to the candidate's scholarly and creative activity in relation to the applicable tenure and/or promotion criteria and the faculty member's position description(s). In

the case of tenurable Extension faculty, this review shall encompass scholarship and creative activity and outreach and extension.

b) Reviewers may not be asked to evaluate the candidate pursuant to external criteria such as those at the reviewer's institution or other professional organizations.

c) The university shall make every effort to keep the names of the reviewers confidential from the candidate. The candidate may request to view the external reviewers' anonymized evaluations after the final institutional decision is made. Such requests shall be directed to the provost.

f. Additional Review Letters.

1. In the case of interdisciplinary appointments, administrators of units holding the minority of the candidate's appointment (see A-1.d herein) may provide an additional review letter.

2. In the case of a candidate based at a UI center, the center executive officer may provide an additional review letter.

D-3. Submission of Dossier.

a. Deadlines for Submission of Candidate Material and Unit Materials. Materials to be provided by the candidate in support of tenure and/or promotion, as described in section D-1, shall be submitted to the unit administrator either prior to the beginning of the semester in which the review is scheduled to begin or prior to the submission of the candidate's materials to the external reviewers, whichever is earlier. In the event a unit administrator fails to provide materials within the timeline referenced in D-2 above, the candidate's deadline for submission shall extend to ten days after the provision of materials by the unit administrator.

1. External peer reviews need not be submitted as part of the dossier prior to the deadline, but must be received, if required, prior to any consideration of the dossier.

2. The dossier may be supplemented with scholarship or creative accomplishments occurring after submission. Supplementation must be made pursuant to the provost's administrative guidance.

b. Failure to Submit Candidate Materials by Deadline. Candidates are expected to follow the submission timeline contained in the provost's administrative guidance. A candidate who does not submit the materials described in D-1 by the deadline described in D-3.a of the mandatory year, or of the tenure consideration year as adjusted pursuant to an extension under section C-4, is deemed to have been denied tenure as of the deadline.

c. Finalization of Dossier. Submission is final when the candidate has signed a dossier submission form and provided the signed dossier submission form to the unit administrator. Other than supplementation provided in D-3.a herein, the dossier is final when submitted and may not be supplemented or altered after submission.

E. UNIT LEVEL REVIEW.

E-1. Unit Promotion and Tenure Committee.

a. Membership. The unit faculty shall elect a promotion and tenure committee for each candidate according to the criteria below. The unit faculty may delegate the selection of committee members to the unit administrator.

1. The committee shall be composed of five faculty members. At least three members shall be tenured faculty members in the unit. At least one member shall be a tenured faculty member from outside the unit.
2. The committee shall elect a chair from among their tenured members.
3. Because the promotion and tenure committee is a personnel committee, students and non-university employees shall not serve on the committee.
4. In cases considering promotion to full professor, the committee shall include at least one full professor.
5. Neither the unit administrator nor the dean may serve as a member of a unit promotion and tenure committee.
6. If there are not three tenured faculty members available to serve on the committee, or a full professor in a case considering promotion to full professor, the unit administrator, in consultation with the dean, shall designate appropriate faculty members from other units whose areas of expertise are as closely related as possible to the work of the candidate. One such member may chair the committee if there is not a tenured member from the unit available to serve as chair.
7. Upon request by the candidate to the unit administrator, the unit administrator shall provide the candidate with the names of the committee members.

b. Basis for Evaluation. The unit administrator shall submit the completed dossier to the chair of the unit promotion and tenure committee. The review shall be based on the dossier. The committee shall not meet until the dossier has been available to all members for a minimum of five business days. The committee shall evaluate the candidate in light of the unit, college and university criteria for tenure and/or promotion.

c. Unit Promotion and Tenure Committee Report. The committee shall write a report recommending whether the candidate should be promoted and/or tenured. For each candidate, the report shall include a brief rationale for the committee's recommendations and an anonymized record of the committee's vote for or against tenure or promotion of each candidate. Abstentions are not allowed. The chair of the committee shall deliver the report to the unit administrator. The report shall not be shared with faculty who are not members of the college or university promotion and tenure committees.

E-2. Unit Faculty Voting.

a. General.

1. The dossier must be made available a minimum of five business days prior to any voting.
2. Faculty who are eligible to vote may assemble to deliberate prior to voting.
3. Voting shall occur using a signed, written ballot in a format provided in the provost's administrative guidance in B-2 herein.
4. Faculty members may submit evaluative comments as part of their ballot to the unit administrator.
5. Unit faculty voting results shall not be shared with the candidate's promotion and tenure committee.
6. Faculty are not required to vote but are encouraged to do so.

b. Voting by Tenured Faculty. In the case of tenure, the unit administrator shall solicit the vote of all tenured faculty members of the candidate's unit regarding whether the candidate should be granted tenure. Non-tenured faculty shall not be eligible to vote.

c. Voting by Promoted Faculty. In the case of promotion, the unit administrator shall solicit the vote of all faculty members of the candidate's unit of the same or higher rank as that to which the candidate seeks promotion. Faculty members of lower rank shall not be eligible to vote.

E-3. Unit Administrator.

a. Unit Administrator's Report. The unit administrator shall prepare a written report after considering the tenure and/or promotion dossier, the unit promotion and tenure committee report, and the unit voting results. The unit administrator's report shall include the anonymized voting results as well as the administrator's recommendation for or against tenure and/or promotion in light of the unit, college and university criteria for tenure and/or promotion. In the event that the administrator submitting the recommendation has not had at least one year to evaluate the candidate, he or she shall disclose this as part of the report.

b. Transmission of Reports to the Candidate and Written Response. The unit administrator shall provide the candidate with copies of the unit administrator's report and the report of the unit promotion and tenure committee. The candidate may provide a written response to the reports within five business days after receiving the reports.

E-4. Forwarding Materials. The unit administrator shall forward the tenure and/or promotion dossier and all reports and the candidate's response, if any, to the dean.

F. COLLEGE LEVEL REVIEW.

F-1. College Promotion and Tenure Committee. Each college having more than one unit shall have a standing promotion and tenure committee. The members shall be tenured and shall serve staggered three-year terms. Each unit within the college shall be represented by one faculty member, to be selected as follows: Each unit shall nominate two faculty members, from which the dean shall select one, giving consideration to representational balance in the makeup of the committee. The committee shall elect its chair from among its members or may elect the dean or associate dean to serve as chair without vote. For the College of Business and Economics each major area shall serve as a "unit" for purposes of section F. Names of committee members shall be provided to the candidate upon request to the dean.

F-2. College Promotion and Tenure Committee Evaluation and Report. The committee shall not meet until the dossier has been available to all members for a minimum of five business days. The committee shall evaluate the dossier in light of the unit, college and university criteria. The committee chair shall write a report for each candidate recommending whether the candidate should be promoted and/or tenured. For each candidate, the report shall include a brief rationale for the committee's recommendations and an anonymized record of the committee's vote for or against tenure and/or promotion of each candidate. Abstentions are not allowed. A tie vote will result in a recommendation of "undecided."

F-3. Dean's Report. The dean shall evaluate the candidate in light of the unit, college and university criteria for tenure and/or promotion then make a written recommendation as to whether each candidate should be promoted and/or tenured after considering the materials presented in the dossier (including all reports, responses and polling information), and advice of the college committee. The dean may also confer individually or collectively with unit administrators about the qualifications of the candidate.

F-4. Transmission of Reports to Candidate and Written Response. The dean shall provide the candidate with copies of the dean's report and the college promotion and tenure committee report. The candidate may provide a written response to the reports within five business days after receiving the reports.

F-5. Forwarding Materials. The dean shall forward the completed tenure and/or promotion dossier and all reports, recommendations, and responses to the provost.

G. UNIVERSITY LEVEL REVIEW.

G-1. University Promotion and Tenure Committee Composition. A university promotion and tenure committee of faculty members, chaired by the provost without vote, is appointed each year. If, in the discretion of the provost, the number of dossiers to be considered exceeds the capacity of the committee, one or more additional University Promotion and Tenure Committees may be formed using the procedure below.

a. Nominations. One-third of the committee's membership shall be selected by the provost from the previous year's committee; the remaining members shall be selected by the provost and the chair and vice chair of the Faculty Senate from nominations submitted by the senators. The delegation representing the College of Letters, Arts and Social Sciences on Faculty Senate nominates four faculty members who should be representative of the breadth of the disciplines within the college. The delegation representing the College of Agricultural & Life Sciences on Faculty Senate nominates four faculty members from the college comprising two each from (a) faculty with greater than 50% teaching and research appointments and (b) faculty with greater than 50% University of Idaho Extension appointments. The Faculty Senate delegations from the other colleges and the Faculty-at-Large each nominate two faculty members from their constituencies. If senators from a college do not submit nominations by the deadline announced by the provost, the provost shall appoint members from that college, as specified in G-1-b-2 herein.

b. Membership. The membership of the committee shall be as follows:

1. The vice president for research, the dean of the College of Graduate Studies and the provost's designee with primary responsibility for faculty promotion and tenure, to serve *ex officio* (without vote).
2. Two representatives from the College of Letters, Arts and Social Sciences, two representatives from the College of Agricultural & Life Sciences, and one representative from each of the other colleges and the Faculty-at-Large.
3. The committee shall include at least one tenured faculty member (RGP II.G.6.e).
4. Upon request by the candidate to the provost, the provost shall provide the candidate with the names of the committee members.

G-2. University Promotion and Tenure Committee Vote. The committee shall not meet until the dossier has been available to all members for at least two weeks. The committee shall deliberate and vote for or against tenure and/or promotion of each candidate in light of the unit, college and university criteria for tenure and/or promotion. Abstentions are not allowed.

G-3. Provost's Report. The provost shall write a report to the president making a recommendation regarding tenure and/or promotion of each candidate in light of the unit, college and university criteria for tenure and/or promotion. The report shall include a rationale for each recommendation and the anonymized results of voting from the university promotion and tenure committee.

H. DECISION.

H-1. Presidential Approval. The president shall confer with the provost and make the decision regarding tenure and/or promotion for each candidate in light of the unit, college and university criteria for tenure and/or promotion. The awarding of tenure and/or promotion to an eligible faculty member is made only by a positive action of approval by the president.

H-2. Notice to the Candidate. The president shall give notice in writing to the candidate of the granting or denial of tenure and/or promotion by May 1 of the academic year in which the decision is made. (RGP II.G.6.c.) The provost's recommendation shall be forwarded to the candidate at that time. Notwithstanding any provisions in this section to the contrary, no person is deemed to have been awarded tenure solely because notice is not given or received by the prescribed times. If the president fails to notify the candidate of the decision within the required timeframe, it is the responsibility of the candidate to inquire as to the decision.

H-3. Appeals. Appeals regarding promotion or tenure may be filed only after the final decision of the president, which shall be considered the institutional decision (see FSH 3840 B-2).

H-4. Denial of Tenure. If a faculty member is not awarded tenure, the president, at their discretion, may:

a. Notify the faculty member that the contract year in which the tenure decision is made is the terminal year of employment (RGP II.G.6.k.), or

b. Issue a contract for a terminal year of employment following the year in which the tenure decision is made (RGP II.G.6.j), or

c. Issue to the faculty member contracts of employment for successive periods of one (1) year each. Such appointment for faculty members not awarded tenure must be on an annual basis, and such temporary appointments do not vest in the faculty member any of the rights inherent in tenure and there shall be no continued expectation of employment beyond the annual appointment (RGP II.G.6.j).

d. A candidate who is denied tenure is still eligible for employment at the University in nontenurable positions.

Version History

Amended January 2023. The October 2022 interim revision was permanently adopted.

Amended October 2022. President Green adopted an interim revision to G-1 to provide for the formation of an additional University Promotion and Tenure Committee in years when, in the discretion of the provost, the number of dossiers to be considered exceeds the capacity of a single committee.

Amended July 2022. In response to feedback collected from faculty and administrators, extensive revisions, clarifications, and editorial changes were made. In addition, the May 2021 temporary emergency changes were permanently adopted.

Amended May 2021. President Green adopted temporary emergency changes affecting sections D-1.b. and D-2.e.

Amended July 2021. Section A-2.a. was revised to state the purpose of promotion; D-2.e.4. to clarify contents of packet for external review; and F-1 to require consideration of representational balance.

Adopted January 2020. The university's promotion and tenure policies were comprehensively revised in order to unify all provisions regarding procedure in the Faculty Staff Handbook and to help faculty and reviewers by clarifying the procedure. The following changes were approved: Deletion of FSH 3520, 3560, and 3570; revision of FSH 3530; and addition of new FSH 3500 and 3510.

2023 – 2024 Faculty Senate – Pending ApprovalMeeting # 25

Tuesday, March 19, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Strickland (excused), Raney (excused), Blevins, Thaxton

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #24, March 5, 2024, were approved as distributed.

Chair's Report:

- Many thanks to our today's guests, Teresa Amos, Terry Soule, David Paul and Dean Kahler. Later in the meeting, they will engage with us in important conversations.
- A reminder of the exhibit of the AI/ML Task force from Monday, April 1, until Saturday, April 13. In the Reflections Gallery in the ISUB Building. We have received a large number of posters and videos. So, it's going to be a bigger than expected exhibit.

Provost's Report:

- The census date for spring was last week, and we are up overall 5.8% compared to last spring. Congratulations to everyone on this big accomplishment!
- We have four finalists visiting Moscow and Boise for the Dean opening in the College of law. For more information on the candidates and public events, visit <https://www.uidaho.edu/provost/administrative-searches>
- The SUCCESS Team is hosting a Town Hall tomorrow, at 3:30 PST. More at <https://uidaho.zoom.us/j/84282522599?from=addon>.
- March Faculty Gathering: Thursday, 4:30 to 6:30, in the Vandal ballroom, hosted by the College of Science. Please RSVP at <https://forms.office.com/r/rYZ95ku7Dg>.
- The College of Engineering is hosting a gathering in Idaho Falls, Tuesday, April 9, from 4:00 to 6:00.
- University of Phoenix: Not much new to report. We continue to work with the legislators, who plan to adjourn the session next Friday.
- Senator Shook sent some questions about Phoenix, following up on the discussion we had just before spring break:
 - Would you be able to provide a rough estimate of UI's total Phoenix cost to date, and from which UI fund lines were they paid for? Answer: When we received the questions, the updated number was \$11.3 million. This includes expenses paid to date. As more

work continues, especially with the legislature, expenses continue to increase. They are being paid using UI resources. We established a separate fund, so that all Phoenix expenses would go into one place and be tracked easily. This is how we tracked similar costs for the P3 utility project a few years ago, as well as the P3 housing project.

- How much is the decline in the UI reserve fund from these Phoenix expenses? Answer: The University doesn't have a single reserve fund. Reserves are held across the entire institution. Some are held centrally, but most of them are held in colleges or other units across campus. The university has cash reserves set aside and long-term investment accounts. While these transaction costs have impacted cash balances, there has not been any impact on the long-term investment accounts.
- Will less reserves result in holdbacks for academic units, increased quote taxes on colleges or department funds, or hiring freezes? Answer: No. Lower reserves do not automatically result in any of those things. They just result in lower reserves on our balance sheet, by as much as we spend.
- Is there a contingency plan for the costs already incurred, should the transaction not go through? Answer: We're hopeful it will close, and there's still a lot of work going on to find a path forward with the legislature. If it does not, the University will need to address the costs incurred. But we've been paying as we go, so, it will just take us longer to meet the State Board requirement for reserves. And obviously the State Board was in the middle of this transaction and knew that these costs were being incurred.
- Senator Shook had another question, about changes in Arizona bonding authority. Will that affect the bonding itself and the total cost of the bonds? Answer: I'll need to follow up and confirm. I heard there was a change, but I don't think it will create a real problem in the process.

Committee Reports (voting):

- Proposed changes to the Faculty Staff Handbook
 - FSH 1640.58 Ubuntu – Kristin Haltinner, Vice Chair of Faculty Senate, Attach. #3. Past chairs and members of Ubuntu have indicated that the committee membership was not working. The EDU had five ex officio seats and it was very burdensome for their offices to staff. We revised this to one voting seat chosen by the Chief Diversity Officer. The name for the Center for Disability Access and Resources needed to be updated. Given the importance of this office's participation, we also shifted them from ex officio to a voting member. IPO was also shifted to a voting membership. The faculty roles, undergraduate student roles, graduate student role, and remaining ex officio members remained the same. The committee also lacked clear term expectations, so these were added.
Vote: 17/19 yes; 2/19 no. Motion passes.
- Proposed changed to the University Catalog
 - UCC 533 Artificial Intelligence and Machine Learning (AI/ML) Undergraduate Certificate – Terence Soule, Department Chair, Computer Science, Attach. #4.
AI/ML is changing the world on a grand scale. We are seeing its transformational impacts on public health, manufacturing, agriculture, financing, urban systems and smart communities, social welfare, criminal justice, environmental sustainability, and national security. This certificate is intended to train students to understand AI/ML fundamentals, master algorithms, and be able to use state-of-the-art tools to develop AI/ML solutions for real-world problems. The certificate leverages the expertise from

faculty in several departments to give students a strong interdisciplinary background. It is designed to give undergraduate students from a range of fields the set of skills they need to succeed in the AI/ML arena.

Discussion:

After some minor clarification, the senators were ready to vote.

Vote: 19/19 yes. Motion passes.

- UCC 534 Artificial Intelligence and Machine Learning (AI/ML) Graduate Certificate – Terence Soule, Department Chair, Computer Science, Attach. #5. Basically, they're the same. Many of our courses are 400/500 level. So, the graduate certificate includes the 500-level version of the same courses. The two certificates are separate.

Discussion:

A senator inquired whether CS prerequisites are required for the courses in the certificate. Terence responded that some courses have CS prerequisites, others may have Math prerequisites, but, overall, there is a good number of options.

Another senator asked whether students are educated about ethical use of AI/ML.

Terence said that CS majors are informed, but he cannot be sure about students from other majors.

Vote: 20/20 yes. Motion passed.

Announcements and Communications:

- Admissions Standards Proposal from UCC – David Paul, Chair of UCC. David Paul gave a brief overview of the recent discussions at UCC. They wanted to make a data-based decision about what is best. The data presented at UCC shows that lower high school GPA and lower SAT scores are associated with lower retention rates. Therefore, they felt there is no benefit to students by having lower admission standards. They also discussed the ethical aspects of admitting students who aren't successful and still must pay for it. They also felt the pre-pandemic admission standards were not especially burdensome.

Discussion:

Vice Chair Haltinner argued that enrollment is up, as reported by the Provost earlier, in part because we have lowered those standards. She shared some new information from Dean Kahler: In fall 2023, we admitted about 9,500 students, or 81% of the applicants. Under the pre-Covid criteria, we would have admitted 5,600 students, which is 48% of the total number of applicants. Thus, one must consider other aspects as well, such as lost faculty lines or jobs. It's important to consider the impact of this decision on the size of the student body and its possible implications. David Paul disagrees. By pre-Covid standards, students with GPA of 3.0 and higher were directly admitted, and those with GPA between 2.6 and 2.99 could still get in with a composite SAT score of 740. From 2023 UI data, 96% of the submitted SAT scores were 800 or above. Dean Kahler joined the conversation and confirmed the conclusions of his analysis. He looked at the 11,762 applicants for fall 2023 and tried to forecast how many of those students wouldn't have test scores, and how many would not be admissible using the pre-Covid criteria. He found a significant reduction in the number of students that would be directly admissible to the university.

The discussion moved to the ISAT as one of the standardized tests that we may accept or require for admissions. UCC felt they could not incorporate the ISAT in their recommendation due to lack of data. A senator pointed to ISAT data from 2019, the results of which seem less

biased regarding race, gender and socioeconomic status. David Paul reiterated that retention and success are not predicted by the ISAT.

Provost Lawrence noted that reverting to pre-Covid standards would put UI in a very different situation with respect to state-wide direct admissions – students could be admitted to 8 or 7 of the 8 schools. We would be out of line with BSU. Our mission as a land grant institution is access, teaching the people in the state, not being an elite institution. At the same time, we want to admit students who we are reasonably confident have a high probability of being successful. But we cannot forget that there is a core to our mission. Access versus limiting for success are conflicting points. There was some additional discussion on the importance of identifying the best balance between facilitating access and admitting students who are ready for college.

Provost Lawrence commented on the admissions criteria issue being complicated by a generational issue, impacting children who were not yet in high school during the pandemic. Furthermore, pre-Covid criteria are lower because they allow automatic admission down to a GPA of 2.2 with a certain test score, which is a lower standard than automatic admission with a 2.6, as we do now. Below that threshold, they can be admitted and receive extra support through the VGP. Thus, the real difference is that pre-Covid criteria require test scores. The current emergency criteria do not require test scores but set a higher bar on the minimum GPA. The Provost suggested talking about “different” rather than “higher” or “lower.”

Before closing the discussion, Chair Gauthier had one final remark. He was intrigued by some conversations at the State Board about being able to predict where students will require additional help based on the ISAT score. Chair Gauthier thanked everyone for the productive discussion.

- SUCCESS Update – Erin Chapman, School of Family and Consumer Science, Dan Eveleth, Department of Business, Attach. #2.
Dan briefly reviewed the history of SUCCESS. It started with a call from the President for a working group to come up with initiatives that would have the potential impact of increasing six-year graduation rate from the current one to the average for R1 universities, which is 77%. Based upon an initial round of input from the U of I community, the SUCCESS Team identified three types of initiatives that have been successful at other universities and that build upon our existing strengths: 1) Expand and enhance common experiences; 2) Increased use of evidence-based teaching practices; 3) Provide earlier applied learning opportunities. (Read more at <https://www.uidaho.edu/provost/academic-initiatives/student-success-initiative>.)
At this point in the process, the team is looking for two basic types of information. First: If there was an initiative on, for example, early applied learning opportunities, what form would that take in your unit? Perhaps there are things you're already doing that you would like to expand, or your unit is talking about some new ideas. What are those ideas? What form would they take in your unit? What kind of support would you need to either expand existing initiatives in your unit or develop new ideas? We welcome your feedback. There is a link to a survey in your binder where you could comment on any or all of the three types of initiatives.
Link to Stage 2 Feedback Survey:
https://forms.office.com/pages/responsepage.aspx?id=Y2u8fpJXGUqyCwS4JgSIU5scQ5_mUx5Er_b1revX2YQpUOUFMRTthOVEFaM1RUMFIUREFVTVIWSkdaQS4u&origin=lprLink
Link to tomorrow's campus-wide meeting: <https://uidaho.zoom.us/j/84282522599?from=addon>
Discussion:

A senator asked whether making a first-year experience part of the Gen Ed curriculum was ever considered. Dan replied that they did talk about it. They also discussed the idea of a first-year experience being something that all students would go through rather than a more local one. They settled on the idea of supporting and nurturing the amazing local efforts already going on, so that people could customize them to fit their unique needs.

- Phi Kappa Phi President Search – Dean Panttaja, Vice Provost for Academic Initiatives. Nationally the Chapter was instituted in 1960 as an interdisciplinary honors society. They have over 4 million dollars a year and give out fellowships. We have had 6 students over the last 4 years earn some of those fellowships to go on to our graduate school or other graduate schools. We are requesting senators to get the word out there. We're also looking for people who are willing to serve and run the Chapter, and we will pay for their membership every year that they work as officers. There should be a president, a vice president, and a secretary, but we've managed to just work with the president for the last 15 years. We have till January to get new officers up to speed. It's quite simple, and it's nice to meet these very talented students and share a little time with them and help them apply for these fellowships.

Nomination Form can be found at <https://forms.office.com/r/j3BzgtDD0u?origin=lprLink>

- MyUI – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology. At OIT, they have been working through some issues with the user experience and logins. Specifically, based on certain browsers, people were being logged out and ended up in a loop. So, we have opted to delay replacing Vandal Web until these problems can be addressed. No new actions have been put in place yet, although there is a variety of new cards that are showing up in MyUI. I would invite everybody to take the opportunity to have a look and play around. Feel free to send us your feedback.

Discussion:

Chair Gauthier mentioned a long list of questions he prepared based on people's concerns. Some of those issues have been out for some time, such as how faculty can be involved in technological choices through some form of shared governance on issues that impact their research and teaching, or AI concerns. Should we reschedule another time after Teresa has prepared to address those questions? Teresa agreed to this course of action.

Discussion:

Chair Gauthier mentioned aspects on the user testing side that need improvement. In his opinion, video tutorials are not helpful.

A senator brought up former questions about new requirements of ticket approval for purchasing common software like Slack and Dropbox and having to get OIT approval before one can get reimbursed for that software through Chrome River. Teresa mentioned some miscommunication problems they are having with Accounts Payable. They are getting those worked out. As for Dropbox or other similar storage mechanisms or locations, there is a concern from a security perspective, because we would be in a situation where we don't know where the university's data is. This could impact our eligibility for Federal grants. But all that information is being put into the broader response to the questions Teresa and Dan received over the weekend from Chair Gauthier. The senator looks forward to a broader discussion.

Provost Lawrence pointed out that we do have an Information Technology committee that's meant to have this type of discussion. I suggest we use these committees. That's why we have them.

Chair Gauthier emphasized the importance of working together and thanked everybody for these important discussions.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:46pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #25

Tuesday, March 19, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
 - II. Approval of Minutes

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 24

Tuesday, March 5, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kirchmeier, Long, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Ramirez, Raney, Roberson, Rode, Rinker, Rode, Sammaruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Kenyon (excused), Strickland (excused)

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #23, February 27, 2024, were approved with the addition of new ASUI representative Alivia Buchen to the list of members present on 02/27/2024.

Chair's Report:

- About the admissions criteria, yesterday UCC voted to return to our pre-Covid admissions standards. I just wanted to say that we have a large spectrum of students in Idaho, and we need to offer them a variety of options. ISAT is a new test that we need to take it in consideration.

Provost's Report:

- Midterm grades are due March 11. This is a great chance to reach out to students who need extra help.
- Comments on the article found at <https://www.idahoednews.org/top-news/u-of-i-funnels-7-3-million-of-phoenix-consulting-to-greens-former-employer/>
Provost Lawrence read a statement from President Green categorically denying any conflict of interest in the hiring of the Hogan Lovells firm. He has been gone from the firm for several years and has no financial interests in it. The firm was hired for its expertise in regulatory services and outstanding reputation. They are the best of the best. In fact, the Chief Justice of the United States Supreme Court, John Roberts, was a partner at Hogan Lovells. Knowing that our state and our university deserves the best due diligence available, our University Counsel Kent Nelson hired Hogan Lovells for this work. The article seems an attack to discredit President Green and the university.
- Comments on legislative actions regarding the University of Phoenix affiliation, see <https://idahocapitalsun.com/2024/02/15/idaho-legislators-threaten-lawsuit-to-stop-university-of-phoenix-purchase/>.
On Thursday and Friday, the House State Affairs Committee had two hearings. On Thursday they did ask us some questions, but on Friday they relied primarily on the viewpoints of the opposite side, and only asked us one question in an hour and a half of presentations. House Concurrent Resolution 25 can be summarized in four main points (see "Let It Be Resolved..." section): Asking the State Board of Education to reconsider their May 18, 2023 decision; Asking the State Board to reconsider the affiliation until they can be more involved; Asking the State Board and the university to fully cooperate with the legislature about the affiliation. We've answered questions and participated in hundreds of meetings with legislators. So, we feel like we've cooperated from the start. The final point of the bill is that it authorizes the speaker and pro temp to act as an agent of the legislature if there were to be any legal action. The coverage on this point has

been a little confusing. The purpose of this part of the resolution is not to take legal action but to authorize two individuals to act should it be needed. Resolution 25 passed the House today with a vote of 49 in favor and 21 against and goes to Senate next. We continue to have conversations with legislators daily about all of this.

- A couple of other things from last week's meetings. Senate Bill 1357 (like the legislation in Texas and Florida), could remove all DEI staff and programming from universities. It's currently not past the legislature, and we don't know if it will reach the floor in either chamber. The university is concerned and we've made those concerns known.

Addressing a question placed in the chat, the Provost said that it's not clear who stands to benefit from blocking the University of Phoenix acquisition. A lot of these questions are not necessarily judging the affiliation itself, but really the power and the authority around. As private individuals, you can address your legislators with opinions and concerns about all these legislative measures.

There are two other topics regarding legislature. One is around remote work. We don't know if it will pass, but we'll know soon, as we're entering the final month or so of the legislative season. They're hoping to adjourn before the end of March. The other one is CEC. It was very encouraging to see that the Education committee wanted to understand how only half of an approved standard CEC goes to fund the universities, and they were very interested in learning more about fully funding it.

Discussion:

A senator expressed deep concern about President Green's decision to hire Hogan Lovells having turned into a big PR problem, at a time when our opponents are trying to make waves. President Green should have been aware of the consequences, even if only based on perceptions. The president, not GC, bears the responsibility for these decisions. Furthermore, the massive redaction of documents signals no transparency. The Provost responded that there was awareness, but the decision was driven by the reality that this firm is one of the best. As for redacted documents, some confidential information is protected by law. We are following the law. (This point was supported and elaborated on by a senator with legal training.)

Chair Gauthier asked whether there is a back-up plan should the Phoenix transaction fail. The Provost responded that many discussions are going on. They will continue to address concerns as they become known to them.

Another senator brought up the financial piece of the deal that would result into expenses of \$10M per year for the U of I. They are wondering how much the university is pouring into a deal which may not even happen, and if it does happen, our payout is at least a year in the future. While debates are still going on, it would help to talk about the financial piece. Provost Lawrence responded: Concerning the upfront costs we've already invested, any business transaction requires costs. We've had a massive team of experts because we felt it was important to fully vet this. It is a large amount of money. Part of the closing transaction details may include reimbursement of transaction costs. As for our 10-million-dollar revenue piece, we don't have to wait a year, because it's included in the closing costs being finalized. As with any business, there is a risk of getting into it, should one decide to walk away. But we're committed to this transaction and so are the university of Phoenix and the sellers. He encouraged everybody to look at the big picture. A lot has been invested because it was worthy of that for our own safety, and to mitigate risks as much as possible.

Vice Chair Haltinner suggested to keep in mind the broader issue of transparency, besides the PR problems. She is very reassured to hear that the money will be reimbursed in closing. She asked Provost Lawrence to confirm that, should the deal not close, the money already invested is lost. The Provost confirmed.

A senator argued that the perception of nepotism may be likely, if President Green has friends among his previous business associates. Another senator, who watched the JFAC meeting, was puzzled by some of the narrative and reactions, because the Phoenix deal and the role of JFAC are separated.

Next, the discussion focused on the possible impact of current controversial issues on other appropriation decisions from the legislature. Senators are worried about possible repercussions on next year's appropriation decisions. Provost Lawrence: It's very hard to predict what JFAC or any legislative body is going to do. SBOE and U of I have fully cooperated with the legislators since May. We will respond to their needs and requests as they come in.

Committee Reports (voting):

- Proposed changes to the Faculty Staff Handbook:
 - FSH 1640.08 Admissions Committee – Kristin Haltinner, Vice Chair of Faculty Senate, Attach. #2
The Vandal Gateway Program requests inclusion on the Admissions Committee as a nonvoting member. Like the other nonvoting members on the committee, the Vandal Gateway Program director has important insights into the types of support offered at UI for people requesting admissions appeals. This proposal is coming from the Committee on Committees.
Discussion:
A senator noted that VGP is currently a pilot program, and thus this addition may have to be removed if the program isn't continued. It should be clear that this action doesn't make VGP more likely to be approved.
A senator proposed to amend by adding "or designee" next to "the director of the Vandal Gateway Program."
A senator asked whether we could approve it for one year only. Policy Coordinator Diana Whitney replied that there is no mechanism to change a policy for just one year.
Motion to amend (Tibbles, Mittelsteadt) adding "or designee" next to "the director of the Vandal Gateway Program."
Vote on the amendment: 21/22 yes; 1/22 no.
Vote on amended motion: 19/22 yes; 3/22 no. Motion passes.
 - FSH 2700 Student Evaluation of Teaching – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences and Chair, Faculty Affairs Committee, Attach #3.
Alistair Smith gave a brief background on these revisions to FSH 2700. They involved a multi-year Senate Taskforce that included representatives from ASUI leadership and input from the Faculty Affairs Committee and the University Teaching Committee and were focused on reducing bias and discrimination associated with the questions that are counted towards candidate's student course evaluation summaries used in the tenure and promotion processes. Revisions align FSH 2700 with changes already approved under FSH 1565 C.1.a that reframed evaluations to, instead, feedback on teaching effectiveness. Smith commented that the name of the policy should reflect the change to FSH 2700 Student Feedback on Teaching Effectiveness. The format of the policy was updated to align it with the rest of the FSH, namely by adding purpose, scope, policy, and procedure sections. Revisions also included clarifying when mid-semester formative feedback occurs, and how the data can be used. Revisions also introduced an appeals mechanism for instructors to

challenge inclusion of feedback in their records. As part of the revisions process, a new standard form for mid-semester formative feedback was created (it did not exist previously) and a revised standard form for end-of-semester formative feedback was developed. Finally, a mechanism to support instructors not meeting teaching effectiveness expectations was introduced.

Discussion:

In response to a question, Smith confirmed that instructors can still include additional questions.

Another senator argued that completing the course valuations should be a requirement for the students. Smith said that the committee discussed it but decided against it.

There is a preamble to explain the scope, but more information should be given to the students before making it mandatory. Some additional discussion followed about the pros and cons of mandatory evaluations. It may be something to consider in the near future, to increase the response rate and a more realistic distribution of positive and negative comments.

The discussion moved to FSH 2700 Form D-3 (mid-term formative feedback) and D-4 (end-of-the-semester feedback). Some senators asked for clarification on the questions that are or are not required for the purpose of P&T and annual evaluation, and the N/A option if students feel the question is not relevant to their course. Smith pointed to the instructions at the top of the forms. Only the five questions marked with an asterisk count for P&T and annual evaluations. The others are purely formative.

A senator asked about the second question in the Teaching Delivery part of form D-4, that refers to the course applied learning components. Although it's just formative, they worry that this item might influence students in a negative direction, even if the course is not supposed to have applied learning components. From survey design theory, a particular question in the survey will influence what comes before and what comes after. Smith noted that the present order can be rearranged. They are not proposing an order. The task force consulted with experts in the social sciences and law faculty, as well as experts on gender bias issues. Narrative is encouraged where students can provide constructive feedback. And again, if hate speech or insulting comments appear in the narrative, the instructor has the right to ask to have those tossed. If the chair, dean and the vice provost for faculty deny the request, they can appeal to the FHAB. The task force included an appeal mechanism because many international faculty have had nasty evaluations that remain in their permanent records. It was time to improve this process. As for the order in which the questions are presented, when this goes into Anthology, those with the asterisk may come first, followed by the formative feedback. The senator had also some concern about assignments being the main theme in the course content part of form D-4.

Many agreed that, overall, this proposal is a huge step forward.

Vice Chair Haltinner pointed to the second question on "Syllabus and Course Expectations." She is not comfortable with the wording "... was easy to access and coherently organized." Access is mostly about technology. If a system fails, that will reflect poorly on the instructor. Furthermore, "coherently organized" means something different to different people. Smith responded that the five starred questions were selected by FAC, but Senate is welcome to make changes.

Erin Chapman gave some additional background on how the questions were chosen. She agreed that there could be some subjectivity in assessing what's coherently organized.

Another senator echoed the concern about technology being an issue. If something doesn't work, the instructor would be held accountable. Also, in the first sentence of FSH 2700 D-3, the word "will" implies that the formative mid-semester feedback is required.

A senator asked whether it is possible to integrate this survey with Canvas. Can we give some form of reward, such as a few extra points, to the students who submit feedback? Smith replied that every instructor already has that ability.

There was a request for clarification about dropping the "neutral" category from the possible choices for the starred questions. Smith confirmed that it was removed and explained that the reason for the removal is that under the old format, the neutral answer reflected a score of 3.0, which equated to not meeting expectations, which was not the intent of a neutral response. Smith explained that in the new forms, where N/A is allowed, as per the proposed revision to FSH 2700, those responses are no longer recorded. Smit also, clarified that N/A will not be an option for the asterix questions.

Proposed amendments (Mittelsteadt, Maas):

In the first sentence of FSH 2700 D-3, replace "will" with the word "may." Under "Syllabus and Course Expectations" in the end-of-semester evaluations, the question that says "The course syllabus was easy to access and coherently organized" shall be removed from consideration as one of the five questions (thereby reducing the number of questions to 4) used in tenure, promotion and evaluation.

Vote on the amendments: 17/19 yes; 2/19 no.

Vote on the amended motion: 16/19 yes; 3/19 no. Motion carries.

- FSH 3500 Promotion and Tenure – Erin Chapman, Family and Consumer Sciences, Alistair Smith, Department Chair, Earth and Spatial Sciences and Chair, Faculty Affairs Committee Attach. #4
Revision to add a reference to FSH 2700 regarding the questions in student feedback on teaching that can be counted toward a candidate's student course evaluation summaries used in the tenure and promotion processes.
No questions.
Vote: 19/19 yes.

Announcements and Communications:

- Online Software Approval Ticketing Process – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology.

A senator inquired about the recent change from OIT that requires preapproval to get reimbursed through Chrome River for the purchase of some common software. What is the thought process for doing that?

Teresa didn't have background to prep with, so she is not able to give any specifics on this question. She will look into the matter and report to senate at a later time.

This conversation will continue when Teresa returns to senate, along with the one on the transition to MyUI.

Additional discussion:

A senator reported submitting a ticket 20 days earlier for a well-established software called CMA, Comprehensive Meta Analysis, developed by NIH and used by many federal agencies. It's needed for two Ph.D. students for their Prelim Exam. They have eight weeks to complete the exercise. This senator is very concerned about the timeline. They may have to readjust the Ph.D.

Prelims schedule, which will create additional complications. Teresa will investigate this specific ticket and communicate to the senator what she finds out.

- A senator reported comments from several faculty about the recent satisfaction survey from OIT. The space to provide commentary is insufficient, about 60 words. Teresa replied that Dan Ewart was aware of that feedback and has resolved the problem with institutional research.
- Women's Leadership Conference – Laurel Meyer, Education Abroad Advisor/Marketing Coordinator, International Programs Office.
Laurel Meyer is one of the planning co-chairs for the Women's Leadership Conference, and the Athena co-president for staff. After a five-year hiatus, the Women's Leadership Conference is returning to campus on April 2. The registration link went live today on the conference website, <https://www.uidaho.edu/diversity/edu/womens-center/events/womens-leadership-conference>. Please share this opportunity with all your colleagues. It is a full-day event, and it is free. It's a joint conference between the University of Idaho and Washington State University. Most of the seats are reserved for either members of U of I or WSU, but there are some limited seats available for community members as well. We're not necessarily inviting students to attend, but if there's a student who's motivated and would like to attend, they're welcome to register. But that's not our target audience. Over the next couple of days, the website will be updated with the full schedule. For any questions, please contact Laurel Meyer at laurelm@uidaho.edu.

New Business:

None.

There will be no meeting next week (spring break).

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 5:03pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://sitecore.uidaho.edu/governance/policy>.

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Faculty Staff Handbook (FSH)

Addition Revision* Deletion* Emergency Minor Amendment
Policy Number & Title: **FSH 1640.58 UBUNTU**

Administrative Procedures Manual (APM)

Addition Revision* Deletion* Emergency Minor Amendment
Policy Number & Title:

*Note: If revision or deletion, request original document from ui-policy@uidaho.edu. All changes must be made using “track changes.”

Originator: Kristin Haltinner, Chair Committee on Committees

Policy Sponsor, if different from Originator: Torrey Lawrence, Provost

Reviewed by General Counsel ___ Yes ___ X ___ No Name & Date:

1. Policy/Procedure Statement: Briefly explain the reason for the proposed addition, revision, and/or deletion.

Past chairs and members of Ubuntu have indicated that the committee membership was not working. The EDU had five ex officio seats and it was very burdensome for their offices to staff. We revised this to one voting seat chosen by the Chief Diversity Officer. The name for the Center for Disability Access and Resources needed to be updated. Given the importance of this office’s participation, we also shifted them from ex officio to a voting member. IPO was also shifted to a voting membership.

The faculty roles, undergraduate student roles, graduate student role, and remaining ex officio members remained the same.

The committee also lacked clear term expectations so these were added.

2. Fiscal Impact: What fiscal impact, if any, will this addition, revision, or deletion have?

None

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

None

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

UI FACULTY-STAFF HANDBOOK

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

1640.58

UBUNTU

A. CONTEXT. Ubuntu, as explained by Desmond Tutu, is essential to the interconnectedness of being human and living in interdependent communities. Ubuntu is affirming and inclusive of others because we all belong to a larger whole which is diminished when any members are humiliated, disrespected or oppressed. People with Ubuntu enrich themselves but do so in ways that enable the community and all its members to also improve. In this spirit the Ubuntu committee is established to advance these ideals.

B. FUNCTION.

B-1. Ubuntu will promote the values of respect, understanding, and fairness within our diverse university experience; review university policies and programs affecting under-represented and/or under-served students, staff, and faculty in consultation with appropriate representatives as necessary across campus; recommend changes and additions in university policies and programs that enhance student/staff/faculty success and advancement. {See also [FSH 4340](#).}

B-2. Ubuntu will monitor and advance the university's affirmative action and equal opportunity programs [see [FSH 3060](#)] being a strong and active voice ensuring that the university's programs, activities and services are accessible to persons with learning, sensory, physical and other disabilities. The committee will also work closely with the Americans with Disabilities Act Advisory Committee (ADA) to identify relevant rules and regulations pertaining to specific affirmative action and equal opportunity problems at the university. Ubuntu also recommends policies and procedures to address specific disabled access challenges at the university, consistent with requirements of applicable regulations and regents' policy ensuring that the 'spirit of the law' is followed.

B-3. This committee will advise the president on matters of equal opportunity, ensuring that UI's programs, activities and services are available to persons with learning, sensory, physical and other disabilities, and identify avenues for ensuring the campus community creates a fair and inclusive environment for all.

B-4. This committee will also discharge such other functions as may be assigned by the Faculty Senate or by the president or the president's designee. It will also submit periodic reports on its activities to the Faculty Senate including recommendations for appropriate program or policy changes (see [FSH 1460](#)).

C. STRUCTURE. Four faculty ~~, one of whom serves as chair each serving three-year terms;~~ ~~two~~ Five staff members (including at least one from Staff Council, one from the Office of Equity and Diversity Unit (appointed by the Chief Diversity Officer), a representative from the International Programs Office (appointed by the Director), and a representative from the Center for Disability Access and Resources (appointed by the Director)), each serving three-year terms. ~~;~~ ~~two student~~ Two undergraduate students (including one undergraduate (ASU) the ASUI Director of Diversity Affairs and Inclusion), each serving a one-year term. ~~One~~ one graduate student (appointed by GPSA or SBA), serving a one-year term, one of whom belongs to an under-represented and/or under-served student population ~~and~~ the following ex officio members without vote or their designees: ~~the ASUI Director of Diversity Affairs, Coordinator of Student Support Services~~ a representative from Student Affairs, ~~the Director of Multicultural Affairs, the Director of the Women's Center,~~ a representative from Human Resources, the Director of [the Office of Civil Rights and Investigations](#), ~~the Director of Diversity and Community, the Coordinator for Disability Support Services, the Director of International Programs, the LGBTQA Coordinator, and the Director of the Native American Student Center or the Native American Tribal Liaison.~~ The chair will be chosen by the Committee on Committees and will be a voting member in their third year of service.

2024-2025

Program Title

Artificial Intelligence and Machine Learning (AI/ML) Undergraduate Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

12

CIP Code

11.0102 - Artificial Intelligence.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Discribe the financial impact

The financial impact will be fairly small. All of the courses in the certificate are already being taught so there is no additional resources required. We anticipate that the certificate will make some of our classes more appealing because students taking them will be able to get a certificate. This is likely to lead to a small, but manageable increase in class sizes. Additionally, the presence of the certificate will have a small positive impact on recruitment by making some programs more attractive, which will lead to an increase in enrollment and additional tuition revenue.

Curriculum:

AI/ML is changing the world on a grand scale. We are seeing its transformational impacts on public health, manufacturing, agriculture, financing, urban systems and smart communities, social welfare, criminal justice, environmental sustainability, and national security. This certificate is intended to train students to understand AI/ML fundamentals, master algorithms, and be able to use state-of-the-art tools to develop AI/ML solutions for real-world problems. The certificate leverages the expertise from faculty in several departments to give students a strong interdisciplinary background.

Important advising information can be found at <https://www.uidaho.edu/engr/departments/cs/degrees/cs> (<https://www.uidaho.edu/engr/departments/cs/degrees/cs>).

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

Courses to total 12 credits for this certificate

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Coeur d'Alene
Idaho Falls
Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

- Understand the fundamental concepts and algorithms in machine learning and artificial intelligence
- Be able to apply machine learning algorithms to analyze, model, and solve real-world problems
- Be able to implement and evaluate Python-based machine learning solutions for problems such as data classification and clustering
- Develop leadership and teamwork ability with others through group discussion and course projects

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Assessment of learning objective will be accomplished through quizzes, homework, exams, and case-study projects, with a focus on the core required courses.

How will you ensure that the assessment findings will be used to improve the program?

Faculty related to this certificate will have an annual meeting to discuss assessment findings and improvement. The assessment findings will be applied to 1) improve contents organization and materials presentation, and 2) update homework, quizzes and exams.

What direct and indirect measures will be used to assess student learning?

Direct measures include student results from homework, quizzes, exams and projects. Indirect measures including classroom discussions, office hours interactions, and student course evaluations.

When will assessment activities occur and at what frequency?

Assessments will occur each time the core, required courses are taught, roughly once per year, per course.

Student Learning Outcomes

Learning Objectives

Understand, explain, and use the fundamental concepts and algorithms in machine learning and artificial intelligence.

Apply machine learning algorithms to analyze, model, and solve real-world problems

Implement and evaluate machine learning solutions for common machine learning and artificial intelligence problems such as data classification and clustering.

Develop leadership and teamwork ability for work in and leading group projects.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

AI/ML is changing the world on a grand scale. We are seeing its transformational impacts on public health, manufacturing, agriculture, financing, urban systems and smart communities, social welfare, criminal justice, environmental sustainability, and national security. This certificate is intended to train students to understand AI/ML fundamentals, master algorithms, and be able to use state-of-the-art tools to develop AI/ML solutions for real-world problems. The certificate leverages the expertise from faculty in several departments to give students a strong interdisciplinary background. It is designed to give undergraduate students from a range of fields the set of skills they need to succeed in the AI/ML arena.

533 Program Description for: Artificial Intelligence and Machine Learning Undergrad Certificate

An undergraduate certificate in artificial intelligence and machine learning is a demonstration of the student's breadth and depth of knowledge in these rapidly expanding fields. The certificate develops the student's understanding of both the fundamentals and the applications of these fields and of how they interact. It prepares a student for immediate entry into AI and ML career paths.

534: Artificial Intelligence and Machine Learning Graduate Certificate – Program Description

A graduate certificate in artificial intelligence and machine learning is a demonstration of the student's breadth and depth of knowledge of the state of the art in these rapidly expanding fields. The certificate develops student's research skills in these two fields and prepares them for careers developing the next generation of AI and ML tools and techniques.

Requesting Campus Feedback – Stage 2

Improving Student Success Via Revised Curricula and Instruction

To strengthen U of I students' outcomes, President Green has charged a Step-Up Completion: Collaboration, Evidence, Synergies, and Support (SUCCESS) Team to propose initiatives for funding that are likely to increase our existing 61% six-year graduation rate to 77%, matching the current average at Research I institutions. Based upon an initial round of input from the U of I community, the SUCCESS Team identified three types of initiatives that have had success at other universities¹⁻² and that build upon our existing strengths:

- **Expand and Enhance Common Experiences**
- **Increase Use of Evidence-Based Teaching Practices**
- **Provide Earlier Applied Learning Opportunities**

The team's next step is to develop proposals for each initiative. Your feedback will be critical to creating proposals that have the greatest potential to benefit U of I students' learning, academic achievement, and post-graduation success.

We encourage you to read about each initiative and then provide feedback.

Your comments will help the team develop proposals that achieve the desired outcomes. It will be especially helpful to get your perspective on how we can support efforts that already exist and encourage the growth of new efforts.

Existing research shows that **each initiative supports all students**. This support includes students from historically under-represented

groups, such as first-generation and rural students. By ensuring that the proposed initiatives help these students (and all students), U of I is fulfilling our land-grant mission to provide broad access to higher education for Idahoans.

First-generation, rural, and other students from historically under-represented groups have different prior experiences and therefore have specific support needs.

With these initiatives, U of I is building on existing programs that support these students effectively, such as the [Vandal Gateway Program](#), [Student Athlete Support Services](#), and the [Raven Scholars Program](#).

Descriptions of each initiative follow.

Expand and Enhance Common Experiences

Common experiences, such as first-year seminars and learning communities, offer meaningful curricular and cocurricular experiences to enhance student learning, often using broad themes and varied curricular and co-curricular choices.³

Research: shows common experiences (a) improve student success and GPA; (b) are consistently linked to higher retention and graduation rates; and (c) positively impact first-generation, racially/ethnically minoritized, conditionally admitted, and undeclared students.^{4,5,6,7,8,9,10}

Possible Approaches:

1. Bridge program to prepare students for a first-year experience (FYE).
2. Various FYE opportunities to introduce general education.
3. Links from FYE to sophomore-, junior-, and senior-year experiences.
4. A culminating experience that builds on students' earlier common intellectual experiences.
5. Support for core cognitive and non-cognitive skills.

Example: [Arizona State's highly rated First-Year Experience \(FYE\) Program](#)

U of I Examples: [TRIO Program](#), [Martin Institute Programs](#), and [Office of Multicultural Affairs Programs](#)

Increase Use of Evidence-Based Teaching Practices

Evidence-based teaching practices, such as active learning, promote higher-order thinking and self-directed learning through discussion, case studies, group work, problem solving, writing, sketching, and other instructor-guided activities.

Research: A meta-analysis of 255 studies of STEM courses linked active learning to +6% average exam scores and +12 percentage points in course success rates, with traditional lecture students 1.5 times more likely to fail.¹¹ Substantial research has linked success in foundational courses to increases in both retention and graduation rates for all students, including those from historically under-represented groups.^{12,13,14,15,16, 17}

Possible Approaches:

1. Revise promotion and tenure criteria.
2. Establish evidence-based, inclusive teaching practices; offer leadership, elevate expertise, and emphasize research on learning and instruction.
3. Ensure faculty have resources needed to pursue evidence-based teaching practices.

Example: [Home • Active Learning and Inductive Teaching • Iowa State University \(iastate.edu\)](#)

U of I Examples: [Self-Directed Learning Modules](#), [Generation Z Learning Approaches](#), and [Center for Excellence in Teaching and Learning](#)

Provide Earlier Applied Learning Opportunities

Undergraduate research, internships, community-based learning, and other learning experiences in which students apply learning outside the classroom. Applied learning opportunities are linked to increased learning, graduation rates, and post-graduation success.

Research: Undergraduate research has been linked to +4% to +10% in overall graduation rates and +13% STEM degree completion, with particular benefits for racially/ethnically minoritized and other historically under-represented groups.^{18,19,20,21}

Example: [Echegoyan et al \(2019\)](#) showed a strong association between completing [UTEP's Freshman Year Research Intensive Sequence](#) and long-term retention for the 1,652 students they studied, 2015-2017 (~63% female, ~86% Hispanic).

U of I Examples: [Cooperative Education](#) and [Interdisciplinary Capstone Design Program](#)

Possible Approaches:

1. Add co-op experiences, problem solving components, career experiences, and undergraduate research experiences.
2. Strengthen industry connections.
3. Engage community members as co-creators of learning and scholarship.

Providing Your Feedback

The SUCCESS team invites all members of campus to provide feedback on possible approaches for each of the three initiatives. There are **two ways to provide feedback** (you are welcome to participate in both ways if you desire):

1. **[Share your responses to survey questions](#)** in the feedback forms linked below:
 - **[Expand and Enhance Common Experiences](#)**
 - **[Increase Use of Evidence-Based Teaching Practices](#)**
 - **[Provide Earlier Applied Learning Opportunities](#)**
2. **Join an All-Campus Conversation** with the SUCCESS Team and Provost Lawrence from Wednesday, March 20 at 3:30 pm PT; 4:30 pm MT, via this **[Zoom link](#)**.

In both cases (i.e., the feedback forms and the all-campus conversation) you'll be asked for your thoughts in response to the following questions about each initiative:

- Please rank order the possible approaches for this initiative according to which you believe would be most effective, 1 high, 5 low.
- Please note existing U of I strengths these approaches could build on.
- What would it look like for this initiative to be implemented successfully in your program, department, or college?
- What types of support would be needed to implement this initiative in your program, department, or college?

Note: The SUCCESS Team will be reaching out to specific groups on campus who may wish to give feedback about the initiatives during one of the regular meetings, e.g., Faculty Senate, Dean of Students, the Associated Students of the University of Idaho (ASUI), College Assistance Migrant Program (CAMP), Student Support Services, and the Associate Deans.

Process/Background

To ensure that the final proposal is informed by perspectives from across campus, in **Stage 1** (late January/early February), the SUCCESS Team met with and surveyed approximately 100 members of eight shared governance and other campus groups.²² During these meetings, the team shared information on six possible evidence-based initiatives that have increased learning and academic achievement on other campuses:

1. Revise General Education Curriculum
2. Expand and Enhance Common Learning Experiences
3. Increase Use of Evidence-Based Teaching Practices
4. Provide More Real-World Learning Opportunities Earlier
5. Streamline Degree Pathways
6. Better Support Historically Under-Represented Students.

Through a mixed-methods analysis of campus groups' comments, the team determined that campus feedback identified the three initiatives described above as most effectively positioned to leverage existing U of I strengths. Further, campus feedback indicated that it would be most effective to **integrate initiative #6, Better Support Historically Under-represented Students, into each of the three identified initiatives.** Therefore, the team will recommend this integration, which will require close collaboration with colleagues across U of I. This integration will help U of I better serve our growing numbers of first-generation and other students from historically under-represented groups. Finally, based on feedback from campus groups with relevant experience, the team will consider proposing that the cohort model be used in each of the identified initiatives. The proposed initiatives will build on the work already underway as part of U of I's Strategic Enrollment Project.

Importantly, the team will recommend that initiatives be implemented under **local direction, with centralized support**. The implementation plan will advocate that campus groups already pursuing related successful projects be incentivized to help lead implementation. For example, such groups might provide resources, consultation, and/or mentoring for colleagues developing similar projects. Incentives could include release time, summer stipends, access to professional development or other opportunities, and the like. These groups' leadership will support local direction by helping programs tailor approaches to their disciplines, cultures, and students' needs.

Further, the team will recommend a separate implementation plan for each initiative but emphasize that these plans should identify and leverage potential connections. For example, to implement common experiences and early applied learning in classrooms,

support for evidence-based teaching will be needed. Similarly, each initiative requires incentivizing faculty to adopting evidence-based approaches will build more explicit rewards into the annual review and the promotion and tenure processes.

Finally, please note that, based on campus feedback and SUCCESS Team discussions, the titles of two of the three identified initiatives have been tailored to better reflect U of I priorities, as follows:

- 2. *Expand and Enhance Common Experiences*** – “learning” omitted to indicate that some experiences will be curricular and others co-curricular.
- 4. *Provide Earlier Applied Learning Opportunities*** – “real-world” omitted to emphasize the connections between classroom and applied learning; “earlier” emphasized by new position in the title.

Approved at Mtg #27
April 2, 2024

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 26

Tuesday, March 26, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Thaxton, Tibbals.

Absent: Maas (excused), Miller, Mischel.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #25, March 19, 2024, were approved as distributed.

Chair's Report:

- Important reminder: Senators whose terms end in 2023-24 should ask their units/colleges to conduct elections for AY 24-25 Senate seats.
- Apologies for the communication glitch about admissions. Regarding the data that was shared with you, please be assured that the data was shared at the time it was available.

Provost's Report:

- Two searches are in progress.
 - Last week, we had two candidates for the position of Dean of the College of Law, and two more will visit this week . The schedules can be found at <https://www.uidaho.edu/provost/administrative-searches> .We encourage people to participate. After our last interview, we will ask for people's feedback.
 - The other search is for a new director of General Education. Dean Panttaja has been in that role for quite some time and he's going to step down. Please share this information with your colleagues. <https://www.uidaho.edu/provost/administrative-searches>
- University of Phoenix: Addressing a previous question from Steve Shook, the Provost pointed to the University of Phoenix website: The University of Phoenix transaction requires a conduit issuer, and as such, we approached a number of different national conduits. Arizona Industrial Development Authority (AzIDA) is a conduit issuer of municipal revenue bonds with the ability to assist private and public borrowers across the country. National Finance Authority (NFA) in New Hampshire is also a conduit issuer. While AzIDA declined to participate, NFA agreed to participate in the financing. The AzIDA decision has no impact on our transaction.
- A Senate Bill regarding the University of Phoenix passed the Senate State Affairs Committee this morning. See <https://legislature.idaho.gov/sessioninfo/2024/legislation/S1450/>. The Provost will provide an update next week.

Discussion:

A senator inquired about an article in the Idaho Education News, which reported that the Alumni Association was asked by the President to hire a lobbyist. They noted that the university is not allowed to hire lobbyists. Provost Lawrence replied that the Alumni Association can do so, and it's common.

Committee Reports:

- Proposed changes to the Administrative Procedures Manual (non-voting)
 - APM 45.35 - University of Idaho Unmanned Aircraft Systems (“UAS”) – Kay Dee Holmes, Assistant Director, Research Integrity, Office of Research Assurances, Attach. #2
Standardized and updated formatting; Clarification on existing requirements; Address policy gaps & remove unnecessary language.
Discussion:
In response to a question from Chair Gauthier, Kay Dee Holmes confirmed that the policy applies only to UAS used for university business.
 - APM 20.60 - Unrelated Business Income Tax – Amanda Bauer, Controller, Ali Pearce, General Accounting Manager, Attach. #3
Describe other UI policies or procedures related to or like this proposed change, or that will be impacted by it.
There were no questions.
 - APM 35.66 - Laboratory Decommissioning – Samir Shahat, Executive Director, University Safety Officer, Radiation Safety Officer, Arch Harner, Assistant Vice President for Research Administration, Office of Research and Economic Development, Russell McClanahan, Biosafety and IRIC Facility Manager, Office of Research Assurances Attach. #4
This policy was developed in collaboration with the Office of Research Assurances. It provides requirements for the removal of hazardous materials and equipment from laboratory spaces when the Principal Investigator (PI) or laboratory supervisor is leaving the University of Idaho, moving to another campus building, relocating to another laboratory within the same building, or disposing of or transferring laboratory equipment that is no longer needed. This policy also applies to the removal of all hazardous materials and equipment from laboratory spaces prior to renovation.
There were no questions.

Announcements and Communications:

- Admissions Recommendations – Jean-Marc Gauthier, Faculty Senate Chair, Torrey Lawrence, Provost and Executive Vice President, Kristin Haltinner, Vice Chair of Faculty Senate, Dean Kahler, Vice Provost for Strategic Enrolled Management. Attach. #5.
(Please see attachment #5 for the full content of the presentation.)
Chair Gauthier started the presentation with some background and context for the decision to be made, and a brief timeline of recent decisions/actions. Vice Chair Haltinner reviewed the authority structure in shared governance, and the different options that have been proposed. The Provost addressed important aspects to keep in mind when making admissions criteria decisions: Our mission of access and our responsibility to admit students who are ready for college; reliability of GPA vs. test scores; impact of changing admissions standards; SBOE direct admission policy. Dean Kahler proceeded to present data on possible enrollment implications. Vice Chair Haltinner shared data on retention rates in relation to high school GPA. She concluded with an overview of the different options for senate to consider.
Discussion:
Senator Steve Shook expressed serious concerns about the projected implications for enrollment shown in the presentation. It is impossible to make this projection, because the students admitted post-COVID did not have to submit a test score, and we assume they had no

scores to submit. Chair Gauthier recognized that this is a problem with the data we have. Steve Shook also argued that Proposals #1 and #2 in Attachment #5 are not very different. UCC looked at the data and noticed that 96% of the students at the 2.6 GPA level had SAT score of 800. What data drives the choice of a 2.8 GPA vs. 3.0? Chair Gauthier pointed to the analyses from SEM. Steve Shook replied that UCC came up with different conclusions.

A senator argued that there is no point in the proposal to extend the emergency action for one more year. Nothing major will have changed in one year. Vice Chair Haltinner said that option is kind of a back-up plan, in case we cannot find common ground.

A senator brought up the issue of student success. The senate rep for her college conducted a survey about which set of requirements would be best. Most of the college agreed with reverting back to the original criteria prior to COVID, and expressed concern about what the GPA wasn't showing us about student aptitude. Her college is also seeing issues with engagement. The advising office reported many students on probation or disqualification in these last few years, the highest ever seen at her college. This senator does not see a test requirement as restricting access. Also, given that the GPA is not a consistent indicator because it differs across schools – there are non-accredited institutions, home-schooled students etc. – most of the constituents in her college agreed that reverting to the pre-COVID requirements would be best, if we want students to be successful. The senator also inquired about the Vandal Gateway program (VGP) with respect to student success and retention rates, because VGP is tied to the admission standards we are discussing. She also suggested looking at the question of admittance versus enrollment, and what we can do to make sure that admitted students enroll as well.

Vice Chair Haltinner pointed to the VGP update presented to senate on January 16, when the VGP team shared data for the past 1.5 years. The team were pleased with the improvement in academic standing from the first to the second year.

Back to the issue of potential impact on enrollment from reverting to the pre-COVID criteria, a senator asked how many of the 779 students who would have not been admitted by the 2019 criteria did not submit a test score. Vice Chair Haltinner provided the number, 720 students. Of those, 587 had GPA of 3.0 and above. In other words, most of them would be admissible to the University without any additional information.

A senator expressed concerns about procedural issues. A seconded motion from UCC is before senate, yet other proposals are being submitted and discussed. This senator is very reluctant to overrule the recommendation of a committee that has spent considerable time on this question and is entrusted with the responsibility for it. The senator is concerned that we are bypassing UCC in considering alternatives to what they have recommended to us. The UCC recommendation should be sent back to them. Chair Gauthier explained that there was never any intent to bypass UCC. FSL was under the impression the UCC was not willing to reconsider their recommendations. Hence, alternative options were developed.

Steve Shook announced his intent to propose a friendly amendment unanimously approved by UCC, to drop the test score requirement for students with GPA of 3.0 and up.

A senator said that he wouldn't be ready to vote without first discussing the financial impact of potentially admitting fewer students. Steve responded that the number of students who are admitted has no financial impact. It's those who are enrolled that have financial impact, and, once they're enrolled, those who are retained. They looked at retention rates from Institutional Research and observed that the retention rate decreases as GPA and SAT scores decline.

There was some additional discussion on the pros and cons of dropping the test score requirement. Those tests are still paid for, although no longer required by the state, so, financial barrier is not an issue. If we drop it, are we going back to a situation where we have less

information? Requiring test scores would be beneficial for us – moving forward, it would give us additional data if we analyzed the relationship between GPA and standardized test scores on retention in the future. Test scores can be important as an additional parameter when awarding scholarships.

There was a question about the role of the VGP in the UCC proposal. Steve Shook responded that VGP is not part of the general catalog. There is a link under admissions requirements that takes you to CLASS. It is not an official part of the general catalog because it's a pilot program. Therefore, UCC did not evaluate VGP as it relates to standards for admission. Provost Lawrence followed up with an additional aspect: the VGP admission criteria were approved through those emergency measures last year. So, we do need to address VGP criteria this semester, although not necessarily as a permanent measure. The third year of the pilot is next year, but admissions criteria must be decided a year and a half in advance.

A senator suggested that perhaps we should take a broader institutional approach to this decision – identify what's best for us as an institution, rather than react to what others are doing.

The senator who raised the issue of possible financial impact on faculty lines, jobs, etc. underlined the importance of having such information. Dean Kahler and Vice Chair Haltinner said they can put it together. Steve Shook reiterated that it's not possible to obtain a reliable estimate from the data.

The amendment to the UCC motion is seconded by Bob Rinker (seconded earlier by David Pimentel, who withdrew his action).

Vote: 13/21 yes; 8/21 no. Amendment passes.

Motion to table (Tibbals, Chapman). Vote: 19/20 yes; 1/20 no. Motion passes.

Adjournment:

The agenda not being completed, the Chair entertained a motion to adjourn. So moved (Justwan, Barannyk). The meeting was adjourned at 5:01pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #26

Tuesday, March 26, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #25 March 19, 2024 **Attach. #1**
- III. Chair’s Report
 - Reminder to launch elections for AY 24-25 Senate seats
- V. Provost’s Report
- VI. Committee Reports
 - Proposed changes to the Administrative Procedures Manual (non-voting)
 - APM 45.35 - University of Idaho Unmanned Aircraft Systems (“UAS”) – Kay Dee Holmes, Assistant Director, Research Integrity, Office of Research Assurances **Attach. #2**
 - APM 20.60 - Unrelated Business Income Tax – Amanda Bauer, Controller, Ali Pearce, General Accounting Manager **Attach. #3**
 - APM 35.66 - Laboratory Decommissioning – Samir Shahat, Executive Director, University Safety Officer, Radiation Safety Officer, Arch Harner, Assistant Vice President for Research Administration, Office of Research and Economic Development, Russell McClanahan, Biosafety and IRIC Facility Manager, Office of Research Assurances **Attach. #4**

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 25

Tuesday, March 19, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Tibbals.

Absent: Strickland (excused), Raney (excused), Blevins, Thaxton

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #24, March 5, 2024, were approved as distributed.

Chair's Report:

- Many thanks to our today's guests, Teresa Amos, Terry Soule, David Paul and Dean Kahler. Later in the meeting, they will engage with us in important conversations.
- A reminder of the exhibit of the AI/ML Task force from Monday, April 1, until Saturday, April 13. In the Reflections Gallery in the ISUB Building. We have received a large number of posters and videos. So, it's going to be a bigger than expected exhibit.

Provost's Report:

- The census date for spring was last week, and we are up overall 5.8% compared to last spring. Congratulations to everyone on this big accomplishment!
- We have four finalists visiting Moscow and Boise for the Dean opening in the College of law. For more information on the candidates and public events, visit <https://www.uidaho.edu/provost/administrative-searches>
- The SUCCESS Team is hosting a Town Hall tomorrow, at 3:30 PST. More at <https://uidaho.zoom.us/j/84282522599?from=addon>.
- March Faculty Gathering: Thursday, 4:30 to 6:30, in the Vandal ballroom, hosted by the College of Science. Please RSVP at <https://forms.office.com/r/rYZ95ku7Dg>.
- The College of Engineering is hosting a gathering in Idaho Falls, Tuesday, April 9, from 4:00 to 6:00.
- University of Phoenix: Not much new to report. We continue to work with the legislators, who plan to adjourn the session next Friday.
- Senator Shook sent some questions about Phoenix, following up on the discussion we had just before spring break:
 - Would you be able to provide a rough estimate of UI's total Phoenix cost to date, and from which UI fund lines were they paid for? Answer: When we received the questions, the updated number was \$11.3 million. This includes expenses paid to date. As more

work continues, especially with the legislature, expenses continue to increase. They are being paid using UI resources. We established a separate fund, so that all Phoenix expenses would go into one place and be tracked easily. This is how we tracked similar costs for the P3 utility project a few years ago, as well as the P3 housing project.

- How much is the decline in the UI reserve fund from these Phoenix expenses? Answer: The University doesn't have a single reserve fund. Reserves are held across the entire institution. Some are held centrally, but most of them are held in colleges or other units across campus. The university has cash reserves set aside and long-term investment accounts. While these transaction costs have impacted cash balances, there has not been any impact on the long-term investment accounts.
- Will less reserves result in holdbacks for academic units, increased quote taxes on colleges or department funds, or hiring freezes? Answer: No. Lower reserves do not automatically result in any of those things. They just result in lower reserves on our balance sheet, by as much as we spend.
- Is there a contingency plan for the costs already incurred, should the transaction not go through? Answer: We're hopeful it will close, and there's still a lot of work going on to find a path forward with the legislature. If it does not, the University will need to address the costs incurred. But we've been paying as we go, so, it will just take us longer to meet the State Board requirement for reserves. And obviously the State Board was in the middle of this transaction and knew that these costs were being incurred.
- Senator Shook had another question, about changes in Arizona bonding authority. Will that affect the bonding itself and the total cost of the bonds? Answer: I'll need to follow up and confirm. I heard there was a change, but I don't think it will create a real problem in the process.

Committee Reports (voting):

- Proposed changes to the Faculty Staff Handbook
 - FSH 1640.58 Ubuntu – Kristin Haltinner, Vice Chair of Faculty Senate, Attach. #3. Past chairs and members of Ubuntu have indicated that the committee membership was not working. The EDU had five ex officio seats and it was very burdensome for their offices to staff. We revised this to one voting seat chosen by the Chief Diversity Officer. The name for the Center for Disability Access and Resources needed to be updated. Given the importance of this office's participation, we also shifted them from ex officio to a voting member. IPO was also shifted to a voting membership. The faculty roles, undergraduate student roles, graduate student role, and remaining ex officio members remained the same. The committee also lacked clear term expectations, so these were added.
Vote: 17/19 yes; 2/19 no. Motion passes.
- Proposed changed to the University Catalog
 - UCC 533 Artificial Intelligence and Machine Learning (AI/ML) Undergraduate Certificate – Terence Soule, Department Chair, Computer Science, Attach. #4.
AI/ML is changing the world on a grand scale. We are seeing its transformational impacts on public health, manufacturing, agriculture, financing, urban systems and smart communities, social welfare, criminal justice, environmental sustainability, and national security. This certificate is intended to train students to understand AI/ML fundamentals, master algorithms, and be able to use state-of-the-art tools to develop AI/ML solutions for real-world problems. The certificate leverages the expertise from

faculty in several departments to give students a strong interdisciplinary background. It is designed to give undergraduate students from a range of fields the set of skills they need to succeed in the AI/ML arena.

Discussion:

After some minor clarification, the senators were ready to vote.

Vote: 19/19 yes. Motion passes.

- UCC 534 Artificial Intelligence and Machine Learning (AI/ML) Graduate Certificate – Terence Soule, Department Chair, Computer Science, Attach. #5. Basically, they're the same. Many of our courses are 400/500 level. So, the graduate certificate includes the 500-level version of the same courses. The two certificates are separate.

Discussion:

A senator inquired whether CS prerequisites are required for the courses in the certificate. Terence responded that some courses have CS prerequisites, others may have Math prerequisites, but, overall, there is a good number of options.

Another senator asked whether students are educated about ethical use of AI/ML.

Terence said that CS majors are informed, but he cannot be sure about students from other majors.

Vote: 20/20 yes. Motion passed.

Announcements and Communications:

- Admissions Standards Proposal from UCC – David Paul, Chair of UCC. David Paul gave a brief overview of the recent discussions at UCC. They wanted to make a data-based decision about what is best. The data presented at UCC shows that lower high school GPA and lower SAT scores are associated with lower retention rates. Therefore, they felt there is no benefit to students by having lower admission standards. They also discussed the ethical aspects of admitting students who aren't successful and still must pay for it. They also felt the pre-pandemic admission standards were not especially burdensome.

Discussion:

Vice Chair Haltinner argued that enrollment is up, as reported by the Provost earlier, in part because we have lowered those standards. She shared some new information from Dean Kahler: In fall 2023, we admitted about 9,500 students, or 81% of the applicants. Under the pre-Covid criteria, we would have admitted 5,600 students, which is 48% of the total number of applicants. Thus, one must consider other aspects as well, such as lost faculty lines or jobs. It's important to consider the impact of this decision on the size of the student body and its possible implications. David Paul disagrees. By pre-Covid standards, students with GPA of 3.0 and higher were directly admitted, and those with GPA between 2.6 and 2.99 could still get in with a composite SAT score of 740. From 2023 UI data, 96% of the submitted SAT scores were 800 or above. Dean Kahler joined the conversation and confirmed the conclusions of his analysis. He looked at the 11,762 applicants for fall 2023 and tried to forecast how many of those students wouldn't have test scores, and how many would not be admissible using the pre-Covid criteria. He found a significant reduction in the number of students that would be directly admissible to the university.

The discussion moved to the ISAT as one of the standardized tests that we may accept or require for admissions. UCC felt they could not incorporate the ISAT in their recommendation due to lack of data. A senator pointed to ISAT data from 2019, the results of which seem less

biased regarding race, gender and socioeconomic status. David Paul reiterated that retention and success are not predicted by the ISAT.

Provost Lawrence noted that reverting to pre-Covid standards would put UI in a very different situation with respect to state-wide direct admissions – students could be admitted to 8 or 7 of the 8 schools. We would be out of line with BSU. Our mission as a land grant institution is access, teaching the people in the state, not being an elite institution. At the same time, we want to admit students who we are reasonably confident have a high probability of being successful. But we cannot forget that there is a core to our mission. Access versus limiting for success are conflicting points. There was some additional discussion on the importance of identifying the best balance between facilitating access and admitting students who are ready for college.

Provost Lawrence commented on the admissions criteria issue being complicated by a generational issue, impacting children who were not yet in high school during the pandemic. Furthermore, pre-Covid criteria are lower because they allow automatic admission down to a GPA of 2.2 with a certain test score, which is a lower standard than automatic admission with a 2.6, as we do now. Below that threshold, they can be admitted and receive extra support through the VGP. Thus, the real difference is that pre-Covid criteria require test scores. The current emergency criteria do not require test scores but set a higher bar on the minimum GPA. The Provost suggested talking about “different” rather than “higher” or “lower.”

Before closing the discussion, Chair Gauthier had one final remark. He was intrigued by some conversations at the State Board about being able to predict where students will require additional help based on the ISAT score. Chair Gauthier thanked everyone for the productive discussion.

- SUCCESS Update – Erin Chapman, School of Family and Consumer Science, Dan Eveleth, Department of Business, Attach. #2.
Dan briefly reviewed the history of SUCCESS. It started with a call from the President for a working group to come up with initiatives that would have the potential impact of increasing six-year graduation rate from the current one to the average for R1 universities, which is 77%. Based upon an initial round of input from the U of I community, the SUCCESS Team identified three types of initiatives that have been successful at other universities and that build upon our existing strengths: 1) Expand and enhance common experiences; 2) Increased use of evidence-based teaching practices; 3) Provide earlier applied learning opportunities. (Read more at <https://www.uidaho.edu/provost/academic-initiatives/student-success-initiative>.)
At this point in the process, the team is looking for two basic types of information. First: If there was an initiative on, for example, early applied learning opportunities, what form would that take in your unit? Perhaps there are things you're already doing that you would like to expand, or your unit is talking about some new ideas. What are those ideas? What form would they take in your unit? What kind of support would you need to either expand existing initiatives in your unit or develop new ideas? We welcome your feedback. There is a link to a survey in your binder where you could comment on any or all of the three types of initiatives.
Link to Stage 2 Feedback Survey:
https://forms.office.com/pages/responsepage.aspx?id=Y2u8fpJXGUqyCwS4JgSIU5scQ5_mUx5Er_b1revX2YQpUOUFMRTthOVEFaM1RUMFIUREFVTVIWSkdaQS4u&origin=lprLink
Link to tomorrow's campus-wide meeting: <https://uidaho.zoom.us/j/84282522599?from=addon>
Discussion:

A senator asked whether making a first-year experience part of the Gen Ed curriculum was ever considered. Dan replied that they did talk about it. They also discussed the idea of a first-year experience being something that all students would go through rather than a more local one. They settled on the idea of supporting and nurturing the amazing local efforts already going on, so that people could customize them to fit their unique needs.

- Phi Kappa Phi President Search – Dean Panttaja, Vice Provost for Academic Initiatives. Nationally the Chapter was instituted in 1960 as an interdisciplinary honors society. They have over 4 million dollars a year and give out fellowships. We have had 6 students over the last 4 years earn some of those fellowships to go on to our graduate school or other graduate schools. We are requesting senators to get the word out there. We're also looking for people who are willing to serve and run the Chapter, and we will pay for their membership every year that they work as officers. There should be a president, a vice president, and a secretary, but we've managed to just work with the president for the last 15 years. We have till January to get new officers up to speed. It's quite simple, and it's nice to meet these very talented students and share a little time with them and help them apply for these fellowships. Nomination Form can be found at <https://forms.office.com/r/j3BzgtDD0u?origin=lprLink>

- MyUI – Teresa Amos, Director, IT Planning and Initiatives, Office of Information Technology. At OIT, they have been working through some issues with the user experience and logins. Specifically, based on certain browsers, people were being logged out and ended up in a loop. So, we have opted to delay replacing Vandal Web until these problems can be addressed. No new actions have been put in place yet, although there is a variety of new cards that are showing up in MyUI. I would invite everybody to take the opportunity to have a look and play around. Feel free to send us your feedback.

Discussion:

Chair Gauthier mentioned a long list of questions he prepared based on people's concerns. Some of those issues have been out for some time, such as how faculty can be involved in technological choices through some form of shared governance on issues that impact their research and teaching, or AI concerns. Should we reschedule another time after Teresa has prepared to address those questions? Teresa agreed to this course of action.

Discussion:

Chair Gauthier mentioned aspects on the user testing side that need improvement. In his opinion, video tutorials are not helpful.

A senator brought up former questions about new requirements of ticket approval for purchasing common software like Slack and Dropbox and having to get OIT approval before one can get reimbursed for that software through Chrome River. Teresa mentioned some miscommunication problems they are having with Accounts Payable. They are getting those worked out. As for Dropbox or other similar storage mechanisms or locations, there is a concern from a security perspective, because we would be in a situation where we don't know where the university's data is. This could impact our eligibility for Federal grants. But all that information is being put into the broader response to the questions Teresa and Dan received over the weekend from Chair Gauthier. The senator looks forward to a broader discussion.

Provost Lawrence pointed out that we do have an Information Technology committee that's meant to have this type of discussion. I suggest we use these committees. That's why we have them.

Chair Gauthier emphasized the importance of working together and thanked everybody for these important discussions.

New Business:

None.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:46pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

From: [Gauthier, Jean-Marc \(gauthier@uidaho.edu\)](mailto:gauthier@uidaho.edu)

Subject: FSM #25 / questions to OIT

FYI to Darryl Woolley

Hello Teresa,

Thank you for making time to come speak at FSM. I would like to share the list of questions that you requested about OIT and use of technology. I hope this is helpful for the presentation at FSM on 03/19.

MyUI

What is the best way to access MyUI for employees from the Uoi website?

Is there a direct link on search engines?

How much of the MyUI project is completed?

What is the schedule to shift from Vandal Web to MyUI?

From the OIT website, "Navigation in VandalWeb will be turned off during the Spring Semester, 2024", is mid-semester the best time to make a critical change?

What is the cost involved with shifting to MyUI?

How many people worked on this project?

How many people will maintain MyUI?

Are faculty and students involved with maintenance, revisions and testing revisions of MyUI?

How many people used the MyUI video tutorials?

AI

What is OIT's technology assessment of AI in 2023-24?

What are OIT's recommendations about the use of AI software?

Do you expect an impact on OIT positions in the next two years?

What do you think about AI's level of acceptance in many fields of activity?

How does it influence OIT's choices of equipment or recommendations?

Do you think that AI has or will have an impact on teaching, learning and research?

What is the point of view of OIT on shared AI governance with faculty, teachers and researchers?

Hardware and software

What are the restrictions on

- buying software and hardware for research and/or using grant money?
- buying software and hardware for teaching and/or using departmental budget?
- using small devices such as a Raspberry Pi or Arduino?
- buying hardware and/or equipment from certain companies?

Personal phones

What is the responsibility of a UoI employee using a personal phone loaded with UoI required apps: for example, Teams, Duo?

What is the difference between an UoI employee using his or her personal phone or using a UoI desktop, or using a UoI laptop?

Does OIT collect, receive or use data from UoI employee personal phones? For example, geo-location data.

How does OIT manage the joint use of UoI apps and other apps on personal phones?

Please let me know if you have any questions or feedback.

Thank you again for your time.

Kind regards,

Jean-Marc Gauthier
Associate Professor & Program Director

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.
 - Standardized and updated formatting.
 - Clarification on existing requirements.
 - Address policy gaps & remove unnecessary language.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have? None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it. None.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy.

APM 45.35-- University of Idaho Unmanned Aircraft Systems ("UAS")

Updated: ~~February 1, 2017~~

~~**Preamble:** This policy, and the related policies and procedures described herein, is intended to ensure that the University operates any unmanned aircraft system in the furtherance of its educational, research, and service missions, as well as in compliance with applicable federal and state laws. This policy shall be effective immediately.~~

Contents:

- A. Purpose
- B. Scope
- C. Definitions
- ~~B-D.~~ Policy
- ~~C.~~ Process/Procedure
- ~~D-E.~~ Insurance
- F. UAS Committee Authority & Responsibilities
- G. Vice President of Research Authority & Responsibilities
- H. Contact Information

~~**A. Definitions. Purpose.** This policy ensures that the use of any unmanned aircraft system for University business complies with federal, state, and local rules and regulations.~~

~~**B. Scope.**~~

~~**B-1. Applicable.** This policy applies to University employees, third parties, visitors, and students operating UAS on behalf of the university.~~

~~**B-2. Not Applicable.** This policy does not apply to personal use of UAS by University employees, students, or third parties on University property, including but not limited to recreational or hobby flight of model aircraft. See APM 95.35 and 35.35 for information on personal use of UAS on University property.~~

~~**C. Definitions.**~~

~~**C-1. Certification of Waiver; Certificate of Authorization ("COA")** means a Federal Aviation Administration grant of approval for a specific unmanned aircraft flight operation. Standard use of a UAS under 14 CFR Part 107 does not require a COA.~~

~~**C-2. Civil Operation** means any UAS operation falling outside the scope of a public aircraft operation, such as an operation involving a commercial purpose or an operation involving research or other institutional activity outside the definition of governmental function. *rev. 2-17*~~

~~**C-3. Commercial Purpose** means the transportation of persons or property or other use of UAS for compensation or hire.~~

C-4. Governmental Function means an activity undertaken by a government, such as national defense, intelligence missions, firefighting, search and rescue, law enforcement (including transport of prisoners, detainees, and illegal aliens), aeronautical research, biological or geological resource management.

C-5. Public Operation COA means a COA granted by the FAA for a public aircraft operation. Public aircraft operations are those conducted by a public agency, like the University, in furtherance of a governmental function.

~~A-1. Aircraft~~ means any contrivance invented, used, intended to be used, or designed to navigate, or fly, in the air.

~~A-2~~**C-6. Responsible Party (or Parties)** means a university employee, third party, visitor, or student operating UAS on behalf of the University.

C-7. Unmanned Aircraft System ("UAS") means an aircraft that is operated without the possibility of direct human intervention from within or on the aircraft and associated elements (including communication links and the components that control the unmanned aircraft) that are required for the pilot in command to operate safely and efficiently in the navigable airspace of the United States under the regulatory authority of the Federal Aviation Administration ("FAA").

~~A-3. Certification of Waiver, Certificate of Authorization~~ ("COA") means a Federal Aviation Administration grant of approval for a specific unmanned aircraft flight operation. ~~Standard use of a UAS under the Section 107 does not require a COA. [rev. 2-17]~~

~~A-4. Navigable Airspace~~ means the airspace of the United States above the minimum altitudes of flight prescribed by the regulations of the FAA, including airspace needed to ensure safety in the takeoff and landing of aircraft.

~~A-5. Public Operation COA~~ means a COA grant by the FAA for a public aircraft operation. Public aircraft operations are those conducted by a public agency, like the University, in furtherance of a governmental function.

~~A-6. Governmental Function~~ means an activity undertaken by a government, such as national defense, intelligence missions, firefighting, search and rescue, law enforcement (including transport of prisoners, detainees, and illegal aliens), aeronautical research, biological or geological resource management.

~~A-7. Civil Operation~~ means any UAS operation falling outside the scope of a public aircraft operation, such as an operation involving a commercial purpose or an operation involving research or other institutional activity outside the definition of governmental function. ~~[rev. 2-17]~~

~~AC-8. Commercial Purpose means the transportation of persons or property or other use of UAS for compensation or hire.~~

~~B. VPRED means the university's Policy.~~

~~B-1. Introduction.~~ The University, in carrying out its educational, research, and service missions, may make use of Unmanned Aircraft Systems ("UAS"), more commonly known as "drones," in Navigable Airspace when granted authorization to do so by the FAA. As a "governmental instrumentality for the dissemination of knowledge and learning," the University of Idaho is eligible for Public Operation certificates of waiver or authorization ("COAs") from the FAA that permit the University to fly UASs in the furtherance of a Governmental Function and where use of UAS would otherwise be prohibited under current law. The University has committed to the FAA that it will not use any UAS for purposes that are not Governmental Functions, including but not limited to Commercial Purposes, or for purposes otherwise authorized by the FAA, including but not limited to authorization through a Special Airworthiness Certificate, Experimental Category, or through exceptions that may be granted under Section 333 of the FAA Modernization and Reform Act of 2012 ("Section 333") or through 14 C.F.R. §§107.1 et seq. ("Part 107"). This policy is intended to ensure University compliance with federal and state laws regarding UAS. [rev. 2-17]

~~B-2. Policy.~~ No use of UAS may be undertaken by University faculty, staff, and students, or by third parties (including, but not limited to, consultants or contractors) acting on behalf of the University, without: 1) prior review by the UAS Committee; 2) approval by the Vice President for Research and Economic Development or designee.

~~D. Policy.~~ ("

~~D-1. No indoor or outdoor use of a UAS may be undertaken by a Responsible Party without:~~

~~a. Prior review by the UAS Committee;~~

~~b. Prior approval by the VPRED"); and, if necessary, 3) approval~~

~~c. Approval by the FAA of a COA and/or any other authorizations or exemptions applicable to the University use. [rev. 2-17] as required by FAA regulations.~~

~~Personal D-2. Compliance with FAA Regulations, Laws, and Policies.~~

~~The Responsible Party is personally responsible for complying with FAA regulations, state and federal laws, and University policies with respect to the use of UAS. Any waivers required from the FAA to conduct UAS flights must be obtained by the Responsible Party before flights occur.~~

~~D-3. Drones weighing more Larger than 55 LBSlbs. Use of a drone largerweighing more than 55 lbs at take-off on behalf of the University faculty, staff, students, is not permitted unless the Responsible Party first obtains an~~

~~exception or third parties on authorization from the FAA and receives approval as stated in D-1.~~

E. Insurance.

E-1. Liability insurance required. UAS liability insurance is required before any UAS activity by a Responsible Party may be carried out.

E-2. University property, including but not limited to recreational or hobby flight of model aircraft, is governed by APM 95.35, Personal Use of Unmanned Aircraft Systems on Campus, which prohibits such use on Owned UAS owned by University's. A UAS's owned by the university must be added to the University's insurance coverage via the Risk Management website before any flights are conducted.

E-3. UAS's not owned by University Third Parties. A Responsible Party using a UAS not owned by the University property. *See also* APM 35.35, Public Use and Liabilities must provide proof of insurance coverage that lists the University as a covered party and provides coverage that meets the requirements set by the state of Idaho.

C. Scope of F. UAS Committee at Authority and Responsibility for Review, Approval, and Monitoring of University Use of UAS Responsibilities.

~~C~~

F-1. UAS Committee.

a. The UAS Committee is an ad-hoc committee established by the President, ~~pursuant to FSH 1620B-3,~~ to advise the VPRED, who acts on behalf of the President in matters related to the use of UAS. The Committee ~~will be~~ appointed by and ~~report~~ reports to the VPRED. The UAS Committee is the principal mechanism by which the University ensures that it is meeting its obligations under federal and state law applicable to UAS use and under any COA approved by the FAA and that ethical issues related to UAS use ~~is~~ are given due consideration ~~prior to~~ before use.

b. The UAS Committee may, with the assistance of ORA and subject to approval by the VPRED, develop and implement:

1. ~~C~~ Standard operating procedures for use and operation of UAS;

2. ~~P~~ Procedures for expedited approval of UAS use;

1. ~~P~~ procedures for submission of a proposal to the UAS Committee;

3.

2. ~~P~~ procedures for appeal to the VPRED of any denial of a proposed UAS use by the UAS Committee; and

4.

5. ~~I~~—internal rules and procedures for the operation and administration of the UAS Committee, as may be consistent with this policy.

F-2. UAS pProposed uUse rReviews.

a. Procedures. The UAS Committee will review and make a formal recommendation to the VPRED, ~~or his or her designee,~~ regarding any proposed use of UAS ~~in Navigable Airspace by any members of the University of Idaho community, including faculty, staff, students, or by third parties acting on behalf of the University~~by a Responsible Party. The UAS Committee will consider the legal and ethical issues related to the UAS use and apply relevant law, guidance from federal agencies, etc., in determining whether a proposed use should be recommended to the VPRED for approval. The Committee's review may:

1. ~~—The UAS Committee will determine whether a~~Recommend the proposed use ~~can be recommended for approval by the VPR as described, needs in the application;~~
2. Require modification to ~~be recommended the~~ application/proposed use before recommending it for approval, ~~or by the VPR;~~
3. Recommend that the proposed use should be denied, ~~—; or~~
4. Deny the proposed use. ~~(See subsection section c. below.)~~

b. Approvals. The UAS Committee shall only recommend for approval those uses that it reasonably believes:

1. To be a Governmental Function and therefore eligible for a Public Operations COA;
2. To be within those areas of activity covered by other authorizations or exemptions that may be granted by the FAA to the University for Civil Operations, including Part 107;
3. To be within the Model Aircraft Rule for educational use; or
4. To be covered by an authorization by the FAA for Civil Operations held by a third party, subject to an agreement between the University and third party with respect to such services. ~~[rev. 2-17]~~

c. —Denied uUse by the UAS Committee. The UAS Committee may deny a proposed UAS use on the basis of factors including, but not limited to:

1. The proposed use raises risk or ethical issues;
2. The proposed use constitutes a Commercial Purpose;
3. The proposed use is not a Governmental Function eligible for coverage by a Public Operations COA;
4. The proposed use is not covered by other forms of authorization by the FAA for Civil Operation of UAS; or
5. The proposed use is prohibited by law without written consent of the individual or the owner of a farm, dairy, or

other agricultural industry, and such consent has not ~~and~~/or cannot be obtained.

d. —~~Appeal of UAS Committee d~~Denied ~~u~~Use. If the UAS Committee denies a proposed use, the denial may be appealed, in writing, to the VPRED. Any proposed use which the UAS Committee determines needs modification may be recommended for approval, following completion of any required modifications.

e. —~~Ongoing r~~Review. The UAS Committee, with the assistance of the Office of Research Assurances (~~“ORA”~~), shall provide ongoing review of any use approved by the VPRED and covered by a COA ~~issued~~ or other forms of authorization provided by the FAA. ~~The UAS Committee may, with the assistance of ORA and subject to approval by the VPRED, develop and implement: standard operating procedures for use and operation of UAS; procedures for submission of a proposal to the UAS Committee; procedures for appeal to the VPRED of any denial of a proposed UAS use by the UAS Committee; and internal rules and procedures for the operation and administration of the UAS Committee, as may be consistent with this policy.~~

~~F-3. Termination or Suspension~~Suspension or termination of approvals. The Committee may recommend suspension or termination of any use it deems inconsistent with the use approved by the VPRED ~~and~~/or the requirements of the applicable COA or other authorization granted by the FAA. Authority to suspend or terminate any previously approved use rests solely with the VPRED, ~~or designee~~.

~~C-3.G. Vice President of Research a~~Authority ~~and~~ ~~r~~Responsibilities:

~~G-1. In general.~~ The VPRED is the ~~empowered~~ individual at the University ~~empowered to approve proposed UAS use by Responsible Parties. The UAS Committee is appointed by and reports to the VPRED.~~

~~G-2. UAS u~~Use ~~a~~Approval ~~by~~ VPRED. Any proposed use of UAS recommended for approval by the UAS Committee shall be reviewed by the VPRED, ~~or designee~~, and approved or denied. Only ~~those operations~~UAS use approved by the VPRED may be ~~covered by an application to the FAA, as necessary, and/or~~ undertaken by ~~University personnel, students engaged in coursework, or third parties operating on behalffa~~ Responsible Party. ~~Denials of the University. Only the VPRED, or designee, may submit an application for a Public Operations COA or similar applications to the FAA, after consultation with the Office of General Counsel. [rev. 2-17]~~use by the VPR are final and cannot be appealed.

~~G-3. COA, w~~Waivers or ~~s~~Similar ~~a~~Applications to the FAA. Only the VPRED may apply for a Public Operations COA or similar application after consultation with the Office of General Counsel. In some cases, ~~the Responsible Party may apply for a Public Operations COA or similar application, but only with written approval and authorization from the VPRED.~~

G-4. Suspension or termination of Approvals. The VPRED may, at ~~his~~ ~~or her~~ their sole discretion, suspend or terminate any previous approval of UAS under this policy on the basis that actual use is inconsistent with the previous grant of approval by the VPRED ~~and/~~ or the requirements of an applicable COA.

G-5. Signature authority. Only the VPRED is authorized to sign permits or agreements authorizing UAS usage on university or non-university property. See FSH 3170, B-9.

H. Contact Information. For further information regarding implementation of this policy, ~~you may~~ contact the Office of Research Assurances, the UAS Committee, or visit the University UAS website.

~~Regulations authorizing section 336 has expired, the rules governing this are now section 349 (Exception for limited recreational operations of UAS, aka hobby flights) 14CFR Part 107, with these special exceptions. Now must take training, but no specifics on this, and no test at the end.~~

~~<https://www.federalregister.gov/documents/2019/05/17/2019-10169/exception-for-limited-recreational-operations-of-unmanned-aircraft>~~

~~<https://www.govinfo.gov/content/pkg/CFR-2020-title14-vol2/xml/CFR-2020-title14-vol2-part107.xml>~~

~~107 allows our employees to fly in class g airspace~~

~~349 allows students to fly in class g airspace — personal pleasure (not this APM) for educational purposes they would be this APM~~

20.60 - Unrelated Business Income ~~Tax~~ (TaxUBIT)

Owner:

*—~~Email:~~ controller@uidaho.edu

Last ~~reviewed/updated:~~ ~~March 31, 2015~~ ~~February 14, 2024~~ ~~March 5, 2024~~

~~Preamble:~~ Some university revenue producing activities may result in unrelated business income as defined by the Internal Revenue Service (IRS). Generally this will involve funds derived from a university business activity that is not substantially related to the university's exempt purposes of instruction, research and extension.

~~A. Purpose:~~ This policy addresses the requirement for the University of Idaho to report and manage unrelated business income as defined by the Internal Revenue Service (IRS), ensuring compliance with tax regulations and accurate reporting of revenue generated from activities not substantially related to the University's exempt purposes.

Formatted: Font: Not Bold

~~B. Scope:~~ This policy applies to all University uUnits engaged in revenue-producing activities that may result in unrelated business income, as well as personnel responsible for financial management and reporting within those uUnits.

Formatted: Font: Not Bold

~~C. Definitions:~~ None required.

~~BDC. Policy:~~ The University is required to file an annual tax return to the IRS and the State of Idaho reporting all unrelated business income, and thus an annual review of all revenue generated by University uUnits must be done in order to ensure accurate reporting. To the extent an activity results in tax to the University, the uUnits generating taxable revenue are responsible for the payment of any tax due.

~~CDE. Process/Procedure:~~ ~~General Accounting has a questionnaire that is used to make a determination as to the status of income derived from each activity.~~ Prior to engaging in any new income producing activity, uUnits are required to complete ~~the~~ questionnaire ~~provided by~~ General Accounting ~~has a questionnaire that is used to make a determination as to the status of~~ ~~income derived from each activity.~~ General Accounting may also require uUnits to update the questionnaire information for existing activities. The questionnaire is ~~provided by~~ ~~available~~ at General Accounting.

A spreadsheet will be sent out annually to all uUnits requiring them to review all revenue to determine if it is related or not to the exempt purpose of the university. The spreadsheet is to be filled out by department personnel and returned to ~~G~~general ~~A~~ccounting by the stated deadline.

~~DDE. Contact i~~nformation: Questions regarding unrelated business income should be directed to General Accounting at gnrlacctg@uidaho.edu.

~~G. Forms:~~ None required.

Immediate.

APM 35.66

Laboratory Decommissioning

A. Purpose. This policy provides requirements for the removal of hazardous materials and equipment from laboratory spaces when the Principal Investigator (PI) or laboratory supervisor is leaving the University of Idaho, moving to another campus building, relocating to another laboratory within the same building, or disposing of or transferring laboratory equipment that is no longer needed. This policy also applies to the removal of all hazardous materials and equipment from laboratory spaces prior to a renovation.

B. Scope. This policy applies to all laboratories and laboratory equipment that are part of the University of Idaho, including all teaching laboratories, research laboratories, and auxiliary spaces serving as laboratories. Management of laboratory hazardous waste and biohazards is within the scope of APM sections 35.01, 35.11, 35.40, and 45.20.

C. Policy

C-1. Disposition of materials and sharps. All chemicals, radioactive, and biological materials must be disposed of or their ownership transferred; hazardous wastes, sharps, and other wastes must be submitted to EHS for disposal in an appropriate manner before a laboratory is vacated.

C-2. Surfaces and storage locations. Laboratory work surfaces and storage locations for all hazardous materials must be thoroughly cleaned and decontaminated before a laboratory is vacated.

C-3. Laboratory equipment. All laboratory equipment must be thoroughly cleaned and decontaminated before removal from service, placing back into service, transporting to another location, storing in another location, or disposing of in a proper manner.

D. Procedure

D-1. Department chair. The department chair must notify Environmental Health and Safety when a PI plans to vacate a laboratory, ensure PIs are aware of and follow procedures defined in this policy, and pay for all costs associated with the proper disposal or decontamination of hazardous materials or equipment remaining in the laboratory after the PI leaves the university (hazardous waste, unknowns, expired chemicals, equipment, etc.).

D-2. Principal Investigator. The PI is responsible for the following:

- a.** Notify EHS of the plan to vacate the laboratory at least four weeks in advance and begin review of applicable items from the [Laboratory Decommissioning Procedure and Checklist](#) or the [Laboratory Equipment Decontamination Form](#).

- b. Arrange for the transfer or disposal of all chemicals, radioactive materials, and biological materials prior to leaving the University of Idaho.
- c. Ensure all hazardous waste has been submitted for pickup and removed by EHS before leaving the University of Idaho.
- d. Ensure all laboratory rooms, storage areas, equipment, and work surfaces are thoroughly cleaned and decontaminated before vacating the assigned lab space.
- e. Ensure all laboratory equipment slated for removal has been decontaminated and has a completed and signed Laboratory Equipment Decontamination Form.
- f. Correct any nonconformance after an EHS decommissioning inspection.

D-3. Environmental Health and Safety. EHS is responsible for the following:

- a. Provide guidance to lab personnel on how to perform activities listed on the Laboratory Decommissioning Procedure and Checklist.
- b. Provide guidance on proper methods or procedures for decontamination of lab equipment listed on the Laboratory Equipment Decontamination Form.
- c. Collect all submitted hazardous chemical waste.
- d. Perform a laboratory decommissioning inspection when applicable activities described in the Laboratory Decommissioning Procedure Checklist have been completed by the PI, notify the PI and department chair of any findings, and identify any potential nonstandard costs for review and determination by Vice President of Research, Vice President of Finance and Office of Research Assurances.

E. Nonstandard cost recovery

E-1. Department responsibility. The responsibilities and procedures mandated above should be managed within normal office operations and existing budgets because the PI is familiar with the area or materials and can thus partner with EHS for timely and cost-effective assistance. Current procedures on how to identify, manage and request disposal of hazardous wastes prior to decommissioning can be found at the [Environmental Health and Safety website](#). Should decommissioning result in nonstandard costs, the department is solely responsible for the cost of remediation. Nonstandard costs are those that arise due to the specific nature of the waste or failure of the PI or laboratory supervisor to correctly and timely identify, manage, and request disposal of hazardous wastes prior to decommissioning. Whether an identified cost is nonstandard will be jointly determined by the Vice President of Research and Vice President of Finance in consultation with Environmental Health and Safety and the Office of Research Assurances.

E-2. Funding source identification. EHS will provide an estimate of nonstandard costs to the department. Within 10 business days, the department must identify to EHS a funding source. EHS will then engage the appropriate services.

E-3. Discretionary loan. The department's parent college may petition the Vice President of Research to grant a loan from the Office of Research to the department for all or some of the costs. If granted, the Office of Research will withhold all F&A recovery from the college until the loan is repaid from withheld F&A recovery. Additional loan terms may be negotiated between the college and the VPR. These terms may include, but are not limited to, suspension of proposal submissions by the involved college, loan interest, etc.

Francesca Sammaruca, Faculty Secretary
Torrey Lawrence, Provost & Exec. Vice President
Dean Kahler, Vice Provost for Strategic Enrollment Management

DATE: March 25, 2024

SUBJECT: Admissions Criteria for Summer 2025 and Beyond

The university's admissions criteria have been operating on emergency actions that began during the Covid-19 pandemic. This was a result of standardized test scores not being available and changes to high school grading during the pandemic.

On the surface, admissions criteria may appear to be a simple topic, but it is very complex. This is a critical decision that has great impact on student achievement (including retention, graduation, student debt, etc.) as well as the university's enrollment.

We have three possible paths to consider:

1. Take no action – the emergency action will expire, and we will revert to the 2019-2020 criteria contained in the [catalog](#).
2. Approve new criteria – these criteria would replace the 2019-2020 criteria and go into effect as a permanent change.
3. Continue another one-year emergency action and delay a more permanent decision until the 2024-25 academic year.

Context and Assumptions

- Criteria should reflect our mission as a public, land-grant university which includes educating the working classes to receive a liberal (i.e., broad), practical education. This is a mission of access as we serve the State of Idaho and students from other locations.
- All criteria have limitations so there is no simple or obvious solution. Significant research in recent years about the “best predictor” for student success centers on GPA as the strongest overall criteria indicating a longer trajectory of student activity, effort, and achievement (e.g., Sawyer 2013); however, GPA is not standardized. Standardized tests provide a comparable assessment of aptitude but there is broad concern for bias (e.g., Carnevale et al 2019).
- We should consider all the possible impacts from criteria, including:
 - Student success: Are we admitting students who are not reasonably likely to succeed? Are we rejecting students who are reasonably likely to succeed?
 - GPA: What did we learn during the last three years of admitting students with 2.60+ which was different than the pre-2020 criteria?
 - What did we learn during the last three years of admitting students with no standardized test score?
 - What does the data show about pre-2020 admissions vs. admissions under the emergency criteria?

- We need to avoid any “try it for a year” approaches. It takes years for HS counselors to understand changes to admissions criteria. Any “trial year” has implications for longer than one year – it will impact university enrollment for 4+ years as the cohort class progresses through its degree.

Authority

Faculty

According to *FSH 1520 Constitution of the University Faculty* the admission criteria are established by the university faculty:

ARTICLE IV--RESPONSIBILITIES OF THE UNIVERSITY FACULTY...

Section 1. Standards for Admission. The university faculty establishes minimum standards for admission to the university. Supplementary standards for admission to individual colleges or other units of the university that are recommended by the appropriate constituent faculties are subject to approval by the university faculty.

See also *FSH 4120 E-3 Other catalog changes*. *Noncurricular catalog changes may be submitted directly to the most relevant standing committee of the university faculty and require approval by Faculty Senate and the university faculty before being forwarded to the provost for approval.*

University Curriculum Committee (UCC) (FSH 1640.91)

A. FUNCTION

A-1. To act on catalog changes involving the curriculum, including changes in the general requirements and academic procedures, and to coordinate curricular matters among UI’s major academic divisions.

A-2. To recommend policies and procedures concerning the matriculation, advising, and registration of students.

University Admissions Committee (FSH 1640.08)

A. FUNCTION. To act on applications for admission to UI in the cases of undergraduate applicants who do not meet minimum requirements for admission but who request a review. The Admissions Committee also evaluates and acts on applications of undergraduate students to special UI programs requiring minimum qualifications lower than those for regular admission to the University of Idaho. The Admissions Committee also hears appeals from disenrollment when that disenrollment is the result of the presentation of incomplete or false information on initial application as an undergraduate at UI. Decisions of this committee may be appealed as stated in 2500. (Similar applications for admission to the College of Graduate Studies are acted on by the Graduate Council, and its decisions may be appealed as stated in 2500; those for admission to the College of Law are acted on by that college’s Committee on Admissions, and its decisions may be appealed, in order, to the full faculty of the college and, when they consent to hear the appeal, to the president of the university and the regents.)

Process

Once a decision is made about which way to proceed, any required changes to the Catalog will be drafted and presented to Faculty Senate. Note: admissions criteria are part of the University Catalog. Catalog changes follow [FSH 4120](#) which is different from changes to FSH itself.

History

There have been significant changes in our criteria in recent years due to the pandemic, test score availability, high school grading changes as a result of the pandemic. In addition, there is significant public debate about the value of certain tools to predict college success, especially standardized test scores (e.g. GPA, SAT, ACT, etc.).

July 2016 to Fall 2020 Admission Requirements

For many years prior, the university admitted students based on a sliding scale relating two required elements – GPA and test score (SAT or ACT). The criteria details are listed below in UCC’s proposal.

June 2020

The Covid-19 pandemic significantly impacted high school grades from Spring 2020 semester as well as standardized test availability. Faculty Senate Leadership supports the following proposal that adjusts admissions policies for the Fall 2021 admission cycle only. Admissions requirements will revert to previous policy for the Fall 2022 admission cycle. To accommodate the irregularities in spring 2020 high school grading practices and changes to the College Board’s standardized testing schedule, we propose the following for the Apply Idaho program for the Fall 2021 class only:

- The U of I will allow the use of 5th semester high school grades instead of 6th semester in the admission consideration (assuming the 5th semester GPA is cumulative), and
- The U of I make an admission decision based upon GPA only where a test score is not available (be “test optional”), and
- Establish a minimum high school GPA of 2.60 for admission.
- Under this accommodation, the U of I would not require a standardized test for admission but would require a placement test score prior to registration for the fall 2021 semester.
- Students whose GPA is below 2.6 will apply through the appeals process administered by the Admissions Committee.

April 2021

Faculty Senate requests the President to implement emergency policy again for Fall 2022 (Barb Kirchmeier, senate chair).

October 2021

UCC examined standardized test requirement for admissions. Jim Connors recommended a senate committee be created to examine the policy.

April 2022

Faculty Senate requests the President to implement emergency policy again for Fall 2023, Spring and Summer 2024 (Russ Meeuf, senate chair)

March 2023

Faculty Senate requests the President to implement emergency policy again for Fall 2024, Spring and Summer 2025. (Kelly Quinnett, senate chair)

Complicating Factors

SBOE Direct Admission process

Under the Apply Idaho - [Next Steps](#) initiative the Idaho State Board of Education screens Idaho high school seniors and shares that contact information with two-year and four-year colleges in the early fall of their senior year. The students are informed they are admissible to the two-year or four-year schools and that they can expect to hear from the colleges. The contact information of those students who meet established benchmarks to be admitted to a four-year college are provided to the U of I. We then communicate with student to share they are admissible to the university. They are invited to complete the application process to the U of I.

ISAT Test

This is a standardized test required of all Idaho high school students. It was recently moved from the 10th to 11th grade. We believe use of the ISAT should be considered in future years after data is available to compare multiple years of 11th grade tests against college success metrics.

Transfer Student Admissions

Criteria for transfer students have not changed and all proposals assume continuation.

Vandal Gateway Program (VGP)

VGP is currently in its second year of a three-year pilot. Evaluation of the program will be done after data of third year data is available (fall 2024 or early spring 2025). Admissions criteria for Summer 2025 and beyond are needed now so the program does not automatically cease prior to consideration of the pilot's results.

Proposals

#1 Recommendation from University Curriculum Committee

UCC recommends reverting to previous admission criteria. This criteria was used from July 2016 to Fall 2020. It is a sliding scale relating two required elements – GPA and test score (SAT or ACT).

| High School Cumulative GPA (Unweighted) | *ACT Composite | *SAT Critical Reading + Math (SAT Taken Prior to March 2016) | *SAT Evidence Based Reading & Writing + Math (SAT Taken March 2016 and After) |
|---|----------------|--|---|
| 3.00-4.00 | Any Test Score | Any Test Score [required] | Any Test Score [required] |
| 2.60-2.99 | 15 - 36 | 740 - 1600 | 830 - 1600 |
| 2.50-2.59 | 17 - 36 | 830 - 1600 | 910 - 1600 |
| 2.40-2.49 | 19 - 36 | 910 - 1600 | 990 - 1600 |
| 2.30-2.39 | 21 - 36 | 990 - 1600 | 1070 -1600 |
| 2.20-2.29 | 23 - 36 | 1070 -1600 | 1140 -1600 |

Notes:

- Either the SAT or ACT are required for all students. During the previous period, the SAT was required for all high school students in Idaho so it was not a barrier for admission. This is no longer true so keeping this criteria may decrease future enrollment. Our Fall 2023 entering class included **720 students** without a SAT/ACT score.
- Writing/Essay component is not required for admission
- The third column “SAT Taken Prior to March 2016” is rarely used and is outdated.
- Students may be automatically admitted down to a 2.20 GPA if their test scores are high enough.
- It does not account for admission to the Vandal Gateway Program currently serving students in the 2.30-2.59 GPA range. Students who do not meet these criteria would need to appeal via the UAC appeal process.
- Reverting to the above criteria would have decreased the number of admitted students from 9,579 to 5,650 (decrease of 3,929 admits) from 11,762 applicants in Fall 2023. (Again, this is not a perfect comparison given the number of students who didn't submit test scores.)

#2 Recommendation of Faculty Senate Leadership, Provost, and Vice Provost for SEM

We recommend new criteria that has a higher GPA range than UCC's recommendation and incorporates the test optional component for people with a GPA over 2.8.

- Criteria
 - GPA 2.80-4.00: Automatic admission without any test score
 - GPA 2.60-2.79: Automatic admission with SAT 830+/ACT 15+
 - GPA 2.30-2.59: Automatic admission to VGP (current criteria)
 - GPA 0.00-2.29: Admission via UAC appeal process

- Notes
 - This proposal allows us to use the same admission criteria for students across all states (i.e., not ISAT dependent)
 - The SAT and ACT requirements for GPA 2.60-2.79 are the same as the pre-2020 criteria for 2.60-2.99.
 - We do not have robust data for Idaho's new ISAT exam. We may consider this as a suitable alternative for SAT/ACT requirements in future years.
 - We believe this criteria may align with admission criteria of Boise State University which allows OSBE to manage direct admissions for Idaho students to both universities in the same manner.
 - When we apply this criterion to the Fall 2023 applicant pool we would admit 9,310 of the 11,762 applicants compared to the 9,579 actually admitted (269 fewer admits).
 - The UAC process continues as it does today.

#3 Alternate Recommendation of Faculty Senate Leadership, Provost, and Vice Provost for SEM

If a permanent solution is not found in the near future, we recommend that Senate asks President Green to continue the current emergency action criteria.

- Criteria
 - GPA 2.60-4.00: Automatic admission without any test score
 - GPA 2.30-2.59: Automatic admission to VGP without any test score
 - GPA 0.00-2.29: Admission via UAC appeal process to VGP
- Notes
 - The data shown to senate previously show no significant drop in student success with the use of these metrics.

Other Information

Reverting to pre-Covid admissions requirements would result in a significant loss in admittance and enrollment. A decrease of this magnitude could have significant negative implications for the university. (Again, this is not a perfect comparison. Test scores were optional and therefore some additional students may have been admitted if they had taken and submitted test scores. It is the best information we have.)

Admittance Rates

- This Fall 2023 we admitted 9579 students or 81% of the 11,762 that applied.
- If we reverted to the pre-Covid criteria and applied that to the Fall 2023 applicants, we would have admitted 5650 students or 48% of the 11,762. We would have admitted 3,929 less students than we did this year.
- If we apply the recommendation by FSL and the Provost's Office (above) to the Fall 2023 applicant pool, we would have admitted 9310 students or 79% of the applicants. We would have admitted 269 less applicants than we did this year.

Enrollment Rates

- In Fall 2023 we enrolled 1837 students
- If we reverted to the pre-Covid criteria and applied that to the Fall 2023 applicants, we would have enrolled 779 fewer students.

- If we apply the recommendation by FSL and the Provost's Office (above) to the Fall 2023 applicant pool, we would have enrolled 115 fewer students.

Conclusion

We believe recommendation #2 strikes the proper balance of access and reliability for student success allowing UI to fulfill its mission as a public, land-grant institution and recommend faculty senate vote to implement it for the 2024-25 academic year.

2023 – 2024 Faculty Senate – Pending ApprovalMeeting # 27

Tuesday, April 2, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Thaxton, Tibbals.

Absent: Blevins, Miller, Mischel.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #26, March 26, 2024, were approved as distributed.

Chair's Report:

- Important reminder: Senators whose terms end in 2023-24 should ask their units/colleges to conduct elections for AY 24-25 Senate seats. Nominations and elections of officers will take place on 4/23/2024 and 4/30/2024, respectively.
- Artificial Intelligence.
 - The AI steering Team is planning to organize a symposium in the Fall.
 - The AI and Machine Learning Task Force is focusing on AI literacy. They launched an exhibition this week presented in the ISUB.
 - The AI Working Group is proposing new courses which include a 200-level course, “AI for All of Us”, PHIL 361 (a course about AI ethics), and a 400 level Computer Science course.
 - Some ideas shared among the groups: AI is present in all domains of activity and grows at a speed never seen before, AI's impact on society can be compared to the impact of the internet 25 years ago. AI is mainly driven by the technology industry – hardware and software – and not by traditional academic research.

Provost's Report:

- Vandal Giving Day is today and goes on for 1,189 minutes (about 20 hours). For more information, visit <https://vandalsgive.uidaho.edu/giving-day/80574>.
- Dr. Patrice Buckner Jackson's workshop: “Disrupting Burnout,” is tomorrow at 1:30-3:00 pm, Whitewater/Clearwater, ISUB. <https://uidaho.edu/events?trumbaEmbed=view%3Devent%26eventid%3D173916644>.
- University of Phoenix: The legislative solution proposed by the Senate to address some of the concerns from the House failed on the floor last week. As President Green communicated on Friday, they are looking at options.
- Updates on legislation impacting U of I will be communicated soon.

Discussion:

A senator asked about the costs already incurred towards the Phoenix transaction, about \$11M, if the deal falls through. Provost Lawrence said that those costs have been paid as negotiations moved along, through reserves. If the transaction does not close and costs are not reimbursed, it will take

longer to reach the State Board reserve requirements. The Provost reiterated that they are still trying to find a path. The Phoenix affiliation is not a closed matter.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 3440 Compensation of Classified Employees – Brandi Terwilliger, Director of Human Resources, Attach. #2.
With the establishment of a market-based compensation system, this revision is necessary to replace the previous language based on the previous pay grade system. The primary compensation principles remain unchanged.
Discussion:
In response to a question, Brandi said that the revised policy has already gone through Staff Council.
Vote: 21/22 yes; 1/22 no. Motion passes.
 - FSH 3420 Faculty Salaries – Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #3, to be voted together with FSH 4620 Academic Calendars, Attach. #5.
FSH 3420 Section E, detailing period of obligation and payroll schedule, has been added to align with the deferred pay scheme.
No questions.
Vote: 21/21 yes. Motion passes.
 - FSH 3120 Faculty Obligations During Period of Appointment – Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #4.
Section D-2 has been revised to clarify work and pay schedule for academic year appointments. Sections D-4 has been expanded and revised to clarify summer session obligations of faculty with academic year appointments. Summer contracts can only be issued if the work is for 10 hours or more. The committee wanted to codify that AY faculty asked to do at least 10 h work in the summer need to get a contract for it.
Discussion:
Senators noted that some university-level committees meet during the summer. Will this revised policy impact their ability to hold hearings during the summer, and potentially the make-up of those committees? Alistair explained that the spirit of the revisions is to codify what's required and what's optional. People can still volunteer to work without compensation for more than 10 hours.
The discussion moved to summer teaching appointments, in particular the statement that those "*...do not count toward promotion and tenure considerations.*" Some senators argued that most faculty do research over the summer, which is recognized at P&T – why not teaching? Different points of view were advanced, such as that summer teaching is entirely optional, and only what's in the faculty's PD is considered towards P&T. Alistair noted that the statement under discussion was there prior to FAC's revisions and was not one of the committee's major concerns. Perhaps this is something to reconsider later.
Vote: 18/19 yes; 1/19 no. Motion passes.
- Proposed changes to the University Catalog (voting)
 - UCC 536 Bioinformatics – Tanya Miura, College of Sciences Attach. #6.

We are proposing to add a BS degree in Bioinformatics to complement existing degrees in Biological Sciences at U of I (Biology, Biochemistry, Microbiology, Medical Sciences). This addition will give students the opportunity for coursework and training relevant to modern fields and careers in biology and medicine. The university has a wealth of world-class faculty with expertise in bioinformatics, especially in evolutionary and computational biology, that will contribute courses to the degree. U of I has excellent MS and PhD programs in Bioinformatics and Computational Biology (BCB) and is developing a non-thesis MS program in BCB. A BS degree in bioinformatics will prepare students well for these graduate programs and will serve as a foundation for a future 4 +1 MS degree in BCB. The BCB graduate programs are housed in the College of Science, and most faculty participants in BCB are faculty in the Department of Biological Sciences, thus we have unparalleled expertise to offer a rigorous bachelor's degree in bioinformatics. The curriculum consists of courses offered in Biological Sciences, Mathematics and Statistical Sciences, and Computer Science at U of I, thus will minimally affect current faculty workloads. The degree will be administered by the Department of Biological Sciences, which has adequate staff to support the degree program and additional students.

Discussion:

There was a brief discussion to clarify how the total number of credits for both of the proposed four-year plans added up to 120. The plan that doesn't require ENG 101 and MATH 143 has more electives.

Vote: 19/19 yes. Motion passes.

- UCC 541 Design for Inclusion and Well-Being Undergraduate Academic Certificate - Rula Awwad-Rafferty, C Chair of Design and Environments Department and professor of Interior Architecture & Design. Attach. #7

The Department of Design and Environments-Interior Architecture & Design program at the University of Idaho proposes to offer an academic certificate in "Design for Inclusion and Wellbeing." The certificate program provides an avenue for students, professionals, and community members to obtain relevant, university-centered training and learning through classroom, workshop, lectures, site visits, and service-learning formats related to access and inclusion, wellbeing, sustainability, and resilience, and capacity building in the built environment. The program requires the completion of 12 credits of study; courses are already part of the BIAD degree, focusing on academic explorations in foundational and advanced topics in social and environmental responsibility, access and inclusion- universal design, materials, and specification, well standards, spatial agency, and area of hands-on application. The courses provide both an academic exploration component and an application component. The participants conclude in the seminar course with a research project they tailor to their specific field of study or interest in relation to the design for inclusion and well-being while acquiring skills and knowledge applicable to any workplace environment. The participants enter their research projects at the University of Idaho Undergraduate Research Expo, culminating in their on-campus capacity building and certificate work. The certificate acknowledges competency in understanding a broad range of diverse social and environmental issues that facilitate and impact inclusion and wellbeing in the built environment and an ability to apply that understanding to the workplace and in social life.

There were no questions.

Vote: 17/18 yes; 1/18 no. Motion passes.

- UCC 113 Update Regulation O-1 – Dean Kahler Vice Provost for Strategic Enrollment Management, Jerry McMurtry, Dean, College of Graduate Studies Attach. #8
Request updating regulation to consider undergrad students "full time" if they are carrying 6 or more credits during the summer session. This will allow international students to attend classes during the summer session. Also addressing summer credits for the College of Law and College of Graduate Studies.
Discussion:
A few questions followed. Jerry clarified that these revisions do not impact financial aid. They have been worked out with the Registrar and IPO. This policy will benefit programs that prefer to have their students come in the summer and start some field work/research.
Vote: 18/18 yes. Motion passes.

- UCC 112 O-10-b Regulation Edit for College of Law Certificates – David Pimentel, College of Law. Attach. #9
This catalog regulation language edit (see attached document for details) clarifies the grade policy for graduate law certificates.
There were no questions.
Vote: 19/19 yes. Motion passes.

- Admission Standards – Jean-Marc Gauthier, Faculty Senate Chair
Chair Gauthier summarized the current status and opened the floor for discussion.
Discussion:
Financial impact projections requested by a senator last week are not available. Dean Kahler needs to review the data from Wes McClintick, but he is traveling. The UCC analysis, supported by IR and Wes, showed minimal to no impact on enrollment. Provost Lawrence pointed to the draft of a State Board policy in attachment #10, in particular section **2.a**. Direct Admission. The other seven institutions in the state support the draft. The State Board is not open to another level of standards for direct admission and, therefore, if section **2.a** passes, these will be the state minimums for direct admission that we must meet or exceed. We should know more on Thursday, after the meeting of the IRSA subcommittee. SBOE staff have offered to give a presentation on the ISAT, which would be of interest to Faculty Senate and UCC. Along with the admission criteria, we need to consider VGP, because, depending on how we move forward, that program may be impacted. We should ask UCC to include VGP in their recommendation to Faculty Senate.
Motion (Mittelsteadt, Tibbals) to:
 - Return the item to UCC for reconsideration due to new information from SBOE.
 - Ask UCC to provide a proposed redline document for the catalog change.
 - Provide the rationale concerning how they came to their recommendation.
 - Ask UCC to make a recommendation about VGP admission criteria.Vote: 18/18 yes. Motion passes.

Announcements and Communications:

- Distinguished Scholarships Program (DSP) – Dilshani Sarathchandra, Associate Professor of Sociology and Sandra Reineke, Associate Professor of Political Science.

Sandra introduced the DSP, which is housed in the U of I Honors program. The DSP primarily covers undergraduate opportunities, except that they also sometimes advise students about the National Science Foundation Graduate Research Fellowship program. At many universities, similar programs are referred to as nationally competitive scholarships. Distinguished scholarships are mostly opportunities for UG students to apply for scholarships and fellowships, including undergraduate research opportunities. The funds for those experiences come from various sources, such as federal agencies or private donors. It's open to any U of I student. Eligibility requirements and the amount of money that students receive vary across programs. Oftentimes, programs also require endorsement of an applicant. Sandra presented a selection of the awards over the last five years received by University Idaho students. DSP services include recruiting prospective students to the to the University of Idaho, delivery of information for students who are here, mentoring the students who are applying and assisting them with their application process, and the promotion and publicizing of the awardees. DSP promotes participation in high impact practices. Many selective institutions participate in this. Students also go abroad and, thus, gain international experience and network with future leaders of the country globally and internationally. It's a huge recognition, and the process is highly competitive.

Contact: dsp@uidaho.edu ; www.uidaho.edu/academics/honors/scholarships

For more information, see the presentation slides attached to these minutes.

Adjournment:

The agenda not being completed, the Chair entertained a motion to adjourn. So moved (Tibbals, Mittelsteadt). The meeting was adjourned at 5:03pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #27

Tuesday, April 2, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #26 March 26, 2024 **Attach. #1**
- III. Chair's Report
 - AI Initiatives
 - Nomination/election of new Senators from their respective colleges. April 23rd
Nomination of Chair and Vice Chair of Faculty Senate. April 30th Election of new officers.
- V. Provost's Report
- VI. Committee Reports (voting)
 - Proposed changes to the Faculty Staff Handbook (voting)
 - FSH 3440 Compensation of Classified Employees – Brandi Terwilliger, Director of Human Resources **Attach. #2**
 - FSH 3420 Faculty Salaries – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #3**
 - FSH 3120 Faculty Obligations During Period of Appointment – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #4**
 - FSH 4620 Academic Calendars – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #5**
 - Proposed changes to the University Catalog (voting)
 - UCC 536 Bioinformatics – Tanya Miura, College of Sciences **Attach. #6**
 - UCC 541 Design for Inclusion and Well-Being Undergraduate Academic Certificate – Rula Awwad-Rafferty, Center for the Excellence in Teaching and Learning **Attach. #7**
 - UCC 113 Update Regulation O-1 – Dean Kahler Vice Provost for Strategic Enrollment Management, Jerry McMurtry, Dean, College of Graduate Studies **Attach. #8**
 - UCC 112 O-10-b Regulation Edit for College of Law Certificates – Jerry Long, College of Law **Attach. #9**
 - Admission Standards: Continuing the discussion tabled on 03/26/24 – Jean-Marc Gauthier, Faculty Senate Chair **Attach. #10**
- VII. Announcements and Communications
 - Distinguished Scholars Program – Dilshani Sarathchandra, Associate Professor of Sociology and Sandra Reineke, Professor of Political Science
 - Dependent Benefit Task Force Update – Kristin Haltinner, Vice Chair of Faculty Senate
- VIII. New Business

IX. Adjournment

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 26

Tuesday, March 26, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Thaxton, Tibbals.

Absent: Maas (excused), Miller, Mischel.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #25, March 19, 2024, were approved as distributed.

Chair's Report:

- Important reminder: Senators whose terms end in 2023-24 should ask their units/colleges to conduct elections for AY 24-25 Senate seats.
- Apologies for the communication glitch about admissions. Regarding the data that was shared with you, please be assured that the data was shared at the time it was available.

Provost's Report:

- Two searches are in progress.
 - Last week, we had two candidates for the position of Dean of the College of Law, and two more will visit this week . The schedules can be found at <https://www.uidaho.edu/provost/administrative-searches> .We encourage people to participate. After our last interview, we will ask for people's feedback.
 - The other search is for a new director of General Education. Dean Panttaja has been in that role for quite some time and he's going to step down. Please share this information with your colleagues. <https://www.uidaho.edu/provost/administrative-searches>
- University of Phoenix: Addressing a previous question from Steve Shook, the Provost pointed to the University of Phoenix website: The University of Phoenix transaction requires a conduit issuer, and as such, we approached a number of different national conduits. Arizona Industrial Development Authority (AzIDA) is a conduit issuer of municipal revenue bonds with the ability to assist private and public borrowers across the country. National Finance Authority (NFA) in New Hampshire is also a conduit issuer. While AzIDA declined to participate, NFA agreed to participate in the financing. The AzIDA decision has no impact on our transaction.
- A Senate Bill regarding the University of Phoenix passed the Senate State Affairs Committee this morning. See <https://legislature.idaho.gov/sessioninfo/2024/legislation/S1450/>. The Provost will provide an update next week.

Discussion:

A senator inquired about an article in the Idaho Education News, which reported that the Alumni Association was asked by the President to hire a lobbyist. They noted that the university is not allowed to hire lobbyists. Provost Lawrence replied that the Alumni Association can do so, and it's common.

Committee Reports:

- Proposed changes to the Administrative Procedures Manual (non-voting)
 - APM 45.35 - University of Idaho Unmanned Aircraft Systems (“UAS”) – Kay Dee Holmes, Assistant Director, Research Integrity, Office of Research Assurances, Attach. #2
Standardized and updated formatting; Clarification on existing requirements; Address policy gaps & remove unnecessary language.
Discussion:
In response to a question from Chair Gauthier, Kay Dee Holmes confirmed that the policy applies only to UAS used for university business.
 - APM 20.60 - Unrelated Business Income Tax – Amanda Bauer, Controller, Ali Pearce, General Accounting Manager, Attach. #3
Describe other UI policies or procedures related to or like this proposed change, or that will be impacted by it.
There were no questions.
 - APM 35.66 - Laboratory Decommissioning – Samir Shahat, Executive Director, University Safety Officer, Radiation Safety Officer, Arch Harner, Assistant Vice President for Research Administration, Office of Research and Economic Development, Russell McClanahan, Biosafety and IRIC Facility Manager, Office of Research Assurances Attach. #4
This policy was developed in collaboration with the Office of Research Assurances. It provides requirements for the removal of hazardous materials and equipment from laboratory spaces when the Principal Investigator (PI) or laboratory supervisor is leaving the University of Idaho, moving to another campus building, relocating to another laboratory within the same building, or disposing of or transferring laboratory equipment that is no longer needed. This policy also applies to the removal of all hazardous materials and equipment from laboratory spaces prior to renovation.
There were no questions.

Announcements and Communications:

- Admissions Recommendations – Jean-Marc Gauthier, Faculty Senate Chair, Torrey Lawrence, Provost and Executive Vice President, Kristin Haltinner, Vice Chair of Faculty Senate, Dean Kahler, Vice Provost for Strategic Enrolled Management. Attach. #5.
(Please see attachment #5 for the full content of the presentation.)
Chair Gauthier started the presentation with some background and context for the decision to be made, and a brief timeline of recent decisions/actions. Vice Chair Haltinner reviewed the authority structure in shared governance, and the different options that have been proposed. The Provost addressed important aspects to keep in mind when making admissions criteria decisions: Our mission of access and our responsibility to admit students who are ready for college; reliability of GPA vs. test scores; impact of changing admissions standards; SBOE direct admission policy. Dean Kahler proceeded to present data on possible enrollment implications. Vice Chair Haltinner shared data on retention rates in relation to high school GPA. She concluded with an overview of the different options for senate to consider.
Discussion:
Senator Steve Shook expressed serious concerns about the projected implications for enrollment shown in the presentation. It is impossible to make this projection, because the students admitted post-COVID did not have to submit a test score, and we assume they had no

scores to submit. Chair Gauthier recognized that this is a problem with the data we have. Steve Shook also argued that Proposals #1 and #2 in Attachment #5 are not very different. UCC looked at the data and noticed that 96% of the students at the 2.6 GPA level had SAT score of 800. What data drives the choice of a 2.8 GPA vs. 3.0? Chair Gauthier pointed to the analyses from SEM. Steve Shook replied that UCC came up with different conclusions.

A senator argued that there is no point in the proposal to extend the emergency action for one more year. Nothing major will have changed in one year. Vice Chair Haltinner said that option is kind of a back-up plan, in case we cannot find common ground.

A senator brought up the issue of student success. The senate rep for her college conducted a survey about which set of requirements would be best. Most of the college agreed with reverting back to the original criteria prior to COVID, and expressed concern about what the GPA wasn't showing us about student aptitude. Her college is also seeing issues with engagement. The advising office reported many students on probation or disqualification in these last few years, the highest ever seen at her college. This senator does not see a test requirement as restricting access. Also, given that the GPA is not a consistent indicator because it differs across schools – there are non-accredited institutions, home-schooled students etc. – most of the constituents in her college agreed that reverting to the pre-COVID requirements would be best, if we want students to be successful. The senator also inquired about the Vandal Gateway program (VGP) with respect to student success and retention rates, because VGP is tied to the admission standards we are discussing. She also suggested looking at the question of admittance versus enrollment, and what we can do to make sure that admitted students enroll as well.

Vice Chair Haltinner pointed to the VGP update presented to senate on January 16, when the VGP team shared data for the past 1.5 years. The team were pleased with the improvement in academic standing from the first to the second year.

Back to the issue of potential impact on enrollment from reverting to the pre-COVID criteria, a senator asked how many of the 779 students who would have not been admitted by the 2019 criteria did not submit a test score. Vice Chair Haltinner provided the number, 720 students. Of those, 587 had GPA of 3.0 and above. In other words, most of them would be admissible to the University without any additional information.

A senator expressed concerns about procedural issues. A seconded motion from UCC is before senate, yet other proposals are being submitted and discussed. This senator is very reluctant to overrule the recommendation of a committee that has spent considerable time on this question and is entrusted with the responsibility for it. The senator is concerned that we are bypassing UCC in considering alternatives to what they have recommended to us. The UCC recommendation should be sent back to them. Chair Gauthier explained that there was never any intent to bypass UCC. FSL was under the impression the UCC was not willing to reconsider their recommendations. Hence, alternative options were developed.

Steve Shook announced his intent to propose a friendly amendment unanimously approved by UCC, to drop the test score requirement for students with GPA of 3.0 and up.

A senator said that he wouldn't be ready to vote without first discussing the financial impact of potentially admitting fewer students. Steve responded that the number of students who are admitted has no financial impact. It's those who are enrolled that have financial impact, and, once they're enrolled, those who are retained. They looked at retention rates from Institutional Research and observed that the retention rate decreases as GPA and SAT scores decline.

There was some additional discussion on the pros and cons of dropping the test score requirement. Those tests are still paid for, although no longer required by the state, so, financial barrier is not an issue. If we drop it, are we going back to a situation where we have less

information? Requiring test scores would be beneficial for us – moving forward, it would give us additional data if we analyzed the relationship between GPA and standardized test scores on retention in the future. Test scores can be important as an additional parameter when awarding scholarships.

There was a question about the role of the VGP in the UCC proposal. Steve Shook responded that VGP is not part of the general catalog. There is a link under admissions requirements that takes you to CLASS. It is not an official part of the general catalog because it's a pilot program. Therefore, UCC did not evaluate VGP as it relates to standards for admission. Provost Lawrence followed up with an additional aspect: the VGP admission criteria were approved through those emergency measures last year. So, we do need to address VGP criteria this semester, although not necessarily as a permanent measure. The third year of the pilot is next year, but admissions criteria must be decided a year and a half in advance.

A senator suggested that perhaps we should take a broader institutional approach to this decision – identify what's best for us as an institution, rather than react to what others are doing.

The senator who raised the issue of possible financial impact on faculty lines, jobs, etc. underlined the importance of having such information. Dean Kahler and Vice Chair Haltinner said they can put it together. Steve Shook reiterated that it's not possible to obtain a reliable estimate from the data.

The amendment to the UCC motion is seconded by Bob Rinker (seconded earlier by David Pimentel, who withdrew his action).

Vote: 13/21 yes; 8/21 no. Amendment passes.

Motion to table (Tibbals, Chapman). Vote: 19/20 yes; 1/20 no. Motion passes.

Adjournment:

The agenda not being completed, the Chair entertained a motion to adjourn. So moved (Justwan, Barannyk). The meeting was adjourned at 5:01pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

COMPENSATION OF CLASSIFIED-STAFF EMPLOYEES

PREAMBLE: This section outlines the policy and procedure by which the compensation of UI's classified employees is determined. In its original shape it appeared in the 1979 Handbook; it was rewritten in July 1994 and again in 2003. In 2004 section G was rewritten to create sections G & H, and H became I. In 2008 the policy was revised to remove reference to classified exempt no longer used at the university. Unless otherwise noted, the text is as of July 1996. Further information is available from Human Resources (208-885-3609). [ed. 7-97, 7-00, 7-03, 12-04, 7-08]

- H. Voluntary Salary Reductions

A. GENERAL POLICY.

A-1. The University of Idaho seeks to provide a high level of responsive service in meeting the needs of students, faculty and staff and the general public. To accomplish this mission, it is the policy of the University of Idaho to provide a total compensation system that attracts and retains employees. Recognizing and rewarding employees for performance in the achievement of service delivery goals and objectives through a market-based salary model is ~~the~~ the foundation of this system. This policy addresses only the salary component of the university's total compensation system as it relates to staff employees; it does not address other components, such as health insurance and retirement plans.

A-2. Compensation practices should be consistent throughout the university, yet flexible to adapt to specific needs. To this end, employees are compensated according from to a base pay salary structure schedule based on market based on market salary data and weighted factors for 1) education beyond the minimum required for the position, 2) prior experience substantively similar to the position, 3) time -in -service, and 4) time -in -responsibility. Together with market salary data, these weighted factors produce a target salary. Actual salary may differ from target salary due to performance or budget constraints.

A-3. The University of Idaho seeks to pay competitive job market average salaries and intends that classified employees with at least satisfactory performance evaluations of "meets/exceeds requirements" should expect to advance according to the base pay salary structure. ~~within the salary range for the pay grade assigned to a classification.~~ *[rev. 7-03]*

A-4. ~~Advancement within the salary range shall be based on performance criteria, as recorded in the performance evaluation and the ability to achieve the goals and objectives of the particular position. Compensation, and other matters related to classified employees are the responsibility of the president or designee. Oversight of the University of Idaho staff personnel system is within the administrative area of the Division of Finance and Administration which reports to the financial vice president.~~ *[rev. 7-03]*

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF Section 3440: Compensation of Classified Employees

B. AUTHORITY FOR ESTABLISHING COMPENSATION POLICY FOR UNIVERSITY OF IDAHO CLASSIFIED-STAFF EMPLOYEES. Salary and wage increases for University of Idaho classified employees are made in conformity with state legislation. An annual plan is established by the president in accordance with guidelines issued by the [Board of Regents, RGP V.B.1](#). Initial appointments, promotions, classifications and pay grades, and other matters related to classified employees, are the responsibility of the president or designee. Oversight of the University of Idaho staff personnel system is within the administrative area of the Division of Finance and Administration which reports to the [financial Vice President for Finance and Administration](#). *[rev. 7-03]*

C. ADMINISTRATION OF THE UNIVERSITY OF IDAHO COMPENSATION PLAN. The [assistant vice president senior for Human Resources \(HR\) executive](#) is responsible for maintaining the compensation plan for UI classified employees in conformity with [Board of Regents'](#) policy. ~~No classified employee is to be paid at a rate that is not within the salary range for the class, except as noted in C-5 below. The current salary schedule is available from the office of Human Resources website, www.uidaho.edu/humanresources.aspx. For information on the base pay salary structure, see the HR website, at www.uidaho.edu/humanresources.aspx~~ *[rev. 7-02, 7-03, 12-04, ed. 7-08, 6-09]*

~~C-1. The classification and pay grade of classified positions are established by Employment Services in consultation with the department administrator and with approval of the dean, director, or vice president. *[rev. 7-02, 7-03]*~~

~~C-2. The entrance salary for new appointees in any class is ordinarily set between minimum rate and market for that class. In unusual circumstances and when supported by acceptable reasons, appointment at a higher rate may be authorized by the director of employment services and the dean or director. All new appointments are made within the salary range. *[rev. 7-02, 7-03]*~~

~~C-3. When an employee is reinstated in a previously held position or transferred to another position in the same classification, he or she is generally paid at the same salary. Salary adjustments may be agreed upon by the employee, the department administrator, and the director of employment services. *[rev. 7-02, 7-03]*~~

~~C-4. The pay grade of a classified position may be changed by any of the following actions:~~

- ~~a. "Reallocation." A change of an entire class of positions from the current pay grade in the compensation schedule to another pay grade of either higher or lower entrance salary.~~
- ~~b. "Reclassification." A change of a single position from the current class to another class to properly reflect the duties and responsibilities assigned to that position.~~
- ~~e. "Refactoring." A change in the number of Hay Points assigned to a class or position.~~

~~C-5. When a particular class or position is reallocated or reclassified to a lower pay grade, the salaries of incumbent employees who are being paid at a rate higher than the maximum provided in the new grade will not be reduced as a result of the reallocation or reclassification. However, the salaries of such employees will generally be held constant and not be increased thereafter so long as they exceed that maximum rate. At the discretion of the dean or director and in consultation with the assistant vice president for human resources, exemplary performance by such employees may be recognized through a bonus adjustment to salary, effective for one fiscal year only. An employee whose position has been reallocated or reclassified is not required to complete a new six-month probationary period. *[rev. 7-02]*~~

~~C-6. When a particular class or position is reallocated to a higher pay grade, the employee will receive a salary equivalent to or higher than his or her current hourly rate. An employee whose position has been reallocated is not required to complete a new six-month probationary period.~~

~~C-7. When the position of an employee is reclassified to a higher pay grade, the employee will be assigned a salary in the range of the higher grade that provides a salary increase of not less than five percent. Salary increases must have dean or vice president level approval. The reclassified employee is not required to complete a new six-month probationary period. The employee's department is responsible for providing the funding necessary for the required salary increase. *[ed. 7-02, rev. 7-03, 12-04]*~~

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

Section 3440: Compensation of Classified Employees

~~C-8.~~ When an employee applies and is selected for a position in a higher pay grade, he or she may negotiate the starting pay within the pay grade for the new position [see C 2 above]. Each promoted employee must successfully complete a six-month probationary period in his or her new position unless the employee was previously certified in that class. (For the effect of demotion on salary see 3360 C 4; for the effect on salary of a recommendation for a merit increase in the previously held position, see B 3.) [rev. 7-03, rev. 12-04]

~~D. IN-GRADE SALARY INCREASES.~~

~~D-1.~~ In-grade advancement is not a vested right. While employees should expect to advance within their assigned pay range based upon acceptable performance, advancement is within the discretion of the university. Such advancements are considered as a part of the overall UI budget-setting process and are effective at the beginning of the fiscal year. An employee may advance within the salary range only if certified as meeting the satisfactory service requirements on a written performance evaluation approved for the purpose by the president or the president's designee. Normally, an employee receives only one salary increase per year for satisfactory service. [See also 3380 E.]

~~D-2.~~ Employees who are in probationary status may be recommended for merit increases at the discretion of the department administrator and with the approval of the dean or director; however, merit increases which have been authorized for employees in probationary status are not effective or awarded until the probationary period has been satisfactorily completed. [ed. 7-02]

~~DE. SALARY INCREASES.~~ While employees should expect to advance in salary based upon satisfactory performance and increases in the target salary, advancement is within the discretion of the university. Such advancements are considered as part of the overall UI budget-setting process and are effective at the beginning of the fiscal year. An employee may advance within the salary range only if they meet the satisfactory requirements on a documented performance evaluation on file in HR. Normally, an employee receives only one salary increase per year for satisfactory performance.

Changes in employee compensation are considered annually by the legislature. Salary adjustments reflecting some or all of the following factors may be approved and implemented in accordance with guidelines for UI classified salary adjustments issued annually by the president:

~~ED-1.~~ Changes in the cost of living.;

~~ED-2.~~ Fluctuations in the market cost of different types of labor, which are reflected in payline adjustments to position market rates and employee target salaries; ~~reallocating some classifications to different pay grades;~~

~~DE-3.~~ Equity.

~~D-4.~~ Merit increases based on individual employee performance as documented by written performance evaluation on file in HR.

~~D 4.a.~~ Classified employees who are in their hiring probationary status may be recommended for merit increases at the discretion of the unit administrator with the approval of the dean or director.

~~FE. COMPENSATION FOR NIGHT WORK.~~ A full-time classified employee whose work schedule requires at least 50 % percent of the scheduled ~~his or her~~ working hours during a given pay period to be performed between the hours of 7 p.m. and 4 a.m. is paid an additional shift differential of 5 percent-% of the employee's hourly rate. ~~The department administrator or designee submits an Electronic "Personnel Action Form" to effect the additional payment.~~ [ed. 7-02, 7-03]

~~FG. ADDITIONAL PAY FOR CLASSIFIED STAFF FOR SECONDARY WORK ASSIGNMENTS.~~

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

Section 3440: Compensation of Classified Employees

FG-1. Classified staff additional appointments. ~~A member of the e~~Classified staff must be paid overtime for any work that results in the employee working over 40 hours per week, including a secondary work assignment that is not within ~~his/her~~the current job description and ~~is~~ outside the scope of ~~the his/her~~ primary appointment and classification. The secondary work assignment must be performed on a temporary basis beyond the regularly scheduled work week, and ~~be~~ limited in scope (for example, if a senior programmer teaches a special course on a one-time basis; or if an administrative support staff provides assistance one weekend with a special research project in another unit or college). Per federal law, ~~the~~ classified employees must be paid at least 1.5 times ~~their/his or her~~ regular hourly rate for each hour that is worked over 40 hours per week. The secondary hiring authority may not offer compensatory time in lieu of cash payment of overtime. The secondary hiring authority is responsible for tracking the hours the employee has worked and coordinating with the primary hiring authority for processing the employee's pay via a timesheet. ~~in PHAHOUR. If the employee's wage for the secondary work assignment is set at more than time and a half, the employee should be paid via a Temporary Help — PERSI eligible (IP) appointment. If the employee is less than full-time, call Employment Services at 208-885-3638/885-3728 for additional information. [add. 12-04, ren. & ed. 7-08]~~

FG-2. —Exempt staff. The president or designee can authorize payments in addition to regular salary and these must be reported to the regents in a semi-annual report. See RGP II.C.4., RGP II.F.2., RGP II.G.2. Deans and other administrative officers are responsible for ensuring that required approvals have been granted for employees receiving additional compensation for service that is not part of the employee's position description. See the HR website for additional compensation procedures.

FG-3. -Staff temporarily working at a higher market rate. —Supervisors may request a temporary salary increase in pay for classified staff, or additional compensation for exempt staff temporarily performing duties at a higher level than their current permanent position. See the HR website for pay at a higher market rate procedures.

HG. QUESTIONS ABOUT SALARY EQUITY. An employee who believes that ~~their/his or her~~ compensation is not equitable ~~first~~ should ~~first~~ consult with ~~his or her~~their supervisor, and then with the ~~unit~~department administrator ~~and/or the senior HR Executive or both~~. In certain situations, the employee also has recourse to ~~the Director of the Office of Civil Rights and Investigations~~Human Rights, Access and Inclusion, or the Ombuds' office or to the grievance procedure for staff employees. ~~[See 3210 A and 3860 A.] [ed. 7-02, 12-04, 7-08, 6-09, rev. 7-03, ren. 7-08]~~

HI. VOLUNTARY SALARY REDUCTIONS. Individual requests to reduce one's salary or to reject an increased salary adjustment are discouraged. Should employees make such a request, they must provide a clearly stated reason and the reduction must be approved by the president.

Version History

Amended XXXX . Extensively revised to align with current practices.

Amended July 2021. Editorial changes.

Amended July 2009. Editorial changes to C and H.

Amended July 2008. The policy was revised to remove reference to classified exempt no longer used at the university.

Amended January 2005. Section G was rewritten to create sections G & H, and H became section I.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

This is part of a group of policy revisions being proposed to align with the new deferred pay scheme for faculty. The other policies are FSH 3120 Faculty Obligations during Period of Appointment and FSH 4620 Academic Calendars.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

FACULTY SALARIES

LAST REVISION: July 2019

A. Purpose. This policy addresses how faculty salaries and performance increases are determined and the schedule for faculty compensation.

B. Scope. This policy applies to all faculty.

AC. Market Compensation ~~compensation~~. Salaries shall be determined with reference to nationally validated market salary rates pursuant to a model developed in consultation with the faculty and shall be communicated annually.

BD. Performance Compensation ~~compensation~~. If funds are available for performance increases, the following process shall be followed for determining compensation for performance:

BD-1. Basis: Performance increases shall be based on the performance of responsibilities in the faculty member's position description. Faculty members must meet expectations in all areas of responsibility; excellence in any category of responsibility can be the basis for a performance increase.

BD-2. Recommendations: The relative number of faculty within units in a college shall be considered in determining the number of recommendations for each unit if the number of such recommendations is limited.

BD-3. Unit Administrator's Report: The unit administrator shall write a report to the dean recommending faculty for performance increases.

- a. The report shall briefly state the reasons for each recommendation and prioritize the recommendations.
- b. The recommendations shall be closely related to and supported by annual performance evaluations.
- c. The unit administrator may recommend how funds should be distributed.

BD-4. College Administrative Consultation: The dean shall confer with the unit administrators and other relevant faculty administrators regarding how to best allocate performance increases within the college to advance the strategic objectives of the units, college and university.

BD-5. College Recommendation: Based on the unit administrators' reports and the college administrative consultation, the dean shall recommend performance increases to the provost.

BD-6. Future Performance: Unit administrators and deans shall meet with any faculty member who wants to discuss their salary to encourage conversation about future performance.

E. Schedule of obligation and compensation. Faculty shall be paid in biweekly increments according to the University's payroll calendar.

E-1. Academic year appointees

- a. Academic year period of obligation and compensation. The period of obligation for academic year appointees is 39 weeks; however, payroll is distributed evenly over 20 pay periods.
- b. Summer period of obligation and compensation. The period of obligation and summer salary for academic year appointees shall be negotiated annually according to the needs of the University. The period of obligation and summer salary for academic year appointees shall be negotiated annually

according to the needs of the University, up to the maximum of 13 summer weeks (for years containing 26 pay periods) or 14 summer weeks (for rare years containing a 27th pay period).

E-2. Fiscal year appointees. The period of obligation for fiscal year appointees is 52 weeks and payroll is distributed evenly over 26 pay periods.

E-3. Adjustments to payroll schedule. Payroll schedules may be adjusted in years when the academic calendar does not align with a schedule of 26 pay periods (e.g., rare years containing a 27th pay period).

Version History

Amended July 2019. This section was completely rewritten to reflect current practices and ensure uniformity across all units.

Amended January 2009. Changes to this policy came about to simplify the forms, to include interdisciplinary activities, to tie AE to PD, and to connect to Strategic Action Plan goals.

Adopted 1979.

UI FACULTY-STAFF HANDBOOK

CHAPTER THREE:

EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

3120

FACULTY OBLIGATIONS DURING PERIOD OF APPOINTMENT

LAST REVISION: 2020

CONTENTS:

[A. A-Purpose](#)

[B. Scope](#)

[C. Periods of Appointment](#)

[D. ~~B. D.~~ Service Obligation](#)

[A. PURPOSE.](#) This policy sets forth the obligations of faculty during their periods of appointment.

[B. SCOPE.](#) This policy applies to all faculty at the University of Idaho.

[CA. PERIODS OF APPOINTMENT.](#) Professional academic personnel are regularly appointed for service either (1) during the academic year (in this context, the "academic year" encompasses the nine full months ending the day after the close of the spring semester) or (2) for the fiscal year beginning on July 1. [Faculty salaries are detailed in FSH 3420.](#)

[DB. SERVICE OBLIGATION-](#)

[DB-1. Service and ~~Faculty-faculty Workloads~~workloads.](#) Assignments of duties to academic personnel are made by college deans (FSH 1420 D) and departmental administrators (FSH 1420 E) in such a way that the schedule of course offerings will permit each student to complete [his or her/their](#) curriculum in the time prescribed in the catalog and so that the research and service functions of the college and department can be carried out. Full-time appointments assume full-time service, but faculty members may engage in outside consulting as provided in FSH 3260.

[DB-2. Academic-~~Year-year a~~Appointments](#) (see FSH 3710 B-1.-c). Academic-year appointees are liable for duty assignments and are accountable for their service to UI throughout the nine-month period specified in A. This period normally begins before the official opening of the fall semester and before the date that is set by the appointee's dean for mandatory return to on-campus duty. These employees may, alternatively, be permitted to account for service during some mutually agreed different, but equivalent, period (i.e., to engage in research, prepare for classes, advise students, participate in new-student orientation, or perform similar academic functions). [The work period for academic year appointments falls within 19.5 bi-weekly pay periods and faculty with this type of appointment will be compensated over 20 bi-weekly pay periods.](#)

[DB-3. Fiscal-~~Year-year a~~Appointments](#) (see FSH 3710 B-1.-b). Fiscal-year appointees are obligated to perform services for UI throughout the year. Taking eligibility for vacation leave into account, this amounts to approximately 11 months of service each year.

[DB-4. Summer ~~s~~Session ~~Appointments~~obligations for faculty with academic-year appointments-](#)

[a. In general.](#) Summer and other off-contract activities are not required for University of Idaho faculty. With or without additional compensation, agreeing to perform any duties outside of the normal academic calendar is entirely optional and at the discretion of each individual faculty. Faculty should consult with their associated advisory committees on efforts related to expectations under FSH 3500 but are not required to use off-contract time to meet those expectations. Regardless of whether a summer appointment exists, academic year faculty retain access to essential University services such as email, access to their respective offices, and, where applicable, access to research facilities, outside the normal academic calendar.

[b. Changes in academic policy and procedure.](#) Administrators should, if possible, avoid using the time outside of

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

Section 3120: Faculty Obligations During Period of Appointment

July 2000

the contract term for academic-year faculty to engage in decision making processes that significantly affect faculty and in which academic-year faculty would normally participate if the processes occurred during the academic year. Administrators should use forethought and sensitivity in asking faculty to devote any time outside of their contract terms for institutional outreach and service, whether compensated or not. They should be especially mindful of actual or perceived imbalances of power between them and faculty members arising from the latter's degree of job security, time at the University, tenure or non-tenure status, or belonging to any group protected by the University's anti-discrimination policies.

ca. Summer session teaching obligations for academic-year appointments

1.

Summer session teaching appointments. Full-time summer appointments generally call for a basic teaching load of six or seven credits during eight weeks of service. These summer appointments are entirely optional and do not count toward promotion and tenure considerations. If the basic teaching load is less than six credits or requires less than eight weeks of service, the summer salary may be prorated accordingly. In addition to the basic teaching load of six or seven credits, faculty load may be increased by the assignment of students registered for research and thesis, directed study, etc. ~~Furthermore, faculty members on summer appointment are expected to perform other routine duties, such as student advising and committee work.~~

2.

-Selection of summer session teaching faculty. The selection of faculty members to teach during summer session is based on program needs. In some cases it may be desirable to appoint ~~visiting temporary~~ faculty instead of resident faculty members.

3. -Timeline for summer session teaching appointments. Summer appointments are made as soon as practicable following final development of the summer program. This generally means that a faculty member may be approached by the departmental administrator or dean as early as the preceding September to ascertain ~~his or her~~ the faculty member's interest in teaching during the following summer session. The plan for the summer program is generally completed by February 1, and recommendations for summer appointments are normally submitted to the president in March or April.

df. Summer session non-teaching appointments for academic-year faculty

1. Faculty working on non-teaching duties such as unit, college, or university committee assignments, recruitment initiatives, outreach, extension, administration, sponsored projects, etc., are eligible to receive a contract for the outside-of-contract period if the work is above .125 FTE in a pay period.

2. Additional responsibilities and assignments of a more permanent nature may be considered justification for adjustment of the employee's contracted salary or responsibilities during the academic year, rather than justification for supplemental compensation.

Version History

Amended 2020. Moved 3240 Section A: Faculty Workloads, which was already cross-referenced with 3120 B, to that

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

Section 3120: Faculty Obligations During Period of Appointment

July 2000

section, which also necessitated some renumbering within that section.

Amended January 2012. Editorial changes.

Amended July 2002. Section C was removed with approval of new language in 3480.

Amended July 2000. Editorial changes.

Adopted July 1979.

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://www.uidaho.edu/governance/policy>

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Comprehensive review? Yes No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.
Calendar expanded to note important dates and deadlines; corresponding policy language updated.

2. **Fiscal Impact:** What fiscal impact, if any, will this change have?
None.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.
This is part of a group of policy revisions being proposed to align with the new deferred pay scheme for faculty. The other policies are FSH 3420 Faculty Salaries and FSH 3120 Faculty Obligations during Period of Appointment.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

UI FACULTY-STAFF HANDBOOK
CHAPTER FOUR:
ACADEMIC POLICIES AND REGULATIONS

4620

ACADEMIC CALENDARS

LAST REVISION: January 2024

CONTENTS:

- A. Academic Calendar
- B. Planning Calendars

A. ACADEMIC CALENDAR. Each academic year includes two ~~16-week~~ semesters, a summer session between Spring and Fall Semesters, an intersession between Fall and Spring semesters, and short courses that fall within one of these standard sessions. The Fall semester ends shortly before Christmas; the Fall and Spring semesters together must include at least 160 instructional days, including the final-examination period. In each year there are 79 instructional days in the fall semester and 81 in the spring. Changes in the established pattern for the academic calendar require approval by the Faculty Senate and the university faculty.

B. PLANNING CALENDARS. For planning purposes, the pattern of the academic calendar ~~in effect for 2021-22~~ has been projected ~~through the year 2027-28~~ as shown ~~on the following page~~ in the link below. ~~In each year there are 79 instructional days in the fall semester and 81 in the spring.~~

[PDF: Academic Calendars](#)

Version History:

Amended January 2024. Revised to delay all dates for Fall 2025, Spring 2026, and Summer 2026 by one week.

Amended January 2019. Minor changes to fall term start dates for 2019 and 2026.

Amended January 2015. Updated and reformatted the calendar.

Amended July 2009. Changed Faculty Council to Faculty Senate.

Amended January 2009. Updated calendar.

Amended 2001. Added subsection D.

Amended February 1991. Modified subsection A, abolishing the requirement that regents approve all annual calendars.

Amended 1989. Updated summer scheduling.

Amended 1984. Updated summer scheduling.

Adopted 1979.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

Learn and integrate: Through independent learning and collaborative study, students will attain, use, and develop knowledge in biology, computer science, and related disciplines with specialization in bioinformatics, integrating information across these disciplines. Students will be able to analyze biological datasets to understand living systems.

Think and create: Students will be able to use multiple thinking strategies to examine issues in bioinformatics, including, in particular, the design and computational analysis of biological datasets. Students will be able to apply bioinformatics knowledge to real world challenges, such as those that may be encountered in applied areas, solving problems using creative avenues of expression.

Communicate: Students will be able to acquire and analyze bioinformatics information from the scientific literature. Students will be able to convey bioinformatics information via verbal, written, and other non-verbal methods such as appropriate statistical analyses and graphics.

Clarify purpose and perspective: The program will allow students to explore bioinformatics in the context of their career and life's purpose as well as to apply perspectives to novel issues or problems within bioinformatics or other disciplines to foster an understanding of diverse global perspectives.

Practice citizenship: Students will understand and accept their roles as educated bioinformaticians and scientists in society. Students will be able to communicate with others, including non-scientists, from the special perspective of an educated bioinformatician. Students will be able to apply their understanding of bioinformatics to collaboratively engage with a diverse world.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The Biological Sciences Assessment Committee will identify key courses at early, middle, and late stages of the curriculum that address each of the learning outcomes. The assessment committee will work with the instructors of these courses to identify appropriate assignments, exams, or projects that best align with the program learning outcome(s). Data from these courses on one learning outcome per year will be entered into Anthology for analysis by the department chair during annual program review. Additional program data will be evaluated, including enrollment, graduation, and retention data. Assessment data will be presented to the departmental faculty for discussion and suggestions for improvement, including curricular adjustments, and recruitment and retention activities. This discussion will be used to set goals to improve the program and generate plans to meet those goals. The annual report will be reviewed the college dean and provost's office and their feedback will be incorporated into the departmental plan. The following year, the department will assess progress towards these goals and determine whether the plan has improved the program or if further adjustments are needed.

How will you ensure that the assessment findings will be used to improve the program?

During the annual assessment process, the goals and plan from the previous year will be evaluated to determine if changes improved the program or if further adjustments are needed.

What direct and indirect measures will be used to assess student learning?

The Biological Sciences Assessment Committee will identify key courses at early, middle, and late stages of the curriculum that address each of the learning outcomes. The assessment committee will work with the instructors of these courses to identify appropriate assignments, exams, or projects that best align with the program learning outcome(s). Direct measures will include student performance on these class activities, and enrollment, retention, and completion data. Indirect measures will include student responses in the senior survey and course evaluations.

When will assessment activities occur and at what frequency?

Assessment will occur annually, with the submission of the annual program review to the college at the end of October each year.

Student Learning Outcomes**Learning Objectives**

Learn and integrate: Through independent learning and collaborative study, students will attain, use, and develop knowledge in biology, computer science, and related disciplines with specialization in bioinformatics, integrating information across these disciplines. Students will be able to analyze biological datasets to understand living systems.

Think and create: Students will be able to use multiple thinking strategies to examine issues in bioinformatics, including, in particular, the design and computational analysis of biological datasets. Students will be able to apply bioinformatics knowledge to real world challenges, such as those that may be encountered in applied areas, solving problems using creative avenues of expression.

Communicate: Students will be able to acquire and analyze bioinformatics information from the scientific literature. Students will be able to convey bioinformatics information via verbal, written, and other non-verbal methods such as appropriate statistical analyses and graphics.

Clarify purpose and perspective: The program will allow students to explore bioinformatics in the context of their career and life's purpose as well as to apply perspectives to novel issues or problems within bioinformatics or other disciplines to foster an understanding of diverse global perspectives.

Practice citizenship: Students will understand and accept their roles as educated bioinformaticians and scientists in society.

Students will be able to communicate with others, including non-scientists, from the special perspective of an educated bioinformatician. Students will be able to apply their understanding of bioinformatics to collaboratively engage with a diverse world.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

We are proposing to add a BS degree in Bioinformatics to complement existing degrees in Biological Sciences at U of I (Biology, Biochemistry, Microbiology, Medical Sciences). This addition will provide students the opportunity for coursework and training that is relevant to modern fields and careers in biology and medicine. The university has a wealth of world-class faculty with expertise in bioinformatics, especially in evolutionary and computational biology, that will contribute courses to the degree. U of I has excellent MS and PhD programs in Bioinformatics and Computational Biology (BCB), and is developing a non-thesis MS program in BCB. A BS degree in bioinformatics will prepare students well for these graduate programs and will serve as a foundation for a future 4 + 1 MS degree in BCB. The BCB graduate programs are housed in the College of Science, and the majority of faculty participants in BCB are faculty in the Department of Biological Sciences, thus we have unparalleled expertise to offer a rigorous bachelor's degree in bioinformatics. The curriculum consists of courses that are currently offered in Biological Sciences, Mathematics and Statistical Sciences, and Computer Science at U of I, thus will minimally affect current faculty workloads. The degree will be administered by the Department of Biological Sciences, which has adequate staff to support the degree program and additional students.

Reviewer Comments

Tanya Miura (tmiura) (Tue, 26 Sep 2023 15:26:51 GMT): Rollback: update degree map

Linda Lundgren (lindalundgren) (Thu, 12 Oct 2023 23:34:56 GMT): 10/12/23: Uploaded program description.

Linda Lundgren (lindalundgren) (Tue, 17 Oct 2023 18:15:29 GMT): Per Tanya Miura change self-support answer to "no"

Linda Lundgren (lindalundgren) (Tue, 17 Oct 2023 18:41:22 GMT): Region II added to Full proposal Form (Moscow is Region II)

Gwen Gorzelsky (gwen) (Thu, 26 Oct 2023 00:04:08 GMT): Rolling back to request 3 changes: 1.) Replace U of I budget proposal form with SBOE full proposal budget form. 2.) Correct SBOE proposal form by unchecking the box for self-support. 3.) Verify that figures in response to SBOE Q#8 are conservative estimates or revise if needed.

Gwen Gorzelsky (gwen) (Thu, 26 Oct 2023 00:06:49 GMT): Rollback: Rolling back per email sent to Tanya M. @ ~5 PM Wed. 10.25.23 and comment in this form. 3 changes: 1.) Replace U of I budget proposal form with SBOE full proposal budget form. 2.) Correct SBOE

proposal form by unchecking the box for self-support. 3.) Verify that figures in response to SBOE Q#8 are conservative estimates or revise if needed.

Tanya Miura (tmiura) (Wed, 15 Nov 2023 00:06:07 GMT): Uploaded revised SBOE proposal and budget forms.

Rebecca Frost (rfrost) (Wed, 07 Feb 2024 19:17:12 GMT): Updated entry to catalog format. Added 4 year plan with an ENGL 101 and MATH 143 start. Department should review in case of offering information not included in catalog.

Sydney Beal (sbeal) (Wed, 21 Feb 2024 20:07:08 GMT): Removed BCB 420 and 421 from Computational Electives due to courses not appearing in CIM or the catalog

Key: 536

536 Bioinformatics BS Program Description:

This interdisciplinary program combines coursework in biology, mathematics and statistics, and computer science. Students will learn to develop and apply computation and high-performance computing to analyze and interpret complex biological data sets.

About Lightcast

Lightcast is a labor market analytics firm that is passionate about providing meaningful data for colleges and their students.

Our data is trusted by a breadth of users including researchers at colleges and universities, economic development organizations, and Fortune 500 companies.

Lightcast data offers a three-pronged approach to labor market information:

1. Our traditional LMI combines dozens of government sources from agencies like the Bureau of Economic Analysis, U.S. Census Bureau, and Bureau of Labor Statistics into one dataset that details industries, occupations, demographics, academic programs, and more.
2. Lightcast's job posting analytics give a real-time look into the needs of employers in today's labor market. Each month, millions of postings are scraped from employer sites and job boards, de-duplicated, and compiled into an actionable dataset.
3. Lightcast also leverages workforce profiles—an innovative database of more than 100 million resumés and professional profiles that are aggregated from the open web. These profiles unify information for workers—such as education, employment history, skills, and more—to reveal robust detail on what is happening in today's workforce.

Together, these data related to labor market demand, relevant skills, and the competitive landscape help colleges and universities make informed decisions about their program offerings.

|---|--|---|---|

There were **196,962** total job postings for your selection from September 2022 to August 2023, of which **83,085** were unique. These numbers give us a Posting Intensity of **2-to-1**, meaning that for every 2 postings there is 1 unique job posting.

This is close to the Posting Intensity for all other occupations and companies in the region (3-to-1), indicating that they are putting average effort toward hiring for this position.

Unique Postings Trend

| Month | Unique Postings | Posting Intensity |
|----------|-----------------|-------------------|
| Aug 2023 | 6,034 | 2 : 1 |
| Jul 2023 | 5,754 | 3 : 1 |
| Jun 2023 | 6,399 | 3 : 1 |
| May 2023 | 6,659 | 2 : 1 |

Job Postings Summary

| | | | |
|---|---|--|---|
| <p>4.09M Unique Postings 11.24M Total Postings</p> | <p>3 : 1 Posting Intensity  Regional Average: 3 : 1</p> | <p>98,740 Employers Competing 1.85M Total Employers</p> | <p>25 days Median Posting Duration Regional Average: 29 days</p> |
|---|---|--|---|

There were 11.24M total job postings for your selection from July 2019 to July 2023, of which 4.09M were unique. These numbers give us a Posting Intensity of 3-to-1, meaning that for every 3 postings there is 1 unique job posting.

This is close to the Posting Intensity for all other occupations and companies in the region (3-to-1), indicating that they are putting average effort toward hiring for this position.

Top Companies Posting

| Company | Total/Unique (Jul 2019 - Jul 2023) | Posting Intensity | Median Posting Duration |

Program Selection Details

| CIP Code | Program Name |
|----------|----------------|
| 26.1103 | Bioinformatics |

Appendix B - Data Sources and Calculations

Institution Data

The institution data in this report is taken directly from the national IPEDS database published by the U.S. Department of Education's National Center for Education Statistics.

Occupation Data

Emsi occupation employment data are based on final Emsi industry data and final Emsi staffing patterns. Wage estimates are based on Occupational Employment Statistics (QCEW and Non-QCEW Employees classes of worker) and the American Community Survey (Self-Employed and Extended Proprietors). Occupational wage estimates are also affected by county-level Emsi earnings by industry.

Lightcast Job Postings

Job postings are collected from various sources and processed/enriched to provide information such as standardized company name, occupation, skills, and geography.

State Data Sources

This report uses state data from the following agencies: Alabama Department of Labor; Alaska Department of Labor and Workforce Development; Arizona Commerce Authority; Arkansas Division of Workforce Services; California Employment Development Department; Colorado Department of Labor and Employment; Connecticut Department of Labor; Delaware Office of Occupational and Labor Market Information; District of Columbia Department of Employment Services; Florida Department of Economic Opportunity; Georgia Labor Market Explorer; Hawaii Workforce Infonet; Idaho Department of Labor; Illinois Department of Employment Security; Indiana Department of Workforce Development; Iowa Workforce Development; Kansas Department of Labor; Kentucky Center for Statistics; Louisiana Workforce Commission; Maine Department of Labor; Maryland Department of Labor; Commonwealth of Massachusetts, Mass.gov; Michigan Department of Technology, Management and Budget; Minnesota Department of Employment and Economic Development; Mississippi Department of Employment Security; Missouri Economic Research and Information Center; Montana Department of Labor and Industry; Nebraska Department of Labor, NEworks; Nevada Department of Employment, Training and Rehabilitation; New Hampshire Employment Security; New Jersey Department of Labor and Workforce Development; New Mexico Department of Workforce Solutions; New York Department of Labor; North Carolina Department of Commerce; North Dakota Job Service; Ohio Department of Job and Family Services; Oklahoma Employment Security Commission; Oregon Employment Department; Pennsylvania Department of Labor and Industry, Center for Workforce Information and Analysis; Rhode Island Department of Labor and Training; South Carolina Department of Employment and Workforce; South Dakota Department of Labor and Regulation; Tennessee Department of Labor & Workforce Development; Texas Workforce Commission; Utah Department of Workforce Services; Vermont Department of Labor; Virginia Employment Commission; Washington State Employment Security Department; West Virginia Department of Commerce; Wisconsin Department of Workforce Development; Wyoming Department of Workforce Services

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

The courses proposed for the certificate are courses already taught at the Bachelor of Interior Architecture & Design CIDA-accredited degree program. A few of the courses in this plan (300 and above level courses) are also taken by graduate students as upper-level electives in support of their study plans/degree focus areas. These courses are a subset of the IAD minor. In focusing the certification on the specific courses selected, there is a greater likelihood of students actually completing it and earning a tangible outcome that supports their academic and professional goals.

No changes to any of the fee structures already in place are being requested.

For example, one of the courses proposed (IAD 151) is part of the foundational courses that, in addition to the primary Moscow campus in-person offering, is also offered at the Boise UI campus. The section in Boise is taught via distance delivery and has CAA distance delivery fee of \$15 per hour attached to that section. No changes in this fee are requested.

The financial impact is potentially seen as the certificate becomes known and increased volume of participation (hence, referred to as students -whether UI or community students) in the following areas:

a. With the increased number of students in the selected classes beyond the maximum number possible for each class, there will be a need for instructional assistance, potentially adding a section in specific courses or adding instructional assistants. This will only occur in the cases of significant enrollment increases in these courses.

a. Outreach to more audiences in the Boise area with the one-course offering (IAD 151), increasing the volume and diversity of students in that class.

b. Positive financial impact in increased credit hour generation due to increased volume of students taking the certificate courses.

Overall, the financial impact of the certificate is manageable within the parameters of class size, mode of instruction, and location.

Curriculum:

The Design for Inclusion and Well-Being certificate affords students the opportunity to develop an integrative perspective of interdependent factors and conditions impacting inclusion, well-being, independence, and people-environment interactions. It provides tools and approaches to investigate lifespan accessibility, universal design inclusive practices, and material explorations as means to investigate opportunities for influencing built and social space for all.

The curriculum for this certificate consists of 12 credit hours taken from four existing courses in the IAD curriculum that invest in developing capacity in a scaffolding, active learning approach.

All required coursework must be completed with a grade of C or better (O-10-a (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

| Code | Title | Hours |
|---------|--|-------|
| IAD 151 | Introduction to Interior Architecture and Design | 3 |
| IAD 368 | Materials for Health and Sustainability | 3 |
| IAD 443 | Universal Design | 3 |
| IAD 400 | Seminar | 3 |

Total Hours

12

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

1. Foster a global view of the power of design and consideration for social, cultural, economic, and ecological contexts and impacts. (CIDA Professional Standards 2022-4)
2. Demonstrate awareness of the influence environments, furnishings, objects, materials and finishes have on human experience and wellbeing. (CIDA Professional Standards 2022-13)
3. Demonstrate awareness of the relationship between the built environment and human behavior and experience and successfully apply such research theories to human-centered design solutions. (CIDA Professional Standards 2022-7).
4. Students are aware that multiple disciplines and stakeholders are involved in creating an interior environment. CIDA Professional Standards 2022-7).
5. Demonstrate skills for respectful and effective communication within the diverse cultural and social settings in the United States (CIDA Professional Standards 2022-9)

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Each course will carry on the assessment already in place to attain the course-level learning outcomes; all are part of our program assessment and CIDA accreditation expectations.

For the certificate, to assess the competency of achieving the set comprehensive learning outcomes, a comprehensive project is assigned in the IAD 400 seminar. The project will be completed through several stages with multiple internal reviews. The students are required to participate in the University of Idaho Undergraduate Research Expo and be reviewed at that level.

How will you ensure that the assessment findings will be used to improve the program?

Ensuring assessment findings will be used to improve the program is a practice that IAD program takes to heart. The courses for the certificate are key in assessing our program as a whole. A robust protocol based on CIDA accreditation standards is in place, we propose to monitor the certificate for the first three years and propose updates and changes.

The IAD program conducts two program review meetings annually, in December and in May; these reviews are used to reflect on the semester's and year's goals, student learning, meeting accreditation standards, completing gated admission reviews, assessing opportunities to address program and institutional needs, and completing assessment based on established rubrics of key courses. The findings are used to modify instructional goals, course settings, instructional assignments, modifications of offerings, adjustment of rubrics, and any other evidence-based modifications resulting from assessment data; closing the loop.

The certificate will be one of the programs assessed during these established reviews, and the results of the assessment will be integrated in the anticipated modifications periodically.

What direct and indirect measures will be used to assess student learning?

Direct measure: Research project in IAD 400 evaluated based on an established internal rubric.

Indirect measure: University of Idaho Undergraduate Research Expo participation and reviewers' feedback at the in-person poster session. The rubric would also be provided through internal course review and evaluation.

When will assessment activities occur and at what frequency?

Course level: per existing course' "already in place systems"

Annually: certificate level

Student Learning Outcomes

Learning Objectives

1. Foster a global view of the power of design and consideration for social, cultural, economic, and ecological contexts and impacts. (CIDA Professional Standards 2022-4)
2. Demonstrate awareness of the influence environments, furnishings, objects, materials and finishes have on human experience and wellbeing. (CIDA Professional Standards 2022-13)
3. Demonstrate awareness of the relationship between the built environment and human behavior and experience and successfully apply such research theories to human-centered design solutions. (CIDA Professional Standards 2022-7).
4. Students are aware that multiple disciplines and stakeholders are involved in creating an interior environment. CIDA Professional Standards 2022-7).
5. Demonstrate skills for respectful and effective communication within the diverse cultural and social settings in the United States (CIDA Professional Standards 2022-9)

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The Department of Design and Environments-Interior Architecture & Design program at the University of Idaho proposes to offer an academic certificate in "Design for Inclusion and Wellbeing." The certificate program provides an avenue for students, professionals, and community members to obtain relevant, university-centered training and learning through classroom, workshop, lectures, site visits, and service-learning formats related to access and inclusion, wellbeing, sustainability, and resilience, and capacity building in the built environment.

The program requires the completion of 12 credits of study; courses are already part of the BIAD degree, focusing on academic explorations in foundational and advanced topics in social and environmental responsibility, access and inclusion- universal design, materials, and specification, well standards, spatial agency, and area of hands-on application. The courses provide both an academic exploration component and an application component. The participants conclude in the seminar course with a research project they tailor to their specific field of study or interest in relation to the design for inclusion and well-being while acquiring skills and knowledge applicable to any workplace environment. The participants enter their research projects at the University of Idaho Undergraduate Research Expo, culminating in their on-campus capacity building and certificate work. The certificate acknowledges competency in understanding a broad range of diverse social and environmental issues that facilitate and impact inclusion and well-being in the built environment and an ability to apply that understanding to the workplace and in social life.

The Design for Inclusion and Wellbeing certificate

Catalog Description

The Design for Inclusion and Wellbeing certificate affords students the opportunity to develop an integrative perspective of interdependent factors and conditions impacting inclusion, well-being, independence, and people-environment interactions. It provides tools and approaches to investigate lifespan accessibility, universal design inclusive practices, and material explorations as means to investigate opportunities for influencing built and social space for all.

The built environment significantly contributes to health, well-being, inclusion, independence, and resilience as evidenced by the increased importance of Social Determinants of Health (SDH) (WHO, USHHS), the 17 Sustainable Development Goals (SDGs), Independent Living Council and a diversity of indicators of economic outcomes and impacts. The International WELL Building Institute (IWBI) has formally adopted Universal Design (UD) principles into the new and improved WELL Building Standard version 2 (WELL v2).

Human beings spend more than 80-90% of their time indoors. We are becoming more aware and responsive to the built environment's impact on global warming and world resource depletion, as well as impacts on human health and well-being. We are also becoming more aware of social and environmental barriers in built spaces and places; for example, where one lives could be a significant predictor of life expectancy.

Awareness of environmental and social impacts and commitments to inclusion, independence, well-being, and regenerative practices results in increased use of these metrics across many industries, including healthcare, real estate development, insurance, city planning, economic development, and others. In this context, mindful awareness and purposeful engagement in an interdependent system that integrates social and environmental responsibility, health and well-being, inclusive design, and regenerative resilience in the built environment is key to enabling informed use of SDH, SDG, inclusive practice, and others in the diversity of settings. The Design for Inclusion and Wellbeing certificate affords students the opportunity to develop an awareness of; access to; and ability in:

- An integrative perspective of interdependent factors and conditions impacting inclusion, well-being, independence, and people-environment interactions.
- Tools and approaches to investigate lifespan accessibility,
- Universal design inclusive practices in businesses, institutions, and public environments,

- Tools and approaches to explore materials,
- The ability to investigate opportunities for influencing built and social space for all.

The curriculum for this certificate consists of 12 credit hours taken from four existing courses in the IAD curriculum that invest in developing capacity in a scaffolding, active learning approach.

IAD 151 (3 cr): Introduction to Interior Architecture and Design

Introduction to interior [Architecture &] Design theory and process. Explores transdisciplinary design issues and relationships; emphasis areas include basic design theories, vocabulary, and sustainability of the built environment. Attendance at outside events (such as lectures and symposiums) is required.”

This first-year course explores transdisciplinary design issues with a human-centered, emphatic, evidence-based, contextually rich approach. Students explore intersectionality, identity, technology, place, and responsibility toward a just and resilient environment. The foundational ethic of “do no harm” is embraced through contextualizing human-environment interactions, providing global examples, diverse worldviews, and processes. Lectures, projects, quizzes, exams, and assignments invest in building foundational curiosity, knowledge, ability, and reasoning.

IAD 368 (3 cr): Materials for Health and Sustainability (formerly: Interior Materials and Specifications)

In-depth study of interior materials and products; emphasis on sustainable design guidelines, building rating systems, and product certifications that support circularity, responsible consumption, and human and environmental well-being; overview of factors and considerations of material selection, including performance characteristics, installation methods, testing, codes, standards, specifications, professional liability,

indoor air quality, and life cycle costs. Field trips are required at student expense.

This course is anchored by an active learning philosophy, one that is timely, relevant, and applied. The students learn the content in three interrelated units: Investigate, Evaluate, and Integrate.

IAD 443 Universal Design (3 cr)--Gen Ed: American Diversity

Introduction to and application of universal design and accessible design concepts, principles, products, standards, laws, regulations, and guidelines to the design and adaptation of the built environment. Attendance at outside events (such as lectures, simulations, and completion of a service-learning component) is required. One and a half hours of lecture and 3 hours arranged per week.

Recommended Preparation: IAD 254 or ARCH 254

Permission is granted to students from diverse fields of experience and backgrounds who do not have the recommended preparation if they have other indicators of preparedness.

In this course, universal design is embraced as a sociological construct in the whole environment we live in, including physical, social, economic, and other mediating factors. Shifting the paradigm towards representation, equity, inclusion, and justice, the course moves beyond focusing on creating environments and products that are usable by all people— regardless of age, size, or ability. The course provides opportunities to apply this knowledge through hands-mutually beneficial service-learning partnerships.

IAD 400 (3 cr): SEM: Design for Well-Being

Investigation of the many ways in which the design of built environments impacts human health and well-being. Involves the study and understanding of the WELL Building Standard and what it takes to become a WELL Accredited Professional (WELL AP).

Other seminar offerings also include: “Informing Spatial Agency: Identity, Community, Place” as well as new topics to be developed that target this particular focus area of the certificate.

The IAD 400 Seminar is the capstone experience for this certificate. Students are required to complete a project and participate in the University of Idaho Undergraduate Research Expo.

Title

Update Regulation O-1

Request Details

Request updating regulation to consider undergrad students "full time" if they are carrying 6 or more credits during the summer session. This will allow international students to attend classes during the summer session. Also addressing summer credits for the College of Law and College of Graduate Studies. See attached document for more details.

Supporting Documents

O-1 Credit Requirements for Full-Time Students(4).docx

Key: 113

O-1. Credit Requirements for Full-Time Students

O-1-a. Full-Time Classification for ~~Non-Fee- Enrollment~~ Related Purposes

- ~~For purposes other than fees, U of I students in all divisions except the College of Graduate Studies and the College of Law Undergraduate and non-degree seeking students must carry 12 credits each semester or summer session and 6 credits during summer session to be classified as full-time.~~
- ~~Students in the College of Graduate Studies must carry 9-10 credits during each or semester and 6 credits during summer session to be classified as full-time.~~
- ~~Students in the College of Law must carry 10 credits during each semester and 5 credits during summer session to be classified as full-time.~~

~~Students interested in full-time status for tuition/fee related purposes should consult with the Student Accounts & Cashier's Office.~~

O-1-b. Full-Time Classification for Fee Related Purposes

~~For fee and tuition purposes only, students carrying ten or more credits (or equivalent in audits and zero-credit registrations) and all teaching/research assistants on full appointment, regardless of the number of credits they register for, are classified as full-time students.~~

O-1-c. Full-Time Classification for Graduate Students

~~Students in the College of Graduate Studies are considered full time when:~~

**Idaho State Board of Education
 GOVERNING POLICIES AND PROCEDURES**

SECTION: III. POSTSECONDARY AFFAIRS

SUBSECTION: Q. Admission Standards

[June 2021](#)[June 2024](#)

1. Institution Policies

Each postsecondary institution must establish institutional policies which meet or exceed the following minimum academic and career technical admission standards. Additional and more rigorous requirements also may be established by the institutions for admission to specific programs, departments, schools, or colleges. Consistent with institutional policies, admission decisions may be appealed by applicants to the institutional admissions committee. Career Technical Education program admission requirements apply to all technical colleges, including the College of Eastern Idaho, the College of Southern Idaho, the College of Western Idaho, Lewis-Clark State College, Idaho State University College of Technology, and North Idaho College.

2. Institutional Academic Program Admission

a. a. Direct Admission

Students attending an Idaho public school, or Idaho private school that has entered a Direct Admission participation agreement with the Board, may be notified of their admission to an Idaho public college or university through the State Board's Direct Admission Program. ~~Admission awarded through the program is contingent on the verified level of achievement in high school curriculum and successful completion of Idaho high school graduation requirements.~~ Direct admissions offers are based on the following criteria:

| <u>Verified Achievement</u> | <u>Institution Admission</u> |
|---|--|
| <u>ISAT Math level ≥3 and ELA/Literacy level ≥3</u> <u>OR</u> <u>Unweighted GPA = 3.0</u> | <u>Admission to all Idaho public institutions.</u> |
| <u>Unweighted GPA between 2.25 and 2.99</u> | <u>Admission to Idaho's public community colleges, Lewis-Clark State College and Idaho State University.</u> |
| <u>Unweighted GPA < 2.25</u> | <u>Admission to Idaho's public community colleges.</u> |

Admission awarded though the program is contingent on the verified level of achievement in high school curriculum (grade point average), performance on the

**INSTRUCTION, RESEARCH AND STUDENT AFFAIRS
APRIL 4, 2024**

ATTACHMENT 1

11th grade Idaho Standards Achievement Test (ISAT), and successful completion of Idaho high school graduation requirements. Direct admission decisions apply only to offers of admission to Idaho public institutions made between October 1 to June 30 of the senior year of high school.

a.b. Academic Program-Regular Admission

An applicant who is not admitted under the Board's Direct Admission Program must graduate from a high school accredited by a body recognized by the Board and complete the Admission Standards Core Courses with a minimum 2.00 cumulative grade point average. Cognia is the Board's recognized high school accrediting body. Applicants who graduated from high school prior to ~~1989-1995~~ will be subject to the admission standards at the time of their high school graduation. Each institution may develop a separate policy for the admissions and placement of international students.

Admission Standards Core Courses

| Subject Area | Minimum Requirement | Select from These Subject Areas |
|---|---------------------|---|
| Secondary Language Arts and Communication | 8 credits | Composition, Literature, and Oral Communication |
| Mathematics | 6 credits | <p>A minimum of six (6) credits. Secondary Mathematics includes Integrated Mathematics, Applied Mathematics, Business Mathematics, Algebra, Geometry, Trigonometry, Fundamentals of Calculus, Probability and Statistics, Discrete Mathematics, and courses in Mathematical Problem Solving and Quantitative Reasoning. A total of 8 credits are strongly recommended. Four (4) of the required mathematics credits must be taken after 9th grade.</p> <p>Courses not identified by traditional titles, (i.e., Algebra I or Geometry), may be used as long as they contain all of the critical components of higher math functions prescribed by the State Mathematics Content Standards.</p> <p>Institutions may recognize other Mathematics courses as meeting this requirement if those courses are taken in compliance with the Idaho state minimum graduation requirements.</p> |
| Social Studies | 5 credits | <p>American Government (state and local), Geography, U.S. History, and World History.</p> <p>Other courses may be selected from Economics, including Consumer Economics, if it aligns to the state content standards, Psychology, and Sociology.</p> |
| Science | 6 credits | <p>Secondary sciences include instruction in Applied Sciences, Earth and Space Sciences, Physical Sciences, and Life Sciences. A maximum of two (2) credits may be derived from career technical</p> |

**INSTRUCTION, RESEARCH AND STUDENT AFFAIRS
APRIL 4, 2024**

ATTACHMENT 1

| | | |
|---|-----------|---|
| | | <p>science courses when courses are aligned to state career technical content standards, and/or Applied Biology, and/or Applied Chemistry. (Maximum of two (2) credits).</p> <p>Institutions may recognize other Science courses as meeting this requirement if those courses are taken in compliance with the Idaho state minimum graduation requirements.</p> <p>Must have laboratory science experience in at least two (2) credits.</p> <p>A laboratory science course is defined as one in which at least one (1) class period per week is devoted to providing students with the opportunity to manipulate equipment, materials, or specimens; to develop skills in observation and analysis; and to discover, demonstrate, illustrate, or test scientific principles or concepts.</p> |
| Arts and Humanities (including world languages) | 2 credits | <p>Humanities courses include instruction in Visual Arts, Music, Theatre, Dance, or World Language aligned to the Idaho content standards for those subjects. Other courses such as Literature, History, Philosophy, Architecture, or Comparative World Religions may satisfy the humanities standards if the course is aligned to the Interdisciplinary Humanities Content Standards. History courses beyond those required for state high school graduation may be counted toward this category.</p> <p>World Language is strongly recommended. The Native American Languages may meet the world language credit requirement</p> |
| Other College Preparation | 3 credits | <p>Speech or Debate [no more than one (1) credit]. Debate must be taught by a certified teacher.</p> <p>Studio/Performing Arts (art, dance, drama, and music).</p> <p>Foreign Language (beyond any foreign language credit applied in the Humanities/Foreign Language category).</p> <p>Secondary Career Technical courses, (no more than two (2) credits) in Agricultural Science and Technology; Business Technology Education; Computer Science Technology; Engineering; Family and Consumer Sciences; Marketing Technology Education; Technology Education, and individualized occupational training.</p> |

If the student graduated from a high school that does not offer a required course, applicants may contact the institutional admission officer for clarification of provisional admission procedures.

High school credit counted in one (1) category (e.g., Humanities/World Languages) may not also count in another category.

cb. Academic Provisional Alternative Admission

- i. A d Degree-seeking applicants s who does not qualify for admission based on

**INSTRUCTION, RESEARCH AND STUDENT AFFAIRS
APRIL 4, 2024**

ATTACHMENT 1

subsection 42.ba. above, ~~but who may be granted alternative admission if they satisfies satisfy~~ one (1) or more of the criteria below, ~~may seek provisional admission by petitioning the institutional admissions officer:~~

- 1) Graduated from a secondary school accredited by a body recognized by the Board but has not completed the Admission Standards Core courses set forth above;
- 2) Did not graduate from a secondary school accredited by a body recognized by the Board, [e.g. including home-schooled students, and has acceptable performance on either the General Educational Development (GED) diploma holders], and have acceptable predictive indicators of academic success approved test or another standardized diagnostic test accepted by the institution;
- 3) Deserves consideration by the institution because of special status (e.g., ~~disadvantaged or minority students, delayed entry students,~~ returning veterans, ~~or~~ gifted and talented students wishing to enter college early, or other students in unique circumstances as determined by the institution). Each institution may develop a separate policy for the admission of special status students.

~~A student seeking provisional admission to any public postsecondary institution must take at least one (1) assessment indicator that will allow the institution to assess competency and placement.~~

- ~~ii. If provisionally admitted, a student will enroll with provisional standing and is subject to the institutional grade retention. Students granted alternative admission may have conditions placed on their admission, subject to institutional policies. A provisionally admitted student may change to regular admission status upon satisfactory completion of Students may be granted admission and be required to satisfactorily complete up to fourteen (14) baccalaureate level credits, twelve (12) of which must be general education courses credits. Regular admission status must be attained within three (3) registration periods or the student will be dismissed, subject to institutional committee appeal procedures.~~

de. Academic Transfer Admission

- i. A degree-seeking student who, after graduating from high school or earning a GED, has earned at least fourteen (14) or more semester hours of transferable academic college level credit from a regionally accredited college or university with a minimum cumulative GPA of 2.00 may be admitted.
- ii. A student not meeting the requirement in subsection 62.ba. may petition the

institutional admissions officer to be admitted. If admitted, the student ~~must enroll on probation status, meet all conditions imposed by the institutional admissions committee, and complete the first semester with a minimum 2.00 GPA, or may be dismissed.~~ may have conditions placed on their admission, subject to institutional policies as described in subsection 2.cb.ii.

d. Academic Program Placement

Placement assessment indicating potential for success may be required for some academic programs. Placement requirements vary according to the program. Each institution shall establish academic program placement policies and publish these policies in an accessible manner on the institution's website.

3. Career Technical Program Admissions

~~a. Admission Standards~~

~~Regular or Provisional Institutional academic~~ admission standards apply to individuals who seek a technical certificate or Associate of Applied Science (A.A.S.) degree through a career technical program. The admission standards and placement criteria do not apply to workforce development or short-term training programs. Career technical programs employ program admission and student advising/navigation processes in addition to institutional ~~program academic~~ admission.

~~b. Student Advising~~

- ~~i. Clarify the importance of career planning and preparation: high school students should be actively engaged in career planning prior to entering the 9th grade. Career planning assures that students have sufficient information about self and work requirements to adequately design an education program to reach their career goals.~~
- ~~ii. Emphasize that career technical courses in high school, including career technical advanced opportunities and work-based learning connected to school-based learning, are beneficial to students seeking continued education in career technical programs at the postsecondary level.~~
- ~~iii. Clarify the kind of educational preparation necessary to successfully enter and complete postsecondary studies. Mathematics and science are essential for successful performance in many career technical programs. Programs of a technical nature generally require greater preparation in applied mathematics and laboratory sciences.~~
- ~~iv. Clarify that career technical programs of one or two years in length may require additional time if applicants lack sufficient educational preparation.~~

~~c. Career Technical Program Regular Admission~~

~~Students desiring Regular Admission to any of Idaho's technical colleges must meet the following standards. Students planning to enroll in programs of a technical nature are also strongly encouraged to complete the recommended courses. Admission to a specific career technical program is based on the capacity of the program and specific academic and/or physical requirements established by the technical college/program.~~

~~i. Standards for students who graduated from high school in 1997 or earlier~~

- ~~1) High School diploma with a minimum 2.0 GPA⁴ from a high school accredited by a body recognized by the Board; and~~
- ~~2) Placement examination as determined by the institution. Scores may also be used to determine placement eligibility for specific career technical programs; and~~
- ~~3) Satisfactory completion of high school coursework that includes at least the following:
 - ~~a) Mathematics — 4 credits (6 credits recommended) from challenging math sequences of increasing rigor selected from courses such as Algebra I, Geometry, Applied Math I, II, and III, Algebra II, Trigonometry, Discrete Math, Statistics, and other higher-level math courses. Two (2) mathematics credits must be taken in the 11th or 12th grade. Less rigorous mathematics courses taken in grades 10-12 after 1998, such as pre-algebra, review mathematics, and remedial mathematics, shall not be counted.~~
 - ~~b) Science — 4 credits (6 credits recommended, with 4 credits in laboratory science) including at least 2 credits of laboratory science from challenging science courses including applied biology/chemistry, principles of technology (applied physics), anatomy, biology, earth science, geology, physiology, physical science, zoology, physics, chemistry, and agricultural science and technology courses (500 level and above).~~
 - ~~c) Secondary Language Arts and Communication — 8 credits. Applied English in the Workplace may be counted for English credit.~~
 - ~~d) Other — Career technical courses, including postsecondary credits~~~~

⁴An institution may substitute a composite index placement exam score and high school GPA for the GPA admission requirement.

~~earned pursuant to Board Policy III.Y. Advanced Opportunities and organized work-based learning experiences connected to the school-based curriculum, are strongly recommended. High School Work Release time not connected to the school-based curriculum will not be considered.~~

~~ii. Standards for Others Seeking Regular Career Technical Program Admission~~

~~Individuals who graduated from high school, received their GED prior to 1997, or who are at least 21 years old and who desire Regular Admission to the technical colleges must have a:~~

- ~~1) High School diploma with a minimum 2.0 GPA from a high school accredited by a body recognized by the Board; or~~
- ~~2) General Educational Development (GED) certificate; and~~
- ~~3) Diagnostic/placement tests as determined by the institution. Scores may also be used to determine admission eligibility for specific career technical programs.~~

~~d. Career Technical Program Provisional Admission~~

~~Students who do not meet all requirements for Regular Admission may apply to a technical program under provisional admission. Provisionally admitted students who are conditionally admitted must complete appropriate remedial, general and/or technical education coursework related to the career technical program for which Regular Admission status is desired, and to demonstrate competence with respect to that program through methods and procedures established by the technical college. Students desiring Provisional Admission must meet the following standards:~~

- ~~i. High School diploma or GED certificate; and~~
- ~~ii. diagnostic/placement tests as determined by the institution. Scores may also be used to determine placement eligibility for specific career technical programs.~~
- ~~iii. Institutions may allow individuals who do not have a high school diploma or GED to be admitted if the applicant can demonstrate the necessary ability to succeed in a career technical program through appropriate tests or experiences as determined by the institution.~~

~~ea. Career Technical Program Placement Criteria~~

Placement test scores indicating potential for success ~~are generally~~ may be required for enrollment in a career technical program of choice. Placement score requirements vary according to the program.

Each institution shall establish career technical program placement policies and publish these policies in an accessible manner on the institution's website.

Specific career technical programs may require different levels of academic competency and admission requirements. Students must also be familiar with the demands of a particular occupation and how that occupation matches individual career interests and goals. Therefore, before students can enroll in a specific program, the following placement requirements must be satisfied:

- i. Specific program requirements (including placement exam scores) established by the technical program. A student who does not meet the established requirements for the program of choice will have the opportunity to participate in remedial education to improve their skills; and
- ii. Formal procedures and definitions for program admission employed by the technical college. Program admission requirements and procedures shall be clearly defined and published for each program.

2023 – 2024 Faculty Senate – Pending ApprovalMeeting # 28

Tuesday, April 9, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, , Thaxton, Tibbals.

Absent: Strickland (excused), Roberson, Miller, McKenna

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #27, April 2, 2024, were approved as distributed.

Chair's Report:

- Teresa Amos (OIT) provided answers to the questions compiled by Faculty Senate. Teresa Amos, IT Committee Chair Darryl Woolley and Faculty Senate Chair Gauthier will meet tomorrow. We are happy to have found a common ground for constructive conversations about OIT issues.

Provost's Report, delivered by Vice Provost Diane Kelly-Rily:

- On April 4, we all received a memo from President Green and Provost Lawrence about updating our strategic plan. We seek nominations for the working group. The nomination form is at https://uidaho.co1.qualtrics.com/jfe/form/SV_ONGjSqpS9N1zTPo A strategic plan town hall will be announced in early fall.
- Long-Range Campus Development Plan. Feedback on campus visioning is encouraged. <http://www.uidaho.edu/vision2050> . Please share this information with your colleagues. You can be entered in a raffle for a \$50 vandal gift card.
- Graduation is only a month away. There will be two ceremonies. Please attend and encourage your colleagues to attend. Idaho author Anthony Doerr, author of the Pulitzer prize-winning novel "All the light we cannot see," will be the commencement speaker at both ceremonies.

Discussion:

Vice Chair Haltinner emphasized the importance of working with the Campus Planning Advisory Committee and Instructional Space Committee. These are university-level senate committees who are seeking opportunities to provide more input.

A senator wondered about the recent news that a consultant was hired. They argue that planning future campus developments should be an opportunity for faculty, staff and administrators to come together in shared governance. Vice Provost Kelly-Riley noted that everyone is welcome to participate and provide meaningful input.

Chair Gauthier asked about updates from the University of Phoenix task force in view of what is happening. At this point, Provost Lawrence joined the meeting. He replied that there are no updates. President Green continues to work on a solution.

Vice Chair Haltinner suggested to include Sarah Dawson, Sustainability Director, in campus planning activities. She may bring useful insight with, for instance, infrastructure updates to be more energy efficient.

Faculty Secretary: Last week, Senate approved revised FSH 3120 Faculty Obligations During Period of

Appointment. There was some discussion about summer appointments not counting toward P&T. FAC was made aware of these concerns and reconsidered that point yesterday. They noticed there is a mistake: It's not for this policy to inform on what does or does not count for P&T. As approved last week, FSH 3120 is in conflict with P&T policies, which refer to the PD for P&T required material. More next week. The Vice Provost confirmed. It's a significant enough change to warrant reconsideration.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 4120 Catalog Change Procedures – Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences, Attach. #2.
Revisions are proposed to include “university-wide interdisciplinary committees” as bodies with authority to initiate and submit curriculum changes to UCC (in addition to units and colleges) for programs that involve multiple colleges. This is necessary for logical and proper faculty control and maintenance of curriculum for interdisciplinary programs delivered by faculty across many colleges. Faculty Senate will be the “gatekeeper” for the establishment and oversight of committees empowered by this addition to the language of FSH 4120. Because university-wide programs are relatively rare, similar requests for the creation of other interdisciplinary curriculum committees will likely be rare as well for the foreseeable future. The proposed additions have been reviewed and contributed to by the policy owner (UI Registrar).
FSH 4120 and FSH 1640.93 will be considered together.
 - FSH 1640.93 University Committee for Academic Certificates in Sustainability –Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences, Attach. #3.
In September 2023, the Faculty Senate approved the creation of an Ad-Hoc University-wide Faculty Committee for the Undergraduate Academic Certificate in Sustainability. The purpose of that committee was to serve as the curriculum body for developing the initial curriculum for the university-wide certificate, including the solicitation/review of courses and submission of the proposed curriculum to UCC. The curriculum includes courses from nine colleges. Now that the certificate has been fully approved and students will be able to enroll starting in July 2024, we are requesting that a standing committee be created to maintain, review and assess the university wide undergraduate certificate. The proposed language does refer to the possibility of the standing committee creating another certificate, because there have been requests to develop a similar university-wide certificate at the graduate level.
There were no questions.
Vote: 20/21 yes; 1/21 no. Motion passes.
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances, Attach. #4.
No presenter available. No action taken. [It was discovered that Ms. Holmes was not notified that this policy was to be discussed at this meeting, nor was she sent a meeting invite. This policy will be presented at the next meeting and Ms. Holmes invited to attend.]
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources, Attach. #5.
Per request from Payroll, they are deleting FSH 3490 and move the appropriate information to APM 55.05. Income Tax withholding and W-2 form requirements are not U of I policy.

Discussion:

There were questions about the reasons for this change. Some senators expressed concerns with the move to APM because APM is not reviewable by Faculty Senate. Motion (Mittelsteadt, Murphy): Send the policy back to HR with the request to have all relevant content in FSH rather than in APM. Vote: 17/18 yes; 1/18 no. Motion passes.

• Proposed changes to the University Catalog (voting)

- UCC 547 Doctorate in Anatomical Sciences – David Pfeiffer, Medical Education Program (WWAMI), Attach. #6.

They are developing a new school of health and medical professions which will house multiple new graduate and professional degree programs, including doctorate in clinical psychology, graduate program in gerontology, two new nursing programs, a PA program, all of which are geared towards meeting the increasing health needs across the State of Idaho. Today, we are proposing an additional program, the doctorate of Anatomical Sciences or DAS program. The focus of this program is to help meet the increasing shortage of highly trained anatomists who are qualified to teach in healthcare and health science programs within Idaho. Across the country, there's an increasing shortage of well-trained anatomists or classically trained anatomists.

Discussion:

Vice Chair Haltinner asked how all the new medical programs being developed will be staffed. David Pfeiffer replied that staffing will be accomplished partially with new hires and partially with existing faculty.

Vote: 20/20 yes. Motion passes.

- UCC 531 Child Feeding Undergraduate Academic Certificate – Trevor White, Family and Consumer Sciences, Attach. #7.

We are proposing an academic certificate called child feeding for those professionals who are currently working in fields such as childcare provider dietitians, therapists, things of that nature to give them a 13 credit kind of experience in nutrition, meal management, and child development.

Discussion:

A senator pointed out the omission of some standardized text that should be included for all certificates and proposes a friendly amendment: *At the beginning of the curricular requirements, include the language "All required coursework must be completed with a grade of 'C' or better, per regulation O-10-a."*

Vote on motion with friendly amendment: 19/19 yes. Motion passes.

• Proposed Changes to the Administrative Procedures Manual (non-voting)

- APM 50.14 Name, Social Security Number and Address Changes – Brandi Terwilliger, Director of Human Resources, Attach. #8.

Updated to reflect correct processes.

Discussion:

There was a brief exchange on consistency of capitalization everywhere.

- APM 50.08 Evaluations for Classified and Exempt Staff – Brandi Terwilliger, Director of Human Resources, Attach. #9.

Revision to provide updated terminology and procedures.

There were no questions.

- **Announcements and Communications**

- Open Discussion on Admission Standards – Jean-Marc Gauthier, Chair of Faculty Senate. Steve Shook, representing UCC, gave a short summary of the meeting of OSBE representatives with UCC and Faculty Senate. He then presented the new UCC admission criteria recommendations, approved at their last meeting the day before. The members of FSL thanked UCC members for their thorough work and thoughtful approach. One of the elements in the decision is the direct admission process, where the State sends a letter to students who meet certain performance metrics to let them know they have been admitted into a set of public universities in Idaho. Another aspect UCC discussed is how to handle the students who are presently in the Vandal Gateway pilot program in the context of new admissions standards. They were provided data on the ISAT from OSBE staff representatives. Initially, UCC did not include the ISAT as part of their considerations because they had not seen data. The final document from UCC will go out next week ready to move forward.

Steve went over the draft:

1. Students with a high school GPA of ≥ 3.0 or ISAT Math level ≥ 3 and ELA/Literacy level ≥ 3 will be directly admitted.
2. Students with a high school GPA of 2.60-2.99 will require a minimum 740 SAT Verbal + Math or 15 ACT scores:
 - The 740 SAT Verbal + Math and 15 ACT thresholds are the same as the 2019 admissions standards.
 - Students with < 740 SAT Verbal + Math or < 15 ACT (or no SAT/ACT scores) can appeal through the Admissions Committee.
3. Students with a high school GPA of 2.30-2.59 will be admitted to the Vandal Gateway Program.
4. Students with a high school GPA of < 2.30 can appeal to the Admissions Committee.

All 4 points above were voted on and unanimously approved by UCC. Students with HS GPA of 2.3 to 2.59 would be admitted to the Vandal Gateway pilot program, while students with HS GPA of 2.3 or lower would appeal to the Admissions Committee. This is a very small number of applicants. The final document from UCC will include rationale for those choices.

Discussion:

A senator noted that a student could be in both categories 1 and 2. If they have the appropriate ISAT scores, they would fall in category 1, but they could also be in category 2 if their GPA is less than 3. Steve concurred, but noted that the top standard is for direct admission only. Those students get a letter from the State Board informing them that they have been directly admitted into the University of Idaho. The Admissions office would automatically admit them. The senator remained confused and wondered whether some clarification should be included in category 2. Provost Lawrence joined the conversation. He suggested that the issue raised by the senator can be easily addressed in the redline document, by clarifying that an Idaho student who has a 3 and 3 is admitted regardless SAT score or GPA. Steve confirmed that this was the intent of UCC. A senator inquired about the 740 (total) score for the SAT. He did some research and learned that the benchmark for considering a student to be college ready is 1010, quite far from 740. Steve recalled this being discussed at UCC meetings. Eventually, they decided to use the previous standard largely because GPA is statistically a better measure of student performance than the SAT score or standardized test scores, as mentioned yesterday by State Board

representatives. The senator reiterated that the benchmark given by the college board is 480 in reading and writing, and 530 in math, while we're asking for a 740 total. That's 250 points less. Perhaps some things may be tweaked in the future, if they're not working well, especially on the retention side. Retention numbers for lower GPA suggest that low GPAs are the main concern on the retention side.

It was argued that we send to the Appeals Committee students with higher GPA than those in the 2.3 to 2.59 group without test scores that go directly to VGP, which seems unfair. The appeal process is cumbersome. At the same time, there are concerns about changing the standards for VGP, which would invalidate the pilot data.

The Provost reported that 50 to 100 students could be impacted by this "double standard." If those students were allowed to go into VGP, we track them as a separate cohort for data purposes. They would get extra support. The Provost will make sure that the VGP team is part of the conversation.

A senator suggested that UI encourages students to submit test scores, even if not required. Provost Lawrence responded that we currently do that. Submitting test scores is highly encouraged, and they are also used for placement. However, OSBE staff shared that the number of students taking the SAT is declining in the state because it's no longer required. Many of the school districts still do it. Also, the SAT contract with the State runs out in one or two years. So, we will see continued decline.

There seems to be some general agreement that, from a statistical point of view, it'd be nice to control for GPA and be able to look at test scores. It may also help to make the appeal process less cumbersome. Are those letters and essays actually useful in evaluating whether or not a student with low GPA can succeed in college? Vice Chair Haltinner displayed a plot of retention rates by GPA. For the 2.6 to 2.99 group, the retention rate 58%. Provost Lawrence noticed that it's not different from the lowest group. Vice Chair Haltinner added that GPAs of 0.0 (not included in the plot) are assigned to home schooled students and those from unaccredited schools. Those people are reviewed by the Admissions Committee, regardless.

- Dependents Benefit Task Force Update – Kristin Haltinner.

At the beginning of the fall semester, we created a task force to look at the possibility of expanding the dependent benefit at the University of Idaho. The members are Charles Tibbals, Rebecca Latshaw from staff affairs, Lyudmyla Baranyk, and me. Brief overview of UI's current policy: We have a 50% tuition rate for eligible dependents of employees – people that you can claim as dependents on your taxes. Only one dependent per household per semester can access that benefit. The benefit does not extend to eligible dependents of retired employees or deceased employees. Kristin proceeded to show data provided by HR about the use of the benefit. At most, 37% of the people who are eligible are using it. Note that this is just an estimate, because the information that can be accessed is limited.

Other universities: Washington State offers free tuition up to 6 credits, with no limit on the number of children who can access it at a time. Idaho State offers 50% tuition for dependents, only one at a time, not transferable to other institutions, like us. Boise State provides employees with free tuition for dependents under 26. The benefit can be extended to other State institutions, and only one child can use it at a time. The task force only looked at public schools because of constraints from operating within a State, and found a huge range in what different institutions were doing. Every state, except for Idaho, allows multiple dependents to access the benefit concurrently. Arizona State University provides this benefit to eligible dependents of people who are retired (after serving at least 5 years) or have passed. The task force wishes to pursue the extension of the dependent tuition benefit to allow multiple dependents to access it

concurrently. We also want to include retirees with eligible dependents and the families of deceased employees. We have no way of knowing with certainty how much this would cost. We are scheduled to talk to President Green about this next week. Once we figure out what we need to do to make this happen, we hope to bring a formal proposal to Faculty Senate to consider based on feedback from President Green. We welcome your feedback.

Discussion:

There was some discussion on the definition of “retiree.” Diane Whitney placed the relevant FSH article in the chat, FSH 3730 C.

There were some questions about the process. The task force tried to assess what other universities are doing. We worked with Brian Foisy, and we are meeting with President Green to make sure this is even possible. From there, we'll work out details and then come to Faculty Senate. It will not be this year.

New Business:

- A senator conveyed a message from a constituent. He is very concerned with the way that we're messaging FSH changes. After a UFM, there is a communication listing the approved policies, but people are not able to actually go see a redline of what those changes are. So they have to do it on their own, and it's a very difficult process for people who aren't on Faculty Senate to understand what changes were approved on an ongoing basis. So his request was simply whether we could get come up with a better process for messaging all the changes that happen every year.

Secretary: The UFM binder contains all the redlines and supporting material. The “Policy Reports” sent out by the Secretary are a notification of approved or disapproved policies, with links to the corresponding item in the binder. The binder is available to all.

A senator inquired about APM vs. FSH. Who decides what ends up in one or the other? think Response: Diane Whitney met with FSL in November to talk about this exact issue. We have a folder in teams that has a list of every policy owner. The goal is for us to go through every single policy and think about who else, besides the current owner of that policy, needs to be involved in changes to that policy. It is a lengthy and complicated process. Part of it is to look at what other institutions are doing. This is a huge project that next year Senate really needs to dive into as a priority. Shared governance is about making sure that people who need to be involved in decisions are involved in those decisions. This doesn't solve the broader issue raised by the senator, but we have started the process toward more transparency.

Diane Whitney: We've discussed this at length with leadership. Despite what you might think from the name, FSH doesn't only apply to faculty and staff. We have chapters in there that do deal with some administrative matters, and also an entire chapter dealing with student issues, and despite the name of the APM, it has always contained policies and procedures. The difference is that APM contains items that only pertain to the administrative units of the University, like facilities, auxiliary services, public safety and security, etc. and FSH is kind of a mismatch, because we do have the whole employment Chapter 3, that has a lot of HR policies in there. How the decision was made to put those in the FSH is lost to history. Currently, when something fits in with the FSH, that's where it goes, and if it's an administrative unit item that already exists in the APM, that's where it goes. I can assure you I have never been part of a conversation where there was an attempt to hide something in the APM opposed to the FSH. All FSH and APM items have always come to Senate and they are always presented for a review. Under the existing Policy on Policies FSH 1460, only FSH items go to Faculty Senate for vote.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 5:01pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #28

Tuesday, April 9, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #27 April 2, 2024 **Attach. #1**
- III. Chair's Report
- IV. Provost's Report
- V. Committee Reports (voting)
 - Proposed changes to the Faculty Staff Handbook
 - FSH 4120 Catalog Change Procedures – Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences **Attach. #2**
 - FSH 1640.93 University Committee for Academic Certificates in Sustainability – Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences **Attach. #3**
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances **Attach. #4**
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources **Attach. #5**
 - Proposed changes to the University Catalog (voting)
 - UCC 547 Doctorate in Anatomical Sciences – Whitney Vincent, Medical Education Program (WWAMI) **Attach. #6**
 - UCC 531 Child Feeding Undergraduate Academic Certificate – Trevor White, Family and Consumer Sciences **Attach. #7**
 - Proposed Changes to the Administrative Procedures Manual (non-voting)
 - APM 50.14 Name, Social Security Number and Address Changes – Brandi Terwilliger, Director of Human Resources **Attach. #8**
 - APM 50.08 Evaluations for Classified and Exempt Staff – Brandi Terwilliger, Director of Human Resources **Attach. #9**
- VI. Announcements and Communications
 - Open Discussion on Admission Standards – Jean-Marc Gauthier, Chair of Faculty Senate, David Paul, Chair of the University Curriculum Committee
 - Dependents Benefit Task Force Update – Kristin Haltinner, Vice Chair Faculty Senate
- VII. New Business
- VIII. Adjournment

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 27

Tuesday, April 2, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Roberson, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, Strickland, Thaxton, Tibbals.

Absent: Blevins, Miller, Mischel.

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #26, March 26, 2024, were approved as distributed.

Chair’s Report:

- Important reminder: Senators whose terms end in 2023-24 should ask their units/colleges to conduct elections for AY 24-25 Senate seats. Nominations and elections of officers will take place on 4/23/2024 and 4/30/2024, respectively.
- Artificial Intelligence.
 - The AI steering Team is planning to organize a symposium in the Fall.
 - The AI and Machine Learning Task Force is focusing on AI literacy. They launched an exhibition this week presented in the ISUB.
 - The AI Working Group is proposing new courses which include a 200-level course, “AI for All of Us”, PHIL 361 (a course about AI ethics), and a 400 level Computer Science course.
 - Some ideas shared among the groups: AI is present in all domains of activity and grows at a speed never seen before, AI’s impact on society can be compared to the impact of the internet 25 years ago. AI is mainly driven by the technology industry – hardware and software – and not by traditional academic research.

Provost’s Report:

- Vandal Giving Day is today and goes on for 1,189 minutes (about 20 hours). For more information, visit <https://vandalsgive.uidaho.edu/giving-day/80574>.
- Dr. Patrice Buckner Jackson’s workshop: “Disrupting Burnout,” is tomorrow at 1:30-3:00 pm, Whitewater/Clearwater, ISUB. <https://uidaho.edu/events?trumbaEmbed=view%3Devent%26eventid%3D173916644>.
- University of Phoenix: The legislative solution proposed by the Senate to address some of the concerns from the House failed on the floor last week. As President Green communicated on Friday, they are looking at options.
- Updates on legislation impacting U of I will be communicated soon.

Discussion:

A senator asked about the costs already incurred towards the Phoenix transaction, about \$11M, if the deal falls through. Provost Lawrence said that those costs have been paid as negotiations moved along, through reserves. If the transaction does not close and costs are not reimbursed, it will take

longer to reach the State Board reserve requirements. The Provost reiterated that they are still trying to find a path. The Phoenix affiliation is not a closed matter.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 3440 Compensation of Classified Employees – Brandi Terwilliger, Director of Human Resources, Attach. #2.
With the establishment of a market-based compensation system, this revision is necessary to replace the previous language based on the previous pay grade system. The primary compensation principles remain unchanged.
Discussion:
In response to a question, Brandi said that the revised policy has already gone through Staff Council.
Vote: 21/22 yes; 1/22 no. Motion passes.
 - FSH 3420 Faculty Salaries – Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #3, to be voted together with FSH 4620 Academic Calendars, Attach. #5.
FSH 3420 Section E, detailing period of obligation and payroll schedule, has been added to align with the deferred pay scheme.
No questions.
Vote: 21/21 yes. Motion passes.
 - FSH 3120 Faculty Obligations During Period of Appointment – Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #4.
Section D-2 has been revised to clarify work and pay schedule for academic year appointments. Sections D-4 has been expanded and revised to clarify summer session obligations of faculty with academic year appointments. Summer contracts can only be issued if the work is for 10 hours or more. The committee wanted to codify that AY faculty asked to do at least 10 h work in the summer need to get a contract for it.
Discussion:
Senators noted that some university-level committees meet during the summer. Will this revised policy impact their ability to hold hearings during the summer, and potentially the make-up of those committees? Alistair explained that the spirit of the revisions is to codify what's required and what's optional. People can still volunteer to work without compensation for more than 10 hours.
The discussion moved to summer teaching appointments, in particular the statement that those "...do not count toward promotion and tenure considerations." Some senators argued that most faculty do research over the summer, which is recognized at P&T – why not teaching? Different points of view were advanced, such as that summer teaching is entirely optional, and only what's in the faculty's PD is considered towards P&T. Alistair noted that the statement under discussion was there prior to FAC's revisions and was not one of the committee's major concerns. Perhaps this is something to reconsider later.
Vote: 18/19 yes; 1/19 no. Motion passes.
- Proposed changes to the University Catalog (voting)
 - UCC 536 Bioinformatics – Tanya Miura, College of Sciences Attach. #6.

We are proposing to add a BS degree in Bioinformatics to complement existing degrees in Biological Sciences at U of I (Biology, Biochemistry, Microbiology, Medical Sciences). This addition will give students the opportunity for coursework and training relevant to modern fields and careers in biology and medicine. The university has a wealth of world-class faculty with expertise in bioinformatics, especially in evolutionary and computational biology, that will contribute courses to the degree. U of I has excellent MS and PhD programs in Bioinformatics and Computational Biology (BCB) and is developing a non-thesis MS program in BCB. A BS degree in bioinformatics will prepare students well for these graduate programs and will serve as a foundation for a future 4 +1 MS degree in BCB. The BCB graduate programs are housed in the College of Science, and most faculty participants in BCB are faculty in the Department of Biological Sciences, thus we have unparalleled expertise to offer a rigorous bachelor's degree in bioinformatics. The curriculum consists of courses offered in Biological Sciences, Mathematics and Statistical Sciences, and Computer Science at U of I, thus will minimally affect current faculty workloads. The degree will be administered by the Department of Biological Sciences, which has adequate staff to support the degree program and additional students.

Discussion:

There was a brief discussion to clarify how the total number of credits for both of the proposed four-year plans added up to 120. The plan that doesn't require ENG 101 and MATH 143 has more electives.

Vote: 19/19 yes. Motion passes.

- UCC 541 Design for Inclusion and Well-Being Undergraduate Academic Certificate - Rula Awwad-Rafferty, C Chair of Design and Environments Department and professor of Interior Architecture & Design. Attach. #7

The Department of Design and Environments-Interior Architecture & Design program at the University of Idaho proposes to offer an academic certificate in "Design for Inclusion and Wellbeing." The certificate program provides an avenue for students, professionals, and community members to obtain relevant, university-centered training and learning through classroom, workshop, lectures, site visits, and service-learning formats related to access and inclusion, wellbeing, sustainability, and resilience, and capacity building in the built environment. The program requires the completion of 12 credits of study; courses are already part of the BIAD degree, focusing on academic explorations in foundational and advanced topics in social and environmental responsibility, access and inclusion- universal design, materials, and specification, well standards, spatial agency, and area of hands-on application. The courses provide both an academic exploration component and an application component. The participants conclude in the seminar course with a research project they tailor to their specific field of study or interest in relation to the design for inclusion and well-being while acquiring skills and knowledge applicable to any workplace environment. The participants enter their research projects at the University of Idaho Undergraduate Research Expo, culminating in their on-campus capacity building and certificate work. The certificate acknowledges competency in understanding a broad range of diverse social and environmental issues that facilitate and impact inclusion and wellbeing in the built environment and an ability to apply that understanding to the workplace and in social life.

There were no questions.

Vote: 17/18 yes; 1/18 no. Motion passes.

- UCC 113 Update Regulation O-1 – Dean Kahler Vice Provost for Strategic Enrollment Management, Jerry McMurtry, Dean, College of Graduate Studies Attach. #8
Request updating regulation to consider undergrad students "full time" if they are carrying 6 or more credits during the summer session. This will allow international students to attend classes during the summer session. Also addressing summer credits for the College of Law and College of Graduate Studies.
Discussion:
A few questions followed. Jerry clarified that these revisions do not impact financial aid. They have been worked out with the Registrar and IPO. This policy will benefit programs that prefer to have their students come in the summer and start some field work/research.
Vote: 18/18 yes. Motion passes.

- UCC 112 O-10-b Regulation Edit for College of Law Certificates – David Pimentel, College of Law. Attach. #9
This catalog regulation language edit (see attached document for details) clarifies the grade policy for graduate law certificates.
There were no questions.
Vote: 19/19 yes. Motion passes.

- Admission Standards – Jean-Marc Gauthier, Faculty Senate Chair
Chair Gauthier summarized the current status and opened the floor for discussion.
Discussion:
Financial impact projections requested by a senator last week are not available. Dean Kahler needs to review the data from Wes McClintick, but he is traveling. The UCC analysis, supported by IR and Wes, showed minimal to no impact on enrollment. Provost Lawrence pointed to the draft of a State Board policy in attachment #10, in particular section **2.a**. Direct Admission. The other seven institutions in the state support the draft. The State Board is not open to another level of standards for direct admission and, therefore, if section **2.a** passes, these will be the state minimums for direct admission that we must meet or exceed. We should know more on Thursday, after the meeting of the IRSA subcommittee. SBOE staff have offered to give a presentation on the ISAT, which would be of interest to Faculty Senate and UCC. Along with the admission criteria, we need to consider VGP, because, depending on how we move forward, that program may be impacted. We should ask UCC to include VGP in their recommendation to Faculty Senate.
Motion (Mittelsteadt, Tibbals) to:
 - Return the item to UCC for reconsideration due to new information from SBOE.
 - Ask UCC to provide a proposed redline document for the catalog change.
 - Provide the rationale concerning how they came to their recommendation.
 - Ask UCC to make a recommendation about VGP admission criteria.Vote: 18/18 yes. Motion passes.

Announcements and Communications:

- Distinguished Scholarships Program (DSP) – Dilshani Sarathchandra, Associate Professor of Sociology and Sandra Reineke, Associate Professor of Political Science.

Sandra introduced the DSP, which is housed in the U of I Honors program. The DSP primarily covers undergraduate opportunities, except that they also sometimes advise students about the National Science Foundation Graduate Research Fellowship program. At many universities, similar programs are referred to as nationally competitive scholarships. Distinguished scholarships are mostly opportunities for UG students to apply for scholarships and fellowships, including undergraduate research opportunities. The funds for those experiences come from various sources, such as federal agencies or private donors. It's open to any U of I student. Eligibility requirements and the amount of money that students receive vary across programs. Oftentimes, programs also require endorsement of an applicant. Sandra presented a selection of the awards over the last five years received by University Idaho students. DSP services include recruiting prospective students to the to the University of Idaho, delivery of information for students who are here, mentoring the students who are applying and assisting them with their application process, and the promotion and publicizing of the awardees. DSP promotes participation in high impact practices. Many selective institutions participate in this. Students also go abroad and, thus, gain international experience and network with future leaders of the country globally and internationally. It's a huge recognition, and the process is highly competitive.

Contact: dsp@uidaho.edu ; www.uidaho.edu/academics/honors/scholarships

For more information, see the presentation slides attached to these minutes.

Adjournment:

The agenda not being completed, the Chair entertained a motion to adjourn. So moved (Tibbals, Mittelsteadt). The meeting was adjourned at 5:03pm.

Respectfully Submitted,

Francesca Sammaruca
Secretary of the University Faculty & Secretary to Faculty Senate

POLICY COVER SHEET

For instructions on policy creation and change, please see <https://www.uidaho.edu/governance/policy>

All policies must be reviewed, approved, and returned by the policy sponsor, with a cover sheet attached, to ui-policy@uidaho.edu.

Policy sponsor, if different from originator: Torrey Lawrence, Provost

Reviewed by General Counsel: __Yes __x_No Name & Date:

Comprehensive review? __Yes __X No

1. Policy/Procedure Statement: Briefly explain the reason for the proposed change.

Revision is proposed to include “university-wide interdisciplinary committees” as bodies with authority to initiate and submit curriculum changes to UCC (in addition to units and colleges) for programs that involve multiple colleges. This is necessary for logical and proper faculty control and maintenance of curriculum for interdisciplinary programs delivered by faculty across many colleges. Faculty Senate will be the “gatekeeper” for the establishment and oversight of committees empowered by this addition to the language of FSH 4120. Because university-wide programs are relatively rare, similar requests for the creation of other interdisciplinary curriculum committees will likely be rare as well for the foreseeable future. The proposed additions have been reviewed and contributed to by the policy owner (UI Registrar).

2. Fiscal Impact: What fiscal impact, if any, will this change have? None

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

No other policies are impacted, however, the University Committee for General Education has always acted as the defacto curriculum body for general education and this addition to 4120 would codify that authority more clearly as well.

In a companion request, the the Ad-Hoc University-wide Faculty Committee for the Academic Certificate in Sustainability is also proposing changes to FSH 1640 to create and

describe a standing committee to initiate and maintain catalog changes for the Sustainability Certificate.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

4120 - Catalog Change Procedures

Last updated: July 2022

A. PURPOSE. The purpose of this policy is to provide for appropriate faculty review of catalog changes and to provide for timely processing of those changes so that students have access to accurate catalog information regarding curricular requirements and course offerings.

B. SCOPE. This policy applies to all faculty at the University of Idaho.

C. DEFINITIONS:

C-1. Routine curricular changes. Changes identified as [Group A changes](#) by the University Curriculum Committee.

C-2. Substantive curricular changes. Changes identified as [Group B and C changes](#) by the University Curriculum Committee.

C-3. UCC. University Curriculum Committee.

D. POLICY. Catalog changes shall be processed with appropriate faculty review in a timely manner in order to provide students with accurate catalog information regarding curricular requirements and course offerings.

E. PROCEDURE.

E-1. Routine curricular changes:

a. Each routine curricular change proposal shall be submitted to the relevant unit and college for approval following all notice and approval procedure contained in unit or college bylaws. For inter-college interdisciplinary programs, the proposal shall be submitted to the appropriate university-level interdisciplinary committee for approval following the committee's curricular approval procedures.

b. Following ~~unit and college~~ approval by the unit and college or by the interdisciplinary committee, the college or committee shall submit the proposal for review to the UCC. The UCC Secretary will distribute a list of all proposed curricular changes to all university faculty members at least 48 hours before each meeting.

c. If approved by the UCC, the UCC Secretary shall send the proposal to the Office of the Registrar for implementation after a waiting period of at least seven days, provided that the UCC Secretary has not received a valid petition signed by at least five faculty members requesting Faculty Senate review.

di. If the UCC Secretary ~~timely~~ receives a valid petition as described in E-1.c. by the established deadline, the UCC Secretary shall refer the proposal to Faculty Senate for review, except that a petition concerning courses or curricula in the College of Letters, Arts, and Social Sciences signed by

five members of the college faculty shall be returned to the college for further consideration rather than being sent to Faculty Senate.

eii. If approved by Faculty Senate, the proposal will be forwarded to the provost for final approval. If disapproved by Faculty Senate or the provost, the proposal will be sent back to the [unit proposal originator](#) for further consideration.

iiif. The Faculty Secretary shall forward all routine curricular changes approved by the provost to the Office of the Registrar for implementation.

E-2. Substantive curricular changes.

a. Each substantive curricular change proposal shall be submitted to the relevant unit and college for approval, following all notice and approval procedure contained in unit or college bylaws. For inter-college interdisciplinary programs, the proposal shall be submitted to the appropriate university-level interdisciplinary committee for approval following the committee's curricular approval procedures.

b. Following ~~unit and college~~ approval by the unit and college or by the committee, the college or committee shall submit the proposal for review by all appropriate committees. Following such review, the college or committee shall submit the proposal to the provost for approval. The provost shall submit approved proposals to the UCC and return disapproved proposals to the [unit proposal originator](#) for further consideration.

c. The UCC Secretary shall distribute a list of all substantive curricular change proposals to all university faculty at least 48 hours prior to each meeting.

d. If approved by the UCC, the UCC Secretary shall forward the proposal to Faculty Senate for approval.

e. If approved by the Faculty Senate, the Faculty Secretary shall send the proposal to the provost for final approval after a waiting period of at least seven days, provided that the Faculty Secretary has not received a valid petition signed by at least 10 faculty members requesting review at a meeting of the university faculty.

if. If the Faculty Secretary ~~timely~~ receives a valid petition as described in E-2.e. by the established deadline, the Faculty Secretary shall place the proposal on the agenda of the next university faculty meeting, except that a petition concerning courses or curricula in the College of Letters, Arts, and Social Sciences signed by five members of the college faculty shall be returned to the college for further consideration rather than being sent to the university faculty meeting.

gii. If approved by university faculty, the proposal will be forwarded to the provost for final approval and implementation. If disapproved by university faculty or the provost, the proposal will be sent back to the unit or committee for further consideration.

hiii. Any additional required approvals, such as approval by the Board of Regents, shall be managed by the Office of the Provost.

E-3. Other catalog changes. Noncurricular catalog changes may be submitted directly to the most relevant standing committee of the university faculty and require approval by

Faculty Senate and the university faculty before being forwarded to the provost for approval.

E-4. Interim catalog changes. The provost may approve an interim catalog change (not including curricular changes) to address legal requirements or a significant institutional risk if there is insufficient time to complete the standard review and approval process. A timeline for completing the standard review and approval of the interim catalog change as soon as reasonably practicable must be included in the request to the provost. If approved, the catalog change will go into effect immediately. The standard catalog change review and approval process must be completed during this approved interim period.

Version History

Amended July 2022. Moved catalog change procedures into this policy from FSH 1540; simplified approval process.

Amended 2001. Editorial changes.

Adopted 1979.

Comprehensive review? __Yes __x_No

1. Policy/Procedure Statement: Briefly explain the reason for the proposed change.

In September 2023, the Faculty Senate approved the creation of an Ad-Hoc University-wide Faculty Committee for the Undergraduate Academic Certificate in Sustainability. The purpose of that committee was to serve as the curriculum body for developing the initial curriculum for the university-wide certificate, including the solicitation/review of courses and submission of the proposed curriculum to UCC. The curriculum includes courses from nine colleges. Now that the certificate has been fully approved and students will be able to enroll starting in July 2024, we are requesting that a standing committee be created to maintain, review and assess the university-wide undergraduate certificate. The proposed language does refer to the possibility of the standing committee creating another certificate, because there have been requests to develop a similar university-wide certificate at the graduate level.

2. Fiscal Impact: What fiscal impact, if any, will this change have? None

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

The functions, structure and membership of the proposed committee are similar (but not identical) to that of the University Committee on General Education.

As a companion to this request, an accompanying request for revision of FSH 4120 (Catalog Change Procedures) adds the terms “university-level interdisciplinary committee” to the list of

entities empowered to propose curriculum changes to UCC. The proposed edits to FSH 4120 have been reviewed and contributed to by the policy owner.

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

UNIVERSITY COMMITTEE FOR ACADEMIC CERTIFICATES IN SUSTAINABILITY

A. FUNCTION

A-1. The University Committee for Academic Certificates in Sustainability (UCACS) serves as the curriculum body for interdisciplinary, university-wide academic certificates pertaining to sustainability. The UCACS develops and maintains the curriculum for the existing university-wide Undergraduate Academic Certificate by soliciting proposals for, reviewing and approving courses to be included in the certificates. The UCACS also decides on the eligibility of courses transferred from other institutions, as well as substitution/waiver requests for the university-wide certificate program. The UCACS also engages in program review and assessment and makes recommendations for the continuous refinement of the certificate. Recommendations for changes will be forwarded to UCC, Faculty Senate, and the university faculty. The UCACS will also be responsible for consideration, development and maintenance of other university-wide certificate programs in sustainability proposed to the committee, such as certificate(s) at other academic levels. In partnership with staff advisors, members will also serve as faculty mentors for students in the academic certificate program(s).

A-2. The committee reports periodically (at least once a year) to the Faculty Senate on the status of the university-wide Academic Certificate(s) in Sustainability.

B. STRUCTURE AND MEMBERSHIP. One faculty member from each college, appointed by the Committee on Committees for three-year terms, one undergraduate student selected by ASUI and one graduate student selected by GPSA. The chair is selected by the Committee on Committees. The university Sustainability Director and Vice Provost for Academic Initiatives serve as *ex officio*, non-voting committee members.

Reviewed by General Counsel Yes No Name & Date: Manisha Wilson 3/26/2024

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

Department of Defense policies require universities to have a written policy in place regarding malign foreign talent recruitment programs in order to receive DOD funding.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

Unclear although not likely to have a fiscal impact. The policy requires research security training for individuals on federally funded R&D awards. Training is available for free on the NSF website or through a paid license to CITI Program. ORED is looking into the possibility of incorporating the free training on the NSF website into an internal system.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it. FSH 6240 and FSH 5600

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy. This policy needs to be effective by July 1, 2024 because the DOD requires universities to have a policy in place by August 8, 2024. Starting August 8, 2024, DOD is prohibited from providing funding or making an award to a university that does not have a policy addressing malign foreign talent recruitment programs. NSF will start implementing the disclosures required under this policy in May 2024. NSF does not require a written policy like DOD but the NSF requirements have been incorporated into this policy.

FSH 5800

Malign Foreign Talent Recruitment Programs

A. Purpose. This policy implements the requirements stated in 42 U.S.C. § 19231 and provides notice that Covered Individuals participating in a Malign Foreign Talent Recruitment Program are prohibited from involvement in certain federally funded awards. This policy reaffirms that a University employee may be required to disclose that employee's involvement in a Foreign Talent Recruitment Program or Malign Foreign Talent Recruitment Program under FSH 6240 or FSH 5600.

B. Scope. This policy applies to University employees that are Covered Individuals.

C. Definitions.

C-1. "Covered Individual" means:

1. A principal investigator and other senior/key personnel seeking or receiving federal research and development funding; or
2. an individual who (a) contributes in a substantive, meaningful way to the scientific development or execution of a research and development project proposed to be carried out with a research and development award from a federal research agency; and (b) is designated as a covered individual by the federal research agency concerned; or
3. an individual on a proposal or award funded in whole or in part by the Department of Defense who (a) contributes significantly to the design or execution of a fundamental research project, and (b) is considered essential to the successful performance of the fundamental research project.

C-2. "Foreign Government-sponsored Talent Recruitment Program" or "FGTRP" means an effort organized, managed, or funded by a foreign government, or a foreign government instrumentality or entity, to recruit science and technology professionals or students (regardless of citizenship or national origin, or whether having a full-time or part-time position). See section H for a list of activities that are not a FGTRP.

- a. Some FGTRPs operate with the intent to import or otherwise acquire from abroad, sometimes through illicit means, proprietary technology or software, unpublished data and methods, and intellectual property to further the military modernization goals or economic goals of a foreign government.
- b. Many, but not all, programs aim to incentivize the targeted individual to relocate physically to the foreign state for the above purpose. Some programs allow for or encourage continued employment at United States research facilities or receipt of federal research funds while concurrently working at or receiving compensation from a foreign institution, and some direct participants not to disclose their participation to United States entities.
- c. Compensation could take many forms including cash, research funding, complimentary foreign travel, honorific titles, career advancement opportunities, promised future

compensation, or other types of remuneration or consideration, including in-kind compensation.

C-3. “Malign Foreign Talent Recruitment Program” or “MFTRP” means any program, position, or activity that includes one or more of the following:

- a. engaging in the unauthorized transfer of intellectual property, materials, data products, or other nonpublic information
- b. recruitment of trainees or researchers to enroll in such program, position, or activity
- c. establishing a laboratory or entity in violation of the standard terms and conditions of a Federal research award
- d. accepting a faculty position, or undertaking any other employment or appointment in violation of the standard terms and conditions of a Federal research award
- e. being unable to terminate the foreign talent recruitment program contract or agreement except in extraordinary circumstances
- f. being limited in the capacity to carry out a Federal research award
- g. requirement to engage in work that overlaps or duplicates a federal research award
- h. requirement to apply for and successfully receive funding from the sponsoring foreign government’s funding agencies with the sponsoring foreign organization as the recipient
- i. requirement to omit acknowledgment of the US home institution and/or the federal funding agency
- j. requirement not to disclose participation of such individual in such program, position, or activity
- k. having a conflict of interest or conflict of commitment contrary to Federal research award

and is sponsored by one of the following:

- a. a foreign country of concern or entity based in a foreign country of concern as defined in [42 USC §19237](#)(2) and (3)
- b. an academic institution on [the list developed](#) under 1286(c)(8) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019
- c. a foreign talent recruitment program on [the list developed](#) under 1286(c)(9) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019.

D. Policy

D-1. Prohibited activity. A Covered Individual is prohibited from participating in a MFTRP.

D-2. Certification required in a proposal and annually by covered individuals. A University employee who is a Covered Individual on a proposal shall certify in the proposal that they are not party to a MFTRP. Covered Individuals shall certify annually for the duration of a qualifying award that they are not party to a MFTRP.

E. Consequences for false certifications. False certifications or representations under this policy by a Covered Individual may result in discipline according to University policy or prosecution and liability pursuant to, but not limited to, 18 USC §§ 287, 1001, 1031, and 31 USC §§ 3729-3799 and 38002.

F. Research security training requirement.

F-1. Training before proposal submission. A Covered Individual submitting a proposal for a fundamental research project from the Department of Defense or a research and development project from another federal agency is required to have complete research security training within one year of the proposal due date. The proposal may not be submitted unless the research security training has been completed.

F-2. Refresher training. A Covered Individual may need to repeat research security training if required by the federal funding agency.

G. Disclosures by non-Covered Individuals

G-1. Disclosures required by all University employees. All University employees must disclose their participation in a FGTRP or MFTRP to the University as required by FSH 6240. Disclosures shall be reviewed and managed as stated in FSH 6240.

G-2. Disclosures required by investigators as defined in FSH 5600. In addition to G-1, a University employee who is an “Investigator,” as defined in FSH 5600, must disclose their participation in a FGTRP or MFTRP. Disclosures shall be reviewed and managed as stated in FSH 5600.

H. Activities that are not FTRP

H-1. The following international collaboration activities do not constitute a FGTP as long as the activity is not funded, organized or managed by an academic institution or foreign talent recruitment program on [the list developed](#) under 1286(c) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019.

a. Scholarly presentations and publishing written materials regarding scientific information not otherwise controlled under current law;

b. Participating in international conferences or other international exchanges, research projects, or programs that involve open and reciprocal exchange of scientific information, and which are aimed at advancing international scientific understanding and not otherwise controlled under current law;

c. Advising a foreign student enrolled at an institution of higher education or writing a recommendation for such a student, at student’s request; and

d. Engaging in the following international activities:

1. Activities that are partly sponsored or otherwise supported by the United States such as serving as a government appointee to the board of a joint scientific fund (e.g., the U.S.-Israel Binational Industrial Research and Development Foundation); providing advice to or otherwise participating in international technical organizations, multilateral scientific organizations, and standards setting bodies

(e.g., the International Telecommunications Union, Intergovernmental Panel on Climate Change, etc.); participating in a Fulbright Commission program funded in whole or in part by a host country government; or other routine international scientific exchanges and interactions such as providing invited lectures or participating in international peer review panels.

2. Involvement in national or international academies or professional societies that produce publications in the open scientific literature that are not in conflict with the interests of the federal research agency (e.g., membership in the Pontifical Academy of Sciences or The Royal Society).
3. Taking a sabbatical, serving as a visiting scholar, or engaging in continuing education activities such as receiving a doctorate or professional certification at an institution of higher education (e.g., the University of Oxford, McGill University) that are not in conflict with interests of the federal research agency.
4. Receiving awards for research and development which serve to enhance the prestige of the federal research agency (e.g., the Nobel Prize).
5. Other international activities determined appropriate by the federal research agency head or designee.

~~Last updated: July 01, 2009~~

~~**A. SALARY INFORMATION IS PUBLIC.** The salaries of UI employees are public information and that information may be obtained through the University Library (Department of Special Collections and Archives).~~

~~**B. DISTRIBUTION OF PAYCHECKS.**~~

~~**B-1.** Effective August 1, 2000, newly hired employees will need to designate a bank of their choice to which they authorize direct deposit of their paycheck. Information on procedures is provided at New Employee Orientation and also in the Administrative Procedures Manual 55.05.~~

~~**B-2.** Paychecks for employees are mailed out hired before August 1, 2000 will continue to be available at the cashier's window in Business Systems and Accounting Services on Thursday before the last working day of each biweekly payroll period following the period in which the payroll was earned (i.e. two weeks after the end of the pay period during which the payroll was earned.) If the last day of a payroll period is a holiday, checks will be mailed the day before the pay day.be available on the next working day.~~

~~**C. INCOME TAX WITHHOLDING.** In accordance with federal and state laws, income tax is withheld from the salaries and wages of UI employees. Each employee is responsible for filing a W-4 online in Vandalweb.n exemption certificate at Human Resources.~~

~~**D. W2 forms** Statements of withholdings for income tax (W-2) are available about the third week in January; those for salaried on campus employees are sent to departments for distribution, and temporary help employees and off campus employees will be mailed to the W2 address in the Banner system. pick theirs up at the cashier's window in Business Systems and Accounting Services. When leaving the employ of UI, employees should furnish the Payroll Office the address to which the W-2 form is to be mailed.~~

80

Attach Program Change

2024 DAS SBOE Academic_Degree_and_Certificate_Full-Proposal_Form (v 032824).pdf

CIP Code

26.0499 - Cell/Cellular Biology and Anatomical Sciences, Other.

Will the program be Self-Support?

Yes

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Greater than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

This program is defined as a self-support program and will charge a program fee, in accordance with the policies set forth in Section V.R.3.b.iv of the Idaho State Board of Education Governing Policies and Procedures. For the first three years of the program (FY26, FY27, FY28) we will focus on building our student cohorts, and developing faculty and instructional expertise using institutional support, as committed by policy. Support for the program will include contributions from current faculty. WWAMI faculty who teach in the DAS program will do so during summer months when off contract with the U of I. WWAMI faculty who teach in the DAS program during the academic year will be supported by FTE buyout by the DAS program using students' self-support fees.

We anticipate the program will begin generating a net gain within the second year. Excess funds will be utilized for the following purposes: 1) develop a reserve to support the program in the event of enrollment declines, 2) develop a willied body program for the medical education anatomy lab, 3) develop a scholarship program for students enrolled in the program.

Curriculum:

The DAS curriculum requires 80 credit hours of training. Coursework is designed to build knowledge and skills in a stepwise manner. The curriculum utilizes a hybrid mode of course delivery with in-person and online didactic instruction along with practical experience in course development and delivery. Please see Appendix C for descriptions of new courses developed for this program.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

The intended learning outcomes for this program are designed to produce graduates who will succeed in the current academic climate while meeting the education needs for the allied health professions. We have identified three guiding principles for our program outcomes:

First, medical schools have drastically reduced anatomical science (including neuroanatomy, histology, embryology, and gross anatomy) contact hours over the decades, profoundly impacting current and prospective anatomists' duties. A survey in 1931 reported that anatomy instruction in medical schools averaged 780 hours, ranging from 480-1185 (Drake et al., 2009). Recent figures from U.S. medical schools estimate 129 hours of curricular time are devoted to the anatomical sciences (Wilson et al., 2020), a decline of over 80% from 1931. This brings to light two considerations. First, anatomists must be expert educators, able to design and implement innovative curricula to fit a working knowledge of the human form into a shortened course. Second, while expertise in anatomy is still required it may no longer be sufficient for an anatomist to have a robust academic career. To this end, it is recognized that anatomists are well positioned to teach in other areas, including medical imaging, (patho)physiology, kinesiology, and other basic sciences that are related to a wholistic understanding of the human form and function.

Second, over the last century in the U.S., social and economic forces have shaped an academic environment where, excellence in research is valued above excellence in teaching. Most faculty in universities are research scientists first, and educators second. While teaching excellence is required to facilitate the academic success of students, it is often not sufficient for advancement in the current tenure track faculty model. Therefore, our graduates must be able to produce academic research. Together with a need for expertise in teaching methods and theory, this positions anatomists as candidates for educational scholarship. To this end, our curriculum includes courses on research methods and educational theory, as well as an expectation to produce a dissertation capstone project.

Third, while research literacy and productivity is important for any academic professional, we also recognize the need to produce expert practitioners of education in the medical sciences. To this end, we have taken inspiration from discussion of the Professional Practice Doctorate (PPD) model. PPD's include the Doctor of Medicine (MD), Doctor of Education (EdD), Doctor of Nurse Practitioner (DNP), Doctor of Psychology (PsyD) and more. These PPD programs differ from the traditional academic doctorate (PhD) in many ways. Importantly, the outcome goal for a PPD program is to prepare graduates to practice within their profession, rather than establish a research program. Overall, the DAS degree aims to develop professional educators to meet the needs of students in the allied health professions, while possessing the tools required to succeed in our current academic climate.

In summary, the main learning outcomes for our program are outlined below:

Develop foundational knowledge in curriculum design and pedagogical technique to shape and/or improve their teaching practice.

Improve their teaching practice by creating professional knowledge through applied scholarly inquiry (e.g. education research) and/or extensive, hands-on instructional experience.

Develop a critical awareness of educational practices and evaluation procedures. Graduates will be able to design effective courses and valuable content, with formative and summative evaluation strategies for people, programs, and policy. They will understand culturally complex constituents and adhere to ethical, moral, and legal standards.

Expand and reinforce their expertise in the core subjects of the anatomical sciences through rigorous course work, with a focus on dissection-based gross anatomy.

Broaden their scope of expertise in subjects relevant to educating allied health professionals, including anatomy, medical imaging, and (patho)physiology.

Develop professional skills that will prepare them to move into leadership positions in employer, professional, or community organizations at the local/state/national level.

Promote effective communication among students and colleagues.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Learning outcomes will be assessed both through formative and summative methods.

Learning outcome 1:

Formative assessment of students' teaching practice is built into the curriculum in several ways. First, students will take formal course work in pedagogy that will engage them in the study and assessment of their own methods. Course grades and assignment portfolios will serve as regular assessment of student pedagogical knowledge.

Second, all students will return in their second summer to mentor incoming students in the intensive summer gross anatomy course. Faculty will oversee their teaching, and incoming students will provide feedback on their student mentors.

Third, course work aimed at developing core subject area knowledge for future teaching roles (e.g. neuroanatomy) will have major assignments aimed at developing future teaching materials. In keeping with the program's goal to produce professional educators, these courses are designed not only to provide competency in the subject matter, but to force students to grapple with the material as an educator, i.e. how and why would they choose to teach what they are learning to their future students.

Finally, we anticipate that many students will be employed as educators in some way while they progress through the DAS curriculum. For these students, we will collect "impact journals" wherein students will chronicle the impact of their DAS studies as it relates to their teaching practices. These journals will contribute to the summative assessment.

Summative assessments of student pedagogical development will be achieved primarily through the journaling component of their DAS experience together with student and mentor feedback of their teaching performance(s).

Assessments of Outcome 1 will be used to monitor the development of students' pedagogical mastery, as well as improve our program and process.

Learning outcome 2:

Formative assessments of students' professional knowledge will occur primarily in pedagogical coursework.

Summative assessments will take the form of research pertaining to their professional practice and/or student and instructor evaluation of their practice.

Learning outcome 3:

Formative assessments pertaining to the anatomical sciences are built into the main coursework components of the curriculum. For example, major assignments, exams, and course outcomes in the gross anatomy summer intensive, the neuroanatomy, histology, and embryology courses, and so on.

Summative assessments in the form of comprehensive exit testing ensure that knowledge is retained and synthesized in a productive way to facilitate professional teaching practice.

Learning outcome 4:

On completion of the DAS, it is important that students do not simply re-learn the core knowledge in anatomical sciences that they may already be proficient in. Students should come away with the ability to teach a wider range of health sciences. As students develop a study plan, novel topics should be identified and included for study. Course outcomes in these areas as in Outcome 3 will serve as formative assessment of outcome 4. Similarly, exit testing will serve as Summative assessment for outcome 4.

How will you ensure that the assessment findings will be used to improve the program?

To ensure rigor in the coursework and curriculum in general, students must maintain at least a 70% average in the gross anatomy intensives and all other core anatomical science courses (neuroanatomy, embryology, and histology) to continue in the program. The Immersion experiences will be vetted and approved under the guidance of faculty mentors and the program director.

Additionally:

1. Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
2. Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
3. Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
4. Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

What direct and indirect measures will be used to assess student learning?

Direct measures include examinations, skills assessments, case studies, and practical evaluations. Indirect measures include student surveys, feedback from instructors, and analysis of retention and graduation rates.

When will assessment activities occur and at what frequency?

Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations, term projects, reflection essays) will occur at the end of relevant courses and following at the end of each year. Alumni and industry surveys will be completed two years following graduation.
- Case studies, teaching plans, and projects will be assigned periodically.

Student Learning Outcomes

Learning Objectives

The intended learning outcomes for this program are designed to produce graduates who will succeed in the current academic climate while meeting the education needs for the allied health professions. We have identified three guiding principles for our program outcomes:

First, medical schools have drastically reduced anatomical science (including neuroanatomy, histology, embryology, and gross anatomy) contact hours over the decades, profoundly impacting current and prospective anatomists' duties. A survey in 1931 reported that anatomy instruction in medical schools averaged 780 hours, ranging from 480-1185 (Drake et al., 2009). Recent figures from U.S. medical schools estimate 129 hours of curricular time are devoted to the anatomical sciences (Wilson et al., 2020), a decline of over 80% from 1931. This brings to light two considerations. First, anatomists must be expert educators, able to design and implement innovative curricula to fit a working knowledge of the human form into a shortened course. Second, while expertise in anatomy is still required it may no longer be sufficient for an anatomist to have a robust academic career. To this end, it is recognized that anatomists are well positioned to teach in other areas, including medical imaging, (patho)physiology, kinesiology, and other basic sciences that are related to a wholistic understanding of the human form and function.

Second, over the last century in the U.S., social and economic forces have shaped an academic environment where, excellence in research is valued above excellence in teaching. Most faculty in universities are research scientists first, and educators second. While teaching excellence is required to facilitate the academic success of students, it is often not sufficient for advancement in the current tenure track faculty model. Therefore, our graduates must be able to produce academic research. Together with a need for expertise

in teaching methods and theory, this positions anatomists as candidates for educational scholarship. To this end, our curriculum includes courses on research methods and educational theory, as well as an expectation to produce a dissertation capstone project. Third, while research literacy and productivity is important for any academic professional, we also recognize the need to produce expert practitioners of education in the medical sciences. To this end, we have taken inspiration from discussion of the Professional Practice Doctorate (PPD) model. PPD's include the Doctor of Medicine (MD), Doctor of Education (EdD), Doctor of Nurse Practitioner (DNP), Doctor of Psychology (PsyD) and more. These PPD programs differ from the traditional academic doctorate (PhD) in many ways. Importantly, the outcome goal for a PPD program is to prepare graduates to practice within their profession, rather than establish a research program. Overall, the DAS degree aims to develop professional educators to meet the needs of students in the allied health professions, while possessing the tools required to succeed in our current academic climate.

In summary, the main learning outcomes for our program are outlined below:

- Develop foundational knowledge in curriculum design and pedagogical technique to shape and/or improve their teaching practice.
- Improve their teaching practice by creating professional knowledge through applied scholarly inquiry (e.g. education research) and/or extensive, hands-on instructional experience.
- Develop a critical awareness of educational practices and evaluation procedures. Graduates will be able to design effective courses and valuable content, with formative and summative evaluation strategies for people, programs, and policy. They will understand culturally complex constituents and adhere to ethical, moral, and legal standards.
- Expand and reinforce their expertise in the core subjects of the anatomical sciences through rigorous course work, with a focus on dissection-based gross anatomy.
- Broaden their scope of expertise in subjects relevant to educating allied health professionals, including anatomy, medical imaging, and (patho)physiology.
- Develop professional skills that will prepare them to move into leadership positions in employer, professional, or community organizations at the local/state/national level.
- Promote effective communication among students and colleagues.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

Expert knowledge of anatomy is central to diagnosis and treatment of disease and as such in-depth coursework in the anatomical sciences has long been the foundation of health sciences curricula. In fact, the need for robust training in the anatomical sciences in current health sciences programs continues to grow. For example, medical care providers from many different corners of the health care professions (doctors, nurses, physician assistants, etc.) and in many different settings (ER, family practice clinics, sports med clinics, etc.) increasing rely on non-invasive medical imaging techniques such as point-of-care ultrasound to evaluate patients and diagnosis disease. In all cases, to interpret images and make diagnoses practitioners rely on their detailed knowledge of anatomy acquired during their training.

Student enrollment surges in the health sciences and continued growth of health sciences programs across the U.S. are fueling an increasing need for highly trained anatomy instructors to teach medical education. Despite this, health sciences programs nationwide are facing an increasing shortage of highly trained anatomy educators. This well-documented shortage is due in part to biomedical graduate programs shifting away from providing doctoral students with classical training in the anatomical sciences and focusing instead on training students to become researchers in other fields. For biomedical programs, an underlying driver of this is the pressure to capture a greater share of research funding from NIH and other funding agencies. This is a decades long trend, one that will likely remain on trajectory into the foreseeable future as faculty, programs, and institutions compete for external funding. The decline in trained anatomists was underscored in 2003 reports published in *Science* and the American Association for the Advancement of Science that found that more than 80% of department chairs expressed moderate or great difficulty hiring to meet anatomy teaching needs [1]. More recent studies confirm the continued shortage of trained anatomists, and the difficulty in filling position openings [2]. Additional lines of evidence demonstrating this come from job posting data from the American Association for Anatomy [AAA; 2], the Survey of Earned Doctorates data from the National Science Foundation [3], and faculty retirement data from a survey of AAA members [4]. To reverse the current anatomy educator shortage, which is projected to worsen as populations of anatomists from the Baby Boomer generation begin to retire, additional doctoral programs in the anatomical sciences are needed.

Currently, only eight Anatomy Education doctoral programs exist in the U.S. and none of these programs are affiliated with the state of Idaho [3]. The paucity of doctoral level anatomy training programs is not surprising given that most colleges and university are ill-equipped to house these programs. The development of new doctoral level anatomy training programs is constrained by the need for expensive, highly specialized facilities such as human cadaver labs along with the faculty expertise to teach in the programs. This restricts doctoral level programs to institutions with medical schools.

The College of Graduate Studies is well positioned to house the proposed DAS program. The DAS program will be led by core group of classically trained anatomists. All are faculty in the WWAMI medical education program, and all are highly motivated to teach in the proposed DAS degree. Each brings to the program considerable experience instructing anatomy and related courses to medical students. An additional group of WWAMI faculty with DoE degrees will teach in and help guide educational training components of the DAS degree. The DAS program will utilize the WWAMI anatomy lab facility, a state-of-the-art cadaver lab and teaching facility. Additionally, the overall budget required to run the DAS program will be modest since it will follow a tuition-based self-support model. Access to existing anatomy education PhD programs is often limited due to their competitiveness. The competitiveness of these programs is predominantly a consequence of limited enrollments due to funding and mentor availability. By making the DAS program a tuition-based self-support model, the program itself is less constrained by funding.

The DAS program will recruit students from across the state of Idaho as well as nationally, targeting two groups: 1) students pursuing prerequisite undergraduate and/or graduate degrees, and 2) current instructors in health science related programs who lack a doctoral degree.

The first group represents a very deep pool of potential applicants. Undergraduate degrees in biology represent the fourth most popular degree type with over 120,000 degrees awarded nationally per year. Similarly, the fields of kinesiology and physical therapy produce over 37,000 graduates per year and health professions related degrees over 35,000 graduates per year. For context, our proposed program has the capacity to accept yearly cohorts of 20 students, based on the shared use of our anatomy lab facility with other programs that use the facility. We acknowledge that there exists limited awareness among undergraduates of career opportunities in anatomy. The lack of programs dedicated to training anatomists directly contributes this [5]. However, we are confident that targeted messaging and recruiting will yield a substantial number of interested students. Average anatomy professor salary is over \$93,000.00 per year and there is a clear and present demand for qualified educators in this discipline. Graduates will be qualified to teach a variety of health sciences programs and biology.

The second group of potential students, those currently employed in higher education as anatomy instructors but who lack a doctoral degree, face limited professional opportunities. In health sciences fields at the university level, a terminal degree, i.e. a doctoral degree, is required for a tenure track faculty appointment. In our research regarding development of this program, we found that it is common for Idaho's 2- and 4-year Colleges and Universities to staff anatomy related courses with instructors who lack a doctoral degree, with the lack of better qualified applicants cited as a primary reason. In surveying instructors and department heads in Idaho and among our WWAMI sister sites, we found there was clear demand from instructors to complete a doctoral degree since it would increase their professional opportunities. To maximize student interest and appeal to non-traditional students who are currently employed teaching, our program is designed a hybrid education model with academic year remote learning over academic (spring and fall terms) and intensive on-site learning over summer terms.

This program is a new offering at the University of Idaho. As such, new staff and faculty will need to be recruited and hired; however, the program will also rely on existing WWAMI anatomy faculty to cover teaching. Much of the hands-on, intensive anatomy instruction will occur during summers when WWAMI faculty (9-month academic appointments) are off contract but eager to continue teaching. During the academic year, adjustments to current WWAMI faculty workloads will be made to assist with DAS program instructional needs.

Our vision is to be the premier program for preparing anatomy faculty members who contribute to health care improvements through expert instruction and research. Our graduates will be able to serve in numerous faculty roles to help deliver cutting edge curricula and training, while also meeting unmet needs in the development of health care education infrastructure. Our graduates will help meet the national shortage of anatomy educators, one that directly impacts Idaho's ability to deliver and expand health care related education. All of Idaho's Colleges and Universities have pre-health and health professions programs but often struggle with staffing the programs with qualified instructors, limiting the ability to grow and develop these programs.

Linda Lundgren (lindalundgren) (Tue, 10 Oct 2023 23:55:31 GMT): Rollback: Per Jeff Seigmiller's email to Gwen Gorzelsky, Linda Lundgren is rolling back the DAS to the department.

Linda Lundgren (lindalundgren) (Mon, 16 Oct 2023 20:30:18 GMT): Attached email from TJ Bliss to Gwen Gorzelsky on October 16 re: external review.

Linda Lundgren (lindalundgren) (Wed, 18 Oct 2023 00:12:15 GMT): Rollback: Rolling back to Department. Email with details of reasons for rolling this back sent to Jeff Seegmiller from Linda Lundgren on 10/17/23.

Jeffrey Seegmiller (jeffreys) (Mon, 30 Oct 2023 19:20:12 GMT): Rollback: Make suggested changes from provost office

Jeffrey Seegmiller (jeffreys) (Mon, 30 Oct 2023 19:24:16 GMT): Rollback: Change

Tyler Bland (tbland) (Mon, 30 Oct 2023 19:25:37 GMT): Rollback: Correction

Brenda Helbling (brendah) (Tue, 19 Dec 2023 22:24:16 GMT): Rollback: As discussed in 12/19/23 email, ensuring updated version of materials was attached. Whitney requested return to check. Brenda 208-874-2274 if questions.

Brenda Helbling (brendah) (Thu, 28 Mar 2024 15:32:54 GMT): Rollback: Rolled back to address consistency and upload the revised SBOE form (as needed) and SBOE budget (that you were working on yesterday). Please do not delete old forms; just ensure the new ones have revision dates in the titles. Thanks!

Sydney Beal (sbeal) (Fri, 29 Mar 2024 15:26:39 GMT): Received email approval to approve program through Degree Audit Review and Graduate Council Chair

Key: 547

Response to External Peer Review of DAS Program Proposal

An external programmatic review of the proposed Doctorate of Anatomical Sciences was completed in August 2022. The external review team was asked to assess the program within the present and projected future contexts, addressing program elements, faculty, need, and resources. The resulting Onsite Visit Report identified program strengths along with potential areas for improvement. We have addressed the team's suggestions for improvement and incorporated the changes into our program as appropriate. Below is a list of the review team's "areas for improvement" (in italics) along with our responses and description of changes we have made to our program:

- 1. The original proposal did not specify a lab component for the neuroanatomy curriculum.*
Most of the neuroscience curriculum will be completed online, including lab exercises. A subset of neuroscience labs is incorporated into the advanced gross anatomy courses, which are taught in-person during summers.
- 2. The external review team also recommends starting the program in the summer term, instead of the fall term, to lead with the gross anatomy curriculum.*
We have adjusted our curriculum sequence to begin in the summer term, as suggested.
- 3. Curricula related to qualitative methods and mixed methods research is missing from original proposal. The on-site team recommends adding these missing elements.*
These topics have been built into the Research Methods course.
- 4. For students with prior or current teaching experiences, the program may consider a waiver of teaching practicum credits.*
We have adjusted our curriculum to allow students who enter with appropriate prior or current teaching experience to receive a waiver of teaching practicum credits.
- 5. TAships are available for credit or elective. The program should consider making TAships required.*
We have adjusted our curriculum to make teaching a practicum required, unless students have appropriate prior or current teaching experience (see point 4, above).
- 6. Not clear how all-course level objectives will be assessed.*
We have better aligned course level objectives with outcomes of course-work, examinations, and Immersion experiences. Course level assessments will include student projects, examinations, reflection essays, teaching performance, peer and instructor evaluation of teaching performance, and an end of program comprehensive exam. Additionally, indirect measures of program performance such as GPA, grades, graduation/attrition rates, and employment placements of graduates will be closely monitored.
- 7. No clear direction of details or timing of the qualifying/preliminary exam were provided.*
The original DAS proposal included a preliminary exam and dissertation requirement. At the suggestion of the external review team, the dissertation component has been removed. In its place, we have added three terms of Immersion experience. In place of a preliminary exam, a comprehensive exam will be added at the end of fall 3, i.e., prior to the final Immersion term (spring 3 year).

8. *Some ambiguities remain pertaining to the education component of the DAS curriculum and which faculty are most likely to lead teaching and research mentoring roles.*

The original program proposal reviewed by the External Peer Review team lacked syllabi for some of the courses in the education component of the curriculum. These have now been developed, all of which will be new DAS courses tailored specifically to the needs of students in our program. Instruction of these education-related courses will be led by current WWAMI faculty including Rusty Baker, (Research Methods), Joshua Johnson (Philosophical Underpinnings of Medical Education; Teaching Paradigms in Medical Education; History of Educational Philosophy; Seminar: Practice in the Allied Health Professions). Dr. Baker is the Associate Director of Medical Research and currently teaches Research Methods to medical students. Joshua Johnson currently teaches anatomy to medical students and is scheduled to be awarded a DoE degree in 2024. An additional faculty member with expertise in medical education will be hired to help teach the remaining DAS education-related courses.

9. *Syllabi only contained placeholders for assessments and had not been fully fleshed out. More specificity related to course-level assessments, especially formative assessments.*

Syllabi have been developed more fully, including descriptions of assessment plans.

10. *No mention of specific community engagement project opportunities, details about how to increase diversity, or goal for research dissemination noted within the proposal.*

While community engagement projects are encouraged, they are not required in our proposed program. This is due in part to the fact that most of our students will be dispersed and completing coursework remotely throughout the academic year, which makes tracking and monitoring projects difficult. During summers when students are on-site, there may be opportunities for DAS students to work with Moscow-area K-12 students on anatomy-related topics or demonstrations; however, this will not be a major focus of our program.

Student recruitment will take place across the country, including at institutions where 20% or more of the student body are students from underrepresented minority groups. Dr. Pfeiffer served as the PI of five NSF REU Site awards and has considerable experience in recruiting URM students from biology programs and health sciences programs. He maintains connections at several URM-serving institutions across the country and will utilize these contacts during recruiting efforts.

Our original proposal included a dissertation requirement. Based on concerns raised by the external peer review team and others, this requirement has been dropped. As such, research dissemination is not a major goal for our students, although we do anticipate a subset of students will present results and/or publish findings from their Immersion terms.

11. *The proposal did not specify their workload plans or how new faculty may be involved in curriculum development. The proposed summer anatomy courses may be co-taught (according to an interview with P. Fuerst). Workload arrangements will need to be clearly defined prior to starting the program.*

Workload plans will be developed closer to the start of the program. The proposed DAS program is one of multiple new programs being developed by the new School of Health and Medical Professions. Several of these programs will share portions of current faculty FTEs as well as those of new hires. At this point, we will hold off defining exact workload agreements until we have a clear timeline of when and if each proposed program will start. The proposed summer anatomy courses will be co-taught by four current WWAMI anatomy faculty.

12. *There is a need to hire faculty with educational research experience and establish a clear delineation of duties for current and future faculty to ensure workloads are feasible, particularly outside of the summer months. Formal MOUs with colleges/programs outside of WWAMI are crucial and should include agreements regarding coursework, shared costs, and faculty mentorship responsibilities.*

Joshua Johnson, current anatomy instructor in the WWAMI program, is scheduled to be awarded a DoE degree in 2024. He will assume a key role in the DAS program, teaching education-related courses and mentoring those students who choose to pursue education-related research projects during their Immersion terms. Dr. Rusty Baker, Associate Director of Medical Research, will also mentor DAS students who undertake research. Dr. Baker has considerable experience mentoring medical students on research projects, including projects that use qualitative methods and mixed methods approaches. The DAS program will also hire an additional faculty with experience in medical education.

As originally planned, the DAS program would rely on several courses taught by the College of Education, Health, and Human Services. We have revised our program so that all required courses, including education-related courses, will be DAS courses taught by our faculty. This removes the need for formal MOU's with other colleges/programs and enables us to tailor the courses to our students' needs and offer them on a schedule that works best for our students.

13. *Regular course offerings could include more variety of assessments and assignments for monitoring student progress and content mastery. More details concerning dissertation guidelines and parameters are needed. A curriculum plan is also underdeveloped without explicitly addressing the regularity of offerings and their delivery approach (online synchronously, online asynchronously, or in-person). Consider offering tracks of study and part-time enrollment to encourage greater program marketability.*

A greater variety of assessment and assignments, including written reflections, peer evaluations, term papers, capstone projects, and oral presentations, have been built into courses.

The dissertation requirement has been removed from the degree. In its place, the program now includes three Immersion terms during which students complete three immersion tracks selected from the following options (Students may choose to repeat and individual track in more than one Immersion term):

- i. Pedagogical Immersion: Under the guidance of a faculty mentor, students will take the lead on developing and delivering classroom sessions, laboratory demonstrations, learning assessments, and grading.
- ii. Research Immersion: Students will complete a faculty-mentored research project related to instruction, such as an educational intervention, or a project in an area of anatomy.
- iii. Anatomical Prosection Immersion: Students will complete an extensive and detailed dissection in the cadaver lab with the goal of producing an anatomy demonstration (prosection) that will be used for instruction in medical student anatomy courses.

The curricular plan has been fully developed and now details when course offerings will take place and the mode of delivery. All summer courses will be offered in-person and all academic year courses will be offered online asynchronously, with the exception of four electives (Radiology Seminar, Point-of Care Ultrasound, Cognitive Neuroscience, and Sports Biomechanics) which will be offered in-person. At the recommendation of the external review team, we will offer part-time enrollment as an option.

14. *Resource sharing with other departments is unclear and should be further developed prior to finalizing the program's proposal.*

The DAS program will utilize the WWAMI Medical Education Program's anatomy lab teaching facility during summers. The facilities anatomy lab and classroom are not used by medical students during this time. Other resource sharing is not necessary.

15. *It is unclear how proposed research relationships will benefit DAS students as more details about the expectations of the dissertation are needed to fully understand how the joint research projects could meet the needs of the DAS students to fulfill their research requirements in educational research.*

As noted above, the dissertation requirement has been removed from the DAS program.

16. *Future faculty who are hired should have experience and publications in medical education research or a closely related field in education to strengthen the program's expertise in this area. Currently, only two WWAMI faculty have publications in graduate program development and experience mentoring education-focused graduate students. Given the anticipated large cohort size, two faculty alone cannot manage all dissertation research projects.*

As noted above, the dissertation requirement has been removed from the DAS program.

Joshua Johnson, current anatomy instructor, is scheduled to be awarded a DoE degree in 2024, which will increase our WWAMI faculty with doctoral level training in education to three. The DAS program plans to hire an additional faculty member with similar strengths in education training and research.

17. *Currently, the program's greatest limitation is having enough faculty trained in educational practices and methods for research oversight, given the high annual enrollment of 20 students per cohort. At present, the projected student to faculty ratio for research mentorship and oversight does not seem feasible from a quality assurance perspective.*

See response in 16.

18. *One area of concern for the DAS program is the ratio of proposed students to faculty members with experience conducting educational research for the purpose of doctoral committee membership. Faculty are likely to have a significant mentorship burden and be members or chairs on numerous committees.*

See response in 16.

Peter Fuerst, Ph.D. Associate
Professor
WWAMI Medical Education Program
Department of Biological Sciences University of
Idaho
Moscow, ID 83844

Dear Peter,

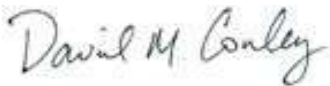

We are writing to express our strong support for the doctoral degree program in Anatomical Sciences that you are proposing to develop at the University of Idaho. As medical school faculty with many years of experience developing and delivering anatomy education at Washington State University and other major university programs (University of Washington and University of Minnesota), we know how difficult it is to find faculty trained in the anatomical sciences, including expertise in cadaveric dissection.

As biomedical research has transitioned to more cellular and molecular approaches to the study of disease, basic science departments that used to train graduate students in anatomical sciences have begun hiring faculty without expertise in anatomy. The downstream effect has been a nearly complete lack of graduate programs that include training in gross anatomy, embryology, histology, and macro- level neuroscience. We now have a situation where it is almost impossible to find trained anatomists, so we often hire applicants without this skill set, who we must then train ourselves, with no guarantee that an anatomy teaching career is a good fit. A well-trained individual with a degree in anatomical sciences would rise to the top of a typical applicant pool and would be highly competitive for positions at most medical schools, including our own. The additional areas of training proposed in your degree program, including histology, neuroanatomy, medical imaging, and kinesiology would further equip the degree holder to succeed in a broad range of programs, beyond medical (MD/DO) education. We could certainly use graduates from your program at our institution.

With the need clearly apparent, we strongly support the development of your proposed program, and we urge the Idaho State Board of Education to approve it, post haste. We stand ready to support your program in any way we can, including providing experiences in anatomy instruction at our institution.

We look forward to hearing of the approval of your program by the Idaho State Board of Education and your successful development and implementation of this program at the University of Idaho.

Sincerely,

David Conley, PhD

(208) 769-7839 fax

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. As biomedical research switched to identifying molecular disease mechanism a side effect has been a lack of trained anatomists. It has historically and is currently difficult for us to identify trained anatomists and we often hire underqualified applicants who we must then train with no guarantee that the career is a good fit for the trainee. A well-trained individual with a degree in anatomy would rapidly rise to the top of a typical applicant pool and would be highly compatible for this type of well compensated position. The additional training the University of Idaho anatomy doctoral degree would offer in histology, neuroanatomy, radiology, ultrasound and kinesiology would make the degree holder a highly desirable hire for a broad range of medical education programs beyond the degrees we offer in our program.

Sincerely,

Paula Lambert

Natural Sciences Division Chair

Peter Fuerst, PhD
Associate Professor, University of Idaho
Associate Director, WWAMI Medical Education Program
University of Washington School of Medicine

Dear Peter and State Board of Education,

I enthusiastically support your plan to offer a doctorate in anatomical sciences degree at the University of Idaho. As biomedical research transitioned to identifying molecular disease mechanisms over the past decades, PhD students were no longer being trained in anatomy. I know from our experience at MSU how difficult it has been for us to identify and hire trained anatomy faculty for our medical school and our undergraduate biology programs. At our WWAMI Medical Program, our last anatomy faculty search took three years; we eventually hired a senior faculty member from another medical school. This individual will be retiring soon, requiring us to search again. For the undergraduate program, we have hired underqualified applicants, who must then train on the job with no guarantee that teaching anatomy is a good career. A well-trained individual with a degree in anatomy would rapidly rise to the top of a typical applicant pool and would be highly compatible for these well compensated faculty positions. The additional training the University of Idaho anatomy doctoral degree would offer in histology, neuroanatomy, radiology, ultrasound and kinesiology would make the degree holder a highly desirable hire for a broad range of medical education and allied health programs at universities like ours.

WWAMI Medical
Education Program

RE: Anatomical Sciences Degree Program

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. As biomedical research switched to identifying molecular disease mechanism a side effect has been a lack of trained anatomists. We are currently searching for an anatomist with cadaver-based dissection experience and neuroanatomy expertise. It has historically been difficult for us to identify trained anatomists and we often have worry that our applicant pool will not meet our high medical education standards. A well-trained individual with a degree in anatomy would rapidly rise to the top of a typical applicant pool and would be highly compatible for this type of well compensated position. The additional training the University of Idaho anatomy doctoral degree would offer in histology, neuroanatomy, radiology, ultrasound and kinesiology would make the degree holder a highly desirable hire for a broad range of medical education programs beyond the MD degree we offer in our program.

Sincerely,

A handwritten signature in black ink, appearing to read "Brant A. Schumaker".

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. As biomedical research switched to identifying molecular disease mechanism a side effect has been a lack of trained anatomists. It has historically and is currently difficult for us to identify trained anatomists and we often hire underqualified applicants who we must then train with no guarantee that the career is a good fit for the trainee. A well-trained individual with a degree in anatomy would rapidly rise to the top of a typical applicant pool and would be highly compatible for this type of well compensated position. The additional training the University of Idaho anatomy doctoral degree would offer in histology, neuroanatomy, physiology, pathophysiology, radiology, ultrasound, pedagogy, research methods and kinesiology would make the degree holder a highly desirable hire for a broad range of medical education programs beyond the degrees we offer in our program.

Sincerely,

A. B. Bezzerides

Alex Bezzerides

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. I am currently teaching Anatomy & Physiology as well as Human Cadaver Prosection at my institution, North Idaho College, with a Master's of Science degree in Clinical Anatomy from Creighton University School of Medicine, but lack a dissertation based doctoral degree that would aid in my profession development and expand my teaching portfolio. I work during the academic year and have flexible summers and am highly enthusiastic about the ability to complete remote course work during the academic year while I am working, and to spend two summers to gain an in-depth anatomy and teaching experience at your state-of-the-art facility. I would strongly consider pursuing this degree if it is approved. There are many faculty across the country teaching in professional programs, 4 year Colleges, Universities and Community Colleges who would greatly benefit from the unique program that you are proposing to found.

Sincerely,

Katie Johnson, MS
Assistant Professor of Biology
Natural Sciences Department
North Idaho College
Email: kjohnson3@nic.edu

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. I am currently teaching Anatomy and Physiology at the College of Western Idaho with a master's degree in biology, and have been actively considering and looking for a doctoral program that would aid in my professional development and allow me to expand my teaching portfolio. I work during the academic year but have flexible summers, and am highly enthusiastic about the ability to complete remote course work during the academic year while I am working, and to spend two summers to gain an in-depth anatomy and teaching experience at your state-of-the-art facility. I would strongly consider pursuing this degree if it is approved. There are many faculty across the country teaching in professional programs, 4-year colleges, universities and community colleges who would greatly benefit from the unique program that you are proposing to found. I have sat on many hiring committees at CWI looking for A&P faculty, and it is very difficult to find highly qualified faculty for this particular subject. I believe that this unique program would help to change that situation.

Sincerely,

Hollie Leavitt, M.S.
Associate Professor of Biology
College of Western Idaho

uidaho.edu/sci/biology

Dear Peter and Idaho State Board of Education,

I am writing to affirm support for the value of your doctorate in anatomical sciences degree. I am currently an Instructional Laboratory Manager at the University of Idaho, with a bachelor's degree in biochemistry and a Doctor of Chiropractic degree. I have worked in the field as a practitioner, and more recently in academia as an Assistant Professor in Anatomy & Physiology (A&P) and Prosection (Human Cadaver Dissection). I have served on several hiring committees at North Idaho College in search of additional A&P professors and adjuncts. In my experience, there have been many Doctors of Physical Therapy & Chiropractic that seek to join academia. Their practical knowledge is valuable, however during the interview process, many lacked the extensive scientific background or experience to properly teach courses in A&P or Prosection. This was also true of many applicants with master's degrees. I have been a member of the Human Anatomy & Physiology Society and have also served on their Cadaver Use Committee. This is a national organization that provides information, continuing education, as well as structure and continuity with Learning Outcomes across the differing levels of A&P from community colleges, four-year institutions & universities, as well as medical and osteopathic colleges. In my experience with this organization, there is a strong need for professors to have the proper background in Anatomy. Many current professors began teaching those courses without any prior experience or structured coursework and are seeking additional education to fulfill their knowledge gap. The Cadaver Use Committee has been trying to organize, unsuccessfully, to help train and fulfill this niche of training professors to teach Prosection courses. However, there is a lack of professors with these skills or background, even in this organization. Having a dedicated degree of this caliber would fulfill this significant need and be available for those educators to gain additional knowledge, experience, and professional development while they work concurrently. This is a very exciting and fantastic opportunity. Being able to complete coursework remotely during a three-year cycle and having the two in-depth summer sessions at the state-of-the-art cadaver lab at the Moscow, Idaho WWAMI Medical facility would be an option not only I am interested in, but that many across the nation or locally could attain.

Sincerely,

APPENDIX C: Course Descriptions

Summer One

| Course | Description | Credits |
|----------|--|---------|
| MEDS 539 | Advanced Gross Anatomy for Teachers I This is the first of two graduate courses that will cover the gross anatomy of the human body in depth, using human cadavers. Its goal is to prepare students to become professional Anatomy instructors who can teach this material in Gross Anatomy courses in Medical, Dental, or Physical Therapy Schools. Additionally, they will be able to teach Anatomy or Anatomy & Physiology courses for undergraduate students in Health programs such as nursing, pre-med, pre-dent, pre-physical therapy, exercise science, and pharmacy programs. | 8 |
| MEDS0000 | Embryology for Anatomy Teachers This is an online class that will cover the structural development of the human embryo and fetus, mainly by organ systems. Its goal is to prepare Anatomy instructors so they can present this material in Gross Anatomy in Medical Schools, or in Anatomy or Anatomy and Physiology courses for undergraduate students in Health Programs such as nursing, physical therapy, and pharmacy. Along with normal human development, the course cover abnormalities of development, so the students can learn and teach birth defects, the developmental anomalies that are so important in the health fields. | 4 |
| MEDS0000 | Introduction to Medical Imaging Today's medical practitioners now require a solid understanding of the principles underlying each of the major biomedical imaging modalities along with expertise in interpreting the digital data and anatomical images generated. As such, medical imaging has become an essential component of Health Sciences curricula. This course will help equip Anatomy instructors with the requisite knowledge to utilize medical imaging in the coursework of Medical Schools or other Health Sciences training programs. | 2 |

Fall One

| Course | Description | Credits |
|----------|--|---------|
| MEDS 542 | Histology for Anatomy Teachers This is an online class that will cover the microscopic anatomy (histology) of the human body. Histology covers the body's cells and subcellular structures, its tissues, and the microscopic structure of its organs. The goal of this course is to prepare Anatomy teachers to present this material in Histology courses in Medical Schools, or in Anatomy or Anatomy & Physiology courses for undergraduate students in Health Programs such as nursing, pre-physical therapy and pre-pharmacy. | 4 |
| MEDS0000 | Philosophical Underpinnings of Medical Education Students will grapple with the philosophical foundations of education, including essential topics such as the nature of knowledge, the purposes and goals of medical education, and the social, political, and ethical considerations inherent in healthcare practice and teaching. Moreover, | 3 |

| | | |
|--|--|--|
| | this course challenges participants to become reflective medical educators capable of developing and articulating their own philosophy of education. | |
|--|--|--|

Spring One

| Course | Description | Credits |
|----------|---|---------|
| MEDS0000 | Physiology Elective 1 (see below for list of “Physiology Electives”) | 4 |
| MEDS0000 | Free Elective (see below for list of “Free Electives”) | 3-4 |

Summer Two

| Course | Description | Credits |
|----------|--|---------|
| MEDS 541 | Advanced Gross Anatomy for Teachers II This is the second of two graduate courses that will cover the gross anatomy of the human body in depth, using human cadavers. It will directly follow Advanced Anatomy I in each summer session. The goal of these courses is to prepare students to become professional Anatomy instructors who can teach this material in Gross Anatomy courses in Medical, Dental, or Physical Therapy Schools. Additionally, they will be able to teach Anatomy or Anatomy & Physiology courses for undergraduate students in Health programs such as nursing, pre-med, pre-dent, pre-physical therapy, exercise science, and pharmacy programs. | 8 |
| MEDS0000 | Instructional Practicum Instructional practicum provides students with an opportunity to improve teaching methods and techniques and expand professional skills under the guidance of faculty mentors. Teaching experience will include developing and delivering classroom lectures, learning assessments, and grading schemas, and demonstrations in the anatomy laboratory. | 2 |
| MEDS0000 | Seminar: Practice in the Allied Health Professions It is essential for educators in the health professions to understand some aspects of the clinical practice that their students are pursuing. Through a blend of lectures, discussions, case studies, and collaborative projects, this seminar fosters interdisciplinary perspectives on contemporary allied health practice for various professions (e.g., RN, CRNA, MD/DO, PA, NP, etc.) within the American medical system. | 1 |
| MEDS0000 | Curricular Development in Medical Education In an era marked by the rapid evolution of medical science, it is imperative that educators and administrators continuously adapt their curricula to align with the latest best practices and evidence. This course immerses students in the foundational principles of curriculum development tailored specifically for allied health professional training programs. Furthermore, students will be exposed to multiple curriculum development frameworks, equipping them with a versatile toolkit for shaping future curricula that remain responsive to evolving industry standards and educational needs. | 3 |

Fall Two

| Course | Description | Credits |
|--------|-------------|---------|
|--------|-------------|---------|

| | | |
|----------|---|-----|
| MEDS0000 | Radiology Elective (see below for list of “Radiology Electives”) | 1-2 |
| MEDS 546 | Neuroanatomy for Anatomy Teachers This is an online course that will cover topics in neuroanatomy. Topics include functional organization of the human nervous system, neurophysiology, supporting structures, and clinical relevance of these topics for health care practitioners. | 4 |
| MEDS0000 | Measurement and Evaluation in Medical Education This course is designed to survey principles of measurement and evaluation within the context of medical education. Students will delve into the foundations of assessment theories and methods of designing and implementing assessment tools for students in the allied health professions. Topics will encompass formative and summative student assessments, including written exams, question design, clinical evaluations, and other assessment methods such as simulation and portfolio assessment. Course assessments soliciting feedback from students will also be discussed. | 3 |

Spring Two

| Course | Description | Credits |
|----------|--|---------|
| MEDS0000 | Physiology Elective 2 (see below for list of “Physiology Electives”) | 4 |
| MEDS0000 | Research Methods This course is designed to provide doctoral students with an in-depth analysis of the methods and procedures of research in education. The course will introduce students to qualitative, quantitative, and mixed methods research approaches in education. Students will develop a broad understanding of these methods and how/when they should be employed. Specific topics will include conceptualizing educational research, constructing measurement instruments, collecting and analyzing qualitative and quantitative data, drawing inferences, and writing research proposals. As a depth requirement, students will employ one specific method in the design and possible implementation of a small research study which they will present orally and as a written formal research proposal or article. | 3 |

Summer Three

| Course | Description | Credits |
|----------|--|---------|
| MEDS0000 | Immersion 1 Students will engage in a project with an in-depth focus on anatomical education thereby giving additional context to their training and career as an educator in health care professions programs. Students will choose one track per Immersion term from the following options (individual tracks may repeated in more than one term): i. Pedagogical Immersion: Under the guidance of a faculty mentor, students will take the lead on developing and delivering classroom sessions, laboratory demonstrations, learning assessments, and grading. | 4 |

| | | |
|----------|---|-----|
| | <p>ii. Research Immersion: Students will complete a faculty-mentored research project related to instruction, such as an educational intervention, or a project in an area of anatomy.</p> <p>iii. Anatomical Prosection Immersion: Students will complete an extensive and detailed dissection in the cadaver lab with the goal of producing an anatomy demonstration (prosection) that will be used for instruction in medical student anatomy courses.</p> | |
| MEDS0000 | <p>Principles of Online Course Design</p> <p>This course explores the skills and knowledge necessary to craft engaging, accessible, and effective online learning environments tailored to the needs of allied health professional students. Participants will dive into key concepts, including learner-centered design, accessibility and inclusivity considerations, multimedia integration, and assessment methods for online contexts.</p> | 2 |
| MEDS0000 | Free Elective (see below for list of “Free Electives”) | 3-4 |

Fall Three

| Course | Description | Credits |
|----------|---|---------|
| MEDS0000 | <p>Immersion 2</p> <p>Students will engage in a project with an in-depth focus on anatomical education thereby giving additional context to their training and career as an educator in health care professions programs. Students will choose one track per Immersion term from the following options (individual tracks may repeated in more than one term):</p> <p>i. Pedagogical Immersion: Under the guidance of a faculty mentor, students will take the lead on developing and delivering classroom sessions, laboratory demonstrations, learning assessments, and grading.</p> <p>ii. ELECTIVES:

Physiology Electives (2 required)

| Course | Description | Credits |
|----------|--|---------|
| MEDS0000 | <p>Cell Physiology</p> <p>This course is a comprehensive study of underlying concepts common to the major cell physiology processes of the body. The course is designed for those seeking a solid grounding in cell biology and physiology. The course focuses on basic physiology of the cell and builds to understanding electrical activity, muscle physiology and neural physiology.</p> | 4 |
| MEDS0000 | <p>Medical Physiology</p> <p>Fundamentals of Medical Physiology is designed to provide students with an in-depth understanding of the function, regulation, and integration of human body organ systems at a level required for clinical medicine and basic research in medical physiology. The physiology of all organ systems will be covered, with emphasis placed on a functional understanding of homeostatic maintenance in health as well as in disease processes. Core concepts of cellular chemistry, function, and signaling mechanisms will also be included. Concepts are taught using a combination of recorded lectures, clinical correlations, and online problem sets. This course is designed to provide critical knowledge for individuals who wish to teach anatomy and physiology at the post-secondary level or to equip those who wish to teach anatomy at the graduate or professional degree level with appropriate foundational knowledge related to “function”.</p> | 4 |
| MEDS 544 | <p>Medical Pathophysiology</p> <p>This course is a comprehensive study of underlying concepts common to the major pathophysiological processes of the body. The course is designed for those interested in teaching pathology or pathophysiology or related disciplines or for health and pre-health students. The course adopts a system-based approach to pathology and integrates material across systems using diseases such as cancer.</p> | 4 |

Radiology Electives (1 required)

| Course | Description | Credits |
|----------|--------------------------|---------|
| MEDS0000 | Radiology Seminar | 1 |

| | | |
|----------|--|---|
| | This course is designed to strengthen students' understanding of clinical anatomy and of the application of medical imaging techniques in the clinical setting. Students will be required to prepare and present online presentations of clinical radiology cases selected from the primary medical literature. The use of real clinical cases will help students hone their skills in interpreting normal and abnormal anatomy using various medical imaging techniques and will reinforce topics in histology/histopathology and physiology/pathophysiology covered in previous courses. The course will include a focus on the design and delivery of instructional content for online delivery along with discussions surrounding best practices in developing test questions. This course is designed to provide critical knowledge and enhance instructional skills of individuals who wish to teach gross anatomy at the graduate or professional degree level or teach anatomy and physiology at the post-secondary level. | |
| MEDS0000 | Point-of-Care Ultrasound Point-of-Care Ultrasound (POCUS) has been adopted across various medical specialties. This course focuses on imparting students with a strong foundation in ultrasound physics, instrumentation, and image optimization techniques. Through hands-on sessions, learners will acquire essential skills in probe manipulation, setting optimization, and the acquisition of high-quality ultrasound images, relevant to diverse clinical scenarios. These competencies will enable students to effectively contribute to POCUS teaching across various allied health professions, facilitating broader access to this valuable diagnostic tool in healthcare. | 2 |

Free Electives (4 required)

| Course | Description | Credits |
|----------|--|---------|
| MEDS0000 | Teaching Paradigms in Medical Education Students will delve into various teaching paradigms, including but not limited to traditional didactic instruction, problem-based learning, team-based learning, simulation, and technology-enhanced approaches. Emphasis will be placed on critiquing the putative strengths, limitations, best practices, and real-world challenges associated with implementing each paradigm. | 3 |
| MEDS0000 | History of Educational Philosophy This course extends upon the foundational concepts introduced in MEDS0000 - Philosophical Underpinnings of Medical Education by providing a historical exploration of the philosophy of education both within the realm of medicine and general education. Students will select a topic that resonates with their personal interests and develop a treatise that traces the evolution of teaching within their chosen subject. By immersing themselves in the history of educational practices, students will cultivate a deeper understanding of the ways in which teaching their subject has evolved over time, the driving forces behind these transformations, and the ensuing societal, political, or professional ramifications. | 3 |
| MEDS0000 | Characteristics of Adult Learners | 3 |

| | | |
|----------|--|---|
| | Recognizing that medical professionals are destined to engage in lifelong learning, this course equips educators, healthcare practitioners, and administrators with the insights and strategies required to effectively educate and engage adult learners in the ever-evolving field of medicine. Participants will explore the foundational principles of andragogy, emphasizing its application in designing curricula, fostering active learning, and cultivating self-directed, motivated, and reflective medical professionals. | |
| MEDS0000 | Biological Basis of Sensation and Perception This course content explores the biological processes that underpin human sensation and perception, including the anatomy and physiology of sensory receptors, neural pathways, and the role of the brain in processing sensory input to derive meaning. | 3 |
| PSCH 526 | Cognitive Neuroscience Survey and analysis of major topics in field; emphasis on contemporary research and theory; related topics in perception, memory, and information processing and transformation. Additional projects/assignments required for graduate credit. | 3 |
| PEP 507 | Sports Biomechanics The purpose of this course is to investigate sport performance from an applied mechanical approach. Students will assess sport techniques, injury risk factors and equipment designs incorporating concepts of Newtonian Mechanics. | 3 |

Program Resource Requirements.

- Indicate all resources needed including the planned FTE enrollment, projected revenues, and estimated expenditures for the first **four** fiscal years of the program
- Include reallocation of existing personnel and resources and anticipated or requested new resources.
- Second and third year estimates should be in constant dollars.
- Amounts should reconcile subsequent pages where budget explanations are provided.
- If the program is contract related, explain the fiscal sources and the year-to-year commitment from the contracting agency(ies) or party(ies).
- Provide an explanation of the fiscal impact of any proposed discontinuance to include impacts to faculty (i.e., salary savings, re-assignments).

I. PLANNED STUDENT ENROLLMENT

| | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | | <u>FY 29</u> | |

Onsite Visit Report

Doctorate of Anatomical Sciences Program

The contents of this external programmatic review are intended for the prospective Doctorate in Anatomical Sciences (DAS) Program of the University of Idaho.

External Program Reviewers

Jessica Byram, Ph.D.
Indiana University

Adam B. Wilson, Ph.D.
Rush University

Caroline H. Wilson, Ph.D.
Chapman University

Date of Onsite Visit

August 9, 2022

Date of Original Report Submission

August 18, 2022

Date Program Confirmed Accuracy of Report

November 13, 2023

Report Guidelines

The panel is asked to assess the program within the present and projected future contexts, addressing program elements, faculty, need, and resources.

1. Program

1. Program quality as determined by its curriculum, faculty, infrastructure support, funding, and external partnerships.

A review of the program's quality was determined on the basis of the following five elements:

Curricular Offerings and Sequencing

Judgements concerning the quality of course offerings and curriculum sequencing were determined according to: (a) the comprehensiveness of course syllabi, planned content delivery, and assessment practices, (b) faculty qualifications and demonstration of teaching excellence, and (c) the availability of necessary course-level resources.

As proposed and confirmed through interviews, the Doctorate of Anatomical Sciences (DAS) degree requires the successful completion of 81 total credit hours of coursework, including a dissertation, for graduation. The program's plan of study entails coursework in the anatomical sciences, related biomedical sciences, education, and research.

The quality of the biomedical course offerings was deemed appropriate for the program and training level based on classic offerings within the field and the quality and effectiveness of the teaching faculty as determined through CV reviews and interviews.

The original proposal did not specify a lab component for the neuroanatomy curriculum. About three neuroscience labs could be combined with gross anatomy labs in the summer without needing additional course credits. The external review team also recommends starting the program in the summer term, instead of the fall term, to lead with the gross anatomy curriculum and to allow for radiology to follow gross anatomy in sequence.

The quality of the education course offerings was deemed appropriate for the program and training level based on traditional course offerings within the field of education and the general qualifications of the College of Education, Health and Human Sciences (CoEHHS) teaching faculty as determined through their CVs. No interviews were conducted with the proposed education teachers. The review team recommends incorporating the education teaching faculty in the program's next external review.

The syllabus for the required course "EDCI 582 Online Course Design" was not provided for review precluding the review team from making a judgment regarding this course.

Curricula related to educational research design, methods, and analysis consist primarily of quantitative methods and statistics (E.g., Research Methods I and II courses). Curricula

related to qualitative methods and mixed methods research is currently missing from the original proposal and the supporting documents. The on-site review team recommends adding these missing elements to ensure the program's graduates are well-rounded in classic education research approaches.

Across all proposed courses, it remains unclear how the program will assess all course-level objectives, listed in UI's boilerplate format. While it was evident how content knowledge would be formatively or summatively assessed, it was not clear how other objectives would be assessed (e.g., "clarify purpose and perspective" or "Practice citizenship"). All course-level objectives for a given course should be assessed.

All syllabi need a careful review to ensure each has the same general tenets of a typical syllabus including: course description and overview, course objectives, required versus recommended learning materials and resources, learners' roles and responsibilities, learner assessment specifics (formative and summative), grading policies, honor code, school policies related to disability services, and a course schedule and content outline.

Currently, all elective courses are either education, psychology, or athletic training courses. The program may benefit from shifting some of the required biomedical courses (e.g., kinesiology) to elective offerings to allow for other aspects of the program values (e.g., teaching experiences) to be transcribed as part of the required core cognates. For students with prior or current teaching experiences, the program may consider a waiver of teaching practicum credits. Per the supplemental documents, TAships will be available for credit as an elective. The program should consider making TAships for gross anatomy, histology, and neuroanatomy required to further enhance graduates' marketability.

No clear direction regarding the details or timing of the qualifying/preliminary exam were provided. Program faculty discussed options ranging from having no qualifying/preliminary exam to having an exam comparable to that of a Ph.D. candidate. The determination of what this qualifying/preliminary exam will entail is highly dependent upon the type and rigor of the required research project (e.g., dissertation vs. capstone project vs. other). No consensus has been reached by the program concerning the nature and extent of the research project, aside from its focus on education-related research. Once such decisions are made, the related policies and procedures (e.g., student handbook with dissertation committee membership requirements) can be further refined and formed to meet the programs exact needs, pursuant to the College of Graduate Studies' existing policies and expectations.

Faculty Qualifications and Workload Distributions

The current complement of core WWAMI faculty are well suited for delivering and overseeing the biomedical sciences component of the DAS curriculum. The faculty's demonstrated content knowledge, teaching experiences, and teaching quality in the subject matter (as demonstrated through their CVs, teaching observations, and interviews) meets the needs of the DAS program.

Some ambiguities remain pertaining to the education component of the DAS curriculum and which faculty are most likely to assume lead teaching and research mentorship roles. Options for ensuring the program will have enough qualified faculty for teaching education courses and overseeing education-focused research projects include: 1) partnering with faculty from the CoEHHS, 2) partnering with education-focused faculty in the Doctorate of Athletic Training (DAT) program, and/or 3) hiring new program faculty with experience in education research and practice. Upon CV review of core WWAMI faculty who are specialized in the biomedical sciences, only Drs. Baker and Seegmiller have prior experience in conducting educational research.

Dr. Dave Pfeiffer is slated to be the DAS program director. He will receive dedicated administrative time for this role and a release of some of his WWAMI responsibilities for program design and implementation to launch the program.

The program estimates needing 4.0 FTE to sustain the program once it reaches full capacity. Faculty workloads are likely to consist of time dedicated to teaching, student mentorship for research oversight, research, service, and administration. The exact workload allocations have not yet been determined and no labor distribution grid was provided.

Infrastructure Support

The program's facility infrastructure (i.e., primarily the gross anatomy laboratory) is maintained and supported by WWAMI. The anatomy laboratory is a new state-of-the-art facility equipped with the necessary resources for delivering gross anatomy instruction as observed during the campus tour.

The program's resource infrastructure (e.g., models, technology, library resources, etc.) meets or exceeds the program's needs. Resources are easily accessible and not dependent on cohort size. Ideally, DAS students will have access to all of the same resources WWAMI medical students have access to. More clarity on the feasibility of sharing identical resources between these student populations is needed.

The program's human capital is currently insufficient for initiating the program. Additional program faculty will be needed for curriculum development and implementation, committee work (e.g., admissions), advising/mentoring, and overseeing students' research projects. It is estimated that an additional 2.0 FTE will be needed to implement the program once at capacity (for 4.0 FTE total). The program would also benefit from offering their current faculty opportunities for professional development in educational research, andragogical practices, and educational theory.

The program's administrative infrastructure is consistent with that of similar UI graduate programs. Some services (e.g., program coordinators) are likely to be shared between programs and the program director can anticipate protected administrative time for program oversight.

Funding

In the first year, the program will run in deficit due to start-up costs. WWAMI will cover 2-years of teaching costs (totaling \$303,600.00) to establish the program. WWAMI funding has already begun and is likely to expand as early as fiscal year 2024. The year of the first matriculating class is contingent upon internal and external program approval by UI and the Idaho State Board of Education, respectively.

Ideally, funding for curriculum development and program administration would begin at least one year in advance of the first matriculating class to ensure the readiness of the curriculum (e.g., creation of new courses), policies/procedures, etc.

Program funding will not use state appropriated funds, federal grants, special fee arrangements, or contracts.

The program will be funded through student tuition revenue. Per the budget estimates, to sustain program funding for 4 full-time faculty, the program must maintain an annual minimum enrollment of 16 students per cohort. Once the program's proposal moves forward in the University's internal process, a formal market analysis will be conducted. This market analysis will be helpful in determining whether a sufficient annual volume of applications to sustain this high enrollment program is likely. For program marketing, the program plans to dedicate funds for outreach and intentional marketing at conferences and elsewhere.

External Partnerships

To date, no partnerships external to the WWAMI DAS program have been formalized. Future talks and potential partnerships with the UI CoEHHS are pending for the purpose of integrating students in education-focused courses and involving faculty with education research expertise in the mentorship of student research projects.

2. The program objectives and requirements; the mechanisms for program administration and assessment.

Student Objectives

The original proposal contained three global student learning objectives that students are expected to attain prior to graduation. These objectives broadly aligned with the proposed goals of the program.

1. The DAS students will have a broad teaching competency relevant to medical and clinical education.
 - a. This objective is well-established throughout the curriculum and is essential for developing expertise in anatomy education.

2. The DAS students will enter their profession with a combination of teaching experience and a foundation in higher education theory.
 - a. In addition to taking courses in the biomedical sciences, students would take education-related coursework within three major content areas (i.e., curriculum design and assessment, educational and learning theory, and program design and evaluation) to develop their competence in educational pedagogies, theory and practice. Teaching assistantships may be offered as elective credits. However, details about these practical teaching courses were not provided.
3. The DAS students will have experience to develop and assess the outcomes of educational interventions, programs and processes.
 - a. Through the process of writing an original research dissertation, students are likely to critically analyze data related to educational interventions and related outcomes.

The proposal also contained the below learning objectives that are similar to, but different from, those listed above. It is not clear which set of objectives will be used and how these student learning objectives map to the program-level objectives.

1. The DAS students will develop foundational knowledge in curriculum design and pedagogical technique to shape and/or improve their teaching practice.
 - a. The curriculum contains required coursework in curriculum design whereas teaching/pedagogy courses fall in a required and elective list. However, it is unclear whether the proposed elective practicum courses will be required to assess students' improvements in teaching practice.
2. The DAS students will improve their teaching practice by creating professional knowledge through applied scholarly inquiry (e.g. education research).
 - a. The original proposal was unclear on the scope of the dissertation as descriptions ranged from a "dissertation capstone project" to "dissertation-like experience" to dissertation. The project would be original research into instruction or an educational intervention. However, more details about the dissertation are needed to demonstrate it will achieve this outcome of applied scholarly inquiry.
3. The DAS students will expand and reinforce their expertise in the core subjects of the anatomical sciences through rigorous course work, with a focus on dissection-based gross anatomy.
 - a. Biomedical coursework in the areas of anatomical sciences, including dissection-based gross anatomy, histology, and embryology demonstrate the program is likely to meet this objective. Dissection-based neuroanatomy may also be included to further achieve this outcome.
4. The DAS students will broaden their scope of expertise in subjects relevant to

educating allied health professionals, including medical imaging, (patho)physiology, and Kinesiology.

- a. Coursework in physiology, pathophysiology, radiology, and medical imaging indicate the program will meet this objective.

Assessment of Student Learning Objectives

Assessment plans for student learning outcomes in the original proposal included formative and summative assessments. The program's summative assessment plans related primarily to a "dissertation-like" experience and comprehensive testing in the form of a preliminary examination. Formative assessments were proposed to be built into the coursework. However, the syllabi only contained placeholders for assessments and had not been fully fleshed out. The proposal could be strengthened by linking program-level objectives and student learning outcomes to specific assessments within the program and curriculum. More specificity related to course-level assessments, especially formative assessments, is needed.

Program-Level Objectives and Assessment

Program-level objectives were later provided as supplementary materials as "WWAMI's Doctoral Standards and Assessment Strategies" within the Program Practices (4) document and have been adapted from the University of Idaho's Learning Outcomes to provide additional details on graduate-level program evaluation and assessment. Details are provided below:

"WWAMI's standards are assessed at various times during the doctoral student's program, through both direct and indirect means. The intent of the assessment process is to inform the program of strengths and areas for improvement through a continuous and rigorous assessment process and cycle. Graduate students will be asked to complete a survey periodically or participate in a focus group where data will be gathered on the program goals, and doctoral learning outcomes. Regardless of the tool used to collect data for program evaluation and learning assessment, the student's identity will be kept confidential.

- *Learn and Integrate*: University of Idaho WWAMI DAS graduates have a comprehensive understanding of the philosophical foundations, historical developments, and contemporary aspects of their specialization area. They have a deep theoretical and conceptual knowledge of their field and are committed to trans-disciplinary discovery, with the ability to integrate their knowledge into their teaching.
- *Think and Create*: University of WWAMI DAS graduates design, conduct, interpret, evaluate, and disseminate research. Graduates understand research frameworks and can apply research skills to contribute to the expansion of knowledge, address societal problems, or exemplify creative expression. They are critical consumers and producers of research to generate new knowledge for the profession.

- *Practice Citizenship*: University of Idaho WWAMI DAS graduates are effective leaders, teachers, and mentors. Our graduates are about to work with various stakeholders to engage in the creation of informed policy and practice, and identify trends and issues by using sound models and principles.
- *Clarify Purpose and Perspective*: University of Idaho WWAMI DAS graduates have a critical awareness of educational practices and evaluation procedures. Graduates design effective courses and valuable content, with formative and summative evaluation strategies for people, programs, and policy. They understand culturally complex constituents and adhere to ethical, moral, and legal standards.
- *Communicator*: University of Idaho WWAMI DAS graduates disseminate new knowledge through published works, professional presentations, contract and grant activity, teaching, and consulting. Graduates contribute to scholarship and practice at local, national, and international levels, while serving as advocates for social justice, equity, learning, and change.”

STRENGTHS: Updated program objectives align with the UI learning outcomes and are appropriate for a doctoral-level program.

IMPROVEMENTS: Currently, the program-level objectives are not clearly linked with outcomes of program coursework, examinations, or research requirements. The program would benefit from: 1) specifying the direct measures that will be used to evaluate the program-level objectives, 2) establishing target expectations for each program-level learning objective, and 3) describing processes for the regular review of program outcomes and how this relates to continuous quality improvement. The program would also benefit from closely monitoring indirect measures of program performance such as GPA, grades, and graduation/attrition rates.

Program Requirements

DAS students may be required to complete a preliminary examination (qualifying examination) before advancing to candidacy, and into the research phase of the program. Details of the qualifying examination are yet to be determined (e.g., timing, type [oral/written/both], and whether the examination will be a requirement or not). Furthermore, details of the dissertation and expectations are yet to be determined but may be linked to several program-level objectives.

Program Administration

3. The program's alignment with the institution's mission.

As stated on the [University website](#), the institutional mission emphasizes *innovative thinking, community engagement and transformative education*. The DAS mission statement (described on “1. DAS mission and Vision.doc”) is “to train the next generation of educators who will lead the field in providing expert teaching and research

in anatomical sciences to train the future health care workforce.” The two missions appear to be in alignment, with some improvements noted:

- The proposed hybrid DAS program appears *innovative* in its combination of online and in-person, and science and educational coursework to train future health care professional educators. Students will be asked to develop a dissertation on educational innovations and outcomes, although there are few details on the dissertation project or how the information could be disseminated through public presentations and publications. Collaborations with other departments such as the DAT and possibly the CoEHHS will provide opportunities for interdisciplinary scholarship, further increasing opportunities for innovation. In addition, this innovative curriculum also includes training in radiology and medical imaging, which are increasingly used for medical diagnoses.
- While opportunities for *community engagement* may be feasible through students’ dissertations on educational projects, the proposal did not mention community interventions explicitly. The proposal’s societal goals do include addressing staffing issues related to health care professional education, and a hybrid program will allow accessibility to those in diverse communities who may need training in this field.
- The degree should allow educators with non-terminal degrees new opportunities to *transform* their teaching practice and also address the shortage of anatomy educators in the workforce. According to “1. DAS mission and Vision.doc”, the DAS program hopes to contribute to the reputation of the Department, College, and University with diverse student recruitment, diverse program scholarship, and the development of a national reputation as a program leading in the training of anatomy educators. However, explicit details regarding how this mission may be carried out are largely missing from the proposal.

STRENGTHS: Innovative hybrid program with opportunities for interdisciplinary research and long-term job prospects for those who complete the program.

IMPROVEMENTS: No mention of specific community engagement project opportunities, details about how to increase diversity, or goal for research dissemination noted within the proposal.

4. **The depth and breadth of coverage in terms of faculty availability and expertise, regular course offerings and directed study, and access to support resources within and external to the institution.**

Faculty availability and expertise: Three people were identified in the proposal as part of the program team: Dr. Peter Fuerst (WWAMI Associate Director for Curriculum), Dr. Dave Pfeiffer (Director of Anatomy), and Mr. Joshua Johnson (Anatomy Lab Manager). A fourth anatomist was also mentioned but not identified (p.4 of proposal). The final

proposal should consider adding the information for the additional biomedical faculty members identified in “5AandB. Required & elective course list with instructors.xls”, including: Drs. Belinda Sanchez, Jeff Mallatt, Bethany Fehrenkamp, Derrick Phillips, Tyler Bland, and Russel Baker.

All identified biomedical science faculty already have teaching assignments in the WWAMI program, DAT, or both. The program proposal indicates they “have intensive teaching responsibilities during the academic year but flexibility over the summer months,” (p.4), which indicates that at least four already-hired faculty members may not teach the core courses proposed in this program or they will record materials for the core courses during the summer to be delivered asynchronously during the fall and spring. The proposal did not specify their workload plans or how new faculty may be involved in curriculum development. The proposed summer anatomy courses may be co-taught (according to an interview with P. Fuerst). Workload arrangements will need to be clearly defined prior to starting the program.

CVs of all bioscience faculty outline their extensive, award-winning teaching experiences and expertise in anatomy and/or biomedical science education. The proposed director of the program, Dr. Pfeiffer, has taught anatomy for almost twenty-five years, helped develop medical school anatomy curriculum, and has considerable administrative experience as a Director of Anatomy and in Undergraduate Research Program management. All additional faculty have ample experience in teaching courses related to those proposed in “5AandB. Required & elective course list with instructors.xls” with the exception of Tyler Bland who may not have taught a pathophysiology course previously (committee did not meet with Dr. Bland).

Faculty members who teach in existing College of Education courses, planned as part of the requirements for the DAS, also are identified in the “5AandB. Required & elective course list with instructors.xls” file and include: Drs. Krista Soria, Michael Kroth, Rodney McConnell. One faculty member in Movement Sciences, Joshua Bailey, was also identified for teaching a required Sports Biomedicine course. The CVs of the non-WWAMI faculty members all include evidence of expertise in their respective courses and content areas, with many faculty members having taught the same or similar course previously. The course regularity / faculty availability is assumed to be scheduled by their respective colleges or departments and not controlled by the WWAMI program. As such the DAS program should obtain formal agreements with the relevant colleges and departments if the core education courses are to be taught by faculty external to WWAMI.

The program proposal also details plans to hire an additional two full-time non-tenure track faculty in the first year of the program, and may add two additional hires in subsequent years (see budget and p.16 of proposal). More clarity is needed regarding the intended qualifications and experiences of the faculty the program desires to recruit. New faculty were indicated to have a reasonable 2 course teaching load per semester, but it is unclear if they would serve as course directors or co-instructors. When hiring new faculty, consider requiring experience in educational research, as the current biomedical

science faculty have strong biomedical research publications and curriculum development experience, but lack expertise in medical education research approaches.

All core program faculty may need to support and oversee students' dissertation projects, although only the newly proposed FTEs listed education research mentoring for a student cohort as part of their workload (p. 16, proposal). The proposal outlines a total of at least four core faculty, who will supervise up to 20 students per year; this is a ratio of 1 faculty member to 5 students per year, at least initially. A clear expectation of research mentorship (including the role of major professor and committees) for both newly hired and existing faculty should be addressed. It was noted that current faculty may have their workload adjusted, if needed. Faculty in DAT or College of Education, Health and Human Sciences may also be tasked to support dissertation projects through committee work and mentoring. We suggest creating a formal agreement with other UI colleges/departments for mentorship and dissertation oversight.

Additional faculty responsibilities are likely to include the oversight of second-year DAS students teaching first-year DAS students in the summer anatomy laboratories. Students are required to keep "impact journals" relating to their teaching practice, which faculty will need to evaluate (perhaps as part of a capstone course, although no such course was listed in Appendix C). All courses in the program listed in Appendix C are "new", so faculty will also be responsible for course development. One suggestion regarding program development would be to hire faculty prior to the program start date so they could work with the Office of Online Education to develop state-of-the-art online curricula for the students. Innovative curricular approaches could be used in marketing the program as well.

STRENGTHS: Current biomedical science faculty members are experienced and capable of teaching and developing curriculum in the biomedical sciences, and all have flexible summer availability.

IMPROVEMENTS: There is a need to hire faculty with educational research experience and establish a clear delineation of duties for current and future faculty to ensure workloads are feasible, particularly outside of the summer months. Formal MOUs with colleges/programs outside of WWAMI are crucial and should include agreements regarding coursework, shared costs, and faculty mentorship responsibilities.

Regular course offerings and directed study: The DAS proposal proposed courses offered by both WWAMI and additional departments and colleges (non-WWAMI):

WWAMI: Regular courses proposed by the DAS include a breadth of subjects that a trained anatomist should be exposed to in a quality program including anatomy, histology, physiology, pathophysiology, embryology, and neuroanatomy (Appendix C). In addition, this innovative curriculum also includes training in radiology and medical imaging, which are important skills for anatomy educators to teach future health care professionals making diagnoses. While the breadth of subjects may be useful for training future anatomists, consider adding tracks of study within the curriculum with different

required core courses, such as a “physiology” track that includes Neuro, Cell- and Patho-Physiology and a “kinesiology” track that includes Sports Medicine and other identified anatomy-based coursework. Students may also focus their dissertation topics within the same tracks based on their inherent interest.

All DAS biomedical courses are modeled from parts of the WWAMI medical school curriculum, which has a 50-year mature and time-tested approach to learning. Knowledge in most of the core courses will be assessed through summative course-level assessment and writing assignments. One exception to this is included in the Radiology syllabus. This course is an asynchronous self-paced course which requires the review of 24 medical cases followed by a multiple choice question (MCQ) assessment. Students are required to design and deliver two online presentations and take the accompanying set of multiple choice questions developed by their peers. Each student will also be required to critique the design of one presentation and question set developed by a fellow classmate prior to its delivery in the course. This assessment approach meets the objectives of the program to train future anatomy educators. In talking with the director of the DAT program, some of their courses require iterative research projects to assess learning objectives. The DAS program may borrow some of the DAT course assessments and curriculum design to increase alignment of the program’s goals.

Regarding the anatomy content, two core anatomy courses will be taught in a state-of-the-art anatomy lab facility (Anatomy I, Anatomy II) in two 9 credit, in-person, summer courses (18 of the proposed 78 credits). These two courses are the main focus of the core DAS curriculum as the students will go in-depth to learn cadaver-based gross anatomy in a way that could not be offered remotely. Anatomy II credits may also entail teaching the Anatomy I students, but this goal was not directly indicated in the syllabus. Consider adding teaching practicum credits as part of the second summer curriculum to ensure separate learning objectives for this opportunity. The Anatomy I syllabus also notes that medical imaging will be included in the Anatomy I course without explicit reference to how the material may be expanded on in the Medical Imaging core course. Creating links between the courses will be important, as well as ensuring the degree type is maintained (e.g. the Anatomy I syllabus (p. 44) notes the goal of teaching an online course for a PhD program, not the DAS). More information is also needed regarding how the program and University compute course credit hours. A total of 18 credits for the instruction of human gross anatomy is high and nearly double that of comparable anatomy education programs (e.g., at Indiana University “Human Structure” is 9 credits (and also include histology); at the University of Mississippi Medical Center, “Gross Anatomy” is 6 credits; at Lake Erie College of Osteopathic Medicine “Gross Anatomy” is 10 credits). The excess of credit hours for the DAS anatomy course could be reallocated for teaching practica credits to help fill this current gap.

Additional anatomy topics (Neuroanatomy, Embryology, Histology) are scheduled to be taught online (course names abbreviated here; see Appendix C for the full names). Neuroanatomy was listed as an online lecture (*note, this course is missing from p.10 list of proposal and is listed as Neurophysiology on the “5AandB. Required & elective course list with instructors.xls” file*). As the curriculum becomes more concrete, a

neuroanatomy lab opportunity and practical exams in histology and neuroanatomy could be added as additional forms of assessments. If a physiology track is added, Neurophysiology could be added as an elective.

The depth of DAS courses may also depend on the delivery mode. Some of the syllabi include the term “online” while some list “recorded lecture” as the mode of content delivery. Adding more descriptive terms like “synchronous learning” or “asynchronous learning” may be necessary to assist students in understanding the delivery style for each course. Mapping the goals of the curriculum delivery ahead of time may also help to guide faculty workload allocations for current and incoming faculty. Consider working with the Office of Online Education to outline and apply instructional design methods to ensure up-to-date approaches for course delivery.

All DAS syllabi outline learning objectives in line with UI’s standards of learning/integrating, thinking/creating, communicating, clarifying purpose and perspective, and practicing citizenship. As this program emphasizes the need to train future anatomy educators, the program may consider expanding their assessment goals to include the creation of more educational products (e.g., the Radiology course requires students to develop their own MCQs and cases; most other assessments measure content knowledge or ask the learners to write reviews about basic science research). Having students create a team-based learning (TBL), problem-based learning (PBL), and flipped classroom module could easily be incorporated across teaching practica as required deliverables. Currently, it’s not clear how all course-level objectives will be assessed in each course (e.g., clarify purpose and perspective; practicing citizenship) or how course objectives map to program level objectives.

Non-WWAMI: Courses in higher education, curriculum design, and educational research methods were also included in the document “5AandB. Required & elective course list with instructors.xls”. The courses fit the educational goals of the DAS curriculum with assessments that require the application of material, rather than purely rote memorization. The courses are appropriate in depth and breadth. Currently, qualitative research methods are not covered in the curriculum, though students need exposure to quantitative, qualitative, and mixed methods designs. Consider working with the education faculty to develop and apply a variety of assessments in the biomedical coursework (e.g., weekly written reflections found in the AOLL 574 syllabus). Ideally, the program will have strong continuity between teaching about educational practices and demonstrating directly how educational practices are applied to biomedical and education courses.

The regularity of course offerings was not directly addressed in the proposal. Presumably the courses would be offered each term as outlined in the “4 DAS POS Schedule Outline.xlsx” file, thereby offering each cohort a yearly offering of each course. The curriculum plan does not indicate plans for remediating students or gaps if students have to take a leave of absence or enroll part-time. The three year plan may be too ambitious for a student who still works as an instructor while completing the degree; one of the program’s target populations. Consider developing an alternate part-time option.

Similarly, the timing and duration of the dissertation phase may vary if a student requires flexibility.

STRENGTHS: The core biomedical courses are based on tried and true curricula used in the WWAMI medical program and will be valuable courses for future anatomy educators.

IMPROVEMENTS: Regular course offerings could include more variety of assessments and assignments for monitoring student progress and content mastery. More details concerning dissertation guidelines and parameters are needed. A curriculum plan is also underdeveloped without explicitly addressing the regularity of offerings and their delivery approach (online synchronously, online asynchronously, or in-person). Consider offering tracks of study and part-time enrollment to encourage greater program marketability.

Support resources: The proposed program is defined as a self-support program and will charge a program fee, in accordance with the policies set forth in Section V.R.3.b.v of the Idaho State Board of Education Governing Policies and Procedures. The proposed program is housed within the WWAMI Medical Education program which reports to the Provost and Executive Vice President ([organizational chart](#)). The [College of Graduate Studies](#) will also support graduate training if teaching assistantships are developed. The proposal also mentions sharing resources with the UI's DAT program, including provisions for a shared curriculum and student recruitment efforts. Further details regarding the nature of this sharing agreement are needed. Program support also relies on high enrollment goals. As the program builds, a possible minor in anatomy for UI undergraduate students may help to ensure the program's success and sustainability.

All core courses recommend "classic" textbooks which may be available online through UI's library services, but their availability was not noted. In most courses, textbooks are listed as course recommendations (not requirements), but p. 4 of the proposal noted the desire to "utilize open educational resources or faculty developed resources when possible. For anatomy content we will utilize existing anatomy curriculum and faculty developed material in addition to textbooks." No examples of faculty-developed materials were provided. It is unclear how much curriculum development is needed. The Office of Online Education may provide support in instructional design for these materials, while the Library may be able to identify open educational resources or subscription services like Clinical Key that the students can use remotely.

No external resources are being requested by the program. It will subscribe to a self-support model utilizing WWAMI's existing facilities and UI's existing education infrastructure. The proposal notes that if the self-support model fails, the program will be discontinued with tenured faculty offered reassignment and non-tenured faculty positions terminated.

STRENGTHS: If projected enrollments are met, the program will be self-supported with existing facilities and no external resource requirements. Regular course offerings could

include open educational resources or hyperlinks with support from library and/or Office of Online Education.

IMPROVEMENTS: Resource sharing with other departments is unclear and should be further developed prior to finalizing the program's proposal.

- 5. The relationship of this program to undergraduate and other graduate programs at the institution and other institutions in the state, if appropriate. Consider collaborative arrangements, partnerships, interdisciplinary programs, service functions, joint research projects, support programs, etc.**

The DAS program will be a WWAMI program situated within the University of Idaho and subject to oversight by the College of Graduate Studies. DAS students will have access to the same institutional resources as other UI graduate students. However, it is unclear whether they will have access to the same textbooks, library resources, and programs/platforms (e.g., ExamSoft) as WWAMI medical students. This is an important consideration to ensure DAS students have the appropriate resources to be successful in their coursework and exposure to other biomedical and clinical resources available to medical students, whom DAS graduates may one day educate.

This program was not proposed to have direct relationships and partnerships with other institutions in the state of Idaho, but DAS students may be employed at post-secondary institutions across the country and may possibly complete elective teaching practica within these institutions. The proposal could be improved by further elaborating on how teaching objectives can be met through teaching practica while at UI (e.g., in Gross Anatomy II) or through other mechanisms given the majority of the program will be delivered through distance learning.

The proposal includes several College of Education, Health and Human Sciences (CoEHHS) courses within the required and elective program plan of study, yet the details of the relationship with the CoEHHS have not been fully developed. Interviews with Drs. Feurst and Pfeiffer indicate a model outlining the relationship of cost-sharing for tuition for DAS students enrolled in CoEHHS is yet to be determined. There were discussions of using CoEHHS coursework during the initial launch of the program and then moving toward in-house offerings of education coursework by DAS faculty.

The online biomedical science courses will be developed in partnership with the UI Center for Excellence in Teaching and Learning staff in the Office of Online Education. According to Dr. Ken Udas, UI currently has 35 online graduate programs that are undergoing review for viability and sustainability.

During the summer semesters of year 1 and year 2, the program will require DAS students to attend UI in-person for Gross Anatomy I and II. In-person components will allow for connection of DAS students to students in their cohort and the greater UI community. It was proposed by the review team to consider beginning the program in the

summer to allow DAS students to meet their cohort prior to beginning the online components of the program and to allow the curriculum to lead with Gross Anatomy. This approach may facilitate stronger collaborative relationships among students before they transition to fully remote coursework.

The proposal did not discuss joint research projects, but more details on research were requested prior to the site visit (“3. Research Support”) and were further discussed during the interview with Dr. Seegmiller. He discussed several potential collaborative research relationships with local projects and organizations. The Area Health Education Center ([AHEC](#)) Scholars program “brings together students from multiple health disciplines, emphasizing a team-based approach to addressing health disparities.” DAS students would have to receive Health Resources Services Administration (HRSA) approval to take part in the program. A second program that partners with WWAMI Medical Education is [Project Echo](#) (Extension for Community Health Outcomes), which “uses an ‘all teach, all learn’ model that empowers Idaho healthcare professionals to treat complex diseases with specialist-level expertise no matter where they practice.” Finally, the [Office of Underserved and Rural Medical Research](#) falls under WWAMI Medical Education and may provide opportunities for DAS students to conduct joint research projects in the areas of health equity and social determinants of health.

STRENGTHS: There are well-established research programs at WWAMI Medical Education in the areas of health education and equity. These existing programs could serve as collaborators for DAS students.

IMPROVEMENTS: It is unclear how proposed research relationships will benefit DAS students as more details about the expectations of the dissertation are needed to fully understand how the joint research projects could meet the needs of the DAS students to fulfill their research requirements in educational research.

- 6. The justification in terms of state needs, demand, access, and cost effectiveness (if this program represents a duplication in the state). If there is duplication, provide evidence why duplication is necessary.**

Overall, the justification for initiating this program is sound, reasonable, and supported by published evidence.

According to a 2021 publication (Wilson et al.), only 8 Anatomy Education PhD programs exist in the U.S. and none of these programs are affiliated with the WWAMI system or the state of Idaho. The current demand for skilled anatomy educators in the U.S. is high as demonstrated by a triangulation of data involving the perceptions of chairpersons of anatomy-related departments (Wilson et al, 2020), job posting data from the American Association for Anatomy (AAA; Wilson et al, 2020), Survey of Earned Doctorates data from the National Science Foundation (Wilson et al, 2021), and faculty retirement data from a survey of AAA members (Edwards et al, 2022 - in press). Student enrollment surges and the increased number of health professions programs requiring anatomy instruction are the driving forces yielding an increased demand for anatomy

educators across the U.S. As such, more anatomy PhD programs are needed for the profession to reverse the current anatomy educator shortage, which is projected to worsen as populations of anatomists from the Baby Boomer generation begin to retire.

Access to anatomy education PhD programs is often limited due to their competitiveness. The competitiveness of these programs is predominantly a consequence of limited enrollments due to funding and mentor availability. Many programs provide tuition waivers and stipends to their PhD students through a classic PhD infrastructure model. By making the DAS program a tuition-based self-support model, the program itself is less constrained by funding, though is still constrained by the number of available faculty mentors capable of overseeing students' required research projects.

While the self-support model may be effective for the program, compared to other Anatomy Education track PhD programs, the cost incurred by students for degree completion (\$54,000) is substantially higher. However, DAS program tuition costs are comparable to programs offering professional practice degrees (e.g., DPT and OTD).

7. Potential impact of the program on the department or academic unit and college/university, as well as its effect on current programs.

The DAS program is predominantly online (distance learning) with the exception of the anatomy dissection courses offered during the summer terms. In the summer terms, WWAMI's anatomy laboratory will be fully dedicated to the DAS program and will have no overlap with other competing programs. The program's impact on the college/university is perceived by the Vice Provost for Academic Initiatives and Dean of the College of Graduate Studies to be positive as it may help the university to achieve its goal of reaching R1 research status, depending on whether the program awards a research focused degree.

Starting and sustaining this program is likely to have the greatest impact on UI's local WWAMI academic unit in the form of increased faculty workload (e.g., involvement in admissions, extra teaching, and mentoring research projects). A class size of 20 students per cohort is very large for this type of doctoral program. By comparison, most Anatomy Education track programs admit 5 or fewer students annually. By the third year of implementation, the program plans to enroll a total of 60 students and will have 4 program faculty yielding a student to faculty ratio of 15:1. This suggests that each faculty member would be responsible for at least 5 dissertations on an annual basis, assuming all dissertations can be completed within 1 year. Per the handbook for graduate students within UI's Department of Biological Sciences, "The advisory committee for Ph.D. candidates consists of at least four people: your major professor, two other faculty members from within the department, and a faculty member from outside the department. Half of the members on the advisory committee must be graduate faculty from the department." If these requirements are also applied to the DAS program, then 3 of 4 program faculty at any given time will be on the advisory committee for all dissertation projects. Involvement in as many as 20 different dissertation projects annually, whether as the primary mentor or an advisory committee member, does not seem logistically feasible from a faculty workload perspective.

Faculty labor distributions for the program's core faculty were not provided for review. The program will need to provide this information for the program's next external review to ensure the projected workloads are feasible and equitable across program faculty.

8. The program's major strengths and potential challenges

MAJOR STRENGTHS: The program's innovative hybrid approach will allow training of many future health care educators with considerable job prospects due to a shortfall of trained anatomists.

CHALLENGES: The mentorship and oversight of students' education research projects for such a large annual cohort will be a challenge. Faculty will need clear workload responsibilities and dedicated time for research oversight. The program's short 3-year timeline and the absence of a clear process for defining the scope of research projects may also present a challenge for students to graduate on time.

Because this program plans to target individuals who are current educators, it may be challenging for such individuals to take a full-time course load. While the DAS program is planning for its online courses to be delivered in a hybrid (synchronous and asynchronous) fashion, it remains unclear whether courses will be offered in the evenings and/or on the weekends to best accommodate the intended population of learners.

The marketability of a new type of doctorate (i.e., the DAS degree) is currently unknown. The DAS program director is likely to assume responsibility for marketing the degree to anatomy professionals and prospective students.

9. **Whether there are additional program specialized accreditation requirements and whether the program is prepared to seek and receive this specific accreditation.**

The UI DAS program is not eligible for specialized accreditation.

2. Faculty

a. **The quality of the faculty in terms of training, experience, research, scholarly contributions, ability to generate external support, stature in the field, and qualifications to serve as graduate faculty.**

Three key faculty were identified in the original proposal as part of the program team: Dr. Peter Fuerst (WWAMI Associate Director for Curriculum), Dr. Dave Pfeiffer (Director of Anatomy), and Mr. Joshua Johnson (Anatomy Lab Manager, ABD). The CVs of all three faculty outline their notable training, extensive careers, award-winning teaching, and scholarly and research contributions.

Additional WWAMI faculty were identified in "5AandB. Required & elective course list with instructors.xls", including: Drs. Belinda Sanchez, Jeff Mallatt, Bethany Fehrenkamp, Derrick Phillips, Tyler Bland, and Russel Baker. Review of their qualifications also included extensive training, teaching experience, and scholarly contributions.

Training: All identified faculty have achieved terminal degrees (PhDs, DATs, etc.) from credentialed graduate programs in the United States, Germany, and Canada. The anatomy lab manager, Joshua Johnson, has an MS in Integrative Physiology and is currently pursuing a doctoral degree.

Experience: The DAS Director, Dr. Pfeiffer, has taught anatomy for almost twenty-five years, helped develop medical school, undergraduate, and graduate anatomy curricula, and has considerable administrative experience as a Director of Anatomy. The WWAMI faculty are also a mixture of tenured full or associate professors and clinical (non-tenured) professors who have taught in the WWAMI Medical Education program, Doctorate in Athletic Training (DAT) program, or both for many years. Jon Mallatt, an anatomist, has over 40 years of experience training anatomy and medical students. Belinda Sanchez graduated from the DAT program and may have special insight into how the DAS and DAT programs could align. Russel Baker's background in research methods will be particularly important as the design of the dissertation project evolves.

Research/scholarly contributions/ ability to generate external support/stature in the field: The core DAS program faculty are well-published in their respective fields. For instance, Dr. Pfeiffer has published over 40 peer reviewed articles, written book chapters, and received many grants and contracts, including current funding. His work has been cited over 3,500 times and he publishes in a wide variety of topics from human anatomy and physiology to comparative anatomy. Jon Mallatt's co-authored textbook, [*Human Anatomy*](#), is the #1 best-selling anatomy textbook on the market today. Russel Baker and Jeff Seegmiller co-authored a series of papers about creating the DAT program in the *Athletic Training Education Journal*. This seminal report can be used as a model for the DAS program. Baker and Seegmiller are the only faculty members in the DAS program who have published in the education research literature, rather than scholarly work in biomedical sciences. The majority of the DAS faculty are well-respected in the biomedical sciences.

Qualifications: All identified faculty members are qualified and will serve the graduate program well for instruction in the biomedical sciences. Many of the faculty have served as major professors for graduate level training and almost all have served on committees for graduate students. The only faculty who have served on education-focused dissertation committees are Drs. Seegmiller and Baker. The other identified faculty have completed research in the biomedical or athletic training fields.

Non-WWAMI faculty were also identified in "5AandB. Required & elective course list with instructors.xls". The credentials and qualifications of the CoEHHS faculty are typical of education faculty and fully meet the needs of the program for teaching education courses, assuming a formal partnership is developed between DAS and CoEHHS.

STRENGTHS: Several highly-qualified faculty members in the biomedical sciences are part of the core group that will lead the DAS program. The director has experience writing grant proposals for program development and all have award-winning experiences teaching.

IMPROVEMENTS: Future faculty who are hired should have experience and publications in medical education research or a closely related field in education to strengthen the program's expertise in this area. Currently, only two WWAMI faculty

have publications in graduate program development and experience mentoring education-focused graduate students. Given the anticipated large cohort size, two faculty alone cannot manage all dissertation research projects.

b. Alignment of current faculty research agendas and alignment with the proposed program.

Upon CV review of core WWAMI faculty who are specialized in the biomedical sciences, only Drs. Baker and Seegmiller have prior experience in conducting educational research. Whether these individuals will be closely involved in overseeing DAS student research projects remains unclear. As such, the program will need to either: 1) rely heavily on faculty external to the program (e.g., from the DAT program or from the CoEHHS), 2) hire more specialized faculty with experience in educational practices and research, and/or 3) enrich current faculty through a series of education-focused professional development opportunities.

c. Alignment of current sources of external funding to support faculty and subsequently doctoral student research

The DAS program will subscribe to a self-support model and will not rely on any external funding aside from program startup funds allocated by the WWAMI Medical Education Program. Per the proposed budget and as confirmed through interviews, startup funds will be used to reallocate WWAMI faculty time to DAS program development. WWAMI funds totaling \$303,600 will be dispersed over 2 years. On an ongoing annual basis, the UI will contribute \$20,000 to the program. Tuition revenue is the primary source of program funding. The program's operating expenditures have budgeted for annual conference travel (\$2,500-\$4,000). Funding to help cover students' research-related expenditures, publication fees, etc. were not explicitly itemized in the proposed budget. However, an annual amount of \$55,000 was designated for "materials and supplies," a likely source for covering costs incurred for doctoral student research.

d. The program/department in terms of size (number of faculty), qualifications for area(s) of specialization offered, and the student body served. Include analysis of program sustainability in light of such factors as upcoming retirements, etc.

Size: The original proposal indicates that 4 trained anatomists will be responsible for administering the program (the proposal named 3) and that 4 new non-tenure (clinical) faculty FTEs would be requested. In addition, file "5AandB. Required & elective course list with instructors.xls", listed additional faculty including: Drs. Belinda Sanchez, Jon Mallatt, Bethany Fehrenkamp, Derrick Phillips, Tyler Bland, and Russel Baker. The total number of core faculty who will be directly involved in the program is unclear. Clarity on the number of faculty and the courses they may direct or instruct is important so their workloads within the DAS program can be determined and reviewed by the next onsite team.

Qualifications for areas of specialization: Four of the WWAMI faculty are capable of teaching the proposed summer anatomy course based on their qualifications, and the course may be co-taught (P. Fuerst, personal interview). The remaining professors also have experience teaching the additional proposed core biomedical courses, except for pathology. It is unclear how teaching these additional graduate courses will be possible if WWAMI faculty are only available in the summer months.

Research is an important part of the proposed curriculum. Research Methods I and II, taught by Dr. Russel Baker, will include training in quantitative methods, meta analysis, case studies, and diagnostic testing, but the focus of the course may be more on biomedical research than on educational research. Instruction in qualitative and mixed methods research training also needs to be included.

Additional coursework is proposed to educate the DAS participants in adult learning, curriculum, instruction, and assessment design, and developing online course content. These courses are critical for future anatomy educators. Information about how this coursework will inform the program-level learning objectives and dissertation projects should be included in future proposals.

Student body: The planned DAS student population will differ from the medical students currently taught by the proposed DAS faculty in the Idaho WWAMI Medical Education Program. The Idaho WWAMI program is a partnership between the University of Washington School of Medicine and four “sister” states (Wyoming, Alaska, Montana, and Idaho) to help educate future physicians. According to the [Idaho WWAMI website](#), the WWAMI program goals include providing medical education, increasing the number of primary care physicians, providing community-based medical education, expanding graduate medical education (residency training) and continuing medical education, and providing it in a cost-effective manner. The current WWAMI goals do not include expanding education to graduate student populations. Thus one suggestion is to revisit the WWAMI goals if WWAMI will house the DAS degree. WWAMI Idaho may also consider aligning their goals with their sister partners and the University of Washington School of Medicine through a formal partnership agreement if required.

The proposed DAS program will serve a student body of future anatomy educators, which are in short supply across the country. Students will be recruited nationally by targeting multiple disciplines (e.g., biological sciences, kinesiology) and individuals with interest in doctoral training. The future student body could also include Master’s trained anatomists with no terminal degree. Considerable documentation from regional unit heads / hiring officials requesting the need for anatomists at Idaho regional campuses was provided in Appendix D of the proposal. Enrollment will begin with 20 students per year, then it increases to 30 students by year 5, which is the maximum reported capacity. These high enrollment numbers would make DAS the largest program of its kind.

Sustainability: The program’s sustainability was addressed in the proposal (p.6). The budget additionally includes a 10% attrition rate in the first year and a 25% attrition rate by the third year of the program, but with the goal of filling the program enrollments each

year. If the student body is small, the proposal outlines a reduction to as few as 5 students who would continue the program through online, recorded coursework. If the program were to be reduced or have to close, students may be able to complete their degree with this plan, but the timeline or formal procedures for program closure were not reported in the proposal.

The sustainability of the program also is dependent on the types of students who will be admitted. If the program requires applicants to have teaching experience, the pool of available applicants may be substantially limited. The pool may also decrease if the DAS program is not robustly marketed or advertised.

Regarding faculty retirement, one faculty member indicated there may be upcoming WWAMI retirements but did not elaborate (B. Sanchez, personal interview). The final proposal should create a clear succession plan for any upcoming retirements, unless there is already redundancy built into faculty workloads.

e. Sufficient faculty to support doctoral committee membership initially and into the future.

Details of the doctoral dissertation were not provided in the proposal, but were requested and provided prior to the onsite visit. The document “4. Program Practices” outlines the establishment of the doctoral committee and states committees must “consist of a minimum of four members. All members appointed must be UI faculty, affiliate faculty members, or on the graduate faculty at another institution.” It was stated in the proposal that DAS students would complete a dissertation on an educational intervention (or comparable). However, Drs. Baker and Seegmiller are the only two faculty with prior experience in conducting educational research. Joshua Johnson is pursuing a doctoral degree in education and some of the proposed new faculty hires may have a background in educational research. Drs. Krista Soria, Michael Kroth, Rodney McConnell are faculty in the CoEHHS who teach in required courses for the DAS program and have extensive involvement in graduate research committees. Despite this, if the program was to meet the proposal goals of matriculating 20 students per cohort, DAS faculty and affiliates would carry a significant mentorship burden to guide 5 or more students through an educational research project in the proposed 1-year timeline, while presumably completing other teaching and service-related tasks associated with their roles.

Supplementary document “4. Program Practices” highlights the composition of the research committee and indicates that UI allows external or affiliate committee members. “Doctoral committee members outside of the University of Idaho may be an affiliate faculty member or a faculty member at another graduate degree granting institution. They should bring an outside perspective and either represent the student's cognate (support or minor) area or be an active professional in the field.” Further, special permission must be granted if the affiliate faculty is not associated with the graduate school at their institution. Finally, half of the committee must be UI Faculty. This indicates there is support for involvement of external faculty on research committees within the DAS program.

f. Faculty workload, including availability for student advising, research oversight, mentoring, and teaching effectiveness.

Specific labor distributions for the program's prospective faculty were not provided for review. This documentation, in the form of a labor distribution grid, will be needed for the program's next external review. The labor distribution grid is critical for understanding faculty workloads and helps the external reviewers to better understand which faculty are core versus supplemental faculty. Aside from Dr. Pfeiffer's direct involvement in the program as the prospective program director, program involvement has not been finalized with other faculty.

During interviews, there was indication that WWAMI is reasonable and effective in its approach to assigning faculty workloads. However, it is not clear if a standard formula or process is used to determine workload allocations. More information on faculty workloads and the feasibility of utilizing WWAMI faculty, athletic training faculty, and/or CoEHHS faculty is needed.

Currently, the program's greatest limitation is having enough faculty trained in educational practices and methods for research oversight, given the high annual enrollment of 20 students per cohort. At present, the projected student to faculty ratio for research mentorship and oversight does not seem feasible from a quality assurance perspective.

g. The credentials, involvement of, and reliance upon support faculty from other departments within the institutions, from other institutions, and/or adjunct faculty.

Drs. Krista Soria (Curriculum), Michael Kroth (Adult Learning), Rodney McConnell (Measurement & Evaluation) are faculty in the CoEHHS who have been proposed to teach in required courses for the DAS program. Drs. Kroth and Soria have extensive experience on MS and PhD research committees and actively publish educational research. Dr. McConnell has had experience on MS and doctoral committees but not in the last 6 years. It is unclear as to what extent these faculty may take part in doctoral research committees for DAS students, but all of them have adequate and extensive (Drs. Soria and Kroth) experience mentoring and advising students in educational research.

The DAS program plans to begin collaboration discussions with the CoEHHS related to CoEHHS faculty involvement in DAS's educational efforts and research. The primary collaborative efforts have been with the two self-support programs in the DAT and MSAT programs. This collaboration includes the use of educational spaces, faculty, and research spaces. An established CoEHHS provides evidence that UI values and supports educational research/scholarship and better positions the DAS program to provide its students with educational research experiences and training. Given a formal agreement between the DAS program and CoEHHS has yet to be finalized, it is unclear which CoEHHS faculty would directly support DAS students in their research endeavors.

No other details were provided in the initial proposal or supplementary documents about support faculty from other departments/schools within the institution, or adjunct faculty.

STRENGTHS: The DAS faculty have an existing relationship with the DAT and MSAT programs within WWAMI Medical Education at UI. Faculty who may be associated with DAS educational courses, presumably from the CoEHHS, have extensive experience with educational research mentorship.

IMPROVEMENTS: It is unclear the extent to which faculty from CoEHHS will mentor DAS students in their educational research projects and whether their involvement in doctoral research committees would be at the chair or membership level. These are important considerations since few WWAMI faculty have experience in educational research.

3. Need

a. The evidence that there is significant student and societal demand for this program with respect to other institutions offering the same or similar program.

Despite other institutions offering a similar program, a shortage of qualified anatomy educators remains, as outlined above (Wilson et al, 2020; Wilson et al, 2021; Edwards et al, 2022 - in press). As such, there is significant demand for more doctoral anatomy education programs.

Furthermore, “Each year, anatomy education programs attract a breadth of applicants who are interested in teaching anatomy. However, in the case of IU [Indiana University], an average of 12 applicants are turned away annually (a rejection rate of 71% [2018–2020]) due to a limited availability of slots predetermined by financial and other constraints” (Wilson et al. 2021). The unique flexibility of the DAS hybrid program is likely to attract a number of applicants from across the U.S. including individuals who are working full-time in education and other sectors.

b. The evidence of sufficient and relevant employment opportunities for graduates of this program.

In the literature, there is clear and sufficient evidence of relevant employment opportunities for program graduates. For example, from 2018-2020, there were a total of 259 anatomy educator jobs posted on the AAA job board with an alltime high of 101 anatomy educator postings in 2021 (Figure 1).

According to responding department heads from 42 queried schools with job openings, most anatomy educator positions were opened to fill a vacancy due to either faculty retirements (36%, 15 out of 42) or faculty relocating, taking sabbatical, or assuming different responsibilities (31%, 31 out of 42). Twenty-four percent (10 of 42) of positions were brand new positions. An estimated 40% of anatomy educator openings take longer than 6 months to fill or are never filled (Wilson et al., 2022).

Figure 1: United States and Canada job postings to the American Association for Anatomy Job Board were quantified and plotted for years 2016-2021 (solid line). Linear correlation was calculated and plotted (dashed line). FROM: Edwards D, Meyer ER, Brooks WS, Wilson AB. Faculty retirements will likely exacerbate the anatomy educator shortage. *Anatomical Sciences Education*. 2022. In Press.

c. Evidence to student, regional, and statewide needs that are recognized by the profession, business, industry and governmental agencies.

According to the National Science Foundation’s Survey of Earned Doctorates ([Table 5: State or location of doctorate institution ranked by total number of doctorate recipients, by sex: 2020](#)), Idaho ranks 48th out of 52 states, including District of Columbia and Puerto Rico, for the total number of doctorates awarded by its institutions of higher learning. In 2020, Idaho produced only 9 doctorates in education and 11 doctorates in the biomedical sciences across three institutions including Boise State University (n=3), Idaho State University (n=1), and the University of Idaho (n=7; NSF; [Table 7: Doctorate recipients, by state or location, institution, and major science and engineering fields of study: 2020](#); [Table 8: Doctorate recipients, by state or location, institution, and major non-science and engineering fields of study: 2020](#)). These data suggest there is room for growth within the state of Idaho to produce more individuals with doctorates in the biomedical sciences, including the anatomical sciences with a focus on education.

According to [Idaho’s Department of Labor 2020-2030 projections](#), Idaho anticipates a growth rate of 15.9% and 19.3% for postsecondary teachers in the Biological and Health Sciences, respectively, for individuals with doctoral or professional degrees. The DAS program is one possible mechanism for meeting the state’s projected needs for these occupations.

4. Resources

- a. **The adequacy of library, computer, laboratory, and other research facilities and equipment; offices; classrooms; support services for the program; and, if relevant, the program's utilization of resources outside the institution (e.g., field sites, laboratories, museums, libraries, and cooperative arrangements with other institutions).**

The proposal indicates that the library resources are adequate, especially considering the need for support for the remote curriculum. More detailed information on library resources including example links to online resources such as ebooks, may help strengthen the goals of using open educational resources for the program as outlined on page 4.

The online nature of the program will require students to own a computer, although this requirement was not explicitly stated in the proposal. The Office of Online Education should also be consulted regarding best practices in online curriculum design and administration. The anatomy laboratory is equipped with touch-screen computers. This resource will be useful for digital access to learning and teaching resources while in the lab.

The laboratory, research facilities, and equipment are appropriate and commonplace for anatomical education. Seventeen dissection stations, anatomical teaching models, and a classroom offer opportunities for student learning during the summer months when WWAMI medical students are not present. The large lab should be able to support the cohort sizes indicated in the proposal (e.g. first and second year students at the same time). The lab facility does not currently have technologies that are used by some for anatomy teaching (e.g., Anatomage table, HoloLens, etc.). Ideally, DAS students should have some exposure to these types of anatomy teaching resources.

The WWAMI suite includes faculty offices, classrooms, and a lounge available for student study. Additional facilities include locker rooms for changing in and out of appropriate lab attire. These facilities are adequate for the proposed students.

Additional support services and collaborations with Athletic training (shared courses, mentorship, facilities), the College of Graduate Education (Teaching Assistantships, scholarships, dissertation guidelines), and the CoEHHS (shared courses, mentorship) should also be indicated in future proposals. The Research Outreach and Compliance Office should also be consulted as the dissertation projects are finalized.

No outside university resources are required for the DAS degree program. Cooperative agreements between other institutions would only be necessary if students needed to complete dissertation projects within those institutions.

STRENGTHS: The program's access to a modern anatomy lab facility, learning spaces, and student study areas are strengths.

IMPROVEMENTS: Additional information on computer and library resources for DAS students is needed. Develop program with assistance from Idaho offices for Graduate Education, Online Education, Research, and Athletic Training.

- b. The proposed budget and any need for new resources to operate the program effectively. Where appropriate, review resources available to support graduate students (e.g., fellowships and other scholarships, teaching and research assistantships).**

The DAS program will use a self-support model to operate the program. While the program eventually intends to allocate funding for scholarships and teaching assistantships to offset room, board, and travel costs for students, it is unclear to what extent this proposed support would cover the costs for all or a subset of students to attend the onsite components of the program in the summer of years 1 and 2. Further, if this support were to be provided to only a subset of students, there was no mention of which criteria would be used to determine eligibility for the award and the number of students who could be supported.

The budget allocated \$2,500-\$4,000 for conference travel, but no other line items were provided for student research or teaching support. No criteria were provided for eligibility for conference travel, which conference costs would be covered, nor the amount that would be allocated per student.

Several highly competitive external funding sources exist to fund medical education research and range from small-scale, organizational grants (e.g., AAMC Group on Educational Affairs, IAMSE, AERA) to large-scale governmental grants (e.g., NIH R25, HRSA, NSF). It is unclear as to what extent DAS students would be encouraged or required to apply for grant funding to support their educational research.

- c. In terms of national standards, the institution's commitment to the program as demonstrated by the number of faculty relative to workload and student numbers, support for faculty by nonacademic personnel (e.g., support, staff, technicians), financial support for students, and funds for faculty research and professional activities (e.g., conferences, visiting lectures).**

Currently, no standards exist for doctoral-level education in the anatomical sciences. If approved, the DAS program would be one of two self-support doctoral programs in anatomy education whereas all other programs provide financial support for their students. The self-support program at Eastern Virginia Medical School (EVMS) demonstrates that the model is a viable option for students seeking a doctoral degree in anatomy education. However, EVMS has yet to graduate a student from the program due to its relative newness, and therefore the long-term viability of the program is yet to be fully realized.

It is unclear what the workload distribution will look like once all core DAS courses are offered. With the addition of non-tenure track clinical professors, it is likely the core

biomedical faculty will have adequate workload distributions across teaching responsibilities in those courses. More clarity of how workloads are assigned is needed.

The DAS program would have significantly more students per cohort than any other PhD program in anatomy education. Small student enrollment numbers in typical anatomy education programs are primarily due to funding (as the majority of programs provide their students with stipends and tuition waivers) and the need to provide appropriate mentorship in research. One area of concern for the DAS program is the ratio of proposed students to faculty members with experience conducting educational research for the purpose of doctoral committee membership. Faculty are likely to have a significant mentorship burden and be members or chairs on numerous committees.

The budget includes support for administrative personnel. Dr. Nasypnay, program director of the DAT program, described his administrative support to involve 0.5 FTE for administrative assistance and 0.25 FTE for financial assistance and this would likely be the comparable model for the DAS program. This would likely be an adequate amount of support for the administration of the program and would reduce the administrative burden on faculty involved in teaching and research mentorship.

d. Institution leaders' commitment to this program in the long term.

The external reviewers were supplied a supplemental letter of support from the Director of the WWAMI Idaho program, and also met with him and other leaders at the University of Idaho (Gwen Gorzelsky, Vice Provost for Academic Initiatives; Ken Udas, Director of Online Education; Jerry McMurty, Dean of the College of Graduate Studies). All leaders were enthusiastic about the DAS program proposal, noting the large need for anatomists, the new anatomy training facility, and the success of the Doctorate in Athletic Training (DAT) program, on which the DAS is modeled.

Gwen Gorzelsky indicated a need to hire more non-tenure track faculty, and thus the DAS proposal to hire clinical non-tenured professors is in alignment with the university's goal. As the institution strives to become an R1 Carnegie classified institution, growth of research programs is anticipated as a key factor to success; however, depending on the nature of the DAS degree and program, it may not be counted towards these metrics.

The university has a strong track record of online graduate programs. With the existing UI resources, the DAS program will be uniquely flexible and accessible further strengthening its long-term potential.

e. The institution's ability to sustain the program in the foreseeable future along with its current and future projected commitments.

Per the proposal and as confirmed by the WWAMI associate curriculum director, two-years of teaching resources from WWAMI will be allocated to establish the program. Annual expenditures totaling \$40,000 will also be directly allocated for widespread program marketing to attract a diverse learner population and to meet the high enrollment

requirements for program sustainability. Program enrollments will be carefully reviewed on a regular basis to ensure the adequacy of the self-support model. No funding assistance from other external sources is planned, aside from WWAMI's startup funds and the institution's annual \$20,000 contribution. If the program is unable to sustain the required enrollment numbers, non-tenured faculty may be released from their duties.

STRENGTHS: All interviewed institutional leaders are supportive of the program and its self-support model. A considerable number of online graduate programs already exist at UI allowing the DAS program to capitalize on UI's existing distance learning infrastructure.

IMPROVEMENTS: The DAS program and UI leadership will collaboratively need to determine how best to align/categorize the program to help the University meet its R1 status goal (e.g., counting DAS student publications in the institutional metrics).

5. Comments/Recommendations

- a. **Summarize the major strengths and potential gaps/challenges in the proposed program as proposed with particular attention to feasibility of implementation and appropriateness of objectives for the degree offered.**

Strengths

- The DAS program will be led by a core group of classically trained anatomists who are highly motivated and have considerable experience instructing anatomy and related courses to medical students.
- The DAS program will utilize the WWAMI anatomy lab, a new, state-of-the-art anatomy teaching facility that is equipped with common resources for instruction in the anatomical sciences.
- Due to the anatomy educator shortage, more doctoral programs in anatomy education are needed; hence the timeliness of this proposal.
- The proposed hybrid DAS program is innovative in its combination of distance and in-person learning and science and educational coursework to train future health science educators.

Gaps and Challenges

- The implementation of a successful and high quality DAS program requires three primary components: 1) quality coursework and experiences in the anatomical sciences and education (including theory, psychology, pedagogies, and research); 2) ample opportunities to practice and apply what is learned from the coursework (e.g., through teaching practica), and 3) strong mentorship/oversight of students' education-focused research dissertations. Upon reviewing the program, many gaps remain including: formalizing who will lead the education coursework, ensuring student teaching experiences in histology and neuroanatomy, and ensuring the quantity and qualifications of faculty who will lead and oversee students' education-focused dissertations.

- The program has to be careful about balancing the quality of the educational experience with the need for high enrollment numbers to sustain its self-support funding model. Typically, anatomy education PhD programs are four years in duration and equip learners for successful careers in tenure-track medical school level positions. By comparison, the DAS program is 3 years in duration with much ambiguity surrounding the expectations for students' qualifying exams and research dissertations. Until these ambiguities are resolved and clarified, by comparison, the DAS degree appears to be an inferior degree to the existing PhD degrees offered in the field of anatomy education. As such, graduates of the DAS program may have difficulty attaining tenure-track faculty positions at allopathic and osteopathic medical schools. Unless the program is significantly altered, DAS graduates will likely be better equipped to attain faculty positions at liberal arts and community colleges.
- Given that no doctorate of anatomical sciences (DAS) degree currently exists, the program is taking a risk in hoping this degree will be accepted in the field by future employers. Before offering this new DAS degree, a market analysis should be performed to better forecast the degree's employability. Other degree options include an Ed.D. or a Ph.D. in the anatomical sciences. While an Ed.D. in anatomical sciences currently does not exist either, the Ed.D. degree is well established as an accepted and valued degree in higher education, including within medical and health sciences education.

b. Describe ways this program makes a unique contribution to the field.

Currently, there are only 8 anatomy education Ph.D. programs in the United States. Geographically, these programs are located in the Midwest, South, and Northeast. No programs are located in the Western half of the United States. The University of Nebraska Medical Center represents the Westernmost program in the Midwest region. Developing the first doctoral anatomy education program in the Western U.S. is very strategic and will help UI capitalize on the potential of the Western market.

c. Include any further observations important to the evaluation of this doctoral program proposal and provide any recommendations for the proposed program.

Major Recommendations

For program development to move forward, several key decisions must be made. The external review committee recommends the following major steps be taken:

1. Define the scope and nature of the dissertation research project and the qualifying/preliminary exam. Deciding on these key elements should help the program to determine how to classify the degree (e.g., as an Ed.D., Ph.D., Doctor of Anatomical Sciences, Doctor of Applied Science, etc.). Once the degree is classified, it will become clear whether existing policies and procedures (and student handbooks) from the College of Graduate Studies can be used or whether new policies, procedures, and handbooks will need to be written.

2. Determine which education-focused faculty to engage in the program (e.g., athletic training faculty and/or CoEHHS faculty) and work toward developing formal partnership agreements to fill the program's existing faculty gaps related to directing education courses and overseeing education-focused research dissertations.
3. Determine how to transcript and provide well-defined opportunities for teaching practica in gross anatomy, histology, and neuroanatomy. Consider credit waivers for those students who serve as active faculty at other institutions of higher learning for courses in the anatomical sciences they currently teach. One potential solution is providing opportunities for students to guest lecture/guest TA in summer allied health science courses offered at Lewis & Clark State College and/or Washington State University. Other curriculum gaps worth filling include offering an in-person neuroscience lab and offering instruction in qualitative and mixed methods research.
4. Determine the program's total time duration, optimal course sequencing, and matriculation timing. For example, consider matriculating each class in the summer to start the curriculum sequence with gross anatomy.

If the program's total duration remains at 3 years, consider revamping the application materials to require applicants to have a research project topic and primary mentor in place prior to program acceptance. Also consider developing research methods courses with assignments that require students to incrementally work on their research projects within each class as the curriculum progresses. In theory, this will help to keep dissertations on track for timely graduations.

5. Either hire more faculty or reallocate existing faculty time to fully develop the program's policies, procedures, and curricula prior to submitting the final proposal to the Idaho State Board of Education. There is a need for clear succession planning and to ensure balanced workloads among faculty. Given the potential opportunity for WWAMI to develop a PsychD program simultaneous to the development of the DAS program (interview, Dr. Seemiller), there may be additional program or curriculum design responsibilities assigned to WWAMI faculty that need to be accounted for.
6. The program needs to think more critically about program evaluation and how the success of the program and its many elements will be reported as measurable outcomes.
7. Overall, for this proposal to be successful, there must be stronger continuity between the proposal, all program specific documents, and the areas to be reviewed by the next onsite review team. Be certain to provide the Idaho State Board of Education (ISBoE) with the following information:

- a. Fully comprehensive program proposal that has been professionally copy edited.
- b. All supplemental program documents (e.g., CVs, syllabi, faculty labor distributions, student and faculty handbooks, committee policies and procedures, etc.)
- c. Include all information from ISBoE's external review template, even though several sections of ISBoE's external review template do not appear in ISBoEs program proposal template. We found the discontinuity between ISBoE's program proposal template and the required external review content to be striking and unexpected.

Minor Recommendations

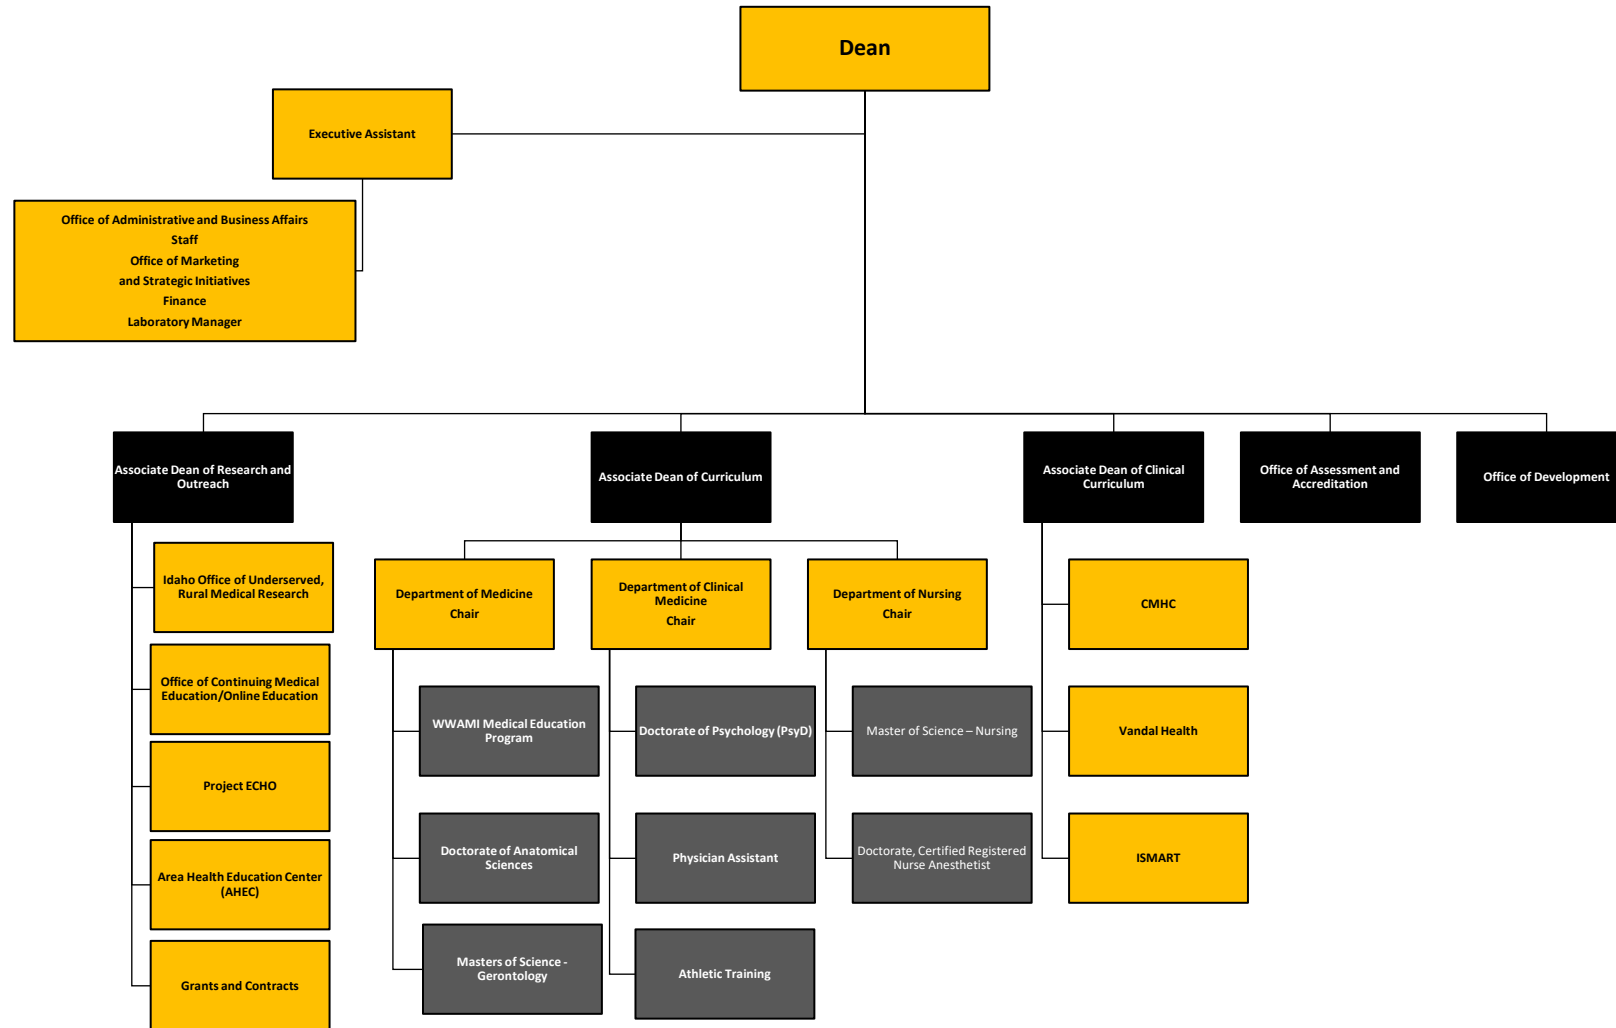

The following additional recommendations are likely to enhance the quality and marketability of the program and its graduates.

- For DAS graduates to meet the needs of modern learners in the health sciences, some exposure to a breadth of technologies used for anatomy instruction (e.g., Anatomage tables, HoloLens, etc.) is required. It is not clear how DAS students will gain exposure to such technologies. Work with the Office of Online Education to identify tools that may already be available.
- Whenever possible (e.g., on transcripts) use the WWAMI Medical Education name and logo to further enhance the program's marketability. Anatomy education programs that are affiliated with reputable medical schools are more desirable and credible from a future employability perspective. Ideally, the DAS program would be housed within a department, as opposed to being housed under the current WWAMI program. The external reviewers support the idea of creating a WWAMI Department of Medical Education under one of UI's existing colleges (e.g., College of Graduate Studies), assuming this type of organizational structure is feasible. The degree awarding unit, college, and university must be made explicitly clear to all program applicants and graduates.
- Even though the degree would be awarded through UI, it is critical for the DAS students to have access to the same medical-level resources afforded to the WWAMI medical students. It would also be ideal for WWAMI faculty to use the same resources between the medical and DAS programs (e.g., ExamSoft) to significantly reduce workload redundancies.
- The program would benefit from applying a standardized grading policy across all courses (whether P/F or graded). Such a grading policy should specify all required minimum achievement levels for content mastery. Given the review team received different versions of various policies from different units (e.g., Department of Biological Sciences, the Colleges of Graduate Studies, etc.), more clarity is needed on exactly which policies and student handbooks the program will use.

- The program may benefit from additional alignment with the mission of the university to achieve R1 status (e.g., developing research goals to align with program objectives).
- Lastly, we recommend that at least 0.50 FTE be hired to support the administration of the DAS program, rather than relying on WWAMI staff who already support the medical education program.

Regarding: Proposed Doctor of Anatomy Program at the University of Idaho

Dear Curriculum Committee,

I am writing as the lead external programmatic reviewer for the proposed Doctor of Anatomy program at the University of Idaho. The onsite review for this proposed program was conducted by an external three-member team in August of 2022.

Firstly, I would like to confirm that the comprehensive programmatic review, as previously submitted, remains valid. At this time, the review team has no further updates or revisions to add to the report.

Secondly, I have been informed by the University of Idaho WWAMI Medical Education Program that they have revised their program proposal based on the recommendations outlined in the review committee's report. Their revisions aim to address the raised concerns and strengthen the proposal.

On behalf of the review team, thank you for your consideration of this matter. Please let me know if you require any additional information or clarification.

Sincerely,

A handwritten signature in black ink, appearing to read "Adam Wilson".

Program Title

Child Feeding Undergraduate Academic Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

13

CIP Code

19.0706 - Child Development.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information**What is the financial impact of the request?**

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Curriculum:

The Certificate in Child Feeding is tailored for professionals seeking a comprehensive understanding of child development from prenatal stages through age 12, coupled with essential knowledge in basic human nutrition and practical feeding practices. Geared towards childcare providers, program administrators, therapists, nutritionists, and various professionals in related fields, this program emphasizes the value of individualized developmental approaches and contextual learning environments. Participants will gain knowledge in managing meals, implementing developmentally-supportive feeding practices, and an understanding of child nutrition. With a focus on evidence-based strategies, the curriculum aims to address the critical need for enhanced nutrition knowledge and feeding practices among early childhood educators and professionals in related sectors.

Total Hours**13****Courses to total 13 credits for this certificate****Distance Education Availability**

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

No

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability**In which of the following geographical areas can this program be completed in person?**

Moscow

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

University Learning Outcome 1: Learn and Integrate. After completing the program, students will understand the developmental period from birth through age 12, value each child as an individual with unique developmental variations, and the ways that child development and the learning process occur in multiple contexts. In addition, students will know basic concepts of human nutrition, learn to manage meals and learn developmentally-supportive feeding practices.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

Each course offered through the certificate will continue to be assessed as it has been historically; we will continue to use current assessment tools to verify the quality of affiliated courses. These are completed at the department level and include feedback from students. Some of the examples may include but not limit to: in class activities and mini-assignments (ECDE 234) journal article discussion, exams/quizzes (ECDE 234, ECDE 254, FN 205), online assignments (ECDE 435).

How will you ensure that the assessment findings will be used to improve the program?

Program faculty will meet each semester to discuss the program and implement needed improvements. Changes will be implemented as weaknesses become evident.

What direct and indirect measures will be used to assess student learning?

Program faculty will use rubric-based evaluation to assess student learning throughout the program.

When will assessment activities occur and at what frequency?

Program assessments will be conducted annually.

Student Learning Outcomes**Learning Objectives**

University Learning Outcome 1: Learn and Integrate. After completing the program, students will understand the developmental period from birth through age 12, value each child as an individual with unique developmental variations, and the ways that child development and the learning process occur in multiple contexts. In addition, students will know basic concepts of human nutrition, learn to manage meals and learn developmentally-supportive feeding practices.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

There is a strong need to enhance early childhood educators' nutrition knowledge and developmentally-supportive feeding practices. The certificate curriculum will provide systematic training on evidence-based child feeding practices to preservice and in-service teachers, professionals in the food and nutrition fields, early childhood program administrators and other professionals in the field. There will be no added workload other than requesting this new certificate.

Per Sara Matthews, FCS Faculty: "Child feeding is the commonly used term in the nutrition and child development fields. It is designed for a specific group of professionals who may seek to have deeper knowledge in child development from prenatal through 12 years old, basic human nutrition knowledge, and practical knowledge in feeding practices, health and safety, and meal prep.

Examples of the professionals this academic certificate will appeal to are childcare providers and directors, Head Start program administrators and nutrition directors, developmental specialists, occupational and physical therapists, school nutrition directors, afterschool program providers, nutritionists, and others."

Reviewer Comments

Brenda Schroeder (bschroeder) (Tue, 26 Sep 2023 20:02:07 GMT): Rollback: title or name of the certificate should be addressed please.

Brenda Helbling (brendah) (Thu, 22 Feb 2024 23:18:24 GMT): Requested program description and changed (per Trevor White) to a "no" on self-support fee. BRH

Mary Stout (mstout) (Tue, 26 Mar 2024 19:50:37 GMT): Program description is on file. Moving forward for consideration.

Sydney Beal (sbeal) (Tue, 26 Mar 2024 21:38:59 GMT): Added certificate description sent by Brenda Helbling

50.14 - Name, Social Security Number, and Address Changes

Last updated: November 07, 2006

A. Purpose. This policy addresses changes to an employee's name, address, and Social Security number in the University's Human Resources Information System.

B. Scope. This policy applies to all employees.

C. General Policy. Information in the University's Human Resources Information System regarding an employee's name, address and ~~social~~ Social security ~~Security~~ number (SSN) may be changed upon the request of the employee and submittal of appropriate documentation, if necessary.

DB. Procedureess:

D-1. In general. Changes to an employee's name, ~~social security number (SSN,)~~ and address are entered into the Human Resources Information System (HRIS) only by Human Resources (HR) and the Payroll Departments. Changes are effective with the next available payroll cycle.

C. Procedure:

ED-21. Address Changeschanges. -An employee may request a change of address by ;

u updating the address in the electronic system under employee tab (Refund Address, Campus Mail Address, Payroll Check Address and Mailing/Local Address) or by submitting a written request (all other address updates) to HR. Include name, ~~Vandal#SSN~~ and new or corrected ~~type of address or the employee may update their own address via the employee web using their PIN.~~ The change will be updated effective with the next available payroll cycle. The web change will not update the W2 address ~~or check mailing address.~~ -Please submit an address change request on Payroll's website to update that address type.

C-2D-3. Name or SSN Changeschanges. An employee may request a name change, for reasons including but not limited to marriage, divorce, ~~and/or~~ change of legal name. You An employee may also provide you a preferred name that will be used for email; or other communications that don't require the legal name to be used.

;)a. An employee's name in the HRIS must match the employee's legal name as it appears on ~~his or her~~ their ~~social~~ Social security ~~Security~~ card. Therefore, to process a name change, a ~~social~~ Social security ~~Security~~ card in the name desired must be presented to HR with the request.

ii)b. When requesting the change, completion of new benefit and tax forms may be required.

ii)c. An employee's SSN in the HRIS must match the employee's SSN as it appears on ~~his or her~~their ~~social~~Social ~~S~~security card. Therefore, to process an SSN change, a ~~S~~social ~~S~~security card must be presented that accurately reflects the desired change.

ED. Information. Contact HR at (208) 885-3638, (208) 885-3602 (by fax) or Payroll Services at (208) 885-0284 or online at [HR Website](#).

50.08 - Evaluations for Classified and Exempt Staff

Last updated: November 20, 2006

A. Purpose. This policy addresses annual performance evaluations and probationary performance evaluations for staff.

B. Scope. This policy applies to performance evaluations for all classified and exempt staff.

AC. General Policy. Performance evaluation provides an opportunity for mutual goal setting, reinforcement, direction and communication. Evaluation based on the employee's current job description is a justified expectation of employees, ~~provided for authorized by in the~~ [FSH 3340] and Idaho Code 67-5309. The University of Idaho Staff ~~Performance~~-Evaluation form (see section E) [~~See 50.08 (E)~~] was designed to encourage all non-faculty staff members to grow professionally and to reach full potential in their work.

AC-1. Annual performance evaluations. Annual performance evaluations provide the basis for merit pay increase, career development, advancement, and ~~or~~ performance-related probation and termination of employment.

AC-2. Probationary performance evaluations. Probationary performance evaluations document the performance of classified employees (1) during entrance probation at the time of initial hire or promotion or transfer to a new position in which the employee has not been previously certified, [~~See FSH 3340 A-2~~], or (2) during the course of a performance-related probationary period [~~See FSH 3340 A-2.a. and See FSSH 3340 and APM 50.21.H3340 A-43340 A-4.~~] [~~See APM 50.21~~].

DB. Procedures.

D-1. Timelines

Ba-1. Annual pPerformance eEvaluations. Annual performance evaluations are completed during December-February for staff. Instructions and due dates are circulated annually by Human Resources (HR) to deans and directors, and subsequently forwarded by them to managers and supervisors according to college or administrative unit procedures. Staff are afforded the opportunity to provide written comments on their evaluations. Evaluations are signed by the staff member being evaluated and, the supervisor performing the evaluation. In some situations, -and the departmental administrator or designee may also sign. The evaluation procedure is designed to be interactive and include a conference between the employee being evaluated and ~~his or her~~their supervisor where performance during the evaluation period and performance plans for the following year are discussed.

Bb-2. Entrance Probationary Performance Evaluations. Entrance probationary performance evaluations for classified employees are performed twice--one after three months and one just prior to the conclusion of the six-month (13 bi-week) entrance probationary period. Upon successful completion of the entrance probationary period, the employee is certified in the classification.

Bc-3. Performance-related Probationary Performance Evaluations. Performance-related probation performance development plans/probation extensions evaluations for classified employees are generally performed three times--one at 30 days following placement on performance-related probation development plan/probation extension, one at 60 days and one at the conclusion of the 90-day performance-related development plan/probationary period extension. Upon successful completion of the performance-related development plans/-extended probation, the employee is restored to certified status. In some cases, the performance-related probationary period may be extended. If performance-related extended probation is not completed successfully, employment is generally terminated. [See FSH 3340 A-9 FSH 3340 A-9].

D-2c. Departmental Procedure. In early January/December, HR sends mails current instructions and due dates to each college or division. Completed evaluations are returned to HR by the date specified in the distribution memo. Original evaluations for classified and exempt employees are logged in and filed in HR. Departmental procedures are as follows:

C-1a. Review the Employee's Job Description. Refer to the current job description for the employee being evaluated. Draft answers to evaluation form questions and rate the employee's performance based upon the expectations and guidelines stated within the job description in effect for the period during which performance is being evaluated. Factors that are also considered include, but are not limited to, quality and quantity of work, job knowledge, initiative, dependability, customer service, teamwork, attendance, communications, task management, budget management, safety, decision making, supervision, accountability, civility, judgment, leadership, problem solving, training/development, or other dimensions appropriate for review.

+) If there is no job description, or if the job description is outdated, a results-oriented University of Idaho Job Description (ROJDIJD) should be created for the next segment of employment. See [APM 50.55](#) for information on writing results-oriented job descriptions.

C-2b. Request Self-evaluations Employee Input. Supervisors may provide the employee with an opportunity to provide input. Sample input forms for this purpose can be found on the HR webpage under Forms and Documents. The input form will not be included with the annual evaluation, though the supervisor may use the input to assist in the creating of the actual annual evaluation. blank evaluation form and ask him or her to complete a self-evaluation. Review the self-

~~evaluation and make any desired changes to the performance evaluation prior to meeting with the employee.~~

C-3c. Gather Information. Refer to observations of performance and/or collect information on performance throughout the evaluation period from co-workers, other supervisors, and/or clients of the employee. ~~Provide comments and specific examples~~ Specific examples during the discussion can be helpful to share with the employee. Please work with HR prior to sharing the source for any feedback. Many supervisors find that maintaining a desk file for each employee for the evaluation period helps them focus their ratings and comments, and provide examples to illustrate or justify ratings.

C-4d. Meet with the Employee. Schedule a private time to meet and discuss the supervisor's ~~draft~~ evaluation and the employee's ~~self-evaluation~~ input form. Review the job description with the employee, discuss performance plans for the next evaluation period; inquire of the employee regarding ~~his or her~~ their plans or objectives for professional or skills improvement.

C-5e. Complete Final Evaluation. Complete the final evaluation form using input from the employee, yourself, your supervisor if appropriate, and other appropriate sources, and provide an overall rating of the employee's performance during the evaluation period. Please work with HR prior to sharing the source for specific feedback.

~~i) If a particular rating category does not apply to the employee—for example "Human Resource Management"—will not apply to an employee who does not supervise other employees—check NA and proceed to the next category.~~

~~ii) Ratings often vary from category to category. This is normal and reflects the employee's strengths and weaknesses.~~

~~iii) Decide how the employee's performance ranks overall and check the appropriate block under~~ Supervisor's Overall Ratings Performance Level. The overall rating should reflect total performance; however, the overall rating may or may not be a precise average of all the individual ratings because the different rating categories functions may have differing levels of importance for the position being evaluated.

C-6f. Discuss Evaluation with Employee. Schedule and conduct a private review with the employee to discuss the evaluation. The three primary goals of the evaluation discussion are:

1.i) To review what is expected of the employee (goals, standards and objectives).

ii)2. To communicate the supervisor's evaluations ~~and receive the employee's input.~~

ii)3. To identify corrective or development activities for the future ~~which are documented in the (revised) job description, a copy of which is also attached to the evaluation in addition to the job description which was in effect during the evaluation period.~~

C-7g. Evaluation Signature and Distribution~~Obtain signatures and distribute.~~

i)1. The employee signs and dates the form as receipt of the evaluation, and adds any comments desired. If comments exceed the space provided, the employee should sign or initial the extra page(s). Employees are not required to provide additional comments to the evaluation, although they may choose to do so. An employee may choose to add comments at the time of evaluation or later. If comments are added at the time of evaluation, they will be submitted submit them as part of the evaluation. If comments are added later, they will be attached submit them to HR to be added to the evaluation to the evaluation at that time. Employee comments become a permanent part of the review document.

ii)2. The supervisor completes the evaluation by signing the form and forwards it to the departmental administrator, if required, for review and signature.

ii)3. If required, Tthe departmental administrator reviews and signs the evaluation and sends it electronically; together with a current (and revised, if applicable) job description, to HR. Depending on procedures of each department, college or administrative unit, the departmental administrator may be the dean, director, or the person supervising the manager who completed the evaluation. Copies of the evaluation (with the current and revised job description, if applicable) should be distributed to the employee and the supervisor, and a copy retained by the departmental administrator.

~~a) Depending on procedures of each department, college or administrative unit, the departmental administrator may be the dean, director, or the person supervising the manager who completed the evaluation. A second supervisory or administrative signature is required to ensure the evaluation has been reviewed by someone other than the supervisor who prepared it.~~

D. Information.

D-31. Due Dates and Effect of Failure to Complete Evaluation. Evaluation due dates vary according to the type and purpose of evaluation.

a.i) Annual Evaluations. Annual evaluations are typically due in ~~January-February~~ March for staff. Regents' policy requires a completed performance evaluation as documentation of satisfactory-or-better performance to support annual salary increases.

ii)b. Entrance Probationary Evaluations:

~~a)1.~~ Entrance probationary evaluations are due in HR at both the three- and six-month employment anniversary for newly hired or promoted classified staff (by the seventh and thirteenth pay periods of probationary employment, respectively).

~~b)2.~~ Six-month evaluations ~~which that~~ document successful completion of the entrance probationary period certify the employee into that classification.

~~c)3.~~ Entrance probationary periods may be extended with HR approval beyond ~~six6 months13 pay periods~~ for ~~50% time~~-employees, or employees taking Leave Without Pay (LWOP), or for up to another 90 days by the supervisor with information regarding the reason for the extension and the effective dates provided both to the employee and to HR.

~~d)4.~~ In cases where entrance probation is extended, due dates for subsequent performance evaluations will be as specified in the written notice to the employee. Extension of entrance probation is at the discretion of the University.

~~e)5.~~ Both three- and six-month evaluations must be completed and placed in the employee's personnel file in HR as legal documentation of performance. If the six-month probationary evaluation is not received within 30 days of the end of the probationary period, the employee is legally considered to have satisfactorily completed probation and is certified into the classification de facto.

iii)c. Performance-Related Probation Evaluations:

~~1.a)~~ Classified employees may be placed on a development plan/performance-related extended probation for unsatisfactory performance. [See [APM 50.21.](#)]

~~b)2.~~ Performance-related probation Documentation of development plan milestones -evaluations are due in HR at 30 days, 60 days and 90 days

following placement on ~~performance-related~~ development plan or extended probation.

e)3. A ~~Ninety~~90-day evaluations ~~which that~~ documents successful completion of a development plan or extended performance-related probationary period re-certifies the employee into that classification.

d)4. ~~Performance-related probation~~ Development plans periods may be extended beyond 90 days for ~~50% time employees, or employees~~ taking Leave Without Pay (LWOP), or by the supervisor, with information provided to the employee and to HR regarding the reason for the extension, and effective dates. Additionally, a shortened development plan period may be appropriate.

e)5. All of the 30-, 60- and 90-day evaluations must be completed and placed in the employee's personnel file in HR as legal documentation of performance. If the 90-day ~~performance-related~~ development plan or extended probation evaluation is not received within 30 days of the end of the ~~probationary~~ period, the employee is legally considered to have satisfactorily completed ~~performance-related probation~~ the development plan or extended probationary period and is re-certified into the classification.

f)6. Extension of performance-related probation is at the discretion of the University.

g)7. ~~Less than~~ Unsatisfactory completion of ~~of performance-related~~ development plan or extended probation may results in demotion or disciplinary action up to and including termination of employment. ~~See~~ APM 50.21.

E. Evaluation Forms ~~forms~~. Evaluation forms are a available from Human Resources, (208) 885-3638. Forms can be downloaded from HR Website.

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 29

Tuesday, April 16, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Shook, Thaxton, Tibbals.

Absent: Schwarzlaender (excused), Mischel

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #28, April 9, 2024, were approved as distributed.

Chair’s Report:

- It’s been a pleasure serving for the past three years on the Faculty Senate which followed three years at UCC. I think that the university has huge potential when people work together, and you, the senators, can make it happen. I think that it’s important to use our voices to create a sense of positivity as opposed to fear.
- After meeting with people from Pocatello, Boise, and Sandpoint, I hope that we will continue our efforts to be a land grant university with grass root projects and a laser sharp focus on quality of education and research.

Provost’s Report:

- Our Regents are on campus tomorrow and Thursday. They visit once per year, when they have their meeting on the Moscow campus.
- Lionel Hampton Jazz Festival starts Wednesday evening, and continues all day Thursday, Friday, and Saturday. There will be about 3,400 students on campus.
- The College of Science will have “Vandal Science Days,” Friday, April 19 and Saturday, April 20, from 10am to 3pm in the IRIC atrium. <https://www.uidaho.edu/sci/news/vandal-science-days>
- Faculty Gathering: Wednesday, April 17, 4:30 to 6:30, at the WWAMI Medical Education Building. <https://www.uidaho.edu/provost/faculty-gathering>
- Commencement on May 11th. Please encourage your faculty to attend.

There were no questions.

A remark from the Secretary:

Addressing an issue raised by a senator last week as new business, the Secretary outlined the process for communicating presidential approval of policies approved by the faculty at UFM’s. She solicited suggestions for improving the process.

• **Consent Agenda**

- Committee Appointments for AY 2024-25 – Kristin Haltinner, Chair of the Committee on Committees, Attach. #2.

There was an inquiry about the Promotion and Tenure committee, not on the list.

Provost Lawrence replied that appointing that committee follows a completely different process. In the Fall, the Provost works with Senate leadership in accordance with the process prescribed in FSH 3500.

- AY 2025-26 Sabbatical Approvals – Jean-Marc Gauthier, Chair of Faculty Senate, Attach. #3.

There were no requests to take items out of the consent agenda for discussion and vote. The consent agenda stands approved by unanimous consent.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances, Attach. #4.
Department of Defense (DOD) policies require universities to have a written policy regarding malign foreign talent recruitment programs to receive DOD funding.
Discussion:
There were inquiries about the definition of “malign foreign talent recruitment” programs and how to recognize them. An individual may not be aware that they are engaging with one of these programs. Kay Dee replied that it is the individual’s responsibility to disclose any such involvements. If they are not sure, they should reach out to the Office of Research Assurances.
A senator suggested a website to point people in the right direction, to avoid oversights. Kay Dee noted that there is one, but feedback on how to improve it is welcome. There is also a link in VERAS. <https://www.uidaho.edu/research/faculty/research-assurances/foreign-interest/faq>. Compliance is not retroactive. The starting date depends on the agency. The certification is required as part of the final proposal sign-off.
Vote: 21/22 yes; 1/22 no. Motion passes.
 - FSH 3120 Faculty Obligations: Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #5.
Section D-2 revised to clarify work and pay schedule for academic year appointments. Sections D-4 expanded and revised to clarify summer session obligations of faculty with academic year appointments.
This policy was approved by the Senate at their meeting #27. In the meantime, FAC noticed a problem with the language regarding *entirely optional* summer appointments not counting toward P&T.
Motion to amend the previously approved motion (Mittelsteadt, Rinker) as in the revision from FAC presented today.
Vote on the motion to amend: 22/22 yes. Motion Passes.
There was no further discussion. FSH 3120 approved as amended.
 - FSH 1640.36 Dismissal Hearing Committee – Kristin Haltinner, Chair of Committee on Committees, Attach. #6.
The committee members requested that the Committee on Committees add language so that people serving on the committee are aware of the potential for summer meetings. This notification is a standard practice with other committees.
Vote: 22/22 yes. Motion passes.
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources, Attach. #7.

This policy was presented last week. Based on the Senate recommendations, it has been revised to keep those procedures in FSH. The income tax withholding and the W2 form have been removed, since those are federal requirements and not U of I policy.

No questions

Vote: 22/22 yes. Motion passes.

- FSH 3480 Compensation for Service in Addition to Regular Duties – Brandi Terwilliger, Director of Human Resources, Attach. #8.

Minor clarification edits. Confirmed changes with Provost Office. FAC also suggested revisions (in brown text).

Vote: 22/22 yes. Motion passes.

- Proposed changes to the University Catalog (voting)

- Admissions Requirements – Steve Shook, Forest, Rangeland and Fire Sciences

The final version of the UCC recommendation didn't arrive in time to be included in this binder.

There was a brief discussion on the status and procedures.

Motion to postpone (Tibbals, Mittelstaedt).

Vote: 20/20 yes. Motion passes.

- Proposed Changes to the Administrative Procedures Manual (non-voting)

- APM 50.16 Criminal Background Check– Brandi Terwilliger, Director of Human Resources, Attach. #9.

Slight edit to the policy for prior coverage, given we cannot access old records. Removal of the J-1 Scholars exception per IPO – they do not get a background check and should get one.

No questions.

- **Announcements and Communications**

- VERSO Research Information Management System and Institutional Repository – Ben Hunter, Dean of Libraries.

Vandal Expertise, Research, and Scholarship Online (VERSO), preserves and provides access to the research and creative output of the university of Idaho faculty, students and staff. This serves several functions. First, research information management systems, which support transparent aggregation, curation and use of data about institutional research activities.

Basically, these systems describe an institution, with its research and scholarship activities. For a decade, we have used VIVO, supported out of the Library. It's open source and free. We have a large volume of good data and some nice visualizations. However, there are shortcomings, typical for open-source software. Individual people cannot go in and modify their profiles within VIVO. It's a cumbersome process, so we're looking at replacing that. Institutional repositories are digital collections to capture the intellectual output of a single university community – a digital space with an institution's output, theses and dissertations, publications, preprints, open access deposit and more. We're repurposing digital collection software. It's free, but not ideal – doesn't allow for self-deposit. That is again a cumbersome process through the library. We're in the middle of kind of a soft rollout of VERSO right now.

The release timeline and future plans can be found in the presentation slides attached to these minutes. Visit verso.uidaho.edu.

No questions.

- IT Committee Update – Darryl Woolley, Business and Economics, Jean-Marc Gauthier, Chair of Faculty Senate.

Talking points from a recent meeting of Darryl Woolley, Jean-Marc Gauthier and Teresa Amos.

Priorities:

- Changes in institutional perspective of technology.
- Need for a different conversation about technology – how technology serves teaching and research.
- Cadence of change and impact of AI.
- Make sure everyone is on board.
- Timely privacy issues.

Discussion:

Thanks to Teresa Amos for her patience and help throughout the semester. We are happy to have found a way forward to collaborate with OIT.

A senator had a question about staffing. Is there an update on that? Are there open positions to be filled, or do we not have any openings? Understaffing is usually the answer when it takes two to four weeks to get basic things done. Teresa replied that staffing is an on-going issue.

Faculty Secretary: Is the IT committee the best path to get problems addressed, moving forward? Darryl recommended some sort of working group looking at complaints, including a couple of faculty members who are especially involved with IT issues. A formal process to handle concerns would be helpful. Also, it would be helpful to have a faculty member participate in the decisions for exceptions to the procurement process, so that the faculty's perspective can be heard, and the faculty can be aware that their perspectives have been heard in making those decisions. There should be a formal way to handle communication between faculty and OIT comprehensively.

New Business:

- Urgent: we need the names of new senators for the 2024-25 vacant seats. Next week, Senate 2024-25 will take nominations for the 2024-25 officers.
- A senator reported a noticeable increase of extra-curricular activities among students in his college. In a class of 45 students, on any given day, three to five of them need to be excused to participate in extracurricular activities. This creates more work and rescheduling problems.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:44pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #29

Tuesday, April 16, 2024 at 3:30 pm
Zoom Only

- I. Call to Order
- II. Approval of Minutes
 - Minutes of the 2023-24 Faculty Senate Meeting #28 April 9, 2024 **Attach. #1**
- III. Chair's Report
 - University Faculty Meeting #3 is on Monday, April 29, at 3pm PT.
- IV. Provost's Report
- V. Consent Agenda
 - Committee Appointments for AY 2024-25 – Kristin Haltinner, Chair of the Committee on Committees. **Attach. #2**
 - AY 2025-26 Sabbatical Approvals – Jean-Marc Gauthier, Chair of Faculty Senate **Attach. #3**
- VI. Committee Reports (voting)
 - Proposed changes to the Faculty Staff Handbook
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances **Attach. #4**
 - FSH 3120 Faculty Obligations During the Period of Appointment – Alistair Smith, Department Chair, Earth and Spatial Sciences **Attach. #5**
 - FSH 1640.36 Dismissal Hearing Committee – Kristin Haltinner, Chair of Committee on Committees **Attach. #6**
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources **Attach. #7**
 - FSH 3480 Compensation for Service in Addition to Regular Duties – Brandi Terwilliger, Director of Human Resources **Attach. #8**
 - Proposed changes to the University Catalog (voting)
 - Admissions Requirements – Steve Shook, Forest, Rangeland and Fire Sciences
 - Proposed Changes to the Administrative Procedures Manual (non-voting)
 - APM 50.16 Criminal Background Check – Brandi Terwilliger, Director of Human Resources **Attach. #9**
- VII. Announcements and Communications
 - VERSO Research Information Management System and Institutional Repository – Ben Hunter, Dean, Library
 - IT Committee Update – Darryl Woolley, Business and Economics, Jean-Marc Gauthier, Chair of Faculty Senate
 - Graduate Level Distinguished Scholarships – Jerry McMurtry, Dean College of Graduate Studies

VIII. New Business

IX. Adjournment

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 28

Tuesday, April 9, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, Mischel, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Rinker, Sammarruca (w/o vote), Schiele, Schwarzlaender, Shook, , Thaxton, Tibbals.

Absent: Strickland (excused), Roberson, Miller, McKenna

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #27, April 2, 2024, were approved as distributed.

Chair's Report:

- Teresa Amos (OIT) provided answers to the questions compiled by Faculty Senate. Teresa Amos, IT Committee Chair Darryl Woolley and Faculty Senate Chair Gauthier will meet tomorrow. We are happy to have found a common ground for constructive conversations about OIT issues.

Provost's Report, delivered by Vice Provost Diane Kelly-Rily:

- On April 4, we all received a memo from President Green and Provost Lawrence about updating our strategic plan. We seek nominations for the working group. The nomination form is at https://uidaho.co1.qualtrics.com/jfe/form/SV_ONGjSqP59N1zTPo A strategic plan town hall will be announced in early fall.
- Long-Range Campus Development Plan. Feedback on campus visioning is encouraged. <http://www.uidaho.edu/vision2050> . Please share this information with your colleagues. You can be entered in a raffle for a \$50 vandal gift card.
- Graduation is only a month away. There will be two ceremonies. Please attend and encourage your colleagues to attend. Idaho author Anthony Doerr, author of the Pulitzer prize-winning novel "All the light we cannot see," will be the commencement speaker at both ceremonies.

Discussion:

Vice Chair Haltinner emphasized the importance of working with the Campus Planning Advisory Committee and Instructional Space Committee. These are university-level senate committees who are seeking opportunities to provide more input.

A senator wondered about the recent news that a consultant was hired. They argue that planning future campus developments should be an opportunity for faculty, staff and administrators to come together in shared governance. Vice Provost Kelly-Riley noted that everyone is welcome to participate and provide meaningful input.

Chair Gauthier asked about updates from the University of Phoenix task force in view of what is happening. At this point, Provost Lawrence joined the meeting. He replied that there are no updates. President Green continues to work on a solution.

Vice Chair Haltinner suggested to include Sarah Dawson, Sustainability Director, in campus planning activities. She may bring useful insight with, for instance, infrastructure updates to be more energy efficient.

Faculty Secretary: Last week, Senate approved revised FSH 3120 Faculty Obligations During Period of

Appointment. There was some discussion about summer appointments not counting toward P&T. FAC was made aware of these concerns and reconsidered that point yesterday. They noticed there is a mistake: It's not for this policy to inform on what does or does not count for P&T. As approved last week, FSH 3120 is in conflict with P&T policies, which refer to the PD for P&T required material. More next week. The Vice Provost confirmed. It's a significant enough change to warrant reconsideration.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 4120 Catalog Change Procedures – Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences, Attach. #2.
Revisions are proposed to include “university-wide interdisciplinary committees” as bodies with authority to initiate and submit curriculum changes to UCC (in addition to units and colleges) for programs that involve multiple colleges. This is necessary for logical and proper faculty control and maintenance of curriculum for interdisciplinary programs delivered by faculty across many colleges. Faculty Senate will be the “gatekeeper” for the establishment and oversight of committees empowered by this addition to the language of FSH 4120. Because university-wide programs are relatively rare, similar requests for the creation of other interdisciplinary curriculum committees will likely be rare as well for the foreseeable future. The proposed additions have been reviewed and contributed to by the policy owner (UI Registrar).
FSH 4120 and FSH 1640.93 will be considered together.
 - FSH 1640.93 University Committee for Academic Certificates in Sustainability –Erin James, Professor of English, Karen Humes, Earth and Spatial Sciences, Attach. #3.
In September 2023, the Faculty Senate approved the creation of an Ad-Hoc University-wide Faculty Committee for the Undergraduate Academic Certificate in Sustainability. The purpose of that committee was to serve as the curriculum body for developing the initial curriculum for the university-wide certificate, including the solicitation/review of courses and submission of the proposed curriculum to UCC. The curriculum includes courses from nine colleges. Now that the certificate has been fully approved and students will be able to enroll starting in July 2024, we are requesting that a standing committee be created to maintain, review and assess the university wide undergraduate certificate. The proposed language does refer to the possibility of the standing committee creating another certificate, because there have been requests to develop a similar university-wide certificate at the graduate level.
There were no questions.
Vote: 20/21 yes; 1/21 no. Motion passes.
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances, Attach. #4.
No presenter available. No action taken. [It was discovered that Ms. Holmes was not notified that this policy was to be discussed at this meeting, nor was she sent a meeting invite. This policy will be presented at the next meeting and Ms. Holmes invited to attend.]
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources, Attach. #5.
Per request from Payroll, they are deleting FSH 3490 and move the appropriate information to APM 55.05. Income Tax withholding and W-2 form requirements are not U of I policy.

Discussion:

There were questions about the reasons for this change. Some senators expressed concerns with the move to APM because APM is not reviewable by Faculty Senate. Motion (Mittelsteadt, Murphy): Send the policy back to HR with the request to have all relevant content in FSH rather than in APM. Vote: 17/18 yes; 1/18 no. Motion passes.

• Proposed changes to the University Catalog (voting)

- UCC 547 Doctorate in Anatomical Sciences – David Pfeiffer, Medical Education Program (WWAMI), Attach. #6.

They are developing a new school of health and medical professions which will house multiple new graduate and professional degree programs, including doctorate in clinical psychology, graduate program in gerontology, two new nursing programs, a PA program, all of which are geared towards meeting the increasing health needs across the State of Idaho. Today, we are proposing an additional program, the doctorate of Anatomical Sciences or DAS program. The focus of this program is to help meet the increasing shortage of highly trained anatomists who are qualified to teach in healthcare and health science programs within Idaho. Across the country, there's an increasing shortage of well-trained anatomists or classically trained anatomists.

Discussion:

Vice Chair Haltinner asked how all the new medical programs being developed will be staffed. David Pfeiffer replied that staffing will be accomplished partially with new hires and partially with existing faculty.

Vote: 20/20 yes. Motion passes.

- UCC 531 Child Feeding Undergraduate Academic Certificate – Trevor White, Family and Consumer Sciences, Attach. #7.

We are proposing an academic certificate called child feeding for those professionals who are currently working in fields such as childcare provider dietitians, therapists, things of that nature to give them a 13 credit kind of experience in nutrition, meal management, and child development.

Discussion:

A senator pointed out the omission of some standardized text that should be included for all certificates and proposes a friendly amendment: *At the beginning of the curricular requirements, include the language "All required coursework must be completed with a grade of 'C' or better, per regulation O-10-a."*

Vote on motion with friendly amendment: 19/19 yes. Motion passes.

• Proposed Changes to the Administrative Procedures Manual (non-voting)

- APM 50.14 Name, Social Security Number and Address Changes – Brandi Terwilliger, Director of Human Resources, Attach. #8.

Updated to reflect correct processes.

Discussion:

There was a brief exchange on consistency of capitalization everywhere.

- APM 50.08 Evaluations for Classified and Exempt Staff – Brandi Terwilliger, Director of Human Resources, Attach. #9.

Revision to provide updated terminology and procedures.

There were no questions.

- **Announcements and Communications**

- Open Discussion on Admission Standards – Jean-Marc Gauthier, Chair of Faculty Senate. Steve Shook, representing UCC, gave a short summary of the meeting of OSBE representatives with UCC and Faculty Senate. He then presented the new UCC admission criteria recommendations, approved at their last meeting the day before. The members of FSL thanked UCC members for their thorough work and thoughtful approach. One of the elements in the decision is the direct admission process, where the State sends a letter to students who meet certain performance metrics to let them know they have been admitted into a set of public universities in Idaho. Another aspect UCC discussed is how to handle the students who are presently in the Vandal Gateway pilot program in the context of new admissions standards. They were provided data on the ISAT from OSBE staff representatives. Initially, UCC did not include the ISAT as part of their considerations because they had not seen data. The final document from UCC will go out next week ready to move forward.

Steve went over the draft:

1. Students with a high school GPA of ≥ 3.0 or ISAT Math level ≥ 3 and ELA/Literacy level ≥ 3 will be directly admitted.
2. Students with a high school GPA of 2.60-2.99 will require a minimum 740 SAT Verbal + Math or 15 ACT scores:
 - The 740 SAT Verbal + Math and 15 ACT thresholds are the same as the 2019 admissions standards.
 - Students with < 740 SAT Verbal + Math or < 15 ACT (or no SAT/ACT scores) can appeal through the Admissions Committee.
3. Students with a high school GPA of 2.30-2.59 will be admitted to the Vandal Gateway Program.
4. Students with a high school GPA of < 2.30 can appeal to the Admissions Committee.

All 4 points above were voted on and unanimously approved by UCC. Students with HS GPA of 2.3 to 2.59 would be admitted to the Vandal Gateway pilot program, while students with HS GPA of 2.3 or lower would appeal to the Admissions Committee. This is a very small number of applicants. The final document from UCC will include rationale for those choices.

Discussion:

A senator noted that a student could be in both categories 1 and 2. If they have the appropriate ISAT scores, they would fall in category 1, but they could also be in category 2 if their GPA is less than 3. Steve concurred, but noted that the top standard is for direct admission only. Those students get a letter from the State Board informing them that they have been directly admitted into the University of Idaho. The Admissions office would automatically admit them. The senator remained confused and wondered whether some clarification should be included in category 2. Provost Lawrence joined the conversation. He suggested that the issue raised by the senator can be easily addressed in the redline document, by clarifying that an Idaho student who has a 3 and 3 is admitted regardless SAT score or GPA. Steve confirmed that this was the intent of UCC. A senator inquired about the 740 (total) score for the SAT. He did some research and learned that the benchmark for considering a student to be college ready is 1010, quite far from 740. Steve recalled this being discussed at UCC meetings. Eventually, they decided to use the previous standard largely because GPA is statistically a better measure of student performance than the SAT score or standardized test scores, as mentioned yesterday by State Board

representatives. The senator reiterated that the benchmark given by the college board is 480 in reading and writing, and 530 in math, while we're asking for a 740 total. That's 250 points less. Perhaps some things may be tweaked in the future, if they're not working well, especially on the retention side. Retention numbers for lower GPA suggest that low GPAs are the main concern on the retention side.

It was argued that we send to the Appeals Committee students with higher GPA than those in the 2.3 to 2.59 group without test scores that go directly to VGP, which seems unfair. The appeal process is cumbersome. At the same time, there are concerns about changing the standards for VGP, which would invalidate the pilot data.

The Provost reported that 50 to 100 students could be impacted by this "double standard." If those students were allowed to go into VGP, we track them as a separate cohort for data purposes. They would get extra support. The Provost will make sure that the VGP team is part of the conversation.

A senator suggested that UI encourages students to submit test scores, even if not required. Provost Lawrence responded that we currently do that. Submitting test scores is highly encouraged, and they are also used for placement. However, OSBE staff shared that the number of students taking the SAT is declining in the state because it's no longer required. Many of the school districts still do it. Also, the SAT contract with the State runs out in one or two years. So, we will see continued decline.

There seems to be some general agreement that, from a statistical point of view, it'd be nice to control for GPA and be able to look at test scores. It may also help to make the appeal process less cumbersome. Are those letters and essays actually useful in evaluating whether or not a student with low GPA can succeed in college? Vice Chair Haltinner displayed a plot of retention rates by GPA. For the 2.6 to 2.99 group, the retention rate 58%. Provost Lawrence noticed that it's not different from the lowest group. Vice Chair Haltinner added that GPAs of 0.0 (not included in the plot) are assigned to home schooled students and those from unaccredited schools. Those people are reviewed by the Admissions Committee, regardless.

- Dependents Benefit Task Force Update – Kristin Haltinner.

At the beginning of the fall semester, we created a task force to look at the possibility of expanding the dependent benefit at the University of Idaho. The members are Charles Tibbals, Rebecca Latshaw from staff affairs, Lyudmyla Baranyk, and me. Brief overview of UI's current policy: We have a 50% tuition rate for eligible dependents of employees – people that you can claim as dependents on your taxes. Only one dependent per household per semester can access that benefit. The benefit does not extend to eligible dependents of retired employees or deceased employees. Kristin proceeded to show data provided by HR about the use of the benefit. At most, 37% of the people who are eligible are using it. Note that this is just an estimate, because the information that can be accessed is limited.

Other universities: Washington State offers free tuition up to 6 credits, with no limit on the number of children who can access it at a time. Idaho State offers 50% tuition for dependents, only one at a time, not transferable to other institutions, like us. Boise State provides employees with free tuition for dependents under 26. The benefit can be extended to other State institutions, and only one child can use it at a time. The task force only looked at public schools because of constraints from operating within a State, and found a huge range in what different institutions were doing. Every state, except for Idaho, allows multiple dependents to access the benefit concurrently. Arizona State University provides this benefit to eligible dependents of people who are retired (after serving at least 5 years) or have passed. The task force wishes to pursue the extension of the dependent tuition benefit to allow multiple dependents to access it

concurrently. We also want to include retirees with eligible dependents and the families of deceased employees. We have no way of knowing with certainty how much this would cost. We are scheduled to talk to President Green about this next week. Once we figure out what we need to do to make this happen, we hope to bring a formal proposal to Faculty Senate to consider based on feedback from President Green. We welcome your feedback.

Discussion:

There was some discussion on the definition of “retiree.” Diane Whitney placed the relevant FSH article in the chat, FSH 3730 C.

There were some questions about the process. The task force tried to assess what other universities are doing. We worked with Brian Foisy, and we are meeting with President Green to make sure this is even possible. From there, we'll work out details and then come to Faculty Senate. It will not be this year.

New Business:

- A senator conveyed a message from a constituent. He is very concerned with the way that we're messaging FSH changes. After a UFM, there is a communication listing the approved policies, but people are not able to actually go see a redline of what those changes are. So they have to do it on their own, and it's a very difficult process for people who aren't on Faculty Senate to understand what changes were approved on an ongoing basis. So his request was simply whether we could get come up with a better process for messaging all the changes that happen every year.

Secretary: The UFM binder contains all the redlines and supporting material. The “Policy Reports” sent out by the Secretary are a notification of approved or disapproved policies, with links to the corresponding item in the binder. The binder is available to all.

A senator inquired about APM vs. FSH. Who decides what ends up in one or the other? think Response: Diane Whitney met with FSL in November to talk about this exact issue. We have a folder in teams that has a list of every policy owner. The goal is for us to go through every single policy and think about who else, besides the current owner of that policy, needs to be involved in changes to that policy. It is a lengthy and complicated process. Part of it is to look at what other institutions are doing. This is a huge project that next year Senate really needs to dive into as a priority. Shared governance is about making sure that people who need to be involved in decisions are involved in those decisions. This doesn't solve the broader issue raised by the senator, but we have started the process toward more transparency.

Diane Whitney: We've discussed this at length with leadership. Despite what you might think from the name, FSH doesn't only apply to faculty and staff. We have chapters in there that do deal with some administrative matters, and also an entire chapter dealing with student issues, and despite the name of the APM, it has always contained policies and procedures. The difference is that APM contains items that only pertain to the administrative units of the University, like facilities, auxiliary services, public safety and security, etc. and FSH is kind of a mismatch, because we do have the whole employment Chapter 3, that has a lot of HR policies in there. How the decision was made to put those in the FSH is lost to history. Currently, when something fits in with the FSH, that's where it goes, and if it's an administrative unit item that already exists in the APM, that's where it goes. I can assure you I have never been part of a conversation where there was an attempt to hide something in the APM opposed to the FSH. All FSH and APM items have always come to Senate and they are always presented for a review. Under the existing Policy on Policies FSH 1460, only FSH items go to Faculty Senate for vote.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 5:01pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

MEMORANDUM

TO: Jean-Marc Gauthier, Chair, Faculty Senate
 Kristin Haltinner, Vice Chair, Faculty Senate

FROM: Torrey Lawrence, Provost and Executive Vice President
 Diane Kelly-Riley, Vice Provost for Faculty

DATE: April 12, 2024

SUBJECT: Items for Faculty Senate

Please see the below table with the faculty members who were approved for a sabbatical in the 2025-26 Academic Year.

| NAME | COLLEGE | DEPARTMENT | SABBATICAL TERM |
|------------------|--|--------------------------|------------------------|
| Rachel Halverson | College of Letters, Arts and Social Sciences | School of Global Studies | Fall 2025 |
| Casey Johnson | College of Letters, Arts and Social Sciences | Politics & Philosophy | AY 2025-26 |
| Tracey Johnson | College of Natural Resources | Fish & Wildlife Sciences | Spring 2026 |
| Samuel Newton | College of Law | N/A | AY 2025-26 |
| Alexandra Teague | College of Letters, Arts and Social Sciences | English | AY 2025-26 |

Originator: Kay Dee Holmes, Assistant Director Research Integrity

Policy Sponsor, if different from Originator: Chris Nomura, VPRED

Reviewed by General Counsel Yes No Name & Date: Manisha Wilson 3/26/2024

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed addition, revision, and/or deletion.

Department of Defense policies require universities to have a written policy in place regarding malign foreign talent recruitment programs in order to receive DOD funding.

2. **Fiscal Impact:** What fiscal impact, if any, will this addition, revision, or deletion have?

Unclear although not likely to have a fiscal impact. The policy requires research security training for individuals on federally funded R&D awards. Training is available for free on the NSF website or through a paid license to CITI Program. ORED is looking into the possibility of incorporating the free training on the NSF website into an internal system.

3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it. FSH 6240 and FSH 5600

4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 D) unless otherwise specified in the policy. This policy needs to be effective by July 1, 2024 because the DOD requires universities to have a policy in place by August 8, 2024. Starting August 8, 2024, DOD is prohibited from providing funding or making an award to a university that does not have a policy addressing malign foreign talent recruitment programs. NSF will start implementing the disclosures required under this policy in May 2024. NSF does not require a written policy like DOD but the NSF requirements have been incorporated into this policy.

FSH 5800

Malign Foreign Talent Recruitment Programs

A. Purpose. This policy implements the requirements stated in 42 U.S.C. § 19231 and provides notice that Covered Individuals participating in a Malign Foreign Talent Recruitment Program are prohibited from involvement in certain federally funded awards. This policy reaffirms that a University employee may be required to disclose that employee's involvement in a Foreign Talent Recruitment Program or Malign Foreign Talent Recruitment Program under FSH 6240 or FSH 5600.

B. Scope. This policy applies to University employees that are Covered Individuals.

C. Definitions.

C-1. "Covered Individual" means:

1. A principal investigator and other senior/key personnel seeking or receiving federal research and development funding; or
2. an individual who (a) contributes in a substantive, meaningful way to the scientific development or execution of a research and development project proposed to be carried out with a research and development award from a federal research agency; and (b) is designated as a covered individual by the federal research agency concerned; or
3. an individual on a proposal or award funded in whole or in part by the Department of Defense who (a) contributes significantly to the design or execution of a fundamental research project, and (b) is considered essential to the successful performance of the fundamental research project.

C-2. "Foreign Government-sponsored Talent Recruitment Program" or "FGTRP" means an effort organized, managed, or funded by a foreign government, or a foreign government instrumentality or entity, to recruit science and technology professionals or students (regardless of citizenship or national origin, or whether having a full-time or part-time position). See section H for a list of activities that are not a FGTRP.

- a. Some FGTRPs operate with the intent to import or otherwise acquire from abroad, sometimes through illicit means, proprietary technology or software, unpublished data and methods, and intellectual property to further the military modernization goals or economic goals of a foreign government.
- b. Many, but not all, programs aim to incentivize the targeted individual to relocate physically to the foreign state for the above purpose. Some programs allow for or encourage continued employment at United States research facilities or receipt of federal research funds while concurrently working at or receiving compensation from a foreign institution, and some direct participants not to disclose their participation to United States entities.
- c. Compensation could take many forms including cash, research funding, complimentary foreign travel, honorific titles, career advancement opportunities, promised future

compensation, or other types of remuneration or consideration, including in-kind compensation.

C-3. “Malign Foreign Talent Recruitment Program” or “MFTRP” means any program, position, or activity that includes one or more of the following:

- a. engaging in the unauthorized transfer of intellectual property, materials, data products, or other nonpublic information
- b. recruitment of trainees or researchers to enroll in such program, position, or activity
- c. establishing a laboratory or entity in violation of the standard terms and conditions of a Federal research award
- d. accepting a faculty position, or undertaking any other employment or appointment in violation of the standard terms and conditions of a Federal research award
- e. being unable to terminate the foreign talent recruitment program contract or agreement except in extraordinary circumstances
- f. being limited in the capacity to carry out a Federal research award
- g. requirement to engage in work that overlaps or duplicates a federal research award
- h. requirement to apply for and successfully receive funding from the sponsoring foreign government’s funding agencies with the sponsoring foreign organization as the recipient
- i. requirement to omit acknowledgment of the US home institution and/or the federal funding agency
- j. requirement not to disclose participation of such individual in such program, position, or activity
- k. having a conflict of interest or conflict of commitment contrary to Federal research award

and is sponsored by one of the following:

- a. a foreign country of concern or entity based in a foreign country of concern as defined in [42 USC §19237](#)(2) and (3)
- b. an academic institution on [the list developed](#) under 1286(c)(8) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019
- c. a foreign talent recruitment program on [the list developed](#) under 1286(c)(9) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019.

D. Policy

D-1. Prohibited activity. A Covered Individual is prohibited from participating in a MFTRP.

D-2. Certification required in a proposal and annually by covered individuals. A University employee who is a Covered Individual on a proposal shall certify in the proposal that they are not party to a MFTRP. Covered Individuals shall certify annually for the duration of a qualifying award that they are not party to a MFTRP.

E. Consequences for false certifications. False certifications or representations under this policy by a Covered Individual may result in discipline according to University policy or prosecution and liability pursuant to, but not limited to, 18 USC §§ 287, 1001, 1031, and 31 USC §§ 3729-3799 and 38002.

F. Research security training requirement.

F-1. Training before proposal submission. A Covered Individual submitting a proposal for a fundamental research project from the Department of Defense or a research and development project from another federal agency is required to have complete research security training within one year of the proposal due date. The proposal may not be submitted unless the research security training has been completed.

F-2. Refresher training. A Covered Individual may need to repeat research security training if required by the federal funding agency.

G. Disclosures by non-Covered Individuals

G-1. Disclosures required by all University employees. All University employees must disclose their participation in a FGTRP or MFTRP to the University as required by FSH 6240. Disclosures shall be reviewed and managed as stated in FSH 6240.

G-2. Disclosures required by investigators as defined in FSH 5600. In addition to G-1, a University employee who is an “Investigator,” as defined in FSH 5600, must disclose their participation in a FGTRP or MFTRP. Disclosures shall be reviewed and managed as stated in FSH 5600.

H. Activities that are not FTRP

H-1. The following international collaboration activities do not constitute a FGTP as long as the activity is not funded, organized or managed by an academic institution or foreign talent recruitment program on [the list developed](#) under 1286(c) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019.

a. Scholarly presentations and publishing written materials regarding scientific information not otherwise controlled under current law;

b. Participating in international conferences or other international exchanges, research projects, or programs that involve open and reciprocal exchange of scientific information, and which are aimed at advancing international scientific understanding and not otherwise controlled under current law;

c. Advising a foreign student enrolled at an institution of higher education or writing a recommendation for such a student, at student’s request; and

d. Engaging in the following international activities:

1. Activities that are partly sponsored or otherwise supported by the United States such as serving as a government appointee to the board of a joint scientific fund (e.g., the U.S.-Israel Binational Industrial Research and Development Foundation); providing advice to or otherwise participating in international technical organizations, multilateral scientific organizations, and standards setting bodies

(e.g., the International Telecommunications Union, Intergovernmental Panel on Climate Change, etc.); participating in a Fulbright Commission program funded in whole or in part by a host country government; or other routine international scientific exchanges and interactions such as providing invited lectures or participating in international peer review panels.

2. Involvement in national or international academies or professional societies that produce publications in the open scientific literature that are not in conflict with the interests of the federal research agency (e.g., membership in the Pontifical Academy of Sciences or The Royal Society).
3. Taking a sabbatical, serving as a visiting scholar, or engaging in continuing education activities such as receiving a doctorate or professional certification at an institution of higher education (e.g., the University of Oxford, McGill University) that are not in conflict with interests of the federal research agency.
4. Receiving awards for research and development which serve to enhance the prestige of the federal research agency (e.g., the Nobel Prize).
5. Other international activities determined appropriate by the federal research agency head or designee.

I. Contact Information

I-1. Contact the Office of General Counsel with questions about disclosures made by university employees under FSH 6240.

I-2. Contact the Research Conflict of Interest Coordinator at uifcoi@uidaho.edu with questions about disclosures required by Investigators under FHS 6500.

I-3. Contact the Undue Foreign Influence Coordinator at ored-export@uidaho.edu with questions about disclosures required by Covered Individuals.

Comprehensive review? __xYes __No

1. **Policy/Procedure Statement:** Briefly explain the reason for the proposed change.
Section D-2 revised to clarify work and pay schedule for academic year appointments. Sections D-4 expanded and revised to clarify summer session obligations of faculty with academic year appointments.
2. **Fiscal Impact:** What fiscal impact, if any, will this change have?
AY faculty working on non-teaching duties during summer session are eligible to receive a contract for the outside-of-contract period if the work exceeds .125 FTE in a pay period. Additional responsibilities and assignments of a more permanent nature may be considered justification for adjustment of the employee’s contracted salary or responsibilities during the academic year, rather than justification for supplemental compensation.
3. **Related Policies/Procedures:** Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.
This is part of a group of policy revisions being proposed to align with the new deferred pay scheme for faculty. The other policies are FSH 3420 Faculty Salaries and FSH 4620 Academic Calendars.
4. **Effective Date:** This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

C. Periods of Appointment

D. ~~B. D.~~ Service Obligation

A. PURPOSE. This policy sets forth the obligations of faculty during their periods of appointment.

B. SCOPE. This policy applies to all faculty at the University of Idaho.

CA. PERIODS OF APPOINTMENT. Professional academic personnel are regularly appointed for service either (1) during the academic year (in this context, the "academic year" encompasses the nine full months ending the day after the close of the spring semester) or (2) for the fiscal year beginning on July 1. Faculty salaries are detailed in FSH 3420.

DB. SERVICE OBLIGATION:

DB-1. Service and ~~Faculty-faculty Workloads~~workloads. Assignments of duties to academic personnel are made by college deans (FSH 1420 D) and departmental administrators (FSH 1420 E) in such a way that the schedule of course offerings will permit each student to complete his or hertheir curriculum in the time prescribed in the catalog and so that the research and service functions of the college and department can be carried out. Full-time appointments assume full-time service, but faculty members may engage in outside consulting as provided in FSH 3260.

DB-2. Academic-~~Year-year a~~Appointments (see FSH 3710 B-1.-c). Academic-year appointees are liable for duty assignments and are accountable for their service to UI throughout the nine-month period specified in A. This period normally begins before the official opening of the fall semester and before the date that is set by the appointee's dean for mandatory return to on-campus duty. These employees may, alternatively, be permitted to account for service during some mutually agreed different, but equivalent, period (i.e., to engage in research, prepare for classes, advise students, participate in new-student orientation, or perform similar academic functions). The work period for academic year appointments falls within 19.5 bi-weekly pay periods and faculty with this type of appointment will be compensated over 20 bi-weekly pay periods.

DB-3. Fiscal-~~Year-year a~~Appointments (see FSH 3710 B-1.-b). Fiscal-year appointees are obligated to perform services for UI throughout the year. Taking eligibility for vacation leave into account, this amounts to approximately 11 months of service each year.

DB-4. Summer ~~s~~Session ~~Appointments~~obligations for faculty with academic year appointments:

a. In general. Summer and other off-contract activities are not required for University of Idaho faculty. With or without additional compensation, agreeing to perform any duties outside of the normal academic calendar is entirely optional and at the discretion of each individual faculty. Faculty should consult with their associated advisory committees on efforts related to expectations under FSH 3500 but are not required to use off-contract time to meet those expectations. Regardless of whether a summer appointment exists, academic year faculty retain access to essential University services such as email, access to their respective offices, and, where applicable, access to research facilities, outside the normal academic calendar.

b. Changes in academic policy and procedure. Administrators should, if possible, avoid using the time outside of

UI FACULTY-STAFF HANDBOOK

Chapter III: EMPLOYMENT INFORMATION CONCERNING FACULTY AND STAFF

Section 3120: Faculty Obligations During Period of Appointment

July 2000

the contract term for academic-year faculty to engage in decision making processes that significantly affect faculty and in which academic-year faculty would normally participate if the processes occurred during the academic year. Administrators should use forethought and sensitivity in asking faculty to devote any time outside of their contract terms for institutional outreach and service, whether compensated or not. They should be especially mindful of actual or perceived imbalances of power between them and faculty members arising from the latter's degree of job security, time at the University, tenure or non-tenure status, or belonging to any group protected by the University's anti-discrimination policies.

ca. Summer session **teaching obligations for academic year** appointments

1.

Summer session teaching appointments. Full-time summer appointments generally call for a basic teaching load of six or seven credits during eight weeks of service. These summer appointments are entirely optional. If the basic teaching load is less than six credits or requires less than eight weeks of service, the summer salary may be prorated accordingly. In addition to the basic teaching load of six or seven credits, faculty load may be increased by the assignment of students registered for research and thesis, directed study, etc. ~~Furthermore, faculty members on summer appointment are expected to perform other routine duties, such as student advising and committee work.~~

2.

-**Selection of summer session teaching faculty.** The selection of faculty members to teach during summer session is based on program needs. In some cases it may be desirable to appoint ~~visiting temporary~~ faculty instead of resident faculty members.

3. -Timeline for summer session teaching appointments. Summer appointments are made as soon as practicable following final development of the summer program. This generally means that a faculty member may be approached by the departmental administrator or dean as early as the preceding September to ascertain ~~his or her~~ the faculty member's interest in teaching during the following summer session. The plan for the summer program is generally completed by February 1, and recommendations for summer appointments are normally submitted to the president in March or April.

d. Summer session **non-teaching appointments for academic-year faculty**

1. Faculty working on non-teaching duties such as unit, college, or university committee assignments, recruitment initiatives, outreach, extension, administration, sponsored projects, etc., are eligible to receive a contract for the outside-of-contract period if the work is above .125 FTE in a pay period.

2. Additional responsibilities and assignments of a more permanent nature may be considered justification for adjustment of the employee's contracted salary or responsibilities during the academic year, rather than justification for supplemental compensation.

Version History

Amended 2020. Moved 3240 Section A: Faculty Workloads, which was already cross-referenced with 3120 B, to that

Chapter I: HISTORY, MISSION, GENERAL ORGANIZATION, AND GOVERNANCE

Section 1640: Committee Directory

1640.36

DISMISSAL HEARINGS COMMITTEES

A. FUNCTION. This committee will conduct a hearing at the request of a faculty member who has been terminated to determine whether their termination was properly based on the grounds stated (see FSH 3910 D-3 and 3920 D.)

B. STRUCTURE AND MEMBERSHIP: The DHC is composed of four faculty members and one administrator at the departmental level or above, six faculty members and three administrators as alternates. Committee members, including alternates, are chosen on the basis of their objectivity and competence and the high regard in which they are held in the UI community. In appointing members the Committee on Committees should attempt to reflect the diversity of the UI faculty. Due to the possibility a case may be appealed to the Faculty Appeals Hearing Board care should be taken in appointing members to both Faculty Appeals Hearing Board and Dismissal Hearings Committee. The term of membership is three years. This committee meets during the summer.

C. SELECTION: The faculty member requesting a hearing has the right to substitute up to two members appointed with two others from the alternate list. The provost also has the right to substitute two members appointed with two others from the alternate list. If as a result of substitutions and conflicts of interest there are an insufficient number of faculty members or administrators on the alternate list, the Committee on Committees will be asked to appoint more members to the alternate list as needed. Once the panel for an individual hearing has been determined, it will meet at the direction of the chair of the Dismissal Hearings Committee and elect its own panel chair. In selecting a chair, a tenured faculty member will receive priority.

C-1. Panel Chair's Role: Once a panel chair has been selected, he/she will request a meeting with the Faculty Secretary at their earliest opportunity to discuss and review process. The panel chair may request assistance from the Faculty Secretary, Ombuds or General Counsel's office throughout the hearing.

C-2. Observers: Both parties may have an advisor or counsel at the hearing.

Last updated: July 01, 2009

A. SALARY INFORMATION IS PUBLIC. The salaries of UI employees are public information and that information may be obtained through the University Library (Department of Special Collections and Archives).

B. DISTRIBUTION OF PAYCHECKS.

B-1. Effective August 1, 2000, newly hired employees will need to designate a bank of their choice to which they authorize direct deposit of their paycheck. Information on procedures is provided at ~~New Employee Orientation and also in the Administrative Procedures Manual~~ [55.05](#).

B-2. Paychecks for employees hired before August 1, 2000 will ~~continue to be~~ **mailed available at the cashier's window in Business Systems and Accounting Services on the day Thursday before** the last working day of each biweekly payroll period following the period in which the payroll was earned (i.e. two weeks after the end of the pay period during which the payroll was earned.) If the last day of a payroll period is a holiday, checks will ~~be mailed the day before the pay day. be available on the next working day.~~

C. INCOME TAX WITHHOLDING. In accordance with federal and state laws, income tax is withheld from the salaries and wages of UI employees. Each employee is responsible for filing a W-4 online in Vandalweb.n exemption certificate at Human Resources.

D. W2 forms Statements of withholdings for income tax (W-2) are available about the third week in January; those for salaried ~~on campus employees~~ are sent to departments for distribution, and temporary help employees and off campus employees ~~will be mailed to the W2 address in the Banner system. pick theirs up at the cashier's window in Business Systems and Accounting Services.~~ When leaving the employ of UI, employees should furnish the Payroll Office the address to which the W-2 form is to be mailed.

3480 - Compensation for Service in Addition to Regular Duties

Last updated: ~~July 01, 2021~~

A. The president or designee may request a UI exempt employee or faculty member to perform responsibilities or provide services beyond the scope of ~~his or her~~ the employee's primary appointment. The president or designee can authorize payments in addition to regular salary and these payments must be reported to the regents in a semi-annual report. See [RGP II.C.4.](#), [RGP II.F.2.](#), [RGP II.G.2.](#) Deans and other administrative officers are responsible for ensuring that required approvals have been granted for employees receiving additional compensation for service that is not part of the employee's position description. See FSH 3120 for faculty obligations during periods of appointment and summer session.

B. ~~For faculty the~~ The following activities are considered additional duties subject to this policy:

~~B-1. Employees T~~ eaching during the intersession between fall and spring semesters.

~~B-2. Employee p~~ Participation in short-term programs, such as symposiums and conferences, sponsored by UI colleges or departments.

~~B-23. Employees T~~ eaching continuing-education courses or for grading correspondence-study courses when such activities are not a part of their regularly assigned responsibilities. No combination of continuing-education or other teaching overloads is to impose a total requirement on the employee's time that is greater than about one additional day a week (exclusive of periods of vacation leave or legal holidays).

~~B-34.~~ Services to UI that are clearly beyond the employee's assigned duties and are not performed on days for which the employee is paid for regular duties. Such services are subject to the limitations on private consulting stated in FSH [3260](#). In addition, prior approval by the employee's departmental administrator must include a certification that:

- a. ~~T~~ he work to be performed is an overload,
- b. ~~W~~ ork schedules cannot be rearranged to include the work in the employee's regular duties, and
- c. ~~N~~ o other qualified UI personnel are available to do the work as a part of their regular duties.

See FSH 3440 for policies regarding compensation for classified staff performing service in addition to regular duties.

1. Policy/Procedure Statement: Briefly explain the reason for the proposed change.

Slight edit to the policy for prior coverage given we have an inability to access old records. Removal of the J-1 Scholars exception per IPO – they do not get a background check and should get one.

2. Fiscal Impact: What fiscal impact, if any, will this change have?

Should only have minimal impact, if any. Would require a new CBC to be conducted for an existing employee if they are changing positions and their CBC is older than 3 years. Current cost is approximately \$65.00 depending on the number of locations a person has lived.

3. Related Policies/Procedures: Describe other UI policies or procedures related or similar to this proposed change, or that will be impacted by it.

4. Effective Date: This policy shall be effective on July 1, or January 1, whichever arrives first after final approval (see FSH 1460 H) unless otherwise specified.

No later than July 1, 2024.

50.16 - Criminal Background Check Procedures

Last updated: January 01, 2022

A. Purpose. This policy sets forth requirements for criminal background checks for employees.

B. Scope. This policy applies to all employees.

AC. General Policy. Criminal background checks confirm an individual's fitness relative to the requirements of their employment or volunteer service at the University of Idaho (U of I).

U of I requires criminal background checks for all non-student positions, graduate student appointees, postdoctoral scholars, and temporary help positions (T1, T4, etc.). U of I requires criminal background checks for student positions (ST/SF/SI), interns, and volunteers only if the work will involve contact with minors or the hiring authority determines the work to be security-sensitive. This list is not intended to be exhaustive. Questions on background check requirements should be directed to Human Resources (HR). *{rev. 3-18, 1-22}*

The requirements of this procedure policy also apply to existing employees being considered for changes in position, transfers, and promotions. However, if an existing employee has a previous background check on file within the prior three years with U of I, and that background check is applicable to the change in position, transfer, or promotion, a new background check will not be required. A background check is not required for general faculty promotions in rank pursuant to FSH 3500 where the faculty promotion does not involve an internal or external search. *{rev. 11-12, 12-14, 3-18}*

Non-compliance with this procedure will be communicated to the Office of General Counsel and the appropriate vice president.

BD. Procedures for Criminal Background Checks. The U of I will conduct criminal background checks on the recommended candidate(s) for all positions listed in Section AC. Hiring authorities must request criminal background checks for student positions (ST/SF/SI), interns, and volunteers if the work will involve contact with minors or the hiring authority determines the work to be security-sensitive. Security-sensitive work may involve access to restricted facilities, resources, finances, data, confidential information, or research as determined by the hiring authority. *{rev. 3-18}*

BD-1. Required Notification of Criminal Background Checks. All advertisements, notices, and postings for positions listed in Section AC must state: "This position is subject to the successful completion of a criminal background check." No candidate for a position listed in Section AC shall commence employment until a satisfactory criminal background check has been received by HR. Any offers associated with these positions must be made contingent on a satisfactory criminal background check. *{rev. 3-18}*

For student (ST/SF/SI), intern, and volunteer positions for which a search was not necessary or was waived, the hiring authority will provide the candidate or volunteer with written notice of the criminal background check requirement prior to offering the position. The candidate or volunteer can only be offered the position contingent on a satisfactory criminal background check. The candidate or volunteer must not begin work or begin the new responsibilities until a satisfactory criminal background check has been received by HR. *{add. 10-07, ed. 11-12, 1-22, rev. 3-18}*

BD-2. Required aAuthorization for cCriminal bBackground cCheck. ~~If a search runs through the UI online recruitment system, the criminal background check is initiated during the hiring proposal process. For hires outside the online recruitment system, the~~ The hiring unit must submit a Department Request for Criminal Background Check via the on-line request for background check. The request shall include the following information: candidate name and email address, position title/action number, budget number, and unit. The candidate will receive an email from the background check vendor to initiate the background check. The candidate must submit the required personal information at a secure website and electronically sign the Disclosure and Authorization forms. The candidate will then receive a summary of rights under the Fair Credit Reporting Act (FCRA), and the background check will begin. The ~~third-party~~ consumer reporting agency will provide the background check results to HR. HR will review the background check' results to determine whether the candidate meets the criteria for the position. HR will notify the hiring authority of the results of the background check. Costs associated with criminal background checks will be charged to the hiring unit. *{rev. 11-12, 12-14, 3-18}*

DB-3. Contingent offer of employment. If circumstances require that a job offer be made prior to the completion of the background check, the hiring unit must use the approved contingent offer letter template found on the HR website, which includes the following language: "This offer is contingent upon the completion of a satisfactory criminal background investigation and other pre-employment requirements." Although a contingent offer may be made, the employee may not begin work in any capacity, including attending orientations for the unit or University, without a completed satisfactory background investigation and other pre-employment paperwork. It is recommended that a written offer not be made until the satisfactory criminal background check has been completed and confirmed by HR. *{rev. 3-18}*

DB-4. Prior cCriminal bBackground cCheck qualifies. If a candidate is being rehired or reappointed into the same position, has ~~previously~~ (in the prior three years) met the background check requirement for that position, and the break in service is less than one year, the background check requirement may be waived at the discretion of the senior HR executive, or designee. *{rev. 10-07, 11-12, 3-18}*

DB-5. Day cCare cCenters must comply with I.C. § 39-1105. Employees or volunteers at day care centers who have direct contact with children are subject to the criminal history check procedures set forth in I.C. § 39-1105, which are conducted by the day care centers in conjunction with the appropriate state agencies. The procedures set forth in this APM 50.16 do not apply these individuals. *{ed. 3-18, 1-22}*

DB-6. ~~U~~ College of Agricultural and Life Sciences uUnique rRequirements.

a. Non-4-H yVolunteers. The ~~University's~~ College of Agricultural and Life Sciences (CALS) has implemented additional criminal background check procedures for volunteers who have significant contact with minors. Students and volunteers of CALS may be subject to additional screening requirements pursuant to those procedures. *[rev. 10-07, 3-18 ed. 11-12, 1-22]*

b. 4-H yVolunteers. Volunteers through the 4-H programs who have direct contact with children are subject to the criminal history check procedures set forth in the 4-H Youth Development Policies and Procedures. *[add. 1-22]*

~~**B-7. J-1 Scholars and Exceptions.** J-1 scholars are visiting temporary workers here by invitation to perform specialized work. The Department of Homeland Security performs background checks on all J-1 scholars. Therefore, these temporary workers are exempt from the requirements of this procedure. The senior HR executive or designee may provide exemptions for other employees in similar situations. *[add. 3-18, ed. 1-22]*~~

Commented [B1]: J-1 Scholars do not complete a background check as noted. Per IPO, this section should be removed and a CBC be required in accordance with regular processes.

DB-78. Successful aApplicants rRecruited through an aAuthorized sSearch fFirm.

When an authorized search firm is used to recruit for key leadership roles, where the service provided includes a background check that is no less comprehensive than that conducted by the ~~U~~U of I, the senior HR executive or designee may approve the use of the search firm background check for purposes of employment in that position. All background checks are to be sent to HR and not provided to search committees, etc. to maintain consistency in process. *[add. 1-22]*

CE. Procedures for cCriminal bBackground cChecks for sSecurity pPurposes. If the senior HR executive or designee has reasonable grounds to believe that an employee or volunteer represents an immediate threat to the safety and security of the ~~U~~U of I community, HR may conduct a criminal background check through the Idaho State Police or other appropriate agency. The written authorization of the employee to conduct this check will be obtained in most cases. However, in certain circumstances, it may not be possible or feasible to obtain written authorization. In those cases, a limited background check may be performed through the Idaho State Police or other appropriate agency. Any information obtained through this process will be used solely for the purpose of maintaining the safety and security of the ~~U~~U of I community and will be shared strictly on a "need to know" basis. *[ed. 11-12, rev. 3-18]*

DE. Results of cCriminal bBackground cChecks.

DE-1. Applicants nNew to UU of I. If the criminal background check identifies a convictions, with the exception of FD-3 below, determinations of fitness for employment will be made by Human Resources, and may include ~~in~~ consultation with appropriate hiring authority, based on the nature and details of the conviction, date of the conviction, how the crime relates to the job in question, evidence of rehabilitation, and other relevant factors. *[rev. 3-18, 1-22]*

FD-2. Current eEmployees. When a current employee with a convictions is considered for changes in position, transfers, or promotions, ~~the determination of whether to exclude the candidate will be made by~~ the senior HR executive or designee, ~~and may include in consultation with the appropriate hiring authority, will determine whether to exclude the candidate.~~ *[rev. 3-18]*

If, pursuant to this procedure, a criminal background check is conducted on a current employee and an event is uncovered that was not previously considered, ~~UU of I~~ may initiate personnel action against the employee. In these cases, the senior HR executive or designee in consultation with the Risk Management Officer and other applicable personnel, will determine what action, if any, should be taken. The senior HR executive or designee may ask the employee for a written explanation of the offense(s). *[rev. 11-12, 3-18]*

DE-3. Disqualifying eEmployment cConvictions. A record of any of the following convictions will generally result in automatic exclusion of the candidate or termination of a current employee: *[rev. 3-18]*

a.i) Conviction of any crime against a child or vulnerable adult (including but not limited to child abuse, abandonment, neglect, and statutory rape);

b.ii) Conviction of any crime of violence;

c.iii) Conviction of any crime of a sexual nature, including but not limited to lewd conduct, sexual battery, sexual exploitation, rape, and statutory rape;

d.iv) Conviction of any crime involving unlawful use or possession of a weapon or firearm. *[ed. 11-12]*

FD-4. “Conviction” dDefined. For purposes of this procedure, the term “conviction” will be interpreted broadly and will include pleas of no contest, deferred adjudications, and similar dispositions. If a criminal history report indicates pending criminal charges that, if a conviction resulted, would result in exclusion from employment, the candidate will be excluded from employment until final disposition of the charges. *[ed. 3-18]*

EG. Communication of rResults and eEmployee rRights

GE-1. Consumer rReporting aAgency. Procedures when the report has been provided by a consumer reporting agency (e.g., Verified Credentials) shall be as follows: *[ed. 12-14, 3-18, 1-22]*

a.i) If a determination has been made that a candidate should be excluded, or that adverse action should be taken against a current employee, based on an unsatisfactory criminal background check, HR shall, prior to taking any adverse action against the individual, provide a Pre-Adverse Action Disclosure that (1) notifies the individual in writing of the unsatisfactory result, (2) provides the

candidate or employee with a copy of the report, and (3) provides the candidate or employee with a written description of ~~his or her~~their rights under the Fair Credit Reporting Act.

ii) After the adverse action has been taken, HR will provide the candidate with an Adverse Action Notice, which includes (1) the name, address, and phone number of the consumer reporting agency that supplied the report, (2) a statement that the consumer reporting agency that supplied the report did not make the decision regarding the adverse action and cannot provide the reasons for the adverse action, and (3) a notice of the individual's right to dispute the accuracy or completeness of any information the agency has furnished, and ~~his or her~~their right to an additional free consumer report from the agency upon request within 60 days.

~~iii)c.~~ A candidate or employee who has received an initial unsatisfactory result and who has sought correction of ~~his or her~~their report under the Fair Credit Reporting Act is not eligible for a listed position until the senior HR executive, or designee has confirmed the correction and determined that the result is satisfactory. The ~~UU of I~~ has no obligation to hold a position open to allow a candidate or employee to correct ~~his or her~~their report. *~~fed. 11-12, 3-18~~*

~~GE-2. Government r~~Reporting ~~a~~Agency. Procedures when the report has been provided by a governmental agency (e.g., Idaho State Police) shall be as follows:

If a decision has been made to exclude a candidate, or initiate action against a current employee, based on an unsatisfactory background check, HR shall (1) notify the individual in writing of the unsatisfactory result, and (2) provide the candidate or employee with a copy of the report. *~~fed. 1-22~~*

~~FH. Record Keeping~~keeping. Criminal history information collected under this procedure shall be kept electronically with the third party vendor or in accordance with record retention requirements (see [APM Chapter 65](#)). The information will be used solely for the purpose of maintaining the safety and security of the ~~UU of I~~ community and will be disclosed only as permitted or required by law. *~~rev. 10-07, 11-12, 3-18~~*

Version History

2023 – 2024 Faculty Senate – ~~Pending Approval~~ Approved at Mtg #3
Meeting # 30 **Aug. 27, 2024**
Tuesday, April 23, 2024, 3:30 pm – 4:30 pm
Zoom only

Present: Barannyk, Blevins, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Shook, Schwarzlaender, Thaxton, Tibbals.

Absent: Buchen, Miller, Mischel

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #29, April 16, 2024, were approved as distributed.

Chair's Report:

- Gwen Gorzelsky, Vice Provost for Academic Initiatives, would like to encourage the Senators to attend the open forum events for the three finalists for the position of Director of General Education (DGE). The reconfigured DGE role will focus on improving outcomes specifically in General Education courses, building community among General Education instructors within and across disciplines, and coordinating with the State Board of Education and general education colleagues across Idaho public institutions. The relevant information can be found at the search website: [Director for General Education | University of Idaho Provost \(uidaho.edu\)](https://uidaho.edu)

Provost's Report:

- The State Board of Education met on our campus last week. One of the businesses they consider in April is tuition increases. They approved a tuition and fee increase of 3%, about \$268 per student. This generates approximately 2.8 million dollars, which we plan to use for funding CEC. The same percentage was approved for all four-year institutions in the state.
- Vandal Giving Day: The goal was to raise a million dollars on that day. They raised 1.13 million dollars, a 30% increase over last year. Both the number of gifts and the number of people who donated increased significantly. This is great news from the fundraising standpoint, but it's also an indicator that people are excited about what we all are doing and where the institution is going. It's a great sign and obviously helps our programs and our scholarships.
- The second Uldaho Bound event is this Saturday. Enrollment continues to be a focus. I appreciate all of you who help with those events.
- There are still problems with FAFSA nationwide. Our Financial Aid Office has been very proactive with communications to students, but they still don't have financial aid packages. They expect packages to start going out within the next one to two weeks, to new students first and then to continuing students. If you talk to families, let them know that we are aware of the challenges and we're working on it. It's a federal issue.
- It's time to thank Jean-Marc and Kristin for their leadership this year and all they've done to lead the Senate. Jean-Marc came into this not having been the prior vice chair, and I think they both have done a great job leading. So, thank you, Jean-Marc and Kristin, for what you've done to serve this body during the year!

Discussion:

A senator asked whether the 3% tuition raise is the same as, or in addition to, the 3% increase in Gen Ed funding from the state announced the previous week, along with information on how it's going to be spread out for CEC purposes. Provost Lawrence clarified that the announcement from the previous week assumed that a 3% increase in tuition would be approved. Today's communication does not add more funds.

Committee Reports:

- Proposed changes to the University Catalog (voting)
 - Admissions Requirements – Steve Shook, Forest, Rangeland and Fire Sciences
Steve Shook presented a summary of discussions/events leading to the proposal in Attach. #2. The proposal captures the UCC recommendations to Faculty Senate, except for the statement in 2c, *“Every applicant who has a test score (ACT, SAT, or ISAT) is encouraged to provide it for admission. Providing a test score assists in class placement and may make an applicant eligible for certain scholarship opportunities,”* which was added later.
Discussion:
A senator raised an issue about the wording. Presumably, the various options are meant to be mutually exclusive, but, with the present language, they are not. A student can fall within both options **2a** and **2b**, in which case they are both directly admitted and required to submit test scores. After a brief discussion, the confusion was clarified and a change to the language was proposed: *“New first-year applicants with a cumulative GPA between 2.6 and 2.99 who are not otherwise automatically admitted under **2a** must submit an ACT or SAT score.”*
There was some additional discussion on whether we should expect a return to test scores being required. Steve Shook said it would be helpful to have both indicators, (GPA and standardized test scores), because students may do better with one or the other. In response to a question about out-of-state students, Steve noted that admission requirements are the same for in state and out-of-state students, except for the ISAT. A senator wished to make a final remark: This proposal is great to go forward. In a couple of years, though, Faculty Senate may want to revisit what the SAT score should be for the 2.6-2.99 GPA range.
Back to the motion (Tibbals, Barannyk) to amend the language in section **2b** of First-Year Admission Requirements.
Vote on the proposed amendment: 20/20 yes. Motion passes.
Vote on the amended motion: 21/22 yes; 1/22 no. Motion passes.
 - UCC 538 Nuclear Materials Engineering Graduate Academic Certificate – Indrajit Charit, Nuclear Engineering and Industrial Management.
The nuclear industry is going through a renaissance. Nuclear energy is environmentally sustainable and is essential in the form of modular reactors and micro-reactors to charge the electric vehicles that will dominate the roads. The proliferation of nuclear energy and the safe operation of nuclear reactors depend highly on how we address the issues related to materials and their degradation. This certificate program will prepare the students to address the materials-related issues of nuclear engineering and will attract students from various disciplines. There are only two other universities (WSU-Tri-Cities, and UWisconsin) that offer certificate programs in nuclear materials. Furthermore, the certificate will help meet the employment needs of our industry partners. This certificate program is intended to prepare students for careers in the nuclear industry or nuclear medicine and for future graduate studies in nuclear engineering. The department already offers the courses required for the certificate.
Vote: 20/21 yes; 1/21 no. Motion passes.

- UCC 115 Department of Nursing – Jeff Seegmiller, Director, Medical Education Program. We are currently proposing the new School of Health and Medical Professions and six new programs under three departments (Department of Medicine, Department of Clinical Medicine and Department of Nursing). The Department of Medicine and the Department of Clinical Medicine have already been formed. Our Idaho WWAMI Medical Education program is also included in this organizational structure and is housed in the Department of Medicine. Vote: 21/21 yes. Motion passes.
- UCC 117 Changes to General Education Course Lists: Regulation J-3 – Dean Panttaja, Vice Provost for Academic Initiatives. We are proposing an addition of 10 courses, 5 in the gym area and 5 in the capstone area, and

Discussion:

A senator expressed concerns about the language in J-3-c “*Scientific Ways of Knowing (8 credits from two different disciplines, which include two accompanying labs OR 7 credits which includes a Core Science (CORS) course and one course with lab).*” The senator argued that a student could not graduate with 7 credits by taking NR 213. (This issue was set aside to be revisited later in the meeting.)

Dean Panttaja provided additional clarification on the changes that were made. Kristin Haltinner inquired about Survey of Health, Fitness, Sport, and Wellbeing being listed as an American Diversity course. Dean Panttaja didn’t quite recall the specifics of those conversations, but he is sure the course met the appropriate criteria, which are spelled out by the State Board of Education. We, as an institution and based on our vision and values, have defined what it means to be American Diversity and what it means to be International. This course covers all athletes and mechanisms in place to ensure we have a diverse athletic world. The course covers discussions about diversity, equity, and inclusion in sports. Kristin Haltinner noticed that the same course added under American Diversity is also added under Social and Behavioral Ways of Knowing, so students can “double dip.” Her department no longer allows that, because it defeats the purpose of Gen Ed. She wondered whether there is an ongoing conversation at UCGE on this matter. Dean Panttaja replied that he believes in a broad education and supports the decision of the Sociology department. The practice commonly referred to with the term “double dipping” dilutes the broad exposure that should be provided by Gen Ed courses. He has shared those views over his many years in Gen Ed.

Motion (Mittelstaedt, Tibbals) to postpone the vote on UCC 117 for about 20 minutes, while a group of people discuss a possible amendment to the language in J-3-c.

Vote: 19/20 yes; 1/20 no. Motion carries.

- **Announcements and Communications**

- Vandal Health Clinic – Blaine Eckles, Vice Provost for Student Affairs and Dean of Students, Jeff Seegmiller, Director, Medical Education Program, Rayme Geidl, Associate Director, Medical Education Program

Blaine Eckles:

Student Affairs has been working with Gritman Medical Center to provide health services to our students through the Vandal Health Clinic. The contract is now at a renewal stage, and they decided to make some significant changes. The Vandal Health Clinic is brought back in house and turned into a teaching clinic where our faculty working with our students in the WWAMI program will provide medical services to the students at the University of Idaho. It’s going to be a full-fledged health clinic, just like it always has been, with two significant changes: it is in house, and, unfortunately, for the time being is not able to provide medical services to employees, who could access the health clinic before the change. As the clinic is operated internally, it is under FERPA, and thus only accessible to students going forward. A

long-term goal is to get it back to be accessible to employees. A teaching clinic will further our educational programs.

Jeff Seegmiller:

This is really an exciting time for the University of Idaho, with many new proposed health professions programs. We appreciate your support for those programs. We're really trying to change how the University of Idaho contributes to the healthcare shortages within our state, which are quite drastic. Presently, we rank fiftieth for number of physicians per capita, and every county in the State of Idaho is a health professional shortage area for behavioral mental health and 98% are a behavioral mental health or primary care shortage area. We have a medical school on our campus, yet our students must go elsewhere for some training. We are happy to bring training experiences on campus and within our community. This is an exciting time for us to employ clinicians as full FTE clinical faculty that can also teach and provide services for our student population. It is actually very common across the United States to have an academic medical center, where students and faculty can receive care, and we're looking forward to that model.

Discussion:

There was a question about possible impact of these changes on sexual health care for students, such as birth control or STD testing referrals. Rayme Geidl confirmed that there will be no cuts to any of the services students are currently receiving from the health clinic. A senator shared her concerns that Idaho state laws are discouraging doctors from coming here. Jeff Seegmiller replied that he knows the challenges. He moved to Boise for eight weeks to help educate our legislators on the impact that our laws have on the practice of medicine within our State and even on individuals choosing to go into health care. Fortunately, the number of physicians in Idaho has been going up. Idaho is a fast-growing state, and so our numbers have been increasing, but not enough to meet the actual growth of the state. Therefore, anything that discourages a physician from practicing in our state or moving to our state, hurts us down the road and presently. So, we need everybody to help to educate our legislators on the challenges.

A senator asked whether postdocs would have access to the clinic after the changes. Blaine Eckles replied that they wouldn't, being staff. However, the U of I will maintain an important relationship with Gritman, because not all student needs can be met through the Vandal Health clinic. They expect to be doing a lot of referrals to the community just like they did when there wasn't a health clinic here on campus.

Back to the topic of state legislature, Dean Eckles noted that we have elections coming up. He is on a panel hosted by ASUI about educating students on the importance of voting. All of us have a voice and need to engage our constituents about reaching out to our representatives in the state legislature.

- Distinguished Scholars Program – Jerry McMurtry, Dean, College of Graduate Studies
Sandra Renee visited Faculty Senate to talk about what she is doing with the Honors Program and the effort to create an office of distinguished fellowships. Today, Dean McMurtry will follow up with some of the work being done at COGS. Every time we get an honor student into graduate school, it's certainly a win for us if they stay. If they move on with a prestigious fellowship to another institution, that gives us visibility where they go, which is, generally, an aspirational peer level institution. COGS offers workshops specific to the needs identified for our graduate students. The information is spread out wide to students, faculty and staff to get students involved in this. Jerry McMurtry urged faculty to look at the COGS initiatives and build them into NSF-style mentoring programs, which is now a requirement if the award includes support for graduate students. Specifically on the topic of prestigious fellowships, they have a workshop series which gives students the opportunity to explore fellowships and find one that works for them. They started with just a few, the NSF Graduate

Research Fellowship Program (GRFP), the NIH F31 Fellowship, the Ford Foundation and the National Defense Science and Engineering Graduate Fellowship, and now have about 30. While supporting students through a formal workshop series, they learned that students really want to spend time writing for these awards. So, they created a spring and a fall class on the subject of prestigious fellowships. The spring class, Prestigious Fellowships I, helps the students work through what they need to do to get one of these fellowships and to write the strongest proposal they can. In the fall, Prestigious Fellowships II prepares them to meet most of the deadlines for the big federal fellowships that come up in October and November. The course goes through the first eight weeks of the fall semester and focuses on how to submit the best fellowship application that moves forward. Of the five students that went through a pilot version of this program last year, there were two winners and an honorable mention, which is a pretty good success. COGS is excited to work with the Honors Program, but they are also moving further.

Discussion:

In response to a question, Jerry said that those fellowships are primarily for graduate students, although at COGS they do reach out to the undergraduate population, particularly for the GRFP, because they're only eligible to apply twice. Sometimes, they have worked with juniors who wanted to be prepared to apply in the senior year, so they could have support to go on to graduate school. They also work with first-year graduate students, who are still eligible to apply.

COGS would love to get high school students thinking about this early, but these applications are not easy to write and they're extremely competitive. It takes a lot of time to work through this, to obtain the appropriate references, to work with your faculty sponsor on developing the correct research plan etc.

New Business:

- From Vice Chair Haltinner: The university-level committee roster to be presented at the UFM is different than the one from last week, because several people have declined the appointment. It will likely continue to change until early Fall.
- From Senator Dakota Roberson: Idaho Falls is in a period of great transition with massive influx in population and high cost of living. Idaho National Lab has been hiring much faster than we can produce students to fill positions, and so the pressure is on from them to be competitive with our neighbors. We have the University of Utah, about three hours south of here, and Utah State, about two and a half hours from us. From a couple of faculty meetings we had last week, there's a serious desire for improvement and change in the area, both externally and internally. Senator Roberson will represent Idaho Falls campus for another three years and he hopes that senate, with the next leadership, will talk about things we can do to address this growing disparity between the workforce needs of the area and what we're able to provide currently.

A senator asked if there was any support in terms of housing for high school students who would like to do internships at INL. Dakota replied that no affordable housing is available. In fact, some of his graduate students currently on research assistantships live in Pocatello because they can't afford to live in Idaho Falls on a GRA rate. The cost of living here has gone up so dramatically in the last couple of years that it's cheaper for them to live on the ISU campus and commute to Idaho Falls.

Provost Lawrence noted that work is going on with the State Board. He and Senator Roberson can talk more about this when they meet at commencement.

Reopening the discussion on UCC 117, J-3-c:

- Senator Tibbals: It is unclear whether UCGE and UCC wanted to allow NR 213 to replace a core science, in effect allowing a student to graduate with 7 credits using that class. Without knowing the answer to that, it's not appropriate to add a 3-credit science class that will in essence be a

trap for students, because they would take it and still must do a core science and a lecture lab or 2 lecture labs.

Motion (Tibbals, Mittelstaedt): Remove NR 213 from the proposed changes to Regulation J-3.

Vote on the amendment: 20/21 yes; 1/21 no. Motion carries.

Vote on the amended UCC 117: 20/21 yes; 1/21 no. Motion carries.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:31pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

University of Idaho
2023 – 2024 Faculty Senate Agenda

Meeting #30

Tuesday, April 23, 2024 at 3:30-4:30 pm
Zoom Only

2023 – 2024 Faculty Senate – Pending Approval

Meeting # 29

Tuesday, April 16, 2024, 3:30 pm – 5:00 pm

Zoom only

Present: Barannyk, Blevins, Buchen, Chapman, Gauthier (Chair), Haltinner (Vice Chair), Justwan, Kenyon, Kirchmeier, Maas, McKenna, Miller, Mittelstaedt, Murphy, Pimentel, Ramirez, Raney, Rinker, Roberson, Sammarruca (w/o vote), Schiele, Shook, Thaxton, Tibbals.

Absent: Schwarzlaender (excused), Mischel

Call to Order: Chair Gauthier called the meeting to order at 3:30 pm.

Approval of Minutes (vote):

The minutes of the 2023-24 Meeting #28, April 9, 2024, were approved as distributed.

Chair’s Report:

- It’s been a pleasure serving for the past three years on the Faculty Senate which followed three years at UCC. I think that the university has huge potential when people work together, and you, the senators, can make it happen. I think that it’s important to use our voices to create a sense of positivity as opposed to fear.
- After meeting with people from Pocatello, Boise, and Sandpoint, I hope that we will continue our efforts to be a land grant university with grass root projects and a laser sharp focus on quality of education and research.

Provost’s Report:

- Our Regents are on campus tomorrow and Thursday. They visit once per year, when they have their meeting on the Moscow campus.
- Lionel Hampton Jazz Festival starts Wednesday evening, and continues all day Thursday, Friday, and Saturday. There will be about 3,400 students on campus.
- The College of Science will have “Vandal Science Days,” Friday, April 19 and Saturday, April 20, from 10am to 3pm in the IRIC atrium. <https://www.uidaho.edu/sci/news/vandal-science-days>
- Faculty Gathering: Wednesday, April 17, 4:30 to 6:30, at the WWAMI Medical Education Building. <https://www.uidaho.edu/provost/faculty-gathering>
- Commencement on May 11th. Please encourage your faculty to attend.

There were no questions.

A remark from the Secretary:

Addressing an issue raised by a senator last week as new business, the Secretary outlined the process for communicating presidential approval of policies approved by the faculty at UFM’s. She solicited suggestions for improving the process.

Consent Agenda

- Committee Appointments for AY 2024-25 – Kristin Haltinner, Chair of the Committee on Committees, Attach. #2.

There was an inquiry about the Promotion and Tenure committee, not on the list.

Provost Lawrence replied that appointing that committee follows a completely different process. In the Fall, the Provost works with Senate leadership in accordance with the process prescribed in FSH 3500.

- AY 2025-26 Sabbatical Approvals – Jean-Marc Gauthier, Chair of Faculty Senate, Attach. #3.

There were no requests to take items out of the consent agenda for discussion and vote. The consent agenda stands approved by unanimous consent.

Committee Reports:

- Proposed changes to the Faculty and Staff Handbook (voting)
 - FSH 5800 Malign Foreign Talent Recruitment Programs – Kay Dee Holmes, Assistant Director for Research Integrity, Office of Research Assurances, Attach. #4.
Department of Defense (DOD) policies require universities to have a written policy regarding malign foreign talent recruitment programs to receive DOD funding.
Discussion:
There were inquiries about the definition of “malign foreign talent recruitment” programs and how to recognize them. An individual may not be aware that they are engaging with one of these programs. Kay Dee replied that it is the individual’s responsibility to disclose any such involvements. If they are not sure, they should reach out to the Office of Research Assurances.
A senator suggested a website to point people in the right direction, to avoid oversights. Kay Dee noted that there is one, but feedback on how to improve it is welcome. There is also a link in VERAS. <https://www.uidaho.edu/research/faculty/research-assurances/foreign-interest/faq>. Compliance is not retroactive. The starting date depends on the agency. The certification is required as part of the final proposal sign-off.
Vote: 21/22 yes; 1/22 no. Motion passes.
 - FSH 3120 Faculty Obligations: Alistair Smith, Department Chair, Earth and Spatial Sciences, Attach. #5.
Section D-2 revised to clarify work and pay schedule for academic year appointments. Sections D-4 expanded and revised to clarify summer session obligations of faculty with academic year appointments.
This policy was approved by the Senate at their meeting #27. In the meantime, FAC noticed a problem with the language regarding *entirely optional* summer appointments not counting toward P&T.
Motion to amend the previously approved motion (Mittelsteadt, Rinker) as in the revision from FAC presented today.
Vote on the motion to amend: 22/22 yes. Motion Passes.
There was no further discussion. FSH 3120 approved as amended.
 - FSH 1640.36 Dismissal Hearing Committee – Kristin Haltinner, Chair of Committee on Committees, Attach. #6.
The committee members requested that the Committee on Committees add language so that people serving on the committee are aware of the potential for summer meetings. This notification is a standard practice with other committees.
Vote: 22/22 yes. Motion passes.
 - FSH 3490 General Salary Information – Brandi Terwilliger, Director of Human Resources, Attach. #7.

This policy was presented last week. Based on the Senate recommendations, it has been revised to keep those procedures in FSH. The income tax withholding and the W2 form have been removed, since those are federal requirements and not U of I policy.

No questions

Vote: 22/22 yes. Motion passes.

- FSH 3480 Compensation for Service in Addition to Regular Duties – Brandi Terwilliger, Director of Human Resources, Attach. #8.

Minor clarification edits. Confirmed changes with Provost Office. FAC also suggested revisions (in brown text).

Vote: 22/22 yes. Motion passes.

- Proposed changes to the University Catalog (voting)

- Admissions Requirements – Steve Shook, Forest, Rangeland and Fire Sciences

The final version of the UCC recommendation didn't arrive in time to be included in this binder.

There was a brief discussion on the status and procedures.

Motion to postpone (Tibbals, Mittelstaedt).

Vote: 20/20 yes. Motion passes.

- Proposed Changes to the Administrative Procedures Manual (non-voting)

- APM 50.16 Criminal Background Check– Brandi Terwilliger, Director of Human Resources, Attach. #9.

Slight edit to the policy for prior coverage, given we cannot access old records. Removal of the J-1 Scholars exception per IPO – they do not get a background check and should get one.

No questions.

- **Announcements and Communications**

- VERSO Research Information Management System and Institutional Repository – Ben Hunter, Dean of Libraries.

Vandal Expertise, Research, and Scholarship Online (VERSO), preserves and provides access to the research and creative output of the university of Idaho faculty, students and staff. This serves several functions. First, research information management systems, which support transparent aggregation, curation and use of data about institutional research activities.

Basically, these systems describe an institution, with its research and scholarship activities. For a decade, we have used VIVO, supported out of the Library. It's open source and free. We have a large volume of good data and some nice visualizations. However, there are shortcomings, typical for open-source software. Individual people cannot go in and modify their profiles within VIVO. It's a cumbersome process, so we're looking at replacing that. Institutional repositories are digital collections to capture the intellectual output of a single university community – a digital space with an institution's output, theses and dissertations, publications, preprints, open access deposit and more. We're repurposing digital collection software. It's free, but not ideal – doesn't allow for self-deposit. That is again a cumbersome process through the library. We're in the middle of kind of a soft rollout of VERSO right now.

The release timeline and future plans can be found in the presentation slides attached to these minutes. Visit verso.uidaho.edu.

No questions.

- IT Committee Update – Darryl Woolley, Business and Economics, Jean-Marc Gauthier, Chair of Faculty Senate.

Talking points from a recent meeting of Darryl Woolley, Jean-Marc Gauthier and Teresa Amos.

Priorities:

- Changes in institutional perspective of technology.
- Need for a different conversation about technology – how technology serves teaching and research.
- Cadence of change and impact of AI.
- Make sure everyone is on board.
- Timely privacy issues.

Discussion:

Thanks to Teresa Amos for her patience and help throughout the semester. We are happy to have found a way forward to collaborate with OIT.

A senator had a question about staffing. Is there an update on that? Are there open positions to be filled, or do we not have any openings? Understaffing is usually the answer when it takes two to four weeks to get basic things done. Teresa replied that staffing is an on-going issue.

Faculty Secretary: Is the IT committee the best path to get problems addressed, moving forward? Darryl recommended some sort of working group looking at complaints, including a couple of faculty members who are especially involved with IT issues. A formal process to handle concerns would be helpful. Also, it would be helpful to have a faculty member participate in the decisions for exceptions to the procurement process, so that the faculty's perspective can be heard, and the faculty can be aware that their perspectives have been heard in making those decisions. There should be a formal way to handle communication between faculty and OIT comprehensively.

New Business:

- Urgent: we need the names of new senators for the 2024-25 vacant seats. Next week, Senate 2024-25 will take nominations for the 2024-25 officers.
- A senator reported a noticeable increase of extra-curricular activities among students in his college. In a class of 45 students, on any given day, three to five of them need to be excused to participate in extracurricular activities. This creates more work and rescheduling problems.

Adjournment:

The agenda being completed, the Chair adjourned the meeting at 4:44pm.

Respectfully Submitted,

Francesca Sammarruca
Secretary of the University Faculty & Secretary to Faculty Senate

First-Year Admission Requirements

First-year applicants who graduated from high school prior to 1995 must meet the requirements in effect for their graduation year. A degree-seeking applicant applying directly from high school or with fewer than 14 semester credits of transferable college work earned after high school graduation must complete the following:

- 1) Submit high school GPA.
 - a) New first-year applicants with a cumulative GPA of 3.0 or higher are automatically admitted and are not required to submit test scores.
 - b) Applicants with cumulative GPAs of 2.30-2.59 will be admitted through the Vandal Gateway Program.
 - c) Applicants with a GPA below 2.30 are welcome to appeal through our Admissions Committee.
- 2) Submit ACT, SAT, or ISAT test score.
 - a) New first-year applicants that are Idaho residents achieving scores of 3 or higher on both the ISAT Math and Literacy tests are automatically admitted regardless of GPA.
 - b) New first-year applicants with a cumulative GPA between 2.60-2.99 must submit an ACT or SAT test scores. Applicants not submitting an ACT or SAT test score must go through our Admissions Committee.
 - c) Every applicant who has a test score (ACT, SAT, or ISAT) is encouraged to provide it for admission. Providing a test score assists in class placement and may make an applicant eligible for certain scholarship opportunities.

| High School GPA | ACT Composite | SAT Verbal + Math | ISAT Math + Literacy |
|-----------------|-------------------------|-------------------------|-------------------------|
| Any GPA | N/A | N/A | ≥ Level 3 + 3 |
| 3.00-4.00 | Test score not required | Test score not required | Test score not required |
| 2.60-2.99* | 15+ | 740+ | N/A |
| 2.30 -2.59* | Test score not required | Test score not required | N/A |

*Students with a 2.60-2.99 GPA and an ACT <15 or SAT <740 will be admitted to the Vandal Gateway Program. Students with a 2.30-2.59 GPA will be admitted to the Vandal Gateway Program regardless of test scores.

First-Year Admission Requirements

First-year applicants who graduated from high school prior to 1995 must meet the requirements in effect for their graduation year. A degree-seeking applicant applying directly from high school or with fewer than 14 semester credits of transferable college work earned after high school graduation must complete the following:

1) Submit high school GPA.

- a) New first-year ~~students~~ applicants with a cumulative GPA of 3.0 or higher are automatically admitted and are not required to submit test scores.
- b) Applicants with cumulative GPAs of 2.30-2.59 will be admitted through the Vandal Gateway Program.
- b)c) Applicants with a GPA below 2.30 are welcome to appeal through our Admissions Committee.

2) Submit ACT, ~~or~~ SAT, or ISAT test scores.

- a) New first-year applicants that are Idaho residents achieving scores of 3 or higher on both the ISAT Math and Literacy tests are automatically admitted regardless of GPA.
- e)b) New first-year applicants with a cumulative GPA between 2.60-2.99 must submit an ACT or SAT test scores. Applicants not submitting an ACT or SAT test score must go through our Admissions Committee. ~~who do not provide test scores will automatically be considered for admission if their cumulative unweighted GPA is 2.60-4.00. Those who have cumulative~~

~~d)c) ___ GPAs of 2.30–2.59 who do not have test scores will be~~

~~e)d) ___ admitted through the Vandal Gateway Program.
Students in~~

~~e) this GPA range are also welcome to appeal through
our Admissions Committee.~~

2)f) ___ Every applicant student who has a test score (ACT, SAT, or ISAT) is encouraged to provide it for admission ~~as well as class placement.~~ Providing a test score assists in class placement and may make an applicant eligible for certain scholarship opportunities.

Formatted: Font: Not Bold
Formatted

3) ~~Graduate from a regionally accredited high school with a combination of cumulative GPA¹ and test scores² as defined in the following table:~~

| High School GPA | ACT Composite | SAT Evidence-Based Reading & Writing + Math | SAT Critical Reading + Math | ISAT |
|----------------------------|------------------------------------|--|--|------------------------------------|
| Any GPA | N/A | Any test score | N/A | ≥ Level 3 + 3 |
| 3.00 – 4.00 | Test score not required | Test score not required | Any test score | Test score not required |
| 2.60 – 2.99* | Any test score 15+ | Any test score 740+ | Any test score | N/A |
| 2.50 – 2.59 | 17–36 | 910–1600 | 830–1600 | |
| 2.40 – 2.49 | 19–36 | 990–1600 | 910–1600 | |
| 2.30 – 2.59* | Test score not required | 1070–1600 | N/A | 990–1600 |
| 2.20 – 2.29 | 23–36 | 1140–1600 | 1070–1600 | |

*Students with a 2.60-2.99 GPA and ACT <15 or SAT <740 will be admitted to the Vandal Gateway Program. Students with a 2.30-2.59 GPA will be admitted to the Vandal Gateway Program regardless of test scores.

Department/Unit:

Nuclear Engineering and Industrial Mgmt

Effective Catalog Year

2024-2025

Program Title

Nuclear Materials Engineering Graduate Academic Certificate

Degree Type

Certificate

Please note: Majors and Certificates over 30 credits need to have a state form approved before the program can be created in Curriculum.

Program Credits

15

CIP Code

14.2301 - Nuclear Engineering.

Will the program be Self-Support?

No

Will the program have a Professional Fee?

No

Will the program have an Online Program Fee?

No

Will this program lead to licensure in any state?

No

Will the program be a statewide responsibility?

No

Financial Information

What is the financial impact of the request?

Less than \$250,000 per FY

Note: If financial impact is greater than \$250,000, you must complete a Program Proposal Form

Describe the financial impact

None. Classes are already in the Nuclear Engineering curriculum and are periodically taught by the department faculty.

Curriculum:

A graduate certificate in nuclear materials aims to provide students with a foundational understanding of the principles and practices of materials engineering in nuclear context. These course offerings will address the following key components:

- Fundamental nuclear science and engineering,
- Fundamentals of materials engineering,
- Materials degradation and safety in reactor environments, and
- Waste management

To obtain the certificate, students must complete 15 credits from the following courses, nine of which must be at the graduate level.

All required coursework must be completed with a grade of B or better (O-10-b (<https://catalog.uidaho.edu/general-requirements-academic-procedures/o-miscellaneous/>)).

Program Requirements: The graduate certificate program is designed for part-time study.

Required Coursework:

| Code | Title | Hours |
|--------------------------------|--|-------|
| <i>Core Courses</i> | | |
| NE 450 | Principles of Nuclear Engineering | 3 |
| NE 438 or NE 538 | Fundamentals of Nuclear Materials | 3 |
| NE 537 | Radiation Effects on Materials | 3 |
| Select two from the following: | | 6 |
| NE 504 | Special Topics | |
| NE 512 | Nuclear Components Inspection | |
| NE 527 | Nuclear Material Storage, Transportation, and Disposal | |
| NE 551 | Nuclear Reactor Fuels | |
| NE 554 | Radiation Detection and Shielding | |
| NE 582 | Spent Nuclear Fuel Management and Disposition | |
| NE 585 | Nuclear Fuel Cycles | |
| NE 536 | Electrochemical Engineering | |

Total Hours

15

Courses to total 15 credits for this certificate

Students should consult with their academic advisor regarding this certificate.

Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and

Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

Can 50% or more of the curricular requirements of this program be completed via distance education?

Yes

If Yes, can 100% of the curricular requirements of this program be completed via distance education?

Yes

Note: Existing programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group B change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

In which of the following geographical areas can this program be completed in person?

Online Only

Student Learning Outcomes

List the intended learning outcomes for program component. Use learner centered statements that indicate what will students know, be able to do, and value or appreciate as a result of completing the program.

LO#1: Gain knowledge and skills in a wide range of nuclear materials engineering, from nuclear power generation and nuclear materials storage to medical isotope production.

LO#2 - An ability to select, design, and develop materials systems or components for different nuclear engineering applications such as current and advanced nuclear reactors, used fuel storage canisters, and radiation shielding systems using basic materials and nuclear engineering principles while following real-world constraints.

LO#3 - An ability to effectively communicate to clients, engineers, or the general public on topics related to engineering solutions in nuclear engineering, technologies, and/or related fields.

Overall, these learning outcomes demonstrate that students who have completed a certificate in nuclear materials engineering have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the nuclear industry. The students are well-prepared to pursue further education or employment in the nuclear field.

Describe the assessment process that will be used to evaluate how well students are achieving the intended learning outcomes of the program component.

The assessment process for the certificate in nuclear materials engineering will involve regular evaluations of the learning outcomes. This assessment process will include reporting on student homework assignments, term papers, quizzes, group projects, presentations, and exams. The summary of the evaluations will be submitted as part of the institutional assessment and accreditation process.

How will you ensure that the assessment findings will be used to improve the program?

Course syllabus and student evaluation will be reviewed each semester, and course content will be adjusted as necessary. The department will review the annual assessment feedback from the industry partner and department advisory boards, and exit surveys of the students. Corrective actions will be undertaken whenever students do not meet the expected criteria for learning outcomes, including emphasizing specific content and adding learning activities and resources as needed.

What direct and indirect measures will be used to assess student learning?

Direct measures will include exams, assignments, and class projects, which will be required for all the relevant classes. These tasks will be graded on a regular basis. Indirect measures will include self-assessment by students of achievement levels for each learning outcome. An exit survey will also be used as an indirect measure to assess student learning.

When will assessment activities occur and at what frequency?

Assessments of at least one learning outcome will be performed each year as part of the regular course activities. The department will evaluate the students' assessment, industry partners, and advisory boards' feedback and take corrective actions as necessary.

Student Learning Outcomes

Learning Objectives

LO#1: Gain knowledge and skills in a wide range of nuclear materials engineering, from nuclear power generation and nuclear materials storage to medical isotope production.

LO#2 - An ability to select, design, and develop materials systems or components for different nuclear engineering applications such as current and advanced nuclear reactors, used fuel storage canisters, and radiation shielding systems using basic materials and nuclear engineering principles while following real-world constraints.

LO#3 - An ability to effectively communicate to clients, engineers, or the general public on topics related to engineering solutions in nuclear engineering, technologies, and/or related fields.

Overall, these learning outcomes demonstrate that students who have completed a certificate in nuclear materials engineering have acquired the knowledge, skills, and abilities necessary to succeed in various fields of the nuclear industry. The students are well-prepared to pursue further education or employment in the nuclear field.

A clearly stated rationale for this proposal must be included or the University Curriculum Committee will return the proposal for completion of this section. The rationale should provide a detailed summary of the proposed change(s). In addition, include a statement in the rationale regarding how the department will manage the added workload, if any.

The nuclear industry is reviving and going through a renaissance. Nuclear energy is environmentally sustainable and is essential in the form of modular reactors and micro-reactors to charge the electric vehicles that will dominate the roads. The proliferation of nuclear energy and the safe operation of nuclear reactors depend highly on how we address the issues related to materials and their degradation. This certificate program will prepare the students to address the materials-related issues of nuclear engineering. This certificate will attract students from various disciplines. There are only two other universities (WSU-Tricities, and UWisconsin) that offer certificate programs in nuclear materials.

Furthermore, the certificate will help meet the employment needs of our industry partners. This certificate program is intended to prepare students for careers in the nuclear industry or nuclear medicine fields and future graduate studies in nuclear engineering. The department currently already offers the courses required for the certificate. All courses include nuclear-specific content.

Title

Department of Nursing

Request Details

The new School of Health and Medical Professions located within the College of Graduate Studies will be supported by the many excellent administrative and academic units at the University of Idaho main campus (Financial Services, Human Resources, Risk Management, Facilities Management, and Business & Administrative services). We are currently proposing the new school and six new programs under three departments (Department of Medicine, Department of Clinical Medicine and the Department of Nursing). The Department of Medicine and the Department of Clinical Medicine are already formed. Our Idaho WWAMI Medical Education program is also included in this organizational structure and is housed in the Department of Medicine.

What are the goals and objectives for the new unit?

As a unit of the University of Idaho, we intend to establish the School of Health and Medical Professions (SHAMP) which will provide the citizens of the State of Idaho an opportunity to fill a critical workforce shortage in healthcare. Idaho's population has been growing at an exceptional rate for five consecutive years, surpassing the national growth rate by a substantial margin. The mission of SHAMP is to improve the health of the people of Idaho by developing a robust academic health care delivery system that will educate and set forth a skilled workforce of healthcare professionals to attack this critical healthcare shortage.

To fulfill our mission, the following goals and objectives are set forth:

- To create educational opportunities to train the citizens of the State of Idaho in healthcare professions which will in turn expand and strengthen the healthcare services in Idaho.
- Expand health care academic programs to address the critical workforce shortage.
- Addressing Idaho's rural health care needs which often face the brunt of workforce shortages.
- Developing academic programs to help train and retain healthcare professionals, ensuring that even the most remote areas receive adequate medical and mental health services.
- Meeting the needs of the future which shows a continual population growth both in Idaho and nationally. This underscores the importance of establishing healthcare academic programs now to meet future workforce needs and reduce reliance on out-of-state recruitment.
- To build the school upon the highest quality, basic, applied, and clinical research available at the University of Idaho.

1. What is the relationship of the unit to the university's mission and priorities? Is the unit involved in instruction and if so, to what extent?

The mission of the University of Idaho is to shape the future through innovative thinking, community engagement and transformative education. The School of Health and Medical Professions stands firm in this mission by providing educational offerings that will transform the lives of our students through engaged learning and self-reflection. Our teaching and learning will include graduate, professional and continuing education offered through face-to-face instruction, technology-enabled delivery and hands-on experience. Our educational programs will strive for excellence and will be enriched by the knowledge, collaboration, diversity and creativity of our faculty, students and staff. The programs listed below have been identified as areas of workforce development to help meet the needs of the healthcare shortage.

The School of Health and Medical Professions will be the foundation on which our programs will grow. The school will be located within the College of Graduate Studies. Please note that the bulk of these specific programs are currently not being offered in our state institutions, except for the Physician's Assistant Program.

Doctorate Psychology (PsyD) program*

The entire state of Idaho is a mental health shortage area and Idaho has the lowest number of psychiatrists per capita. Considering overall mental health care, Mental Health America ranks Idaho 49th out of 51 (including D.C.) in adult care, 45th in youth care, while ranking 50th (second highest) in the prevalence of mental illness (19% average). The University of Idaho has a foundation of faculty and facilities that can be leveraged to develop a doctorate in this clinical psychology program that will address deficiencies in mental health care. Once implemented,

graduates will be able to focus on mental health needs related to early childhood development, adolescent, and young adult care needs, such as suicide prevention, substance use disorder and mental health counseling, and geriatric care.

Direct-Entry Master of Science in Nursing (MSN)

The University of Idaho has a foundation of faculty and facilities that can be leveraged to develop a Master of Science in Nursing (MSN). The MSN prepares the graduate for a position as a Registered Nurse, as well as a leadership role in varied settings such as hospitals, health department, clinics, among other practice areas.

Doctorate – Anatomical Science Education (DAS)*

Expert knowledge of the anatomical sciences is central to diagnosis and treatment of disease and as such in-depth coursework in this area has long been the foundation of health sciences curricula. Despite this, health sciences programs nationwide are facing an increasing shortage of highly trained anatomy educators. The Doctoral of Anatomical Sciences program is designed to train individuals to become fully qualified educators in all of the anatomical disciplines and conduct educational scholarly research for promotion and tenure.

Master of Science, Gerontology

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration, and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers.

Certified Registered Nurse Anesthetist (CRNA) Doctorate*

The practice of anesthesia is a recognized specialty in nursing. Considered an essential role to the health care workforce, nurse anesthetists provide anesthesia and related care before and after surgical, therapeutic, diagnostic, and obstetrical procedures. They also provide pain management and emergency services such as airway management.

Physician Assistant (PA) - Masters

Working interdependently with physicians, PAs (Physician Assistant) provide diagnostic and therapeutic patient care in virtually all medical specialties and settings. They take patient histories, perform physical examinations, order laboratory and diagnostic studies, prescribe medications, and develop patient treatment plans. Their job descriptions are as diverse as those of their supervising physicians, and include clinical practice, patient education, team leadership, medical education, health administration, and research.

***Program proposals are in process for each of these academic programs and will be submitted separately to SBOE for review and approval.**

2. What is the demand for the unit's services? What population will the unit serve?

Idaho's population has been growing at an exceptional rate for five consecutive years, surpassing the national growth rate by a substantial margin.

This population surge has strained the state's healthcare system, underscoring the necessity for expanding healthcare services within Idaho. For example, Idaho ranks at the bottom among all

states in terms of practicing physicians per capita. Moreover, a significant percentage of the state's physicians are approaching retirement age, further exacerbating the shortage.

Furthermore, it is quite evident that we simply do not have enough health care workers to take care of us and the situation could get worse if we do not act. The Idaho Business for Education sponsored a Health Care Summit in June of 2022 to address the workers' healthcare crisis. In the report, they explored why we have a crisis, how it affects our health care professionals and their patients, and it recommends specific ways our leaders can help solve it. One of the chief ways to solve this crisis is ramping up educational opportunities for the citizens in the State of Idaho. Please see following white paper from the Idaho Business for Education: <http://idahobe.org/wp-content/uploads/2022/08/HEALTH-CARE-SUMMIT-WHITE-PAPER-3.0.pdf>

Healthcare jobs in Idaho are projected to be the fastest growing professions this decade, with nearly 10,000 new jobs being projected, according to the Idaho Department of Labor. The population that the new School will serve encompasses a broad demographic from the classroom to the bedside, by training a healthcare workforce who will in turn provide essential healthcare services to the people of Idaho.

Based on this important need, we propose to create the School of Health and Medical Professions at the University of Idaho which will provide the citizens of the State of Idaho an opportunity to fill this critical workforce shortage. The school will include three new departments and six new programs, along with existing programs such as the WWAMI Medical Education program and the Athletic Training program. The areas of justification include the following:

- **Critical Workforce Shortage:** Idaho's healthcare workforce shortage poses a significant threat to public health and access to quality care. Expanding healthcare academic programs is essential to address this urgent need.
- **Enhancing Access to Care:** Building on the success of the WWAMI medical program and partnerships, this budget request will allow the University of Idaho to initiate new healthcare programs within the School of Health and Medical Professions.
- **Addressing Rural Healthcare Needs:** Rural communities often face the brunt of workforce shortages. Developing academic programs will help train and retain healthcare professionals, ensuring that even the most remote areas receive adequate medical and mental health services.
- **Future Demand:** Projected growth in demand for healthcare professionals, both in Idaho and nationally, underscores the importance of establishing healthcare academic programs now to meet future workforce needs and reduce reliance on out-of-state recruitment.

3. Describe the proposed unit's organizational structure.

The new School of Health and Medical Professions located within the College of Graduate Studies will be supported by the many excellent administrative and academic units at the University of Idaho main campus (Financial Services, Human Resources, Risk Management, Facilities Management, and Business & Administrative services). The Dean for the School of Health and Medical Professions provides leadership to the Administration and Business Affairs division, which includes an executive assistant, support staff in finance, marketing and strategic initiatives, and laboratory management. The dean will oversee five academic and

business divisions. We are currently proposing the new school and six new programs under three departments (Department of Medicine, Department of Clinical Medicine and the Department of Nursing). The Department of Medicine and the Department of Clinical Medicine are already formed. Our Idaho WWAMI Medical Education program is also included in this organizational structure and is housed in the Department of Medicine.

- 1) Department of Medicine
 - a) WWAMI Medical Education Program
 - b) Doctorate of Anatomical Sciences
 - c) Masters of Science – Gerontology

- 2) Department of Clinical Medicine
 - a) Doctorate of Psychology
 - b) Physician Assistant
 - c) Athletic Training

- 3) Department of Nursing*
 - a) Masters of Science – Nursing
 - b) Doctorate, Certified Registered Nurse Anesthetist

*To better align the proposed nursing programs with the University of Idaho policy, we propose to establish a Department of Nursing to be housed in the School of Health and Medical Professions. This will help to streamline and clarify our administrative tasks. We do not anticipate any additional cost. As instructed by board staff, this serves as our letter of notification process.

We are working closely with the College of Education, Health and Human Sciences to transition their Athletic Training Programs into the new School as shown on the attached organizational chart. In addition, our future strategic plan is to improve healthcare for all on-campus students and create “Vandal Health” which will provide hands-on experience and training for our students in these healthcare programs. Note: Please see the attached organizational chart.

4. What targets have been set to assess the proposed unit’s success in achieving objectives?

GOAL 1: A WELL, EDUCATED CITIZENRY – Continuously improve access to health and medical education for individuals of all backgrounds, ages, abilities, and economic means.

GOAL 2: CRITICAL THINKING AND INNOVATION - SHAMP will provide an environment for the development of innovative ideas, and practical and theoretical knowledge to foster the development of healthcare workers (psychologists, gerontologists, physician assistants, nurses, anatomists, and future physicians) who contribute to the health and wellbeing of Idaho’s people and communities.

GOAL 3: Effective and Efficient Delivery Systems – Deliver health and medical education, training, research, and service in a manner which makes efficient use of resources and contributes to the successful completion of our health and medical education program goals for Idaho.

5. Briefly describe the processes that will demonstrate the quality of the unit.

1. Set School and program performance measures as a series of goals to meet over time.
2. Define goals and objectives of the school and its programs and evaluate.
3. Report and use the evaluation findings to improve the school, programs, and its courses.
4. Each program will have an assessment process to be used for continuous program improvement through the following mechanisms:
 - To evaluate how well students are achieving the intended learning outcomes, the following assessment processes will be employed:
 - Examinations and Quizzes: Regular assessments will include written examinations and quizzes to evaluate knowledge acquisition and critical thinking skills.
 - Clinical Skills Assessment: Clinical skills will be assessed through direct observation, practical examinations, and skills checklists during clinical rotations.
 - Case Studies and Care Plans: Students will complete case studies and care plans to demonstrate their ability to apply theoretical knowledge to real-world patient care scenarios.
 - Reflective Journals and Portfolios: Students will maintain reflective journals and e-portfolios, providing insights into their personal and professional growth.
 - Peer and Self-Assessment: Peer evaluations and self-assessments will be incorporated for group projects and personal reflection on skills development.

Assessment findings will be used for continuous program improvement through the following mechanisms:

- Faculty Meetings: Regular faculty meetings will involve discussions of assessment results, with a focus on identifying areas of improvement and refining teaching methods and curriculum.
- Curriculum Review: Assessment data will inform curriculum revisions, ensuring alignment with current healthcare trends and best practices.
- Faculty Development: Faculty will receive training and support to enhance assessment techniques and teaching strategies, addressing areas where student performance needs improvement.
- Feedback Loops: Continuous feedback loops will be established with students, incorporating their input to make program enhancements.

Assessment Activity Timing - Assessment activities will occur throughout the program at various frequencies:

- Formative assessments (quizzes, in-class discussions) will be ongoing throughout each semester.
- Summative assessments (midterm, final examinations) will occur at the end of relevant courses and following year one and year two. Alumni and industry surveys will be completed two years following graduation.
- Clinical skills assessments and evaluations will be conducted during clinical rotations.
- Case studies, care plans, and projects will be assigned periodically.

6. Indicate the number of students, businesses, industries, and/or other clients to be served by this unit. Include a description of faculty participation and student involvement in the unit if applicable.

| Entering Enrollment | Program/Degree Title | |
|---|---|-----------------------|
| 15 | Direct Entry - Masters Degree, Nursing (MSN) | |
| 20 | Doctorate – Anatomical Science Education (DAS) - Self Support | |
| 20 | Masters of Science – Gerontology – Self Support | |
| 10 | Certified Registered Nurse Anesthetist (CRNA) - Self Support | |
| 20 | Physician Assistant | |
| 15 | Doctorate of Psychology (PsyD) | |
| Academic Personnel | | Description |
| 11 | Fulltime Faculty | |
| 4.5 | Parttime Faculty | |
| 7 | Administration and Staff | |
| Hospital/Clinic Training Sites | | Location |
| Gritman Medical Center and Medical Clinics | | Moscow, Idaho |
| St. Joseph Regional Medical Center | | Lewiston, Idaho |
| Tri State Hospital and Medical Clinics | | Clarkston, Washington |
| Whitman Hospital and Medical Clinics | | Colfax, Washington |
| Pullman Regional Hospital and Medical Clinics | | Pullman, Washington |
| Kootenai Medical Center | | Coeur d’Alene, Idaho |
| Bonner General Health | | Sandpoint, Idaho |
| North Idaho Acute Care Hospital | | Post Falls, Idaho |

7. Financial Impact: Using the **budget template**, provide a narrative budget summarizing the needs and requirements for implementing the new unit.

The WWAMI Medical Education Program has recently submitted a request for Fiscal Year 2025 to the State of Idaho for educational support to create a new School of Health and Medical Professions (SHAMP). Based on feedback from policymakers and Idaho business leaders, our request is dedicated to addressing healthcare workforce needs, one of the most pressing issues the state is facing today. We acknowledge the importance of flexibility to adapt to evolving challenges and workforce needs of the future. The budget summary is as follows:

Positions will be full-time, and part-time and most will be benefit-eligible.

Healthcare Workforce – this request for the new School includes the programs that will require State support (Doctorate in Psychology, along with state support for the new School which includes Associate Dean of Curriculum, Associate Dean of Clinical Curriculum, Associate Dean of Admissions and Assessment, as well as department chairs and program coordinators. (Requesting 3.5 FTP; \$539,200 total General Fund PC funding with benefits). In addition to the state support, SHAMP will match the FTE and salary for a total personnel cost of \$946,700 (includes fringe benefits) for 7.0 FTE.

All personnel costs are based on market data and costs for comparable positions as per the University of Idaho’s Market-based Compensation model.

The budget included in this proposal not only includes the budget request for FTE, salary and benefits that were submitted to the State of Idaho for FY25. It is necessary to include various expenditures to support the

School and its programs. Therefore, the budget for this proposal includes \$100,000 in operating expenditures, as well as a one-time request for \$200,000 in capital outlay for equipment costs. The total amount for the FY25 budget is \$1,046,700.00. Each following year includes a 5% inflation added to the budget for all expenditures.

Current staff and faculty will be re-directed. Faculty and staff within WWAMI will be redirected to the new School of Health and Medical Professions. Please see the organizational chart under supportive documentation.

Alternate funding has been identified for the Physician Assistance Program, as required by legislative intent for FY 2025.

In conclusion, the primary beneficiaries, if this request is granted, are the individuals and communities who will be served by future PAs or Nurses, Clinical Psychologists, and other graduates of the new School of Health and Medical Professions. Thus, the impact could encompass all of Idaho. The approval of the proposal will reduce shortages of health professionals and enable Idahoans seeking care to obtain it. Many Idahoans who seek these health professional degrees will be more likely to stay in Idaho to practice.

Program Resource Requirements.

- Indicate all resources needed including the planned FTE enrollment, projected revenues, and estimated expenditures for the first **four** fiscal years of
- Include reallocation of existing personnel and resources and anticipated or requested new resources.
- Second and third year estimates should be in constant dollars.
- Amounts should reconcile subsequent pages where budget explanations are provided.
- If the program is contract related, explain the fiscal sources and the year-to-year commitment from the contracting agency(ies) or party(ies).
- Provide an explanation of the fiscal impact of any proposed discontinuance to include impacts to faculty (i.e., salary savings, re-assignments).

I. PLANNED STUDENT ENROLLMENT

| | <u>FY 25</u> | | <u>FY 26</u> | | <u>FY 27</u> | | <u>FY 28</u> | |

18 March 2024

Idaho State Board of Education
650 West State Street, 3rd Floor
Boise, ID 83702

Dear Idaho State Board of Education,

I am writing to express my wholehearted support for the University of Idaho and their proposed health professions programs. As President of North Idaho College, I am acutely aware of the healthcare challenges facing our state, particularly in northern Idaho, where shortages of healthcare providers have reached unprecedented levels.

The statistics paint a stark picture: with 98% of the state designated as health professional shortage areas, our citizens are left grappling with limited access to essential healthcare services. This not only impacts our economy but, more importantly, jeopardizes the well-being of our community members.

The University of Idaho's proposal to introduce a doctorate in clinical psychology (PsyD), a Physician Assistant program, and a direct entry Master of Science in Nursing are much-needed steps towards addressing these critical shortages. These programs are tailored to meet the specific needs of our region, where the shortage of healthcare professionals is most acute.

It's important to emphasize that these proposed programs are not intended to compete with existing offerings at other universities, but rather to complement and enhance the range of healthcare education available within the state. There is a clear and demonstrated need for these programs, with a level of interest that is currently underserved.

As we look towards the future, it is imperative that we invest in the growth of all health professional programs to ensure the vitality of our healthcare workforce. The University of Idaho, as our state's top research institution, is well-positioned to play a leading role in this endeavor.

(continued)

(continued from previous page)

I am enthusiastic about the prospect of collaboration between the University of Idaho's new health programs and our own North Idaho College health professions programs to expand collaborative initiatives. Together, we can work towards meeting the healthcare needs of northern Idaho and the state as a whole.

Thank you for your attention to this matter. I stand ready to offer any assistance or support necessary to bring these vital programs to fruition.

Sincerely,

A handwritten signature in black ink that reads "Nick Swayne". The signature is written in a cursive style with a large, looping initial "N".

Nick Swayne, PhD
President, North Idaho College

J-3-c. Scientific Ways of Knowing (8 credits , from two different disciplines, which include two accompanying labs OR 7 credits which includes a Core Science (CORS) course and one course with lab)

The purpose of this requirement is to develop a better understanding of the physical and biological world by learning some of the principles that explain the natural phenomena of the universe, the experimental method used to derive those principles, and their applications.

Study in this area is undertaken as part of the general education requirements in order to promote scientific literacy, that is, the ability to read and understand the science issues being debated in society. Scientific literacy is essential if citizens are to make informed judgments on the wide range of issues that affect their everyday lives. Students receiving passing grades in the natural and applied science courses of the general education curriculum will demonstrate competency in the following areas:

1. knowledge of scientific principles;
2. the ability to write clearly and concisely using the style appropriate to the sciences;
3. the ability to interpret scientific data;
4. the ability to analyze experimental design critically; and
5. the development of laboratory skills.

Course List

J-3-e. Humanistic and Artistic Ways of Knowing (6 credits, from two different disciplines) and Social and Behavioral Ways of Knowing (6 credits, from two different disciplines)

The purpose of these liberal arts courses is to provide students with critical tools for understanding the human experience and providing the means for students to respond to the world around them.

Humanistic and Artistic Ways of Knowing courses enable students to reflect upon their lives and ask fundamental questions of value, purpose, and meaning in a rigorous and systematic interpretative manner, with the goal of fostering understanding of culture and inspiring a citizenry that is more literate, respectful of diverse viewpoints, and intellectually inquisitive.

Social and Behavioral Ways of Knowing courses enable students to apply rigorous analytic skills for the purpose of explaining the dynamic interaction among history, institutions, society and ideas that shape the behaviors of individuals, communities and societies. With these skills students can critically address the social issues of our contemporary world.

Some courses on the humanities and social science lists may also satisfy the American diversity or international requirement.
